festation" of Christ), one of the oldest festivals of the Christian Church, and mentioned as such by Clement of Alexandria (*Stromat.* i, 1). Until the time of Chrysostom, it opened in the Eastern Church the cycle of festivals. It denoted at first the baptism of Christ, which, as Chrysostom himself remarks, was, in a higher sense than his birth, his real manifestation to men. A special festival of the birth of Christ arose later than the festival of Epiphany, and up to that time the commemoration of the birth of Christ was included in that of Epiphany. According to the testimony of Clement of Alexandria, it was at first celebrated at Alexandria by the Basilidians, but soon it was introduced into the orthodox Church also. Neander thinks that it did not originate with the Basilidians, but that they derived it from Jewish Christians in Syria and Palestine. The first trace of the festival in the Latin Church is found in 360, when, as Ammianus Marcellinus (xxi, 2) mentions, the emperor Julian took part in a celebration of the festival at Vienne. In the Western Church it came early to denote the manifestation of Christ to the Gentiles, with especial reference to his appearance to the wise men of the East, who came to adore him and bring him presents (Matt. ii, 1-12). Gradually the commemoration of other events in the life of Christ was connected with the celebration of Epiphany, as the working of the first miracle at the wedding at Cana (hence it was called "bethphania," manifestation in a house), and the feeding of five thousand persons (hence the name "phagiphania"). Prominent, however, in the Latin Church remained the celebration of Epiphany as the manifestation of Christ to the wise men. The tradition of the Church venerated the wise men as the "Three Holy Kings," and the festival itself was commonly called in the Church the festival of the Three Kings (*festum trium regum, festum Magorum, festum stellæ*). Like other high festivals, Epiphany was celebrated by a vigil, by the preaching of homilies, by the reception of the Lord's Supper, and by granting liberty to slaves. During the Middle Ages a dramatic representation of the oblation of the wise men was incorporated into divine worship, and in some countries these performances have maintained themselves until the present century. Peculiar popular amusements also connected themselves with the celebration of the day in Roman Catholic countries, and partly exist even at the present day. In the city of Rome there is on the festival of Epiphany a great exhibition in the College of the Propaganda, young men from all countries making addresses in their native languages, in order thus to represent the appearance of Christ to all nations. In some Western churches, especially in Africa, Epiphany was used as a day of baptism (*dies luminum*); but Pope Leo I was a decided opponent of this custom, calling it *irrationaliâlem novitàatem* (an unreasonable novelty). Among the Franks the custom was also known, and Charlemagne mentions it in an epistle to the bishop Garibald, but without approving it. Previously Gregory II, in 726, had forbidden to baptize except on Easter and Pentecost. In the Greek Church it was customary to consecrate the water on this day, and the custom still prevails in Russia.—Bingham, *Orig. Eccl.* bk. xx, chap. iv; Herzog, *Real-Encyclopædie*, iv, 94; Wetzer u. Welte, *Kirchen-Lex.* iii, 283; Augusti, *Handbuch d. christl. Archæologie*, i, 528; ii, 476; Binterim, *Denkwürdigkeiten der christl.-kath. K.* vol. v. See THEOPHANY. (A. J. S.)

**Epîphi** (Ἐπιφί, 3 Macc. vi, 38), the name of the eleventh month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year: Copt. *ēpîp*; Arab. *apîb*. Its beginning corresponds with the 25th of June in the Julian calendar (Ideler, *Handb. d. Chronol.* i, 98, 144). In ancient Egyptian it is called "the third month [of] the season of the waters." See EGYPT. The name Epiphany is derived from that of the goddess of the month, *Apopt* (Lepsius, *Chron. d. Äg.* i, 111). The supposed derivation of the Hebrew month-

name *Abîb* from Epiphany is discussed in other articles. See MONTH.

**Episcopacy** (ἐπίσκοπος, *bishop*; ἐπισκοπεῖν, *to superintend*), the government of bishops in the Church, whether as an order superior to presbyters or not. For the classes, duties, insignia, elections, and jurisdiction of bishops, see BISHOP. For the controversy as to the exclusive validity of Episcopal orders, see SUCCESSION, APOSTOLICAL. We give, in this article, a brief statement of the origin of Episcopacy, and of the theories of Episcopacy maintained in the prominent Episcopal churches of Christendom.

1. *Origin of Episcopacy.*—The high Episcopal writers, both of the Church of Rome and the Church of England, maintain that the order of bishops takes the place of the apostles in the Christian Church by direct divine appointment. Their view has been stated as follows: "While our Lord remained upon earth he acted as the immediate governor of his Church. Having himself called the apostles, he kept them constantly about his person, except at one time, when he sent them forth upon a short progress through the cities of Judea, and gave them particular directions how they should conduct themselves. The seventy disciples whom he sent forth at another time are never mentioned again in the New Testament. But the apostles received from him many intimations that their office was to continue after his departure; and as one great object of his ministry was to qualify them for the execution of this office, so, in the interval between his resurrection and his ascension, he explained to them the duties of it, and he invested them with the authority which the discharge of those duties implied (Matt. xxviii, 19, 20; John xx, 21, 22). Soon after the ascension of Jesus, his apostles received those extraordinary gifts of which his promise had given them assurance, and immediately they began to execute their commission as the rulers of that society which was gathered by their preaching. In Acts vi we find the apostles ordering the Christians at Jerusalem to 'look out seven men of honest report,' who might take charge of the daily ministrations to the poor, and to bring the men so chosen to them, that 'we,' said the apostles, 'may appoint them over this business.' The men accordingly were 'set before the apostles, and when they had prayed they laid their hands on them.' Here are the apostles ordaining deacons. Afterward we find St. Paul, in his progress through Asia Minor, ordaining in every church elders, *πρεσβυτέρους* (Acts xiv, 23). The men thus ordained by St. Paul appear, from the Acts and the Epistles, to have been teachers, pastors, overseers of the flock of Christ; and to Timothy, who was a minister of the Word, the apostle speaks of 'the gift which is in thee by the putting on of my hands' (2 Tim. i, 6). Over the persons to whom he thus conveyed the office of teaching he exercised jurisdiction, for he sent to Ephesus to the elders of the church to meet him at Miletus; and there, in a long discourse, gave them a solemn charge (Acts xx, 17-35), and to Timothy and Titus he writes epistles in the style of a superior. He not only directs Timothy, whom he had besought to abide at Ephesus, how to behave himself in the house of God as a minister, but he sets him over other ministers. He empowers him to ordain men to the work of the ministry (2 Tim. ii, 2). He gives him directions about the ordination of bishops and deacons; he places both these kinds of office-bearers in Ephesus under his inspection, instructing him in what manner to receive an accusation against an elder who labored in word and doctrine; and he commands him to charge some that they teach no other doctrine but the form of sound words. In like manner he describes to Titus the qualifications of a bishop or elder, making him the judge how far any person in Crete was possessed of these qualifications; he gives him authority over all orders of Christians there; and he empowers him to reject heretics. Here,

then, is that apostle with whose actions we are best acquainted seemingly aware that there would be continual occasion in the Christian Church for the exercise of that authority over pastors and teachers which the apostles had derived from the Lord Jesus; and by these two examples of a delegation, given during his lifetime, preparing the world for beholding that authority exercised by the successors of the apostles in all ages. Accordingly, the earliest Christian writers tell us that the apostles, to prevent contention, appointed bishops and deacons; giving orders, too, that upon their death other approved men should succeed in their ministry. We are told that the other apostles constituted their first-fruits, that is, their first disciples, after they had proved them by the Spirit, bishops and deacons of those who were to believe; and that the apostle John, who survived the rest, after returning from Patmos, the place of his banishment, went about the neighboring nations, ordaining bishops, establishing whole churches, and setting apart particular persons for the ministry, as they were pointed out to him by the Spirit" (Watson, s. v.). In substance, the high Episcopalians claim that "after the ascension of our Lord, and before the death of the inspired apostles, there were in the Church three orders in the ministry—apostles, presbyters, and deacons; and these three orders have continued ever since. The name apostle, out of respect to the memory of the *inspired* apostles, was changed to bishop, while the *office* remained the same."

The view above given, however satisfactory it may be to high Episcopalians, is not adopted by the more moderate writers on that side, nor by other denominations of Christians. The following brief account, from Neander's Introduction to Coleman's *Apostolical and Primitive Church*, is both lucid and impartial. "The earliest constitution of the Church was modelled, for the most part, after that religious community with which it stood in closest connection, and to which it was most assimilated—the Jewish synagogue. This, however, was so modified as to conform to the nature of the Christian community, and to the new and peculiar spirit with which it was animated. Like the synagogue, the Church was governed by an associated body of men appointed for this purpose. The name of *presbyters*, which was appropriated to this body, was derived from the Jewish synagogue. But in the Gentile churches formed by the apostle Paul they took the name of *ἐπίσκοποι*, *bishops*, a term more significant of their office in the language generally spoken by the members of these churches. The name *presbyter* denoted the dignity of their office, while *bishop*, on the other hand, was expressive rather of the nature of their office, *ἐπισκοπεῖν τὴν ἐκκλησίαν*, *to take the oversight of the Church*. Most certainly no other distinction originally existed between them. But, in process of time, some one, in the ordinary course of events, would gradually obtain the pre-eminence over his colleagues, and, by reason of that peculiar oversight which he exercised over the whole community, might come to be designated by the name *ἐπίσκοπος*, *bishop*, which was originally applied to them all indiscriminately. The constant tumults, from within and from without, which agitated the Church in the time of the apostles, may have given to such a one opportunity to exercise his influence the more efficiently; so that, at such a time, the controlling influence of one in this capacity may have been very salutary to the Church. This change in the relation of the presbyters to each other was not the same in all the churches, but varied according to their different circumstances. It may have been as early as the latter part of the life of John, when he was sole survivor of the other apostles, that one, as president of this body of presbyters, was distinguished by the name of *ἐπίσκοπος*, *bishop*. There is, however, no evidence that the apostle himself introduced this change, much less that he author-

ized it as a perpetual ordinance for the future. Such an ordinance is in direct opposition to the spirit of that apostle. This change in the mode of administering the government of the Church, resulting from peculiar circumstances, may have been introduced as a salutary expedient, without implying any departure from the purity of the Christian spirit. When, however, the doctrine is, as it gradually gained currency in the third century—that the bishops are by divine right the head of the Church, and invested with the government of the same; that they are the successors of the apostles, and by this succession inherit apostolical authority; that they are the medium through which, in consequence of that ordination which they have received merely in an outward manner, the Holy Ghost, in all time to come, must be transmitted to the Church—when this becomes the doctrine of the Church, we certainly must perceive in these assumptions a great corruption of the Christian system. It is a carnal perversion of the true idea of the Christian Church. It is a falling back into the spirit of the Jewish religion. Instead of the Christian idea of a church, based on inward principles of communion, and extending itself by means of these, it presents us with the image of one like that under the Old Testament, resting in outward ordinances, and seeking to promote the propagation of the kingdom of God by external rites. This entire perversion of the original view of the Christian Church was itself the origin of the whole system of the Roman Catholic religion, the germ from which sprung the popery of the Dark Ages. We hold, indeed, no controversy with that class of Episcopalians who adhere to the Episcopal system as well adapted, in their opinion, to the exigencies of their Church. But the doctrine of the absolute necessity of the Episcopal as the only valid form of government, and of the Episcopal succession of bishops above mentioned in order to a participation in the gifts of the Spirit, we must regard as something foreign to the true idea of the Christian Church. It is in direct conflict with the spirit of Protestantism, and is the origin, not of the true catholicism of the apostle, but of that of the Romish Church. When, therefore, Episcopalians disown, as essentially deficient in their ecclesiastical organization, other Protestant churches which evidently have the spirit of Christ, it only remains for us to protest, in the strongest terms, against their setting up such a standard for the Christian Church. Far be it from us, who began with Luther in the Spirit, that we should now desire to be made perfect by the flesh (Gal. iii, 3)."

Bunsen gives the following view of the original character of the Episcopacy: "The episcopate was originally the independent position of a city clergyman, presiding over the congregation, with the neighboring villages, having a body of elders attached to him. Where such a council can be formed there is a complete Church—a bishopric. The elders are teachers and administrators. If an individual happen to be engaged in either of these offices more exclusively than the other, it makes no real alteration in his position, for the presbyters of the ancient Church filled both situations. Their office was literally an office, not a rank. The country clergymen were most probably members of the ecclesiastical council of the city church, as the bishops of the country towns certainly were members of the metropolitan presbytery" (*Hippolytus and his Age*, iii, 246).

Professor R. D. Hitchcock (*American Presbyterian Review*, Jan. 1867) gives a luminous sketch of the origin and growth of Episcopacy. Admitting that the Episcopal system was in full force in the Church before the end of the third century, he shows clearly, nevertheless, that it was not of apostolical origin, but a later growth of ecclesiastical development, as follows: (1.) The best Episcopal writers now admit that the Episcopal system is not to be found in the N. T. (2.) The earliest witness, outside of the N. T., is Clem-

ent of Rome (about A.D. 100), in whose *Epistle to the Corinthians* the words bishop and presbyter are used interchangeably. Dr. Hitchcock analyzes the letters of Ignatius († 115?) both in the Syriac version of his Epistles and in the shorter Greek version, giving every passage in which Episcopacy occurs. His conclusions are that, (1.) Admitting the substantial integrity of the texts, the strong infusion of Episcopacy in them "is best explained by supposing it to be a new thing, which Ignatius was doing, always and everywhere, his utmost to recommend. As special pleading for a novelty, the Episcopal tone of the Ignatian epistles is easily understood. (2.) The Ignatian Episcopacy is not diocesan, but Congregational. Each of the churches addressed had its own bishop, presbyters, and deacons. (3.) The apostolic succession (in Ignatius) is not Episcopal, but Presbyterian. The bishop is the representative of Christ, as Christ is of the Father; the presbyters are representatives of the apostles, and the deacons of the precept or commandment of Christ. In short, the Ignatian Episcopacy, instead of having the appearance of a settled polity, handed down from the apostles, has the appearance of being a new and growing institution, unlike what went before as well as what was coming after" (*Amer. Presb. Review*, Jan. 1867, p. 145).—The next witness is Irenæus († 202), who, according to Dr. Hitchcock, commonly uses the words "bishop," "episcopal," "episcopate" in the Ignatian Congregational sense; while in certain cited passages he uses "bishop" and "presbyter" interchangeably, as Clement does. This "wavering terminology is indicative, not of apostolic tradition, but of later genesis and growth, and that growth not yet completed."—Tertullian († 240?) draws the line distinctly between clergy and laity, and discriminates clearly between bishops, priests, and deacons. In Cyprian (248-258), as has been remarked above, Episcopacy is fully matured. (See CHURCH, ii, 328.)

II. *Episcopacy of the Roman Catholic Church.*—(1.) The theory of the Episcopacy according to Roman writers springs from the Romish doctrine of a visible Church. "An invisible Church" (Möhler, *Symbolism*, § 43) "needs only an inward, purely spiritual sacrifice, and a general priesthood;" but the visible Church, in its very idea, according to the Romish view, requires an external sacrifice, and the consecration of especial priests to perform it. The priest is supposed to receive the internal consecration from God through the external consecration of the Church—that is to say, he receives the Holy Ghost through the imposition of hands of the bishops. The stability of the visible Church is supposed to require, therefore, an ecclesiastical ordination, originating with Christ, and perpetuated in uninterrupted succession; so that, as the apostles were sent forth by Christ, they, in their turn, instituted bishops, and these have appointed their successors down to our days. But, if these bishops are to form a perpetual corporation, they need a centre and head connecting them firmly together, and exercising jurisdiction over them, and this head is found in the pope. The Episcopacy, with the pope at its head, is revered in the Church of Rome as a divine institution.

(2.) We say "with the pope at its head," for this point is essential to the Romish idea of an Episcopacy *jure divino*. The Roman Church has been divided on this question for ages. It formed one of the chief controversies in the Council of Trent, where many of the bishops earnestly endeavored to have their office pronounced to be of divine right apart from the pope, while the papal legates strenuously, but adroitly, resisted this claim, and managed to prevent its authorization by the council. The declarations of Trent on the subject are as follows (sess. xxiii, *De Reformatione*, ch. iv): "The sacred and holy synod declares that, besides the other ecclesiastical degrees, bishops, who have succeeded unto the place of the apostles, princi-

pally belong to the (*this*) hierarchical order; that they are placed, as the apostle says, by the Holy Ghost to rule the Church of God (Acts xx, 28); that they are superior to priests; confer the sacrament of ordination; ordain the ministers of the Church, etc." Further (same session, Can. vi): "If any one shall say that in the Catholic Church there is not a hierarchy instituted by divine ordination, consisting of bishops, priests, and ministers, let him be anathema." And also (Can. vii), "If any one shall say that bishops are not superior to priests, or that they have not the power of confirming and ordaining, etc., let him be anathema." Nothing is said here of the *divine right* of the Episcopal order. But, in fact, it is not even called an order at all. In chapter ii of the same session (*Touching the seven orders*) we have priests, deacons, subdeacons, acolytes, exorcists, readers, and door-keepers, but not a word about bishops. So far as order is concerned, the bishops are simply priests. *The Catechism of the Council of Trent* declares that the order of priesthood, though essentially one, has different degrees of dignity and power—1, simple priests; 2, bishops; 3, archbishops; 4, patriarchs; and, 5, superior to all, the sovereign pontiff. The history of the stormy 22d session of the council throws great light upon these decrees. A canon was proposed concerning "the institution of bishops," and the Spanish prelates demanded an addition to it, declaring the Episcopate to be of divine right. This question arose, in fact, in 1546, and was before the council, in some shape or other, until 1562 (sess. xxii), when it took the precise form, "Are bishops superior to priests by divine right, or only by ecclesiastical and papal right?" The pope knew that if it should be decided that the bishops held their power directly from God, there was no ground for the doctrine that they existed only through the pope, and feared that they would ultimately assert their entire independence. The dispute ended in dropping altogether the canon on the "institution of bishops," and substituting the vague decree and canon above cited.

(3.) Two theories, then, of the Episcopate exist in the Roman Church: 1, the so-called *Papal system*, according to which the pope is the sole bishop by divine right, and all other bishops exist only through him, and derive their superiority to presbyters solely from him; 2, the *Episcopal system*, which asserts an independent divine right on the part of each bishop. The former is the ultramontane view, and it is now prevalent throughout almost all the Roman world. The latter is the moderate or Gallic view. It holds that the bishops are the rightful governors of the Church, superior to presbyters by the direct appointment of God; and maintains that the pope is, with regard to other bishops, *primus inter pares*, appointed for the sake of keeping up the unity of the Church as a corporate body. The question, in fact, turns upon that of the primacy of the see of Rome. See PRIMACY. The *Episcopal* theory was adopted by the Gallican clergy (see GALLICANISM), by the Jansenists (q. v.), and by Hontheim (q. v.). The present tendency of the entire Romish Church, however, is to the ultramontane theory.

The Romish Episcopacy, as a whole, is *diocesan*. See DIOCESE. The clergy of the diocese are subject to the bishop, but his authority does not extend beyond the diocese. There are, besides the diocesan bishops, bishops *vacantes*, bishops *in partibus*, bishops *suffragan*, etc., for which distinctions, see BISHOPS. "The division of the Church into dioceses may be viewed as a natural consequence of the institution of the office of bishops. The authority to exercise jurisdiction, when committed to several hands, requires that some boundaries be defined within which each party may employ his powers, otherwise disorder and confusion would ensue, and the Church, instead of being benefited by the appointment of governors, might be exposed to the

double calamity of an overplus of them in one district, and a total deficiency of them in another. Hence we find, so early as the New-Testament history, some plain indications of the rise of the diocesan system in the cases respectively of James, bishop of Jerusalem; Timothy, bishop of Ephesus; Titus, of Crete, to whom may be added the angels or bishops of the seven churches in Asia. These were placed in cities, and had jurisdiction over the churches and inferior clergy in those cities, and probably in the country adjacent. The first dioceses were formed by planting a bishop in a city or considerable village, where he officiated stably, and took the spiritual charge, not only of the city itself, but the suburbs, or region lying round about it, within the verge of its [civil] jurisdiction, which seems to be the plain reason of that great and visible difference which we find in the extent of dioceses, some being very large, others very small, according as the civil government of each city happened to have a larger or lesser jurisdiction" (*Hook*). See Bingham, *Orig. Eccl.* bk. ix, ch. ii. The bishops are named from the principal city of the diocese, as Rome, Lyons, etc. There were bishops, not diocesan, in Ireland, until the 12th century (see *Christian Remembrancer*, Jan. 1855, p. 215). While the Romish bishops are independent of each other, they are all subordinate to the pope, and must make regular returns to him of the state of their dioceses. See BISHOPS.

III. (1.) *The Church of England and the Protestant Episcopal Church in the United States* hold that there are three orders of ministers in the Church, bishops, priests, and deacons, and that bishops are the successors of the apostles, and superior to priests and deacons. The High-Church theory maintains the *divine right* of Episcopacy, and its absolute necessity to the existence of the Church; the Low-Church party deny that there is any positive command upon the subject in Scripture, or that there is anything in the standards of the Church of England which makes episcopacy to be of the essence of a church. The High-Churchmen maintain, and the Low-Churchmen reject the theory of the "exclusive validity of episcopal orders." See SUCCESSION. In the preface to the ordinal of the Church of England, and of the Protestant Episcopal Church in the United States, it is declared as "evident unto all men diligently reading holy Scripture and ancient authors, that from the apostles' time there have been these orders of ministers in Christ's Church, bishops, priests, and deacons." The doctrine of those churches in general is, "That there is in the Church a superior order of office-bearers, the successors of the apostles, who possess in their own persons the right of ordination and jurisdiction, and who are called ἐπίσκοποι, as being the overseers not only of the people, but also of the clergy; and an inferior order of ministers, called presbyters, the literal translation of the word πρεσβύτεροι, which is rendered in our English Bibles *elders*, persons who receive from the ordination of the bishop power to preach and to administer the sacraments, who are set over the people, but are themselves under the government of the bishop, and have no right to convey to others the sacred office which he gives them authority to exercise under him." According to a phrase used by Charles I, who was by no means an unlearned defender of that form of government to which he was a martyr, the presbyters are *episcopi gregis* [bishops of the flock], but the bishops are *episcopi gregis et pastorum* [bishops of the flock and of the pastors.] "The liberal writers, however, in the Church of England do not contend that this form of government is made so binding in the Church as not to be departed from and varied according to circumstances. It cannot be proved, says Dr. Paley, that any form of church government was laid down in the Christian as it had been in the Jewish Scriptures, with a view of fixing a constitution for succeeding ages. The truth seems to have been, that such offices were at first erected in the Christian

Church as the good order, the instruction, and the exigencies of the society at that time required, without any intention, at least without any declared design of regulating the appointment, authority, or the distinction of Christian ministers under future circumstances." To the same effect, also, Bishop Tomline says, "It is not contended that the bishops, priests, and deacons of England are at present precisely the same that bishops, presbyters, and deacons were in Asia Minor seventeen hundred years ago. We only maintain that there have always been bishops, priests, and deacons in the Christian Church since the days of the apostles, with different powers and functions, it is allowed, in different countries and at different periods; but the general principles and duties which have respectively characterized these clerical orders have been essentially the same at all times and in all places, and the variations which they have undergone have only been such as have ever belonged to all persons in public situations, whether civil or ecclesiastical, and which are, indeed, indispensable from every thing in which mankind are concerned in this transitory and fleeting world. I have thought it right to take this general view of the ministerial office, and to make these observations upon the clerical orders subsisting in this kingdom, for the purpose of pointing out the foundation and principles of Church authority, and of showing that our ecclesiastical establishment is as nearly conformable as change of circumstances will permit to the practice of the primitive Church. But, though I flatter myself that I have proved episcopacy to be an apostolical institution, yet I readily acknowledge that there is no precept in the New Testament which commands that every church should be governed by bishops. No church can exist without some government; but, though there must be rules and orders for the proper discharge of the offices of public worship, though there must be fixed regulations concerning the appointment of ministers, and though a subordination among them is expedient in the highest degree, yet it does not follow that all these things must be precisely the same in every Christian country; they may vary with the other varying circumstances of human society, with the extent of a country, the manners of its inhabitants, the nature of its civil government, and many other peculiarities which might be specified. As it has not pleased our Almighty Father to prescribe any particular form of civil government for the security of temporal comforts to his rational creatures, so neither has he prescribed any particular form of ecclesiastical polity as absolutely necessary to the attainment of eternal happiness. But he has, in the most explicit terms, enjoined obedience to all governors, whether civil or ecclesiastical, and whatever may be their denomination, as essential to the character of a true Christian. Thus the Gospel only lays down general principles, and leaves the application of them to men as free agents." Bishop Tomline, however, and the High-Episcopalians of the Church of England, contend for an original distinction in the office and order of bishops and presbyters; which notion is contradicted by the founder of the Church of England, Archbishop Cranmer, who says, "The bishops and priests were at one time, and were not two things; but both one office in the beginning of Christ's religion" (*Watson*). On the inconsistency of the position of that portion of the so-called evangelical Episcopalians which holds that bishops are really successors of the apostles, see an admirable article in the *Princeton Review*, January, 1856 (art. i).

(2.) The episcopacy of the Church of England is *diocesan*, like that of the Church of Rome, and the bishops are named from the chief city of the diocese (London, York, etc.). In the Protestant Episcopal churches the dioceses are generally coterminous with the States of the Union, and the bishops are named accordingly (Delaware, Connecticut, etc.). The larger

states are in some instances subdivided. "In the American Church the bishops are all of equal authority, each ruling his own diocese independently of the control of an ecclesiastical superior. No bishop is amenable to any central authority." There are no archbishops; but *assistant* and *missionary* bishops are authorized. See BISHOPS, and PROTESTANT EPISCOPAL CHURCH.

IV. *Methodist Episcopal Church*.—(1.) The episcopacy of the Methodist Episcopal Church is believed to be nearer to the apostolic model than that of the churches which maintain the apostolical succession. Its simple idea is, that certain elders are chosen from the body of the presbyters to superintend the Church, and are called *bishops* or *superintendents*, both terms being used in the Methodist ritual. The bishops, in virtue of their functions, naturally stand above their brethren. With regard to the ordinary functions of the ministry, they do not differ from other ministers; but extraordinary functions, such as ordaining, presiding in assemblies, and the like, are devolved upon them by their brethren, and exercised by them exclusively and of right—right not divine, but ecclesiastical and human, founded upon the will of the body of pastors. The primitive principle that bishops and presbyters are of equal rank in the N. T. is fully recognised; nor are bishops regarded as the successors of the apostles. "As soon as a church has more than one pastor, it is natural and necessary that one should preside over the rest," and that "certain functions should be reserved to him" (Bungener, *Council of Trent*, bk. v, ch. ii). It is not contrary to the essence of the ministry, but rather in harmony with its missionary and pastoral aims, that the presidency thus arising should last for life, and that he who exercises it should govern the body of pastors according to laws adopted and approved by them, should appoint the ministers to their work, and should exercise all the functions necessary to an effective and vigorous superintendency; and if the superintendent or bishop is appointed for life, it is quite in accordance with scriptural usage that he should be set apart for his work by "the laying on of hands." Accordingly, the bishops of the Methodist Episcopal Church are elected by the General Conference (q. v.) for life, and are ordained according to a special form, modified from the ordinal of the Church of England (*Discipline*, pt. ii, chap. iii). The limits of their authority are clearly set forth in the Book of Discipline (pt. i, ch. iv). A bishop is amenable, not to the bench of bishops, but to the General Conference, which may even "expel him for improper conduct if they deem it necessary" (*Discipline*, pt. i, ch. ix). "In the American branch of the Methodist Church, episcopacy exists not only in the form in which it does in every English circuit—which is the old parochial episcopacy—but by formally committing general oversight into the hands of bishops, who have no other charge. These claim no superiority in order over their brethren, but exercise well-defined powers, simply as an arrangement of the Church for its own welfare—an arrangement which has worked admirably; and it may be questioned whether any form of church government in the world has more of the elements of power and permanence than this, which expresses Wesley's own idea of a fully organized church" (*London Quarterly Review*, July, 1856, p. 520).

It has been objected to the Methodist episcopacy that, while the theory of the Church admits but two orders in the ministry, the separate ordination of bishops really implies three. But the objection is groundless. (See above, II, 2.) In fact, the number of "orders" has always been an open question, even in the Roman Church; the Council of Trent did not settle it (compare *Canons of Trent*, sess. xiii, can. 2). The "balance of authority, ever from the earliest ages, certainly inclines to consider the episcopate, as an order, to be identical with the priesthood, not the com-

pletion of it" (Maskell, *Monumenta Ritualia*, iii, lxxxii, So also Palmer: "If we understand the word *order* in the sense of *degree*, we may say that there are three orders of the Christian ministry; but if we distribute it according to its *nature*, there are but two, viz. bishops (or presbyters) and deacons" (*On the Church*, pt. vi, § 1).

Some Methodist writers have maintained that three orders, bishops, priests, and deacons, belong to the constitution of the Church as laid down in Scripture, and therefore that the episcopal office is not simply an ecclesiastical one. See especially Grayson, *The Church and the Ministry* (Louisville, 1853, 8vo).

(2.) The Methodist episcopacy is not *diocesan*, like that of the churches of Rome and England, but *general* and *itinerant*. Instead of being confined to a city or district, the bishop is required to "travel at large;" and if "he cease from travelling without the consent of the General Conference, he cannot thereafter exercise the episcopal office." See CONFERENCES, and METHODIST EPISCOPAL CHURCH. While, under the Methodist system, the bishops do not claim to be "successors of the apostles," or to be endowed, either as individuals or collectively, with superior authority to teach or to govern, apart from power given them by the body of presbyters as represented in the General Conference, it yet appears to be clear that, as to their functions and jurisdiction, they approach nearer to the apostolical idea than bishops under the diocesan system. Dollinger (perhaps the ablest of living Romanist writers), in maintaining that "bishops are the successors of the apostles, and have received their authority," is yet forced to admit that, under the Roman episcopal system, the authority of bishops is strictly limited to a particular diocese, while the jurisdiction of the apostles "extended to every part of the earth, wheresoever their universal vocation to convert the nations and to found churches conducted them" (*Church History*, i, 226, Lond. 1840). Under the Methodist system, a bishop may preside in a Conference and ordain presbyters in March in New York, in May in Illinois, in July in California, in October in China, and in December in Germany.

(3.) The Methodist episcopacy was instituted by Wesley. During the Revolutionary War in America, most of the clergy of the Church of England left the country. Before the war, the American preachers, like those in England, had been forbidden to administer the sacraments: the people were sent to the clergy of the Church of England for baptism and the Lord's Supper. After the war the societies were without the ordinances, and were likely to be disbanded in consequence. After duly considering the exigency, Mr. Wesley (who had previously in vain urged the bishop of London to ordain preachers for America) determined to organize the American Methodists into an independent Episcopal Church, and ordained the Rev. Thomas Coke, LL.D., as superintendent, and Richard Whatcoat and Thomas Vasey as elders. In 1784 the Rev. Francis Asbury was ordained by Dr. Coke, and the Methodist Episcopal Church was duly organized—the first American Episcopal Church. See METHODISM. Mr. Wesley did not pretend to ordain bishops in any other sense than according to his view of primitive episcopacy, in which, as he maintained, bishops and presbyters are the same order. The grounds of his procedure in the case are stated in his "Letter to Dr. Coke and Mr. Asbury," prefixed to "Sunday Service of the Methodists" (1784); given also in *Watson's Life of Wesley* (p. 244). An excellent sketch of the rise of the Methodist episcopacy is given by Stevens, *History of Methodism*, vol. ii.

V. The Moravian Church (*Unitas Fratrum*) holds to episcopacy. Their bishops, however, are not diocesan. The history of the preservation of the episcopate is given in De Schweinitz, *The Moravian Episcopate* (Bethlehem, 1865). See MORAVIANS.

Metropol.* London, 1859, 12mo); and the article *SUCCESSION*. The High-Episcopal view is well stated for modern readers in *Vox Ecclesie* (Philadelphia, 1866, 12mo); the moderate, in Litton, *The Church of Christ* (Lond. 1851, 8vo; Phila. 1853, 8vo).

**Episcopalians**, members of those churches which adopt the Episcopal form of Church government. See *EPISCOPACY*; *METHODIST EPISCOPAL CHURCH*; *MORAVIANS*; *LUTHERAN CHURCH*; *ENGLAND, CHURCH OF*; *PROTESTANT EPISCOPAL CHURCH*.

**Episcopus**. SIMON (Dutch, *Bischoep*), an eminent and learned Arminian theologian, was born in January, 1583, at Amsterdam, where he received his school education. In 1600 he went to the University of Leyden, where he took his degree of M.A. in 1606. He thenceforward devoted himself to the study of theology. "Earnestly," says Curcellæus (in his eulogy on Episcopus), "did he listen to the lectures of those very learned professors, Francis Gomarus, Luke Trelcatius, and James Arminius; and in the exercises of debates and harangues, which they commonly called *theses*, he left many of his equals far in the distance, and was highly esteemed as one worthy of being called to the ministry of the divine word. But when, especially after the death of Trelcatius, that terrible discussion on predestination, which afterwards agitated all Holland, finally arose, and was not only secretly carried on between the two professors, but also broke forth into open violence, our Episcopus became favorably inclined towards the Arminian doctrines. For this reason he received little favor from the pastors on the opposite side of the controversy, so that when the very illustrious councils of the state of Amsterdam, to whom the singular learning and piety of Episcopus had become known, would have invited him to become their preacher, these pastors, by causing delays, entirely frustrated the plans of the councils. Episcopus, disheartened at this affair, determined to leave the academy at Leyden, and in the year 1609 (in which year Arminius died) he betook himself to the Franeker Academy, belonging to the Frisii, incited especially by the fame of that most illustrious man and learned professor of the sacred language, John Drusius. But there he displayed, as youths of a bold mind are wont, such a zeal in the theological discussions, that he gave not a little offence to Sibrandus Lubbertus, a professor of that academy. Accordingly, a few months after, he departed and came into France, where in a brief space of time he obtained so fair a mastery of the French language that he not only understood it, but could speak it with considerable ease and purity. Finally, in the year 1610, he returned to his native land, only to receive the same tokens of ill will." In that year he

was ordained pastor of Bleyswick, a village near Rotterdam. In 1611 a colloquy was held at the Hague, by order of the States General, with a view to ending the agitating controversy between the Gomarists and Arminians, between six Remonstrant pastors and six Contra-Remonstrants. Episcopus, as one of the six Remonstrants, displayed so much learning and skill that his fame spread through all the country. In 1612 he was appointed professor of theology in the University of Leyden, as successor of Gomarus. Here his pre-eminent talents had full scope, and his reputation grew rapidly. The Gomarist controversy, however, waxed hotter and hotter; the orthodoxy of Episcopus was called in question by his theological opponents; and the rage of the Calvinistic party among the populace even went so far as to threaten violence. In 1614 he went to Amsterdam to attend a baptism, and the minister, Heyden, having stigmatized him as a heretic, he was saved from stoning only by the zeal of his friends. A blacksmith once ran after him with a hot iron with the cry, "Stop the Arminian disturber of the Church," and would probably have murdered him but for the interference of by-standers.

The Synod of Dort was held in 1618. See *DORT*. Episcopus was the chief spokesman of the Arminians. At the 23d session he delivered a discourse of great power, which is to be found in his *Works*, in *Limborch's Vita Episcopi*, and in *Calder's Life of Episcopus* (N. Y. 1837, chap. x). The synod condemned the Arminians, and by the aid of the civil government banished the Remonstrant ministers. Episcopus retired first to Antwerp, where he wrote his *Responsio ad duas Petri Wadingii Jesuitæ Epistolæ* (1621, on the Rule of Faith and on the Worship of Images); his celebrated *Confessio Fidei Remonstrantium* (Remonstrants' Confession of Faith, 1622; *Opera*, vol. iii); *Antidotum, sive genuina Declaratio sent. Synodi Dordruenæ* (*Opera*, vol. ii, Lond. 1678). When the war between Spain and the Netherlands was renewed, Episcopus took refuge in France, residing chiefly in Paris (1621-1626). Here he published *Paraphrasés* in cap. viii-xi *Epist. ad Romanos* (Paraphrase on Romans viii-xi, *Opera*, vol. i); *Bodecherus Inepticus* (Bodecherus the Simple; a defence of the Remonstrants against the charge of Socinianism; *Examen thesium J. Capelli* (on the Calvinistic and Arminian Controversy in Belgium); *Tractatus de Libero Arbitrio* (*Opera*, vol. i); Correspondence with Joh. Cameron on Grace and Free Will (*Opera*, vol. i). On the death of Prince Maurice (1625) the persecution of the Remonstrants slackened, and it became safe for Episcopus to return to his country in 1626, when he became minister to the Remonstrants of Rotterdam. Here he published *Apologia pro Confessione*, etc. (Apology for the Confession of the Remonstrants), and other controversial tracts (*Opera*, vol. iii). In 1634 he was made rector of the newly-established college of the Remonstrants at Amsterdam, where the rest of his life was spent in diligent and successful teaching, and in constant literary and pastoral activity. The fruits of his lectures appear in permanent form in his *Institutiones Theologicæ*, lib. iv, which, however, was left unfinished, and published posthumously (*Opera*, vol. i); and also in *Responsio ad Questiones Theologicæ Livæ* (Answers to 64 questions in theology proposed by students). He died April 4, 1643.

Episcopus was acknowledged, even by his enemies, to be a man of very rare abilities, as well as of great learning. Heidanus (one of his opponents) says he was endowed with "great learning, penetration, eloquence, and skill." His friend Uitenbogaert declared that he had never met a theologian "to be compared with Episcopus for his knowledge of the Scriptures and of divine subjects." Mabillon recommends his *Institutes* as of great value to students of divinity, except the parts in which he speaks against Romanist doctrines. Bull (in his *Judgment of the Catholic Church*) speaks of him as the "very learned Episcopus." His

talent for controversy was of a very high order; but his *Institutes* shows that he also possessed the power of clear and luminous statement to a rare degree. The theology of Episcopius is, in substance, that of Arminius. He has been charged with Socinianism, but his writings, controversial and other, sufficiently refute that charge as brought not only against him, but against the early Remonstrants in general. The charge was in part due to the fact that he held the ethical side of Christianity to be the test of communion rather than the doctrinal; holding that Christianity is not so much a doctrine as a life, and that it has its doctrines only with a view to its life. The two great champions of the doctrine of the Trinity in England, Waterland and Bull, both wrote against Episcopius. Waterland (*Importance of the Doctrine of the Trinity, Works*, Oxford, 1853, iii, 440 sq.) states that Episcopius holds "the doctrine of the Trinity, as to the main substance of it, to be certain and clear, but yet not necessary to be believed in order to salvation," and adds that the doctrine is "taught in full and strong terms in the 'Confession of the Remonstrants,' and in other places in the works of Episcopius." He then goes on, and successfully, to show the error and danger of the unguarded statement of Episcopius as to its importance. Bull's *Judgment of the Catholic Church on the necessity of believing that our Lord Jesus Christ is very God* (*Works on the Trinity*, Oxford, 1854, vol. iii), was written expressly to refute the statement of Episcopius (*Institutes*, bk. iv, ch. xxxiv, § 2), that "in the primitive churches, during at least three centuries, the belief and profession of the special divine sonship of Christ was not judged necessary to salvation." It is hardly necessary to say that Bull makes out his case. He does not, however, charge Episcopius with doctrinal error, but with too great and even dangerous liberality. He states also that, "although Episcopius was a man of unquestionably great ability, and in many respects possessed learning of no ordinary kind, yet he but little consulted or regarded, nay, he actually despised the writings of the ancient fathers and doctors." But on this see Limborch (cited by Calder, *Life of Episcopius*, N. Y. ed. p. 433). After the death of Episcopius, Jurieu charged him with Socinianism, which gave rise to a sharp letter from Clericus (Le Clerc) refuting the charge (see Bayle, s. v. Episcopius).

The writings of Episcopius were collected by Curcellæus, who published vol. i, Amst. 1650, with a sketch of the author's life; vol. ii, edited by Poelenburg, appeared in 1665. A second edition was published under the title *S. Episcopii opera omnia theologica, cum autographo collata, et à mendis aliquot gravioribus purgata* (Lond. 1678, 2 vols. fol.). His life was also written by Philip Limborch, first in Dutch, and afterwards enlarged in Latin (*Hist. Vitæ S. Episcopii*, etc., Amst. 1701). There is an English version of his *Labyrinthus Pontificius* under the title *Papish Labyrinth, or a Treatise on Infallibility* (Lond. 1763). See also Calder, *Memoirs of Simon Episcopius* (New York, 1837, 12mo); Heppé, in Herzog, *Real-Encyklop.* iv, 100; a translation of Curcellæus's sketch, in the *Methodist Quarterly Review*, Oct. 1863, p. 612; Nichols, *Calvinism and Arminianism compared* (Lond. 1824, 2 vols. 8vo); Morison, *On the ninth of Romans*, p. 40 (Kilmarnock, 1849, 8vo); Schröckh, *Kirchengeschichte seit d. Reformation*, v, 239-296; and the articles ARMINIANISM; DORT; REMONSTRANTS.

**Episcōpus Episcōporum**, *bishop of bishops*, a title assumed by the popes.

**Episcōpus in Partibus**, *bishop in partibus infidelium*, see BISHOP, vol. i, p. 821, col. 2.

**Episcōpus Œcumenicus**, *Œcumenical bishop*, a title of the Patriarch of Constantinople.

**Epistle** (ἐπιστολή, something sent, as a "letter"). The use of written letters implies, of course, considerable progress in the development of civilized life.

There must be a recognised system of notation, phonetic or symbolic; men must be taught to write, and have writing materials at hand. In the early nomadic stages of society accordingly, like those which mark the period of the patriarchs of the O. T., we find no traces of any but oral communications. In the Homeric poems, though messages are usual, yet a sort of hieroglyphical letters is not unknown (*Il.* vi, 168). Messengers were sent instructed what to say from Jacob to Esau (*Gen.* xxxii, 3), from Balak to Balaam (*Num.* xxii, 5, 7, 16), bringing back in like manner a verbal, not a written answer (*Num.* xxiv, 12). See MESSENGER. The negotiations between Jephthah and the king of the Ammonites (*Judg.* xi, 12, 13) were conducted in the same way. It was still the received practice in the time of Saul (*1 Sam.* xi, 7, 9). The reign of David, bringing the Israelites, as it did, into contact with the higher civilization of the Phœnicians, witnessed a change in this respect also. See AMBASSADOR. The first recorded letter (כְּתוּבָה = "book;" comp. use of βιβλίον, *Herod.* i, 123) in the history of the O. T. was that which "David wrote to Joab, and sent by the hand of Uriah" (*2 Sam.* xi, 14), and this must obviously, like the letters that came into another history of crime (in this case also in traceable connection with Phœnician influence, *1 Kings* xxi, 8, 9), have been "sealed with the king's seal," as at once the guarantee of their authority, and a safeguard against their being read by any but the persons to whom they were addressed. The material used for the impression of the seal was probably the "clay" of *Job* xxxviii, 14. The act of sending such a letter is, however, pre-eminently, if not exclusively, a kingly act, where authority and secrecy were necessary. Hence they contained simply royal commands, and nothing is said of salutation or even address in connection with them. Joab, on the other hand, answers the letter which David had sent him after the old plan, and receives a verbal message in return. The demand of Benhadad and Ahab's answer to it are conveyed in the same way (*1 Kings* xx, 2, 5). Jehu wrote letters, and sent them to Samaria to authorities, respecting Ahab's children, the form of which, or of the one transcribed, is the first instance in the Bible of anything like a formula. It begins, "Now as soon as this letter cometh to you," but ends without any like phrase. It was apparently replied to by a message, and Jehu wrote another letter, which, as given, has not the same peculiarity as the first. That Jehu, who, though perhaps well born, was a rough soldier, should have written—and there is no ground for supposing that he used a scribe, but, from the extremely characteristic style, rather evidence against such an idea—indicates that letter-writing was then common (*2 Kings* x, 1-7). In this case secrecy may have been thought desirable, but the importance of the matter would have been a sufficient reason for writing. Written communications, however, become more frequent in the later history. The letter which the king of Syria, Benhadad, sent by Naaman to Jehoram, king of Israel, though to a sovereign with whom the writer was at peace, is in the same peremptory style, with no salutation (*2 Kings* v, 5, 6), from which we may conjecture that only the principal contents are given in this and like instances. The "writing" (כְּתוּבָה) to Jehoram, king of Judah, from Elijah (q. v.) must have been a written prophecy rather than a letter (*2 Chron.* xxi, 12-15); though it must be observed that such prophecies when addressed to persons are of an epistolary character. Hezekiah, when he summoned the whole nation to keep the Passover, sent letters "from the king and his princes," as had been determined at a council held at Jerusalem by the king, the princes, and all the congregation. The contents of these letters are given, or the substance. The form is that of an exhortation, without, however, address. The

character is that of a religious proclamation (2 Chron. xxx, 1-9). Hezekiah, in fact, introduced a system of couriers like that afterwards so fully organized under the Persian kings (comp. Herod. viii, 98, and Esth. viii, 10, 14). The letter or letters of Sennacherib to Hezekiah seem to have been written instructions to his messengers, which were given to Hezekiah to show him that they had their master's authority. It is to be observed that the messengers were commanded, "Thus shall ye speak to Hezekiah," and that Hezekiah "received the letter" from them. What he received was probably a roll of papyrus, as that which Jehoiakim burnt seems to have been (Jer. xxxvi, 23), for when he took it to the Temple he "spread it before the Lord" (2 Kings xix, 9-14; Isa. xxxvii, 9-14; comp. 2 Chron. xxxii, 17). It does not appear to have been usual for the prophets to write letters. Generally they seem, when they did not go themselves to those whom they would address, either to have sent a messenger, or to have publicly proclaimed what they were commissioned to say, knowing that the report of it would be carried to those whom it specially concerned. When Nebuchadnezzar had carried captive some of the people of Judah, we read how Jeremiah addressed them by a letter, which is a written exhortation and prophecy (xxix, 1-23). It can scarcely be said that here we perceive a positive distinction between the later prophets and the earlier, for Elijah sent a letter or "writing" to Jehoram, king of Judah, as already noticed. The distance of Babylon from Jerusalem, and of Jerusalem from the kingdom which was the scene of Elijah's ministry, seems to afford the true explanation. That letters were not uncommon between the captives at Babylon and those who remained at Jerusalem before it was destroyed, appears probable from the mention of letters to Zephaniah the priest, and to others from a false prophet Shemaiah, at Babylon, in contradiction of Jeremiah's letter (24-29). Jeremiah was commanded to send to the captives a condemnation of this man (30-32), and it is therefore probable that at least three letters passed on this occasion. Though with the little evidence we have we cannot speak positively, it seems as if the custom of letter-writing had become more common by degrees, although there is no ground for inferring any change in its character. Still we find nothing of an address or signature. The letter seems to be always a document, generally a message written for greater security or to have full authority, and was probably rolled, tied up, and sealed with the writer's seal. See LETTER.

Although no Hebrew letters are preserved of the time before David, it might be supposed that the form might have been derived from Egypt. We have papyrus containing copies by Egyptian scribes of the kings of the Rameses family about the 13th century B.C., of letters of their own correspondence. These show a regular epistolary style, the conventionalism of which at once removes us from all ideas of Shenitic literature. There is an air of the monuments about it that strikes us in the descriptive character of certain of the formulas. Some letters, from a superior to an inferior, commence in the manner shown in the following example: "The chief librarian Amen-em-an, of the royal white house, says to the scribe Penta-ur, Whereas, this letter is brought to you, saying—communication." A usual ending of such letters is, "Do thou consider this." Some begin with the word "Communication." The fuller form also seems to be an abbreviation. An inferior scribe, addressing his superior, thus begins: "The scribe Penta-ur salutes his lord, the chief librarian, Amen-em-an, of the royal white house. This comes to inform my lord. Again I salute my lord. Whereas I have executed all the commissions imposed upon me by my lord, well and truly, completely and thoroughly [?] I have done no wrong. Again I salute my lord." He ends, "Behold, this message is to

inform my lord." A more easy style is seen in a letter of a son to his father, which begins, "The scribe Amen-mesu salutes [his] father, captain of bowmen, Bek-en-ptah," and ends "Farewell." A military officer writing to another, and a scribe writing to a military officer, appear to begin with a prayer for the king before the formula "Communication." A royal or government letter is a mere written decree, without any formal introduction, and ending with an injunction to obey it. The contents of these letters are always addresses to, the persons written to, the writer using the first person singular. The subject-matter is various, and perhaps gives us a better idea of the literary ability of the Egyptians, and their lively national character, than any other of their compositions (see Goodwin on the "*Horatic Papyrus*," in the *Cambridge Essays*, 1855, p. 226 sq.). Indeed in Egypt everything of importance was committed to writing (Wilkinson, *Anc. Eg.* ii, 176, abridgm.), and the monuments constantly depict scribes taking an inventory or check of all sorts of operations. See EGYPT.

Ancient Egyptian giving an account to two scribes of the stock on the estate.

Before fig. 1 is the satchel, and above fig. 2 the box for holding writing implements and papyrus. They are writing on boards: in their left hands are the ink-stands with black and red ink.

In the books of Scripture written after the return from Babylon, mention is made of letters of the enemies of the Jews to the kings of Persia, and of the kings to these persons, the Jews, or their officers, some of which are given. These are in an official style, with a greeting, and sometimes an address. The letter to Artaxerxes contains the form, "Be it known unto the king," "Be it known now unto the king" (Ezra iv, 11-16); and his answer thus begins, "Peace [or "welfare"], and so forth" (17-22), the expression "and so forth" occurring elsewhere in such a manner that it seems to be used by the transcriber for brevity's sake (10, 11; vii, 12). It must, therefore, not be compared to the common modern Arabic formula of commencement, "After the [usual] salutations." The letter of the opponents of the Jews to Darius (Hystaspis) thus begins: "Unto Darius the king, all peace. Be it known unto the king (v, 6-17)." The letter of Artaxerxes (Longimanus) to Ezra is a written decree, and not an ordinary letter, save in form (vii, 11, 26). Nehemiah asked for, and was granted, letters from the same king to the governors and the keeper of the king's forest (Neh. ii, 7, 9). When he was rebuilding Jerusalem, Sanballat sent him "an open letter" by his servant, repeating an invented rumor of the Jews' intention to rebel (vi, 5, 7): no doubt it was left not sealed purposely, either in order that the rumor should be so spread as if by accident, or to show disrespect. At this time many letters passed between the nobles of Judah and Tobiah, and letter-writing seems to have been common (17; see also 19). In Esther we read of exactly the same custom as that spoken of in the case of Jezebel's letter, the authority

of writings with the king's name and seal, even if not written by him. It is related that Abasuerus "took his signet from his hand and gave it unto Haman," who caused letters to be written containing a mandate: "In the name of king Abasuerus was it written, and sealed with the king's signet" (Esth. iii, 10, 12, 13). In like manner, the same authority was given to Esther and Mordecai, and it is remarked, "For the writing which is written in the king's name, and sealed with the king's signet, may not be reversed" (viii, 7, 8). The influence of Persian, and yet more, perhaps, that of Greek civilization, led to the more frequent use of letters as a means of intercourse. Whatever doubts may be entertained as to the genuineness of the epistles themselves, their occurrence in 1 Macc. xi, 30; xii, 6, 20; xv, 1, 16; 2 Macc. xi, 16, 34, indicates that they were recognised as having altogether superseded the older plan of messages orally delivered. See LETTER.

The two stages of the history of the N. T. present in this respect a very striking contrast. The list of the canonical books shows how largely epistles were used in the expansion and organization of the Church. Those which have survived may be regarded as the representatives of many others that are lost. We are perhaps too much in the habit of forgetting that the absence of all mention of written letters from the Gospel history is just as noticeable. With the exception of the spurious letter to Abgarus (q. v.) of Edessa (Euseb. *H. E.* i, 13) there are no epistles of Jesus. The explanation of this is to be found partly in the circumstance of one who, known as the "carpenter's son," was training as his disciples those who, like himself, belonged to the class of laborers and peasants, partly in the fact that it was by personal rather than by written teaching that the work of the prophetic office, which he reproduced and perfected, had to be accomplished. See JESUS CHRIST. In the Acts of the Apostles we have the short epistle addressed by the apostolic council held at Jerusalem to the Gentile converts in Antioch, Syria, and Cilicia (Acts xv, 23-24). There is also a letter from Claudius Lysias to Felix, which may be supposed to preserve the official style of the provinces. Both these use the common Greek formulas, beginning, after the names of the writer and the person written to, with the salutation, and ending with the adieu. The epistles of the N. T. in their outward form are such as might be expected from men who were brought into contact with Greek and Roman customs, themselves belonging to a different race, and so reproducing the imported style with only partial accuracy. They begin (the Epistle to the Hebrews and 1 John excepted) with the names of the writer, and those to whom the epistle is addressed. Then follows the formula of salutation (analogous to the *εὖ πᾶσιν* of Greek, the *S., S. D.,* or *S. D. M., salutem, salutem dicit, salutem dicit nullam,* of Latin correspondence)—generally in Paul's Epistles in some combination of the words "grace, mercy, and peace" (*χάρις, ἔλεος, εὐοίη*); in others, as in Acts xv, 23; James i, 1, with the closer equivalent of *χαίρειν*, "greeting," which last is never used by Paul. Then the letter itself commences in the first person, the singular and plural being used, as in the letters of Cicero, indiscriminately (comp. 1 Cor. ii; 2 Cor. i, 8, 15; 1 Thess. iii, 1, 2; and *passim*). When the substance of the letter has been completed, questions answered, truths enforced, there come the individual messages, characteristic, in Paul's Epistles especially, of one who never allowed his personal affections to be swallowed up in the greatness of his work. The conclusion in this case was probably modified by the fact that the letters were dictated to an amanuensis. When he had done his work, the apostle took up the pen or reed, and added, in his own large characters (Gal. vi, 11), the authenticating autograph, sometimes with special stress on the fact that this was his writing (1 Cor. xvi, 21; Gal. vi, 11; Col. iv, 18; 2

Thess. iii, 17), always with one of the closing formulas of salutation, "Grace be with thee"—"the grace of our Lord Jesus Christ be with your spirit." In one instance, Rom. xvi, 22, the amanuensis in his own name adds his salutation. In the "farewell" (*ἔρρωσο* of Acts xxiii, 30, *ἔρρωθε* of Acts xv, 29) we have the equivalents to the *vale, valete*, which formed the customary conclusion of Roman letters. It need hardly be said that the fact that Paul's Epistles were dictated in this way accounts for many of their most striking peculiarities, the frequent digressions, the long parentheses, the vehemence and energy as of a man who is speaking strongly as his feelings prompt him rather than writing calmly. An allusion in 2 Cor. iii, 1 brings before us another class of letters which must have been in frequent use in the early ages of the Christian Church, the *ἐπιστολαὶ συστατικαὶ*, or *letters of recommendation*, by which travellers or teachers were commended by one church to the good offices of others. Other persons (there may be a reference to Apollos, Acts xviii, 27) had come to the Church of Corinth relying on these. Paul appeals to his converts as Christ's epistle (*ἡ ἐπιστολὴ Χριστοῦ*, 2 Cor. iii, 3), written, "not with ink, but with the spirit of the living God."—Kitto, s. v.; Smith, s. v. For other particulars as to the material and implements used for epistles, see WRITING.

EPISTLES, APOSTOLICAL. All the revelations of God to mankind rest upon history. Therefore in the Old, as well as in the New Testament, the history of the deeds of God stands *first*, as being the basis of holy writ; thereupon follow the books which exhibit the doctrines and internal life of the men of God—in the Old Testament the Psalms, the writings of Solomon, etc., and in the New Testament the epistles of the apostles; finally, there follow in the Old Testament the writings of the prophets, whose vision extends into the times of the New Testament; and at the conclusion of the New Testament stands its only prophetic book, the Revelation of John.

1. The PAULINE epistles are thirteen in number, or fourteen, if we add to them the epistle to the Hebrews. Three of these are distinctively styled the *Pastoral Epistles*, namely, those to Timothy and Titus, as being chiefly on the duties of the pastorate. Up to our days the genuineness of the first thirteen epistles of Paul has almost unanimously been recognised in Germany, with the exception only of the pastoral epistles, and more especially the first letter to Timothy. Eichhorn and Bauer have attacked the genuineness of all the three pastoral epistles, and Schleiermacher that of the first epistle to Timothy. Indeed, the very peculiar character of the Pauline epistles is so striking to any one who is not ignorant of the want of ease and originality conspicuous in the counterfeited writings of early times, as to leave not the least doubt of their genuineness. Depth of thought, fire of speech, firmness of character—these many features, joined withal to the indulgence of feelings of the most devoted love and affection, characterize these epistles. The amiable personal character of the apostle may be most beautifully traced in his epistle to the Philippians and in that to Philemon. (On many peculiarities of the Pauline epistles, see Laurent, *Neutestam. Studien*, Gotha, 1866.) See PAUL.

All Paul's epistles, except the one to the Romans, were called forth by circumstances and particular occasions in the affairs of the communities to which they were addressed. It is believed that all the apostolical epistles of Paul have been preserved; for the inference from 1 Cor. v, 9, that a letter to the Corinthians has been lost, is not warranted by the language and circumstances. See CORINTHIANS, FIRST EPISTLE TO. From Col. iv, 16, it has also been concluded—though probably erroneously, since there perhaps the letter to the Ephesians is referred to—that another letter to the community of Laodicea has like-

wise been lost. See LAODICEANS, EPISTLES TO AND FROM. Press of business usually compelled Paul—as was, besides, not uncommon in those times—to use his companions as amanuenses. He mentions (Gal. vi, 11), as something peculiar, that he had written this letter with his own hand. This circumstance may greatly have favored the temptation to forge letters in his name, because, since the period of Alexandrine literature, it was not unusual to indite spurious books, as is evident from Eusebius (*Hist. Eccles.* p. 23); and even Christian bishops made complaints about the falsification of their letters. Paul alludes to this (2 Thess. ii, 2), and therefore writes the greeting (2 Thess. iii, 17) with his own hand. Paul himself exhorted the communities mutually to impart to each other his letters to them, and read them aloud in their assemblies (Col. iv, 16). It is therefore probable that copies of these letters had been early made by the several communities, and deposited in the form of collections. So long, therefore, as the various communities transmitted the manuscripts to each other, no other letters, it is obvious, could come into the collections than those to whose genuineness the communities to whom they were originally addressed bore witness. Even Peter (2 Pet. iii, 16) seems to have had before him a number of Paul's letters, as, about forty years later, a number of letters of Ignatius were transmitted by Polycarp to Smyrna, while the church of Philippi forwarded to him those directed to them (*Ep. Polic.* sub. fin.; Euseb. *Hist. Eccles.* iii, 36). The Pauline collection, in contradistinction to the Gospels, passed by the name of ὁ ἀπόστολος, or “The Apostle.”

The letters of Paul may be chronologically arranged as those written before his first Roman imprisonment, those written during it, and those written after it: thus, (a), beginning with his first letter to the Thessalonians, and concluding with that to the Romans, embracing an interval of about six years (A.D. 49–55); (b), from the letter to the Ephesians to that to the Hebrews, about two years (A.D. 57–8); and (c), his letter to Titus and his second to Timothy, about two years (A.D. 63–4). See ACTS (OF THE APOSTLES). In our Bibles, however, the letters are arranged according to the pre-eminent parts and stations of the communities to whom they were addressed, and conclude with the epistles to the two bishops and a private letter to Philemon. (See each in its proper place.)

That these epistles offered great difficulties was already felt in the earliest times (2 Peter iii, 16). In the Roman Church their true understanding was more particularly lost by the circumstance that it understood by the law only the *opus operatum* of the ceremonial law; consequently the Roman Church could not comprehend justification by faith, and taught instead justification by works. As soon, therefore, as the true understanding of the Pauline epistles dawned upon Luther, his breach with the Roman Church was decided. See JUSTIFICATION.

2. The CATHOLIC epistles. There is, in the first instance, a diversity of opinion respecting their name: some refer it to their *writers* (letters from all the other apostles who had entered the stage of authorship along with Paul); some, again, to their *contents* (letters of no special, but general Christian tenor); others, again, to the *recipients* (letters addressed to no community in particular). None of these views, however, is free from difficulties. The first and the second views—and more especially the first—cannot be brought to harmonize with the idiomatic expressions in the extant pages of the ancient writers; the second is, besides, contradicted by the fact that the letter of James is of a special tenor, while, on the contrary, that to the Romans is of such a general character as to deserve the name “Catholic” (q. v.) in that sense. The third opinion is most decidedly justified by passages from the ancient writers (Euseb. *Hist. Eccles.* v, 18; Clem. Alex. *Strom.* iv, 15, ed. Potter, p. 606; Orig. c. Cels. i, 63).

The Pauline epistles all had their particular directions, while the letters of Peter, James, 1 John, and Jude were circular epistles. The epistles 2 and 3 John were subsequently added, and included on account of their shortness, and to this collection was given the name *Catholic Letters*, in contradistinction to the *Pauline*, which were addressed to particular churches or individuals.—Kitto, s. v. The dates of nearly all of them are later than those of Paul, but their precise time is uncertain. See each in its order; also under ACTS (OF THE APOSTLES).

3. *Literature*.—Besides the general Introductions (q. v.) to the N. T., or parts of it, and the Prolegomena in most modern commentaries on each epistle, there is a wide range of general discussion relating to them which cannot here be profitably reviewed: special treatises only can be enumerated, and even these not exhaustively. On the *autograph* letters there are monographs in Latin by Rathlef (Hannov. 1752) and Stosch (Guelc. 1751); on *ecclesiastical letters* in general, and their various *descriptions*, by Berg (Jen. 1666), Bencini (Taurin. 1780), Bröndley (Hafn. 1711–1712), Friderici (Gotha, 1754), Kiessling (Lips. 1744), Müller (Stad. 1682), Pezold (Lips. 1698), Schmid (Helmst. 1713), Spies (Altorf. 1745); also Dodwell (*Dissert. Cyprian.* Oxon. 1684, p. 17 sq.), Cassabritius (*Notit. Concil. Lugd.* 1670, p. 275 sq.); *introductory* in general, by Braun (*Selecta Sancta*, p. 1–162), Kleuker (German. Hamb. 1799), Köhler (Germ. Lpz. 1830); and of the catholic epistles specially, by Storr (Tub. 1789), Tiegler (Rost. 1807), Ständler (Gott. 1790).

Special COMMENTARIES on all the epistles of the N. T. are the following, of which the most important are denoted by an asterisk (\*) prefixed: Cassiodorus, *Complexiones* (ed. Chandler, Lond. 1722, 12mo); Card. Cajetan, *Enarratio* (Ven. 1531, Par. 1532, 1537, 1546, Antw. 1611, fol.; Paris, 1540, Lugd. 1556, 1558, Paris, Par. 1571, 8vo; also in *Opp.* v); Titelmann, *Elucidatio* (Antw. 1532, 1543, 8vo; Par. 1553, Ant. 1540, Ven. 1547, Lugd. 1553, 12mo); Bullinger, *Commentarii* (Tigur. 1537, 1549, 1558, 1582, 1588, 1603, fol.); Pellican, *Commentarii* (Tigurin. 1539, fol.); Gagneus, *Scholæ* (Par. 1543, 1547, 1550, 1563, 1629, 1633, 8vo); Politus (or Catharinus), *Commentarius* (Rom. 1546, Ven. 1551, Par. 1566, fol.); \*Calvin, *Commentarii* (Geneva, 1551, fol.); Buonricci, *Parafraſi* (Ven. 1565, 4to); Beza, *Explicatio* (Genev. 1565, 1570, 8vo); Hemming, *Commentarius* (Lips. 1572, Vitemb. 1576, Freft. 1579, Argent. 1589, fol.); Arias Montanus, *Elucidationes* (Antw. 1588, 8vo); Gualther, *Homilæ* (Tigurin. 1599, fol.); Erythrophilus, *Auslegung* (Gosl. 1695, sq., 4 vols. 4to); \*Lubin, *Exercitationes* [on nearly all the epistles] (Rost. 1610, 4to); \*Este, *Commentarius* (Duoci, 1614–6, Colon. 1631, Paris, 1633, 1640, 1653, 1659, 1666, 1679, fol.); Vorstius, *Commentary* [on most of the epistles] (Amst. and Hæder. 1631, 4to); Fabricius, *Analysis* (in *Catena*, Lips. 1634, 1639, fol.); Gomarus, *Explicatio* (in *Opp.* 1614, fol.); \*Dickson, *Commentarius* (Glasg. 1645, 4to; in English, Lond. 1659, fol.); Trapp, *Commentary* (Lond. 1647, 4to); Godeau, *Paraphrases* (Par. 1651, 6 vols., Rouen, 1657, Lyons, 1685, 3 vols. 12mo); Fromond, *Commentarius* (Lovan. 1653, Paris, 1674, fol.); Anon. *Verklärung* (Amst. 1679, 4to); \*Whitby, *Commentary* (London, 1700, fol., and since with others); Hunn, *Commentarii* (Vitemb. 1707, fol.); Noel Alexander, *Commentarius* (Rothm. 1710, 2 vols. fol.); Pyle, *Paraphrase* (London, 1725, 8vo); \*Lang, *Erklärung* (Halle, 1729, fol.); Locke, Pierce, and Benson, *Paraphrase* (published separately, London, 1733–52, 3 vols. 4to; upon the same plan, and together forming a commentary on all the epistles); Dale, *Analysis* (London, 1737, 2 vols. 8vo); Weitenauer, *Explicatio*, etc. (Aug. Vind. 1769, 8vo); Hess, *Schr. der Apostel* (Zür. 1773, 1820 sq., 3 vols. 8vo); Leutwein, *Erklärung* (Leipzig, 1782–9, 3 vols. 8vo); Nisbit, *Illustration* (Lond. 1787, 1789; in Germ., Nürnberg. 1790, 8vo); Bahrdt, *Erklärung* (Berlin, 1787–9, 3 vols. 8vo); Przipceovius, *Cogitationes*

(in *Opp.* Amst. 1792, fol., xxxvi); Jaspis, *Annotationes* (Lips. 1793 7, enlarged, 1821, 2 vols. 8vo); Küster, *Anmerkungen* (Chemn. 1794, Berl. 1803, 8vo); \*MacKnight, *Commentary* (London, 1795, 4 vols. 4to; 1806, 1816, 8 vols. 8vo; without the Greek text, 1795, 3 vols. 4to; 1809, 1816, 4 vols. 8vo; 1832, 1 vol. 8vo); Roberts, *Harmony* (Camb. 1800, 4to); Shuttleworth, *Paraphrase* (Oxf. 1829, 8vo); Slade, *Annotations* (4th ed. London, 1836, 8vo); Schott and Winzer, *Commentar* (Lpz. 1834 sq., 2 vols. 8vo); Barlee, *Version* (London, 1837, 8vo); Peile, *Annotations* (Lond. 1848-52, 4 vols. 8vo); \*Prichard, *Commentary* (Lond. 1864 sq., 3 vols. 8vo have appeared). See NEW TESTAMENT.

On the whole of the *Pauline* epistles alone, the following: Origen, *Fragmenta* (in *Opp.* iv, 690); Ambrosiaster, *Commentarius* (in *Opp.* ii, 15); Chrysostom, *Homilie* (in *Opp.*); Pelagius, *Commentarii* [on the first 13 epistles] (in Augustini *Opp.* Append.); Theodoret, *Commentarius* (London, 1636, fol.; also in *Opp.* III, i; and *Bibl. Patr.* [Oxf. 8vo] viii); Avitus, *Fragmenta* (in *Bibl. Max. Patr.* ix, etc.); Primasius, *Commentaria* (ib. x, 142); Bede, *Expositio* (in *Opp.* vi, 31); St. John Damascenus, *Excerpta* [from Chrysostom] (in *Opp.* ii, 1); Claudius Taurinensis, *Prologus* (in Mai, *Script. Vet.* VII, i, 274); Sedulius, *In epp. P.* (Basil. 1528; also in *Bibl. Max. Patr.* vi, 458); Cæcumenius, *In epp. P.* (Gr. and Lat. Ver. 1532, Paris, 1631, 2 vols. fol.; also in *Opp.*); Lanfranc, *Commentarii* (in *Opp.*; also in *Bibl. Max. Patr.* xviii, 621); Raban Maurus, *Commentarii* (in *Opp.*); Remigius Autiss. [Haimo] *Explanations* (Col. 1618, fol.; also in *Bibl. Max. Patr.* viii, 885); Theophylact, *Commentarius* (Gr. and Latin, Lond. 1636, fol.; also in *Opp.* ii); Anselm, *Commentaria* (in *Opp.* ed. 1612); Hugo à St. Victor, *Questiones* (in *Opp.* i, 266); Aquinas, *Expositio* (Basil, 1475; Lugd. 1689, fol.; also in *Opp.* vi, vii); Bruno, *Commentarius* (Paris, 1509, fol.); Dionysius Carthus., *Commentaria* (Paris, 1531, 8vo); Peter the Lombard, *Collectanea* [from the fathers] (Paris, 1535, fol.; 1537, 1541, 1543, 1555, 8vo); Salmeron, *Commentarii* (in *Opp.* xiii-xv); Contarini, *Scholia* (Par. 1571; Ven. 1589, fol.; also in *Opp.*); Faber, *Commentarius* (Par. 1512, 1515, 1531, Basil. 1527, fol.; Col. 1531, 4to; Antw. 1540, 8vo); Bugenhagen, *Adnotationes* [on most of these epistles] (Argent. 1524, Basil. 1525, 1527, 8vo); \*Calvin, *Commentaria* (Argent. 1539, Genev. 1548, 4to; Genev. 1551, 1556, 1600, 1617, fol.; also since, and in French and English); Guiliand, *Collationes* (Lugd. 1542, 1543, 4to; Par. 1550, 8vo); Arboreus, *Commentarius* (Par. 1553, fol.); \*Musculus, *Commentarii* [on nearly all of these epistles] (in parts, Basil. 1555 sq., 4 vols. fol.); Sashout, *Commentarius* [on most of these epistles] (Antw. 1561, 8vo); Major, *Enarrationes* (in *Opp.* Vitemb. 1569, fol., i); Hyperius, *Commentarii* (Tigurini, 1583, fol.); \*Selnecker, *Commentarius* (Lips. 1595, fol.); Hespus, *Commentarius* (Muhlh. 1604, Lips. 1605, fol.); Weinrich, *Commentarii* [on most of these epistles] (in separate volumes, Lips. 1608-18, together 1620, 1670, 4to); \*Baldwin, *Commentarius* (in separate vols. Vitemb. 1608-18; together, Freft. 1644, 1664, 1680, 4to; 1691, 1700, 1710, Vitemb. 1655, fol.); Justinianus, *Explanations* (Lugd. 1612, 1613, 2 vols. fol.); à Lapide, *Commentaria* (Antwerp, 1614, 1617, 1622, 1627, 1633, 1656, 1665, 1679; Paris, 1621, 1625, 1631, 1638; Lugd. 1644, 1683, fol.); Gorcom, *Epitome* [from Este and others] (Antw. 1619, Par. 1623, 8vo); Quistorp, *Commentarius* (partly in separate vols. Rost. 1636 sq.; complete, 1652, 4to); Laurence, *Explicatio* (Amst. 1642, 4to); Scultetus, *Annotata* [on Tim., Titus, and Philem.] (in the *Crucis Sacri*, vii); Crell, *Commentarius* [on many passages of these epistles] (in *Opp.* iii, 167); De Launay, *Paraphrase* (Cur. 1650, 4to); Ambianus, *Commentaria* (Par. 1659-64, 3 vols. fol.); \*Crocius, *Commentarius* [on the smaller of these epistles] (Marp. 1663, Cas. 1670, 2 vols. fol.); Calixtus, *Expositiones* [on most of these epistles] (in parts, Helmst. 1664-6, 4to); Woodhead, Allestry, and Walker [ed. Fell], *Paraphrase* (Oxon.

1674, 1702; Lond. 1707, 8vo); Schomer, *Exegesis* (vol. i, Rost. 1669, 1705; ii, 1700, 1706, 4to); Heidegger, *Exercitia* (Tigur. 1700, 4to); à Picon, *Expositio* (Par. 1703, fol.); Schmid, *Commentarii* [on most of these epistles] (at first in separate parts; together, Hamb. 1704, 4to); Locke, *Paraphrase* [on several of these epistles] (in parts, London, 1705 sq.; together, 1709, 1733, 4to); Wells, *Help* [on many of these epistles] (Lond. 1715, 8vo); Lang, *Commentatio* (Hal. 1718, 4to); Van Til, *Commentarius* [on four of these epistles] (Amst. 1726, 4to); Pierce, *Notes* [on the smaller of these epistles] (in parts, London, 1729 sq.; together, 1733, 4to); G. Benson, *Paraphrase* (London, 1734 sq.; in several vols. separately, and together, 1752-6, 2 vols.; in Germ., Lips. 1761, 4 vols. 4to); Remy, *Commentarius* (Aug. Vind. 1739, 4to); Van Alphen, *Specimena* [on five of these epistles] (Tr. ad Rh. 1742, 4to); \*Michælis, *Anmerkungen* [on most of these epistles] (Gött. 1750, 1791, 4to); Baumgarten, *Auslegung* [on the smaller of these epistles] (Hal. 1767, 4to); Zachariä, *Erklärung* [on the smaller of these epistles] (Götting. 1771, 1787, 8vo); Addington, *Remarks* (in his *Life of Paul*, London, 1784, 8vo); Krause, *Anmerk.* [on Philem. and Thess.] (Frkft. 1790, 8vo); Anonymous, *Uebers.*, etc. (Hirsch. 1791, 8vo); Struve, *Uebers.*, etc. (Alton. 1792, 8vo, pt. i); Morus, *Acroases* [on Gal. and Ephes.] (Lips. 1795, 8vo); Rullmann, *Observationes* [on the Roemerian MS.] (Rint. 1795, 4to); Bp. Burgess, *Introductio* [excerpted from old writers on many of these epistles] (Lond. 1804, 12mo); Bevan, *Notes* (in his *Life of Paul*, London, 1807, 8vo); Weingert, *Commentarius* [on the smaller epistles, chiefly compiled] (Goth. 1816, 8vo); Belsbam, *Expositio* (Lond. 1823, 4 vols. 8vo); \*Flatt, *Commentar* (Tübing. 1826-32, 5 vols. 8vo); Stenerson, *Commentarius* (Christ. 1829-30, 2 vols. 8vo); Hensen, *Schriften*, etc. (in his *Leben Paulus*, Gött. 1830, 8vo); Schrader, *Paulus* (Leipzig, 1830-3, 5 vols. 8vo); Paulus, *Erläut.* [on Rom. and Gal.] (Heidelberg, 1831, 8vo); Eyre, *Illustration* (London, 1832, 2 vols. 8vo); Steiger, *Earleitung* [on the smaller of these epistles] (Erlang. 1835, 8vo); Latham, *Arrangement* (Lond. 1837, 8vo); Morehead, *Explanation* (Lond. 1843, 8vo); Whately, *Essays* (London, 1845, 6th ed. 1849, 8vo); Sumner, *Exposition* (London, 1845 sq., 3 vols. 8vo); Lewin, *Life and Epist. of Paul* (Lond. 1851, 2 vols. 8vo); \*Conybeare and Howson, *Life and Ep. of Paul* (Lond. 1852, 2 vols. 4to; 1856, 1858, N. Y. 1855, 2 vols. 8vo); Jowett, *Notes* [on Rom., Gal., and Thess.] (Lond. 1855, 2 vols. 8vo); \*Ewald, *Erklärung* (Gött. 1857, 8vo); Linton, *Notes* (Lond. 1858, 12mo); \*Ellicott, *Commentary* [on several of these epistles] (in separate vols. Lond. 1859 sq.; Andover, 1865, 8vo); Newland, *Catena* [on Eph. and Phil.] (Lond. 1860, 8vo); Macevilly, *Exposition* (2d ed. Lond. 1860, 2 vols. 8vo); Bisping, *Handb.* (Münst. 1864 sq. 8vo). See COMMENTARY.

On the three *pastoral* epistles alone (1 and 2 Tim., and Titus), the following: Jereme, *Commentarii* (in *Opp.* Suppos. xi); Chrysostom, *Homilie* (tr. in *Lib. of Fathers*, Oxf. 1843, 8vo, xii); Calvin, *Sermons* (Genev. 1563, fol.; tr. Lond. 1579, 4to; different from his *Commentary* on these epistles, Edimb. 1856, 8vo, tr. from his *Commentarii*, in *Opp.*); Dailié, *Sermons* (Geneva, 1555-61, 5 vols. 8vo); Magalianus, *Commentaria* (Lugd. 1609, 4to); Soto, *Commentarius* (Par. 1610, fol.); Scultetus, *Observationes* (Franf. 1624, Vitemb. 1630, 4to; also in the *Cruc. Sacri*, vii); Habertus, *Expositio* (Par. 1656, 8vo); Heydenreich, *Erläuter.* (Hadamar. 1826-8, 2 vols. 8vo); \*Flatt, *Anmerk.* (Tübing. 1831, 8vo); Anon. *Μετάρρασις* (Par. 1831, 8vo); Mack, *Commentar* (Tübing. 1831, 1841, 8vo); Malthies, *Erläut.* (Greifsw. 1840, 8vo); Moller, *Commentar* (Kopenh. 1842, 8vo); Paterson, *Commentary* (London, 1848, 8vo); \*Ellicott, *Commentary* (London, 1856, Andover, 1864, 8vo). See TIMOTHY; TITUS (EPISTLES TO).

On all the *Catholic* epistles alone (James, 1 and 2 Pet., 1, 2, and 3 John, and Jude), the following: Theophylact, *Commentarius* (in *Opp.* iii); also *Enarrationes*

(in *Bibl. Patr. Gall.* vi, 286); Œcumenius, *Expositio* (Freft. 1610, 4to; also in *Opp.* ii); Bede, *Expositio* (in *Opp.* v, 673; *Works*, xii, 157; comp. *Works*, i, 215); Cramer, *Commentarij* [from the fathers] (in his *Catena*, viii); Aquinas, *Expositio* (Paris, 1543, 1563; Lugdun. 1556, Antwerp, 1592, 8vo; etc.); Hus, *Commentarij* (in *Monumenta*, ii, 105); Faber, *Commentarius* (Basil, 1527, fol.; Antw. 1540, 8vo); Imler, *Commentarius* (Freft. 1542, 2 vols. 8vo); Horne, *Expositio* (Brunswick, 1554, 4to); Hemming, *Commentarius* (in separate volumes, Havn. 1563, and Vitemb. 1569, 8vo; together, in English, Lond. 1577, 4to); Ferus, *Exegesis* (Complut. 1570, fol.); Aretius, *Commentarius* (Morg. 1589, Berne, 1608, 8vo); Grynaeus, *Explicatio* (Basil, 1593, 8vo); Salmeron, *Disputationes* (in *Opp.* xvi); Crell, *Commentarius* [on many passages of these epistles] (in *Opp.* iii, 318); Cocceius, *Commentarius* (in *Opp.* vi); Various, *Annotations* (in the *Critici Sacri*, viii); Serarius, *Commentarius* (Moguntiac. 1612, fol.); Lorinus, *Commentarius* (Lugd. 1619, 2 vols. fol.); Justinianus, *Explanations* (Lugd. 1621, fol.); Turnemann, *Meditationes* (Freft. 1625, 4to); Alsted, *Notationes* (Herb. 1631, 1640, 8vo); Lenaus, *Commentarij* (Holm. 1645, 4to); Benson, *Paraphrase* (London, 1706, 4to); Gramlich, *Anmerkungen* (Stuttgart. 1721, 8vo); Rielt, *Paraphrase* (Metz, 1727, 12mo); Collet, *Paraphrase* (Lond. 1734, 8vo); Boysen, *Erklär.* [on Pet. and Jude] (Halle, 1775, 8vo); Zachariä, *Erklär.* (Gött. 1776, 8vo); Schirmer, *Erklär.* [on Pet., Jas., and Jude] (Breslau, 1778, 8vo); Schröder, *Erklär.* [on Peter and Jude] (Schwabach, 1781, 8vo); Schlengel, *Anmerk.* (Halle, 1783, 8vo); Seemiller, *Annotations* [on Jas. and Jude] (Norimburg, 1783, 8vo); Seutler, *Paraphrasis* [on Pet. and Jude] (Halle, 1784, 8vo); Pott, *Annotations* (in parts, Gött. 1786-90, 8vo; also in the *N. T. Koppian.* ix); E. Bengel, *Erklärung* (Tüb. 1788, 8vo); Carpoz, *Scholäa* (Hal. 1790, 8vo); Göpfert, *Anmerk.* (Zwickau and Lpz. 1791, 8vo); Morus, *Predlectiones* [on Pet. and Jas.] (Lips. 1794, 8vo); Roos, *Auslegung* [on Pet. and Jude] (Tüb. 1798, 8vo); Augusti, *Erklär.* (Lemgo, 1801-8, 3 vols. 8vo); Hottinger, *Commentarius* [on 1 Pet. and James] (Lips. 1815, 8vo); Grashof, *Erklär.* (Essen. 1830, 8vo); Sumner, *Exposition* (Lond. 1840, 8vo); Diedrich, *Erklär.* (Lpz. 1861, 8vo). See each epistle in its place.

EPISTLES OF BARNABAS. See BARNABAS.

EPISTLES OF CLEMENT. See CLEMENT.

EPISTLES OF THE APOSTOLICAL FATHERS. See BARNABAS; CLEMENT OF ROME; IGNATIUS; POLYCARP.

EPISTLES, SPURIOUS. Of these many are lost; but there are several extant, of which the following are the principal (see Jones, *A new Method of settling the Canon*, vol. ii). See CANON.

1. *The Epistle of Paul to the Laodiceans*.—There was an "Epistle to the Laodiceans" extant in the beginning of the second century, which was received by Marcion, but whether this is the same with the one now extant in the Latin language is more than doubtful. "There are some," says Jerome, "who read the Epistle to the Laodiceans, but it is universally rejected." The original epistle was most probably a forgery founded on Coloss. iv, 16. "And when this epistle is read among you, cause that it be read also in the Church of the Laodiceans, and that ye likewise read the Epistle from Laodicea." The apparent ambiguity of these last words has induced some to understand Paul as speaking of an epistle written by him to the Laodiceans, which he advises the Colossians to procure from Laodicea and read to their Church. "Some," says Theodoret, "imagine Paul to have written an epistle to the Laodiceans, and accordingly produce a certain forged epistle; but the apostle does not say the epistle to, but the epistle from the Laodiceans." Belarmine among the Roman Catholics, and among the Protestants Le Clerc and others, suppose that the passage in Colossians refers to an epistle of Paul, now

lost, and the Vulgate translation—*eam que Laodicensium est*—seems to favor this view. Grotius, however, conceives that the Epistle to the Ephesians is here meant, and he is followed by Hammond, Whitby, and Mill, and also by archbishop Wake (*Epistles of the Apostolic Fathers*). Theophylact, who is followed by Dr. Lightfoot, conceives that the epistle alluded to is 1 Timothy. Others hold it to be 1 John, Philemon, etc. Mr. Jones conjectures that the epistle now passing as that to the Laodiceans (which seems entirely compiled out of the Epistle to the Philippians) was the composition of some idle monk not long before the Reformation; but this opinion is scarcely compatible with the fact mentioned by Mr. Jones himself, that when Sixtus of Sienna published his *Bibliotheca Sancta* (A. D. 1560), there was a very old manuscript of this epistle in the library of the Sorbonne. This epistle was first published by James le Fevre, of Estaples, in 1517. It may be found in Gr. and Lat. in Fabricius, *Codez Apocr.* ii, 871; and translated in Hone's *Apocryphal N. T.* p. 94. See LAODICEANS (EPISTLE TO).

2. *The Third Epistle of Paul to the Corinthians*.—It was the opinion of Calvin, Louis Capell, and many others, that the apostle Paul wrote several epistles besides those now extant. One of the chief grounds of this opinion is the passage 1 Cor. v, 9. There is still extant, in the Armenian language, an epistle from the Corinthians to St. Paul, together with the apostle's reply. This is considered by Mr. La Croze to be a forgery of the tenth or eleventh century, and he asserts that it was never cited by any one of the early Christian writers. In this, however, he is mistaken, for this epistle is expressly quoted as Paul's by St. Gregory the Illuminator in the third century, Theodore Chrethonor in the seventh, and St. Nierses in the twelfth. Neither of them, however, is quoted by any ancient Greek or Latin writer (Henderson, *On Inspiration*, p. 497. The passages are cited at length in father Paschal Aucher's *Armenian and English Grammar*, Venice, 1819. Lord Byron's translation of them is given by Stanley in his *Commentary on Corinthians*, ii, 303). See CORINTHIANS (FIRST EPISTLE TO).

3. *The Epistle of Peter to James* is a very ancient forgery. It was first published by Cotelierius, and is supposed to have been a preface to the *Preaching of Peter*, which was in great esteem among some of the early Christian writers, and is several times cited as a genuine work by Clement of Alexandria, Theodotus of Byzantium, and others. It was also made use of by the heretic Heraclion, in the second century. Origen observes of it that it is not to be reckoned among the ecclesiastical books, and that it is neither the writing of Peter nor of any other inspired person. Mr. Jones conceives it to be a forgery of some of the Ebionites in the beginning of the second century. It is given in Gr. and Latin by Fabricius, *Codez Apocr.* N. T. ii, 907. See PETER.

4. *The Epistles of Paul and Seneca* consist of eight extended Latin letters from the philosopher Seneca to the apostle Paul, and six from the latter to Seneca. (See Fabricius, *Codez Apocr.* N. T. ii, 872; and the translation in Hone's *Apocryphal N. T.* p. 95 sq.) Their antiquity is undoubted. St. Jerome had such an idea of the value of these letters that he was induced to say, "I should not have ranked Seneca in my catalogue of saints, but that I was determined to it by those epistles of Paul to Seneca and Seneca to Paul, which are read by many. . . . He was slain by Nero two years before Peter and Paul were honored with martyrdom." St. Augustine also observes (*Epistle to Macedonius*) that "Seneca wrote certain epistles to St. Paul which are now read." The epistles are also referred to in the spurious "Acts" of Linus, the first bishop of Rome after the apostles. But these *Acts* are a manifest forgery, and were first alluded to by a monk of the eleventh century. The letters do not appear to have been mentioned by any other ancient writer; but

it seems certain that those now extant are the same which were known to Jerome and Augustine. The genuineness of these letters has been maintained by some learned men, but by far the greater number reject them as spurious. Mr. Jones conceives them to be a forgery of the fourth century, founded on Philip. iv, 22. Indeed, there are few persons mentioned in the New Testament as companions of the apostle who have not had some spurious piece or other fathered on them. See *SENECA*.

5. Among the apocryphal letters now universally rejected are the well-known *Epistle of Lentulus* to the Roman senate, giving a description of the person of Christ (*Orthodoxographia*, p. 2, Basil. 1555; Fabricii *Cod. Epig.* 1719), and some pretended epistles of the Virgin Mary. One of these is said to be written in Hebrew, and addressed to the Christians of Messina in Sicily, of which a Latin translation has been published, and its genuineness gravely vindicated (*Veritas Vindicata*, 1692, fol.). It is dated from Jerusalem, in the 42d year "of our Son," nones of July, *Luna 17, Feria quinta*. The metropolitan church of our Lady of the Letter, at Messina, takes its name from the possession of this celebrated epistle, of which some have pretended that even the autograph still exists. An epistle of the Virgin to the Florentines has been also celebrated, and there is extant a pretended letter from the same to St. Ignatius, together with his reply. (For three of these spurious letters, see Fabricius, *Cod. Apoc. N. T.* ii, 842.)—Kitto, s. v. See *JESUS CHRIST*.

For other spurious epistles, see *APOCRYPHA*.

**Epistolæ.** When the ancient Christians were about to travel into a foreign country, they took with them letters of credence from their own bishop, in order that they might communicate with another church. These letters were of three kinds: *epistolæ commendatorie*, given to persons of quality, or persons whose reputation had been called in question, or to the clergy who had occasion to travel into foreign countries; *epistola communitoria*, given to such as were in peace and communion with the Church; *epistolæ dimissoria*, such as were given by the bishops to the clergy when removing from one diocese to another. All these were called *epistolæ formate*, because they were written in a peculiar form, with certain marks, which served to distinguish them from counterfeits.—Farrar, *Eccles. Dictionary*, s. v.; Bingham, *Orig. Eccl.* bk. ii, ch. iv.

**Epistolæ Obscurorum Virorum** (*Epistles of obscure Men*), a celebrated collection of letters by anonymous authors, in which the opponents of Humanism, and the Church of Rome in general, were castigated with pungent satire. The special occasion for the publication of these epistles was a bitter controversy between the learned Reuchlin (q. v.) on the one hand, and a converted Jew named Pfefferkorn, and the Dominicans of Cologne (headed by Hochstraten [q. v.], the inquisitor, and by Prior Ortunus Gratius) on the other. The latter advocated the expulsion of all Jews from Germany, the burning of their books, and the forcible education of their children in the Christian religion. Reuchlin, being asked for his opinion, advised that only the writings of the Jews against Christianity should be burned. The bishop of Spire declared in favor of Reuchlin. Pope Leo X, who personally cared more about the friendship of the Humanists than about the Church, but who, as pope, dared not to offend the monks, delayed his decision. The Humanists now organized themselves everywhere into a league, and flooded Germany with books against the fanatical monks. Among these books, the *Epistolæ Obscurorum Virorum* are the most celebrated. They successfully imitate the barbaric Latin of the monks. The types, which were of very poor quality, and abounding in abbreviations, were a studious imitation of those used by Quantil of Cologne, the publisher of Pfefferkorn and the Dominicans. The name of Al-

dus Manutius was used as publisher, and Venice as the place of printing, and a pretended papal privilege guaranteed it for ten years against counterfeited editions. They were addressed to Ortunus Gratius, a leading man among the band of literary fanatics at Cologne, who was regarded as the real author of the writings of Pfefferkorn against Reuchlin. They give a vivid picture of the opinions, the talk, and the writings of the monks and their friends, and expose their ignorance, hypocrisy, arrogance, and licentiousness. The satire was so skilful, and the imitation of the monkish language and spirit so successful, that, according to the testimony of Erasmus, the Franciscans and Dominicans of England at first received the epistles with great applause, and a Dominican prior circulated a number of copies among members of his order, believing them to be written in its honor. When the real character was discovered, the rage of the monks was great, and the pope was prevailed upon to issue against the epistles a brief of condemnation. Pfefferkorn wrote a book against the epistles in 1516 (*Defensio Jov. Pepericorni contra fimosos et criminales obscurorum virorum epistolas*), and the monks, in 1518, published against it a work called *Lamentationes obscurorum virorum*; but all these books were so poor and insipid that they increased rather than weakened the effect of the epistles. The *Lamentationes* in particular, as a defence of the monks, are so ineffective that some Roman Catholic writers, though without good reason, ascribe the authorship to the Humanists themselves. The epistles consist of three parts. The first was printed in 1515 at Hagenau by the learned printer Wolfgang Angst, a friend of Reuchlin, under the title *Epistolæ Obscurorum Virorum ad venerabilem virum Mag. Ortunum Gratium, Daventriensem* ("a native of Deventer") *Colonia Agrippinae bonas litteras docentem, variis et locis et temporibus misse ac denum in volumen coactæ*. The second part was printed at Basel in 1517 by Froben; the third, which is much inferior to the two former, appeared much later. Sir William Hamilton (*Edinburgh Review*, liii, 193) remarks that "the *Epistolæ* are at once the most cruel and the most natural of satires, and, as such, they were the most effective. They converted the tragedy of Reuchlin's persecution into a farce; annihilated, in public consideration, the enemies of intellectual improvement; and even the friends of Luther, in Luther's lifetime, acknowledged that no other writing had contributed so powerfully to the downfall of the papal domination."

As to the authorship of the *Epistolæ*, there has been much dispute. It appears certain that neither Erasmus nor Reuchlin had any part in the compilation. The recent German critics generally incline to think that the first part was chiefly compiled by Wolfgang Angst and Crotus Rubianus, and the second by Crotus Rubianus, Hutten, and Pirkheimer; but Hamilton, in the article above cited, shows almost decisively that Hutten, Crotus, and Buschius were the joint authors. A late writer, Chauflour-Kestner (*Ulrich von Hutten*, translated by A. Young), attributes the work exclusively to Hutten (see *British and For. Eclog. Review*, Oct. 1867, p. 775). The *Epistolæ* have frequently been printed; among the earlier editions, those of Frankfurt (1643), London (1710), and another London edition (without date), with nine pictures, are the best. There are modern editions by Dr. Münch (Lpz. 1827), by Rotermond (Hanov. 1827), and by Boecking (Lpz. 1858). The London edition of 1710 is the most elegant in form. It was edited by the learned Maittaire, who really believed it to be the genuine work of the monks, as did Steele, to whom Maittaire's edition was dedicated, and who noticed it, as if genuine, in *The Tatler*. This edition was reprinted by Clements, London, 1742. The literary history of the *Epistolæ* is very fully given in Sir W. Hamilton's article above referred to, which criticizes Münch's edition with some severity. Very full information on the *Epistolæ* is given in the

three last-named editions. See, besides the authors already cited, Herzog, *Real-Encyklop.* iv, 111; Wetzler u. Welte, *Kirchen-Lex.* iii, 633.

**Epistolæ Præstantium Virōrum**, a valuable collection of letters illustrating the history of the Arminians and Remonstrants. Its full title is *Præstantium ac Eruditōrum virorum Epistolæ Ecclesiastica et Theologica variū argumenti, inter quas eminenti vix, quæ a Jac. Arminio, Conr. Vorstio, Sim. Episcopio, Hug. Grotio, Casp. Barlaeo, conscripte sunt.* (Amst. 1660, 8vo; 2d ed. Amst. 1684, fol.).

**Epistolārē** (plur. *-arīa*), a term used in Biblical criticism (q. v.) to distinguish those MS. Lctionaries (q. v.) or selections from the Greek Test. anciently employed in Church service that contained selections from the *epistles* only. See MANUSCRIPTS OF THE BIBLE.

**Epistolarium**. The office of the Holy Communion was in the early ages of the Church contained in four volumes, viz. the Antiphoner, the Lctionary, the Books of the Gospels, and the Sacramentary. The second of these, the *Lctionary*, was the book of the epistles read at mass (Du Cange, *Glossarium*, s. v. *Lctionarius*), generally called the *Epistolarium*, also *Comes* and *Apistolus*.—Procter, *On the Book of Common Prayer*, p. 9.

**Epitaphia** (ἐπιτάφια), funeral orations. It was usual in the early Church to make funeral orations (λόγοι ἐπικήδειοι) in praise of those who had been distinguished during life by their virtues and merits. Several of these are extant, as that of Eusebius at the funeral of Constantine; those of Ambrose on the deaths of Theodosius and Valentinian, and of his own brother Satyrus; those of Gregory of Nazianzus upon his father, his brother Cæsarius, and his sister Gorgonia; and that of Gregory of Nyssa upon the death of Melitus, bishop of Antioch.—Riddle, *Christ. Antiq.* bk. vii, ch. iii.

**Epoch**. 1. The point of time, usually marked by some important event, from which a series of years, termed an *æra*, is computed or dated; although "epoch" and "æra" are often used synonymously for either a chronological period or date in general (see *Penny Cyclopediā*, s. v. *Æra*). An *æra* properly so called the ancient Hebrews did not possess. Signal events seem to have been made use of as points from which to date. Moses, like Herodotus, reckoned by generations. The Exodus, as may be seen in Exod. xix, 1, and Num. xxxiii, 38, probably, also, the building of the first Temple (1 Kings ix, 10; 2 Chron. iii, 2), were employed as starting-points to aid in assigning events their position in historical succession. Also the destruction of the first Temple, or the beginning of the Babylonish captivity (in the summer of the year B.C. 586), and the liberation of the Jews from the Syrian yoke by the valor of the Maccabees (in the autumn of the year B.C. 143), were used as epochs from which time was reckoned. After the manner of other nations, the Hebrews computed time by the succession of their princes, as may be seen throughout the books of Kings and Chronicles. At a later period, and in the first book of the Maccabees, what is termed the Greek *æra*, or that of the Seleucids, began to be employed. This *æra*, which is also called the *æra* of the Syro-Macedonians, commences from the year of Rome 442, twelve years after the death of Alexander, and 311 years and four months before the birth of our Saviour, the epoch of the first conquest of Seleucus Nicator in that part of the West which afterwards composed the immense empire of Syria (see Noris, *Annus et epocha Syro-Macedonum*, Lips. 1696). The Julian year, formed of the Roman months, to which Syrian names were given, was used. The *æra* prevailed not only in the dominions of Seleucus, but among almost all the people of the Levant, where it still exists. The Jews did not abandon the use of this *æra* until within

the last 400 years. At present they date from the Creation, which they hold to have taken place 3760 years and three months before the commencement of the Christian *æra*. In order to fix their new moons and years, as well as their feasts and festivals, they were obliged to make use of astronomical calculations and cycles. The first cycle they used for this purpose was one of 84 years, but this being discovered to be faulty, they had recourse to the Metonic cycle of 19 years, which was established by the authority of rabbi Hillel, prince of the Sanhedrim, about the year 360 of the Christian *æra*. This they still use, and say it is to be observed till the coming of the Messiah. Indeed, some contend that their present practice of dating from the Creation of the world is of great antiquity. Their year is luni-solar, consisting either of 12 or 13 months each, and each month of 29 or 30 days; for in the compass of the Metonic cycle there are 12 common years, consisting of 12 months, and seven intercalary years, consisting of 13 months, which are the third, sixth, eighth, eleventh, fourteenth, seventeenth, and nineteenth of the cycle. See CHRONOLOGY.

The birth of the Saviour of the world probably took place somewhat earlier than the date which is usually assigned to it. Usage, however, has long fixed the *æra* to which it gave rise, namely, the *Christian æra*, or the *æra* of the Incarnation, to begin on the 10th day of January, in the middle of the fourth year of the 194th Olympiad, the 753d year of the building of Rome, and in the 4714th of the Julian period. The use of the Christian *æra* was introduced in the sixth century; in France it was first employed in the seventh. About the eighth it was generally adopted; but considerable difference has existed not only in various countries, but even in the same place in the same country and at the same period, respecting the commencement of the year. Nor did the use of the *æra* become universal in Christendom till the fifteenth century. The Christian year consists of 365 days for three successive years, and of 366 in the fourth, which is termed leap-year. This computation subsisted for 1000 years without alteration, and is still used by the Greek Church. The simplicity of this form has brought it into very general use, and it is customary for astronomers and chronologists, in treating of ancient times, to date back in the same order from its commencement. There is, unfortunately, a little ambiguity on this head, some persons reckoning the year immediately before the birth of Christ as 1 B.C., and others noting it with 0, and the second year before Christ with 1, thus producing one year less than those who use the former notation. The first, however, is the usual mode. The Christian year, arranged as has been shown, was 11' 11" too long, an error which amounted to a day in nearly 129 years. Towards the end of the sixteenth century the time of celebrating the Church festivals had advanced ten days beyond the periods fixed by the Council of Nice in 325. It was, in consequence, ordered by a bull of Gregory XIII that the year 1582 should consist of only 355 days, which was brought about by omitting ten days in the month of October, namely, from the 5th to the 14th. And to prevent the recurrence of a like irregularity, it was also ordered that in three centuries out of four the last year should be a common instead of a leap-year, as it would have been by the Julian Calendar. The year 1600 remained a leap-year, but 1700, 1800, and 1900 were to be common years. This amended mode of computing was called "The New Style." It was immediately adopted in all Catholic countries, but Protestants came to use it only gradually. In England the reformed calendar was adopted in the year 1752 by omitting eleven days, to which the difference between the styles then amounted. The alteration was effected in the month of September, the day which would have been the third being called the fourteenth. See VULGAR ÆRA.

The following summary shows the correspondence of the principal epochs, aras, and periods with that of the birth of Christ, or Christian era. (A valuable treatise on *Eras of ancient and modern Times* may be found in the *Companion to the Almanac*, 1830.)—Kitto, s. v. Chronology. See also *ÆRA*.

This golden rule, says Dr. Watts, has many excellent properties in it. 1. It is a rule that is easy to be understood, and easy to be applied by the meanest and weakest understanding (Isa. xxxv, 8). 2. It is a very short rule, and easy to be remembered: the weakest memory can retain it; and the meanest of mankind may carry this about with them, and have it ready upon all occasions. 3. This excellent precept carries greater evidence to the conscience, and a stronger degree of conviction in it, than any other rule of moral virtue. 4. It is particularly fitted for practice, because it includes in it a powerful motive to stir us up to do what it enjoins. 5. It is such a rule as, if well applied, will almost always secure our neighbor from injury, and secure us from guilt if we should chance to hurt him. 6. It is a rule as much fitted to awaken us to sincere repentance upon the transgression of it as it is to direct us to our present duty. 7. It is a most extensive rule, with regard to all the stations, ranks, and characters of mankind, for it is perfectly suited to them all. 8. It is a most comprehensive rule with regard to all the actions and duties that concern our neighbors. It teaches us to regulate our temper and behavior, and promote tenderness, benevolence, gentleness, etc. 9. It is also a rule of the highest prudence with regard to ourselves, and promotes our own interest in the best manner. 10. This rule is fitted to make the whole world as happy as the present state of things will admit. See Watts, *Sermons*, serm. 33, vol. i; Evans, *Sermons*, serm. 28."—Buck, *Theol. Dict.* s. v. See *ETHICS*.

**Equivocation** ("æque, roco, to use one word in different senses). "How absolute the knave is! We must speak by the card, or *equivocation* will undo us' (*Hamlet*, act v, scene 1). In morals, to *equivocate* is to offend against the truth by using language of double meaning, in one sense, with the intention of its being understood in another—or in either sense according to circumstances. The ancient oracles gave responses of ambiguous meaning. *Aio, te, Æacide, Romanos vincere posse* may mean either, 'I say that thou, O descendant of Æacus, canst conquer the Romans,' or 'I say that the Romans can conquer thee, O descendant of Æacus.' *Latronem Petrum occidisse* may mean 'a robber slew Peter,' or 'Peter slew a robber.' *Edwardum occidere nolite timere bonum est*. The message penned by Adam Orleton, bishop of Hereford, and sent by queen Isabella to the jailers of her husband, Edward II. Being written without punctuation, the words might be written two ways: with a comma after *timere*, they would mean, 'Edward, to kill fear not, the deed is good;' but with it after *nolite*, the meaning would be, 'Edward kill not, to fear the deed is good.' Henry Garnet, who was tried for his participation in the Gunpowder Plot, thus expressed himself in a paper dated March 20, 1605-6: 'Concerning *equivocation*, this is my opinion: in moral affairs, and in the common intercourse of life, when the truth is asked among friends, it is not lawful to use *equivocation*, for that would cause great mischief in society; wherefore, in such cases, there is no place for *equivocation*. But in cases where it becomes necessary to an individual for his defense, or for avoiding any injustice or loss, for obtaining any important advantage, without danger or mischief to any other person, then equivocation is lawful' (Jardine, *Gunpowder Plot*, p. 233). Dr. Johnson would not allow his servant to say he was not at home when he really was. 'A servant's strict regard for truth,' said he, 'must be weakened by such a practice. A philosopher may know that it is merely a form of denial, but few servants are such nice distinguishers. If I accustom a servant to tell a lie for me, have I not reason to apprehend that he will tell many lies for himself?' (Boswell, *Letters*, p. 32.) There may be *equivocation* in sound as well as in sense. It is told that the queen of George III asked one of the dignitaries of the Church if ladies might *knot* on

2. The term epoch is used by modern writers to denote "critical junctures in the development of history, the signals of a new creation; hence termed *εποχαι*, pauses or resting-places for contemplation. What exists at the epoch in the germ is developed to a more advanced stage, and thus afterwards becomes the *Period*. The former denotes the fountain-head, the latter the stream; their limits are where a new form of culture again appears in an epoch. The epochs are either critical and destructive, or creative and organizing."—Neander, *Hist. of Dogmas*, i, 20.

**Equitius**, a lay abbot of many monasteries, both male and female, in the province of Valeria, who lived in the 6th century. The year both of his birth and death are unknown. He had not taken orders, but was nevertheless very active in preaching. He was therefore denounced at Rome, and the pope summoned him before his tribunal, but the great and general reputation of Equitius induced the pope to dismiss the case. Equitius led a very ascetic life, and is said to have always, during his many travels, carried the Bible with him. According to Baronius, pope Gregory I was a monk according to the rule of St. Equitius, but this is denied by other writers.—Herzog, *Real-Encykl.* iv, 113; Wetzler u. Welte, *Kirchen-Lexikon*, iii, 638. (A. J. S.)

**Equity** "is that exact rule of righteousness or justice which is to be observed between man and man. Our Lord beautifully and comprehensively expresses it in these words: 'All things whatsoever ye would that men should do unto you, do ye even so to them, for this is the law and the prophets' (Matt. vii, 12).

Sunday. His reply was, Ladies may *not*; which, in so far as sound goes, is *equivocal*."—Fleming, *Vocabulary of Philosophy*, s. v.

**Er** (Heb. *עֵר*, *watchful*; Sept. and N. T. "Ἠρ, Vulg. *Her.*), the name of three men. See also **ERR**.

1. The oldest son of the patriarch Judah by Bath-Shuah (daughter of Shuah), a Canaanitess. His wife was Tamar, but he had no issue, and his widow eventually became the mother of Pharez and Zarah by Judah. Er "was wicked [*עֵר*, a paronomasia of *עֵר*] in the sight of the Lord; and the Lord slew him" (Gen. xxxviii, 3-7; Num. xxvi, 19). B.C. cir. 1896. It does not appear what the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan.

2. A "son" of Shelah (Judah's son), and "father" of Leeah (1 Chron. iv, 21). B.C. prob. ante 1618.

3. Son of Jose and father of Elmodan, in Christ's genealogy, of David's private line prior to Salathiel (Luke iii, 28). B.C. cir. 725.

**Era**. See **ERA**.

**Erakim**. See **TALMUD**.

**Er'an** (Heb. *עֵרָאן*, *watchful*; Sept. *Ἐρέων*, appar. reading *עֵרָאן*, with the Samar. and Syr.; Vulg. *Heran*), son of Shuthelah (eldest son of Ephraim), and progenitor of the family of the Eranites (Num. xxvi, 36). B.C. post 1856. The name does not occur in the genealogies of Ephraim in 1 Chron. vii, 20-29, though a name, ELADAN (ver. 20) or ELEAD (ver. 21), is found which may be a corruption of it.

**E'r'anite** (Heb. with the art. *ha-Eranî*, *הַעֵרָאנִי*, Sept. *ὁ Ἐρέων* [like the Samar. and Syr. reading *Ἠ* for *Ἠ*], Vulg. *Heranite*, A. V. "the Eranites"), a patronymic designation of the descendants of the Ephraimite ERAN (Num. xxvi, 36).

**Erasmus**, DESIDERIUS, was born at Rotterdam, October 28, 1467 (1465). His father's name was Gerhard, his mother's Margaretha; they were never married. The boy was called Gerhardus Gerhardt, which he changed into the name Desiderius Erasmus (properly Erasmus), having the same meaning in Latin and Greek (*amiable*). The father went to Rome. Being informed there that Margaretha was dead, he entered into orders; but, finding her alive on his return, he and she devoted themselves to the training of their son. At six he was a chorister in the cathedral at Utrecht. At nine he was sent to school at Deventer, where he had for school-fellow a youth who afterwards became pope Adrian VI. He displayed so great talent at Deventer that it was even then predicted that he would one day be the most learned man in Germany. After the death of his parents, when he was under fourteen, his guardians determined to make a monk of him, in order, it is said, that they might secure his patrimony for themselves. He refused to enter the monastic life; but his guardians placed him in the seminary at Herzogenbusch, where, as he says, he spent three useless and unhappy years. He was then put at the monastic house of Zion, near Delft, and finally he entered the Augustinian monastery of Emaüs, or Stein, near Gouda. Here, after sturdy resistance, he entered on his novitiate in 1486. His life at Stein was unhappy, except so far as it was relieved by study, to which he devoted all the time possible. His hatred of monkery increased with each year of his stay in the monastery. In 1491, the bishop of Cambray, desiring a capable Latinist as his secretary for a projected journey to Rome, obtained permission for Erasmus to leave the convent. The journey did not come off, and Erasmus (who was ordained priest in 1492) remained some years under the bishop of Cambray, who authorized him to proceed to Paris to continue his studies, instead of returning to the monastic life. At Paris, Eras-

mus barely supported himself, by taking pupils, and he suffered greatly from sickness and poverty. He afterwards attributed his weakness of constitution to his wretched food and unwholesome lodgings in Paris. After a short visit to Cambray and to Holland for his health, he returned to Paris, where his pension from the bishop failed, and he taught for his bread. Among his pupils was lord William Mountjoy, who ever after remained his friend and patron. For him he wrote the treatise

Statue of Erasmus at Rotterdam.

*De Ratione conscribendi epistolas*. Mountjoy offered him a pension to accompany him to England. Erasmus passed a year there (1498-9), chiefly at London, Oxford, and Cambridge, and became acquainted with many Englishmen distinguished for piety and learning. At Oxford he studied in St. Mary's College, and formed many connections which were afterwards of use to him. Among his special friends were Colet, Grocyn, Latimer, and the celebrated chancellor Thomas More. From England Erasmus returned to Paris, where he again supported himself by pupils. In 1499 he returned to the Continent, and spent his time chiefly in studying Greek, and in translating Greek authors into Latin. He had no fixed abode; now he was in Paris, and again in the provinces of France or in Holland. The *Adagia* and the *Enchiridion Militis Christiani* were published between 1500 and 1504. He began his Biblical studies also about this time, publishing in 1505 a new edition of the *Remarks of Laurentius Valla on the N. T.* In 1505 he spent a short time in England, where he made the acquaintance of archbishop Warham, to whom he dedicated his translation of the *Hebna*. In 1506 he accomplished his long-cherished desire of visiting Italy, where he succeeded in obtaining from pope Julius II a dispensation from his monastic vows. At Turin he was made D.D. (1506), and his time was divided between Bologna, Rome, Florence, and Padua, where he improved his knowledge of Greek under the instruction of the best Greek and Italian scholars. In 1507 he superintended, at Venice, a new edition of his *Adagia*, printed by the celebrated Aldus Manutius. "At Rome he met with a flattering reception, and promises of high advancement; but, having engaged to return to England, he did so in 1510, in the expectation that the recent accession of Henry VIII, with whom he had for some time maintained a correspondence, would insure to him an honorable provision." On the journey he wrote the work which gave him his greatest celebrity for the time, the *Enconium Morie* (Panegyric on Folly), which he dedicated to Thomas More. He lived "for some time at Cambridge, where he was appointed Lady Margaret professor (in divinity), and also lectured on Greek. His lodging was in Queen's College, in the grounds of which Erasmus's Walk is still shown. In 1509, at the request of Colet, he published *Copia Verborum ac rerum*, long in use as a school-book. He accepted an invitation from the archduke, afterwards Charles V, and went to Brabant in 1514, with the office of councillor, and a salary of 200 florins. After this we find him resident sometimes in the Netherlands, sometimes at Basel, where the great work in which he had been

many years engaged, the first edition of the New Testament in Greek, was published in 1516, accompanied by a new Latin translation. Some amusing specimens of the objections made to this undertaking by the ignorant clergy will be found in his 'Letters' (vi, 27) (*Engl. Cyclop.*). It was dedicated to pope Leo X. His fame had by this time spread all over Europe; he and Reuchlin were called the *Eyes of Germany*. From this period onward he resided chiefly at Basel, though his wandering habits were never entirely shaken off. The second edition of his *N. T.* appeared in 1519, and prefixed to it was his *Ratio seu Methodus compendio perveniendi ad veram Theologiam* (also published separately, 1522). In 1521 he published his *Colloquia*, "composed ostensibly to supply young persons with an easy school-book in the Latin language, and at the same time to teach them religion and morals. For the purpose of teaching the Latin language this little book seems peculiarly well adapted: it was long used for this purpose in England. In these 'Colloquies,' which are generally very amusing, Erasmus has made some of his smartest attacks on various superstitions of the Roman Catholic Church. On this account the book was prohibited" (*Engl. Cyclop.*). His *Annotations in N. T.* appeared at Basel (1516-22, many editions), and his *Paraphrases in N. T.* (1524, fol.; Berlin, 1777-80, 3 vols. fol.) The *Paraphrases* were so much esteemed in England that it was made the duty of every parish church, by an order in council (1547), to possess a copy of the English translation (Lond, 1548, 2 vols. fol., by Udall, Coverdale, and others; 2d edit, 1551).

As Erasmus had decided to remain in the Church of Rome, his residence at Basel became an uneasy one when the Reformation got possession of that city. In 1529 he removed to Freiburg, in Breisgau, where he built a house with a view to permanent residence, but never liked it. His later years were embittered by literary and religious quarrels. His pecuniary affairs, however, which had always been embarrassed in his early years, were now easy. In 1535 he returned to Basel, intending, however, only a short stay before returning to his native land to die. He was soon taken ill, but recovered sufficiently to continue his literary labors, especially on his edition of Origen. He suffered from gravel; an attack of dysentery supervened, and carried him off on the night of July 11-12 (O.S.), 1536. He left his property to the poor.

The literary industry of Erasmus during his whole life was prodigious. He early imbibed a love for the ancient classics, and contributed largely to increase the taste for ancient culture by his writings in praise of them, by his editions of classic authors, and by his attacks on the scholastic theology and on the ignorance of the monks. "He worked incessantly in various branches, and completed his works with great rapidity; he had not the patience to revise and polish them, and accordingly most of them were printed exactly as he threw them out; but this very circumstance rendered them universally acceptable; their great charm was that they communicated the trains of thought which passed through a rich, acute, witty, intrepid, and cultivated mind, just as they arose, and without any reservations. Who remarked the many errors which escaped him? His manner of narrating, which still rivets the attention, then carried every one away" (Ranké, *Reformation*, by Austin, bk. ii, chap. i). His *Ciceronianus* is "an elegant and stinging satire on the folly of those pedants who, with a blind devotion, refused to use in their compositions any words or phrases not to be found in Cicero. Erasmus's own Latin style is clear and elegant; not always strictly classical, but like that of one who spoke and wrote Latin as readily as his mother tongue. His 'Letters,' comprising those of many learned men to himself, form a most valuable and amusing collection to those who are interested in the manners and literary histories of the age in which they were written; and several of

them in particular are highly valuable to Englishmen as containing a picture of the manners of the English of that day" (*Engl. Cyclop.*). But, of all his writings, the only ones that are likely to retain a lasting place in literature are the *Colloquies*, and the *Panegyric on Folly*—writings of his comparative youth, and regarded by him rather as pastime. "For neither as a wit nor as a theologian, nor perhaps even as a critic, does Erasmus rank among master intellects; and in the other departments of literature no one has ventured to claim for him a very elevated station. His real glory is to have opened at once new channels of popular and of abstruse knowledge—to have guided the few, while he instructed the many—to have lived and written for noble ends—to have been surpassed by none in the compass of his learning, or the collective value of his works—and to have prepared the way for a mighty revolution, which it required moral qualities far loftier than his to accomplish. For the soul of this great man did not partake of the energy of his intellectual faculties. He repeatedly confesses that he had none of the spirit of a martyr, and the acknowledgment is made in the tone of sarcasm rather than in that of regret. He belonged to that class of actors on the scene of life who have always appeared as the harbingers of great social changes—men gifted with the power to discern and the hardihood to proclaim truths of which they want the courage to encounter the infallible results; who outrun their generation in thought, but lag behind it in action; players at the sport of reform so long as reform itself appears at an indefinite distance; more ostentations of their mental superiority than anxious for the well-being of mankind; dreaming that the dark page of history may hereafter become a fairy tale, in which enchantment will bring to pass a glorious catastrophe, unthought by intervening strife, and agony, and suffering; and therefore overwhelmed with alarm when the edifice begins to totter, of which their own hands have sapped the foundation. He was a reformer until the Reformation became a fearful reality; a jester at the bulwarks of the papacy until they began to give way; a propagator of the Scriptures until men betook themselves to the study and the application of them; depreciating the mere outward forms of religion until they had come to be estimated at their real value; in short, a learned, ingenious, benevolent, amiable, timid, irresolute man, who, bearing the responsibility, resigned to others the glory of rescuing the human mind from the bondage of a thousand years. The distance between his career and that of Luther was therefore continually enlarging, until they at length moved in opposite directions, and met each other with mutual animosity" (*Edinburgh Review*, lxxviii, 302).

The relations of Erasmus to the Reformation have been summarily stated in the paragraph just cited. He was the literary precursor of the Reformation. His exegetical writings prepared the way for later expositors, opened a new era in Biblical criticism, and also aided in giving the Bible its Protestant position as the rule of faith. His satires upon the monks, upon the scholastic theology, and upon Church abuses generally, contributed largely to prepare the minds of literary men throughout Europe for a rupture with Rome. He taught, in anticipation of Protestantism, that Christian knowledge should be drawn from the original sources, viz. the Scriptures, which he said should be translated into all tongues. In his *Encomium Morie*, Folly is introduced as an interlocutor who "turns into ridicule the labyrinth of dialectic in which theologians have lost themselves, the syllogisms with which they labor to sustain the Church as Atlas does the heavens, the intolerant zeal with which they persecute every difference of opinion. She then comes to the ignorance, the dirt, the strange and ludicrous pursuits of the monks, their barbarous and objuratory style of preaching; she attacks the bishops, who are more solicitous

for gold than for the safety of souls; who think they do enough if they dress themselves in theatrical costume, and under the name of the most reverend, most holy, and most blessed fathers in God, pronounce a blessing or a curse; and, lastly, she boldly assails the court of Rome and the pope himself, who, she says, takes only the pleasures of his station, and leaves its duties to St. Peter and St. Paul. Among the curious wood-cuts, after the marginal drawings of Hans Holbein, with which the book was adorned, the pope appears with his triple crown. It produced an indescribable effect: twenty-seven editions appeared even during the lifetime of Erasmus; it was translated into all languages, and greatly contributed to confirm the age in its anticlerical dispositions" (Ranke, *l. c.*). But the personal character of Erasmus was not fitted for such storms as those of the Reformation. Intellectually, he was too many-sided and too undecided; morally, he was of too flaccid a fibre, too timid, and too fond of ease, to devote himself to a certain strife with very uncertain issues. Moreover, he never had profound religious convictions or experience. The monks, nevertheless, were right to a certain extent in their saying that "Erasmus laid the egg; Luther hatched it." At first Erasmus regarded Luther with favor as a coadjutor in his attacks upon the ignorance of the monks, and in his plans for the reformation of literature. But Luther saw the weakness and spiritual poverty of Erasmus, and expressed his fears in letters to Spilatin and Lange as early as 1517; while Erasmus, in letters to Zwingli, deprecated the haste and vehemence of Luther. In 1519 (March 28) Luther wrote a friendly letter to Erasmus, who says in reply (April 30): "I hold myself aloof from the controversies of the times to devote my whole strength to literature. After all, more is to be gained by moderation than by passion; so Christ conquered the world. It is better to write against those who have abused the authority of the papacy than against individual popes." In 1520, Frederick, elector of Saxony, meeting Erasmus at Cologne, asked his opinion of Luther; his reply was, *Lutherus peccavit in dubio, nempe quod tetigit coronam pontificis et ventres monachorum*: "Luther has committed two blunders; he has ventured to touch the crown of the pope and the bellies of the monks. . . but his language is too violent," etc. He expressed similar cautions in a letter to Justus Jonas at the time of the Diet of Worms (1521). The earnest Ulrich von Hutten sought to draw Erasmus openly to the Protestant side, but in vain. In 1522 Hutten published an *Expostulatio cum Erasmo*, abounding in bitter invective, to which Erasmus replied in *Spongia adversus Hutteni aspergines* (Basel, 1523) (see Gieseler, *Church History*, ed. by Smith, iv, § 3). Luther is said to have condemned both these pamphlets as disgraceful. Luther wrote (1524) to Erasmus an earnest letter, urging him, if he would not join the Reformers, at least to refrain from open opposition. "You might, indeed, have aided us much by your wit and your eloquence; but, since you have not the disposition and the courage for this, we would have you serve God in your own way. Only we feared, lest our adversaries should entice you to write against us, and that necessity should compel us to oppose you to your face. If you cannot, dear Erasmus, assert our opinions, be persuaded to let them alone, and treat of subjects more suited to your taste" (*Biblioth. Sacra*, 1862, p. 129). "From this time Erasmus complains incessantly of the hostility of the Evangelicals. The haughty style in which Luther offered him peace (in the letter above cited) could only have the effect upon that ambitious man of giving additional weight to the request which reached him at the same time from England, that he would take revenge upon Luther for his attack upon the royal author (Henry VIII). And so, to assail the formidable Luther in the weakest part of his theological system, Erasmus wrote his treatise *De Libero Arbitrio*

(Sept. 1524). Luther replied with his usual bitterness in his *De Seruo Arbitrio* (Dec. 1525). Erasmus replied in like coin in his *Hyperaspistes* (1526). Thus the renowned Erasmus now passed over into the ranks of the enemies of the Reformation, though he did not cease to recommend conciliatory measures towards it" (Gieseler, *l. c.*).

The writings of Erasmus were collected and published in 1510-11 (9 vols. fol.), and also by Clericus (Leclerc), under the title *Des. Erasmi Opera Omnia, emendatorum et auctiora*, etc. (L. Bat. 1703-6, 10 vols. in 11, fol). He edited many of the fathers, viz. Origen, Irenæus, Cyprian, Augustine, Chrysostom, Lactantius, and translations of selections from them are given in his *Opera*. The separate editions of his more popular works (the *Encomium, Adagia, Colloquia*, etc.) are very numerous. There are English versions of the following: *Panegyric upon Folly* (two translations: one by Chaloner, the other by Kennet; often printed); *Colloquies* (1671, and often, especially in selections); *Enchiridion Militis*, by W. de Worde (1533, 16mo, and often); *Christian's Manual* (from the *Enchiridion Militis*, London, 1816, 8vo); *Ecclesiastes*, or *the Preacher* (chiefly from Erasmus, London, 1797, small 8vo); *De Contemptu Mundi* (Lond. 1533, 16mo); *De Immensa Dei Misericordia* (1533, and often). Many of Erasmus's smaller tracts were also translated. There are several biographies of Erasmus (none very good), viz. *Beatus Rhenanus*, in *Erasmi Opera*, tom. i (1540); *Leclerc's*, in vol. i of *Erasmi Opera* (1703); *Merula, Vita Erasmi* (Leyden, 1607, 4to); *Knight, Life of Erasmus* (London, 1726, 12mo); *Barigny, Vie d'Erasme* (Par. 1757, 2 vols. 12mo); *Jortin, Life of Erasmus* (Lond. 1758, best ed. 1803, 3 vols. 8vo; abridged by Laycey, London, 1805, 8vo); *Pless, Leben des Erasmus* (Zurich, 1790); *Butler, Life of Erasmus* (London, 1825, 8vo); *Nisard*, in *Etudes sur la Renaissance* (Par. 1855); *Müller, Leben des Erasmus* (Hamb. 1828, 8vo; reviewed by U.E.M., *Studien u. Krit.* 1829, p. 1); *Gasius, On Erasmus as Church Reformer* (a crowned prize-essay in the Dutch language, The Hague, 1850). See also Bayle, *Dictionary* (s. v. Erasmus); *Dupin, Auteurs Ecclési.* tom. xiii; *Waddington, History of the Reformation* (London, 1841), ch. xxiii; *Merle d'Aubigné, History of the Reformation*, vol. i; *Hofer, Nouv. Biogr. Générale*, xvi, 207; *Hallam, History of Literature* (Harper's ed.), i, 134 sq.; *Mackintosh, Miscellaneous Works* (London, 1851), i, 190 sq.; *Christ. Examiner*, xlix, 80; *Christian Review*, April, 1858; *Quart. Review*, 1859, art. i; *Theol. Quartalschrift*, 1859, p. 531; *Bibliotheca Sacra*, xix, 106; *Brit. and For. Ev. Review*, July, 1867, p. 517; H. Rogers, in *Good Words*, Feb. 1868.

**Erastianism**, the title generally given to "that system 'which would rest the government of the Church spiritual as well as civil altogether in the Christian magistrate.' This, however, 'was far from being an invention of Erastus, since in every kingdom of Europe the Roman claims had been resisted on the like principles for centuries before he was born; the peculiarity of Erastus's teaching lay rather in his refusing the right of excommunication to the Christian Church' (see *Oxf. Hooker*, Ed. Pref. p. lviii) (Elen, *Churchman's Dictionary*, s. v.). Hardwick proposes "Byzantinism" as the proper title for the theory named instead of "Erastianism" (*History of the Reformation*, chap. viii, p. 356). See also *Nichols, Anecdotes of Bourger* (London, 1782, 4to), p. 71; *Pretzman, The Church of England and Erastianism* (Lond. 1854); *Hagenbach, History of Doctrines* (Smith's ed.), ii, 299; *Cunningham, Historical Theology*, ii, 569; *Orme, Life and Times of Baxter*, i, 71; *Christian Review*, viii, 579; and the articles CHURCH; DISCIPLINE; ECCLESIASTICAL POLITY; ERASTUS, THOMAS.

**Erastus** (Ἐραστος, *Erastus*), an old Grecian name, *Diog. Laert.* iii, 81), a Corinthian, and one of Paul's disciples, whose salutations he sends from Corinth to

the Church at Rome as those of "the chamberlain (q. v.) of the city" of Corinth (Rom. xvi, 23). The word so rendered (*οικονόμος*, Vulg. *ararius*) denotes the city treasurer or steward (Suicer, *Thesaur.* ii, 464; see Flessa, *De arcariis*, Baruth, 1725-6, ii, § 11; also Elsner, *Obs.* ii, 68), an officer of great dignity in ancient times (comp. Josephus, *Ant.* vii, 8, 2); so that the conversion of such a man to the faith of the Gospel was a proof of the wonderful success of the apostle's labors in that city. We find Erastus with Paul at Ephesus as one of his attendants or deacons (*οἱ διακονοῦντες αὐτῷ*), whence he was sent, along with Timothy, into Macedonia, while the apostle himself remained in Asia (Acts xix, 22), A. D. 51. They were both with the apostle at Corinth when he wrote, as above, from that city to the Romans, A. D. 55; and at a subsequent period (A. D. 64) Erastus was still at Corinth (2 Tim. iv, 20), which would seem to have been the usual place of his abode (*ἐμνεῖν*). According to the traditions of the Greek Church (*Menol. Græcum*, i, 179), he was first *aconomus* to the Church at Jerusalem, and afterwards bishop of Pnceas, and died a natural death. Many critics, however (Grotius, Kype, Kuinöl, De Wette, Winer, etc.), regard the Corinthian Erastus as a different person from Paul's companion, on the ground that the official duties of the former would not allow such an absence from the city (Neander, *Planting and Training*, i, 392, note), or that, if he was with Paul at Ephesus, we should be compelled to assume that he is mentioned in the epistle to the Romans by the title of an office which he had once held and afterwards resigned (Meyer, *Kommentar.* in loc.).

Erastus, THOMAS (properly LIEBER or LIEBLER, which he put into the Greek form, *Erastus*), was born at Baden, in Switzerland (according to another account, at Auggen, in Baden-Durlach), Sept. 7, 1524. He studied divinity and philosophy at Basel, and afterward at Pavia and Bologna, where he graduated M. D. In 1558 he became physician to the prince of Hesseberg. The elector palatine, Frederick III, also appointed him first physician and professor of medicine in the University of Heidelberg. In 1560 and 1561 he attended the conferences of Lutheran and Reformed divines at Heidelberg and Maulbronn on the Lord's Supper, and vigorously maintained the Zuinglian view. He maintained the same doctrine in a treatise *De Cæna Domini* (1565; transl. by Shute, Lond. 1578, 16mo). He was charged with Socinianism, but without just ground. But his name is chiefly preserved for his views on Church authority and excommunication. "A sort of fanaticism in favor of the use of ecclesiastical censures and punishments had been introduced by Olevianus, a refugee from Treves, and by several fugitives from the cruelties of the duke of Alva in the Low Countries, and had spread among the Protestants of the Palatinate. Erastus termed it 'febris excommunicatoria,' and thought it an unwise policy for the Protestants, surrounded by their enemies, to be zealous in cutting off members from their own communion. He examined the principles and Biblical authority of ecclesiastical censures, and carried on a controversy in which he was violently opposed by Dathenus, and more mildly by his friend Beza. This controversy would have probably died as a local dispute had it not been revived by Castelvetro, who had married the widow of Erastus, publishing from his papers the theses called *Explicatio Questionis gravissimæ de Excommunicatione*, which bears to have been written in 1568, and was first published in 1589. The general principle adopted by Erastus is, that ecclesiastical censures and other inflictions are not the proper method of punishing crimes, but that the administration of the penal law, and of the law for compelling performances of civil obligations, should rest with the temporal magistrate. He held that the proper ground on which a person could be prohibited from receiving the ordinances of a church—such as the sacra-

ment or communion of the Lord's Supper—was not vice or immorality, but a difference in theological opinion with the church from which he sought the privilege. The church was to decide who were its members, and thereby entitled to partake in its privileges, but was not entitled to take upon itself the punishment of offences by withholding these privileges, or by inflicting any other punishments on the ground of moral misconduct. Few authors so often referred to have been so little read as Erastus. The original theses are very rare. An English translation was published in 1669, and was re-edited by the Rev. Robert Lee in 1845. By some inscrutable exaggeration, it had become the popular view of the doctrines of Erastus that his leading principle was to maintain the authority of the civil magistrate over the conscience, and to subject all ecclesiastical bodies to his direction and control, both in their doctrine and their discipline. In the discussions in the Church of Scotland, of which the result was the secession of a large body of the clergy and people because it was found that the Church could not make a law to nullify the operation of lay patronage, those who maintained within the Church the principle that it had no such power were called Erastians as a term of reproach. As in all cases where such words as Socinian, Arian, Antiochian, etc., are used in polemical debates, the party rejected with disdain the name thus applied to it. But it is singular that in the course of this dispute no one seems to have thought of explaining that the controversy in which Erastus was engaged was about a totally different matter, and that only a few general and very vague remarks in his writings have given occasion for the supposition that he must have held the principle that all ecclesiastical authorities are subordinate to the civil. Erastus died at Basel on the 31st Dec.—Jan. 1, 1583."—*English Cyclopædia*: Wordsworth, *Eccles. Biography*; Hoefler, *Nov. Liog. Gêner.* xxxi, 174; Herzog, *Real Encyclop.* iv, 121.

Erdt, PAULINUS, a German Franciscan monk, professor of theology at the University of Freiburg, was born at Verloch in 1737. He displayed much zeal in opposing infidelity, both by his translations from English and French as well as his own works. The most important of his works is *Historiæ literariæ theologiæ rudimenta octodecim libris comprehensa, seu via ad historiam literariam theologiæ revelatæ, annotationibus literariis instructa* (Augsburg, 1783, 4 vols. 8vo). Erdt died Dec. 16, 1800.

Erebinthi, VILLAGE OF (*Ἐρεβινθῶν οἶκος*, house of chick-peas), a place on the line of Titus's wall of circumvallation around Jerusalem during the final siege (Josephus, *War*, v, 12, 2); apparently on the brow of the hill opposite Mount Zion, on the west. See JERUSALEM. Eusebius speaks of a village *Eremintha* (*Ἐρεβινθα*, *Onomast.* s. v.), situated, however, in the south of Judea, which Reland thinks (*Palæst.* p. 766) is the same as the *Eetherene* (*Βαζῆρεβιν*) mentioned by Sozomen (*Hist. Eccl.* ix, 27).

E'rech (Heb. *E'rek*, עֶרֶךְ, length; Sept. *Ἐρέχ*; Vulg. *Arach*), one of the cities which formed the beginning of Nimrod's kingdom in the plain of Shinar (Gen. x, 10). It is not said that he built these cities, but that he established his power over them; from which we may conclude that they previously existed. It was probably also the city of the ARCHEVITES, who were among those who were transplanted to Samaria by Assnapper (Ezra iv, 9). Until recently, the received opinion, following the authority of St. Ephrem, Jerome, and the Targumists, identified E'rech with Edessa or Callirhoë (now Urfa), a town in the north-west of Mesopotamia. This opinion is supported by Von Bollen (*Introd. to Gen.* p. 233), who connects the name Callirhoë with the Biblical E'rech through the Syrian form *Eurhok*, suggesting the Greek word *ἑρρόπος*. This identification is, however, untenable: Edessa was

probably built by Seleucus, and could not, therefore, have been in existence in Ezra's time (Ezra iv, 9), and the extent thus given to the land of Shinar presents a great objection. Erech must be sought in the neighborhood of Babylon. Gesenius (*Thesaur.* p. 151), following Bochart (*Phaleg*, iv, 16), rather seeks the name in the *Açacka* or *Aracha* of the old geographers, which was on the Tigris, upon the borders of Babylonia and Susiana (Ptolemy, vi, 3; Ammian. Marcell. xxxiii, 6, 26). This was probably the same city which Herodotus (i, 185; vi, 119) calls *Ardericca* (Ἀρδερικα), i. e. Great Erech. Rosenmüller happily conjectures (*Alterth.* I, ii, 25) that Erech probably lay nearer to Babylon than Aracca; and this has lately been confirmed by Col. Taylor, the British resident at Bagdad, who is disposed to find the site of the ancient Erech in the great mounds of primitive ruins, indifferently called *Irak*, *Irka*, *Werka*, and *Senkerah*, by the nomadic Arabs, and sometimes *El-Asajjah*, "the place of pebbles" (Bonomi, *Niveveh*, p. 40). These mounds, which are now surrounded by the almost perpetual marshes and inundations of the lower Euphrates, lie some miles east of that stream, about midway between the site of Babylon and its junction with the Tigris. This is doubtless the same as *Orchoë* (Ὀρχοῖν) 82 miles south, and 42 east of Babylon (Ptolemy, vi, 20, 7), the modern designations of the site bearing a considerable affinity to both the original names. It is likewise probable that the *Orcheni* (Ὀρχηνῶν) described by Strabo as an astronomical sect of the Chaldeans dwelling near Babylon (xxi, p. 739); in Ptolemy as a people of Arabia living near the Persian Gulf (v, 19, 2); and in Pliny as an agricultural population, who banked up the waters of the Euphrates, and compelled them to flow into the Tigris (vi, 27, 31), were really inhabitants of Orchoë and of the district surrounding it. This place appears to have been the necropolis of the Assyrian kings, the whole neighborhood being covered with mounds, and strewed with the remains of bricks and coffins. Some of the bricks bear a monogram of "the moon," and Col. Rawlinson surmises that the name Erech may be nothing more than a form of עֶרֶךְ, the Heb. name for that luminary (*Athenæum*, 1854, No. 1377); but the orthography does not sustain this conjecture. Some have thought that the name of Erech may be preserved in that of Irak (*Irak-Arabi*), which is given to the region inclosed by the two rivers in the lower part of their course. (See Chesney, *Euphrates Expedition*, i, 116, 117; Ainsworth, *Researches*, p. 178; Loftus, *Chaldea*, p. 160 sq., where a full description is given.) For another Erech, probably in Palestine, see ARCH.

**Eremita** (ἐρημιταί, *desert*), one who lives in a wilderness, or other solitude, for purposes of religious contemplation. The name was given in the ancient Church to those Christians who fled from the persecutors of Christianity into the wilderness, and there, isolated from all other men, gave themselves up to a life of rigid asceticism. Paul of Thebes is called the first eremite, and he soon found numerous followers. From the association of eremites the cœnobites arose, who, in turn, form the transition to the monastic orders, which became in the Church of Rome and in the Eastern Church the most common form of organized asceticism. The name eremite remained, however, in use both for those who, in opposition to monastic association, preferred the eremitic life, and for a number of orders or branches of orders (orders of eremites), which either retained some customs in the life of the original eremites, or which made special provisions that their members could live in entire isolation from each other, meeting only for the celebration of divine service. Thus the proper name of the Augustinians (q. v.) was the Ermites of St. Augustine, although they became, in fact, a regular order. There were also eremites belonging to the orders of Franciscans (q. v.), Camaldu-

lenses (q. v.), Cœlestines (q. v.), Hieronymites (q. v.), and Servites (q. v.). Among the other orders of the eremites were the Ermites of St. John the Baptist (see JOHN THE BAPTIST, EREMITES OF), and the Ermites of St. Paul.—Wetzer und Welte, *Kirchen-Lex.* iii, 501. See PAUL, ST., EREMITES OF. (A. J. S.)

**Erez.** See CEDAR.

**Erfurt**, a city in the Prussian province of Saxony, with, in 1864, 40,200 inhabitants. In 741, Erfurt became the seat of a bishop, but St. Adalar was the last as well as the first bishop, the see being united with that of Meutz. In 1378 the city received permission from the pope residing at Avignon (Clement VII) to establish a university, and the permission was in 1389 confirmed by the Roman pope Urban VI. In 1392 the university was opened, being the fifth university of Germany. At the beginning of the 16th century, Luther was for some time one of its professors. Subsequently its reputation dwindled down, and it was abolished in 1816.—Wetzer u. Welte, *Kirchen-Lexikon*, iii, 661. (A. J. S.)

**Erhard**, BISHOP. See HILDULF.

**E'ri** (Heb. *Eri'*, עֵרִי, *watchful*), the fifth son of the patriarch Gad (Gen. xlv, 16; Sept. Ἐριδίε, Vulg. *Ieri*), and progenitor (Num. xxvi, 16; Sept. Ἀδδῖ, Vulg. *Ier*) of the ERITES (q. v.). B. C. 1856.

**Eric IX** (according to some historians VIII), surnamed the Saint, a king of Sweden. He was the son of Jedward, a "good and rich yeoman," as he is called in an old Swedish chronicle, and of Cecilia, the sister of king Eric Arsal. Having become king of Sweden, his chief endeavor was the Christianization of Sweden. He conquered southern Finland, and compelled the inhabitants to adopt the Christian religion. He also united Norway with Sweden. In the war against the Danish prince Magnus, he fell in a battle near the town of Upsala, May 18, 1160.—Hoefer, *Nouv. Biogr. Génér.* xvi, 243. (A. J. S.)

**Erigena.** See SCOTUS ERIGENA.

**E'rite** (Heb. collect. with the art. *ha-Eri'*, עֵרִיִּים, Sept. [appar. everywhere with this name reading עֵרִי for עֵרִי] ὁ Ἀδδῖ, Vulg. *Ierite*, A. V. "the Erites"), a patronymic designation (Num. xxvi, 16) of the descendants of the Gadite ERI (q. v.).

**Erizatsop** (SARGIS or SERGIUS), a learned Armenian bishop, born towards the middle of the 13th century, at Eriza or Arzendjan, a city of Armenia. In 1286, James I, patriarch of Sis, called him to his court, and made him his secretary. In 1291 he was consecrated bishop of Arzendjan, and, a short time after, the king of the Armenians of Cilicia (Hayton or Hathoum II) made him almoner of his palace. In 1306 he was present at the national council which was held at Sis, capital of Cilicia, and died a short time after. He wrote a treatise on *The Hierarchy*, and several other works, which remain in MS.—Hoefer, *Nouv. Biogr. Génér.* xvi, 258.

**Erlangen**, a city in Bavaria, with a population of 10,900 inhabitants, mostly Protestant. It is the seat of one of three universities of Bavaria, with a Lutheran theological faculty. The University was founded in 1742 by the margrave Friedrich of Brandenburg-Baireuth for his residence, but in 1743 transferred to Erlangen. The University has in modern times been a chief seat of the Confessional party in the Lutheran Church. (A. J. S.)

**Ernesti**, JOHANN AUGUST, an eminent critic and scholar, was born Aug. 4, 1707, at Tennstadt, in Thuringia. He completed his academical studies at Wittenberg and Leipsic. In 1742 he became professor of ancient literature at Leipsic, and in 1758 doctor and professor of theology there. He held the two last-named professorships together till 1770, when he gave up the former to his nephew, August Wilhelm. He

died Sept. 11, 1781. He distinguished himself greatly by his philological and classical publications, and also by the new light which his theory of interpretation threw upon the sacred Scriptures. He adopted from Wetstein the *grammatico-historical* method of interpretation, and gave it general currency. Among the most important of his critical and philological writings are *Opuscula philologico-critica* (Amster. 1762, 8vo):—*Opuscula oratoria, orationes, prologus et oblogii* (Leyd. 1762 and 1767, 8vo):—*Archæologia litteraria* (Leips. 1768 and 1790, 8vo):—*Initia doctrinæ solidioris* (Leips. 1736, 7th ed. 1783, 8vo). The style of this work gave to Ernesti the name of the Cicero of Germany. His most important work in the field of theology is his *Institutio interpretis Novi Testamenti* (Leips. 1761, 8vo; 5th ed. 1809). This work first clearly set forth what is called the *grammatico-historical* method of interpretation. It was translated by Terrot, and published in the *Biblical Cabinet* (Edinb. 1843, 2 vols. 16mo); there is also an edition, with notes and appendix, by Moses Stuart (Andover, 1827, 12mo). Some valuable essays may be found in his *Opuscula theologica* (1792, 8vo). He rendered great service to theological literature by the publication of the *Neue theologische Bibliothek* (1760–1779, 14 vols.). His *Lectiones Academicæ in Epistolam ad Hebræos* was published by G. J. Dindorf in 1815 (Lips. 8vo). Ernesti's reputation as a classical scholar rests chiefly upon his excellent editions of Homer (Leips. 1759, 8vo), of Callimachus (Leyd. 1761, 2 vols. 8vo), of Polybius (Leips. 1763–64, 3 vols. 8vo), of Xenophon, Aristotle, and of Cicero (*ib.* 1776, 3d ed. 7 vols.), of Tacitus (*ib.* 1772, 2 vols. 8vo); also of Suetonius, Aristophanes, etc. His *Eulogy*, by Augustus William Ernesti, was published at Leipsic (1781, 8vo). See Hagenbach, *German Rationalism*, transl. by Gage, p. 76; Teller, *Ernesti's Verdienste um Theologie und Religion* (Leips. 1783); Van Voorst, *Oratio de J. A. Ernestio* (Leyd. 1804); Hoefcr, *Nouv. Biogr. Générale*, xvi, 296; Kahnis, *German Protestantism*, p. 119.

**Erōgē** (Ἐρωγή), a place "before the city" (πρὸ τῆς πόλεως) Jerusalem, according to Josephus (*Ant.* ix, 10, 4), where the mountain (Mt. of Olives) split asunder for a space of half a mile, filling the king's gardens with the detritus of the avalanche: an account which is evidently an embellishment in the prophetic commentary (Zech. xiv, 5) upon the earthquake (Amos i, 1) on the occasion of Uzziah's usurpation of the sacerdotal functions (2 Chron. xxvi, 16–21). Schwarz ingeniously explains (*Palest.* p. 263 note) the name *Erogē* as a Graecized transcription for Zechariah's expression *gorge of my mountains* (גֵּרְגֵּרֵי הַרֵּי מְנַחֵם, *gey-haray'*, Sept. φάραγγεῖ ὄρεων, *Vulg. vallis montium eorum*, A. V. "valley of the mountain"). For another identification, see EN-ROGEL.

**Erpen**, THOMAS VAN (Latin form ERPENIUS), a celebrated Orientalist, was born at Gorkum, Holland, September 7, 1584. He studied theology at Leyden, where, under the guidance of J. J. Scaliger, he also devoted himself particularly to the study of Oriental languages. He travelled in England, France, Italy, and Germany, everywhere enlarging his knowledge of Oriental literature: and in 1613 became professor of Oriental languages at Leyden. A second Hebrew chair in the university was founded expressly for him in 1619. "Soon after this he was appointed Oriental interpreter to the government, in which capacity he read and wrote replies to all official documents coming from the East. Such was the elegance and purity of his Arabic, as written at this time, that it is said to have excited the admiration of the emperor of Morocco. Towards the close of his life tempting offers of honors and distinction came pouring in upon him from all parts of Europe; but he was never prevailed upon to leave his native country, where, in the midst of an eminent career, he died November 13, 1624. Although the present standard of Oriental knowledge in Europe

is much in advance of that of Erpen's day, there is no doubt that it was through him principally that Eastern, especially Arabic, studies have become what they are. With hardly any better material than a few awkwardly printed Arabic alphabets, he contrived to write his famous grammar (*Grammatica Arabica, quinque libris methodice explicata*, Leyden, 1613; recent edition by Michaelis, Gott. 1771), which for 200 years, till the time of Silvestre de Sacy, enjoyed an undisputed supremacy; and there are many who think his *Rudimenta* unsurpassed, even at the present day, as a work for beginners. Among his other important works the best known is his *Proverbiaum Arabicorum Centuria Duæ* (Leyden, 1614)" (Chambers, s. v.); Hoefcr, *Nouv. Biogr. Générale*, xvi, 308; Herzog, *Real-Encyclop.* xix, 487.

**Error.** "Knowledge being to be had only of visible certain truth, error is not a fault of our knowledge, but a mistake of our judgment, giving ascent to that which is true (Locke, *Essay on Human Underst.* bk. iv, ch. xx). 'The true,' said Bossuet, after Augustine, 'is that which is, the false is that which is not.' To err is to fail of attaining to the true, which we do when we think that to be which is not, or think that not to be which is. Error is not in things themselves, but in the mind of him who errs, or judges not according to the truth. Our faculties, when employed within their proper sphere, are fitted to give us the knowledge of truth. We err by a wrong use of them. The causes of error are partly in objects of knowledge and partly in ourselves. As it is only the true and real which exists, it is only the true and real which can reveal itself. But it may not reveal itself fully, and man, mistaking a part for the whole, or partial evidence for complete evidence, falls into error. Hence it is that in all error there is some truth. To discover the relation which this partial truth bears on the whole truth is to discover the origin of the error. The causes in ourselves which lead to error arise from wrong views of our faculties and of the conditions under which they operate. Indolence, precipitation, passion, custom, authority, and education may also contribute to lead us into error (Bacon, *Novum Organum*, lib. i; Malebranche, *Recherche de la Vérité*; Descartes, *On Method*; Locke, *On Human Understand.* bk. vi, c. xx)."—Fleming, *Vocabulary of Philosophy*, p. 166–167.

**Erskine, Ebenezer**, an eminent and pious Scotch divine, founder of the "Secession Church." He was born in the prison of the Bass Rock, June 22, 1680, and educated at the University of Edinburgh. He acted for some time as tutor and chaplain in the family of the earl of Rothes, and became a licentiate in divinity in 1702. In 1703 he was chosen minister of Portmoak, in the shire of Kinross, and became a very popular preacher. He accepted a charge in Stirling in 1731. "Mr. Erskine's first difference with his colleagues of the Church of Scotland was in his support of the principles of 'the Marrow of Modern Divinity,' a subject of great contention during the early part of the 18th century. He was one of several clergymen who, in connection with this subject, were 'rebuked and admonished' by the General Assembly. The secession of the body, headed by Mr. Erskine, was occasioned by the operation of the act of queen Anne's reign restoring lay patronage in the Church of Scotland, and, though not in all respects technically the same, it was virtually on the same ground as the late secession of 'The Free Church.' The presbytery of Kinross, led by Erskine's brother Ralph, had refused to induct a presentee forced on an objecting congregation by the law of patronage. In 1732, the General Assembly enjoined the presbytery to receive the presentee. At the same time they passed an act of Assembly regulating inductions, which, as it tended to enforce the law of patronage, was offensive to Mr. Erskine, and he preached against it. After some discus-

sion, the General Assembly decided that he should be 'rebuked and admonished,' confirming a decision of the inferior ecclesiastical courts. Against this decision Mr. Erskine entered a 'protest,' in which he was joined by several of his brethren. He was afterwards suspended from his functions. The Assembly subsequently endeavored to smooth the way for his restoration, but he declined to take advantage of it, and he and his friends, including his brother Ralph, formally seceded in 1736. When the Secession was divided into the two sects of Burghers and anti-Burghers, Mr. Erskine and his brother were of the Burgher party. He died on the 22d of June, 1736. The Secession Church, reunited by the junction of the Burghers and anti-Burghers in 1820, remained a distinct body till 1847, when a union being effected with the Relief Synod (a body which arose from Mr. Gillespie's secession from the Established Church of Scotland in 1752), the aggregate body assumed the name of the United Presbyterian Church" (*English Cyclopædia*). Erskine bore a very high reputation as a scholar. His writings are collected in *The whole Works of Ebenezer Erskine*, consisting of sermons and discourses on the most important and interesting subjects (Lond. 1799, 3 vols. 8vo). See Hetherington, *Church of Scotland*, ii, 297 sq. See SECEDERS; SCOTLAND, CHURCH OF; UNITED PRESBYTERIAN CHURCH.

**Erskine, John, D.D.**, an eminent Scotch divine, was born in Edinburgh, June 2, 1721, and was educated at the University of Edinburgh. His father (author of the *Institutes of the Laws of Scotland*) wished him to devote himself to law, but finally yielded to his son's desire that he should study theology. At twenty he published an essay on *The Law of Nature sufficiently propagated to the Heathen World*, aiming to show that the ignorance and unbelief of the heathen is not due to want of evidence (Rom. i, 29). In 1743 he was licensed to preach by the presbytery of Dunblane, and in 1744 he became minister of Kirkintilloch. In 1748, Mr. Erskine, and other evangelical clergymen of the Established Church, invited Whitefield into their pulpits. An animated discussion took place, in which Mr. Erskine triumphantly defended himself. Such a course required courage at a time when the character and doctrines of Whitefield, as well as his open-air preaching, were looked upon by many with suspicion or dislike. In the following year Mr. Erskine published *An Essay intended to promote the more frequent dispensation of the Lord's Supper*. In 1753 he was translated to Culross, and in 1758 to New Greyfriars' church, Edinburgh. Here he prepared his *Theological Dissertations* (Lond. 1765, 12mo), including the two essays above mentioned: one on the *Covenant of Sinai*, one on *Saving Faith*, and one on the *Apostolic Churches*. He also edited a new edition of *Hervey's Theron and Aspasio*, with a preface against John Wesley, written with some bitterness, which gave rise to some letters between Erskine and Wesley, in which the latter appears to decided advantage (Wesley, *Works*, N. York ed. vi, 125 sq., 744). In 1769 he published anonymously a pamphlet under the title "*Shall I go to war with my American brethren?*" to expose the impolicy of such a contest. On the outbreak of hostilities he republished it with his name, following it up with another, entitled *Reflections on the Rise, Progress, and probable Consequences of the present Contentions with the Colonies*, in which he urged the duty of the mother country resorting to conciliatory measures. In 1776 he issued a third pamphlet, under the title *The Equity and Wisdom of the Government in the Measures that have occasioned the American Revolt tried by the sacred Oracles*. On this subject Erskine was one of the few clear-sighted men of the time in Great Britain. When nearly sixty he studied Dutch and German in order to read the Continental divines; the fruit of these studies appeared in *Sketches and Hints of Church History and theological Controversy, translated or abridged from foreign Writers* (Edin-

burgh, 1790-97, 2 vols. 12mo). He died January 19, 1803. After his death appeared his *Discourses* (Edinburgh, 1818, 2 vols. 12mo).—Jamieson, *Religious Biography*, p. 139; Jones, *Christian Biography*, p. 191; Wellwood, *Life of Erskine*.

**Erskine, Ralph**, brother of Ebenezer, was born at Moniklaw, Northumberland, 1685, and was educated at the University of Edinburgh. In 1711 he became minister at Dunfermline. In 1734 he joined his brother and others in their secession from the Church. See SECEDERS. He died 1752. He was a preacher of great popular abilities, devotional and zealous. His writings are collected under the title *Sermons and other practical Works*, consisting of above 150 sermons, besides his poetical pieces, to which is prefixed an account of the author's life and writings (Falkirk, 10 vols. 8vo, 1794-96).—Darling, *Cyclop. Bibliographica*, i, 1063.

**Erubim.** See TALMUD.

**Erythrian Sibyl.** See SIBYL.

**Esa'ias** (Rec. Text Ἡσαΐας, Lachm. with Codex B Ἡσαΐα; Vulg. *Isaias*, Cod. Amiat. *Esaias*), the Grecized form, constantly used in the N. T. (Matt. iii, 3; iv, 14; viii, 17; xii, 17; xiii, 14; xv, 7; Mark vii, 6; Luke iii, 4; iv, 17; John i, 23; xii, 38, 39, 41; Acts viii, 28, 30; xxviii, 25; Rom. ix, 27, 29; x, 16, 20; xv, 12) for ISAAH (q. v.). Comp. ESAÿ.

**E'sar-had'don** (Heb. *Esar'-Haddon'*, אַסַרְחַדְדִּן, perhaps akin with Pers. *Athro-dant*, *gift of fire*; Sept. Ἀσορῶν [in Ezra Ἀσαράδων] v. r. Ἀσαράδων, in Tob. i, 21, Σαορηθός; Josephus, *Ant.* x, 1, 5, Ἀσσαραχόδδω; the son and successor of Sennacherib (2 Kings xix, 37; Isa. xxxvii, 38). The date apparently assigned by these passages is B. C. 712, but, as he seems to be the *Asaradinus* (Ἀσαράδινος) of Ptolemy's *Civitas*, whose reign bears date from B. C. 680, we may either suppose that the death of Sennacherib occurred some years after his defeat before Jerusalem, or that an interregnum occurred before the accession of Esar-haddon. It has generally been thought that he was Sennacherib's eldest son, and this seems to have been the view of Polyhistor, who made Sennacherib place a son, *Asordanes*, on the throne of Babylon during his own lifetime (ap. Euseb. *Chron. Can.* i, 5). The contrary, however, appears by the inscriptions, which show the Babylonian viceroys—called *Asordanes* by Polyhistor, but *Aparanadius* (Assaranadius?) by Ptolemy—to have been a distinct person from Esar-haddon, who is called in cuneiform (q. v.) *Ashur-akki-iddina* (Rawlinson, *Herodotus*, i, 386 sq.). Thus nothing is really known of Esar-haddon until his succession (B. C. cir. 680; see Col. Rawlinson in the *Lond. Athenæum*, Aug. 22, 1865), which seems to have followed quietly and without difficulty on the murder of his father and the flight of his guilty brothers (2 Kings xix, 37; Isa. xxxvii, 38). It may, perhaps, be concluded from this that he was *at the death of his father* the eldest son, Assaranadius, the Babylonian viceroys, having died previously. It is impossible to fix the length of Esar-haddon's reign, or the order of the events which occurred in it. Little is known to us of his history but from his own records, and they have not come down to us in the shape of annals, but only in the form of a general summary (see them translated by H. F. Talbot, in the *Jour. of Sac. Lit.* April, 1859, p. 68-79). That he reigned thirteen years at Babylon is certain from the Canon of Ptolemy, and he cannot have reigned a shorter time in Assyria. He may, however, have reigned longer, for it is not improbable that after a while he felt sufficiently secure of the affections of the Babylonians to re-establish the old system of viceregal government in their country. Saosduchinus may have been set up as ruler of Babylon by his authority in B. C. 667, and he may have withdrawn to Nineveh, and continued to reign there for some time

longer. His many expeditions and his great works seem to indicate, if not even to require, a reign of some considerable duration. It has been conjectured that he died about B. C. 660, after occupying the throne for twenty years. He appears to have been succeeded by his son Asshur-bani-pal, or Sardanapalus II, the prince for whom he had built a palace in his own lifetime. No farther mention is made of this monarch in Scripture but that he settled certain colonists in Samaria (Ezra iv, 2). See ASSAPPER.

Esar-haddon appears by his monuments to have been one of the most powerful, if not the most powerful of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. Towards the east he engaged in wars with Median tribes "of which his fathers had never heard the name;" towards the west he extended his influence over Cilicia and Cyprus; towards the south he claimed authority over Egypt and Ethiopia. In consequence of the disaffection of Babylon, and its frequent revolts from former Assyrian kings, Esar-haddon, having subdued the sons of Merodach-Baladan who headed the national party, introduced the new policy of substituting for the former government by viceroys a direct dependence upon the Assyrian crown. He did not reduce Babylonia to a province, or attempt its actual absorption into the empire, but united it to his kingdom in the way that Hungary was, until 1848, united to Austria, by holding both crowns himself, and residing now at one and now at the other capital. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. His Babylonian reign lasted thirteen years, from B. C. 680 to B. C. 667, and it was undoubtedly within this space of time that Manasseh, king of Judah, having been seized by his captains at Jerusalem on a charge of rebellion, was brought before the Assyrian monarch at Babylon (2 Chron. xxxiii, 11), and detained for a time as prisoner there. This must therefore have been Esar-haddon, who, persuaded of his innocence, or excusing his guilt, eventually restored him to his throne (comp. ver. 13), thus giving a proof of clemency not very usual in an Oriental monarch. It seems to have been in a similar spirit that Esar-haddon, according to the inscriptions, gave a territory upon the Persian Gulf to a son of Merodach-Baladan, who submitted to his authority and became a refugee at his court. As a builder of great works Esar-haddon is particularly distinguished. Besides his palace at Babylon, which has already been mentioned, he built at least three others in different parts of his dominions, either for himself or his son, while in a single inscription he mentions the erection by his hands of no fewer than thirty temples in Assyria and Mesopotamia. His works appear to have possessed a peculiar magnificence. He describes his temples as "shining with silver and gold," and boasts of his Nineveh palace that it was "a building such as the kings his fathers who went before him had never made." The south-west palace at Nimrud is the best preserved of his constructions. This building, which was excavated by Mr. Layard, is remarkable for the peculiarity of its plan as well as for the scale on which it is constructed. It corresponds in its general design almost exactly with the palace of Solomon (1 Kings vii, 1-12), but is of larger dimensions, the great hall being 220 feet long by 100 broad (Layard's *Nin. and Bab.* p. 558, Harpers' edit.), and the porch or antechamber 160 feet by 60. It had the usual adornment of winged bulls, colossal sphinxes, and sculptured slabs, but has furnished less to our collections than many inferior buildings, from the circumstance that it had originally been destroyed by fire, by which the stones and alabaster were split and calcined. This is the more to be regretted as there is reason to believe that Phœnician and Greek artists

took part in the ornamentation.—Smith, s. v. See ASSYRIA.

**E'sau** (Heb. *Esav'*, עֵשָׂו, *hair* [see Gen. xxv, 25; his surname EDOM was given him from the red pottage, Gen. xxv, 30]; Sept. and N. T. Ἡσαῦ), the eldest son of "Isaac, Abraham's son" (Gen. xxv, 19) by Rebekah, "the daughter of Bethuel the Syrian, of Padanaram, the sister to Laban the Syrian." The marriage remaining for some time (about 19 years; comp. xxv, 20, 26) unproductive, Isaac entreated Jehovah, and Rebekah became pregnant. Led by peculiar feelings "to inquire of Jehovah," she was informed that she should give birth to twins, whose fate would be as diverse as their character, and, what in those days was stranger still, that the elder should serve the younger. On occasion of her delivery, the child that was born first was "red, all over like a hairy garment; and they called his name Esau." Immediately afterwards Jacob was born. B. C. 2004. This was not the only remarkable circumstance connected with the birth of the infant. Even in the womb the twin brothers struggled together (xxv, 22). Esau was the first-born; but, as he was issuing into life, Jacob's hand grasped his heel. The bitter enmity of two brothers, and the increasing strife of two great nations, were thus foreshadowed (xxv, 23, 26). From the special attention drawn to his hairy appearance, one would suppose that the name Esau (עֵשָׂו), or Esav, was intended to give expression to that quality. So have many learned men in recent as well as former times held, though they are obliged to resort to the Arabic for the etymological explanation; a word very similar in Arabic, signifying *hairy*. The older Hebrew commentators, however, derived it from the verb עָשָׂו, *asav'*, to *make*, and explained the word as signifying "made," "complete," "full-grown"—viewing the hair as an indication of premature manly vigor. But the Jews of the present day seem more disposed to fall in with the other derivation (for example, Raphall in loco). The unusual covering of hair, which not only distinguished Esau as a child, but kept pace with his growth, and in mature life gave his skin a kind of goat-like appearance (Gen. xxvii, 16), was undoubtedly meant to be indicative of the man; it was a natural sign, coeval with his very birth, by which his parents might descry the future man—as one in whom the animal should greatly preponderate over the moral and spiritual qualities of nature—a character of rough, self-willed, and untamed energy. From the word designating his hairy aspect, *sear* (עֵשָׂו), it is not improbable that the mountain-range which became the possession of his descendants was called Mount *Seir*, though it is also possible that the rough, wooded appearance of the mountain itself may have been the occasion of the name. See SEIR.

In process of time the different natural endowments of the two boys began to display their effects in dissimilar aptitudes and pursuits. While Jacob was led by his less robust make and quiet disposition to fulfil the duties of a shepherd's life, and pass his days in and around his tent, Esau was impelled, by the ardent and lofty spirit which agitated his bosom, to seek in the toils, adventures, and perils of the chase his occupation and sustenance; and, as is generally the case in natures like his, he gained high repute by his skill and daring, which allied him to the martial exercises of the Canaanites (xxv, 27). He was, in fact, a thorough *Bedawy*, a "son of the desert" (so we may translate עֵשָׂו בֶּדָוָה, *man of the field*), who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his wilful, vagrant boy; and his keen relish for savory food being gratified by Esau's venison, he liked him all the better for his skill in hunting (xxv, 28). A

hunter's life is of necessity one of uncertainty as well as hardship; days pass in which the greatest vigilance and the most strenuous exertions may fail even to find, much less capture game (see Thomson, *Land and Book*, ii, 399). The hunting tribes of North America often find themselves, after severe and long-continued labor and watching, unprovided with food, and necessitated to a length of abstinence which would be fatal to persons bred in towns or living by the ordinary pursuits of the field. Esau had on one occasion experienced such a disappointment, and, wearied with his unproductive efforts, exhausted for want of sustenance, and despairing of capturing any prey, he was fain to turn his steps to his father's house for succor in his extremity. On reaching home he found his brother enjoying a carefully prepared dish of pottage: attracted by the odor of which, he besought Jacob to allow him to share in the meal. His brother saw the exigency in which Esau was, and determined not to let it pass unimproved. Accordingly, he put a price on the required food. Esau was the elder, and had, in consequence, immunities and privileges which were of high value. The surrender of these to himself Jacob made the condition of his complying with Esau's petition. Urged by the cravings of hunger, alarmed even by the fear of starvation, Esau sold his birthright to his younger brother, confirming the contract by the sanction of an oath. Jacob, having thus got his price, supplied the famishing Esau with needful refreshments. Jacob took advantage of his brother's distress to rob him of that which was dear as life itself to an Eastern patriarch. The birthright not only gave him the headship of the tribe, both spiritual and temporal, and the possession of the great bulk of the family property, but it carried with it the *covenant blessing* (Gen. xxvii, 23, 29, 36; Heb. xii, 16, 17). Yet, though Esau, under the pressure of temporary suffering, despised his birthright by selling it for a mess of pottage (Gen. xxv, 34), he afterwards attempted to secure that which he had deliberately sold (Gen. xxvii, 4, 34, 38; Heb. xii, 17). It is evident the whole transaction was public, for it resulted in a new name being given to Esau. He said to Jacob, "Feed me with that same *red* (עֵדֶם); therefore was his name called *Edom*" (עֲדָם; Gen. xxv, 30). It is worthy of note, however, that this name is seldom applied to Esau himself, though almost universally given to the country he settled in, and to his posterity. See *EDOM*. The name "Children of Esau" is in a few cases applied to the Edomites (Deut. ii, 4; Jer. xlix, 8; Obad. 18), but it is rather a poetical expression.

Arrived now at forty years of age, Esau married two wives in close succession. B.C. cir. 1963. Some unhappy feelings appear to have previously existed in the family; for while Esau was a favorite with his father, in consequence, it appears, of the presents of venison which the youth gave him, Jacob was regarded with special affection by the mother. These partialities, and their natural consequences in unamiable feelings, were increased and exaggerated by Esau's marriage. His wives were both Canaanites, and, on account of their origin, were unacceptable to Isaac and Rebekah. The latter was especially grieved. "I am weary," she said (Gen. xxvii, 46), "of my life, because of the daughters of Heth." Esau thus became alienated from the parental home. Even his father's preference for him may have been injuriously affected. The way was in some measure smoothed for the transference of the coveted birthright to the younger son.—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

There is much apparent confusion in the accounts of Esau's wives and their relations and posterity, as given in Gen. xxvi, 34; xxviii, 9; xxxvi, 2-5, 10-30, 40-43; 1 Chron. i, 35-42, 51-54, which may be adjusted by the following combination: (1.) His first wife was Adah, the daughter of Elon the Hittite (Gen. xxxvi, 2), or an aboriginal Canaanite. See *HITTITE*.

In Gen. xxvi, 34, she is incorrectly called Bashemath, apparently by confusion with the name of his third wife, although her parentage is correctly given. Her only child was Eliphaz, who was therefore Esau's first-born (Gen. xxxvi, 10, 15; 1 Chron. i, 35). (2.) Esau's second wife was Aholibamah, the daughter of Anah, as all the accounts agree except that in Gen. xxvi, 34, where, by some error or variation of names, she is called Judith, the daughter of Beeri the Hittite. This Anah, in Gen. xxxvi, 2, 14, is called the daughter of Zibeon, but from ver. 20, 24, 25, and 1 Chron. i, 38, it is evident that he was the son of Zibeon, his brother being Ajah, and his only children a son Dishon and this daughter Aholibamah. We may also remark that this Anah and this Dishon had each an uncle of the same name respectively (Gen. xxxvi, 20, 21), and the name Aholibamah belonged subsequently to a chieftain of an Edomitish tribe (ver. 41). Zibeon was a son of Seir, the original settler of the mountain which went by his name. His descendants were properly called Horites (Gen. xxxvi, 20, 29), but in ver. 20 he is called a Hivite, a term frequently interchangeable for heathenish tribes, as Hittite, in chap. xxvi, 34, is twice used for the same purpose. This connection of Esau with the original inhabitants of Idumæa will explain his subsequent removal to that region, and the eventual supremacy of his descendants there. His children by Aholibamah were Jeush, Jaalam, and Korah. (3.) Esau's third wife, taken, not like the former, from foreign families, but from kindred stock, was Bashemath (otherwise called Mahalath), sister of Nebajoth and daughter of Ishmael, who bore him Reuel (Gen. xxxvi, 3, 4; xxviii, 9). This elucidation substantially agrees with that proposed by Prof. Turner (*Companion to Genesis*, p. 323), after Hengstenberg.—These sons of Esau rose to the importance of sheikhs ("dukes") in their respective families (those by Aholibamah being especially so styled, Gen. xxxvi, 18); and this was naturally more emphatically the case with his grandsons (Gen. xxxvi, 15, 16, where the name Korah is an interpolation, and Amalek is reckoned along with the legitimate children of Eliphaz; comp. the parallel account in 1 Chron. i, 36, where the name Timna is in like manner interpolated), who were probably cotemporaneous with the native sheikhs mentioned in ver. 29, 30, or but little later—the gradual superiority of the Esauites over the Horites appearing from the fact that the heirs of the latter (ver. 22-28) are not named with this distinction (comp. ver. 20, 21). This double line of chieftains of the respective tribes appears to have continued for a long time; for in the subsequent list of native kings (ver. 31-39) and heads of the Edomitish part of the inhabitants (ver. 40, 43), coming down in parallel lines to about the time of the Exode (but from what point dated is uncertain), each appears to have regularly succeeded his predecessor, not by hereditary right indeed, but by that species of common consent, founded upon acknowledged pre-eminence, which is to this day recognised in the election of Arab emirs. See *EDOMITE*.

The time for the fulfilment of the compact between the brothers has at length arrived. Isaac is "sick unto death." His appetite, as well as his health, having failed, is only to be gratified by provocatives. He desires some savory venison, and gives the requisite instructions to Esau, who accordingly proceeds in quest of it. On this Rebekah begins to feel that the critical time has come. If the hated Hittites are not to enter with her less favored son into possession of the family property, the sale of the birthright (the original idea of which she may have suggested to the "plain man," her son Jacob) must now in some way be confirmed and consummated. One essential particular remained—the father's blessing. If this should be given to Esau, all hope was gone; for this, like our modern wills, would hand the inheritance and the accompanying headship of the tribe to Esau and his wives.

Isaac, however, had lost his sight—indeed, all his senses were dull and feeble. It was therefore not very difficult to pass off Jacob upon him as Esau. Rebekah takes her measures, and, notwithstanding Jacob's fears, succeeds. Isaac, indeed, is not without suspicion, but a falsehood comes to aid Jacob in his otherwise discreditable personation of Esau. The blessing is pronounced, and thus the coveted property and ascendancy are secured. The affectionate endearments which pass between the deceiver and the abused old blind father stand in painful contrast with the base trickery by which the mother and the son accomplished their end. This episode in the history of Esau and Jacob is still more painful than the former, as it fully brings out those bitter family rivalries and divisions which were all but universal in ancient times, and which are still a disgrace to Eastern society. Esau, however, returns from the field, approaches his decrepit and sightless father, declaring who he is. "And Isaac trembled very exceedingly, and said, Who? where is he that hath taken venison and brought it me, and I have eaten of all before thou camest, and have blessed him? yea, and he shall be blessed." On this Esau becomes agitated, and entreats a blessing for himself—"Bless me, even me also, O my father." Urging this entreaty again and again, even with tears, Isaac at length said to him, "Behold, thy dwelling shall be the fatness of the earth, and of the dew of heaven from above; and by thy sword shalt thou live, and shalt serve thy brother; and it shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck" (Gen. xxvii). Thus, deprived forever of his birthright, in virtue of the irrevocable blessing, Esau but too naturally conceived and entertained a hatred of Jacob, and he vowed vengeance. But, fearing his aged father's patriarchal authority, he secretly congratulated himself: "The days of mourning for my father are at hand, then will I slay my brother Jacob" (Gen. xxvii). Thus he imagined that by one bloody deed he would regain all that had been taken from him by artifice. But he knew not a mother's watchful care. Not a sinister glance of his eyes, not a hasty expression of his tongue, escaped Rebekah. Words to the above effect which Esau let drop were repeated to his mother, who thereupon felt that the life of her darling son, whose gentle nature and domestic habits had won her heart's affections, was now in imminent peril; and she prevailed on her younger son to flee to his uncle Laban, who lived in Haran, there to remain until time, with its usual effect, should have mitigated Esau's wrath. B. C. 1927. The sins of both mother and child were visited upon them by a long and painful separation, and all the attendant anxieties and dangers. By a characteristic piece of domestic policy, Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure—"And Rebekah said to Isaac, I am weary of my life because of the daughters of Heth; if Jacob take a wife such as these, what good shall my life do me?" Her object was attained at once. The blessing was renewed to Jacob, and he received his father's commands to go to Padan-aram (Gen. xxvii, 46; xxviii, 1-5).

When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii, 8, 9). This marriage appears to have brought him into connection with the Ishmaelitic tribes beyond the valley of Arabah. He soon afterwards established himself in Mount Seir; still retaining, however, some interest in his father's property in Southern Palestine. It is probable that his own habits, and the idolatrous practices of his wives and rising family, continued to excite and even increase the anger of his parents; and that he, consequently, considered it more

prudent to remove his household to a distance. He was residing in Mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the impressions of his brother's early offences seem to have been almost completely effaced. Jacob, however, feared lest his elder brother might intercept him on his way, to take revenge for former injuries. He accordingly sent messengers to Esau, in order, if possible, to disarm his wrath. Esau appears to have announced in reply that he would proceed to meet his returning brother. When, therefore, Jacob was informed that Esau was on his way for this purpose with a band of four hundred men, he was greatly distressed, in fear of that hostility which his conscience told him he had done something to deserve. What, then, must have been his surprise when he saw Esau running with extended arms to greet and embrace him? and Esau "fell on his neck, and kissed him, and they wept." Jacob had prepared a present for Esau, hoping thus to conciliate his favor; but, with the generous ardor which characterizes, and somewhat of the disinterestedness which adorns, natures like his, Esau at first courteously refused the gift: "I have enough, my brother; keep that thou hast unto thyself" (Gen. xxxiii). But doubts and fears still lurked in the mind of Jacob, and betrayed him into something of his old duplicity; for, while he promises to go to Seir, he carefully declines his brother's escort, and immediately after his departure turns westward across the Jordan (Gen. xxxii, 7, 8, 11; xxxiii, 4, 12, 17). B. C. 1907. The whole of this encounter serves to show that, if Jacob had acquired riches, Esau had gained power and influence as well as property; and the homage which is paid to him indirectly and by implication on the part of Jacob, and directly, and in the most marked and respectful manner, by the females and children of Jacob's family, leads to the supposition that he had made himself supreme in the surrounding country of Idumæa. See EDOM.

It does not appear that the brothers again met until the death of their father, about twenty years afterwards. Mutual interests and mutual fear seem to have constrained them to act honestly, and even generously towards each other at this solemn interview. They united in laying Isaac's body in the cave of Machpelah. B. C. 1888. (See Rosé, *Pietas Esavi in parentibus*, Bautzen, 1788.) Then "Esau took all his cattle, and all his substance, which he had got in the land of Canaan"—such, doubtless, as his father, with Jacob's consent, had assigned to him—"and went into the country from the face of his brother Jacob" (xxxv, 29; xxxvi, 6). He now saw clearly that the covenant blessing was Jacob's, that God had inalienably allotted the land of Canaan to Jacob's posterity, and that it would be folly to strive against the divine will. He knew also that as Canaan was given to Jacob, Mount Seir was given to himself (comp. xxvii, 39; xxxii, 3; and Deut. ii, 5), and he was therefore desirous, with his increased wealth and power, to enter into full possession of his country, and drive out its old inhabitants (Deut. ii, 12). Another circumstance may have influenced him in leaving Canaan. He "lived by his sword" (Gen. xxvii, 40), and he felt that the rocky fastnesses of Edom would be a safer and more suitable abode for such as by their habits provoked the hostilities of neighboring tribes than the open plains of Southern Palestine. Esau is once more presented to us (Gen. xxxvi) in a genealogical table, in which a long line of illustrious descendants is referred to "Esau, the father of the Edomites" (Gen. xxxvi, 43). The country to which Esau, with his immense family and flocks, retired, was the tract of Mount Seir, from which they gradually dispossessed the thinly scattered population that preceded them in its occupancy, and which they continued to hold for many generations. It was a region entirely suited to the nomadic and roving character of the race. But in regard to the rela-

relationship between them and the seed of Israel, the remote descendants of Esau proved less pliant or generous than their progenitor; for from the time that Israel left the land of Egypt, when the two families again came into contact, the posterity of Esau seemed to remember only the old quarrel between the respective heads of the races, and to forget the brotherly reconciliation. A spirit of keenest rivalry and spite characterized their procedure towards Israel; through many a bloody conflict they strove to regain the ascendancy which the decree of heaven had destined in the other direction; and in the times of Israel's backsliding and weakness they showed themselves ever ready, according to the prophetic word of Isaac, "to break his yoke from off their neck," and to drive the evil to the uttermost. But it was a fruitless struggle; the purpose of Heaven stood fast; the dominion remained with the house of Jacob; and in the course of the Maccabean wars the children of Esau finally lost their independent existence, and became substantially merged in the house of Israel. The decree of Heaven, as we have said, had so fixed it; but that decree did not realize itself arbitrarily; the preference for Israel and his seed was no senseless favoritism; from the first the qualities were there which inevitably carried along with them the superiority in might and blessing; while, on the other hand, in Esau's carnalism, sensuality, godlessness, the destiny of his race was already indicated. See IDUMEA.

If the historical outline now given is supported by the scriptural narrative, the character of Esau has not ordinarily received justice at the hands of theologians. The injurious impression against him may be traced back to a very ancient period. The Targum of Jonathan (at Gen. xxv, 34) sanctioned and spread, if it did not originate, the misjudgment by unwarrantable additions to the account given in Genesis. The reason, it states, why Esau did not at once slay his brother was lest, as happened in the case of Cain and Abel, another man-child might be born, and thus he should still be deprived of his inheritance; he therefore resolved to wait till the death of Isaac, when the murder of Jacob would leave him in safe and undisputed possession. Representations made in the Talmud are of a similar tendency (Otho, *Lex. Rabb.* p. 207; Wetstein, *N. T.* ii, 437; comp. Philo, *Opp.* i, 551; ii, 441, 675). The Arabians likewise commemorate him (Hottinger, *Hist. Orient.* p. 53 sq.). Cedrenius gives (*Hist. Eccl.* p. 31) the story of his having been killed by an arrow discharged by Jacob. The fathers of the Church, particularly Augustine, regard Esau as the representative of the damned, while they admire Jacob as that of the elect (see Stempel, *De salute Esavi*, Jena, 1678), basing these views upon an erroneous interpretation of such passages as Rom. xii, 16; ix, 13. (Shuckford's *Connections*, ii, 174; Clarke's *Comment.* on Gen. xxvii, xxv; Kitto's *Daily Illustr.* in loc.; Niemeyer, *Charakt.* ii, 153 sq.; Baumgarten, *Allg. Welthist.* ii, 50 sq.; Bauer, *Hebr. Gesch.* i, 147; Hoelheimer, *Im Orient*, 1841, No. 35; Sherlock, *Works*, v; Dupin, *Nouv. Bibl.* iv; Evans, *Script. Biog.* i; Roberts, *Sermons*, p. 134; Puckle, *Sermons*, i, 96; Simeon, *Works*, i, 211; Alcock, *Apology for Esau*, Plymouth, 1791; Townsend, *Sermons* [1849], p. 253; Goodwin, *Parish Sermons*, ii, 1.) See JACOB.

ES'AU (Ἡσαῦ, Vulg. *Sed*), given (1 Esd. v, 29) as the name of the head of one of the families of "Temple servants" or Nethinim that returned from the captivity; in place of the ΖΗΛΑ (q. v.) of the Hebrew text (Ezra ii, 43).

ES'say (Ἡσαίας, Vulg. *Isaia*, *Isaïas*), the form in which the name of the prophet ISAIAH (q. v.) constantly appears in the A. V. of the Apocrypha (Eccles. xviii, 20, 22; 2 Esd. ii, 18). See ESAIAS.

ES'chatology (a discussion of the *last things*, ἔσχατα), a branch of theology which treats of the doc-

trines concerning death, the condition of man after death, the end of this world period, resurrection, final judgment, and the final destiny of the good and the wicked. We treat it here,

I. In its *Biblical aspects*, especially as to the doctrine of the Bible concerning the end of the world, denoted by the use of the phrase "last days," which is applied in the O. T. to the consummation of the Jewish economy by the introduction of the Messianic (Isa. ii, 2; Mic. iv, 1; comp. Acts iii, 1; Heb. i, 2), and in the N. T. is extended to the still expected developments of the divine purposes respecting the Church (2 Tim. iii, 1; 2 Pet. iii, 3). See LAST DAY.

1. *The Maccabean Age.*—In the O.-T. prophets the return from Babylon is often made a type of the incoming of the more glorious dispensation of the Gospel. This is the first, more obvious, and most literal eschatological symbol, and much of the language (especially of Isaiah) bearing upon it has therefore a double sense (q. v.) or twofold application. See RESTORATION (OF THE JEWS).

2. *The Chiliastic Period.*—This is the Christian, as the preceding was the Jewish view of the consummation of the existing divine economy, *so far as relates to the administration of this world.* It will be treated under MILLENNIUM.

3. *The final Denouement of all terrestrial Affairs.*—This whole branch of the subject is particularly exhibited in our Lord's discourse to his disciples upon the Mount of Olives (Matt. xxiv, xxv), in which the two scenes of the retribution impending over Jerusalem, and the final judgment, are intimately associated together, in accordance with that almost constant practice in the Hebrew prophets by which one event is made the type and illustration of another much farther in the future. See HYPONOTA. This is emphatically exemplified in the vaticinations of ISAIAH (q. v.), who perpetually refers to the coming glory of Christ under the figure of the nearer deliverance from Babylon, both these *denouements* being projected upon the same plane of prophecy, without any note of the interval of time between; likewise in the visions of John in the Revelation (q. v.), where the *dramatis personæ* are generic representations of certain principles constantly reappearing in the history of the Church rather than confined to particular characters at one time only. Such often-repeated developments of divine providence are the "coming of the Son of Man" and its attendant phenomena, in the sketches or rather glimpses afforded us by the Scriptures into the future. See SIGN (OF THE SON OF MAN).

As to the passage in Matthew, which forms the leading proof-text of eschatological treatises, the following expository hints will serve to clear up much of the obscurity and ambiguity which has been thrown around the text by the confused manner in which many interpreters have treated its predictions (see Strong's *Harmony and Exposition of the Gospels*, § 123; Stier, *Words of Jesus*, in loc.; Whedon, *Commentary*, in loc.; Nast, *Commentary*, in loc.).

(1.) The question of the apostles (Matt. xxiv, 3) relates to two distinct subjects, namely, the "coming of the 'Son of man' to do these things," and the "end of the world;" these two topics, therefore, are discussed by Christ in his reply. (More strictly, there are two questions concerning the *first* event, namely, "when," and "the sign." Mark and Luke evidently mean to confine their reports of this discourse to this former catastrophe, and therefore they do not mention the second inquiry as to the "end of the world" at all.) Yet, as the questioners apparently supposed that these two events would be simultaneous, or at least intimately connected (as the constant tenor of all former prophecies had naturally made them think), the answer also uses very similar language in treating them both, a style which their analogous nature peculiarly required. Still, the Great Teacher could not fail to give them

true criteria by which to separate these two catastrophes, and for these we are to look in his language. That all the events predicted in Matthew's account as far as xxiv, 34 are connected with the former of these themes, namely, the demolition of Jerusalem and abolition of the Jewish polity, is certain from the declaration at that verse, that they should ALL occur within the then living generation; and the following verses are so intimately connected with these, both by continuity of idea and notes of simultaneousness, that a disruption anywhere before ch. xxv, 31 would be very harsh and arbitrary. At this point, however, we discover clear intimations of a transition (*easy* indeed, as the typical correspondence of the two catastrophes would lead us to expect, yet a real and marked one) to the second subject, the general judgment. The change is introduced by the notes of time, "*But* [unwarrantably omitted in our translation] *when . . . then,*" and by the loftier tone of the style, besides the distinctive mention of "*all nations*" as the subjects of that adjudication (ver. 32). In the latter portion of Christ's discourse alone is employed the briefer and more general mode of prediction usual with the prophets in prefiguring far-distant events, and here only is the language *all exclusively* applicable to the final judgment. The expressions deemed by some to point out such a transition at other points than those assumed above (xxiv, 35, and especially xxv, 31) will be noticed presently; it is sufficient here to say in general that, as the passages embraced within the medial portion (xxiv, 27-xxv, 30) are designed to be a link of connection between two judicial events so correlative in character, they naturally assume a style that might be applied to either, borrowing some expressions in describing the former which otherwise would belong exclusively to the latter. See a similarly blended style in describing the former of these two events in 2 Thess. i, 7-9; comp. with ii, 2; and comp. Matt. xvi, 27, 28.

Many place at the end of Matt. xxiv, 28 the transition to the final judgment; but it is difficult to extend the intimations of consecutiveness that follow ("[But] immediately after," "But in those days") over such a chasm. It is true, the description ensuing in verses 29-31 is unusually allegorical for a prose discourse, but this is explained by the fact that it is evidently borrowed almost wholly from familiar poetic predictions of similar events. Many of these particulars, moreover, may refer, partially at least, in a literal sense, to the concurrent natural phenomena intimated in Luke xxi, 11; and in their utmost stretch of meaning they also *hint* at the collapse of nature in the general judgment. The objection of anachronism in this application of the "tribulation" of verse 29 as a *subsequent* event, is obviated by considering that this term here refers to the incipient stages of the "tribulation" of verse 21, where the previous context shows that the distress of the *first* siege and preliminary campaign are specially intended; Luke (verse 24) there gives the *personal* incidents of the catastrophe itself as succeeding, with an allusion to the long desolation of the land that should follow; so that Christ here resumes the thread of prophetic history (which had been somewhat interrupted by the caution against the impostors who were so rife in the brief interim of the suspension of actual hostilities) by returning to the *national* consequences of the second and decisive onset of the Romans. The assignment of these events contained in the ensuing verses, as to take place "*after* the tribulation" (presumed to be that of the acme of the Jewish struggle), is the strongest argument of those who apply this whole following passage to the final judgment. But they overlook the equally explicit limit "*immediately after,*" and, moreover, fail to discriminate the precise date indicated by "*that tribulation.*" This latter is made (in verse 21 of Matthew) simultaneous with the flight of the Christians, which could not have been practicable in the extremity of the siege, but is

directed (in verse 15) to be made on the approach of the besiegers. The consummation intimated here, therefore, refers to the *close* of the siege (i. e. the *sack* itself), and the preceding rigors are those of its *progress*. It ought, moreover, to be considered that the fall of the capital was but the precursor of the extinction of the Jewish nationality (here typified by celestial prodigies); the utter subjugation of the country at large of course following that event. Another interpretation is, that the following passage refers to a second overthrow (the final extermination of the Jewish metropolis under the emperor Adrian in a subsequent war), as distinguished from the first under Titus; this is ingenious, but would hardly justify the strong language here employed, and would, moreover, require the limit "*immediately*" to be extended half a century farther, when the living "generation" must have entirely passed away. Nor at this later event could the "redemption" of the Christians properly be said to "draw nigh" (verse 28 of Luke), the Jews having then long ceased to have any considerable power to persecute; compare the deliverance prophetically celebrated in Rev. xi, especially verses 8, 13.

(2.) In the highly-wrought description of Matt. xxiv, 29; Luke xxi, 25, 26 (which constitutes the transition-point or intermediate part of our Saviour's discourse), the political convulsions during the acme of the Jewish struggle with the Romans are compared with a contest among the elements, in which the sun, moon, stars, earth, and waves join in one horrible war to aggravate human misery and desperation (comp. Judg. v, 20); the individual terms are therefore to be understood as merely heightening the general idea. To those who suppose the final judgment referred to in the expressions of this and the following verses, it may here be remarked that these symbolical phenomena of nature are all said to take place "*immediately after* [Mark, 'in'] . . . those days," while the subsequent "*coming*" is made simultaneous by the word "*then*" used by all the evangelists; and all these events are specially noted as signals of a "*deliverance*" (Luke, verse 28), evidently the same with that of the Christians from Jerusalem's ruin and power to oppress before alluded to; the whole being limited by all the evangelists in distinct terms to the present generation. In order to understand many of the phrases of this representation (as especially those of verses 30, 31), the *induction* (so to speak) of a style of language usually appropriated to the second catastrophe (as intimated at the close of paragraph 1 above), must be borne in mind.

The first element of this "*tribulation*" (that affecting the celestial luminaries, a statement common to all the evangelists here) is cited from Isa. xiii, 10, a passage spoken with reference to the fall of Babylon; comp. Joel iii, 15, and many similar passages, in which the prophets represent great national disasters by celestial phenomena of an astounding character. All the following quotations, as they appear in the evangelists, are cited by our Saviour with considerable latitude and irregularity of order, as his object was merely to afford brief specimens of this style; but the general resemblance to the original pictures is too strong to be mistaken. See Isa. xxxiv, 4; xiii, 13; Ezek. xxxii, 7, and especially Joel ii, 30, a prediction expressly quoted by the apostle Peter (Acts ii, 19) as referring to the destruction of Jerusalem.

In illustration of the *angels* spoken of in connection with these incidents (Matt. xxiv, 31; Mark xiii, 27), it should be borne in mind that the Jew naturally associated a retinue of angelic servants with the advent of the Messiah in his triumphant career, and this idea Christ here accommodates, in order to assimilate this first with his final judicial appearance, and thus impress it more deeply upon his volatile disciples' mind (comp. Dan. vii, 10). The "*angels*" in this case are the providential means (including particularly the Roman

invaders), by which the Christians' rescue from siege, sack, and especially persecution, was effected; and the "trumpet sound" refers to the warning intimations which the belligerent preparations afforded them, thus giving them at once an assurance and a signal of deliverance. In the similar language of Matt. xiii, 41, 49, the primary reference is to the general judgment. But in the passage before us it is to be specially noted that the "trumpet" is to "gather together his *elect*" only, in distinction from the "all nations" of Matt. xxv, 32.

At Matt. xxiv, 44 (comp. Luke xii, 41), the discourse, which previously had been slightly tinged with allusions to the second judicial coming of Christ (verses 29-31), now begins to verge more distinctly to that final stage, as the reply to Peter that follows indicates. Still, there is no *mark* that the transition to the last judgment is effected till ch. xxv, 31.

In the conclusion of the first topic of Christ's discourse (Matt. xxv, 1-13; comp. Luke xii, 35-38; the parable in Matt. xxv, 14-30 is parallel with an earlier one of our Lord, Luke xix, 11 sq.), the near anticipation of the second topic produces almost a *double* sense in this (and to a degree, in the preceding) parable, which is not so much the effect of direct design as the natural moulding of the language while on a kindred subject, by the vivid presence to the mind of a sublime one which is soon to be introduced; and, indeed, scarcely any phraseology (especially in the far-reaching style of allegory) could have been consistently adopted which would not have been almost equally applicable to both events. Still, a comparison of verse 13 with ch. xxiv, 36, 42 shows that the same occurrences (Jerusalem's siege and fall) are here *chiefly* referred to.

3. The imaginative style of the representation of the judgment day (Matt. alone, xxv, 31-36), which is especially betrayed in the comparison with the shepherd, shows that many of its descriptive particulars are designed only for poetic "*drapery*," needed to portray the actualness of that scene of the invisible world; the *body* of reality coched under it consists in the fact of a universal discrimination of mankind at a future set time by Christ in the capacity of judge, according to their religious character, followed by the assignment of a corresponding destiny of happiness or misery Comp. Rom. xiv, 10, 12; 2 Cor. v, 10; 1 Thess. iv, 16.

Krit.* 1836, ii, 269; 1846, iv, 965; 1861, iii; *Jour. Sac. Lit.* Jan. 1857; Stowe, in *Bibliotheca Sacra*, vii, 452. There are special exegetical treatises on Matt. xxiv and xxv, in Latin, by Jachmann (Lips. 1749), Brandes (Aboe, 1792), Rintsch (Neost. ad Oril. 1827), Kenon (Abo, 1798), Schmid (Jen. 1777), Masch (*Nov. Bibl. Lubec.* ii, 69), Anon. (Lips. 1809); in German, by Crome (*Erem. u. Verd. Bibl.* ii, 349), Ammon (*N. theol. Journ.* i, 365), Jahn (in Bengel's *Archiv.* ii, 79), Anon. (in Eichhorn's *Biblioth.* iii, 669; *Beiträge z. Beförd.* xi, 118; Töllner's *Kurz- u. verm. Aufsätze*, II, i, 221-50); on Christ's coming (*παρουσία*, see ADVENT), in Latin, by Tychsen (Gott. 1785), Schott (Jen. 1819); in German, by Baumeister (in Klüber's *Stud.* I, ii, 219-41; iii, 1-59; II, i, 1-104; ii, 3-48), Schulthess (*Neueste theol. Nachtr.* 1829, p. 18-48): on the phrase *οὐκὲν ὁ βίος*, in Latin, by Osiander (Tub. 1754); on the parallel passage of Luke, in German, by Göze (*Sendsehr.* Hamb. 1783, 1784), Moldenhauer (*ib.* 1784, bis). See Kahle, *Biblische Eschatologie* (Gotha, 1870).

II. *Theological Eschatology* is a subdivision of systematic, and more particularly of dogmatic theology. It generally constitutes the concluding part of dogmatic theology, as it treats of what constitutes both for the individual Christian and for the Christian Church, as a whole, the completion of their destiny. As eschatology presupposes a belief in the immortality of the soul, some writers on dogmatic theology (as Haase) treat

of it in connection with the doctrine of man, and before they treat of the Church. Others connect the doctrine of death with the doctrine of sin. On some points of eschatology, different views were held at an early period of the Church. Origen understood a passage in the Epistle to the Romans on the Apocatastasis (q. v.) as meaning a final reconciliation and salvation of the wicked, and this view has found some adherents at all times. See RESTORATIONISTS. In modern times, some go so far as to deny all punishment after the present life, and asserting the immediate salvation of all men [see UNIVERSALISTS]; while others teach that immortality will be the lot of only the good, and that the wicked, after their death, will be annihilated. See ANNIHILATIONISTS. See also the articles DEATH, INTERMEDIATE STATE, JUDGMENT, HEAVEN, HELL, RESURRECTION, IMMORTALITY. The Church of Rome developed the theory of a future state, different from heaven and hell, for which see the article PURGATORY. No point connected with eschatology has from the earliest period of the Church been more productive of excited controversy than the doctrine of the second advent of Christ and of the Millennium. For the history of this doctrine, see the article MILLENNIUM. In German there are separate treatises on eschatology, e. g. Richter, *die Lehre von den letzten Dingen* (Bresl. 1833, 8vo); Lau, *Paulus Lehre v. d. letzt. Dingen* (Brandenb. 1837, 8vo); Valenti, *Eschatologie* (Basel, 1840, 8vo); Karsten, *Lehre von d. letzten Dingen* (Rostock, 3d ed. 1861); Schultz, *Voraussetzungen der christl. Lehre von der Unsterblichkeit* (Göttingen, 1861); Wilmarshof, *Das Jenseits* (Leipzig, 3 parts, 1863-1866); Nöldechen, *Grade der Seligkeit* (Berlin, 1863); Splittgerber, *Tod, Fortleben u. Auferstehung* (Halle, 1863); Rink, *Vom Zustande nach dem Tode* (Ludwigsburg, 2d ed. 1865); Oswald, *Eschatologie* (Paderborn, 1868).—Hagenbach, *Encycl.* § 89; Herzog, *Real-Encycl.* iv, 155. (A. J. S.)

Escobar y Mendoza, ANTONIO, a Spanish Jesuit and noted casuist, was born at Valladolid in 1589, and took the vows of the order of Jesuits in 1604. He became very eminent as a preacher, and is said to have preached daily (sometimes twice a day) for fifty years. He was also a prolific writer, leaving more than forty folio volumes of ascetic divinity, sermons, casuistry, etc. His *Liber Theologicus Moralís* (Lyon, 1646, 7 vols. 8vo) passed through many (39 in Spain) editions, and was long the favorite text-book of the Jesuits. He also wrote *Universæ Theologie Moralís problemata* (Lyon, 1652, 2 vols. fol.);—*Universæ Theol. Moral. receptiores sententiæ*, etc. (Lyon, 7 vols. fol.). Escobar became the butt of Pascal's wit in the *Provincial Letters*, a fact which will carry his name to the latest posterity. His "liberality" in morals was so excessive that even Rome was compelled to disavow some of his doctrines. His complete works fill 42 volumes. He died July 4, 1669.—Hoefler, *Nouv. Biogr. Générale*, xvi, 375; Alegambe, *Biblioth. Scriptorum Soc. Jesu* (Louvain, 1854).

Escorial, or Escorial, a city of Spain, twenty-four miles N.W. of Madrid, containing a celebrated convent-palace generally called *Escorial*. The convent, built for 160 monks of the order of Jerome, was erected 1563-84, by Philip II, in fulfilment of a vow made at the battle of St. Quentin, fought on the anniversary of St. Lawrence. It is built in the form of a gridiron, in commemoration of the martyrdom of the saint, and the king's palace forms the handle. The buildings are 740 feet long, inclosing 20 courts, in which are 63 fountains; there are 17 cross paths, 890 doors, 1000 columns, 5000 windows, 9 towers surmounted by cupolas, a magnificent church with 48 altars in side chapels. The main altar is adorned by a statue of St. Lawrence in solid silver, weighing 450 pounds. Underneath is the costly burying vault of the king, of marble and jasper. The library of the convent contains some 4000 MSS., mostly Arabic, and is the principal collection of Ori-

ental history and literature. Many of the MS. and other treasures were lost when the place was sacked by the French in 1808. Besides these, there are some 24,000 vols. of ancient authors, principally on history. The picture-gallery contains some 465 original paintings. A park surrounds the king's palace, or Casa del Principe.—*Penny Cyclopædia*; Herzog, *Real-Encyclop.* iv, 157.

**Esdraëla.** See JEZREEL.

**Esdraë'lon.** See ESDRAELON.

**Esdraë'lon** [from v. r. *Ἐσδραῖλῶν*] (or rather *Esdrēlon*, *Ἐσδραῖλῶν*, Judith, iii, 9; iv, 6; but "*Esdrēlom*," *Ἐσδραῖλῶμ*, Judith, i, 8; "*Esdraelom*," vii, 3, where it is called "the great plain," as simply in Josephus everywhere, τὸ πῆϊον μέγα), the name of a valley or large bottom, a Grecized form derived from the old royal city of *Jezeel*, which occupied a commanding site, near the eastern extremity of the plateau, on a spur of Mount Gilboa. "The great plain of Esdraclon" extends across central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is properly the plain of Aecho or Acre ('Akka). The main body of the plain is a triangle. Its base on the east extends from Jenin (the ancient Engannim) to the foot of the hills below Nazareth, and is about 15 miles long; the north side, formed by the hills of Galilee, is about 12 miles long; and the south side, formed by the Samaria range, is about 18 miles. The apex on the west is a narrow pass opening into the plain of 'Akka. This vast expanse has a gently undulating surface—in spring all green with corn where cultivated, and rank weeds and grass where neglected—dotted with several low gray tells, and near the sides with a few olive groves. This is that *valley of Megiddo* (מִגִּדּוֹ מְגִדּוֹ, so called from the city of Megiddo [q. v.], which stood on its southern border), where Barak triumphed, and where king Josiah was defeated and received his death-wound (Judg. v; 2 Chron. xxv). Probably, too, it was before the mind of the apostle John when he figuratively described the final conflict between the hosts of good and evil who were gathered to a place called *Armageddon* (Ἀρμαγεδδών, from the Heb. מִגְדּוֹן מְגִדּוֹן, that is, the city of *Megiddo*; Rev. xvi, 16). The river Kishon—"that ancient river" so fatal to the army of Sisera (Judg. v, 21)—drains the plain, and flows off through the pass westward to the Mediterranean.

From the base of this triangular plain three branch plains stretch out eastward, like fingers from a hand, divided by two bleak gray ridges—one bearing the familiar name of Mount Gilboa; the other called by Franks Little Hermon, but by natives Jebel ed-Duby. The northern branch has Tabor on the one side, and Little Hermon on the other; into it the troops of Barak defiled from the heights of Tabor (Judg. iv, 6); and on its opposite side are the sites of Nain and Endor. The southern branch lies between Jenin and Gilboa, terminating in a point among the hills to the eastward; it was across it that Ahaziah fled from Jehu (2 Kings ix, 27). The central branch is the richest as well as the most celebrated; it descends in green, fertile slopes to the banks of the Jordan, having Jezeel and Shumem on opposite sides at the western end, and Bethshean in its midst towards the east. This is the "valley of Jezeel" proper—the battle-field on which Gideon triumphed, and Saul and Jonathan were overthrown (Judg. vii, 1 sq.; 1 Sam. xxix and xxxi). Indeed, a large part of the most sanguinary battles fought in Palestine in every age have been waged upon this eventful plain.

Two things are worthy of special notice in the plain of Esdraclon: 1. *Its wonderful richness.*—Its unbroken expanse of verdure contrasts strangely with the gray, bleak crowns of Gilboa, and the rugged ranges on the

north and south. The gigantic thistles, the luxuriant grass, and the exuberance of the crops on the few cultivated spots, show the fertility of the soil. It was the frontier of Zebulon—"Rejoice, Zebulon, in thy going out" (Deut. xxxiii, 18). But it was the special portion of Issachar—"And he saw that rest was good, and the land that it was pleasant; and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix, 15). 2. *Its desolation.*—If we except the eastern branches, there is not a single inhabited village on its whole surface, and not more than one sixth of its soil is cultivated. It is the home of the wild, wandering Bedouin, who scour its smooth turf on their fleet horses in search of plunder; and when hard pressed can speedily remove their tents and flocks beyond the Jordan, and beyond the reach of a weak government. It has always been insecure since history began. The old Canaanitish tribes drove victoriously through it in their iron chariots (Judg. iv, 3, 7); the nomad Midianites and Amalekites—those "children of the East," who were "as grasshoppers for multitude," whose "camels were without number"—devoured its rich pastures (Judg. vi, 1-6; vii, 1); the Philistines long held it, establishing a stronghold at Bethshean (1 Sam. xxix, 1; xxxi, 10); and the Syrians frequently swept over it with their armies (1 Kings xx, 26; 2 Kings xiii, 17). In its condition, thus exposed to every hasty incursion and to every shock of war, we read the fortunes of that tribe which for the sake of its richness consented to sink into a half-nomadic state—"Rejoice, O Issachar, in thy tents . . . Issachar is a strong ass, crouching down between two burdens; and he saw that rest was good, and the land that it was pleasant, and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix, 14, 15; Deut. xxxiii, 18). Once only did this tribe shake off the yoke—when under the heavy pressure of Sisera, "the chiefs of Issachar were with Deborah" (Judg. v, 15). Their exposed position and valuable possessions in this open plain made them anxious for the succession of David to the throne, as one under whose powerful protection they would enjoy that peace and rest which they loved; and they joined with their neighbors of Zebulon and Naphtali in sending to David presents of the richest productions of their rich country (1 Chron. xii, 32, 40). See ISSACHAR.

The whole borders of the plain of Esdraclon are dotted with places of high historic and sacred interest. Here we group them together, while referring the reader for details to the separate articles. On the east we have Endor, Nain, and Shnnem, ranged round the base of the "hill of Moreh;" then Bethshean in the centre of the plain where the "valley of Jezeel" opens towards the Jordan; then Gilboa, with the "well of Harod," and the ruins of Jezeel at its western base. On the south are Engannim, Taanach, and Megiddo. At the western apex, on the overhanging brow of Carmel, is the scene of Elijah's sacrifice; and close by the foot of the mountain below runs the Kishon, on whose banks the false prophets of Baal were slain. On the north, among places of less note, are Nazareth and Tabor. The modern Syrians have forgotten the ancient name as they have forgotten the ancient history of Esdraclon, and it is now known among them only as *Merj ibn-Amer*, "the Plain of the Son of 'Amer." A graphic sketch of Esdraclon is given in Stanley's *Syr. and Pales.* p. 327 sq.; see also Porter, *Handbook for Syria and Palestine*, p. 351 sq.; Jowett, *Christian Researches*, p. 146, 222; Robinson, *Researches*, new ed. ii, 315-30, 366; iii, 113 sq.; Thomson, *Land and Book*, ii, 216 sq.; Walthers, *De Meγαλοπείλιῳ Παλαιστίνῃ* (Lips. 1792).—Smith, s. v. See JEZREEL.

**Es'dras** (*Ἐσδρας*; Vulg. *Esdras*), the Grecized form, used throughout the Apocrypha (1 Esd. viii, 1, 3, 7, 8, 9, 19, 23, 25, 91, 92, 96; ix, 7, 16, 39, 40, 42, 45, 46, 49; 2 Esd. i, 1; ii, 10, 33, 42; vi, 10; vii, 2, 25; viii, 2, 19; xiv, 1, 38), of the name of the scribe EZRA

(q. v.). In several manuscripts of the Latin Vulgate, as well as in all the printed editions anterior to the decree of the Council of Trent, and in many since that period, there will be found four books following each other, entitled the 1st, 2d, 3d, and 4th books of Ezra. The first two are the canonical books of Ezra and Nehemiah, the 3d and 4th form the subject of the articles below. They are the same which are called 1st and 2d Esdras in the English Authorized Version. For their use and relation to the canonical books see Josippon ben-Gorion (ed. Breithaupt, 1710), p. 47 sq.; Trenchelenburg, in Eichhorn's *Biblioth.* i, 189 sq.; Eichhorn, *Einleit. in d. Apocr.* p. 335 sq.; Herzfeld, *Gesch. d. Israel*, p. 320 sq.; Ewald, *Gesch. Isr.* iv, 131 sq.; Keil, *Einleit. in d. A. T.* (ed. 1859), p. 677 sq.; Davidson, *Text of O. T.* p. 937 sq. See ΑΠΟΚΡΥΦΑ.

**ESDRAS, FIRST BOOK OF.** This is the first of the apocryphal books in the English translations of the Bible (viz., Coverdale, Matthews, Taverner, the Geneva Bible, Cranmer's Bible, the Bishops' Bible, the A. V.), which follow Luther and the translators of the Zurich version, who were the first that separated the apocryphal from the canonical books. It must, however, be observed that Luther himself never translated the apocryphal portions of Ezra, because he regarded them as unworthy of a place among the apocrypha (see below, sec. 5).

**I. Title and Position.**—This book has different titles. In some editions of the Sept. it is called ὁ ἱερεὺς, *the Priest* (Cod. Alex.), which is equivalent to Ezra, who, by way of eminence, was styled "the priest" or "the scribe," in others it is designated Ἐσδραῖος, *Ezra*, while in the Vatican and many modern editions of the Sept., as well as in the *old Latin* and the Syriac, it is called "the first book of Ezra," and accordingly is placed before the canonical Ezra, which is called "the second book of Ezra," because the history it gives is in part anterior to that given in the canonical Ezra. In the Vulg., again, where Ezra and Nehemiah are respectively styled the *first* and *second* book of Ezra, this apocryphal book, which comes immediately after them, is called "the third book of Ezra." Others, again, call it "the second book of Ezra" (Isidore, *Orig.* vi, 2), because Ezra and Nehemiah, which it follows, were together styled "the first book of Ezra," according to a very ancient practice among the Jews, who, by putting the two canonical books together, obtained the same number of books in the Scriptures as the letters in the Hebrew alphabet; and others call it *Pseudo-Ezra*, in contradistinction to the canonical Ezra. The name *first* Esdras given to it in the A. V. is taken from the Geneva Bible; the older English translations (viz. Coverdale's Bible, Matthew's Bible, the Bishops' Bible), as well as the sixth article of the Church of England (1571), following Luther and the Zurich Bible, call it the *third* Esdra, according to the Vulg. Since the Council of Trent (1546), this book has been removed from its old position to the end of the volume in the Sixtine and Clementine editions of the Vulg. In the list of revisers or translators of the *Bishops' Bible*, sent by Archbishop Parker to Sir William Cecil, with the portion revised by each, Ezra, Nehemiah, Esther, and the apocryphal books of Esdras seem to be all comprised under the one title of **ESDRAS**. Barlow, bishop of Chichester, was the translator, as also of the books of Judith, Tobias, and Sapientia (*Corresp. of Archbp. Parker*, Park. Soc. p. 335).

**II. Design and Contents.**—The object of this book, as far as its original portion is concerned (iii, 1-v, 6), is to excite the heathen rulers of Judæa to liberality and kindness towards the Jews, by depicting the good example of Darius, from whom Zerubbabel obtained permission, by the aid of wisdom, to return with his brethren to Palestine, and to rebuild the city and the Temple. This design is worked out in the following attractive story. Darius, having given a sumptuous feast to all his subjects in the second year of his reign,

retired to rest (iii, 1-3); when asleep, his three body-guards, Zerubbabel being one of them, proposed each to write a maxim stating what he thought was the most powerful thing, in the hope that the king would reward the wisest writer (ver. 4-9). Accordingly, they all wrote: one said "Wine is the most powerful;" the other, "A king is the most powerful;" while Zerubbabel wrote, "Women are very powerful, but truth conquers all." The slips containing these maxims were put under the king's pillow, and were given to him when he awoke (ver. 10-12). When he had read them he immediately sent for all his magnates, and, having read these maxims before them (ver. 13-15), called upon the three youths to explain their sayings (ver. 16, 17). The first spoke elaborately about the great power which wine manifests in different ways (ver. 18-24); the second descanted upon the unlimited power of royalty, illustrating it by various examples (iv, 1-12); while Zerubbabel discoursed upon the mighty influence of women, frequently contravening the power of wine and monarchs, and then burst forth in praise of truth so eloquently, that all present exclaimed, "Great is truth, and mightiest above all things" (ver. 13-41). Darius then offered to Zerubbabel anything he should ask (ver. 42), whereupon he reminded the king of his vow to rebuild Jerusalem and return the sacred vessels when he ascended the throne (ver. 43-47). The king stood up, kissed Zerubbabel, wrote to all officials to convey him and all his brethren to Palestine, and to supply all the necessary materials for the rebuilding of the Temple (ver. 48-63).

This is preceded and followed by descriptions of events which present the whole as one continuous narrative, relating in historical order the restoration of the Temple-service first under Josiah, then under Zerubbabel, and finally under Ezra, and which are compiled from the records contained in the books of Chronicles, Ezra, and Nehemiah, as follows:

1. Chap. i corresponds to 2 Chron. xxxv and xxxvi, giving an account of Jo-shiah's magnificent celebration of the Passover-feast in the eighteenth month of his reign, and continuing the history till the Babylonian captivity.
2. Chap. ii, 1-15, corresponds to Ezra i, 1-11, recording the return of the Jews from Babylon under the guidance of Sanabassar in the reign of Cyrus.
3. Chap. ii, 16-30, corresponds to Ezra iv, 7-24, giving an account of Artaxerxes' prohibition to build the Temple till the second year of Darius.
4. Chap. iii, 1-v, 6, contains the original piece.
5. Chap. v, 7-78, corresponds to Ezra ii, 1-iv, 5, giving a list of the persons who returned with Zerubbabel, describing the commencement of the building of the Temple and the obstacles whereby it was interrupted "for the space of two years" until the reign of Darius.
6. Chap. vi, 1-vii, 15, corresponds to Ezra v, 1-vi, 22, giving an account of the building of the Temple by Zerubbabel under Darius, of its completion in the sixth year of this monarch's reign, and of the commencement of the Temple service.
7. Chap. viii, 1-ix, 36, corresponds to Ezra vii, 1-x, 44, describing the return of Ezra with his colony, and the putting away of the strange wives.
8. Chap. ix, 57-55, corresponds to Neh. vii, 23-viii, 12, giving an account of Ezra's public reading of the law.

The original piece around which all this clusters has evidently been the cause of this transposition and remodelling of the narrative contained in the canonical books. Having assumed that Zerubbabel returned to Jerusalem with a portion of his brethren in the second year of Darius, the compiler naturally placed Ezra ii, 1-iv, 5, which gives the list of those that returned, after the original piece, for it belongs to Zerubbabel's time, according to ii, 2, and the original piece he placed after Ezra iv, 7-24, because Ezra (Ezra iv, 24) led him to suppose that Artaxerxes reigned before Darius. Hence a twofold design in the compiler is discernible. One was to introduce and give scriptural sanction to the legend about Zerubbabel, which may or may not have a historical base, and may have existed as a separate work; the other was to explain the great obscurities of the book of Ezra, and to present the narrative, as the author understood it, in historical order, in which, however, he has signally failed. For, not to advert to

innumerable other contradictions, the introducing of the opposition of the heathen, as offered to Zerubbabel after he had been sent to Jerusalem in such triumph by Darius, and the describing of that position as lasting "until the reign of Darius" (v, 73), and as put down by an appeal to the decree of Cyrus, is such a palpable inconsistency as is alone sufficient quite to discredit the authority of the book. It even induces the suspicion that it is a farrago made up of scraps by several different hands. At all events, attempts to reconcile the different portions with each other, or with Scripture, is lost labor.

III. *Unity and Original Language.*—The above analysis of its contents shows that the book gives us a consecutive history *de templi restitutione*, as the *old Latin* tersely expresses it. It is, however, not complete in its present state, as is evident from the abrupt manner in which it concludes with Neh. viii, 12. We may therefore legitimately presume that the compiler intended to add Neh. viii, 13-18, and perhaps also ch. ix. Josephus, who follows the history given in this book, continues to speak of the death of Ezra (*Ant.* xi, 5, 5), from which it may be concluded that it originally formed part of this narrative. More venturesome are the opinions of Zuntz, that Neh. i-vii originally belonged to this book (*Die Gottesdienstl. Vorträge*, p. 29), and of Eichhorn, that 2 Chron. xxxiv followed the abrupt breaking off (*Einführung in d. Apokr.* p. 345 sq.).

As to its original language, this compilation is undoubtedly made directly from the Hebrew, and not from other parts of the present Sept. This is evident from the rendering of עֲזָרָה לְבָנָיָהּ by Ἐμμοροσθεν τοῦ λαοῦ, reading עֲזָרָה (compare i, 11 with 2 Chron. xxxiv, 12), and of הִתְחַנְּפוּ בְּלֵבָיְכֶם לַיהוָה by καὶ συνετέλεσαν πάντα τὰ ἐνδόξα αὐτῆς, reading בְּבָרְכֶיךָ (comp. i, 53 with 2 Chron. xxxvi, 19; see also ii, 7-9 with Ezra i, 4, 6; ii, 17 with Ezra iv, 9; ii, 16 with Ezra iv, 7; ii, 24 with Ezra iv, 16; ix, 10 with Ezra x, 4), since these can only be accounted for on the supposition that the book was compiled and translated from the Hebrew. The translator, however, did not aim so much to be literal as to produce a version compatible with the Greek idiom. Hence he sometimes abbreviated the Hebrew (comp. i, 10 with 2 Chron. xxxv, 10-12; ii, 15, 16 with Ezra iv, 7-11; v, 7 with Ezra v, 6, 7; vi, 4 with Ezra v, 3, 4; viii, 6 with Ezra vii, 6; viii, 14 with Ezra vii, 17; viii, 20 with Ezra vii, 22), and sometimes tried to make it more intelligible by adding some words (comp. i, 56 with 2 Chron. xxvi, 20; ii, 5 with Ezra i, 3; ii, 9 with Ezra i, 4; ii, 16 with Ezra iv, 6; ii, 18 with Ezra iv, 12; v, 40 with Ezra ii, 63; v, 47 with Ezra iii, 1; v, 52 with Ezra iii, 5; v, 66 with Ezra iv, 1; vi, 41 with Ezra ii, 64; vi, 8 with Ezra iv, 14; vi, 9 with Ezra v, 8; vii, 9 with Ezra vi, 18). The original portion, too, is a Palestinian production, embellished to suit the Alexandrian taste. The Hebrew forms of it may be seen in Josephus (*Ant.* xi, 3, 1) and Josippon ben-Gorion (i, c. 6, p. 47 sq., ed. Breithaupt).

IV. *Author and Date.*—As regards the time and place when the compilation was made, the *original* portion is that which alone affords much clew. This seems to indicate that the writer was thoroughly conversant with Hebrew, even if he did not write the book in that language. He was well acquainted, too, with the books of Esther and Daniel (1 Esdr. iii, 1, 2 sq.), and other books of Scripture (*ib.* 20, 21, 39, 41, etc., and 45 compared with Psa. cxxxvii, 7). But that he did not live under the Persian kings, and was not contemporary with the events narrated, appears from the undiscriminating way in which he uses promiscuously the phrase *Medes and Persians*, or *Persians and Medes*, according as he happened to be imitating the language of Daniel or of the book of Esther. The allusion in iv, 23 to "sailing upon the sea and upon the rivers," for the purpose of "robbing and stealing,"

seems to indicate a residence in Egypt, and an acquaintance with the lawlessness of Greek pirates there acquired. The phraseology of v, 73 savors also strongly of Greek rather than Hebrew. If, however, as seems very probable, the legend of Zerubbabel appeared first as a separate piece, and was afterwards incorporated into the narrative made up from the book of Ezra, this Greek sentence from ch. v would not prove anything as to the language in which the original legend was written. The expressions in iv, 40, "She is the strength, kingdom, power, and majesty of all ages," is very like the doxology found in some copies of the Lord's Prayer, and retained by us, "Thine is the kingdom, and the power and the glory forever." But Lightfoot says that the Jews in the Temple service, instead of saying Amen, used this antiphon, Blessed be the Name of the Glory of His Kingdom forever and ever (*Works*, vi, 427). Thus the resemblance may be accounted for by their being both taken from a common source.

Whoever the author was, he seems to have lived in Palestine (comp. v, 47), and certainly was a master of Greek, as is evident from his superior style, which resembles that of Symmachus, and from his successfully turning the Hebraisms into good Greek (comp. viii, 5 with Ezra viii, 17; ix, 13 with Ezra x, 14). The compiler must have lived at least a century before Christ, since Josephus follows his narrative of the times of Ezra and Nehemiah (*Ant.* xi, 5; xi, 45). The book must therefore have existed for some time, and have acquired great reputation and authority, to make the Jewish historian prefer its description of those days to that of the canonical books.

V. *Canonicity and Importance.*—This book was never included in the Hebrew canon, nor is it to be found in the catalogues of the Hebrew Scriptures given by the early fathers, e. g. Melito, Origen, Eusebius, Athanasius, Gregory Nazianzen, Hilary of Poitiers, Cyril of Jerusalem, the Council of Laodicea, and many others; and St. Jerome emphatically warns us "not to take pleasure in the dreams of the 3d and 4th apocryphal books of Ezra" (*Pref. in Esdr. et Nehem.*). The councils of Florence (1438) and Trent (1546) decided against its canonicity. The reason of this last exclusion seems to be that the Tridentine fathers were not aware that it existed in Greek; for it is not in the Complutensian edition (1515), nor in the *Biblia Regia*. Vatablus (1540) had never seen a Greek copy, and, in the preface to the apocryphal books, speaks of it as only existing in some MSS. and printed *Latin* Bibles. Baduel also, a French Protestant divine (*Bibl. Crit.*) (about 1550), says that he knew of no one who had ever seen a Greek copy. For this reason it seems it was excluded from the Canon, though it has certainly quite as good a title to be admitted as Tobit, Judith, etc. It has indeed been stated (Bp. Marsh, *Compar. View*, ap. Soames, *Hist. of Ref.* ii, 608) that the Council of Trent, in excluding the two books of Esdras, followed Augustine's Canon; but this is not so. Augustine (*de Doctr. Christ.* lib. ii, 13) distinctly mentions among the libri canonici *Esdræ duo*; and that one of these was our 1st Esdras is manifest from the quotation from it given in his *De Civit. Dei*. Hence it is also sure that it was included among those pronounced as canonical by the third Council of Carthage, A.D. 397 or 419, where the same title is given, *Esdræ libri duo*; here it is to be noticed by the way that Augustine and the Council of Carthage use the term canonical in a much broader sense than we do; and that the manifest ground of considering them canonical in any sense is their being found in the Greek copies of the Sept. in use at that time. Luther would not even translate it, "because there is nothing in it which is not better said by Esop in his Fables, or even in much more trivial books" (*Vorrede auf den Baruch*); the version given in the later editions of Luther's Bible is the work of Daniel Cramer, and the Protestant

Church generally has treated it with great contempt, because it contradicts the canonical books of Ezra and Nehemiah. On the other hand, Josephus, as we have seen, regards it as a great authority, and it was treated with great reverence by the Greek and Latin fathers. St. Augustine mentions it among the canonical books (*De Doctr. Christ.* lib. ii, 13), and quotes the famous passage, "Truth is the strongest" (ch. iii, 12), as Ezra's prophecy respecting Christ (*De Civitat. Dei*, xviii, 16); the same sentence is quoted as Scripture by Cyprian (*Epist.* lxxiv; comp. also Clemens Alexandrinus, *Strom.* i; Athanasius, *Orat.* iii, *cont. Arianos*; Justin Martyr, *Diad. cum Tryph.*). Modern criticism has justly taken the middle course between treating it with contempt and regarding it as canonical, and has recognised in it an important auxiliary to the settling of the text, and to the adjusting of the facts recorded in Chronicles, Ezra, and Nehemiah, since this book has evidently been made from a different recension of the Hebrew, and has some readings and divisions preferable to those contained in the canonical books (comp. v, 9 with Ezra ii, 12; ix, 12 with Ezra x, 6; ix, 16 with Ezra x, 16). Both Bertheau in his commentary on Ezra and Nehemiah (*Exeget. Handb.* pt. xviii), and Fritzsche in his commentary on the apocryphal Ezra (*Exeget. Handb.* z. d. Apokr. pt. i), have shown the important services which the canonical and uncanonical records may render to each other. —Kitto, s. v.; Smith, s. v.

VI. There are no separate commentaries on the first book of Esdras, and the literature pertaining to it is given under foregoing heads.

ESDRAS, SECOND BOOK OF, i. e. the second in the order of the apocryphal books as given in the English translations of the Bible, which follow the Zurich Bible.

I. *Title and Position.*—The original designation of this book, by which it is appropriately called in the Greek Church, is Ἀποκάλυψις Ἐσδρά, or προφητεία Ἐσδρά, the *Revelation or Prophecy of Ezra* (comp. Nicephorus, apud Fabric. *Cod. Pseud. V. T.* ii, 176; *Cod. Apocr. N. T.* i, 951 sq.; Montfaucou, *Biblioth. Coislin.* p. 194). The designation "1 Ezra," which it has in the Arabic and Ethiopic versions, arises from the fact that it was placed before the canonical Ezra because it begins a little earlier (i. e. B.C. 558) than the Hebrew Ezra. It is called "2 Ezra" in the Latin version because it follows the canonical books Ezra and Nehemiah, which were together styled the *first* Ezra, and it is still more generally denominated "4 Ezra," a name given to it by St. Jerome (comp. *Præf. in Esdr. et Nehem.*), because it is in most of the Latin MSS. the fourth of the books which go by the name of Ezra, and which are placed in the following order: 1 Ezra, i. e. the canonical Ezra; 2 Ezra, i. e. Nehemiah; 3 Ezra, i. e. 1 apocryphal Ezra; and 4 Ezra, i. e. this book. The name "4 Ezra" is retained by Luther, the Zurich Bible, Coverdale, Matthew's Bible, Cramer's Bible, the Bishops' Bible, and in the 6th article of the Church of England (1571). The name "2 Esdras," given to it in the A. V., is taken from the Geneva Bible, and is the title given to it by the author himself (2 Esdr. i, 1). This book, like the former one, is placed at the end of the Vulgate in the Sixtine and Clementine editions, because it has been excluded from the Canon by the Council of Trent.

II. *Design and Plan.*—The object of this book was to comfort the chosen people of God who were suffering under the grinding oppression of the heathen, by assuring them that the Lord has appointed a time of deliverance when the oppressors shall be judged, and the ten tribes of Israel, in union with their brethren, shall return to the Holy Land to enjoy a glorious kingdom which shall be established in the days of the Messiah. This is gradually developed in an *introduction*, and *seven angelic revelations, or visions*, in which Ezra is instructed in the mysteries of the moral world, as follows:

1. *Introduction* (iii, 1-36, A. V.; or i, 1-36, Ethiopic Vers.).—When on his couch in Babylon, in the 30th year after the destruction of Jerusalem (B.C. 558), mourning over the deplorable fate of his brethren (ver. 1-3), and recounting the dealings of God with mankind generally (ver. 4-12), and with his chosen people in particular, in consequence of their sinful nature inherited from Adam (ver. 13-22), for which the Temple was destroyed and the city delivered into the hands of Gentiles (ver. 23-27), Ezra asked God why the heathen sinners of Babylon are spared, whilst the people of his covenant are so unsparingly punished (ver. 28-36)?

2. *First Revelation* (iv, 1-v, 15, A. V.; ii, 1-iii, 23, Eth.).—In answer to this, the angel Uriel is sent, who, after censuring the presumptuousness of a short-sighted man in trying to fathom the unsearchable dealings of the Most High, when he cannot understand the things below (ver. 1-21), and after Ezra's earnest reiteration of the question (ver. 22-25), says that sin has not yet reached its climax (ver. 26-31), enumerates the signs whereby the fulness of that time will be distinguished, and promises to reveal to him still greater things if he will continue to pray and fast seven days (ver. 32-v, 15).

3. *Second Revelation* (v, 16-vi, 34, A. V.; iii, 24-iv, 37, Eth.).—Having fasted seven days according to the command of the angel, and against the advice of the prince of the Jews (ver. 16-21), Ezra again appeals to God, asking why he does not punish his sinful people himself rather than give them over to the heathen (ver. 22-30)? Uriel, who appears a second time, after referring again to the inscrutable judgments of God (ver. 31-56), reveals to Ezra, according to promise, more distinctly what shall be the signs of the latter days, saying that with Esau [the Idumæans] the present world will terminate, and the world to come will begin with Jacob (vi, 1-10), whereupon the day of judgment will follow, and be announced by the blast of a trumpet (ver. 11-25); Enoch and Elias, the fore-runners of the Messiah, shall appear (ver. 26), and sin and corruption will be destroyed (ver. 27, 28); tells him to be comforted, patient, and resigned, and that he shall hear something more if he will fast again seven days (ver. 29-34).

4. *Third Revelation* (vi, 35-ix, 25, A. V.; iv, 38-ix, 27, Eth.).—The fasting being over, Ezra again appeals to God, to know how it is that his chosen people, for whom this wonderful world was created, are deprived of their inheritance (ver. 35-59)? Whereupon Uriel appears a third time, tells him that it is because of their sin (vii, 1-25), describes the death of the Messiah, the resurrection, the judgment, and the things which will come to pass, concluding with an admonition to Ezra to fast and pray again (ver. 26-ix, 25).

5. *First Vision* (ix, 26-x, 59, A. V.; ix, 28-x, 74, Eth.).—After appealing again to God in behalf of his brethren (ver. 26-37), Ezra suddenly saw a woman in the deepest mourning for her only son, who had been born to her after being married thirty years, and who died on the day of his nuptials (ver. 38-x, 1), and she would not be comforted (ver. 2-4). He rebuked her for being so disconsolate about the loss of one son, when Sion was bereaved of all her children (ver. 2-14), and recommended her to submit to the dealings of God (ver. 15-24); her face speedily shone very brightly, and she disappeared (ver. 25-27); whereupon Uriel appeared to Ezra, and told him that the woman is Sion, the thirty years of her barrenness are "the thirty years wherein no sacrifice was offered in her," her first-born is the Temple built by Solomon, his death on the day of his marriage is the destruction of Jerusalem, and the extraordinary brightness of the mother's face is the future glory of Sion (ver. 28-59).

6. *Second Vision* (xi, 1-xii, 51, A. V.; xi, 1-xii, 58, Eth.).—Ezra in a dream had a revelation of the latter days under the figure of an eagle coming up from the

sea with three heads and twelve wings, which afterwards produced eight smaller wings spread over all things, and reigning over all the world (ver. 1-7). These wings, beginning from the right side, according to a voice which proceeded from the body of the eagle, reigned successively over all the earth, and perished, so that there remained six small wings (ver. 8-23), which, however, in attempting to rule, also perished, and the three heads only were left on the eagle's body (ver. 24-31). These now reigned, one after the other, and perished, so that a single head remained (ver. 32-35). A lion (the Messiah) declared to the eagle that all his wings and heads were destroyed because he ruled the earth wickedly (ver. 36-46); then the body and whatever was left of the eagle were burnt in fire (xii, 1, 2). Ezra awoke, and having prayed for the interpretation of this vision (ver. 3-9), was told by the angel that the eagle was the fourth monarchy which Daniel saw, and was admonished again to fast and pray (ver. 10-51).

7. *Third Vision* (xiii, 1-58, A. V.; xiii, 1-64, Eth.).—Ezra then had another dream, in which he saw a mighty spirit (*πνεῦμα*) arise from the sea resembling a man, who destroyed all his enemies with the blast of his mouth, and gathered around him large multitudes (ver. 1-13). On awaking, Ezra was told by the angel that it was the Messiah, who shall gather together the ten tribes, lead them to their holy land, and give them Sion "prepared and builded for them" (ver. 14-58).

8. *Conclusion* (xiv, 1-48, A. V.; xiv, 1-52, Eth.).—Three days later, the voice which spoke to Moses in the bush tells Ezra that the latter days are at hand (ver. 1-12), bids him set his house in order, reprove those that are living (ver. 13-18), and write down, for the benefit of those who are not yet born, ninety-four books, i. e. the twenty-four inspired books of the O. T. which have been burnt, and seventy books of divine mysteries, which he duly did with the help of scribes (ver. 19-44), the recovered Scriptures to be communicated to all, and the Cabalistic books only to the sages (ver. 45-48).

The chief characteristics of the "three-headed eagle," which refer apparently to historic details, are "twelve feathered wings" (*duodecim alae pennarum*), "eight counter-feathers" (*contrariae pennae*), and "three heads;" but, though the writer expressly interprets those of kings (xii, 14, 20) and "kingdoms" (xii, 23), he is, perhaps intentionally, so obscure in his allusions that the interpretation only increases the difficulties of the vision itself. One point only may be considered certain—the eagle can typify no other empire than Rome. Notwithstanding the identification of the eagle with the fourth empire of Daniel (comp. Barnabas, *Epist.* p. 4), it is impossible to suppose that it represents the Greek kingdom (Hilgenfeld; compare Volkmar, *Dias recte Buch Esra*, p. 36 sq.). The power of the Ptolemies could scarcely have been described in language which may be rightly applied to Rome (xi, 2, 6, 40); and the succession of kings quoted by Hilgenfeld to represent "the twelve wings," preserves only a faint resemblance to the imagery of the vision. But when it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. The second wing (i. e. king) rules twice as long as the other (xi, 17). This fact seems to point to Octavianus and the line of the Cæsars; but thus the line of "twelve" leads to no plausible conclusion. If it is supposed to close with Trajan (Lücke, 1st ed.), the "three heads" receive no satisfactory explanation. If, again, the "three heads" represent the three Flavii, then "the twelve" must be composed of the nine Cæsars (Jul. Cæsar—Vitellius) and the three pretenders, Piso, Vindex, and Nymphidius (Gröner), who could scarcely have been brought within the range of a Jewish Apocalypse. Volkmar proposes a new interpretation, by which two

wings are to represent one king, and argues that this symbol was chosen in order to conceal better from strange eyes the revelation of the seer. The twelve wings thus represent the six Cæsars (Cæsar—Nero); the eight "counter-feathers," the usurping emperors Galba, Otho, Vitellus, and Nerva; and the three heads the three Flavii. This hypothesis offers many striking coincidences with the text, but at the same time it is directly opposed to the form of interpretation given by Ezra (xii, 14, *regnabunt . . . duodecim reges*; v. 18, *octo reges*), and Volkmar's hypothesis that the *twelve* and *eight* were marked in the original MS. in some way so as to suggest the notion of division, is extremely improbable. Van der Vlis and Lücke, in his later edition, regard the twelve kings as only generally symbolic of the Roman power; and while they identify the three heads with the triumvirs, they seek no explanation of the other details. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon Jewish thought and history during the critical period B.C. 100–A.D. 100.

In tone and character, the Apocalypse of Ezra offers a striking contrast to that of Enoch (q. v.). Triumphant anticipations are overshadowed by gloomy forebodings of the destiny of the world. The idea of victory is lost in that of revenge. Future blessedness is reserved only for "a very few" (vii, 70; viii, 1, 3, 52-55; vii, 1-13). The great question is "not how the ungodly shall be punished, but how the righteous shall be saved, for whom the world is created" (ix, 13). The "woes of Messiah" are described with a terrible minuteness which approaches the despairing traditions of the Talmud (v; xiv, 10 sq.; ix, 3 sq.); and after a reign of 400 years (vii, 28-35); the clause is wanting in Eth., v, 29), "Christ," it is said, "my Son, shall die (Arab. omits), and all men that have breath; and the world shall be turned into the old silence seven days, like as in the first beginning, and no man shall remain" (vii, 29). Then shall follow the resurrection and the judgment, "the end of this time and the beginning of immortality" (vii, 43). In other points the doctrine of the book offers curious approximations to that of Paul, as the imagery does to that of the Apocalypse (e. g. 2 Esdr. xiii, 43 sq.; v, 4). The relation of "the first Adam" to his sinful posterity, and the operation of the law (iii, 20 sq.; vii, 48; ix, 36); the transitoriness of the world (iv, 26); the eternal counsels of God (vi, sq.); his providence (vii, 11) and long-suffering (vii, 64); his sanctification of his people "from the beginning" (ix, 8), and their peculiar and lasting privileges (vi, 59), are plainly stated; and, on the other hand, the efficacy of good works (viii, 33), in conjunction with faith (ix, 7), is no less clearly affirmed.

III. *Unity and Original Language.*—For a long time this book of Ezra was known only by an old Latin version, which is preserved in some MSS. of the Vulgate. This version was used by Ambrose, and, like the other parts of the *Vetus Latina*, is probably older than the time of Tertullian. It is published in Walton's *Polyglot*, vol. iv. An Arabic text was discovered by Mr. Gregory, about the middle of the 17th century, in two Bodleian MSS., and an English version made from this by Simon Ockley was inserted by Whiston in the last volume of his *Primitive Christianity* (London, 1711). Fabricius added the various readings of the Arabic text to his edition of the Latin in 1723 (*Cod. Pseudep.* V. T. ii, 174 sq.). An Ethiopic text was published by [archbishop] Laurence, with English and Latin translations (*Primi Esrae libri, versio Æthiopica . . . Latine Anglicæque rediita*, Oxon. 1820); likewise from a Bodleian MS. which had remained wholly disregarded, though quoted by Ludolf in his dictionary. The Latin translation has been reprinted by Gröner, with the various readings of the Latin and Arabic (*Prof. Pseudep.* Stuttg. 1840, p. 66 sq.); but the original Arabic text has not yet been published.

The three versions were all made directly from a Greek text. This is evidently the case with regard to the Latin (Lücke, *Versuch einer vollst. Einleitung*, i, 149) and the Ethiopic (Van der Vliet, *Disputatio critica de Ezrae lib. apocr.* p. 75 sq.), and apparently so with regard to the Arabic. A clear trace of a Greek text occurs in the Epistle of Barnabas (c. xii=2 Ezra v, 5), but the other supposed references in the apostolic fathers are very uncertain (e. g. Clem. i, 20; Herm. *Past.* i, 1, 3, etc.). The next witness to the Greek text is Clement of Alexandria, who expressly quotes the book as the work of "the prophet Ezra" (*Strom.* iii, 16, § 100). A question, however, has been raised whether the Greek text was not itself a translation from the Hebrew (Bretschneider, in Henke's *Mus.* iii, 478 sq., ap. Lücke *l. c.*); but the arguments from language, by which the hypothesis of a Hebrew (Aramaic) original is supported, are wholly unsatisfactory; and, in default of direct evidence to the contrary, it must be supposed that the book was composed in Greek. This conclusion is farther strengthened by its internal character, which points to Egypt as the place of its composition.

The idea of a Hebrew original has now been pretty generally given up by scholars, despite the positive assertion of Galatinus (*De Arcanis Catholice Veritatis*) that a copy of it was reported to exist among the Jews at Constantinople in his day, and it is commonly believed that it was written in Greek. Although the Greek is lost, yet there can be no doubt that the *Old Latin* version, through which alone this book has been known to us till lately, was a translation from that language. This is evident from the fact that it imitates the Greek idiom in making the adjective in the comparative degree govern a *genitive case*, and not, as in Latin, an *ablative*, and introduces other Græcisms, which are barbarous, in the version (comp. ii, 24; v, 13, 26, 39; vi, 25, 31, 46, 57; vii, 5; viii, 7, 8, 38, 44; ix, 14; xi, 42). This is, moreover, corroborated by the Arabic and Ethiopic versions, as well as the quotation from this book in the fathers (see below, sect. v), which prove the very early existence of it in Greek. It is, however, equally certain that many of the things contained in this book are of Palestinian origin, and are still to be found in Hebrew or Aramaic dispersed through the Talmud and Midrashim.

The common Latin text, which is followed in the English version, contains two important interpolations (ch. i, ii; xv, xvi) which are not found in the Arabic and Ethiopic versions, and are separated from the genuine Apocalypse in the best Latin MSS. Both of these passages are evidently of Christian origin: they contain traces of the use of the Christian Scriptures (e. g. i, 30, 33, 37; ii, 13, 26, 45 sq.; xv, 8, 35; xvi, 54), and still more they are pervaded by an anti-Jewish spirit. Thus, in the opening chapter, Ezra is commanded to reprove the people of Israel for their continual rebellions (i, 1-23), in consequence of which God threatens to cast them off (i, 24-32), and to "give their houses to a people that shall come." But, in spite of their desertion, God offers once more to receive them (ii, 1-32). The offer is rejected (ii, 33), and the heathen are called. Then Ezra sees "the Son of God" standing in the midst of a great multitude "wearing crowns and bearing palms in their hands" in token of their victorious confession of the truth. The last two chapters (xv, xvi) are different in character. They contain a stern prophecy of the woes which shall come upon Egypt, Babylon, Aria, and Syria, and upon the whole earth, with an exhortation to the chosen to guard their faith in the midst of all the trials with which they shall be visited (? the Decian persecution; comp. Lücke, p. 186 sq.). Another smaller interpolation occurs in the Latin version in vii, 28, where *filius meus Jesus* answers to "*My Messiah*" in the Ethiopic, and to "*My Son Messiah*" in the Arabic (comp. Lücke, p. 170, n., sq.). On the other hand, a long passage oc-

curs in the Ethiopic and Arabic versions after vii, 35 which is not found in the Latin (Ethiopic, c. vi), though it bears all the marks of genuineness, and was known to Ambrose (*De bono mort.* x, xi). In this case the omission was probably due to dogmatic causes. The chapter contains a strange description of the intermediate state of souls, and ends with a peremptory denial of the efficacy of human intercession after death. Vigilantius appealed to the passage in support of his views, and called down upon himself by this the severe reproof of Jerome (*Lib. c. Vigil.* c. 7). This circumstance, combined with the Jewish complexion of the narrative, may have led to its rejection in later times (comp. Lücke, p. 155 sq.).

Despite the arbitrary division into chapters in our English version which sometimes interrupts a vision in the middle of a sentence, few readers will fail to see the intimate connection and the beautiful adjustment of these angelic revelations, and how every one of them forms an essential part in leading us farther and farther till we reach the climax of the apocalypse. It is owing to this remarkable unity which the whole work displays that the numerous interpolations made for dogmatic purposes have so easily been detected.

IV. *Author and Date.*—The greatest divergency of opinion prevails on this subject. The author has successively been described as a true prophet who lived B.C. 336; an impostor who flourished A.D. 160; a Jew, a Christian, a converted Jew, and as a Montanist. The whole complexion of the book, however, incontestably shows that the author of it was a Jew. His personating Ezra, the contempt and vengeance which he breathes against the Gentiles (vi, 50, 57), the intense love he manifests for the Jews, who alone know the Lord and keep his precepts (iii, 30-36), declaring that for them alone was this world created (iv, 63, 66; vi, 55, 59; vii, 10, 11), and reserving all the blessings of salvation for them (vii, 1-13); his view of righteousness, which consists in doing the works of the law, and that the righteous are justified and rewarded for their good works (viii, 33, 36); the purport of his questions, referring exclusively to the interests of this people (iv, 35; vi, 59); the Hagadic legends about the Behemoth and Leviathan which are reserved for the great Messianic feast (vi, 49-52); the ten tribes (xiii, 39-47); the restoration of the Scriptures and the writing of cabalistic books for the sages or rabbins of Israel (xiv, 20-22, 37-47)—all this proves beyond doubt that the writer was a thorough Hebrew. Chapters i, ii, xv, and xvi, which contain allusions to the N. T. (compare i, 30 with Matt. xxxiii, 37-39; ii, 11 with Luke xvi, 9; ii, 12 with Rev. xxii, 2; xv, 8 with Rev. vi, 10; xvi, 29 with Matt. xxiv, 10; xvi, 42-44 with I Cor. vii, 29), and especially the anti-Jewish spirit by which they are pervaded, as well as the name of *Jesus* in ch. viii, 28, which have been the cause why some have maintained that this book is the production of a Christian, are now generally acknowledged to be later interpolations made by some Christian. (See above, sect. iii.)

As to the *date* of the book, the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke (*Versuch einer vollst. Einl.* etc., ed. 2, i, 209) places it in the time of Cæsar; Van der Vliet (*Disput. crit.* l. c.) shortly after the death of Cæsar. Laurence (*l. c.*) brings it down somewhat lower, to B.C. 28-25, and Hilgenfeld (*Jud. Apokr.* p. 221) agrees with this conclusion, though he arrives at it by very different reasoning. On the other hand, Gröner (*Jahrb. d. Heils.* i, 69 sq.) assigns the book to the time of Domitian, and in this he is followed by Wieseler and by Bauer (Lücke, p. 189 sq.), while Lücke, in his first edition, had regarded it as the work of a Hellenist of the time of Trajan. The interpretation of the details of the vision of the eagle, which furnishes the chief data for determining the time of its composition, is extremely uncertain, from the difficulty of regarding the

history of the period from the point of view of the author; and this difficulty is increased by the allusion to the desolation of Jerusalem, which may be merely suggested by the circumstances of Ezra, the imaginary author; or, on the contrary, the last destruction of Jerusalem may have suggested Ezra as the medium of the new revelation. (Comp. Fabricius, *Cod. Pseudep.* ii, p. 189 sq., and Lücke, p. 187, n., sq., for a summary of the earlier opinions on the composition of the book.) But no two expositors agree in their explanation of the vision in ch. xi and xii, and every one finds in the "three heads," the "twelve feathered wings," and the "eight counter-feathers" such emperors, kings, and demagogues as will square with his preconceived notions as to what they shall describe. So, for instance, the learned Whiston makes the three heads to mean the kingdom of France since Francis the Great, A.D. 1515; of Spain since Ferdinand, the author of the Inquisition, A.D. 1468; and the house of Austria since the emperor Albert, A.D. 1438—all of whom persecuted the Protestants (*Authen. Records*, i, 81). The safest and most satisfactory data for determining its age are—1. The quotations from it in the epistle of St. Barnabas (ch. xii with 2 Ezra v, 3) and in Clemens Alexandrinus (*Strom.* iii, 16), showing beyond doubt that the book was well known at the commencement of the Christian æra, and must therefore have been written some time before to have obtained such general currency and acceptance; and, 2. The minute description which the writer gives of the pre-existence and death of the Messiah (vii, 29; xiv, 7), such as no Jew would have given at the very outset of Christianity, to which we have traced the book, when these very points were the stumbling-block to the ancient people, and formed the points of contest between Judaism and Christianity, thus showing that it must have been written before Christ. We may therefore safely assign it to about B.C. 50.

But, while the date of the book must be left undetermined, there can be no doubt that it is a genuine product of Jewish thought. Weisse (*Evangelienfrage*, p. 222) alone dissents on this point from the unanimous judgment of recent scholars (Hilgenfeld, p. 190 sq.); and the contrast between the tone and style of the Christian interpolations and the remainder of the book is in itself sufficient to prove the fact. The Apocalypse was probably written in Egypt; the opening and closing chapters certainly were.

V. *Canonicity and Importance.*—By many of the fathers this book was undoubtedly regarded as canonical. The quotation from it in the epistle of Barnabas is described as the saying of a prophet (ch. xii); the quotation by Clemens Alexandrinus is introduced in the same manner ("Ἐσδρας ὁ προφήτης λέγει, *Strom.* iii, 16); and Ambrose speaks of it as containing *divine revelations* (*De Bono Mortis*, x, xi). The famous story about Ezra being inspired to write again the law, which was burned (xiv, 20-48), has been quoted by Irenæus (*adv. Hæc.* iii, 21, 2); Tertullian (*De Cult. fem.* i, 3); Clemens Alexandrinus (*Stromat.* i, 22); Chrysostom (*Homil.* viii in *Heb.*), and many others. The Ethiopian Church regards it as canonical, which may be seen from the manner in which it is alluded to in the Book of Devotions called "The Organon of the blessed Virgin Mary" (written in A.D. 1240), "Open my mouth to praise the virginity of the mother of God, as thou didst open the mouth of Ezra, who rested not for forty days until he had finished writing the words of the law and the prophets, which Nebuchadnezzar, king of Babylon, had burnt" (*Prayer for Monday*; see also *Prayer for Tuesday*). St. Jerome was the first who denounced it. In reply to Vigilantius, who, regarding this book as inspired, appealed to xii, 36-45, to prove that "none would venture to intercede for others in the day of judgment," this father, playing upon the name Vigilantius, remarked, "Tu vigilans dormis, et dormiens scribis, et propinas mihi li-

brum apocryphum, qui sub nomine Esdræ a te et similibus tui legitur, ubi scriptum est, quod post mortem nullus pro aliis gaudeat deprecari, quem ego Iulium nunquam legi, quid enim necesse est in manus sumere, quod Ecclesia non recipit. Nisi forte Balsamum et Barbelum, et thesaurum Manichæi, et ridiculum nomen Leusiboræ proferas; et quia radices Pyrenæi habitus, vicinusque es Hiberiæ, Basilidis, antiquissimi hæretici, et imperitiæ scientiæ incredibilia portentosa prosequeris, et proponis, quoad totius orlīs auctoritate damnatur" (*Ep.* liii ad *Vigilant.*). This is a most important passage, inasmuch as it shows that those of the primitive Church who, from their knowledge of Hebrew, had the best means of ascertaining what were the canonical Scriptures of the ancient synagogue, repudiated this book as uncanonical. In the Council of Trent, the second Ezra, like the first, was excluded from the canon, and Luther denounced it as worse than Æsop's Fables. See *ESDRAS, FIRST BOOK OF*. But this is going too far. Historic-critical expositors of the Bible, and those who are engaged in Christological works, while regarding 2 Esdras as not belonging to the Canon, yet see in it a most important record of Jewish opinion on some vital points. It shows that the Jews, before the rise of Christianity, most distinctly believed in the immortality of the soul, that the Messiah was denominated the *Son of God*, that he existed in heaven previous to his appearance upon earth (xiv, 7), and that he was to die (vii, 29).

One tradition which the book contains obtained a wide reception in early times, and served as a pendant to the legend of the origin of the Septuagint. Ezra, it is said, in answer to his prayer that he might be inspired to write again all the law which was burnt, received a command to take with him tablets and five men, and retire for forty days. In this retirement a cup was given him to drink, and forthwith his understanding was quickened and his memory strengthened; and for forty days and forty nights he dictated to his scribes, who wrote ninety-four books (*Latin*, 204), of which twenty-four were delivered to the people in place of the books which were lost (xiv, 20-48). This strange story was repeated in various forms by Irenæus (*adv. Hæc.* iii, 21, 2), Tertullian (*De cult. fam.* i, 3, "Omne instrumentum Judaicæ literaturæ per Esdram constat restauratum"), Clement of Alexandria (*Strom.* i, 22, p. 410, P.; compare p. 592), Jerome (*adv. Hæc.* 7; comp. Pseudo-Augustine, *De Mirab. S. Scr.* ii, 32), and many others; and probably owed its origin to the tradition which regarded Ezra as the representative of the men of "the Great Synagogue" (q. v.), to whom the final revision of the canonical books was universally assigned in early times. See *CANON*.

Although Esdras is included in the 6th article of the Church of England, among the other books read for edification, etc. [see *DETEREO-CANONICAL*], it will be observed that no lessons are taken from it in the offices of the Church of England. References are, however, made from it in the Authorized Version to parallel passages in the Old and New Testament. Grabe and others have conceived that this was the book cited as the "Wisdom of God" (Luke xi, 9; comp. with 4 Esdras i, 32).

VI. *Literature.*—Lee, *Dissertation upon the second Book of Esdras* (Lond. 1722); Whiston, *Authentic Records* (Lond. 1727), i, 44 sq.; Van der Vliet, *Disputatio Critica de Ezræ Libro Apocrypho* (Amst. 1839); Gröber, *Das Jahrhundert des Heils* (Stuttgart, 1838), i, C9 sq., and *Prophecia veteres Pseudepigraphi* (Stuttgart, 1840), p. 66 sq.; Lücke, *Einkleitung in d. Offenbarung Johannis*, 2d ed., p. 138 sq.; Davidson, *The Old Testament Text Considered* (Lond. 1856), p. 90 sq.; Hilgenfeld, *Die jüdische Apokalyptik* (Jena, 1857), p. 187 sq.; Volkmar, *Das vierte-Buch Ezra* (Zurich, 1858); Keil, *Einkleitung in d. Alte Testament* (1859, 1863), p. 734 sq.; Treseureuter, *De libro quarto Esdræ* (Cobl. 1742); Vogel, *De quarto libro Esdræ* (in his *Progr. de Conjectura usu*

in *crisi* N. T. p. 48 sq.); Ewald, *Das vierte Esrabuch* (Gött. 1864); Calmet, *Sur le quatrième livre d'Esdras* (in his *Commentaire*, iii, 253 sq.); Greswell, *Second Book of Esdras* (in his *Parables*, V, ii, 280 sq.). The book has been the subject of a prolonged discussion, especially by Hilgenfeld in the *Zeitschr. f. wiss. Theol.* 1858-67.—Kitto, s. v.; Smith, s. v.

**Es'ebon**, THEY of (οἱ Ἐσεβωνῖται v. r. οἱ Ἐσεβών, Vulg. *Hesebon*), a Græcized form of the name of certain Canaanites beyond Jordan referred to in the Apocrypha (Jud. v, 15) as having been destroyed by the Israelites; evidently the inhabitants of HESUBON (q. v.) of the O. T. (Num. xxi, 26).

**Ese'briasis** (Ἐσεβριας, Vulg. *Sedebias*), the first named of the ten priests separated with ten others by Ezra to transport the silver and gold from Babylon to Jerusalem (1 Esd. viii, 54); evidently the SHEREBIAI (q. v.) of the Heb. text (Ezra viii, 24).

**E'selk** (Heb. *id.* עֶסְלַק, *quarrel*; Sept. and Vulg. translate Ἀδικία, *calumnia*, as if reading עֶסְלַק), a well (עֶסְלַק) containing a spring of water, which the herdsmen of Isaac dug in the valley of Gerar, and which received its name because the herdsmen of Gerar evaded (עֶסְלַק עֶסְלַק, *evangled*, Sept. ἠέκισσαν, Vulg. evasively, A. V. "stroke;" but different from the עֶסְלַק of the preceding clause, *μαχίσαντο*, *jurgingum fuit*, "stroke") with him for the possession of it (Gen. xxvi, 20). Isaac seems to have therefore relinquished it. It appears not to have been one of those which Abraham had previously dug (ver. 18); the contest there was a question of *title*, here of *possession*. There are still several wells in this vicinity. See GERAR.

**Esh'baäl** [some *Esh-ba'al*] (Heb. *Eshba'al*, עֶשְׁבַּאֵל, in pause עֶשְׁבַּאֵל, *man of Baal*; Sept. Ἐσαβιάλ v. r. Ἰεβιάλ and Βαάλ, Vulg. *Esbau*), the appropriate name of the fourth son of king Saul, according to the genealogy of 1 Chron. viii, 33 and ix, 39. He is doubtless the same person (see 1 Sam. xxxi, 2, compared with 2 Sam. ii, 8) as ISH-BOSHETHI (q. v.), since it was the practice to change the obnoxious name of *Baal* into *Bosheth* or *Besheth*, as in the case of Jerub-besheth for Jerub-baal, and (in this very genealogy) of Merib-baal for Mephi-bosheth: compare also Ilos. ix, 10, where Bosheth (A. V. "shame") appears to be used as a synonym for Baal. See BAAL.

**Esh'ban** (Heb. *Eshban'*, עֶשְׁבַּנִּי, *man of consideration*; Sept. Ἀσεβάν and Ἐσεβάν v. r. Ἀσεβών, Vulg. *Eseban*), the second named of the four sons of Dishan (Gen. xxxvi, 26, A. V. "Dishon") or Dishon (1 Chron. i, 41), the son of Seir the Horite. B. C. post 1963.

**Esh'ool** (Heb. *Eshkol'*, עֶשְׁכֹּל, [twice plenē עֶשְׁכֹּל, Num. xiii, 24; xxxiii, 9], a *bunch of grapes*), the name of a man and also of a place.

1. (Sept. Ἐσχῶλ, Josephus Ἐσχῶλης, Vulg. *Eschol*) A young Amoritish chieftain, who, with his brothers Mamre and Aner, being in alliance with Abraham, when the latter resided near Hebron, joined him in the recovery of Lot from the hands of Chedorlaomer and his confederates (Gen. xiv, 13, 24; comp. xiii, 18). B. C. cir. 2085. According to Josephus (*Ant.* i, 10, 2) he was the foremost of the three brothers, but the Bible narrative leaves this quite uncertain (comp. ver. 13 with 24). Some have thought that the name of Eschol remained attached to one of the fruitful valleys in that district till the arrival of the Israelites (Num. xiii, 24), who then interpreted the appellation as significant of the gigantic "cluster" (in Hebr. *eshkol*) which they obtained there; but this does not accord with the independent origin of the latter name as assigned in the narrative (see below).

2. A *wady* (עֶשְׁכֹּל, winter-torrent; Sept. and Vulg. [translating likewise the name itself] φάραξ βότρωος, *vallis botri*, or [Num. xiii, 24] *Nehescol*; A. V. "brook"

and "valley") in which the Hebrew spies obtained the fine cluster of grapes which they took back with them, borne "on a staff between two," as a specimen of the fruits of the Promised Land (Num. xiii, 24). The cluster was doubtless large; but the fact that it was carried in this manner does not, as usually understood, imply that the bunch was as much as two men could carry, seeing that it was probably so carried to prevent its being bruised in the journey. See GRAPE. From the fact that the name had existed in this neighborhood centuries before, when Abraham lived there with the chiefs Aner, Eschol, and Mamre, not Hebrews, but Amorites (see Gen. xiv, 13), many have supposed that the appellation in this instance ("because of the cluster," עֶשְׁכֹּל, Sept. βότρωος, Vulg. *torrens botri*) was merely the Hebrew way of appropriating the ancient name derived from that hero into the language of the conquerors, consistently with the paronomastic turns so much in favor at that time, and with a practice traces of which are deemed to appear elsewhere; but it is more probable that the same reason which led the Israelites to apply to the valley such a designation, had operated also among the original possessors of the soil. In that case the Amoritish chieftain may have been so called (that dialect being doubtless akin to the Heb.) from his fertile region. From the terms of two of the notices of this transaction (Num. xxxii, 9; Deut. i, 24), it might be inferred that Eschol was the farthest point to which the spies penetrated; but this would contradict the express statement of Num. xiii, 21, that they went as far northward as Rehob. They must, therefore, either have carried the bunch of grapes this whole distance and back, or, as is more likely, they cut it on their return. From the context (Num. xiii, 22), the valley in question seems to have been in the vicinity of Hebron. Accordingly, the valley through which lies the commencement of the road from Hebron to Jerusalem is traditionally indicated as that of Eschol. This valley is now full of vineyards and olive-yards, the former chiefly in the valley itself, the latter up the sides of the inclosing hills. "These vineyards are still very fine, and produce the finest and largest grapes in all the country" (Robinson, *Researches*, i, 317). Ensebius, however (*Onomast.* s. v. φάραξ βότρωος), places it, with some hesitation, at Gophna, 15 miles north of Jerusalem, on the Neapolis road. By Jerome it is given as north of Hebron, on the road to Bethsur (*Epitaph. Paulæ*). The Jewish traveller Ha-Parchi speaks of it as north of the mountain which in the (ancient) city of Hebron stood (Benjamin of Tudela, ed. Asher, ii, 437); and here the name has apparently been observed still attached to a spring of remarkably fine water called *Ain-Eskali*, in a valley which crosses the vale of Hebron north-east and south-west, and about two miles north of the town (Van de Velde, *Narrative*, ii, 64). Dr. Rosen, however, still more recently, writes the name as *Ain el-Rashkula* (*Zeitschr. d. morgenl. Gesellsch.* 1858, p. 481).

**Esh'eän** [some *E'sheän'*] (Heb. *Esh'eän'*, עֶשְׁעָן, a *prop*; Sept. Ἐσάν v. r. Σοτά, Vulg. *Esam*), a city in the mountains of Judah, mentioned between Dumah and Janum (Josh. xv, 52), situated in the group west by south of Hebron (Keil, *Comment.* in loc.). Van de Velde thinks (*Memoir*, p. 310, 311) the place may be the same as Ashan (q. v.); but this is inadmissible, partly because of the difference in the name (עֶשְׁעָן), and partly because the only Ashan mentioned in Scripture lay in the low country (Josh. xv, 42; comp. ver. 33), while Eshean is expressly placed in the hill country of Judah (ver. 48, 52). To escape this last and fatal objection, Van de Velde follows Von Raumer (*Paläst.* p. 173) in supposing two Ashans, one in the mountains of Judah, and the other in the southern plain of Palestine, belonging to Simeon; but that the Ashan of Judah and that of Simeon were one and the same, is evident from comparing Josh. xv, 42 and xix, 9, where

Ether appears as in the vicinity of both, and Josh. xix, 7 with 1 Chron. iv, 32, where the same is the case with Ain-Rimmon. Still, although Eshek cannot thus be identified with the Chor-ashan of 1 Sam. xxx, 30, we may perhaps adopt Van de Velde's location of the former at the ruins of *Khursa* (Robinson's *Researches*, iii, Append. p. 116), not far south-west of Hebron (Stewart, *Tent*, p. 224).

**E'shek** (Heb. *id.* עֶשֶׁק, *oppression*; Sept. Ἐσεῖς v. r. Ἀσιή, Vulg. *Esec*), brother of Azel (q. v.), a Benjamite, one of the late descendants of king Saul; he was the father of several sons, among them Ulam, the founder of a large and noted family of archers, lit. "treaders of the bow" (1 Chron. viii, 39). B. C. ante 588. They are omitted in the parallel list of 1 Chron. ix, 35-41.

**Eshel**. See TAMARISK.

**Esh'kalonite** (Heb. collect. with the art. *ha-Eshkeloni*, הַיִּשְׁכָּלוֹנִי, Sept. ὁ Ἀσκαλωνίτης, Vulg. *Ascalonite*, A. V. "the Eshkalonites"), the patrial designation (Josh. xiii, 3) of the inhabitants of ASHKELON (q. v.).

**Esh'ta'öl** (Heb. *Eshtaol*, הֶשְׁתָּאֹל [but defectively הֶשְׁתָּאֹל in Judg. xiii, 25; xviii, 2, 8, 11], according to Fürst, narrow *pass*, but Gesenius suggests perhaps *petition*; Sept. Ἀσθαὸλ v. r. [in Judg. xiii, 5] Ἐσθαὸλ, Vulg. *Ethaol* or [in Josh. xv, 33] *Estaub*), a town in the low country of Judah, the Shephelah or plain of Philistia. It is the first of the first group of cities in that district (Josh. xv, 33) enumerated with Zorah (Heb. *Zareah*), or Zorah, in company with which it is commonly mentioned. Zorah and Eshtaol were two of the towns allotted to the tribe of Dan out of Judah (Josh. xix, 41). Between them, and behind Kirjath-jearim, was situated Mahaneh-Dan, the camp or stronghold which formed the head-quarters of that little community during their constant encounters with the Philistines. Eshtaol was one of the great strongholds of the Danites, and its inhabitants, with those of Zorah, were noted for their daring. See DAN. The 600 men who captured and colonized Laish were natives of these two towns (Judg. xvii). Here, among the old warriors of the tribe, Samson spent his boyhood, and experienced the first impulses of the Spirit of Jehovah; and hither, after his last exploit, his mangled body was brought, up the long slopes of the western hills to its last rest in the burying-place of Manoah his father (Judg. xiii, 25; xvi, 31; xviii, 2, 8, 11, 12). In the genealogical records of 1 Chron. the relationship between Eshtaol, Zareah, and Kirjath-jearim is still maintained (1 Chron. ii, 53). In the *Onomasticon* of Eusebius and Jerome (s. v. Ἀσθαὸλ and Ἐσθαὸλ), Eshtaol is twice mentioned—(1) as *Estaal* of Judah, described as then existing between Azetuz and Ascalon under the name of *Astho* (Ἀσθῶ); (2) as *Esthaol* of Dan, ten miles north of Eleutheropolis. The latter position is quite in accordance with the indications of the Bible. It is connected with Zorah, Zanoah, and Bethshemesh (Josh. xv, 33; xix, 41); and as these three places have been identified, we may conclude that Eshtaol was situated close to the foot of the mountains of Judah, and in or near wady Surâr. Schwarz (*Palst.* p. 102) mentions a village named *Staal*, west of Zorah, but, apart from the fact that this is corroborated by no other traveller and by no map, the situation is too far west to be "behind Kirjath-jearim" if the latter be Kuryet el-Enab. The village marked on the maps of Robinson and Van de Velde, as *Yeshua*, and alluded to by the former (*Researches*, new ed., iii, 154, who states that the name is pronounced *Eshua*), is nearer the requisite position. Yeshua lies at the eastern extremity of the broad valley which runs up among the hills between Zorah and Bethshemesh. The mountains rise steep and rugged immediately behind it, but the village is encompassed

by fruitful fields and orchards. Zorah occupies the top of a conical hill scarcely two miles westward, and a lower ridge connects the hill with the mountains at Yeshua. Upon that ridge the permanent camp, or gathering-place of Dan (Judg. xiii, 25) was probably fixed (Robinson, *Later Res.* p. 153 sq.).—Kitto, s. v.; Smith, s. v. See MAHANEH-DAN.

**Esh'taülite** [many *Esh'taülite*] (Heb. collect. with the art. *ha-Esh'taül*, הַיִּשְׁתָּאֻלִּי, Sept. οἱ Ἐσθαυαλιῶται v. r. υἱοὶ Ἐσθαύου, Vulg. *Esh'taülite*, A. V. "the Eshtaülites"), the designation of the inhabitants of ESHTAOL (q. v.), who, with the Zareathites, were at a later period among the families of Kirjath-jearim (1 Chron. ii, 53).

**Eshtemo'ä** [many *Eshtem'öä*] (Heb. *Eshtemo'ä*, הֶשְׁתֵּמוֹאִי [but defectively הֶשְׁתֵּמוֹאִי in 1 Chron.], *obedience*; Sept. in Josh. xxi, 14 Ἐσθεμόω, in 1 Sam. Ἐσθεμόω, in 1 Chron. iv, 17, 19 Ἐσθαμόων v. r. Ἐσθεμόων and Ἐσθεμόων, in 1 Chron. vi, 57 [42] Ἐσθαμόω v. r. Ἐσθαμόω; Vulg. *Eshtemo*, but *Estemo* in Josh., and *Eshtemo* in 1 Chron. vi) or **Esh'temoh** (Heb. *Esh'temoh*, הֶשְׁתֵּמוֹה, by an interchange of final gutturals, Josh. xv, 50; Sept. Ἐσθεμόω, Vulg. *Istemo*), a town of Judah, in the mountains; mentioned between Jattir and Holon (Josh. xxi, 14; 1 Chron. vi, 57), and between Anab and Anim (Josh. xv, 50). With its "suburbs" Eshtemoa was allotted to the priests (Josh. xxi, 14; 1 Chron. vi, 57). It was one of the places frequented by David and his followers during the long period of their wanderings; and to his friends there he sent presents of the spoil of the Amalekites (1 Sam. xxx, 28; comp. ver. 31). In the lists—half genealogical, half topographical—of the descendants of Judah, Eshtemoa occurs as having been founded or rebuilt by an Ezrahite called Ishbah (1 Chron. iv, 17) (q. v.), perhaps the same with Naham of ver. 19 [see MERED], where the place has the dubious epithet of "Maachathite" (q. v.). Others, however, regard the Eshtemoa there named as a *person* from Maachah. Eusebius and Jerome simply mention the place as "a very large village" in the Daroma, in the province of Eleutheropolis (*Onomast.* s. v. Ἐσθεμόω, Eshtemo). There is little doubt that it has been discovered by Dr. Robinson at *Senu'a*, a village seven or eight miles south of Hebron, on the great road from el-Milh, containing considerable ancient remains, and in the neighborhood of other villages still bearing the names of its companions in the list of Josh. xv: Debir, Socoh, Jattir, etc., and at the last inhabited place toward the desert (*Researches*, ii, 194; comp. Schwarz, *Palst.* p. 105). It is a considerable village, situated on a low hill, with broad valleys round about; not susceptible of much tillage, but full of flocks and herds all in fine order. In several places there are remains of walls built of very large stones, bevelled, but left rough in the middle, several of them more than ten feet in length. There are the ruins of a castle at this place, with one tower tolerably perfect, but it is probably of Saracenic origin (Robinson, *Researches*, ii, 627; Wilson, *Lands of Bible*, i, 355). A city Shema is also mentioned in the south of Judah (Josh. xv, 26); too far south, however, to correspond to Senua.

**Es'hton** (Heb. *Eshton*, הֶשְׁתֹּן, according to Gesenius *uvorius*, according to Fürst *careless*; Sept. Ἀσασθῶν, Vulg. *Eshton*), a son of Mehir, and grandson of Chelub, of the tribe of Judah (1 Chron. iv, 11). B. C. ante 1618. Among his four sons and one grandson enumerated (ver. 12) as "the men of Reeah," two (Beth-rapha and Ir-nahash) seem, however, to be rather names of places.

**Eskridge**, VERNON, a minister of the Methodist Episcopal Church (South), was born in Westmoreland County, Va., Oct. 26, 1803. His early education was neglected, and on this account he hesitated to enter the ministry, to which he felt strong leanings; but on

the death of his young wife and child he hesitated no longer, and in 1827 he began to preach as an itinerant minister. In this service he labored faithfully until 1837, when ill health compelled him to retire from the itineracy, though he still preached diligently as his health would allow. In 1851 he was appointed chaplain in the U. S. Navy, and during his service in the Cumberland in 1852 some twenty were converted, including captain Upshur. On his return to Portsmouth, Va., the yellow fever was raging there. He devoted himself night and day to the service of the sick, and on Sept. 4, 1855, he was taken with the disease, and died Sept. 11.—Sprague, *Annals*, vii, 735.

**Es'li** (Εσλί v. r. Έσλει), son of Naggai and father of Naum, of the maternal ancestors of Christ after the exile (Luke iii, 25); apparently identical with ELIOENAI, the son of Meariah and father of Johanan (1 Chron. iii, 23, 24). See GENEALOGY (OF CHRIST).

**Esné, Esna, or Esneh**, "the hieroglyphic *Sen*, and the Greek *Latopolis* or *Λαττόπολις*—the city of the latus fish or *Latus nobilis*, from the fish there worshipped—is a small and badly-built town of Upper Egypt, and is situated on the left bank of the Nile, in lat. 25° 15' N. The central portion of Esne has edifices of colored brick. It contains about 4000 inhabitants, of whom 1500 are Copts, and has some manufactories of blue cotton and pottery. There are famous ruins at Esne, which consist of a sandstone temple, with a portico of four rows of six columns, which appears to have been founded by Thothmes III, whose name is seen on the jambs of a door. The temple, however, seems to have been restored or principally constructed by Ptolemy Euergetes (B.C. 216–222), and the pronaos was erected in the reign of the emperor Claudius (A.D. 41–54), and completed in that of Vespasian. The interior is of the date of Trajan, the Antonines, and Geta, whose name, erased or replaced by that of Caracalla, is there found. The great temple was dedicated to Chnumis, Satis, and Har-Hek. It has a zodiac like that of Denderah, formerly thought to be of the most remote antiquity, but now known to be no older than the Romans. A smaller temple with a zodiac, erected in the reign of Ptolemy Euergetes, formerly stood at E'Deyr, 2½ miles north of Esne, but it has been destroyed. At Esne is also a stone quay, bearing the names of M. Aurelius. This city was the capital of a nome, and the coins struck in it in the reign of Hadrian (A.D. 127–128) represent the fish latus. See Champollion, *Not. Descrip.* p. 283; Wilkinson, *Mod. Egypt.* ii, 268; Tochon d'Anneey, *Médailles*.—Chambers, *Encyclopædia*, s. v.

**Esnig** (or **ESNAG, EZNIG, EZNAG**), one of the most prominent men of the Armenian Church. He was born in 397, at Gochp or Golp, a place near Mount Ararat, and was one of the pupils of the patriarch Isaak and of Saint Mesrop. As he was acquainted with the Syrian language, he was sent in 425, together with Joseph of Palin, to Edessa, in order to translate the writings of the Syrian Church fathers into Armenian. After finishing this work they went to Constantinople, learned the Greek language, and began the translation of Greek works. On returning home in 431 they took with them many writings of Greek fathers, the acts of the synods of Nice and Ephesus, and a correct copy of the Alexandrine version. From the latter the Armenian version of the Bible, in which Esnig co-operated, was made. Many other theological works were translated by him, and he is one of the six learned Armenians to whom the honorary title "Targmanitschk" (translators) was given. In 449 Esnig was present at the national synod of Artachad, which replied to the Persian king's demand upon the Armenians to embrace the doctrine of Zoroaster. He died about 478, as bishop of Bagrewand. Besides the numerous translations of foreign works, Esnig wrote an original work against heresies. It is divided

into four books, of which the first is directed against the pagans, the second against the Parsees, the third against the Greek philosophers, and the fourth against the Marcionites and Manichaans. This work contains some valuable information on the Parsees and on the system of Marcion which is not known from any other source. It has been published at Smyrna (1762) and at Venice (1826), and a French translation has appeared by Le Vaillant de Florival (*Revue des différentes Sectes des païens*, Paris, 1853. Parts of it have been translated into German by Neumann (in *Hermes*, vol. xxxiii, and in *Zeitschrift für histor. Theolog.* 1834) and by Dr. Windischmann (*Bayrische Annalen*, 1834), and into Latin by Dr. Petermann (in his *grammat. ling. Armen.* p. 44–48). A Latin translation of the whole work was promised by the distinguished Orientalist, Dr. Windischmann, but it has never appeared. An appendix to the Venice edition contains a "collection of sentences drawn from the Greek fathers, and in particular from St. Nilus." In point of style, Esnig is counted among the classics of Armenian literature.—Herzog, *Real-Encyclop.* iv, 163; Hofer, *Nouv. Biog. Gén.* xvi, 886; Wetzer u. Welte, *Kirchen-Lex.* iii, 711; Neumann, *Versuch einer Gesch. der armen. Lit.* (Tab. 1841). (A. J. S.)

**Eso'ra** (properly *Ēsōra*, Αἰσωρά, Vulg. omits), a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Judith iv, 4). The name may be the representative of the Hebrew word HAZOR or ZORAH (Simonis, *Onom.* N. T. p. 19). The Syriac reading (*Bethchoron*) suggests BETH-HORON, which is not impossible.

**Esoteric** (Greek ἑσωτερικός), scientific as opposed to popular; applied, especially with regard to the ancient mysteries, to doctrines taught only to the initiated, as distinguished from *exoteric* (ἔξω, without) doctrines, which could be taught to the vulgar and uninitiated. "The philosophy of the Pythagoreans, like that of the other sects, was divided into the *exoteric* and the *esoteric*; the open, taught to all; and the secret, taught to a select number" (Warburton, *Div. Leg.* bk. ii, note B B). "According to Origen, Aulus Gellius, Porphyry, and Jamblichus, the distinction of *esoteric* and *exoteric* among the Pythagoreans was applied to the disciples, according to the degree of initiation to which they had attained, being fully admitted into the society, or being merely postulants (Ritter, *Hist. Philos.*, French transl., i, 248). Plato is said to have had doctrines which he taught publicly to all, and other doctrines which he taught only to a few, in secret. There is no allusion to such a distinction of doctrines in the writings of Plato. Aristotle (*Physica*, iv, 2) speaks of opinions of Plato which were not written. But it does not follow that these were secret. Aristotle himself frequently speaks of some of his writings as *exoteric*, and others as *acroamatic* or *esoteric*. The former treat of the same subjects as the latter, but in a popular and elementary way, while the *esoteric* are more scientific in their form and matter (Ravaisson, *Essai sur la Métaph. d'Aristote*, t. i, c. i; Tucker, *Light of Nature*, vol. ii. ch. ii).—Fleming, *Vocabulary of Philosophy*, s. v.

**Espen, ZEGER BERNHARD VAN**, one of the most celebrated writers on the ecclesiastical law in the 18th century, was born at Louvain July 9, 1646. He studied theology and philosophy at the university of his native city, and after having been ordained priest in 1673, he was two years later made *Doctor Juris* (doctor of law), and appointed professor of canonical law at the *Collegium Adriaticum* at the University. He lived very retired, devoting his whole time to study; but such became soon his reputation that he was consulted by a number of princes, bishops, tribunals, and learned corporations. Many of his opinions, however, particularly on the Congregation of the Index, on dispensations, immunities, exemptions, the royal

placet, and the appeal from the ecclesiastical to civil power, were not favorable to the pretensions of the popes, and in 1704 and 1734 all his works were put on the Index. His defense of the consecration of a Jansenist archbishop at Utrecht caused in 1728 his suspension from all priestly functions, as well as from his chair at the University. All demands made upon him by the archbishop of Malines to revoke his opinions he firmly refused. He fled to Amersfort, a common refuge of Jansenist exiles, where he died Oct. 2, 1728, at the advanced age of 82 years. Van Espen is universally classed among the ablest writers on ecclesiastical law, and even pope Benedict did not withhold a recognition of his ability. The best edition of his works is the one published by Baren (*Jus Ecclesiasticum Universum*, 5 vols. Louvain, 1753-65; also Cologne, 1777, 5 vols.; Mentz, 1791, 3 vols.). An abstract of this work was published by Oberhauser (Augsburg, 1782; Cilli, 1791).—Wetzer u. Welte, *Kirch.-Lex.* iii, 711; Hoefler, *Nouv. Biog. Génér.* xvi, 410; Herzog, *Real-Encycl.* iv, 164; G. du Pac de Bellegarde, *Vie de Van Espen* (Louvain, 1767). (A. J. S.)

**Espousals.** 1. Among the Jews this was the ceremony of betrothing, or coming under obligation for the purpose of marriage, and was a mutual agreement between the parties which usually preceded the marriage some time. The espousals frequently took place years before the parties were married. See BETROTHAL; MARRIAGE.

2. In the early Christian Church espousals differed from marriage. The two terms are in early writers *sponsalia* and *nuptiæ*. Certain preliminaries were necessary before persons could complete a marriage: they consisted in a mutual contract or agreement between the parties concerning their marriage to be performed within a certain limited time, which contract was confirmed by certain gifts or donations, called *arrhæ* or *arrhabones*, the earnest of marriage; as also by a ring, a kiss, a dowry, a writing or instrument of dowry, with a sufficient number of witnesses to attest it. The free consent of parties contracting marriage was declared necessary by the old Roman law, which was confirmed by Diocletian, and inserted by Justinian in his code. When the contract was made, it was usual for the man to bestow presents on the woman: these were sometimes called *sponsalia*, espousals, and sometimes *sponsalitiæ donatiæ*, espousal-gifts, or *arrhæ* and *pignora*, pledges of future marriage, because the giving and receiving them was a confirmation of the contract. These donations were publicly recorded. The ring was then presented to the woman as a further confirmation of the contract, and does not appear to have been given in the actual solemnization of marriage. Bingham, in proof of this, quotes the words of pope Nicholas I, and also refers to Ambrose and Tertullian. The origin of the marriage-ring has been traced to the tenth century, and is supposed to have been introduced in imitation of the ring worn by bishops. Isidorus Hispalensis refers to the marriage-ring in this language: *Quod autem in nuptiis annulus a sponso sponse datur, id fit vel propter mutue dilectionis signum, vel propter id magis, ut hoc pignore corda eorum jungantur; unde et quarto digito annulus inscribitur, ideo quod vena quadam (ut fertur) sanguinis ad cor usque peruenit.* "The reason why a ring is given by the bridegroom to the bride is either as a mark of mutual love, or rather a pledge of the union of their hearts; and the reason for its being placed on the fourth finger is because a certain vein (as it is said) reaches thence to the heart." The kiss was solemnly given, with the joining together of the hands of the betrothed. The dowry settled upon the woman was by a stipulation made in writing, or by public instruments under hand and seal. Chosen witnesses were present, the friends of each party, and their number was generally ten. Occasionally a ministerial benediction was used in espousals as well as in marriage. See MARRIAGE.

—Farrar, *Eccles. Dict.* s. v.; Bingham, *Orig. Eccles.* bk. xxii, ch. iii; Procter, *On Common Prayer*, p. 401.

**Espouse** (properly (אָרָא, *aras*, 2 Sam. iii, 14, to betroth, as elsewhere rendered; *ἡμετέροια*, Matt. i, 18; Luke i, 27; ii, 5; less correctly for הַרְתָּהּ, *chathunnah'*, Cant. iii, 11, *nuptials*; כְּלִינִים, *kelulim*, Jer. ii, 2, the *bridal state*, i. e. condition of a bride before marriage; ἀγοζόμενα, 2 Cor. xi, 2, to *cause to be married*, i. e. negotiate the match). Espousal was a ceremony of betrothing, or coming under obligation for the purpose of marriage, and was a mutual agreement between the two parties which usually preceded the marriage some considerable time. See MARRIAGE. The reader will do well carefully to attend to the distinction between espousals and marriage, as espousals in the East are frequently contracted years before the parties are married, and sometimes in very early youth. This custom is alluded to figuratively, as between God and his people (Jer. ii, 2), to whom he was a husband (xxi, 32), and the apostle says he acted as a kind of assistant (*pro-nuba*) on such an occasion: "I have espoused you to Christ" (2 Cor. xi, 2); have drawn up the writings, settled the agreements, given pledges, etc., of your union (compare Isa. liv, 5; Matt. xxv, 6; Rev. xix). See BETROTH.

**Es'ril** (עֶזְרָא v. r. עֶזְרָא, Vulg. omits), one of the Israelites, "sons of Ozora," who divorced his Gentile wife after the exile (1 Esd. ix, 34); corresponding in position with the SHARAI (q. v.) of the Hebrew text (Ezra x, 40), although the form is confused with that of Azazel = Azareel following it.

**Es'rom** (עֶשְׂרֹם v. r. עֶשְׂרֹן), a Grecized form (Matt. i, 3; Luke iii, 35) of the name of ΗΕΣΡΟΝ (q. v.), the grandson of Judah (1 Chron. ii, 5).

**Ess, Karl van**, a Roman Catholic theologian of Germany, was born at Warburg, in Westphalia, Sept. 25, 1770. He entered the Benedictine order in 1788, and in 1801 became prior of the Abbey of Huysburg, near Halberstadt. Together with his cousin, Leander van Ess (q. v.), he published a German translation of the Bible (Brunswick, 1807, and a great many editions since), which had an immense circulation until it was forbidden by the pope. Being appointed in 1811, by the bishop of Paderborn, episcopal commissary, he abandoned his liberal views. He wrote a brief history of religion (*Entwurf einer kurzen Geschichte der Religion*, Halberstadt, 1817), which called forth several replies. He died Oct. 22, 1824.—Herzog, *Real-Encycl.* xix, 488. (A. J. S.)

**Ess, Leander van**, a Roman Catholic theologian of Germany, and cousin of the preceding one, was born at Warburg, in Westphalia, Feb. 15, 1772. At an early age he entered the Benedictine abbey of Mariemünster, in the diocese of Paderborn. In 1813 he was appointed pastor at Marlburg, and extraordinary professor at the university of that city; and later he also became assistant director of the normal school. No priest in the Roman Catholic Church of the 19th century showed so great a zeal for the circulation of the Bible as Leander van Ess. Aided by his cousin Karl (q. v.), he prepared a German translation of the New Testament, and enlisted the British and Foreign Bible Society in its circulation. A translation of the Old Testament he published in 1819 (Nuremberg). He also published an edition of the Vulgate (1822), and an edition of the Greek New Testament cut from the Vatican manuscript (1824). The pope was highly indignant at his undertaking, and on this occasion issued one of the notorious papal bulls against Bible societies. Karl van Ess timidly receded from his liberal position, but Leander bravely maintained it. He resigned his offices at Marlburg, and devoted his time chiefly to a literary defence of his efforts in circulating the Bible. He compiled, to encourage Roman Catholic readers of the Bible, "a selection from the works of Church fathers and other great Catholic writers concerning the necessary

and useful reading of the Bible" (*Auszüge aus den heil. Vütern*, etc., Leips. 1808); a Latin treatise on the authority of the original text of the Bible as compared with the Vulgate (*Pragmatica doctorum Catholicorum Tridentini circa Vulgatum decreti sensum testamentum historia*, Salzburg, 1816; in German, Tüb. 1824); and several other works, urging a frequent reading of the Bible by the people (*Was war die Bible der ersten Christen?* 1816; *Gedanken über Bibel u. Bibellesen*, 1816; *Die Bible nicht ein Buch nur für Priester*, 1818). He also wrote a book in defence of marriages between Protestants and Roman Catholics (*Rechtfertigung der gemischt. Ehen*, 1821). He died Oct. 13, 1847. His very valuable library, rich in manuscripts and incunables, was purchased by the Union Theological Seminary in New York.—Herzog, *Real-Encycl.* xix, 489. (A. J. S.)

**Essence** (*essentia*, from *essens*, the old participle of *esse*, to be), a term in philosophy corresponding to *οὐσία* in Greek, and sometimes to *nature*, sometimes to *being* or *substance* in English. Augustine (*De Civ. Dei*, xii, 11) derives it as follows: "Sicut ab eo quod est sapere, vocatur sapientia; sic ab eo quod est esse, vocatur essentia." Chauvin (*Lex. Phil.*) gives the definition, "Totum illud per quod res est, et est id quod est." Locke (*Essay*, bk. iii, chap. iii, § 15) says: "Essence may be taken for the very being of anything, whereby it is what it is." Locke distinguishes the *real* and the *nominal essence*. "The nominal essence depends upon the real essence; thus the nominal essence of gold is that complex idea which the word 'gold' represents, viz. 'a body yellow, heavy, malleable, fusible, and fixed; but its real essence is the constitution of its insensible parts, on which these qualities and all its other properties depend, which is wholly unknown to us. The essence of things is made up of that common nature wherein it is founded, and of that distinctive nature by which it is formed. This latter is commonly understood when we speak of the formality, or *formalis ratio* (the formal consideration) of things; and it is looked upon as being more peculiarly the essence of things, though it is certain that a triangle is as truly made up in part of figure, its common nature, as of the three lines and angles which are distinctive and peculiar to it" (Fleming, *Vocab. of Philosophy*, s. v.).

With regard to the Trinity, the Greek writers (Athanasius and others) distinguish *οὐσία* (*essentia*, *substantia*), which denotes what is common to the Father, the Son, and the Holy Spirit, from *ὑπόστασις* (*persona*), which denotes what is individual, distinctive, and peculiar to the three in one. Shedd (*History of Doctrines*, ii, 363) distinguishes the various scholastic terms carefully, and says of *οὐσία*, or *essence*, that it "denotes that which is common to Father, Son, and Spirit. It denominates the substance, or constitutional being of the Deity, which is possessed alike and equally by each of the personal distinctions. The essence is in its own nature one and indivisible, and hence the statement in the creed respecting it affirms simple unity, and warns against separation and division. The terms 'generation' and 'procession' do not apply to it." McOsh discusses the term and its uses in his *Intuitions of the Mind* (1866, 8vo, p. 152).

**Essènes** (Ἐσσηνοί, Josephus generally; *Esseni*, Pliny) or **Ess.EANS** (Ἐσσηαῖοι, Josephus, *War*, i, 3, 5, etc.; Philo), a Jewish sect of mystico-ascetics, which combined foreign elements, especially Oriental and Greek, with Jewish doctrines, and with certain peculiar views and practices of their own. They rejected most of the Jewish sacrifices, and made their fellowship an exclusive one.

**I. Signification of the Name.**—This has been very variously explained, as follows: 1. Philo (*Quod omnis prob. lib.* § 12) derives it from the Greek ἕσος, *holy*. 2. Josephus, according to Jost (*Geschichte d. Juden-thums*, i, 207), seems either to derive it from the Chaldee נְשֻׁתָּי, *to be quiet, to be mysterious*, because he re-

fers נְשֻׁתָּי, *the high-priest's breastplate*, for which the Sept. has λογίον, by ἰσσίην, or directly from נְשֻׁתָּי, in the sense of λογίον or λόγιον, *endowed with the gift of prophecy*. 3. Epiphanius (*Har.* xix) takes it to be the Hebrew נְשֻׁתָּי = שְׁטִיבָאוֹן גְּלוֹר, *the stout race*. 4. Suidas (s. v.) and Hilgenfeld (*Die Jud. Apokal.* p. 278) make it out to be the Aramaic form נְשֻׁתָּי = Ξεωρητικοί, *seers*, and the latter maintains that this name was given to the sect because they pretended to see visions and to prophesy. 5. Josippon ben-Gorion (*lib.* iv, § 6, 7, p. 274 and 278, ed. Breithaupt) takes it for the Heb. נְשֻׁתָּי, *the pious, the puritans*. 6. De Rossi (*Meor Enaim*, c. iii), Gfrörer (*Philo*, ii, 341), Dähne (Erseh und Gruber's *Encyclop.* s. v.), Nork (*Real-Wörterbuch*, s. v.), Herzfeld (*Geschichte d. V. Israel*, ii, 395), and others, insist that it is the Aramaic נְשֻׁתָּי = Ξεραπεινή, *physician*, and that this name was given to them because of the spiritual or physical cures they performed. 7. Aboth R. Nathan (c. xxxvi) and a writer in Jost's *Annalen* (i, 145), derive it from נְשֻׁתָּי, *to do, to perform*; the latter says that it is the Aramaic from נְשֻׁתָּי, and that they were so called because of their endeavors to perform the law. 8. Rappaport (*Erech Millin*, p. 41) says that it is the Greek ἴσος, *an associate, a fellow of the fraternity*. 9. Frankel (*Zeitschrift*, 1846, p. 449 sq.) and others think that it is the Hebrew expression נְשֻׁתָּי, *the retired*. 10. Ewald (*Geschichte d. V. Israel*, iv, 420) is sure that it is the Rabbinic נְשֻׁתָּי, *servant (of God)*, and that the name was given to them because it was their only desire to be ξεραπεινῶν θεοῦ. 11. Grätz (*Geschichte d. Juden*, iii, 525) will have it that it is from the Aramaic נְשֻׁתָּי, *to bathe*, with Aleph prosthetic, and that it is the shorter form for נְשֻׁתָּי נְשֻׁתָּי = נְשֻׁתָּי נְשֻׁתָּי, ἡμεροβαστισαί, *hemerobaptists*, a name given to this sect because they baptized themselves early in the morning. 12. Dr. Löw (*Ben Chananja*, i, 352) never doubts but that they were called *Essenes* after their founder, whose name he tells us was נְשֻׁתָּי, or *Jesse*, the disciple of Joshua b. Perachja. 13. Others, again, say that it alludes to *Jesse*, the father of David. 14. Others, again, submit that it is derived from the town *Essa*, or the place *Vadi Ossis* (compare Ewald, *Geschichte d. V. I.* iv, 420). 15. Dr. Adler (*Volkstheuer*, vi, 56), again, derives it from the Hebrew נְשֻׁתָּי, *to bind together, to associate*, and says that they were called נְשֻׁתָּי, because they united together to keep the law. 16. Dr. Cohn suggests the Chaldee root נְשֻׁתָּי, *to be strong*, and that they were called נְשֻׁתָּי because of their strength of mind to endure sufferings and to subdue their passions (Frankel's *Monatsch.* vii, 272). 17. Oppenheim thinks that it may be the form נְשֻׁתָּי, and stands for נְשֻׁתָּי נְשֻׁתָּי or נְשֻׁתָּי נְשֻׁתָּי, *observers of the laws of purity and holiness* (ib.). 18. Jellinek (*Ben Chananja*, iv, 374), again, derives it from the Hebrew נְשֻׁתָּי, *sinus, περιζώμα*, alluding to the נְשֻׁתָּי mentioned in the Talmud (*Bechoroth*, 30, a), i. e. *the apron which the Essenes wore*. 19. Others, again, derive it from a supposed form נְשֻׁתָּי, in the sense of *pious*, because it connects the Essenes with the *Chasidim*, from which they are thought to have originated. See **ASSIDEANS**.

**II. Tenets and Practices.**—The cardinal doctrine of this sect was the sacredness of the inspired law of God. To this they adhered with such tenacity that they were led thereby to pay the greatest homage to Moses the lawgiver, and to consider blasphemy of his name a capital offence. They believed that to obey diligently the commandments of the Lord, to lead a pure and holy life, to mortify the flesh and the lusts thereof, and to be meek and lowly in spirit, would

bring them in closer communion with their Creator, and make them the temples of the Holy Ghost, when they would be able to prophesy and perform miracles, and, like Elias, be ultimately the forerunners of the Messiah. This last stage of perfection, however, could only be attained by gradual growth in holiness, and by advancement from one degree to another. Thus, when one was admitted a member of this order, and had obtained the  $\pi\epsilon\rho\iota\zeta\omega\mu\alpha$ , *apron*, which, from its being used to dry one's self with after the baptisms, was the symbol of purity, he attained, 1. To the state of outward or bodily purity by baptisms (*זריזות מביאה לירו פרישה*). 2. From this stage, again, he attained to that of inward or spiritual purity (*פרישה מביאה לירו נהרה*). 3. From this stage, again, he advanced to that which required the banishing of all anger and malice, and the cultivation of a meek and lowly spirit (*נהרה מביאה לירו עניה*). 4. Thence he advanced to the stage of holiness (*עניה מביאה לירו חסידות*). 5. Thence, again, he advanced to that wherein he was fit to be the temple of the Holy Spirit, and to prophesy (*חסידות מביאה לירו רהק*). 6. Thence, again, he advanced to that state when he could perform miraculous cures and raise the dead (*רהק מביאה לירו הרהק*); and, 8. Attained finally to the position of Elias, the forerunner of the Messiah (*הרהק מביאה לירו אליה*). Comp. Jerusalem Talmud, *Sabbath*, c. i.; *Shekalim*, c. iii.; Bably, *Aboda Zara*, xx, 6; Midrash Rabba, *Shir Hushirim*, init.; and *Ben Chananja*, iv, 374.

As contact with any one who did not practise their self-imposed Levitical laws of purity, or with anything belonging to such a one, rendered them impure, the Essenes were, in the course of time, obliged to withdraw altogether from general society, to form a separate community, and live apart from the world. Their manner of life and practices were most simple and self-denying. They chiefly occupied themselves with tilling the ground, tending flocks, rearing bees, and making the articles of food and dress required by the community (as it was contrary to their laws of Levitical purity to get anything from one who did not belong to the society), as well as with healing the sick, and studying the mysteries of nature and revelation. Whatever they possessed was deposited in the general treasury, of which there were appointed by the whole fraternity several managers, who supplied therefrom the wants of every one, so that they had all things in common; hence there were no distinctions amongst them of rich and poor, or of masters and servants. They reprobated slavery and war, and would not even manufacture martial instruments. They rose before the sun, and did not talk about any worldly matters till they had all assembled together and offered up their national prayer for the renewal of the light of the day (*המאיר לארץ*), whereupon they dispersed to their respective engagements, according to the directions of the overseers, till the fifth hour, or eleven o'clock, when the labor of the forenoon terminated, and all re-assembled, had a baptism in cold water, after which they put on their white garments, entered their refectory with as much religious solemnity as if it were the holy Temple, sat down together in mysterious silence to a common meal, which had the character of a sacrament—and may be the reason why they did not offer sacrifices in the Temple—the baker placed before each one a little loaf of bread, and the cook a dish of the most simple food, the priest invoked God's blessing upon the repast, and concluded with thanks to the Bountiful Supplier of all our wants. This was the signal of their dismissal, when all withdrew, put off

their sacred garments, and resumed their several employments till the evening, when they again partook of a common meal. Such was their manner of life during the week. On the Sabbath, which they observed with the utmost rigor, and on which they were more especially instructed in their distinctive ordinances, Philo tells us, "They frequent the sacred places which are called synagogues, and there they sit, according to their age, in classes, the younger sitting below the elder in becoming attire, and listening with eager attention. Then one takes up the holy volume and reads it, whilst another of the most experienced ones expounds, omitting that which is not generally known; for they philosophize on most things in symbols, according to the ancient zeal" (*Quod omnis prob. lib. sec. xii*). The study of logic and metaphysics they regarded as injurious to a devotional life. They were governed by a president, who was chosen by the whole body, and who also acted as judge. In cases of trial, however, the majority of the community, or at least a hundred members of it, were required to constitute the tribunal, and the brother who walked disorderly was excommunicated, yet he was not regarded as an enemy, but was admonished as a brother, and received back after due repentance.

As has already been remarked, the Essenes generally were celibates; their ranks had therefore to be recruited from the children of the Jewish community at large, whom they carefully trained for this holy and ascetic order. Previous to his final admission, the candidate for the order had to pass through a novitiate of two stages. Upon entering the first stage, which lasted twelve months, the novice (*νοσούταρος*) had to cast in all his possessions into the common treasury, and received a *spade* (*σαλις, ἀνάρονον* = *קדף*) to bury the excrement (compare Deut. xxiii, 12-15), an *apron* (*περιζώμα* = *קריץ*), used at the baptisms, and a *white robe* to put on at meals, which were the symbols of purity, and, though still an outsider, he had to observe some of the ascetic rules of the society. If, at the close of this stage, the community found that he had properly acquitted himself during the probationary year, the novice was then admitted into the second stage, which lasted two years. During this period he was admitted to a closer fellowship with the brotherhood, and shared in their laustral rites, but was still excluded from the common meals. Having passed satisfactorily through the second stage of probation, the novice was then fully received into the community (*εἰς τὸν ὄμιλον*), when he bound himself by awful oaths (the only occasion on which they allowed swearing) "that, in the first place, he will exercise piety towards God; and then that he will observe justice towards all men; and that he will do no harm to any one, either of his own accord or by the command of others; that he will always hate the wicked, and help the righteous; that he will ever be faithful to all men, especially his rulers, for without God no one comes to be ruler, and that if he should be ruler himself he will never be overbearing, nor endeavor to outshine those he rules either in his garments or in finery; that he will always love truth, and convince and reprove those that lie; that he will keep his hand from stealing, and his soul clear from any unjust gain; that he will not conceal anything from the members of his society, nor communicate to any one their mysteries, not even if he should be forced to it at the hazard of his life; and, finally, that he will never deliver the doctrines of the Essenes to any one in any other manner than he received them himself; that he will abstain from all species of robbery, and carefully preserve the books belonging to their sect and the names of the angels" (*War*, ii, 8, 7). This last expression refers to the secrets connected with the *Tetragrammaton* (*שם* = *המפורש*), and the other names of God and the angels comprised in the theosophy (*מטענה מרובה*), and to

the mysteries connected with the cosmogony (מִצְדָּתֵי בְרֵאשִׁית) which played so important a part both among the Essenes and the Cabbalists.

III. *Origin and Relationship to Judaism and Christianity.*—The origin of this sect has been greatly mystified by Philo and Josephus, who, being anxious to represent their co-religionists to cultivated Greeks in a Hellenistic garb, made the Essenes resemble as much as possible the Ascetic, Pythagorean, Platonic, and other philosophers. It has been still more mystified by the account of Pliny, who tells us that this community has prolonged its existence for thousands of ages ("per seculorum millia—incredibile diu—gens æterna est in qua nemo nascitur," *Hist. Nat.* v, 15). Most modern writers have shaped their description of this community according to these accounts, supposing that the Essenes are neither mentioned in the N. T. nor in the ancient Jewish writings, and hence concluding that the sect originated in Egypt or Greece, or in the philosophic systems of both countries. Hilgenfeld (*Zeits. für wiss. Theol.*, 1867, i, art. vi) undertakes to show the historical connection of Essenism with Parnism and Buddhism. Frankel seeks, from a number of passages in the Talmud and Midrashim, to show that Essenism is simply an order of Pharisaism, that both are sections of the Chasidim or Assideans [see CHASIDIM], and that all these three orders are frequently spoken of under the same name. That the Essenes are an order of Pharisees is distinctly stated in *Aboth R. Nathan*, c. xxxvii, where we are told that there are eight distinctions or orders among the Pharisees, and that those *Pharisees who live in celibacy are the Essenes* (ח' פְּרִישִׁים הֵם—פְּרִישֵׁי מְחֻבְּבֵי שְׂאֵנִי). This will, moreover, be seen from a comparison of the following practices, which Josephus describes as peculiar characteristics of the *Essenes*, with the practices of the Pharisees, as given in the Talmud and Midrashim:

1. The Essenes had four classes of Levitical purity, which were so marked that a member of the upper class had to bathe himself when he touched anything belonging to the lower class, or when he came in contact with a stranger; so also the Pharisees (comp. Josephus, *War*, ii, 8, 10, with *Chagiga*, ii, 7).

2. The Essenes regarded ten persons as constituting a complete number for divine worship, and held the assembly of such a number as sacred; so the Pharisees (comp. *War*, 2, 8, 9, with *Aboth*, iii, 6; *Berachoth*, 54, a).

3. The Essenes would not spit out in the presence of an assembly, or to the right hand; so the Pharisees (comp. *War*, ii, 8, 9, with Jerusalem, *Berachoth*, iii, 5).

4. The Essenes regarded their social meal as a sacrament; so the Pharisees (compare *War*, ii, 8, 5, with *Berachoth*, 55, a).

5. The Essenes bathed before meals; so the Pharisees (comp. *War*, ii, 8, 5, with *Chagiga*, 18, b).

6. The Essenes put on an apron on the lower part of the body when bathing; the Pharisees covered themselves with the *talith* (comp. *War*, ii, 8, 5, with *Berachoth*, 24, b).

7. The Essenes bathed after performing the duties of nature; so the priests (comp. *War*, ii, 8, 9, with *Yoma*, 28, a).

8. The Essenes abstained from taking oaths; so the Pharisees (compare *War*, ii, 8, 6, with *Shewoth*, 39, b; *Gittin*, 35, a; *Bemidbar Rabba*, xxii).

9. The Essenes would not even remove a vessel on the Sabbath; so the Pharisees (compare *War*, ii, 8, 9, with *Tosiphtha Succa*, iii).

10. The Essenes had a steward in every place where they resided to supply the needy strangers of this order with articles of clothing and food; so the Pharisees (comp. *War*, ii, 8, 4, with *Peah*, viii, 7; *Baba Bathra*, 8, a; *Sabbath*, 118).

11. The Essenes believed that all authority comes

from God; so the Pharisees (comp. *War*, ii, 8, 7, with *Berachoth*, 58, a).

12. An applicant for admission to the order of the Essenes had to pass through a novitiate of twelve months; so the פְּרִישִׁים among the Pharisees (compare *War*, ii, 8, 7, with *Berachoth*, 30, b).

13. The novice among the Essenes received an *apron* (περιζώμα) the first year of his probation; so the Chaber among the Pharisees (compare *War*, ii, 8, 7, with *Tosiphtha Demay*, c. ii; Jerusalem, *Demay*, ii, 3, b; *Echoroth*, 30, b).

14. The Essenes delivered the theosophical books, and the sacred names, to the members of their society; similarly the Pharisees (comp. *War*, ii, 8, 7, with *Chagiga*, ii, 1; *Kiddushim*, 71, a).

The real differences between the Essenes and the Pharisees developed themselves in the course of time, when the extreme rigor with which the former sought to perform the laws of Levitical purity made them withdraw from intercourse with their fellow-men, and led them, 1. To form an isolated order; 2. To keep from marriage, because of the perpetual pollutions to which women are subject in menstruation and childbirth, and because of its being a hindrance to a purely devotional state of mind; 3. To abstain from frequenting the Temple and offering sacrifices (compare Josephus *Ant.* xviii, 1, 5); and, 4. Though they firmly believed in the immortality of the soul, yet they did not believe in the resurrection of the body (*War*, ii, 8, 11). To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people. The difference lay mainly in rigor of practice, and not in articles of belief. See PHARISEE.

But the best among the Jews felt the peril of Essenism as a system, and combined to discourage it. They shrank with an instinctive dread from the danger of connecting asceticism with spiritual power, and cherished the great truth which lay in the saying, "Doctrine is not in heaven." The miraculous energy which was attributed to mystics was regarded by them rather as a source of suspicion than of respect, and theosophic speculations were condemned with emphatic distinctness (Frankel, *Monatsschrift*, 1853, p. 62 sq., 68, 71).

As to their connection with Christianity, there can be no difficulty in admitting that Christ and the apostles recognised those principles and practices of the Essenes which were true and useful. Though our Saviour does not mention them by the name *Essenes*, which Philo and Josephus coined for the benefit of the Greeks, yet there can be no doubt he refers to them in Matt. xix, 12, when he speaks of those "who abstain from marriage for the kingdom of heaven's sake," since they were the only section of Jews who voluntarily imposed upon themselves a state of celibacy in order that they might devote themselves more closely to the service of God. Also 1 Cor. vii can hardly be understood without bearing in mind the notions about marriage entertained by this God-fearing and self-denying order. As to other coincidences, Matt. v, 34, etc., and James v, 12, urge the abstinence from using oaths which was especially taught by the Essenes. The manner in which Christ commanded his disciples to depart on their journey (Mark vi. 8-10) is the same which these pious men adopted when they started on a mission of mercy. The primitive Christians, like the Essenes, sold their land and houses, and brought the prices of the things to the apostles, and they had all things in common (Acts iv, 32-34). John the Baptist was a parallel to this holy order, as is evident from his ascetic life (Luke xi, 22); and when Christ pronounced him to be *Elias* (Matt. xi, 14), he may almost be said to have declared that the Baptist had really attained to that spirit and power which the Essenes strove to obtain in their highest stage of purity. From the nature of the case, however, Essenism, in its extreme form, could exercise very little direct influ-

ence on Christianity. In all its practical bearings it was diametrically opposed to the apostolic teaching. The dangers which it involved were far more clear to the eye of the Christian than they were to the Jewish doctors. The only real similarity between Essenism and Christianity lay in the common element of true Judaism; and there is little excuse for modern writers who follow the error of Eusebius, and confound the society of the Therapeutæ with Christian brotherhoods. Nationally, however, the Essenes occupy the same position as that to which John the Baptist was personally called. They mark the close of the old, the longing for the new, but without political aspirations. In place of the message of the coming "kingdom" they could proclaim only individual purity and isolation. At a later time traces of Essenism appear in the Clementines, and the strange account which Epiphanius gives of the *Osseni* (Ὀσσηνοί) appears to point to some combination of Essene and pseudo-Christian doctrines (*Iher.* xix.). After the Jewish war the Essenes disappear from history. The character of Judaism was changed, and ascetic Pharisaism became almost impossible.

IV. *Date, Settlements, and Number of this Order.*—The fact that the Essenes developed themselves gradually, and at first imperceptibly, through intensifying the prevalent religious notions, renders it impossible to say with exactness at what degree of intensity they are to be considered as detached from the general body. The Saviour and the ancient Jewish writers do not speak of them as a separate body. Josephus, however, speaks of them as existing in the days of Jonathan the Maccabæan, B.C. 143 (*Ant.* xiii, 5, 9); he then mentions Judas, an Essene, who delivered a prophecy in the reign of Aristobulus I, B.C. 106 (*War.* i, 3, 5; *Ant.* xiii, 11, 2). The third mention of their existence occurs in connection with Herod (*Ant.* xv, 10, 5). These accounts distinctly show that the Essenes at first lived among the people, and did not refrain from frequenting the court, as Menachem the Essene was a friend of Herod, who was kindly disposed towards this order (*ib.*). This is, moreover, evident from the fact that there was a gate at Jerusalem which was named after them (Ἐσσηνῶν πύλη, *War.* v, 4, 2). When they ultimately withdrew themselves from the rest of the Jewish nation, the majority of them settled on the north-west shore of the Dead Sea (Pliny, *Hist. Nat.* v, 17; Eusebius, *Hist. Eccles.* ii, 17), and the rest lived in scattered communities throughout Palestine and other places. Their number is estimated both by Philo and Josephus at 4000.

The obscurity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organization. The communities which were formed out of them were a result of their practice, and not a necessary part of it. As a sect they were distinguished by an aspiration after ideal purity rather than by any special code of doctrines; and, like the Chasidim of earlier times, they were confounded in the popular estimation with the great body of the zealous observers of the law (Pharisees). The growth of Essenism was a natural result of the religious feeling which was called out by the circumstances of the Greek dominion, and it is easy to trace the process by which it was matured. From the Maccabæan age there was a continuous effort among the stricter Jews to attain an absolute standard of holiness. Each class of devotees was looked upon as practically impure by their successors, who carried the laws of purity still further; and the Essenes stand at the extreme limit of the mystic asceticism which was thus gradually reduced to shape. The associations of the "Scribes and Pharisees" (סוֹפְרֵי וְפָרִישִׁים, "the companions, the wise") gave place to others bound by a more rigid rule; and the rule of the Essenes was made gradually stricter. Those whom Josephus speaks of as allowing marriage may be supposed to have be-

longed to such bodies as had not yet withdrawn from intercourse with their fellow-men. But the practice of the extreme section was afterwards regarded as characteristic of the whole class, and the isolated communities of Essenes furnished the type which is preserved in the popular descriptions.

The character of Essenism limited its spread. Out of Palestine, Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, where Judaism assumed a new shape from its intimate connection with Greece. Here the original form in which it was moulded was represented, not by direct copies, but by analogous forms, and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeutæ (q. v.). These Alexandrine mystics abjured the practical labors which rightly belonged to the Essenes, and gave themselves up to the study of the inner meaning of the Scriptures. The impossibility of fulfilling the law naturally led them to substitute a spiritual for a literal interpretation; and it was their object to ascertain its meaning by intense labor, and then to satisfy its requirements by absolute devotion. The "whole day, from sunrise to sunset, was spent in mental discipline." Bodily wants were often forgotten in the absorbing pursuit of wisdom, and "meat and drink" were at all times held to be unworthy of the light (Philo, *De vit. contempl.* § 4).

According to Credner, *Über Essener und Ebioniten* (in Winer's *Zeitschr.* I, ii-iii, 217 sq.), the Ebionites descended from the Essenes. Grässe says (*ib.* p. 653) that the Therapeutæ, who lived in Egypt (Fabricius, *Bibl. Gr.* ii, 138 sq., 725), were a class of the Essenes (see Bâld, *Diss. Essæos Pythagorissantes delineatura*, Upsal, 1746); and he presumes that they existed as early as the time of Alexander the Great, and, spreading from Egypt to Palestine, there became acquainted with the Pythagorean or Oriental philosophy (comp. Josephus, *Ant.* xv, 13). Dr. Wise thinks that the founder of the Essenes must have been an Egyptian Jew who was acquainted with the Pythagorean order, and came to Palestine about B.C. 200; and says farther that the Therapeutæ (founded about B.C. 170) of Egypt and elsewhere were in name and essence an imitation of the Essenes. He asserts also that no positive traces of their messianic views are left either by Josephus or Philo, or even by the Talmud, but that, in consideration of their numerous similarities to the Egyptian Jews, they may be supposed to have entertained messianic hopes similar to the Egyptians (*The Israelite*, Nov. 1, 1867).

V. *Literature.*—The oldest accounts we have of the Essenes are those given by Josephus, *War.* ii, 8, 2-15; *Ant.* xii, 5, 9; xv, 10, 4 sq.; xviii, 1, 2 sq.; Philo, *Quod omnis probus liber*, § 12 sq.; Pliny, *Hist. Natur.* v, c. xvi, xvii; Solinus, *Polyhist.* c. xxxv; Porphyry, *De Abstinentia*, p. 381; Epiphanius, *adv. Hær.* lib. i; Eusebius, *Hist. Eccles.* ii, c. xvii. Of modern productions we have Bellermin, *Geschichtliche Nachrichten aus dem Alterthume über Essäer und Therapeuten* (Berlin, 1821), who has studiously collected all the descriptions of this order: Gfrörer, *Philo und die jüdisch-schule andrinische Theosophie* (Stuttgart, 1835), p. 299 sq.; Prideaux, *Connection of the O. and N. T.*, part ii, bk. v, 5; Dähne, *Geschichtliche Darstellung der jüdisch-alexandrinischen Religions Philosophie*, i, 467 sq.; and by the same author, the article *Essäer*, in Ersch und Gruber's *Encyclopädie*: Neander, *History of the Church*, ed. Bohn, vol. i. The Essays of Frankel, in his *Zeitschrift für die religiösen Interessen d. Judenthums* (Lpz. 1848), p. 441 sq.; and *Monatsschrift für Geschichte u. Wissenschaft d. Judenthums*, ii, 30 sq., 61 sq., are most important, and may be considered as having created a new epoch in the treatment of the history of this order. Adopting the results of Frankel, and pursuing the same course still further, Grätz has given a masterly treat-

tise upon the Essenes in his *Geschichte der Juden* (Leipzig, 1856), iii, 96 sq., 518 sq.; treatises of great value are also given by Jost, *Geschichte des Judenthums und seiner Secten* (Leipzig, 1857), p. 207 sq.; and Herzfeld, *Geschichte d. V. Israel* (Nordhansen, 1857), ii, 368, 388 sq. The accounts given by Ewald, *Geschichte d. Volkes Israel* (Göttingen, 1852), iv, 420 sq., and Hilgenfeld, *Die jüdische Apokalypitk* (Jena, 1857), p. 245 sq., though based upon Philo and Josephus, are important contributions to the literature of the Essenes; that of the latter is interesting and ingenious, but essentially one-sided and subservient to the writer's theory (compare Volkmar, *Das vierte B. Ezra*, p. 60). To these must be added the very interesting and important relics of the Essenes, published by Jelinek, with instructive notices by the learned editor, in *Beth Ha-Midrash*, vol. ii (Leipzig, 1853), p. xviii sq.; vol. iii (Leipzig, 1855), p. xx sq.—Kitto, s. v.; Smith, s. v.

Volkes Israel*, i, 206 sq. Comp. SECTS, JEWISH.

**Essenius, ANDREW**, a Dutch theologian, was born at Bommel in February, 1618, and was educated at Utrecht, where he became pastor in 1651. In 1653 he was made professor of theology in the University of Utrecht. He died May 18, 1677. Among his writings are *Triumphus Crucis* (Amst. 1649);—*De Moralitate (Sabbati 1658)*;—*Systema Theologicum* (1659);—*Compendium Theol. Dogmat.* (1669);—Hoefcr, *Nouv. Biog. Générale*, xvi, 441.

**Essentia.** See ESSENCE.

**Establishment.** This term is applied to the position that that religious denomination in any country which solely or peculiarly enjoys the patronage of the state, and the clergy of which have, in consequence, their several endowments and incomes especially settled and maintained by the Legislature or government. The general tendency of opinion in all countries is now against established churches, and in favor of the voluntary principle for the support of churches. The subject is discussed at length, historically and otherwise, in the article CHURCH AND STATE (ii, 329). W

present here a summary of the arguments on both sides, chiefly taken from Buck (*Theolog. Dict.* s. v.).

(1.) The partisans for religious establishments observe (1.) that they have prevailed universally in every age and nation. The office of prophet, priest, and king were united in the same patriarch (Gen. xviii, 19; xvii and xxi; xiv, 18). The Jews enjoyed a religious establishment dictated and ordained by God. In turning our attention to the heathen nations, we shall find the same incorporation of religious with civil government (Gen. xlvii, 22; 2 Kings xvii, 27, 29). Every one who is at all acquainted with the history of Greece and Rome knows that religion was altogether blended with the policy of the state. The Koran may be considered as the religious creed and civil code of all the Mohammedan tribes. Among the Celts, or the original inhabitants of Europe, the Druids were both their priests and their judges, and their judgment was final. Among the Hindoos the priests and sovereigns are of different tribes or castes, but the priests are superior in rank; and in China the emperor is sovereign pontiff, and presides in all public acts of religion. (2.) Again: it is said that, although there is no form of Church government absolutely prescribed in the New Testament, yet from the associating law, on which the Gospel lays so much stress, by the respect for civil government it so earnestly enjoins, and by the practice which followed and finally prevailed, Christians cannot be said to disapprove, but to favor religious establishments. (3.) Religious establishments also, it is observed, are founded on the nature of man, and interwoven with all the constituent principles of human society: the knowledge and profession of Christianity cannot be upheld without a clergy; a clergy cannot be supported without a legal provision; and a legal provision for the clergy cannot be constituted without the preference of one sect of Christians to the rest. An established church is most likely to maintain clerical respectability and usefulness by holding out a suitable encouragement to young men to devote themselves early to the service of the Church, and likewise enables them to obtain such knowledge as shall qualify them for the important work.

(11.) They who reason on the contrary side observe, (1.) that the patriarchs sustaining civil as well as religious offices is no proof at all that religion was incorporated with the civil government in the sense above referred to, nor is there the least hint of it in the sacred Scriptures. That the case of the Jews can never be considered in point, as they were under a theocracy and a ceremonial dispensation that was to pass away, and consequently not designed to be a model for Christian nations. That, whatever was the practice of heathens in this respect, this forms no argument in favor of that system which is the very opposite to paganism. (2.) The Church of Christ is of a spiritual nature, and ought not, yea, cannot in fact be incorporated with the state without sustaining material injury. In the three first and purest ages of Christianity the Church was a stranger to any alliance with temporal powers; and, so far from needing their aid, religion never flourished so much as while they were combined to suppress it. (3.) As to the support which Christianity, when united to civil government, yields to the peace and good order of society, it is observed that this benefit will be derived from it in at least as great a degree without an establishment as with it. Religion, if it have any power, operates on the conscience of men; and, resting solely on the belief of invisible realities, it can derive no weight or solemnity from human sanctions. Human establishments, it is said, have been, and are, productive of the greatest evils; for in this case it is requisite to give the preference to some particular system; and as the magistrate is no better judge of religion than others, the chances are as great of his lending his sanction to the false as the true. The thousands that have been persecuted

and suffered in consequence of establishments will always form an argument against them. Under establishments also, it is said, corruption cannot be avoided. Emolument must be attached to the national church, which may be a strong inducement to its ministers to defend it, be it ever so remote from the truth. Thus, also, error becomes permanent; and that set of opinions which happens to prevail when the establishment is formed, continues, in spite of superior light and improvement, to be handed down, without alteration, from age to age. Hence the disagreement between the public creed of the Church and the private sentiments of its ministers. (4.) Finally, though all Christians should pay respect to civil magistrates as such, and all magistrates ought to encourage the Church, yet no civil magistrates have any power to establish any particular form of religion binding upon the consciences of the subject; nor are magistrates ever represented in Scripture as officers or rulers of the Church. As Mr. Coleridge observes, the Christian Church is not a kingdom, realm, or state of the world, nor is it an estate of any such kingdom, realm, or state; but it is the appointed opposite to them all collectively—the sustaining, correcting, befriending opposite of the world—the compensating counterforce to the inherent and inevitable evils and defects of the state as a state, and without reference to its better or worse construction as a particular state; while, whatever is beneficent and humanizing in the aims, tendencies, and proper objects of the state, it collects in itself as in a focus, to radiate them back in a higher quality; or, to change the metaphor, it completes and strengthens the edifice of the state, without interference or commixture, in the mere act of laying and securing its own foundations. And for these services the Church of Christ asks of the state neither wages nor dignities; she asks only protection, and to be let alone. These, indeed, she demands; but even these only on the ground that there is nothing in her constitution nor in her discipline inconsistent with the interests of the state; nothing resistant or impedimental to the state in the exercise of its rightful powers, in the fulfilment of its appropriate duties, or in the effectuation of its legitimate objects. (5.) As to the provision made for the clergy, this may be done without an establishment, as matter of fact shows in hundreds of instances in the Dissenting and Methodist churches in England, and universally by all churches in America. Indeed, the question of the value of the voluntary principle may be considered as finally settled by the experience of the English and American churches. In England, in 1855, the Established Church had church accommodation for 5,300,000, and all other denominations could seat 4,900,000, making in all church-room for 10,200,000 of the population. In the United States there were church accommodation in 1850 for 14,000,000, and it is computed by Dr. Baird (*Religion in America*) that there must be altogether far more than one minister for each 990 inhabitants. In England they have an establishment of untold wealth. For centuries they have been accumulating edifices for worship the most costly and durable that the world knows, and yet the United States, without any aid from the government, seats a larger proportion of the inhabitants in houses of worship, and raises \$25,000,000 annually for religious benevolence. That which has been the cause of this superior success in America is the more perfect action of the voluntary principle. Even in England this principle has worked in the same manner. Fifty years ago the population of that country was less than half what it now is. Then the Church of England could seat 4,000,000, now 5,300,000. But at that time the Dissenters could seat only *one fifth* of the numbers they can at present. In America the population has doubled itself five or six times since the Revolution, and yet *then* there was but about one minister to every 2000 inhabitants, *now* there is one to every 1000. See

**Es'ther** [vulgarly pronounced *Es'ter*], a beautiful Jewish maiden, the heroine of the Biblical book that bears her name.

1. *Name*.—Her proper Hebrew name was *Hadassah* (q. v.), but on her introduction into the royal harem she received, in accordance with Oriental usage (comp. Dan. i. 7), the new and probably Persian name of *Esther* (אֶסְתֵּר, *Ester'*; Sept. Ἑσθήρ, and so Josephus [Gen. ἡγοῦσ', *Ant.* xi. 6, 2, etc.; Vulg. *Esther*], which thenceforth became her usual and better-known designation, as appears from the formula אֶסְתֵּר הַיְהוּדָיָה, "that is, Esther" (*Esth.* ii. 7), exactly analogous to the usual addition of the modern names of towns to explain the use of the old obsolete ones (Gen. xxxv. 19, 27; Josh. xv. 10, etc.). As to its signification, Gesenius (*Thest. Heb.* p. 134, a) cites from that diffuse Targum on this book, which is known as the second Targum on Esther, the following words: "She was called Esther from the name of the star Venus, which in Greek is *Aster*" (i. e. ἀστήρ, Lat. *aster*, Engl. *star*; see Lassen, *Ind. Biblioth.* iii. 8, 18). Gesenius then points to the Persian word *satarah*, star, as that of which Esther is the Syro-Arabian modification; and brings it, as to signification, into connection with the planet *Venus*, as a star of good fortune, and with the name of the Syrian goddess *Ash-tareth* (q. v.). In this etymology Fürst acquiesces (*Heb. Jew. Lex.* s. v.).

2. *History*.—She was the daughter of Abihail (who was probably the son of Shimei), a Benjamite, and uncle of Mordecai (q. v.). Her ancestor Kish had been among the captives led away from Jerusalem (part of which was in the tribe of Benjamin) by Nebuchadnezzar when Jehoiachin was taken captive. The family did not avail itself of the permission to return to Palestine under the edict of Cyrus. Her parents being dead, Esther was brought up as a daughter by her cousin Mordecai, who had an office in the court or household of the Persian monarch "at Shushan, in the palace." The reigning king of Persia, Ahasuerus, having divorced his queen, Vashti, on account of the becoming spirit with which she refused to submit to the indignity which a compliance with his drunken commands involved, search was made throughout the empire for the most beautiful maiden to be her successor. Those whom the officers of the harem deemed the most beautiful were removed thither, the eventual choice among them remaining with the king himself. That choice fell on Esther, who found favor in the eyes of Ahasuerus, and was advanced to a station enviable only by comparison with that of the less favored inmates of the royal harem. B. C. 479. The king was not aware, however, of her race and parentage; and so, with the careless profusion of a sensual despot, on the representation of Haman the Agagite, his prime minister, that the Jews scattered through his empire were a pernicious race, he gave him full power and authority to kill them all, young and old, women and children, and take possession of all their property. The circumstance that Esther herself, though queen, seemed to be included in this doom of extirpation, enabled her to turn the royal indignation upon Haman, whose resentment against Mordecai had led him to obtain from the king this monstrous edict. The laws of the empire would not allow the king to recall a decree once uttered; but the Jews were authorized to stand on their defence; and this, with the known change in the intentions of the court, averted the worst consequences of the decree. The Jews established a yearly feast in memory of this deliverance, which is observed

among them to this day. See PURIM. Such is the substance of the history of Esther, as related in the book which bears her name. (See below.) The details, as given in that book, afford a most curious picture of the usages of the ancient Persian court, the accuracy of which is vouched for not only by the historical authority of the book itself, but by its agreement with the intimations afforded by the ancient writers, as well as by the fact that the same usages are in substance preserved in the Persian court at the present day. See HAREM.

Sir John Malcolm tells us that the sepulchre of Esther and Mordecai stands near the centre of the city of Hamadan. It is a square building, terminated by a dome, with an inscription in Hebrew upon it, translated and sent to him by Sir Gore Ouseley, ambassador to the court of Persia, as follows: "Thursday, fifteenth of the month Adar, in the year 4474 from the creation of the world, was finished the building of this temple over the graves of Esther and Mordecai, by the hands of the good-hearted brothers Elias and Samuel, the sons of the deceased Ishmael of Kashan." According to the vulgar Jewish æra, this would have been not more than eleven centuries ago; but the date may be after the computation of the Eastern Jews, which would make it about A.D. 250. Local tradition says that it was thoroughly repaired about 175 years since by a Jewish rabbi named Ismael (Kitto, *Pict. Bible*, at Esth. x, 1). See ACHMETHA.

Tomb of Mordecai and Esther.

3. *Proposed Identifications with Personages in Profane History.*—The question as to the identity of the Persian king referred to in connection with Esther is discussed under AHASUERUS, and the reasons there given lead to the conclusion that he was Xerxes, the son of Darius Hystaspis. (See, however, a contrary view in the *Jour. of Sac. Lit.* July, 1860, p. 406 sq.)

A second inquiry remains, Who, then, was Esther? *Artaxana*, *Alosa*, and others are indeed excluded by the above decision; but are we to conclude, with Scaliger, that because Ahasuerus is Xerxes, therefore Esther is *Amestris*? Surely not. None of the historical particulars related by Herodotus concerning Amestris (Herod ix, 108; comp. Ctesias, ap. Photius, *Cod.* 72, p. 57) make it possible to identify her with Esther. Amestris was the daughter of Otanes (Onophas in Ctesias), one of Xerxes's generals, and brother to his father Darius (Herod. vii, 61, 82). Esther's father and mother had been Jews. Amestris was wife to Xerxes before the Greek expedition (Herod. vii, 61), and her sons accompanied Xerxes to Greece

(Herod. vii, 39), and had all three come to man's estate at the death of Xerxes in the 20th year of his reign. Darius, the eldest, had married immediately after the return from Greece. Esther did not enter the king's palace till his 7th year, just the time of Darius's marriage. These objections are conclusive, without adding the difference of character of the two queens. The truth is that history is wholly silent both about Vashti and Esther. Herodotus only happens to mention one of Xerxes's wives; Scripture only mentions two, if indeed either of them were wives at all. But since we know that it was the custom of the Persian kings before Xerxes to have several wives, besides their concubines; that Cyrus had several (Herod. iii, 3); that Cambyses had four whose names are mentioned, and others besides (iii, 31, 32, 68); that Smerdis had several (ib. 68, 69); and that Darius had six wives, whose names are mentioned (ib. *passim*), it is most improbable that Xerxes should have been content with one wife. Another strong objection to the idea of Esther being his one legitimate wife, and perhaps to her being strictly his wife at all, is that the Persian kings selected their *wives* not from the harem, but, if not foreign princesses, from the noblest Persian families, either their own nearest relatives, or from one of the seven great Persian houses. It seems therefore natural to conclude that Esther, a captive, and one of the harem, was not of the highest rank of wives, but that a special honor, with the name of queen, may have been given to her, as to Vashti before her, as the favorite concubine or inferior wife, whose offspring, however, if she had any, would not have succeeded to the Persian throne. This view, which seems to be strictly in accordance with what we know of the manners of the Persian court, removes all difficulty in reconciling the history of Esther with the scanty accounts left us by profane authors of the reign of Xerxes.

It may be convenient to add that the day of Xerxes, in which the banquet that was the occasion of Vashti's divorce was held, was B.C. 488, his 7th, B.C. 479, and his 12th, B.C. 474 (Clinton, *F. L.*), and that the simultaneous battles of Plataea and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi, 36) to Susa, happened, according to Prideaux and Clinton, in September of his 7th year. For a fuller discussion of the identity of Esther, and different views of the subject, see Prideaux's *Connection*, i, 116, 243, 297 sq., and Petav. *De doctr. temp.* xii, 27, 28, who make Esther wife of Artaxerxes Longim., following Joseph. *Ant.* xi, 6, as he followed the Sept. and the apocryphal Esther; J. Scalig. (*De emend. temp.* vi, 591; *Animadv. Euseb.* p. 100) making Ahasuerus, Xerxes; Usher (*Annal. Vet. Test.*) making him Darius Hystaspis; Loftus, *Chaldaea*, etc. Eusebius (*Canon. Chron.* 138, ed. Mediol.) rejects the hypothesis of Artaxerxes Longim. on the score of the silence of the books of Ezra and Nehemiah, and adopts that of Artaxerxes Mnemon, following the Jews, who make Darius Codomannus to be the same as Darius Hystaspis, and the son of Artaxerxes by Esther! It is most observable that all Petavius's and Prideaux's arguments against Scaliger's view apply solely to the statement that Esther is Amestris. See XERXES.

4. *The character of Esther*, as she appears in the Bible, is that of a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favor with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us to infer. There must have been a singular grace and charm in her aspect and manners, since she "obtained favor in the sight of all that looked upon her" (ii, 15). That she was raised up as an instrument in the hands of God to avert the destruction of the

Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. But to impute to her the sentiments put in her mouth by the apocryphal author of ch. xiv. or to accuse her of cruelty because of the death of Haman and his sons, and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact, the simplicity and truth to nature of the scriptural narrative afford a striking contrast both with the forced and florid amplifications of the apocryphal additions, and with the sentiments of some later commentators.—Kitto, s. v.; Smith, s. v. See Debaeza, *Historia Esther* (in his *Comment. Allegor.* vi); Anon, *De Assuero* (in the *Crit. Sac. Thes.* Nov. i, 761); Robinson, *Script. Char.* ii; Hughes, *Esther and her People* (London, 1846); Justi, *Ueb. d. Ahasuerus in Esther* (in *Eichhorn's Repertor.* xv, 1 sq.); Tyrwhitt, *Esther and Ahasuerus* (London, 1868, 2 vols. 8vo).

ESTHER, Book of, the last of the historical books of the O. T., according to the arrangement in the Auth. Eng. Version. (See Davidson, in *Horne's Introd.*, new ed., ii, 697 sq.)

I. *Contents, Name, and Place in the Canon.*—In this book we have an account of certain events in the history of the Jews under the rule of the Persian king Ahasuerus (Achashverosh), doubtless the Xerxes of the Greek historians. See AHASUERUS 3. The writer informs us of a severe persecution with which they were threatened at the instigation of Haman, a favorite of the king, that sought in this way to gratify his jealousy and hatred of a Jew, Mordecai, who, though in the service of the king, refused to render to Haman the homage which the king had enjoined, and which his other servants rendered; he describes in detail the means by which this was averted through the influence of a Jewish maiden called "Hadassah, that is, Esther," the cousin of Mordecai, who had been raised to be the wife of the king, along with the destruction of Haman and the advancement of Mordecai; he tells us how the Jews, under the sanction of the king, and with the aid of his officers, rose up against their enemies, and slew them to the number of 75,000; and he concludes by informing us that the festival of Purim was instituted among the Jews in commemoration of this remarkable passage in their history. From the important part played by Esther in this history, the book bears her name. It is placed among the hagiographa (q. v.) or *Kethubim'* (כְּתוּבִים) by the Jews, and in that first portion of them which they call the five *Megilloth* (מֵגִלּוֹת, *rolls*), or books read in the synagogue on special festivals; the season appropriate to it being the feast of Purim, held on the 14th and 15th of the month Adar, of the origin of which it contains the account. Hence it stands in the Hebrew Canon after Koheleth or Ecclesiastes, according to the order of time in which the *Megilloth* are read. By the Jews it is called the *Megillah*, by way of eminence, either from the importance they attach to its contents, or from the circumstance that from a very early period it came to be written on a special roll (מֵגִלָּה) for use in the synagogue (*Hottinger, Thes. Phil.* p. 494). In the Sept. it appears with numerous additions, prefixed, interspersed, and appended; many of which betray a later origin, but which are so inwrought with the original story as to make with it a continuous and, on the whole, harmonious narrative. By the Christians it has been variously placed; the Vulgate places it between Tobit and Judith, and appends to it the apocryphal additions [see next article]; the Protestant versions commonly follow Luther in placing it at the end of the historical books.

II. *Canonicity.*—Among the Jews this book has always been held in the highest esteem. There is some

ground for believing that the feast of Purim was by some of the more ancient Jews opposed as an unlicensed novelty (*Talm. Mieros. Megilloth*, fol. 70; Lightfoot, *Hor. Heb.* ad Joh. x, 22); but there is no trace of any doubt being thrown by them on the canonicity of the book. By the more modern Jews it has been elevated to a place beside the law, and above the other hagiographa, and even the prophets (*Pfeiffer, Thes. Hæretic.* p. 597 sq.; *Carpoz, Introd.* p. 366 sq.). Indeed, it is a saying of Maimonides that in the days of the Messiah the prophetic and hagiographical books will pass away, except the book of Esther, which will remain with the Pentateuch. This book is read through by the Jews in their synagogues at the feast of Purim, when it was, and is still in some synagogues, the custom at the mention of Haman's name to hiss, and stamp, and clench the fist, and cry, Let his name be blotted out; may the name of the wicked rot. It is said, also, that the names of Haman's ten sons are read in one breath, to signify that they all expired at the same instant of time. Even in writing the names of Haman's sons in the 7th, 8th, and 9th verses of Esth. ix, the Jewish scribes have contrived to express their abhorrence of the race of Haman; for these ten names are written in three perpendicular columns of 3, 3, 4, as if they were hanging upon three parallel cords, three upon each cord, one above another, to represent the hanging of Haman's sons (*Stehelin's Rabbinical Literature*, ii, 349). The Targum of Esth. ix, in Walton's Polyglot, inserts a very minute account of the exact position occupied by Haman and his sons on the gallows, the height from the ground, and the interval between each; according to which they all hung in one line, Haman at the top, and his ten sons at intervals of half a cubit under him. It is added that Zeresh and Haman's seventy surviving sons fled, and begged their bread from door to door, in evident allusion to Psa. cix, 9, 10. Some of the ancient Jewish teachers were somewhat staggered at the peculiarity of this book, that the name of God does not once occur in it; but others accounted for it by saying that it was a transcript, under divine inspiration, from the Chronicles of the Medes and Persians, and that, being meant to be read by heathen, the sacred name was wisely omitted. Baxter (*Saint's Rest*, pt. iv, chap. iii) speaks of the Jews using to cast to the ground the book of Esther because the name of God was not in it. (See Pareau's *Principles of Interpretation*, and Hottinger's *Thes. Phil.* p. 488.) But Wolf (*Bibl. Hebr.* part ii, p. 90) denies this, and says that if any such custom prevailed among the Oriental Jews, to whom it is ascribed by Sandys, it must have been rather to express their hatred of Haman. Certain it is that this book was always reckoned in the Jewish canon, and is named or implied in almost every enumeration of the books composing it, from Josephus downwards.

It has been questioned whether Josephus considered the book of Esther as written before or after the close of the canon. Du Pin maintains that, as Josephus asserts [see DEUTERO-CANONICAL] that the sacred books were all written between the time of Moses and the reign (*ἀνοχῆ*) of Artaxerxes, and (*Ant.* xi) places the history of Esther in that reign, he consequently includes it among those books which he says were of inferior authority, as written under and since the reign of that prince (*Complete Hist. of the Canon*, p. 6). Eichhorn, on the other hand, favors the opinion that Josephus meant to include the reign of that prince within the prophetic period, and concludes that this historian considered the book of Esther as the latest of the canonical writings.

In the Christian Church the book of Esther has not been so generally received. Jerome mentions it by name in the *Prolog. Gal.*, in his Epistle to Paulinus, and in the preface to Esther; as does Augustine, *De Civit. Dei*, and *De Doctr. Christ.*, and Origen, as cited by Eusebius (*Hist. Eccles.* vi, 25), and many others.

Whilst apparently accepted without question by the churches of the West in the early centuries, the testimony of the Eastern Church concerning it is more fluctuating. It is omitted in the catalogue of Melito, an omission which is shared with Nehemiah, and which some would account for by supposing that both these books were included by him under Ezra, a supposition that may be admitted in reference to Nehemiah, but is less probable in reference to Esther. Origen inserts it, though not among the historical books, but after Job, which is supposed to indicate some doubt regarding it on his part. In the catalogues of the Council of Laodicea, of the apostolical canons, of Cyrill of Jerusalem, and of Epiphanius, it stands among the canonical books; by Gregory of Nazianzus it is omitted; in the *Synopsis Scrip. Sac.* it is mentioned as said by some of the ancients to be accepted by the Hebrews as canonical; and by Athanasius it is ranked among the *ἀναγνώσκόμενα*, not among the canonical books. These differences undoubtedly indicate that this book did not occupy the same unquestioned place in general confidence as the other canonical books of the O. T.; but the force of this, as evidence, is greatly weakened by the fact that it was not on historical or critical grounds, but rather on grounds of a dogmatical nature, and of subjective feeling, that it was thus treated. On the same grounds, at a later period, it was subjected to doubt, even in the Latin Church (Junilius, *De partibus Leg. Div.* c. 3). At the time of the Reformation, Luther, on the same grounds, pronounced the book more worthy to be placed "extra canonem" than "in canone" (*De sermo arbitrio*; comp. his *Tischreden*, iv, 403, Berlin ed. 1848), but in this he stood alone in the Protestant churches of his day; nor was it till a comparatively recent period that his opinion found any advocates. The first who set himself systematically to impugn the claims of the book was Semler, and him Oeder, Corrodi, Augusti, Bertholdt, De Wette, and Bleek have followed. Eichhorn with some qualifications, Jahn and Havernick unreservedly, have defended its claims.

The objections urged against the canonicity of the book resolve themselves principally into these three—1. That it breathes a spirit of narrow, selfish, national pride and vindictiveness, very much akin to that displayed by the later Jews, but wholly alien from the spirit which pervades the acknowledged books of the O. T.; 2. That its untheocratic character is manifested in the total omission in it of the name of God, and of any reference to the divine providence and care of Israel; and, 3. That many parts of it are so incredible as to give it the appearance rather of a fiction or romance than the character of a true history (Bertholdt, De Wette, etc.). In regard to the first of these, whilst it must be admitted that the spirit and conduct of the Jews, of whom the author of this book writes, are not those which the religion of the O. T. sanctions, it remains to be asked whether, in what he narrates of them, he has not simply followed the requirements of historical fidelity; and it remains to be proved that he has in any way indicated that his own sympathies and convictions went along with theirs. There can be little doubt that among the Jews of whom he writes a very different state of religious and moral feeling prevailed from what belonged to their nation in the better days of the theocracy. The mere fact that they preferred remaining in the land of the heathen to going up with their brethren who availed themselves of the permission of Cyrus to return to Judea, shows how little of the true spirit of their nation remained with them. This being the case, the historian could do nothing else than place before us such a picture as that which this book presents; had he done otherwise he would not have narrated the truth. It does not follow from this, however, that he himself sympathized with those of whom he wrote, in their motives, feelings, and conduct, or that the spirit dominant in them

is the spirit of his writing. It is true, occasions may frequently present themselves in the course of his narrative when he might have indulged in reflections of an ethical or didactic character on what he has narrated, but to do this may not have been in the plan and conception of his work, and he may therefore have intentionally avoided it.

Observations to the same effect may be made on the second objection. If the purpose of the author was to relate faithfully and without comment the actions and words of persons who were living without any vital recognition of God, the omission of all reference to God in the narrative will be sufficiently accounted for by this circumstance. If it be said, But a pious man would have spontaneously introduced some such reference, even though those of whom he wrote gave him no occasion to do so by their own modes of speech or acting, it may suffice to reply that, as we are ignorant of the reasons which moved the author to abstain from all remarks of his own on what he narrates, it is not competent for us to conclude from the omission in question that he was not himself a pious man. If again it be said, How can a book which simply narrates the conduct of Jews who had to a great extent forgotten, if they had not renounced the worship of Jehovah, without teaching any moral lessons in connection with this, be supposed to have proceeded from a man under God's direction in what he wrote, it may be replied that a book may have a most excellent moral tendency, and be full of important moral lessons, even though these are not formally announced in it. That it is so with the book of Esther may be seen from such a work as M'Crie's *Lectures* on this book, where the great lessons of the book are expounded with the skill of one whose mind had been long and deeply versed in historical research. As the third objection above noticed rests on the alleged unhistorical character of the book, its force will be best estimated after we have considered the next head.

III. *Credibility.*—In relation to this point three opinions have been advanced: 1. That the book is wholly unhistorical, a mere legend or romance; 2. That it has a historical basis, and contains some true statements, but that with these much of a fabulous kind is intermixed; 3. That the narrative is throughout true history. Of these opinions the first has not found many supporters: it is obviously incompatible with the reception of the book into the Jewish canon; for, however late be the date assigned to the closing of the canon, it is incredible that what must have been known to be a mere fable, if it is one, could have found a place there; it is incompatible with the early observance by the Jews of the feast of Purim, instituted to commemorate the events recorded here (comp. 2 Macc. xv, 36); and it is rendered improbable by the minuteness of some of the details, such as the names of the seven eunuchs (i, 10), the seven officers of the king (i, 14), the ten sons of Haman (ix, 7-10), and the general accurate acquaintance with the manners, habits, and contemporary history of the Persian court which the author exhibits. (See the ample details on this head collected by Eichhorn and Hävernick, *Einhüt.* 11, i, 338-357). The reception of the book into the canon places a serious difficulty in the way of the second opinion; for if those who determined this would not have inserted a book wholly fabulous, they would as little have inserted one in which fable and truth were indiscriminately mixed. It may be proper, however, to notice the parts which are alleged to be fabulous, for only thus can the objection be satisfactorily refuted. First, then, it is asked, How can it be believed that if the king had issued a decree that all the Jews should be put to death, he would have published this twelve months before it was to take effect (iii, 12, 13)? But, if this seem incredible to us, it must, if true, have appeared no less incredible to those for whom the book was written; and nothing can be more im-

probable than that a writer of any intelligence should by *mistake* have made a statement of this kind; indeed, a fiction of this sort is exactly what a fabulist would have been most certain to have avoided; for, knowing it not to be in accordance with fact and usage, he must have been sure that its falsehood would be at once detected. Secondly, it is said to be incredible that the king, when he repented of having issued such an edict, should, as it could not be recalled, have granted permission to the Jews to defend themselves by the slaughter of their enemies, and that they should have been permitted to do this to such an extent as to destroy 75,000 of his own subjects. To our habits of thinking this certainly appears strange; but we must not measure the conduct of a monarch like Xerxes by such a standard: the caprices of Oriental despots are proverbially startling, their indifference to human life appalling; and Xerxes, as we know from other sources, was apt even to exceed the limits of ordinary Oriental despotism in these respects (comp. Herod. i, 183; vii, 35, 39, 238; ix, 108-113; Justin, ii, 10, 11). Now if it be true, as Diodorus Siculus relates, that Xerxes put the Medians foremost at Thermopylae on purpose that they might all be killed, because he thought they were not thoroughly reconciled to the loss of their national supremacy, it is surely not incredible that he should have given permission to Haman to destroy a few thousand strange people like the Jews, who were represented to be injurious to his empire, and disobedient to his laws. Nor, again, when we remember what Herodotus relates of Xerxes in respect to promises made at banquets, can we deem it incredible that he should perform his promise to Esther to reverse the decree in the only way that seemed practicable. It is likely, too, that the secret friends and adherents of Haman would be the persons to attack the Jews, which would be a reason why Ahasuerus would rather rejoice at their destruction. Thirdly, it is asked how can we believe that the king would issue an edict to all his subjects that every man should bear rule in his own house (i, 22)? We reply that, as the edicts of Oriental despots are not all models of wisdom and dignity, here seems to us nothing improbable in the statement that such an edict, under the circumstances, issued by Ahasuerus. Fourthly, is it credible, it is asked, that Esther should have been so long a time in the palace of the king without her descent being known to the king or to Haman, as appears to have been the case? We reply that it does not appear certain that her Jewish descent was unknown; and, if it were, we are too little acquainted with the usages of the Persian royal harem to be able to judge whether this was an unlikely thing to occur or not: we may suggest, however, that the writer of the history was somewhat more likely to know the truth on such points than German professors in the 19th century.

The usual way in which the author of 2 Macc. xv, 35 alludes to the feast of Purim, under the name of "Mithrochæus's day," as kept by the Jews in the time of Nicom, is another strong testimony in its favor, and tends to justify the strong expression of Dr. Lee (quoted in Whiston's Josephus, xi, ch. vi), that "the truth of this history is demonstrated by the feast of Purim, kept up from that time to this very day."

The style of writing is remarkably chaste and simple, and the narrative of the struggle in Esther's mind between fear and the desire to save her people, and of the final resolve made in the strength of that help which was to be sought in prayer and fasting, is very touching and beautiful, and without any exaggeration. Even De Wette observes that the book is simple in its style, free from declamation, and thus advantageously distinguished from the similar stories in the Apocrypha (*Introduction*, Parker's translation, Boston, 1843).

IV. *Authorship and Date.*—Augustine (*De Civitate Dei*) ascribes the book to Ezra. Eusebius (*Chronic.*

xlvii, d. 4), who observes that the facts of the history are posterior to the time of Ezra, ascribes it to some later but unknown author. Clemens Alexandrinus (*Stromata*, lib. i, p. 329) assigns it and the book of Maccabees to Mordecai. The pseudo-Philo (*Chronographia*) and Rabbi Azarias maintain that it was written at the desire of Mordecai by Jehoiakim, son of Joshua, who was high-priest in the 12th year of the reign of Artaxerxes. The subscription to the Alexandrian version states that the epistle regarding the feast of Purim was brought by Dositheus into Egypt, under Ptolemy and Cleopatra (B.C. cir. 160); but it is well known that these subscriptions are of little authority. The authors of the Talmud say that it was written by the members of the Great Synagogue (q. v.), who also wrote Ezekiel and the twelve Prophets. But the whole account of the Great Synagogue, said to have been instituted by Ezra, and concluded by Simon the Just, who is said to have closed the canon, and whose death took place B.C. 292, is by some looked upon as a rabbinical romance. Of all these suppositions, the ascription to Mordecai seems the most probable. The minute details given of the great banquet, of the names of the chamberlains and eunuchs, and Haman's wife and sons, and of the customs and regulations of the palace, betoken that the author lived at Shushan, and probably at court, while his no less intimate acquaintance with the private affairs both of Esther and Mordecai well suits the hypothesis of the latter being himself the writer. It is also in itself probable that as Daniel, Ezra, and Nehemiah, who held high offices under the Persian kings, wrote an account of the affairs of the nation, in which they took a leading part, so Mordecai should have recorded the transactions of the book of Esther likewise. The termination of the book with the mention of Mordecai's elevation and government agrees also with this view, which has the further sanction of many great names, as Aben Ezra, and most of the Jews, Vat. Abr., Carpov, and many others. Those who ascribe it to Ezra, or the men of the Great Synagogue, may have merely meant that Ezra edited and added it to the canon of Scripture, which he probably did, bringing it, and perhaps the book of Daniel, with him from Babylon to Jerusalem. See MORDECAI.

That the book was written after the downfall of the Persian monarchy in the time of the Maccabees is the conclusion of Bertholdt, De Wette, and Bleek. The reasons, however, which they assign for this are very feeble, and have been thoroughly nullified by Hävernick. The latter supposes it to have been written at a much earlier date, and the reasons he urges for this are—1. The statement in ix, 52, compared with x, 2, where the author places what he himself has written on a par in point of authenticity with what is recorded in the Persian annals, as if contemporary productions; 2. The vividness, accuracy, and minuteness of his details respecting the Persian court; 3. The language of the book, as presenting, with some Persianisms, and some words of Chaldaic affinity, which do not occur in older Hebrew (such as מִצְרַיִם, מִצְרַיִת, מִצְרַיִת, מִצְרַיִת, מִצְרַיִת, מִצְרַיִת), those idioms which characterize the books of Ezra, Nehemiah, and Chronicles; and, 4. The fact that the closing of the canon cannot be placed later than the reign of Artaxerxes, so that an earlier date must be assigned to this book, which is included in it. See EZRA. Whether the book was written in Palestine or in Persia is uncertain, but probability inclines to the latter supposition.—Kitto, s. v.; Smith, s. v.

VI. *Commentaries.*—The following are separate exegetical works on the canonical portion of the book of Esther, in addition to the formal *Introductions* to that portion of Scripture, and exclusive of the purely rabbinical treatises on the Jewish usages referred to in the book; the most important have an asterisk (\*) prefixed: Raban Maurus, *Commentarij* (in *Opp.*); Arama, מִצְרַיִת (Constantinople, 1518, 4to); Bañolas, מִצְרַיִת

(Riva di Trento, 1560, 4to); Strigel, *Scholía* (Lips. 1571, 1572, 8vo); Brentius, *Commentarii* (Tubing. 1575, 4to; in Engl. by Stockwood, Lond. 1584, 8vo); Askenazi, *מִשְׁנֵי יְהוֹשֻׁעַ* (Cremona, 1576, 4to, etc.); Fear-  
dent, *Commentaria* (Par. 1585, 8vo, etc.); Melammed, *מִשְׁנֵי יְהוֹשֻׁעַ* (Constantpl. 1585, 4to); \*Drusius, *Annotaciones* (Leyd. 1586, 8vo); \*Senarius, *Commentarii* (Mogunt. 1590, fol., etc.); Zahalon, *מִשְׁנֵי יְהוֹשֻׁעַ* (Ven. 1594, 4to); Alsheich, *מִשְׁנֵי יְהוֹשֻׁעַ* (Ven. 1601, 4to); Cooper, *Notes* (London, 1609, 4to); D'Acquino, *Ruschi Scholia* (Par. 1622, 4to); Wolder, *Dispositiones* (Dantz. 1625, 4to); \*Sanctius, *Commentarii* (Leyd. 1628, fol.); Conzio, *Commento* (Chiari, 1628, 4to); Duran, *מִשְׁנֵי יְהוֹשֻׁעַ* (Ven. 1632, 4to); Crommius, *Theses* (Lovan. 1632, 4to); Merkel, *מִשְׁנֵי יְהוֹשֻׁעַ* (Lublin, 1637, 4to); \*Bonnat, *Commentarius* (Col. Agr. 1647, fol.); Montanus, *Commentarius* (Madr. 1648, fol.); Trapp, *Commentary* (London, 1656, fol.); De Celada, *Commentarii* (Lugd. 1658, fol.); Jackson, *Explanation* (London, 1658, 4to); Barnes, *Paraphrasis poetica* (Lond. 1679, 8vo); Adam, *Observaciones* (Groningen, 1710, 4to); Rambach, *Nota* (in his *Adnot. V. T. ii, 1043*); Heumann, *Estheræ auctoritas* (Gotting. 1736, 4to); Meir, *מִשְׁנֵי יְהוֹשֻׁעַ* (Fürth, 1737, 8vo); Nestorides, *Annotazioni* (Ven. 1746, 4to); Ancher, *De auctoritate Estheræ* (Havn. 1772, 4to); Crusius, *Nützl. Gebrauch der B. Esther* (from the Latin, Lpz. 1773, 4to); \*Vos, *Oratio* (Ultr. 1775, 4to); Zinck, *Commentarius* (Augsb. 1780, 4to); De Rossi, *Var. Lect.* (Rome, 1782, 8vo); Pereles, *מִשְׁנֵי יְהוֹשֻׁעַ* (Prague, 1784, 4to); Wolfsohn, *מִשְׁנֵי יְהוֹשֻׁעַ* (Berl. 1788, 8vo); Lamson, *Discourses* (Edinb. 1804, 12mo); Löwe, *מִשְׁנֵי יְהוֹשֻׁעַ* (Noydwor, 1801, 4to); \*Schirmer, *Observaciones* (Vratislav. 1820, 8vo); \*Kele, *Vinilize* (Freib. 1820, 4to); \*Calmborg, *Commentarius* (Hamb. 1837, 4to); \*M'Crie, *Lectures* (Works, 1838, 8vo); \*Baumgarten, *De fide Estheræ* (Hal. 1839, 8vo); Morgan, *Esther typical* (London, 1855, 8vo); Crosthwaite, *Lectures* (London, 1858, 12mo); Davidson, *Lectures* (Edinb. 1859, 8vo); \*Bertheau (in the *Kurzgef. evang. Handb.* Lpz. 1862, 8vo); Oppert, *Commentaire d'après les inscriptions Perses* (Par. 1864, 8vo). See OLD TESTAMENT.

ESTHER, APOCRYPHAL ADDITIONS TO THE *Book of*.—Besides the many minor deviations from the Hebrew, there are six important additions in the Septuagint and the other ancient versions of the book of Esther.

1. *Title and Position*.—In the Sept. and the *Old Latin* these additions are dispersed through the canonical book, forming therewith a well-adjusted whole, and have therefore no separate title. St. Jerome, however, separated them in his translation, and removed them to the end of the book, because they are not found in the Hebrew. They are, therefore, in this position in the MSS. and the printed editions of the Vulgate, and form, according to cardinal Hugo's division, the last seven chapters of the canonical Esther. Luther, who was the first that separated the apocryphal from the canonical books, entirely detached these additions, and placed them among the Apocrypha under the title "*Stücke in Esther*." In the Zurich Bible, where the apocryphal and canonical books are also separated, the canonical volume is called 1 *Esther*, and these additions are denominated 2 *Esther*. Our English versions, though following Luther's arrangements, are not uniform in their designation of these additions. Thus Coverdale calls them "*The chapters of the book of Hester, which are not found in the text of the Hebrew, but in the Greek and Latin*." In Matthews and the Bishops' Bible, which are followed by the A. V., they are entitled, "*The rest of the chapters of the book of Esther, which are found neither in the Hebrew nor in the Chaldee*," whilst the Geneva version adopts Luther's title.

The reason of their present confused arrangement seems to be this: When Jerome translated the book

of Esther, he first gave the version of the Hebrew only as being alone authentic. He then added at the end a version in Latin of those several passages which he found in the Sept., and which were not in the Hebrew, stating where each passage came in, and marking them all with an obelus. The first passage so given is that which forms the continuation of ch. x (which of course immediately precedes it), ending with the entry about Dositheus. Having annexed this conclusion, he then gives the *Proœmium*, which he says forms the beginning of the Greek Vulgate, beginning with what is now ver. 2 of ch. xi; and so proceeds with the other passages. But in subsequent editions all Jerome's explanatory matter has been swept away, and the disjointed portions have been printed as ch. xi, xii, xiii, xiv, xv, xvi, as if they formed a narrative in continuance of the canonical book. The extreme absurdity of this arrangement is nowhere more apparent than in ch. xi, where the verse (1) which closes the whole book in the Greek copies, and in St. Jerome's Latin translation, is actually made immediately to precede that (ver. 2) which is the very first verse of the *Proœmium*. As regards the place assigned to Esther in the printed Sept., in the Vatican edition (not MS.), and most others, it comes between Judith and Job. Its place before Job is a remnant of the Hebrew order, Esther there closing the historical, and Job beginning the metrical *Megilloth*. Tobit and Judith have been placed between it and Nehemiah, doubtless for chronological reasons. But in the ancient MSS. the position is different. See BIBLE.

II. *Design and Contents*.—The object of these additions is to give a more decidedly religious tone to the record contained in the book of Esther, and to show more plainly how wonderfully the God of Israel interposed to save his people and confound their enemies. This the writer has effected by elaborating upon the events narrated in the canonical volume as follows:

1. Ch. i, 1 of the canonical volume is preceded in the Sept. by a piece which tells us that Mordecai, who was in the service of Artaxerxes, dreamt of the dangers which threatened his people, and of their deliverance (ver. 1-12). He afterwards discovered a conspiracy against the king, which he discloses to him, and is greatly rewarded for it (ver. 13-18). This is, in the Vulgate and Eng. version, ch. xi, 2-xii, 6.

2. Between ver. 13 and 14 of ch. iii in the canonical book, the Septuagint gives a copy of the king's edict addressed to all the satraps, to destroy without compassion that foreign and rebellious people, the Jews, for the good of the Persian nation, in the fourteenth day of the twelfth month of the coming year. This is, in the Vulg. and Eng. version, ch. xiii, 1-7.

3. At the end of ch. iv, 17 of the canonical book, the Sept. has two prayers of Mordecai and Esther, that God may avert the impending destruction of his people. This is, in the Vulg. and Eng. version, ch. xiii, 8-xiv, 19.

4. Between ver. 1 and 2 of ch. v in the canonical book, the Sept. inserts a detailed account of Esther's visit to the king. This is, in the Vulg. and Eng. version, ch. xv, 1-16.

5. Between ver. 13 and 14 of ch. viii in the canonical books, the Sept. gives a copy of the edict, which the king sent to all his satraps, in accordance with the request of Mordecai and Esther, to abolish his former decree against the Jews. This is, in the Vulg. and Eng. version, ch. xvi, 1-24.

6. At the close of the canonical book, ch. x, 3, the Sept. has a piece in which we are told that Mordecai had now recalled to his mind his extraordinary dream, and seen how literally it had been fulfilled in all its particulars. It also gives us an account of the proclamation of the Purim festival in Egypt.

The whole book is closed with the following entry: "In the fourth year of the reign of Ptolemaeus and Cleopatra, Dositheus, who said he was a priest and

Levite, and Ptolemy his son, brought this epistle of Phurim, which they said was the same, and that Ly-simachus, the son of Ptolemy, that was in Jerusalem, had interpreted it." This entry was apparently intended to give authority to this Greek version of ESTHER by pretending that it was a certified translation from the Hebrew original. Ptolemy Philometor, who is here meant, began to reign B.C. 181. He is the same as is frequently mentioned in 1 Macc. (e. g. x, 57; xi, 12; comp. Joseph. *Ant.* xiii, 4, 1 and 5, and Clinton, *F. H.* iii, 393). Dositheus seems to be a Greek version of Mattithiah; Ptolemy was also a common name for Jews at that time.

III. *Origin, historical Character, and Unity.*—The patriotic spirit with which the Jewish nation so fondly expatiated upon the remarkable events and characters of by-gone days, and which gave rise to those beautiful legends preserved in their copious literature, scarcely ever had a better opportunity afforded to it for employing its richly inventive powers to magnify the great Jehovah, embalm the memory of the heroes, and brand the names of the enemies of Israel, than in the canonical book of Esther. Nothing could be more natural for a nation who "have a zeal of God" than to supply the name of God, and to print out more distinctly his interposition in their behalf in an inspired book, which, though recording their marvellous escape from destruction, had for some reasons omitted avowedly to acknowledge the Lord of Israel. Besides, the book implies and suggests far more than it records, and it cannot be doubted that there are many other things connected with the history it contains which were well known at the time, and were transmitted to the nation. This is evident from the fact that Josephus (*Ant.* xi, 6, 6 sq.) gives the edict for the destruction of the Jews in the Persian empire, the prayers of Mordecai and Esther, and the second edict authorizing the Jews to destroy their enemies, also mentioning the name of the eunuch's servant, a Jew, who betrayed the conspiracy to Mordecai, and citing other passages from the Persian chronicles read to Ahasuerus, besides that relating to Mordecai, and amplifications of the king's speech to Haman, etc.; and that the second Targum, the Chaldee, published by De Rossi, and Josippon ben-Gorion (ed. Breithaupt, p. 74 sq.), give the dream of Mordecai, as well as his prayer and that of Esther.

The first addition which heads the canonical book, and in which Mordecai foresees in a dream both the dangers and the salvation of his people, is in accordance with the desire to give the whole a more religious tone. The second addition originated from the fact that ch. iii, 13 of the canonical book speaks of the royal edict, hence this piece pretends to give a copy of the said document; the same is the case with the third addition, which follows ch. iv, 17, and gives the prayers of Mordecai and Esther, for the said passage in the canonical volume relates that Esther ordered prayers to be offered. The fourth addition after ch. v, 1, giving a detailed account of Esther's interview with the king, originated from a desire to give more information upon the fact, which is simply alluded to in the canonical passage. The fifth addition, after ch. viii, 13, originated in the same manner as the second, viz. in a desire to supply a copy of the royal edict, while the sixth addition, after ch. x, 3, beautifully concludes with an interpretation of the dream with which the first addition commences the canonical volume. From this analysis it will be seen that these supplementary and embellishing additions are systematically dispersed through the book, and form a well-adjusted and continuous history. In the Vulgate, however, which is followed by the versions of the Reformers on the Continent and our English translations, where these additions are torn out of the proper connection and removed to a separate place, they are most incomprehensible.

IV. *Author, Date, and original Language.*—From

what has been remarked in the foregoing section, it will at once be apparent that these apocryphal additions were neither manufactured by the translator of the canonical Esther into Greek, nor are they the production of the Alexandrian nor of any other school or individual, but embody some of the numerous national stories connected with this marvellous deliverance of God's ancient people, the authorship of which is lost in the nation. Many of them date as far back as the nucleus of the event itself, around which they cluster, and all of them grew up at first in the vernacular language of the people (i. e. in Hebrew or Aramaic), but afterwards assumed the complexion and language of the countries in which the Jews happened to settle down. Besides the references given in the preceding section which lead us to these conclusions, we also refer to the two Midrashim published by Jelinek in his *Beth Ha-Midrash*, i (Lpz. 1853), 1 sq. In ch. iii the pretended copy of Artaxerxes's decree for the destruction of the Jews is written in thorough Greek style; the prayer of Esther excuses her for being wife to the uncircumcised king, and denies her having eaten anything or drunk wine at the table of Haman; the pretended copy of Artaxerxes's letter for reversing the previous decree is also of manifestly Greek origin in ch. viii, in which Haman is called a Macedonian, and is accused of having plotted to transfer the empire from the Persians to the Macedonians, a palpable proof of this portion having been composed after the overthrow of the Persian empire by the Greeks.

V. *Canonicity of these Additions.*—It is of this Sept. version that Athanasius (*Fest. Epist.* p. 39, Oxf. translation) spoke when he ascribed the book of Esther to the non-canonical books; and this, also, is perhaps the reason why, in some of the lists of the canonical books, Esther is not named, as, e. g. in those of Melito of Sardis and Gregory Nazianzen (see Whitaker, *Disput. on H. Scr.* Park. Soc. p. 57, 58; Cosin in the *Canon of Scr.* p. 49, 50), unless in these it is included under some other book, as Ruth or Esdras ("this book of Esther, or sixth of Esdras, as it is placed in some of the most ancient copies of the Vulgate," *Lee's Dissert. on 2d Esdras*, p. 25). The fathers, who regarded the Septuagint as containing the sacred scriptures of the O. T., believed in the canonicity of these additions. Even Origen, though admitting that they are not in the Hebrew, defended their canonicity (*Ep. ad African.* ed. West, p. 225), and the Council of Trent pronounced the whole book of Esther, with all its parts, to be canonical. These additions, however, were never included in the Hebrew canon, and the fact that Josephus quotes them only shows that he believed them to be historically true, but not inspired. St. Jerome, who knew better than any other father what the ancient Jews included in their canon, most emphatically declares them to be spurious ("Librum Esther variis translatoribus constat esse vitiatum; quem ego de archivis Hebræorum relevans, verbum e verbo expressis transtuli. Quem librum editio vulgata laciniis hinc inde verborum sinibus [al. funibus] trahit, addens ea quæ ex tempore dici poterant et audiri; sicut solum est scholaribus disciplinis sumto themate excogitare, quibus verbis uti potuit, qui injuriam passus est, vel qui injuriam fecit," *Pref. in 1 Esth.*). Sixtus Senensis, in spite of the decision of the council, speaks of these additions after the example of Jerome (as "laciniis hinc inde quorundam scriptorum temeritate insertas"), and thinks that they are chiefly derived from Josephus; but this last opinion is without probability. The manner and the order in which Josephus cites them (*Ant.* xi, vi) show that they had already, in his days, obtained currency among the Hellenistic Jews as portions of the book of Esther, as we know from the way in which he cites other apocryphal books that they were current likewise, with others which are now lost; for it was probably from such that Josephus derived his stories about Moses, about Sanballat, and the

temple on Mount Gerizim, and the meeting of the high-priest and Alexander the Great.

VI. *Literature*.—Josephus, *Ant.* xi, 6, 6 sq.; the *Mid-rash Esther*; Targum *Sheni* on Esther, in Walton's *Polyglot*, vol. iv.; Josippon ben-Gorion (ed. Breithaupt, 1740), p. 72 sq.; Whitaker, *Disputation on Scripture* (Park. Soc., ed. 1849), p. 71, etc.; Usher, *Synagoga de Græca LXX interpretum versione* (London, 1655); De Rossi, *Specimen Variarum Lectionum sacri Textus et Chaldaica Estheris Additamenta* (Romæ, 1782); Eichhorn, *Einleitung in d. Apokr. Schriften d. A. T.* (Leip. 1795), p. 483 sq.; Fritzsche, *Ἐσθήρ, Duplex libri textum ad optimos cdd. emend. et cum selecta lectionis varietate* (ed. Torici, 1848); and by the same author, *Exegetisches Handbuch z. d. Apokr. d. A. T.* i, 69 sq.; Davidson, *The Text of the O. T. considered* (Lond. 1856), p. 1010 sq.; Herzfeld, *Geschichte d. Volkes Israel*, vol. i (Nordhausen, 1857), p. 365 sq.; Keil, *Lehrbuch der historisch-kritischen Einleitung*, etc. (ed. 1859), p. 705 sq.; Wolf's *Bibl. Hebr.* p. 11, 88 sq.; Hotting, *Thesaur.* p. 494; Walton, *Proleg.* ix, § 13; Nickes, *De Esther libro* (Rom. 1857, 1858); Baumgarten, *De Fide Lib. Esther* (Hal. 1839); Schaurer (ed.), *Var. Lect. Estheris* (2d ed. Tubing. 1788).—Kitto, s. v.; Smith, s. v. See APOCRYPHA.

ESTHER, FAST OF (אֶסְתֵּר וְיָמֵי צוּמָה), so called from the fact that it was ordered by Esther to avert the impending destruction which at that time threatened the whole Jewish population of the Persian dominions (comp. Esther iv, 16, 17). The Jews to this day keep this fast on the 13th of Adar, the day which was appointed for their extirpation, and which precedes the *feast of Purim*, because it was ordained both by Esther and Mordecai, that it should continue a national fast, to be observed annually in commemoration of that eventful day (comp. Esther ix, 31). During the Maccabæan period, and for some time afterwards, this fast was temporarily superseded by a festival which was instituted to celebrate the anniversary of the victory obtained by Judas Maccabæus over Nicanor on the 13th of Adar (comp. 1 Macc. vii, 49; Josephus, *Ant.* xii, 10, 5; *Megillath Taanith*, c. xii; Josippon ben-Gorion, iii, 22, p. 244, ed. Breithaupt). But this festival has long since ceased to be celebrated, and as early as the ninth century of the Christian era we find that the *fast of Esther* was again duly observed (comp. *Sheelthoth* of R. Achai, Purim 4), and it has continued ever since to be one of the fasts in the Jewish calendar. The Jews entirely abstain from eating and drinking on this day, and introduce into the daily service penitential psalms, and offer prayers which have been composed especially for this occasion. If the 13th of Adar happens to be on a Sabbath, this fast is kept on the Friday, because fasting is not allowed on the Sabbath day. Some Jews go so far as to fast *three days*, according to the example of Esther (comp. iv, 6).—Kitto, s. v. See CALENDAR, JEWISII.

Estienne. See STEPHENS.

Estius, GULIELMUS (*William Hessels van Est*), an eminent Roman Catholic theologian, was born at Gorcum, Holland, 1542, and studied at Utrecht and Louvain. He was for ten years professor at Louvain; in 1580 he became professor of divinity at Douai, and in 1603 chancellor of the University. Estius obtained great repute for learning and piety. Benedict XIV named him *doctor fœdatusissimus*. He died at Douai Sept. 20, 1613. His principal writings are *Commentarii in Epistolas Apostolicas* (Douai, 1614–16; Col. 1631, 3 vols. fol. in 1; Paris, 1679, fol.; Rouen, 1709, 2 vols. fol.);—*In quat. libros sententiarum commentarii* (Par. 1638, fol.; Naples, 1720);—*Annot. in præcipua difficultiora S. S.* (Antw. 1621, fol.). His Commentary on the Epistles is extolled alike by Romanists and Protestants. There is a new edition, edited by Sausen (Mayence, 1841, 8vo).—Horne, *Introd. Bib. Appendix*, p. 134; Hofer, *Nouv. Biog. Générale*, xxiv, 588.

Estrangelo. See SYRIAC LANGUAGE.

E'tam (Hebrew *Eytam'*, עֵיטָם, *eyrie*, i. e. place of ravenous birds; Sept. Ἐτάμ in Judges, Αἰτάμ in 1 Chron. iv, 3, elsewhere Αἰτάρ; Josephus Αἰτάρ in *Ant.* v, 8, 8; Ἐτάμ in *Ant.* viii, 10, 1; Ἡτάμ in *Ant.* viii, 7, 3; Vulg. *Etam*), the name apparently of two places in Palestine.

1. A village (עֵיטָם) of the tribe of Simeon, specified only in the list in 1 Chron. iv, 32 (comp. Josh. xix, 7); but that it is intentionally introduced appears from the fact that the number of places is summed as five, though in the parallel list as four. Near this place (hence its name, q. d. eagle's nest) was probably situated a "rock" (עֵיטָם, *πίτρα*, *silva*) or cliff, into a cleft or chasm (עֵיטָם, A. V. "top") of which Samson retired after his slaughter of the Philistines, in revenge for their burning the Timnite woman who was to have been his wife (Judg. xv, 8, 11). This natural stronghold (πίτρα δ' ἱστὴν ἔχουσα, Josephus, *Ant.* v, 8, 8) was in the territory usually assigned to the tribe of Judah, yet not far from the Philistine border; and near it, probably at its foot, was Lchi or Ramath-Jehi, and En-hak-kore (xv, 9, 14, 17, 19). As Van de Velde has, with great probability, identified Lchi with Leiyich, on the edge of the Philistine plain S. E. of Gaza (*Narrative*, ii, 141), he is probably also right in locating this Etam at *tell Kheuefjeh*, a little north of it (*Memoir*, p. 311), in the immediate vicinity of tell Hara or En-hakkore (q. v.). Schwarz's location of Etam at *Khadna* (he says *Gutna*, i. e. Utma, *Palest.* p. 124) is without support.

2. A city in the tribe of Judah, fortified and garrisoned by Rehoboam (2 Chron. xi, 6). From its position in this list we may conclude that it was near Bethlehem and Tekoah; and in accordance with this is the mention of the name among the ten cities which the Sept. insert in the text of Josh. xv, 60, "Theco and Ephrath, which is Bethleem, Phagor and *Etan* (Αἰτάρ)," etc. Here, according to the statements of the Talmudists, were the sources of the water from which Solomon's gardens and pleasure-grounds were fed, and Bethlehem and the Temple supplied. (See Lightfoot, on *John* v.) Hence we may perhaps infer that the site was identical with that of Solomon's Pools at *El-Euruk*, near Bethlehem (see Schwarz, *Palest.* p. 268). See JERUSALEM; WATER. Josephus (*Ant.* viii, 7, 3) places it at fifty stadia (in some copies sixty) from Jerusalem (southward), and alleges that Solomon was in the habit of taking a morning drive to this favored spot in his chariot. It is thus probable that this was the site of one of Solomon's houses of pleasure, where he made him gardens and orchards, and pools of water (Ecl. ii, 5, 6). The same name occurs in the lists of Judah's descendants (1 Chron. iv, 3), but probably referring to the same place, Bethlehem being mentioned in the following verse. See JEZREEL 3. Dr. Robinson (*Researches*, i, 515; ii, 168) inclines to find Etam at a place about a mile and a half south of Bethlehem, where there is a ruined village called *Urtas*, at the bottom of a pleasant valley of the same name. Here there are traces of ancient ruins, and also a fountain, sending forth a copious supply of fine water, which forms a beautiful purling rill along the bottom of the valley. This location is in accordance with all the foregoing notices, and is adjacent to Solomon's Pools (Thomson, *Land and Book*, ii, 431). Williams (*Holy City*, ii, 500) fully accredits the above Rabbinical account, and also states that the old name is perpetuated in a *wady Etam*, which is on the way to Hebron from Jerusalem, and that there are still connected with it the largest and most luxuriant gardens to be met with in the hilly region of Judea.

Eternal is in general the rendering in the A. V. of the Heb. עוֹלָם, *olam'*, and the Greek αἰών or αἰώνιος (both frequently "everlasting," "ever," etc.),

besides occasionally of  $\text{קֶדֶם}$ , *ke'dem* (strictly *early*, of *yore*, referring to the past, Deut. xxxiii, 27, elsewhere "ancient," "of old," etc.), and  $\text{אֵלְעוֹלָם}$  (Rom. i, 20; "everlasting," Jude 6), which is kindred in etymology and import with  $\text{αἰώνιος}$ . Both  $\text{קֶדֶם}$  and  $\text{אֵלְעוֹלָם}$  are properly represented by "eternal," inasmuch as they usually refer to indefinite time *past* as well as *future*. The former is from the root  $\text{קִדַּם}$ , *to hide*, and thus strictly designates the occult time of the past, q. d. "time out of mind," or time immemorial (Psa. cxxix, 24; Jer. vi, 16; xviii, 15; Job xxii, 15; Amos ix, 11; Deut. xxxii, 7; Prov. xxii, 28; Psa. xxiv, 7; cxliii, 3; Ezek. xxvi, 20), but not necessarily remote antiquity (Psa. cxxxix, 24; Job xxii, 15; Jer. vi, 16; xviii, 15; Dan. ix, 24; and especially Isa. lviii, 12; lxi, 4). Prospectively it denotes an indefinite time to come, *forever*, i. e. relatively, e. g. to an individual life (Deut. xv, 17; Exod. xxi, 6; 1 Sam. xxvii, 12, etc.), that of a race (1 Sam. ii, 20; xiii, 12; 2 Sam. vii, 16; 1 Chron. xvii, 12, etc.), or of the present constitution of the universe (Eccles. i, 4; Psa. civ, 5; lxxviii, 69, etc.); or absolutely (Gen. xvii, 7; xvii, 8; Exod. xii, 14; Jer. li, 39; Eccles. xii, 5, etc.). Yet that the nature of the subject is to apply the only limitation is shown by the fact that while the term is used of God in the widest sense, both of the past and future (Gen. xxi, 33; Isa. xl, 28; Dan. xii, 7), it is also employed hyperbolically or poetically of a "good long period" (Isa. xxx, 14, 15), especially in salutations and invocations (1 Kings i, 31; Neh. ii, 3). In all these significations and applications it is often used in the plural ( $\text{קֶדֶמֶת}$ ), whether past (Isa. li, 9; Dan. ix, 24; Eccles. i, 10) or future (Psa. lxi, 5; lxxvii, 6, etc.), and this sometimes in a reduplicated form, like "ages of ages" ( $\text{אֵלְעוֹלָם}$ ). Peculiar is the Rabbinical usage (Buxtorf, *Lex. Talm.* col. 1620) for the *world* (so Greek  $\text{αἰών}$ ), but only in Eccles. iii, 11.—Gesenius's and Fürst's *Heb. Lex.* s. v.; Hommel, *De vi vocis קֶדֶם* (Wittemb. 1795).

The Greek term  $\text{αἰών}$  remarkably corresponds to the Hebrew  $\text{קֶדֶם}$  in nearly all these senses, and is its usual rendering in the Sept. It is derived from  $\text{אָו}$ , *āw*, *to breathe*, or directly from the adverb  $\text{אֵי}$  (originally  $\text{אֵי}$ ), *always* (itself an old dative from an obsolete noun  $\text{אֵיָה$  or  $\text{אֵיוֹן}$  = Lat. *ævum*, probably derived from  $\text{אָו}$ , and the same in root with the English *ever*, and also, perhaps, *age*), with the *locative* termination  $\text{-וֹן}$  appended to the root. The adjective  $\text{αἰώνιος}$ , with which we are here more directly concerned, follows most of the shades of meaning and appropriations of the primitive. Its general import is *enduring*, *perpetual*. In the N. T. it is spoken of the past in a restricted manner, in the sense of ancient or primeval (Rom. xvi, 25; 2 Tim. i, 9; Titus i, 2); or of the past and future absolutely (Rom. xvi, 26; Heb. ix, 14); elsewhere of the future, in an unlimited sense, *endless* (2 Cor. iv, 18; v, 1; Luke xvi, 9; Heb. xiii, 20; ix, 12; Rev. xiv, 6; 1 Tim. vi, 16; Philem. 15), as of the prospect of Christ's kingdom (2 Pet. i, 11), but especially of the happy future of the saints in heaven (particularly in the phrase "life everlasting," Matt. xix, 16, 29; xxv, 46, and often), or the miserable fate of the wicked in hell (e. g. as punishment, Matt. xxv, 46; condemnation, Mark iii, 29; judgment, Heb. vi, 2; destruction, 2 Thess. i, 9, or fire, Matt. xviii, 8; xxv, 41; Jude 7).—Robinson, *Lex. of the N. T.* s. v.; Leavitt, in the *Christian Month. Spect.* ix, 617; Goodwin, in the *Chris. Exam-iner*, ix, 20; x, 34, 166; xii, 97, 169; Stuart, in the *Spirit of the Pilgrims*, ii, 405; Creuer, *Wörterbuch d. N. T. Gräcität*, p. 46.

**Eternal Life** ( $\text{ζωὴ αἰώνιος}$ ). I. *Biblical Usage of the Terms*.—1. In the O. T. we find this expression occurring only in Dan. xii, 2: *Some shall awaken*  $\text{קִיְּוֹנוֹתֵיכֶם}$ , Sept. *εἰς ζωὴν αἰώνιον*, the others  $\text{קִיְּוֹנוֹתֵיכֶם}$ .

For the first indication on this point, Lev. xviii, 5; Ezek. xx, 11; xviii, 21; Habak. ii, 4 (comp. Gal. iii, 11, 12); Psa. xxxiv, 13 (comp. 1 Pet. iii, 10) are to be referred to.

2. In the N. T. it is of frequent occurrence. In the first three evangelists we find  $\text{ζωὴ αἰώνιος}$  (eternal life), or sometimes only  $\text{ζωὴ}$  (life), represented as the object and destiny of man, e. g. Matt. vii, 14; xviii, 8, 9; Luke x, 28; comp. ver. 25, and xviii, 18. The resurrection of the dead precedes it (Luke xiv, 14). It therefore comprises the whole future of the disciple of Christ, his full reward; and the idea is thus connected with that of felicity ( $\text{μισθὸς ἐν τοῖς οὐρανοῖς}$ , *reward in heaven*, Matt. v, 12; reception into the  $\text{αἰώνια σκηναί}$ , *everlasting habitations*, Luke xvi, 9). In Matt. xix, 29; xxv, 46, we find it opposed to  $\text{κόλασις αἰώνιος}$  (*eternal punishment*). Paul considers the  $\text{ζωὴ αἰώνιος}$  as the supreme reward of well-doing (Rom. ii, 7; 1 Tim. vi, 12, 19), the result of continually walking in the holiness secured to us by Christ; the  $\text{τέλος}$  (Rom. vi, 22), the reward (Gal. vi, 8), as also the object of our faith (1 Tim. i, 16), and of saving grace (Rom. v, 21), and consequently also the object of our hopes (Tit. i, 2; iii, 7; comp. Jude 21). It appears synonymous with the  $\text{ἐπαγγελία ζωῆς τῆς μελλούσης}$  (promise of the life to come) (1 Tim. iv, 8), the receiving of the incorruptible crown of righteousness (1 Cor. ix, 25; 2 Tim. iv, 8), the preservation into the heavenly kingdom (2 Tim. iv, 18). By Peter it is described as the  $\text{κληρονομία}$ , which consists in the  $\text{σωτηρία ψυχῆς}$ , revealed as  $\text{ἐὸς ἄ}$ , and retained in heaven (1 Pet. i, 4, 9; v, 1, 10). James considers it as the promised crown of life and inheritance of the kingdom (Jas. i, 12; ii, 5). In the epistle to the Hebrews it is described as the Sabbath of the people of God (iv, 9; compare xii, 22 sq., etc.). While, however, life everlasting thus belongs to the future, we must not forget that, according to Paul's exposition, it appears in its essence indissolubly connected with our present life. As our relation to God, as altered by sin, can but lead to death, so in the restoration of the original relation there must necessarily, and, indeed, as an ethical religious principle, be  $\text{ζωὴ}$  (life) presented in the  $\text{δικαιοσύνη}$ , *righteousness* (Rom. v, 21; viii, 10; Gal. iii, 21); so that  $\text{δικαιοσύνη}$ , in its connection with  $\text{ζωὴ}$  (Rom. v, 18,  $\text{δικαίωσις ζωῆς}$ , *justification of life*), constitutes the very essence of the  $\text{σωτηρία}$  (*salvation*) imputed to the subject, even though in the Judaic epistles of the apostle the  $\text{ζωὴ}$  itself is dwelt upon more than the fundamental idea of the  $\text{δικαιοσύνη}$ . Christ is  $\text{ἡ ζωὴ ἡμῶν}$  (*our life*); though yet concealed (Col. iii, 3, 4; Phil. i, 21; Gal. ii, 20; Eph. iii, 17; 1 Cor. xv, 45), he is found in us (Gal. iv, 19); we have put him on, and become parts of his body (Eph. v, 30; Gal. iii, 27; Col. i, 18, etc.). From this it results that his life of glory must also become ours, which idea is presented to us in various ways (Rom. vi, 8; 2 Tim. ii, 11, 12; Rom. v, 17, 21; viii, 30; Eph. ii, 5, 6). The Spirit gives also the  $\text{πνεῦμα ζωῆς}$  (*Spirit of life*), as the element of new life (Rom. viii, 2; comp. 2 Cor. iii, 17), the foundation of that life which overcomes that which is mortal (2 Cor. v, 4, 5; Eph. i, 14); our mortal body is by it made alive (Rom. viii, 11); its results are peace and life (Rom. viii, 6, 10, 13). In this respect eternal life is the "gift of God in Jesus Christ our Lord" (Rom. vi, 23). As  $\text{λόγος ζωῆς}$  (the word of life) (Phil. ii, 16), Christ has destroyed death, and brought life and immortality to light through the Gospel (2 Tim. i, 10).

Aside from this evident connection between eternal life and the newness of life of the Christian derived from Christ (Rom. vi, 4), the  $\text{ζωὴ αἰώνιος}$  (eternal life) is still always considered in Paul's writings as posterior to the casting off of the mortal body, and the exchange of the corruptible for the incorruptible. The consequences of these premises in their full development are first presented to us, however, in the epistles

of John. Here we find the most important principle for the subjective aspect of Christianity: ὁ πισθίων εἰς τὸν υἱὸν ἔχει ζωὴν αἰώνιον (he that believeth on the Son hath eternal life) (John iii, 36; iii, 15, 16; v, 24; vi, 47, 53-58; x, 28; xvii, 2, 3; xx, 31; 1 John v, 12, 13). Having passed from death unto life, death has no longer dominion over him (John v, 24), and he is free from the law and from the anger of God; he becomes partaker of the fulness of salvation. On the contrary, those who do not hearken to the Son have not life, neither shall they see it, but the anger of God abides with them. Thus, while Paul distinguishes between the actual state of grace, with its accompanying hope on the one hand, and the future attainment of the object of our hope, John unites these in his conception of eternal life, and thus uses the expressions ζωὴ αἰώνιος (eternal life) and ζωὴ (life), which stand in the relation of form and contents, indifferently with or without the article (John iii, 36; v, 24; 1 John iii, 14, 15; v, 11, 12, 13, etc.). The life of the faithful on this earth is inseparably connected with their eternal life, from the fact of their absolute deliverance from the sentence of death resulting from a state of estrangement from God (John vi, 53). It is a result of the birth of the Spirit (John iii; comp. v, 21; 1 John i, 5; John iii, 36). See also John iv, 14; v, 28; vi, 40; xvii, 24; 1 John iii, 2.

This eternal life, with its divine cause and its victorious power, finds its ground in the communion of life with Christ, which is the result of faith. For while God as the absolute being is He whose life is "of himself" (John vi, 57), and is Himself "eternal life" (1 John v, 20), the source of all life, yet the communication of life to the world, i. e. to mankind, has from the beginning, even before time began (John viii, 56), been irrevocably vested in the Son. He is the λόγος (word) as well in his relation to God as in his relation to the world. He has received the fulness of divine life from the Father in such a manner that it belongs to him as thoroughly his (John v, 26; 1 John v, 11). Now, inasmuch as the Logos became flesh, the eternal life, which was of God, became manifested in him. It is, in the next place, the revealed light of life. Christ, in his relation to the world, is therefore as well ὁ λόγος τῆς ζωῆς as ἡ ζωὴ (1 John i, 1, 2; John i, 3, 4; vi, 53 sq.; xiv, 6); in one word, the really sole source of life, the universal principle of life in the world, both spiritual and material (John v, 21-29; x, 9, 28; xi, 25; xiv, 19; vi, 27, 35, 39, 63; vii, 38, 39). From this it is easily seen how eternal life is designated in the N. T. as the command of the Father, the knowledge of God and of Christ, or also as the commandment of Christ (John xii, 50; comp. viii, 51; xvii, 3; 1 John ii, 25; iii, 14, 15; comp. John xii, 25).

Confirmations of this view, by which the ζωὴ comes to occupy the first place in the plan of salvation in Christ, are to be found in numerous passages of the N. T. Christ is represented as the ever-living (Rev. i, 18), the ἀρχηγός τῆς ζωῆς (Acts iii, 15), the κύριος ζωῆς, by virtue of whom those who follow him become λίθοι ζώντες, living stones (1 Pet. ii, 4, 5). In 1 Pet. iii, 7 (comp. iv, 6) we read of a κληρονομία χάριτος ζωῆς, and in the apocalyptic description of the heavenly Jerusalem we still read of a ποταμὸς ῥέων ζωῆς (river of the water of life) which flows from the throne of God and of the Lamb, as also of a ξύλον ζωῆς (tree of life) by the shores of the stream (Rev. xxii, 1, 2, 14, 19; ii, 7). See the different interpretations given to John's ζωὴ αἰώνιος in Kaenfer, *De bibl. ζ. ἀ. notionē*, p. 22.

II. *History of the Doctrine.*—1. The Talmudists speak only of the עולם הבא, in which all Israelites have part, but nowhere of an eternal life; while the Targumists make use of the expression, for instance, in Lev. xviii, 5.

2. It was long before even the Christian Church

was able to understand the full scope of the idea. In early times the ζωὴ αἰώνιος (eternal life) was represented only as future happiness, to be fully accomplished only after the resurrection and the judgment of the world. Irenæus (*adv. Hæc.* i, c. 10) states what the per universum orbem usque ad fines terræ seminata ecclesia (the Church dispersed throughout the whole world, even to the ends of the earth) believes on this point, the reditum—*at justis et sanctis*—in corruptibilem statum largiatur et vitam æternam tribuat (coming of Christ to confer eternal life upon the righteous and holy). So also Tertullian (*De præser. Hæret.* c. xiii). Augustine (*De Sp. et Lit. e. xxiv*): "Cum venerit, quod perfectum est, tunc erit vita æterna; ita est totum præmium, ejus promissione gaudemus" (that is, the complete reward, in the promise of which we joy) (*De morib. eccl. cath.* p. 25; *De Trin.* i, 13; *Enchir.* § 29, etc. Basil (*Euar. Psalm xlv*) connects it with the eternal membership of heaven. The Apostles' Creed and the Athanasian Creed end the enumeration of their articles of faith with the dogma concerning eternal life as emanating from God, the absolute cause, and represent it as the final object of all ordained development (*Const. Apost.* vii, 41). John of Damascus, at the end of his *Orthod. fid.*, where he treats of the resurrection, says expressly, αἰώνιος ζωὴ τὸ ἀτελεύτατον τοῦ μέλλοντος αἰῶνος ἐπιλαῖν μετὰ τὴν ἀνάστασιν ἡμετέρας καὶ πρὸς τὸν ὁ χρόνος ἀρξήμιθισται ἔστι δὲ μάλλον μία ἡμέρα ἀνίσταστος, τοῦ ἡλίου τῆς δικαιοσύνης τοῦ κυρίου φαιδρῶς ἐπιλάμπουτος. Even when the fathers speak of Christ as the ζωὴ they refer almost exclusively to the imparting of future blessedness: Cyril of Alexandria and Ammonius (*Catena on John xiv*, 6), Gregory Nazianzenus (*Orat.* 10, c. *Eunom.*). At all events, they call the assurance of life resting on communion with Christ merely ζωὴ, ἡ κερύον ζωὴ, but not ζωὴ αἰώνιος. Yet occasionally they touch upon nearly all the questions connected with that point, without, however, arriving at any definite system of doctrine. In their description of the state of the blessed they mention as the most important points its endless duration, freedom from evil, and absolute satisfaction. The latter was sometimes defined as complete knowledge, perfect moral liberty, inner and outer peace, or immediate intercourse with God and the saints, together with personal reunion with those who have preceded us; or, again, as the contemplation of God, as the fulfilment of all human desire, or as several of these different points together. The *finis desideriorum nostrorum* is God himself, *qui sine fine videtur, sine fastidio amabitur, sine fatigatione laudabitur* (Justin, *Apol.* i, 8; Origen, *De princ.* iii, 318, 321; Cyprian, *De mortal.* [1726], p. 166; Greg. Naz. *Orat.* xvi, 9; viii, 23; Greg. Nyss. *Orat. fin. de Placilla et Orat. de Mortuis*; Basil, *Hom. vi in Hexæm. et Hom.* in *Psa.* cxiv; August. *De civ. Dei.* xxii, 29, 30; Chrysost. *Hom.* xiv in *Ep. ad Rom.*; Ambros. in *Gal.* vi; Cassiodor. *De anima.* c. xii). The idea of different degrees of felicity in future life, as differences of reward, was widely prevalent, without, however, making it lose its character as *gratia pro gratia* (grace for grace) (August. *Tract.* xiii in John; Theodoret on *Rom.* vi, 23, and in *Continent.* i). According to the ἀζήτη (desert) of every one, there are πολλὰ ἀζήτημάτων εὐαφοραί, βαζμοὶ πολλοὶ and μέτρα (Orig. i, 1, 2, 11; Greg. Naz. *Orat.* xxvii, 8; xiv, 5; xix, 7; xxxii, 33; Basil in *Eunom.* i, 3; August. *De Civ. Dei.* xxii, 30, 2; Hieron. *ad Job.* 2). The fathers say also very positively that the joys of heaven cannot be described in words, and human imagination can only form an approximative idea of them. So Greg. Nyss. (*Orat. Catech.* c. xi). "Bona vitæ æternæ tam multa sunt ut numerum, tam magna ut mensuram, tam præciosa ut estimationem omnem excedant" (August. *De tripl. habit.* c. i, *Conf. Orth.*).

(3.) The divines of the Middle Ages brought to light no new truths on this point, but assembled those

already recognised into a system. They also established a doctrinal distinction between *vita eterna* (eternal life) and *beatitudo* (happiness), defining them both. Anselm (*De simil.* c. xlvii) counts fourteen *partes beatitudinis*, seven of which relate to the glorifying of the body, and seven to the soul. The occupations of the saints are generally connected also with the number seven. Yet it was more customary to divide the different aspects of that state—of course subject to all kinds of occasional modifications—into twelve parts (Bonaventura, *Dieta salut.* x, c. iv; Peter d'Ailly, *Spec. consid.* iii, c. xi; Johan. de Turre crem. *Tract.* xxxvi *in reg.*); "Duodecim considerationes vite eterne: 1. Illa sola est vita vera; 2. Possidetur sanitas sine quacunque infirmitate, molestia aut passione; 3. Pulchritudo sine quacunque deformitate; 4. Copia omnium bonorum; 5. Satietas et adimpletio omnium desideriorum sine quocunque defectu; 6. Securitas et pacis tranquillitas sine timore quocunque; 7. Visio beata clarissima et jucundissima divinitatis; 8. Delectatio summa; 9. Sapientia et plenissima cognitio absque ignorantia (an especially gratifying prospect for the scholastics; so that, for instance, Dans Scotus wonders whether the saints knew the real essence of things); 10. In illa viventis summo ibi honore et gloria sublimantur; 11. Est in ea jucunditas ineffabilis; 12. Laus interminabilis." (The twelve points are: 1. Eternal life is the only true life; 2. It has health without infirmity or passion; 3. Beauty without disfigurement; 4. All blessings in abundance; 5. Satisfaction of all desires; 6. Peace and tranquillity without fears; 7. Beatific vision of the Divinity; 8. Supreme delight; 9. Wisdom and perception without ignorance; 10. The highest honor and glory; 11. Ineffable sweetness; 12. Endless praise.) Thomas Aquinas recognised, besides, the general and common *beatitudo*, especial *dona*, gifts. Thus, aside from the *corona aurea*, he reserves a special *aureola* to the martyrs and saints, and also to monks and nuns, as a sort of superadded reward. According to him, the organ of transmission of the blessings of future life is knowledge; according to Scotus, the will. After the times of Anselm, and among the scholastics and mystics, we find very attractive descriptions of the blessed state, full of elevated ideas. "Præmium est," says Bernard (*De meditat.* c. iv), "videre Deum, vivere cum Deo, esse cum Deo, esse in Deo, qui erit omnia in omnibus; habere Deum, qui est summum bonum; et ubi est summum bonum, ibi summa felicitas." (The reward is, to see God, to dwell with God, to exist with God and in God, who shall be All in All; to possess God, who is the highest Good; and where the highest Good is, there is perfect bliss.)

(1.) The Roman Catholic Church has simply gathered the teachings of the scholastics into a whole on this point, and has established them in a more fixed and dogmatic manner, as is shown in the exposition given in the Roman Catechism. According to it, the *vita eterna* (eternal life), by which believers are, after their resurrection, to attain the perfection after which they aim, is *non magis perpetuitas vite, quam in perpetuitate beatitudo, quæ beatiorum desiderium expleat* (not only perpetuity of life, but also bliss in that perpetuity, satisfying all the desires of the blessed). It is evident, moreover, that the nature of the blessedness of the saints cannot be appreciated by our minds in any but an empirical, not an absolute manner. According to the scholastics, the eternal blessings can be divided into, 1. Essential; the contemplation of God in his nature and substance, and the consequent participation in his essence, which is identical with his possession. 2. Accessory; glory, honor, perfect peace, etc. They are expressly represented as incentives to lead a virtuous life. On their connection with good works in the Romanist system, see Council of Trent (*Sess.* vi, c. xxvi).

(5.) With the exception of the part relating to pur-

gatory, the doctrine of the elder Protestantism on this subject does not essentially differ from that of the Romish Church. The symbolical books of the evangelical Church afford us but little information on this point. In general, the *vita eterna* continued to be considered as *salutis nostræ complementum, spei metæ, finis fidei* (the goal of hope, the end of faith). By it was understood the position of the just, partly after this life in general, and partly after the resurrection. (Comp. *Augsburg Conf.* art. 17; *Apol.* iv, 212; *Cat. Min.* ii, 3; *Formulu Concordiæ*, 633, 723; *Conf. Belg.* art. 67; Luther, *Works*, i, 360, 887, 997; xi, 1487; Melancthon, *loci*, 1553, 75; Calvin, *Institutes*, iii, 9, 1.) Still the effects of a deeper study of Scripture (a result of the Reformation) became manifest in various ways, and especially in the idea of a beginning of eternal life in the heart of the believer, which was recognised as connected with regeneration (*Apol. Confessionis*, iv, 140, 148, 99, 187, 209, 210, 285, mostly in the German text; Buddeus, 445, 503; Zwingli, *Exp. fid.* 12; P. Martyr, *Loc.* 442; *Cat. Pal.* 58; Altung, *Exp. Catech.* 280; Alsted, 759; Perkins, *Cat.* 778; Confessio Bohem. *Niem.* 846). Compare also Jansenius, *Comm. Conc. Ev.* c. 136, 976. Yet this truly evangelical view was not steadily persisted in, but, on the contrary, it was soon asserted again that the expression "eternal life" occurred only in Scripture to designate the reward of Christian fidelity. Nevertheless, the fundamental points of the idea of eternal life remained in the doctrine of a mystical union with Christ, and in the doctrine concerning the Eucharist. Many draw a distinction between the *vita spiritualis* (spiritual life), of which Christ is the *alimentum* (food), and the *vita eterna* (eternal life). The former was also designated as *vita gratiæ* (the life of grace), and the latter as *vita gloriæ* (the life of glory). There were three degrees of eternal life recognised: 1, initialis, in this world; 2, partialis, after the death of the individual; 3, perfectio, after the last judgment. (So Pearson, *On the Creed*, Oxford, 1820, i, 598.) Gerhard's definition (*Cotta*, 20, 533) is an excellent exposition of the Protestant scholastic views on this subject: "Vita eterna est felicissimum ac beatissimum ille status, quo Deus ex immensa misericordia (causa efficiens principalis) propter Christum mediatorem (causa efficiens meritoria) perseverante fide (causa instrumentalis) adprehensum pios post hanc vitam beabit, ut primum quidem animarum eorum a corporibus separatæ, postmodum vero eadem in die resurrectionis glorificatis corporibus reunite, ab omnibus miseriis, doloribus et malis liberatæ, cum Christo, angelis sanctis et omnibus electis in sempiterna letitia, gloria et felicitate vivant, perfecta Dei cognitione, perfecta sanctitate et justitia ornatæ Deum a facie ad faciem sine fine videant, sine fastidio amant ac sine defatigatione glorificent." The early Protestant theologians speak of the felicity of the future life as incomprehensible and ineffable (*Conf. Belg.* 37; *Bohem.* in *Niem.* 846; Calvin, 3, 15, 10; Gerhard, 20, 340). Its blessings are partly privative, partly positive: the meeting again and recognition of Christians was considered one of them (Zwingli *In exp. fid.* 12); this is called a positive blessing. That individual blessedness will not be disturbed by the knowledge of the damnation of others is called a privative blessing. In opposition to Rome, the influence of personal merit on the future state was denied by these theologians; but some of them, while admitting that blessedness is essentially the same for all, hold to several degrees of blessedness. A number of other questions as to the language of the blessed, the manner of the contemplation of God, if he shall be praised in word, etc., are generally treated by the ancient theologians after the example of Calvin, *Inst.* 3, 25, 6, as irrelevant, and of no religious importance. In later times they have been discussed anew.

7. *Later Views.*—The evangelical Protestant churches probably would all agree that eternal life com-

mences in Christian experience in this world. So Wesley (*Sermons*, ii, 180): "This is the testimony, that God hath given us eternal life, and this life is in his Son. He that hath the Son hath life [the eternal life here spoken of]; and he that hath not the Son hath not life." As if he had said, This is the sum of the testimony which God hath testified of his Son, that God hath given us not only a title to, but the real beginning of eternal life; and this life is purchased by, and treasured up in his Son, who has all the springs and the fulness of it in himself, to communicate to his body, the Church. This eternal life, then, commences when it pleases the Father to reveal his Son in our hearts; when we first know Christ, being enabled to "call him Lord by the Holy Ghost;" when we can testify, our conscience bearing us witness in the Holy Ghost, "The life which I now live I live by faith in the Son of God, who loved me, and gave himself for me." And then it is that happiness begins—happiness real, solid, substantial. Then it is that heaven is opened in the soul, that the proper heavenly state commences, while the love of God, as loving us, is shed abroad in the heart, instantly producing love to all mankind; general pure benevolence, together with its genuine fruits, lowliness, meekness, patience, contentedness in every state; an entire, clear, full acquiescence in the whole will of God, enabling us to "rejoice evermore, and in everything to give thanks."

As to the nature of the blessedness of the future life, "the sum of what we are taught by reason and Scripture on this point may be comprehended under the three following particulars: (a) We shall hereafter be entirely freed from the sufferings of this life; (b) Our future blessedness will be a continuation of the happiness of this life; (c) But it will also be increased by the addition of many new joys, which stand in no natural or necessary connection with our preceding condition in this life. But, for want of accurate knowledge of the state of things in the future world, we can say nothing definite and certain as to the nature of these positive rewards. In the doctrine of the New Testament, however, positive rewards are considered most obviously as belonging to our future felicity, and as constituting a principal part of it. For it always represents the joys of heaven as resulting strictly from the *favor of God*, and as being *undescried* by those to whom they are given. Hence there must be something more added to the natural good consequences of our actions, something which cannot be considered as the necessary and natural consequences of the good actions we may have before performed. Some theologians have supposed that the saints in heaven may be taught by *immediate divine revelations* (*lumen gloriæ*); especially those who may enter the abodes of the blessed without knowledge, or with only a small measure of it; e. g. children, and others who have died in ignorance for which they themselves were not to blame. On this subject nothing is definitely taught in the Scriptures; but both Scripture and reason warrant us in believing that provision will be made for all such persons in the future world. A principal part of our future happiness will consist, according to the Christian doctrine, in the enlargement and correcting of our knowledge respecting God, his nature, attributes, and works, and in the salutary application of this knowledge to our own moral benefit, to the increase of our faith, love, and obedience. There has been some controversy among theologians with regard to the *vision of God* (*visio Dei intuitiva*, or *sensitiva*, or *beatifica*, or *comprehensiva*); but Christ is always represented as one who will be *personally visible* by us, and whose personal, familiar intercourse and guidance we shall enjoy. And herein Christ himself places a chief part of the joy of the saints (John xiv, xvii, etc.). And so the apostles often describe the blessedness of the pious by the phrase *being with Christ*. To his guidance has God intrusted the human

race in heaven and on earth. And Paul says (2 Cor. iv, 6) we see 'the brightness of the divine glory in the face of Christ;' he is 'the visible representative of the invisible God' (Colos. i, 15). Paul says expressly (1 Thess. iv, 17) that we shall be with Christ, *in company with our friends who died before us* (*ἀπαρὸν ἀβραϊκῶν*); and this presupposes that we shall recognise them, and have intercourse with them, as with Christ himself. Paul advises that Christians should comfort themselves under the loss of their friends by considering that they are at home with the Lord, and that they shall be again united together" (Knapp, *Christ. Theology*, sec. clx, p. 490-494). See also Cotta, *Hist. Dogm. de Vita æterna*; Cotta, *Theses Theol. de Vita æterna* (Tübing. 1758); Storr, *Opuscula Academica*, ii, 75; Wesley, *Sermons*, ii, 180 sq.; Baxter, *Saints' Rest*; Isaac Taylor, *Physical Theory of another Life*; Naville, *Vie Eternelle* (1865); Herzog, *Real-Encyclop.* viii, 254 (from which this article is in part a translation); Martensen, *Christian Dogmatics*, § 283-290. **Eternity of God.** See GOD.

**E'tham** (Heb. *Etham'*, עֶתָם, supposed by Jablonsky [*Opusc.* ed. te Water, ii, 157] to be i. q. Coptic *ation*, i. e. "boundary of the sea;") Sept. Ὀζόψω, but omits in Num. xxxiii, 8; Vulg. *Etham*, the third station of the Israelites when they left Egypt; a place described as lying "in the edge of the wilderness," where they encamped after the journey from Succoth (Exod. xiii, 20; Num. xxxiii, 6). This description, and the route pursued by them, seem to fix upon some spot on the east of Egypt, north of the Red Sea, near the desert tract stretching thence along the whole eastern shore as far as Marah, to which the same name, "desert of Etham," is therefore naturally applied in the text (Num. xxxiii, 8). The precise locality of Etham has been a matter of dispute, according to the various theories of the passage across the sea. No spot more likely has been indicated than a point in the valley of the bitter lakes opposite the foot of wady Abu-Zeid, in the direct route around the point of the sea, but from which there is a passage sharply deflecting, up wady Em-hesh, around Jebel Attaka, which the Israelites were at this point commanded to take. See EXODE; DESERT. The sense of the passage Num. xxxiii, 6, 8, is evidently this: At the end of the second day they had already arrived at the borders of the Arabian desert, at Etham, from which the tract of country lying next to Egypt receives the name, desert of Etham; but, instead of advancing directly into the desert, they turned down again farther into Egypt, to the Arabian Gulf. Afterwards, instead of going round the sea, they proceeded through it into the desert of Etham. See SHUR. Schwarz says (*Palest.* p. 211) that the part of the desert north of the Red Sea, near Suez, is still called *Ethia*, but this lacks confirmation.

**E'than** (Heb. *Eythan'*, עֵיטָן, *perpetuity*, as often), the name of three men.

1. (Sept. Αἰθάν, v. r. Γαιζάν and Αἰζάν.) One of four persons ("Ethan the Ezrahite, and Heman, and Chalcol, and Darda, the sons of Mahol") who were so renowned for their sagacity that it is mentioned to the honor of Solomon that his wisdom excelled theirs (1 Kings iv, 31 [Heb. v, 11]), Ethan being distinguished as "the Ezrahite" from the others, who are called "sons of Mahol;" unless, indeed, this word *Mahol* (q. v.) be taken, not as a proper name, but appellatively for "sons of music, dancing," etc., in which case it would apply to Ethan as well as to the others. This interpretation is strengthened by our finding the other names associated with that of Ethan in 1 Chron. ii, 6, as "sons of Zerah," i. e. of Ezra, the same as Ezrahites, or descendants of the son of Judah. See EZRAHITE. With this agrees the Jewish chronology, which counts them as prophets during the sojourn in Egypt (*Seder*

*Olam Rabbir*, p. 52), although the Jews have also a tradition confounding Ethan with Abraham, Heman with Moses, and Chalcol with Joseph (Jerome, *Comment. on Kings*, in loc.). In 1 Chron. ii, 8, Ethan's "sons" are mentioned, but only one name is given, that of Azariah. B.C. post 1856. In the title to the 89th Psalm an "Ethan the Ezrahite" is named as the author; but there seems to be some confusion here in the latter epithet. See No. 3 below.

2. (Sept. Αἰθάρι v. r. Οὐρί) Son of Zimmah and father of Adaiiah, in the ancestry of the Levite Asaph (1 Chron. vi, 42 [27]). B.C. cir. 1585. In ver. 21 he seems to be called JOAH, the father of Iddo.

3. (Sept. Αἰθάν v. r. Αἰθάρμ.) A Levite, son of Kushi or Kushaiah, of the family of Merari; appointed one of the leaders of the Temple music by David (as singer, 1 Chron. vi, 44 [29], or player on cymbals, xv, 17, 19). B.C. 1014. In the latter passages he is associated with Heman and Asaph, the heads of two other families of Levites; and inasmuch as in other passages of these books (1 Chron. xxv, 1, 6) the names are given as Asaph, Heman, and ΙΕΡΟΥΤΙΟΥ, it has been conjectured that this last and Ethan were identical. There is at least great probability that Ethan the singer was the same person as Ethan the Ezrahite (comp. No. 1 above), whose name stands at the head of Psa. lxxxix, for it is a very unlikely coincidence that there should be two persons named Heman and Ethan so closely connected in two different tribes and walks of life. The difficulty is even greater in the case of Heman (q. v.), who, in the title to Psalm lxxxviii, is likewise expressly called an Ezrahite, and yet identified in its authorship with the sons of Korah. Hengstenberg supposes (*Comment. on Psalms*, Clark's ed. iii, 89) that both Heman and Ethan, although descendants of Judah, were adopted into the ranks of the Levites; but this will not meet the above genealogy of this Ethan, who is moreover classed with the Merarites, and not with the Korahites. Comp. HEMAN, and see EZRAHITE.

**Eth'ananim** (Heb. *Eythanim'*, עֵתָנִים, perennial streams; Sept. Αἰθάνιν), another name for the month TISRI (q. v.); so called from the fulness of the brooks at that time of the year, being swelled with the autumnal rains (1 Kings viii, 2). See CALENDAR.

**Eth'baäl** (Heb. *Ethba'al*, עֵתְבַּאֵל, with Baal, i. e. enjoying his favor and help; Sept. Ἐθβαάλ), a king of Sidon, father of the infamous Jezebel, the wife of Ahab (1 Kings xvi, 31). According to Josephus (*Ant.* viii, 13, 1 and 2; *Apion*, i, 18), Ethbaal is called *Ithobalrus* (Ἰθόβαλος or Εἰθόβαλος, i. e. עֵתְבַּאֵל = *Baal with him*) by Menander, who also says that he was a priest of Astarte, and, having put the king Pheles to death, assumed the sceptre of Tyre and Sidon, lived sixty-eight years, and reigned thirty-two (comp. Theophil. *Autol.* iii, p. 132). As fifty years elapsed between the deaths of Hiram and Pheles, the date of Ethbaal's reign may be given as about B.C. 940-908. The worship of Baal was no doubt closely allied to that of Astarte, and it is even possible that a priest of Astarte might have been dedicated also to the service of Baal, and borne his name. We here see the reason why Jezebel, the daughter of a priest of Astarte, was so zealous a promoter of idolatry, the taint of which, with its attendant tyranny, eventually extended to the throne of Judah in the person of Athaliah; and as, twenty-one years after the death of Ethbaal, his granddaughter Dido built Carthage, and founded that celebrated commonwealth (Josephus, as above), we may judge what sort of a spirit animated the females of this royal family. See AHAAB. Another Phœnician king of the same name (Ἰθόβαλος or Εἰθόβαλος) appears as a contemporary of Nebuchadnezzar (Josephus, *Ant.* x, 11, 1; *Apion*, i, 21; Eusebius, *Chron. Armen.* i, 74). See PHŒNICIA.

**Ethelbert**, king of Kent, was born A.D. 545 or 552, and succeeded to the throne about A.D. 560 (?). About A.D. 590 he was acknowledged as Bratwaldra (president of the Heptarchy). In 570 he married Bertha, a Christian, and daughter of Charibert, a Frankish king. It had been agreed before her marriage that she should be allowed to enjoy her own religion. The most important event of his reign was the introduction of Christianity into his kingdom by Augustine, who landed in Kent in 596. See AUGUSTINE (vol. i, p. 544). In 597 the king himself was baptized. He founded the bishopric of Rochester, and, with his nephew Sebert, king of Essex, erected the church of St. Paul's in London. Ethelbert died in 616.—Maclear, *Christian Missions during the Middle Ages* (1863), chap. v; Collier, *Ecclesiastical History of Great Britain*, i, 156 sq.

**Ethelwold**, the principal reformer of monastic orders in England, was born in Winchester about 925. From early youth he distinguished himself by his learning, and obtained the favor of king Athelstan. He was ordained priest simultaneously with Dunstan, and when the latter became abbot of Glastonbury, about 947, Ethelwold entered his monastery and became a companion of his studies. He distinguished himself as a poet, grammarian, and theologian. He is also reported to have been familiar with the mechanical arts, and to have constructed two bells. When he declared his intention to go to France, in order to perfect himself in his studies, king Edred, who wished to retain him in England, refused to him permission to travel, and appointed him abbot of Abingdon. This monastery was then in ruins, and was rebuilt by Ethelwold. In 963 king Edgar appointed him bishop of Winchester. The great task of his life henceforth was the reorganization of the Anglo-Saxon monasteries, which were at that time administered by secular priests (*clerici, canonici, presbyteri*). The discipline in the monastery was anything but severe, and many of the priests were married. Ethelwold substituted for the secular priests regular monks, and displayed great activity in rebuilding the monasteries that had been destroyed by the Danes, and in repopulating those that had been abandoned. The monastery of Winchester, under his direction, became a celebrated school, from which proceeded several distinguished abbots and bishops. He died Aug. 1, 984, at Winchester. The chief work of Ethelwold is an Anglo-Saxon translation of the Latin rule of St. Benedict. It has never been printed. He also wrote a mathematical treatise, still extant in manuscript.—Hofer, *Nouv. Biogr. Générale*, xvi, 598; Wright, *Biog. Brit. Lit.* 435 sq. (A. J. S.)

**E'ther** (Heb. *id.* אֶתֶר, abundance), one of the cities in the plain (Shephelah) of Judah (mentioned between Libnah and Ashan, Josh. xv, 42, Sept. Αἶθρ v. r. Ἰθάκ), eventually assigned to Simeon (mentioned between Remmon and Ashan, Josh. xix, 7, Sept. Αἶθρ v. r. Ἰεζέρο). In the parallel list of the towns of Simeon in 1 Chron. iv, 32, TOCHEN is substituted for Ether. In the *Onomasticon* Eusebius and Jerome mention it twice (s. v. Ἐζέρο, Ether; Ἰεζέρο, Jether—in the latter case confounding it with JATHIR, a city of priests, which contained friends of David during his troubles under Saul), and state that it was then a considerable place (κόμη μεγάλη), retaining the name of *Jethira* (Ἰεθιρά, Ἰεζορά), very near Malatha, in the interior of the district of Daroma, that is, in the desert country below Hebron and to the east of Beersheba. At Beit-Jibrin Van de Velde heard of a *tell Athar* in this neighborhood, but could not learn its distance or direction (*Memoir*, p. 311). For the present, we may conjecturally place it at *Beit-Awca*, in the vicinity of the associated localities, S. of Beit-Jibrin and W. of Hebron; a ruined village, covering low hills on both sides of the path, and exhibiting foundations of hewn stones,

leading to the inference that it was once an extensive town (Robinson, *Researches*, iii, 10).

**Etheridge**, JOHN WESLEY, Ph.D., a Methodist minister and eminent scholar, was born at Grange-woods, Isle of Wight, February 24, 1804, and died at Camborne May 24, 1866. His parents were Methodists, and he was brought up with religious care. In 1827 he entered the ministry of the Wesleyan Methodist Church, and was appointed to the Hull Circuit. In 1838 his health failed, and he became "super-numerary." In 1846 he was able to return to the itinerant ministry, in which service he remained until his death. "He was an eminently holy man. Whether in the pulpit or in the social circle, he appeared clothed with humility, and radiant with Christian benevolence. Constrained by the love of Christ, he lived only to promote the interests of the Church. He was 'a burning and shining light,' and consumed himself in the service of his Lord and Saviour" (*Minutes*, 1867).

Dr. Etheridge's devotion to letters, amid the engrossing labors of the Methodist ministry, was very remarkable. Early in life he showed extraordinary aptitude for languages, and by continued study he learned to read and write Hebrew and Syriac with facility. In the literature of these two languages he became pre-eminent before his death. His published writings include *The Syrian Churches, their early History, Liturgies, and Literature* (London, 1846, 12mo: this work contains a translation, also, of the four Gospels from the Peschito):—*The Apostolical Acts and Epistles, from the Peschito, with the remaining Epistles and the Revelation, after a later Syriac Text* (London, 1849, 12mo):—*Howe Aramaica* (London, 1843, 12mo: a useful series of Essays on the Shemitic, Aramaic, and Syriac languages and literature):—*Jerusalem and Tiberias, a Survey of the religious and scholastic Learning of the Jews, designed as an Introduction to Hebrew Literature* (London, 1856, 12mo):—*The Targums of Onkelos and Jonathan ben-Uzziel*, etc. (London, 1862, 12mo). Besides these, he published *Misericordia, or Contemplations on the Mercy of God* (Lond. 1842):—*The Life of Dr. Adam Clarke* (London, 1858: N. Y. 1860):—*The Life of Dr. Thomas Coke* (Lond. 1860):—*The Life of the Rev. John Fletcher*.—*Minutes of Conferences* (English) for 1867; *Christian Examiner*, lxi, 346.

**Ethics**, from ἠθικός, originally the Ionic form of ἔθος, in Germ. *Sittenlehre*, in English *moral philosophy*, though this last phrase sometimes covers the whole science of mind. Ethics are related to *law and duty*, and to *virtue and vice*. "Aristotle says that ἠθικός, which signifies moral virtue, is derived from ἔθος, custom, since it is by repeated acts that virtue, which is a moral habit, is formed" (see Flening's *Vocab. Phil.* p. 171). "Ethics, taken in its widest sense, as including the moral sciences or natural jurisprudence, may be divided into, 1. Moral philosophy, or the science of the relations, rights, and duties by which men are under obligations towards God, themselves, and their fellow-creatures. 2. The law of nations, or the science of those laws by which all nations, as constituting the society of the human race, are bound in their mutual relations to one another. 3. Public or political law, or the science of the relations between the different ranks in society. 4. Civil law, or the science of those laws, rights, and duties by which individuals in civil society are bound—as commercial, criminal, judicial, Roman, or modern. 5. History, profane, civil, and political" (Peemans, *Introd. ad Philosoph.* p. 96). Ethics, then, covers the science of all that is moral, whether it relates to law or action, to God or the creature, to the individual or the state. It goes wherever the ideas of right and wrong can enter.

1. Ethical science may be divided into philosophical ethics, theological ethics, and Christian ethics.

(a.) *Philosophical Ethics*.—The science, in this aspect, must find its root and its life, its forms and its

authority, in the depths of the human constitution. This leads necessarily to the idea of God. We do not affirm that ethics cannot be discussed at all without bringing in the notion of a supreme being. On the contrary, it is undeniable that we find in man a moral nature; whatever may be the character of his morality, the very doubts about that imply the *fact* of morality. He manifestly has relations to virtue and vice, to right and wrong, to blame and praise, to guilt and innocence. True, if he does not accept the idea of God, morals seem to lose their foundation. Why should a man obey the dictates of his nature, even when obedience seems to be right and useful, unless his nature is a product of wisdom, and reveals the law and the nature of an infinite intelligence? But truth is stubborn, and even a fragment of it, swinging in the air without a foundation, will live. Pulled up out of the soil of the doctrine of God, the moral ideas, however shorn of their strength and withered, still assert their authority and insist on obedience, from motives of utility, or fitness, or happiness. A genuine philosophical ethics, however, will find a Creator from the study of the creature, and will raise from the nature of man a law which will ground itself in the idea of God.

(b.) *Theological Ethics*.—This is grounded upon some religion or theology. But in this aspect the science is broad enough to cover every religion. The ethics might be theological, and at the same time Buddhistic, or Mohammedan, or Brahminical. Theological ethics, therefore, might be a system on which the fundamental principle of morals had been perverted by the admixture of cruel and impure superstitions, just as so-called philosophical ethics might be atheistic or pantheistic.

(c.) *Christian Ethics*.—Christian ethics is theological ethics limited by Christianity. As thus stated, it might appear to be narrower than either philosophical or theological ethics, but in reality it is far otherwise. Philosophical ethics is Christian so far as it is true and just, and, from the very nature of Christianity, as containing a complete account of human duty, it must even be broader and deeper than all human philosophies which relate to it. As to the relation of Christian ethics to any other supposed theological ethics, or to all other theologies in their moral aspects taken together, its position must be that of judge among them all; it must measure them all, eliminating whatever is false, restoring what is lacking, or rather supplanting them one and all as the only standard of moral truth and duty.

Besides, Christian ethics, considered as a science, and hence as a field for speculation, covers the whole ground. Philosophy and theology, in their ethical relations, are entirely within its scope. It must judge them both wherever it touches them. It has made ethics, and indeed all speculation, a different thing from what it was before it entered into human thought, and it aims to master all human thinking within its sphere. It is, to be sure, amenable to philosophical thought, and cannot repel the tests of right reason; it readily enters into the struggle with every adverse intellectual tendency, carrying with it a divine confidence that alone contains the infallible and indestructible norm of humanity regarded as moral.

Christian ethics, indeed, considered as speculative, is not infallible. God has given the ethical norm, but man is obliged to speculate for himself. Evidently the complete form of Christian ethics, considered as philosophical, has not yet been reached. Its condition is yet militant, both in relation to false systems and to its own development. The genuine Christian ethics, in the scientific sense, lies scattered in various human treatises, in part is yet to be born, and remains to be evolved in the coming ages, and to be wrought into a system of beneficence and beauty which shall settle down on the whole human race, at once an atmosphere

of divine and filial love, and an antidote to discord, injustice, and all impurity.

"As between theological and philosophical speculation, so between theological and philosophical ethics, in so far as they are speculative, we must make a strong distinction. The latter pair differ precisely as the former do. But, much as philosophical and theological ethics differ, they are not opposites. Within the Christian world, Christian ethics, like philosophy in general, must always be essentially Christian. It has always been so, as the result of an inviolable historical necessity, but in different degrees at different periods of time, and in the several stages of its progress. There may, indeed, arise a relative hostility between philosophical ethics and the contemporaneous Christian teaching, or even a hostility between ethical writers and Christianity in general; or, rather, such a hostility is unavoidable precisely in the degree in which humanity fails to be penetrated by Christianity. But, so long as this continues to be the case, it must be a proof of imperfection, not in philosophy only, but also in Christian piety. For even if Christian piety, looking at the doctrine in itself, should be convinced that it possessed the true results, yet she possesses her treasure without the scientific ability to understand it, or to vindicate it to the understanding of others. It is, therefore, as science, still imperfect. A result of this will be that theological ethics will share in the imperfection. So long as the moral consciousness of the Christian, which is specifically determined by the church of which he is a member, does not clearly recognise itself in the forms of morality prevailing in his circle, a Christian ethical philosophy must remain a want—a desideratum. This, however, is only to say that this want will last while the general moral sentiment and that of the Church remain apart. The more nearly each approaches perfection in its own sphere, the nearer they come to being one. If we conceive of each as perfect, they remain two only in form, i. e. not different in their method, but only in the order according to which, under the same method, they scientifically arrange themselves.

"What has now been said of the relation between philosophical and theological ethics, holds of the latter only so far as it is conceived of as speculative. In other modes of treating theological ethics, especially in the traditional, it is easy to conceive that the relation would be different. . . . It must be distinctly affirmed that a Christian character belongs to philosophical ethics throughout the Christian world. We do not mean that it *ought* to be so, but that it really *is* so: not, indeed, always in the highest and fullest sense, and as it ought to be, but still, in such a sense, whatever men may be conscious of, that without Christianity it never could have been what it is. In the Christian world there is no element of the moral or intellectual life which is not associated with some result of Christianity, itself undeniably the ground-principle of the historical development of our whole Christian times. It can never be sufficiently remembered, especially in our own times, that what is actually Christian, and, indeed, what is essentially and specifically Christian, reaches, in all the relations of life, far beyond the sphere to which usage gives the name of *Christian*, or of which the present generation is at all conscious as Christian. The Christian element inheres in the very blood of that portion of humanity which passes under the name of Christendom. This is not the less true because certain individuals belonging to the Christian community may not feel its regenerating power. Besides, that would be a poor ethical system, considered as philosophy, which should ignore the great facts through which morality becomes Christian, and which should refuse to those facts the controlling position which actually belongs to them in making the moral world what, in point of science, it has become. These great facts, let men close their eyes as they will, are

the breaking out of sin and the development of its destructive power in the world on the one hand, and the entrance of Jesus, the God-man, and the historical redeeming power proceeding from him on the other. Even philosophical morality, if it would not degenerate into mere unphilosophical abstractions, must make the moral life, considered as historical and concrete, scientifically comprehensible; the concrete historical form of the moral world, however, is, for us at least, before everything else, Christian, just as general history since the time of Christ is itself Christian.

"But, so long as we follow Schleiermacher, and, in explaining the relation between philosophical and theological ethics, make the religious consciousness the opposite of speculation, we shall never escape confusion. The religious consciousness finds its antithesis not in speculation, but in the *not religious*, and speculation finds its opposite not in piety, but in empirical reflection: empirical reflection and speculation stand in very similar relations to piety. The larger number of theological writers are still of the opinion that the distinction between philosophical and theological ethics lies in the former being the universal, the abstract, the ethics of humanity, and the latter the concrete and specifically Christian, because it rests on history. Thus Schmid and Wuttke. These writers hold that the great facts which form the angles of the Christian theory of the world, namely, sin and redemption by Christ, are, according to their nature, inadequate as the basis of any purely *à priori* or speculative theory. They lay great stress on this. But why reason thus? At bottom, because they start with the presupposition that there is no other necessity but the necessity of *nature*. But, in spite of all the confident assertions of the contrary, we cannot doubt that from the specifically Christian consciousness of God, which is the subject treated here, sin and redemption should be deduced as a logical necessity" (Rothe, *Theologische Ethik*, i, 57).

II. *Position of Ethics in Theology.*—<sup>1</sup> Ethics is a part of systematic theology, which also includes dogmatics. As systematic science, it is to be distinguished from *exegetical and historical* theology. Its office is not merely to show what is the original, and thus normative Christian ethics, nor what has been accepted as such, but rather to teach that Christian ethics is the genuine ethical truth." . . . "On the other hand, ethics must be separated from the various branches of practical theology among which it has often been placed. The two sciences are different both in scope and aim. Ethics embraces the whole Christian idea of *good*, and not merely the Church, in which it finds only its culmination, and points away from itself to practical theology, the aim of which is, of course, practical" (Herzog's *Real-Encyklop.* art. Ethik).

*Place in Systematic Theology.*—<sup>2</sup> "In ancient times, and down to the Reformation, it was not independent, but held a subordinate place in the science of dogmatics. From the 17th century the two have been separated, and, following P. Ramus, most writers have distinguished between them as between theory and practice. In point of fact, dogmatics has practical importance, and ethics, as the science of the *good*, has a theory" (Herzog's *Real-Encyklop.* art. Ethik). "Dogmatics and ethics are as certainly independent *discipline* as God and man are separate beings. Only a point of view like that of Spinoza, in his *Ethics*, which denies the existence of a real creation and a moral world separate from God, can controvert the independent position of ethics by the side of dogmatics" (*idem*).

These views are substantially correct. "Christian ethics has a right to an independent position in the sphere of systematic theology, and it and dogmatics are as certainly distinct as are God and man." Still it is none the less true that, God and man conceived to be such as they are, ethics cannot be practically separated from religion. Ethics finds its highest sanctions

in religion, as religion must consist largely in prescribing ethics. God and man being presented to the mind, ethics must cover the character of each, and also the relation between them.

III. *The Ethical Faculty—Conscience.*—There has been a great waste of controversy on the question whether or not conscience is a distinct and separate faculty of the soul, or only an application of the reason or judgment to moral subjects. The truth is that, the mind being a unit, all its faculties are only so many powers of applying itself differently according to demand. A faculty is a power of doing or acting, and a separate faculty is the power of acting in a particular direction, as distinguished from other directions. The mind is as certainly and distinctly moral as it is intellectual, or imaginative, or volitional. Each of these expresses a distinct power of the one mind.

This faculty of forming moral judgments we call conscience; and, if the views now expressed be correct, there is little propriety in discussions respecting the origin of conscience. It has no origin but that of its possessor; it is born with him, though from its nature it is only developed farther on in life, just as reason and imagination are. It has been asked, in reply to this view, whether conscience is not made what it is in any given case by the circumstances about it—by teaching, by the man's own acts—in short, by all the influences brought to bear upon him. We answer it is as to its form, but there was first conscience, a moral faculty in the man to be shaped. We concede that neither moral ideas, nor ideas of any sort, are innate; but the capacity, nay, the constitutional necessity for moral ideas is innate.

IV. *The Ethical Standard* is, of course, according to Christianity, to be found in the Scriptures, but there is still in the sphere of science a wide diversity as to their meaning. But when the standard is supposed to be understood on a given question, and the conscience submits to it, there must follow a perfect self-abnegation; degradation must result from disobedience. In the case of a conflict between the conscience and the law of the state, for example, in which case the conscience of the lawgiving majority collides with the individual conscience, who shall yield? The answer, from the very nature of the case, is, neither. They must fight it out. The state, from its nature, is supreme, and cannot yield; but for the man the conscience is also supreme. The man can only die, or make some other atonement, and thus maintain allegiance to the highest tribunal.

V. *History of Ethics.*—(a.) The sources of knowledge here are Christ, his person and teaching; also the writings of the apostles, as shown in the New Testament. In the Old Testament the whole contents are authoritative, except as modified or repealed by the New Testament. By the side of these objective sources we have a subjective source in the New Covenant; it is the influence of the Holy Spirit in the faithful. To this Barnabas, Justin, and Clement of Alexandria bear witness. This life of the Spirit in the Church was by-and-by supplanted by the supposed efficacy of ordination, by which the Spirit was bound to the priesthood exclusively. There came now an outward law of the Church to modify the New Testament, and it controlled the ethical consciousness of Christendom until the Reformation.

(b.) Abundance of ethical material is found in the apostolical fathers, who base ethics on individual personality, on marriage, the family, etc. The most effective of the earlier writers was Tertullian (220). His ethical writings were very numerous, such as *concerning spectacles, concerning the veiling of virgins, monogamy, penitence, patience*, etc. His idea of Christianity was that it was a vast and defiant war power, separated from all the heathen customs of the Old World, and resolved to bring upon that world the judgment of Heav-

en. Cyrian, with his high claims for the episcopate, exercised great influence on the ethical sphere of the Church. He concentrated the truth of the Church in the episcopacy, in which he saw the vehicle of the Holy Ghost, and the instrument by which unity and the Holy Spirit should be assured to the Church forever. He carried this idea of the dignity of the episcopate, and the sanctity and sanctifying power of orders, to a ridiculous extent. His doctrine of the efficacy of orders and the dignity of bishops was set over against certain sects—Novatians, Montanists, Donatists—who held that the holiness and unity of the Church demanded that none but holy persons should be members. Augustine fell heir to this controversy. As the Church grew into an earthly kingdom, her ethics took more and more the direction of a so-called higher virtue, whose chief forms were celibacy, poverty, conventual life, and self-imposed torture.

Asceticism not only formed a part of the Church life, it became also the centre from which the Christian life was forced to receive rule and law. It determined what was sin, and what was right and good: it dictated to councils; and, getting control of the state, it dispensed at will its spiritual and temporal awards; penitential books in great numbers were compiled, and, bad as the system was in itself, it became a powerful instrument in bringing to order the various heathen peoples. For the books and writers on these subjects, see Herzog's *Real-Encyklop.* iv, 194, where the relation of asceticism to mysticism is well presented, and it is shown that all these terrible struggles had their root in the consciousness of the infinite demerit of sin, and found their happy solution in Luther's doctrine of faith.

The Reformation not only conquered the prevailing errors by leading men back to the holy Scriptures, but it established positively the real principle of Christian ethics. It did this through justifying faith, which, working by love, creates the possibility of Christian ethics. Love, springing from faith, is the fulfilling of the law. It is ethics in the soul, ready to take shape in noble action. This, working in the community inwardly, proceeds to mould all relations, private and public—marriage, family, church, state, science, art, and culture. The great reformers did not write complete ethical treatises, though they discussed many ethical subjects, such as prayer, oaths, marriage, etc.; but they especially discussed ethics in their explanations of the Decalogue in the Catechism. Indeed, the original form of Christian ethics is the Catechism. See Paul of Eitzen, *Ethice doctrine*, lib. iv (1751), with later additions; also David Chyträus, 1600, *Virtutum descriptiones in precepta Decalogi distributa* (1555); Lambert Daneau († 1596), *Ethices Christianae*, lib. iii (Geneva, 1577); Thomas Venatorius, *De Virtute Christiana*, lib. iii; comp. Schwarz, *Thomas Venatorius, and the beginnings of Protestant ethics, in connection with the doctrine of justification*, *Stud. u. Krit.* (1850), heft. i. See also Melancthon, in his *Philosophia Moralis* (1539), his *Enarratio aliquot librorum Aristotelis* (1545), and his *Physica*. Add to these Keckermann, *Systema ethice tribus libris adornatum* (Geneva, 1614); Weigel, Johann Arndt, Valentin Andrea, Spener, Nitzsch, Henry Müller, Seriver, and others, all mystics. The Reformed have also done something in this line, especially G. Voetius, C. Vitringa, H. Witsius, Amesius, Amyraldus (*Morale Chrétienne*, 6 vols. 1652–1660).

Three men, according to J. A. Dorner (in Herzog's *Real-Encyklop.* iv, 199), form the transition stage to the emancipation of philosophy—Hugo Grotius (*De jure pacis et belli*), Puffendorf, with his school, and Christian Thomasius. Then come Wolf, Mosheim (in his *Moral*, 9 vols.), Steinhart, Bahrdt, Buddeus, Chr. Aug. Crusius, and J. F. Reuss (*Elementa theologie Moralis*, 1767). Even the Rom in Catholic Church of the last two centuries has felt the influence of the modern

philosophy; the following Romanist writers are Wolfians: Luby, Schwarzhuber, Schanza, and Stadler; and the following are Kantians: Wanker, Mutschelle, Hermes, with his disciples Braun, Elvenich, and Vogelsang. Weiller is a Schellingian; independent, and, at the same time, mild and evangelical, pious and rich in thought, are Michael Sailer and Hirscher. Geishütner is a Fichtian.

Kant's "practical reason," the metaphysics of ethics, occupies in the philosophy of morals a most important place, and, notwithstanding certain defects, it has the immortal honor to have discovered that the most certain of all things is the conscience in its relation to the practical reason, and to have made an end of the eudæmonism of ethics by means of the majesty of the moral law, which he compares with the glory of the starry heavens. To his "categorical imperative" certain rationalistic Kantians adhere; for example, J. W. Schmid, Karl Christian Schmid, and Krug. Some of the supernaturalists, as Stäudlin and Tieftrunk, Ammon and Vogel, incline to Jacobi's philosophy. See also Fichte, *System of Ethics* (1797). To the Jacobi-Friesian school belong De Wette (*Christliche Sittenlehre*, 4 bde. 1819-23), Kähler, and Baumgarten-Crusius. To the school of Hegel belong Michelet (*System der Philosoph. Moral*, Berlin, 1828), L. V. Henning (*Princip. der Ethik in historischer Entwicklung*, 1824), Vatke, *Von der menschl. Freiheit im Verhältnis zu Sünde und Gnade*, 1843; Marheineke (*Christliche Moral*, 1847), Daub (*Christliche Moral*, 1840). Of this school, yet more under the influence of Schleiermacher, are Martensen (*Syst. Moral Philos.* 1841), Wirth (*Syst. specul. Ethik*, 1841), H. Merz (*Syst. Christl. Sittenlehre, nach den Grundsätzen des Protestantismus*, etc., 1841).

The activity of Schleiermacher in Christian ethics, as in other departments of theology, was immense. From 1819 he published his treatises on "the idea of virtue," "the idea of duty," and on "the relation between the moral law and the law of nature;" also on the idea of what may be "allowed" and the "chief good." His system was not further published by himself, but after his death A. Schweizer edited his *Philos. Ethik* in 1835, and Jonas his *Christl. Sitten* in 1843. See also Sartorius, *Heil. Liebe*; Harless, *Christliche Ethik*; and especially Rothe, *Theolog. Ethik* (2d edit. 1867). Rothe (translated by Morrison, Clark's Library, Edinburgh, 1868, 8vo) seeks to combine Hegel's standpoint of objective knowledge with Schleiermacher's fine moral tact and organizing power, and to excel them both in his highly original method. See also Rutenick's *Christl. Sittenlehre* (1845); Gelzer, *Die Religion im Leben*, etc. (1854); Schwarz, *Evang. Chr. Ethik* (1836, 3d ed.); Wendt, *Kirchliche Ethik v. Standpunkte d. christl. Freiheit* (2 vols. 8vo, Leipz. 1864-65); Culman, *D. christliche Ethik* (Stuttgart, 1864-66, 2 vols. 8vo). This sketch of the history of ethics is chiefly condensed from Dörner's article (*Ethik*) in Herzog, *Real-Encyclop.* iv, 165 sq. (B. H. N.)

*Appendix.*—It is proper to add to the above a brief account of the history of ethics, or moral philosophy, in England. A survey of this field will be found in Mackintosh, *General View of the Progress of Ethical Philosophy* (*Encyc. Britannica*, Prelim. Diss.), separately printed in his *Miscellaneous Works* (Lond. 1851, 12mo), and in a separate volume (Phila. 1832, 8vo); also in Whewell, *Lectures on the Hist. of Moral Philosophy in England* (Lond. 1852, 8vo); there is also a summary sketch of the history in Brande, *Dictionary of Science, Literature, and Art*, i, 821 sq. (Lond. 1865, 3 vols. 8vo). From these and other sources we condense the following sketch:

The modern English theories may be classed as selfish or disinterested, according as they found virtue on a selfish or a benevolent principle. The selfish theory is advocated by Hobbes († 1679), who makes self-love the exclusive passion, and consid-

ers pleasure the only motive to action (see his *Human Nature*, his *Leviathan*, and our article HOBBS). The same theory is adopted in substance by Jeremy Bentham († 1832), who assumes Hobbes's principle as self-evident, that every object is indifferent, except for its fitness to produce pleasure or pain, which he declares are the sole motives to action. "Bentham is the most distinguished propounder of the principle of utility as the basis of morals, a principle explained by him as in contrast, first, to asceticism, and next to 'sympathy and antipathy,' by which he meant to describe all those systems, such as the moral-sense theory, that are grounded in internal feeling, instead of a regard to outward consequences. In opposing utility to asceticism, he intended to imply that there was no merit attaching to self-denial as such, and that the infliction of pain or the surrender of pleasure could only be justified by being the means of procuring a greater amount of happiness than was lost" (Chambers, s. v.). See Bentham, *Treatise on Morals and Legislation*; and our article BENTHAM, JEREMY. Locke († 1704) denied the existence of a separate faculty for perceiving moral distinctions. In his *Essay on the Human Understanding* (bk. i, ch. iii), he maintains that virtue is approved of, not because it is innate, but because it is profitable. Paley († 1805) also rejected the doctrine of a moral sense, and held, in substance, the utilitarian theory, maintaining that "virtue is the doing good to mankind, in obedience to the will of God, and for the sake of everlasting happiness" (*Moral and Political Philosophy*). The utilitarian theory is taught by all the recent English writers of the materialistic school: see James Mill, *Analysis of the Human Mind* (Lond. 1829; see MILL, JAMES); Austin, *Province of Jurisprudence determined* (2d ed. Lond. 1861); John Stuart Mill, *Dissertations and Discussions* (1859); and his *Utilitarianism*, reprinted from Fraser's Magazine (1862; 2d ed. 1864); Bain, *The Emotions and the Will* (Lond. 1859); *The Senses and the Intellect* (Lond. 1855); also his *Mental and Moral Science* (Lond. 1868, 8vo), where he teaches that conscience is solely the product of education. See also, in reply to these writers, *The North British Review*, September, 1867, art. i; *The British Quarterly*, January, 1868, art. vi.

Opposed to the utilitarian theory there are two theories, which may be called the *instinctive* and the *rational*. The former refers the moral principle to the sensitive or emotive part of man's nature; the latter, to the perception of moral good and evil by the intellect. To the first class belongs Adam Smith († 1790), whose *Theory of the Moral Sentiments* (Glasgow, 1759; Lond. 1790, and often) refers the moral sense to *sympathy*. His view is thus stated by Mackintosh (*Ethical Philosophy*, Philadelphia, 1852, p. 149): "That mankind are so constituted as to sympathize with each other's feelings, and to feel pleasure in the accordance of these feelings, are the only facts required by Dr. Smith, and they certainly must be granted to him. To adopt the feelings of another is to *approve* them. When the sentiments of another are such as would be excited in us by the same objects, we approve them as *morally proper*. To obtain this accord, it becomes necessary for him who enjoys or suffers to lower his expression of feeling to the point to which the by-stander can raise his fellow-feelings, on which are founded all the high virtues of self-denial and self-command; and it is equally necessary for the by-stander to raise his sympathy as near as he can to the level of the original feeling. In all unsocial passions, such as anger, we have a *divided sympathy* between him who feels them and those who are the objects of them. Hence the propriety of extremely moderating them. Pure malice is always to be concealed or disguised, because all *sympathy* is arrayed against it. In the private passions, where there is only a *simple sympathy*—that with the original passion—the expression has more liberty. The benevolent affections, where there

is a *double sympathy*—with those who feel them and those who are their objects—are the most agreeable, and may be indulged with the least apprehension of finding no echo in other breasts. Sympathy with the gratitude of those who are benefited by good actions prompts us to consider them as deserving of reward, and forms the *sense of merit*; as fellow-feeling with the resentment of those who are injured by crimes leads us to look on them as worthy of punishment, and constitutes the *sense of demerit*. These sentiments require not only beneficial actions, but benevolent motives for them; being compounded, in the case of merit, of a direct sympathy with the good disposition of the benefactor, and an indirect sympathy with the person benefited; in the opposite case with the precisely opposite sympathies. He who does an act of wrong to another to gratify his own passions must not expect that the spectators, who have none of his undue partiality to his own interest, will enter into his feelings. In such a case he knows that they will pity the person wronged, and be full of indignation against him. When he is cooled, he adopts the sentiments of others on his own crime, feels *shame* at the *impropriety* of his former passion, pity for those who have suffered by him, and a dread of punishment from general and just resentment. Such are the constituent parts of remorse. Our moral sentiments respecting *ourselves* arise from those which others feel concerning us. We feel a self-approbation whenever we believe that the general feeling of mankind coincides with that state of mind in which we ourselves were at a given time. 'We suppose ourselves the spectators of our own behavior, and endeavor to imagine what effect it would in this light produce in us.' We must view our own conduct with the eyes of others before we can judge it. The sense of duty arises from putting ourselves in the place of others, and adopting their sentiments respecting our own conduct. In utter solitude there could have been no self-approbation. The *rules* of morality are a summary of those sentiments, and often beneficially stand in their stead when the self-delusion of passion would otherwise hide from us the nonconformity of our state of mind with that which, in the circumstances, can be entered into and approved by impartial bystanders. It is hence that we learn to raise our mind above local or temporary clamor, and to fix our eyes on the surest indications of the general and lasting sentiments of human nature. 'When we approve of any character or action, our sentiments are derived from four sources: first, we sympathize with the motives of the agent; secondly, we enter into the gratitude of those who have been benefited by his actions; thirdly, we observe that his conduct has been agreeable to the general rules by which these two sympathies generally act; and, last of all, when we consider such actions as forming part of a system of behavior which tends to promote the happiness either of the individual or of society, they appear to derive a beauty from this utility not unlike that which we ascribe to any well-contrived machine' (*Theory*, ii, 304, Edinb. 1801).

Lord Shaftesbury († 1713) published in 1699 his *Inquiry concerning Virtue* (also London, 1709, and in his *Characteristics*), which, according to Mackintosh, "is unquestionably entitled to a place in the first rank of English tracts on moral philosophy, and contains more intimations of an original and important nature on the theory of Ethics than perhaps any preceding work of modern times." This praise rests on the fact that Shaftesbury developed the doctrine of a *moral sense*. The "most original, as well as important of his suggestions is, that there are certain affections of the mind which, being contemplated by the mind itself through what he calls a *reflex sense*, become the objects of love, or the contrary, according to their nature. So approved and loved, they constitute *virtue* or *merit* as distinguished from mere *goodness*, of which

there are traces in animals who do not appear to reflect on the state of their own minds, and who seem, therefore, destitute of what he elsewhere calls a *moral sense*. These statements are, it is true, far too short and vague. He nowhere inquires into the origin of the reflex sense. What is a much more material defect, he makes no attempt to ascertain in what state of mind it consists. We discover only by implication, and by the use of the term *sense*, that he searches for the fountain of moral sentiments, not in mere reason, where Cudworth and Clarke had vainly sought for it, but in the heart, whence the main branch of them assuredly flows. It should never be forgotten that we owe to these hints the reception into ethical theory of a moral sense, which, whatever may be thought of its origin, or in whatever words it may be described, must always retain its place in such theory as a main principle of our moral nature. His demonstration of the utility of virtue to the individual far surpasses all attempts of the same nature, being founded, not on a calculation of outward advantages or inconveniences, alike uncertain, precarious, and degrading, but on the unshaken foundation of the delight, which is of the very essence of social affection and virtuous sentiment; on the dreadful agony inflicted by all malevolent passions upon every soul that harbors the hellish inmates; on the all-important truth that to love is to be happy, and to hate is to be miserable; that affection is its own reward, and ill-will its own punishment; or, as it has been more simply and more affectingly, as well as with more sacred authority, taught, that to give is more blessed than to receive, and that to love one another is the sum of all human virtue" (Mackintosh, *History of Ethical Philosophy*, p. 95).

Bishop Butler († 1752) sets forth his moral doctrine in his *Sermons* (often reprinted), which have been recently published as a text-book by the Rev. J. C. Passmore, under the title *Bishop Butler's Ethical Discourses* (Philadelphia, 1855, 12mo). He is undoubtedly the greatest of modern English writers on the true nature of ethics. "Mankind," he says, "have various principles of action, some leading directly to the private good, some immediately to the good of the community. But the private desires are not self-love, or any form of it; for self-love is the desire of a man's own happiness, whereas the object of an appetite or passion is some outward thing. Self-love seeks things as means of happiness; the private appetites seek things, not as means, but as ends. A man eats from hunger, and drinks from thirst; and though he knows that these acts are necessary to life, that knowledge is not the motive of his conduct. No gratification can indeed be imagined without a previous desire. If all the particular desires did not exist independently, self-love would have no object to employ itself about, for there would be no happiness, which, by the very supposition of the opponents, is made up of the gratification of various desires. No pursuit could be selfish or interested if there were not satisfactions first gained by appetites which seek their own outward objects without regard to self, which satisfactions compose the mass which is called a man's interest. In contending, therefore, that the benevolent affections are disinterested, no more is claimed for them than must be granted to mere animal appetites and to malevolent passions. Each of these principles alike seeks its own object for the sake simply of obtaining it. Pleasure is the result of the attainment, but no separate part of the aim of the agent. The desire that another person may be gratified seeks that outward object alone, according to the general course of human desire. Resentment is as disinterested as gratitude or pity, but not more so. Hunger or thirst may be, as much as the purest benevolence, at variance with self-love. A regard to our own general happiness is not a vice, but in itself an excellent quality. It were well if it prevailed more generally over crav-

ing and short-sighted appetites. The weakness of the social affections and the strength of the private desires properly constitute selfishness, a vice utterly at variance with the happiness of him who harbors it, and, as such, condemned by self-love. There are as few who attain the greatest satisfaction to themselves as who do the greatest good to others. It is absurd to say with some that the pleasure of benevolence is selfish because it is felt by self. Understanding and reasoning are acts of self, for no man can think by proxy; but no one ever called them *selfish*. Why? Evidently because they do not regard self. Precisely the same rule applies to benevolence. Such an argument is a gross confusion of self, as it is a *subject* of feeling or thought, with self considered as the *object* of either. It is no more just to refer the private appetites to self-love because they commonly promote happiness, than it would be to refer them to self-hatred in those frequent cases where their gratification obstructs it. But, besides the private or public desires, and besides the calm regard to our own general welfare, there is a principle in man, in its nature supreme over all others. This natural supremacy belongs to the faculty which surveys, approves, or disapproves the several affections of our minds and actions of our lives. As self-love is superior to the private passions, so conscience is superior to the whole of man. Passion implies nothing but an inclination to follow it, and in that respect passion differs only in force. But no notion can be formed of the principle of reflection or conscience which does not comprehend judgment, direction, superintendency. Authority over all other principles of action is a constituent part of the idea of conscience, and cannot be separated from it. Had it strength as it has right, it would govern the world. The passions would have their power but according to their nature, which is to be subject to conscience. Hence we may understand the purpose at which the ancients, perhaps confusedly, aimed when they laid it down that virtue consisted in following nature. It is neither easy, nor, for the main object of the moralist, important to render the doctrines of the ancients by modern language. If Butler returns to this phrase too often, it was rather from the remains of undistinguishing reverence for antiquity than because he could deem its employment important to his own opinions. The tie which holds together religion and morality is, in the system of Butler, somewhat different from the common representations, but not less close. Conscience, or the faculty of approving or disapproving, necessarily constitutes the bond of union. Setting out from the belief of theism, and combining it, as he had entitled himself to do, with the reality of conscience, he could not avoid discovering that the being who possessed the highest moral qualities is the object of the highest moral affections. He contemplates the Deity through the moral nature of man. In the case of a being who is to be perfectly loved, 'goodness must be the simple actuating principle within him, this being the moral quality which is the immediate object of love.' 'The highest, the adequate object of this affection, is perfect goodness, which, therefore, we are to love with all our heart, with all our soul, and with all our strength.' 'We should refer ourselves implicitly to him, and cast ourselves entirely upon him. The whole attention of life should be to obey his commands' (Sermon xiii, *On the Love of God*). Moral distinctions are thus presupposed before a step can be made towards religion: virtue leads to piety; God is to be loved, because goodness is the object of love; and it is only after the mind rises through human morality to divine perfection that all the virtues and duties are seen to hang from the throne of God" (Mackintosh, *History of Ethical Philosophy*, 116 sq.).

To the same school belong Hutcheson († 1747), who taught that moral good is simply what the word itself expresses, which is not explicable by any other phrase.

From this he argues that moral good must be perceived by a sense, because the senses alone are percipient of simple qualities (see his *Inquiry into the Original of our Ideas of Beauty and Virtue*, Glasgow, 1725, and often). Hume (*Inquiry concerning the Principles of Morals*) asserts, indeed, that general utility constitutes a uniform ground of moral distinctions, and that reason judges of the utility of actions. But he asserts also that we *approve* of good and *disapprove* of evil in virtue of a primary sentiment of our nature (distinct from self-love), which he calls benevolence or humanity, but which is identical with conscience, or the moral sense. As to the idea of moral obligation, he makes it simply a judgment of the understanding that happiness flows from obedience to the moral faculty rather than from obedience to self-love. For the doctrines of Mackintosh, we must refer our readers to his admirable sketch (so often cited in this article) of the *History of Ethical Philosophy*.

Of the so-called *Rational* school, the distinctive characteristic is "that it considers the idea of good to be an *à priori* conception of reason, in which the idea of obligation is necessarily and essentially implied. As to the nature of the idea itself, two opinions have been held, viz. 1, that it is simple and immediate; 2, that it derives its explanation and authority from some higher notion of the intellect. The most distinguished representatives of the latter opinion are Clarke and Wollaston, while the former has found able advocates in Cudworth, Price, and Stewart" (Brande, *l. c.*).

Dr. McCosh (*American Presbyt. Review*, Jan. 1868, art. i) classes the modern views on ethics in Great Britain into the two schools of Sensational and Rational (or *à priori*), "corresponding to the two schools of philosophy which have divided Europe since Descartes and Locke." Under the latter he classes Cudworth, Clarke, Coleridge, Reid, Stewart, and Sir W. Hamilton; "none of them, however, except Coleridge, taking up so high *à priori* grounds as Descartes and Cousin in France, or Kant and Hegel in Germany." The Protestants of England, in the main, at this time, according to the same writer, do not agree with those Roman Catholic writers who deny an independent morality apart from the authority of the Church; while, on the other hand, they do not agree with the philosophers who assert not only the independence, but the *sufficiency* of ethnic or natural morality. (See the article cited for a view of the relations of the modern sensational doctrine to theology and religion.)

Among American writers, Jonathan Edwards († 1758) is first to be named in this field. In his *Discertation concerning the End of true Virtue*, and that *On the End for which God created the World* (both contained in his *Works*, N. Y. ed. vol. ii), he sets forth an ethical theory marked by the subtlety and originality which characterize all his speculations. Mackintosh sums it up as follows: "True virtue, according to him, consists in benevolence, or love to being 'in general,' which he afterwards limits to 'intelligent being,' though *sentient* would have involved a more reasonable limitation. This good will is felt towards a particular being, first, *in proportion to his degree of existence* (for, says he, 'that which is great has more existence, and is farther from nothing, than that which is little'); and, secondly, *in proportion to the degree in which that particular being feels benevolence to others*. Thus God, having infinitely more existence and benevolence than man, ought to be infinitely more loved; and for the same reason, God must love himself infinitely more than he does all other beings. He can act only from regard to himself, and his end in creation can only be to manifest his whole nature, which is called acting for his own glory." See also, on his ethical theory, the article EDWARDS in Appleton's *Cyclopadia*, vii, 18; and the *Bibliotheca Sacra*, April, 1853, p. 402 sq. There are many excellent manuals, prepared for text-books,

by American writers, such as those of Adams, Wayland, Alexander, Haven, Alden, Hopkins, etc., for farther mention of which we have not space. Hickok (*System of Moral Science*, 1853, 8vo) treats the subject from the *à priori* point of view, and also in its relations to Christian theology, in a very masterly manner. He makes duty an end in and of itself. The voice of conscience is imperative. "There is an awful sanctuary in every immortal spirit, and man needs nothing more than to exclude all else, and stand alone before himself, to be made conscious of an authority he can neither dethrone nor delude. From its approbation comes self-respect; from its disapprobation comes self-contempt. A stern behest is ever upon him that he do nothing to degrade the real dignity of his spiritual being. He is a law to himself, and has both the judge and executioner within himself, and inseparable from him." "We may call this the imperative of the reason, the constraint of conscience, or the voice of God within him; but, by whatever terms expressed, the real meaning will be that every man has consciously the bond upon him to do that, and that only, which is due to his spiritual excellency." "To be thus worthy of spiritual approbation is the end of all ends; and as worthy of happiness, this may now righteously be given and righteously taken, but not righteously paid as price or claimed as wages. The good is to be worthy, not that he is to get something for it. The highest good—the *summum bonum*—is worthiness of spiritual approbation" (*Moral Science*, p. 45-49).

Christian ethics, as distinguished from moral philosophy in general, has not received the same attention from English and American writers as from German. The earlier books on Casuistry (q. v.) and Cases of Conscience, however, belong under this head. Most of the standard English and American writers commingle philosophical morals with Christian ethics. Butler brings out with clearness the relations of ethics to the Christian religion. Wardlaw's *Christian Ethics* (3d ed. Lond. 1837, Boston; 5th ed. Lond. 1852) asserts that "the science of morals has no province at all independently of theology, and that it cannot be philosophically discussed except upon theological principles (Boston ed. p. 367, note). Watson (*Theolog. Instit.* pt. iii) treats of Christian ethics under the title "The Morals of Christianity," and denies the *à priori* method (see Cocker, in *Meth. Quart.* Jan. 1864). Spalding (*Phil. of Christian Morals*, Lond. 1843, 8vo) has "recourse both to science as derived from an examination of man's moral nature, and to revelation as derived from an examination of the Scriptures."

In France, the orthodox Roman Catholic writers have generally confined themselves to the so-called Moral Theology (q. v.). The Cartesian school [see DES CARTES] cultivated Ethics in the new philosophical spirit; its best representative is Malebranche. Virtue he defines to be the love of universal order, as it eternally existed in the divine reason, where every created reason contemplates it. Particular duties are but the applications of this love. He abandoned the ancient classification of four cardinal virtues, and for it substituted the modern distinction of duties toward God, men, and ourselves. The French school of Sensualism, of which Condillac was the head [see CONDILLAC], regarded all intellectual operations, even judgment and volition, as transformed sensations; and Helvetius, applying the theory to morals, held that self-love or interest is the exclusive motor of man, denied disinterested motives, made pleasure the only good, and referred to legislative rewards and punishments as illustrating the whole system of individual action. La Mettrie maintained an atheistic Epicurism, and Condorcet wished to substitute an empirical education for the ideas and sanctions of religion and morality. The most complete and logical elaboration of the materialism, atheism, and fatalism of the period,

which had pleasure for its single aim and law, was given in D'Holbach's *Système de la nature*. Of the later French writers, Jouffroy is perhaps the most important. He gave a peculiar explanation of good and evil. Every thing is good in proportion as it aids in the fulfilment of our destiny. The problem of human destiny, therefore, lies at the foundation of morality. There can be no *à priori* judgment as to the moral quality of actions, since that is relative to the agent, depending on the influence they may have on the destiny for which he was created. Good, in the case of any particular being, is the fulfilment of its own specific destiny; good, in itself, is the fulfilment of the destiny of all beings; and an interruption in the accomplishment of destiny constitutes evil. His system of Ethics is chiefly laid down in his *Cours du Droit naturel* (2 vols., Par. 1835; a third vol. was edited after his death by Damiron, 1842), his most eloquent work, which, besides ethics, treats of psychology and theodicy. Some points are more fully developed in a series of essays, which first appeared in periodicals, and of which subsequently two collections (*Mélanges philosophiques* and *Nouveaux mélanges philosophiques*) were published.

See, besides the authors named in the course of this article, *A Sketch of the History of Moral Philosophy*, in the introduction to St. Hilaire's translation of Aristotle's *Politics* (*Politique d'Aristote*, Paris); Meiners, *Allgem. Krit. Geschichte d. älteren u. neueren Ethik* (Göttingen, 1801, 2 vols.); Hagenbach, *Encyclop. u. Methodologie*, § 92; Cousin, *Œuvr. Philosophiques* (Paris, 1846-52); Batain, *Morale* (Paris, 1842, 2 vols.); Damiron, *Cours de Philosophie*, vols. iii and iv (Paris, 1842); Jouffroy, *Introd. to Ethics*, transl. by Channing (Boston, 1840, 2 vols. 8vo); Janet, *Hist. des idées morales et politiques* (Paris, 1856); Neander, *Vorlesungen u. d. **Ethiopia** (1 Esdr. iii, 2; Est. xiii, 1; xvi, 1; Judith i, 10; Acts viii, 27; the Hebrew *קוש*, *Kush*, i. e. *Cush*, as it is generally rendered, Gen. ii, 13; 2 Kings xix, 9; Esth. i, 1; Job xxviii, 19; Psa. lxxviii, 31; lxxxvii, 4; Isa. xviii, 1; xx, 3, 5; xxxvii, 9; xlv, 14; Ezek. xxx, 4, 5; xxxviii, 5; Nah. iii, 9), a country which, as thus designated by the ancients, lay to the south of Egypt, and embraced, in its most extended sense, the modern *Nubia*, *Sennar*, *Kordofan*, and northern *Abyssinia*, and in its more definite sense the kingdom of Meroë, from the junction of the Blue and White branches of the Nile to the border of Egypt. In one passage in the description of the garden of Eden, an Asiatic Cush or Ethiopia must be intended (Gen. ii, 13), and the distribution of the descendants of Cush, with later Biblical historical indications, should be compared with the classical mentions of eastern and western Ethiopians, and other indications of profane history. In all other passages, the words *Ethiopia* and the *Ethiopians*, with one possible exception, "the Arabians, that [were] near the Ethiopians" (2 Chron. xxi, 16), which may refer to Arabians opposite to Ethiopia, may be safely considered to mean an African country and people or peoples. In the Bible, as in classical geography, but one limit of Ethiopia is laid down, its northern frontier, just beyond Syene, the most southern town of Egypt. Egypt is spoken of as to be desolate "from Migdol to Syene, even unto the

border of Ethiopia" (Ezek. xxix, 10), or "from Migdol to Syene" (xxx, 6), showing that then, as now, the southern boundary of Egypt was at the First Cataract. In other directions the boundaries can only be generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian highlands on the S. The extent assigned to Ethiopia in ancient times may have been very great, as it was the land of the negroes, and therefore represented all that was known of inner Africa, besides that part of the continent south of Egypt which is washed by the Red Sea. The references in the Bible are, however, generally, if not always, to the territory which was at times under Egyptian rule, a tract watered by the Upper Nile, and extending from Egypt probably as far as a little above the confluence of the White and Blue Rivers.

The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Ezek. xxix, 10), and they describe it as a well-watered country lying "from the side of" (A.V. "beyond") the waters of Cush (Isa. xviii, 1; Zeph. iii, 10), being traversed by the two branches of the Nile, and by the Astaboras or Tacazze. The Nile descends with a rapid stream in this part of its course, forming a series of cataracts: its violence seems to be referred to in the words of Isa. xviii, 2, "whose land the rivers have spoiled." The Hebrews seem also to have been aware of its tropical characteristics, the words translated in the A.V. "the land shadowing with wings" (Isa. xviii, 1), admitting the sense of "the land of the shadow of both sides," the shadows falling towards the north and south at different periods of the year, a feature which is noticed by many early writers (compare the expression in Strabo, ii, p. 13; ἀμφοτέρωθεν; Virgil, *Ecl.* x, 68; Pliny, ii, 75). The papyrus boats ("vessels of bulrushes," Isa. xviii, 2), which were peculiarly adapted to the navigation of the Upper Nile, admitting of being carried on men's backs when necessary, were regarded as a characteristic feature of the country. The Hebrews carried on commercial intercourse with Ethiopia, its "merchandise" (Isa. xlv, 14) consisting of ebony, ivory, frankincense, and gold (Herod. iii, 97, 114), and precious stones (Job xxviii, 19; Josephus, *Ant.* viii, 6, 5).

The following close translation of Isaiah's splendid summons (chap. xviii) to the Ethiopians, as auxiliaries to the Egyptians in the struggle against Sennacherib, is inserted here as graphic of many salient features of that warlike state:

Ho! land of whirling wings,  
That art across the rivers of Cush;  
That sendest on the sea ambassadors,  
Even in vessels of papyrus upon the face of the waters.  
Go, ye light messengers,  
To a nation drafted and drilled,  
To a people fearful henceforth and onward,  
A nation most valiant and dominant,  
Whose land rivers have split:  
All ye inhabitants of the world,  
And dwellers of the land,  
At the lifting of the standard of the mountains you shall see,  
And at the clanging of the trumpet you shall hear.  
For thus has Jehovah said to me:  
I will calmly look on my place—  
Like serene heat above sunlight,  
Like the cloud of dew in the heat of harvest;  
Yet before the harvest, when the blossom has grown perfect,  
Or a plump green grape can the flower become,  
Then has one cut the shoots with the pruning-knives,  
And the twigs has he removed, lopped.  
And they shall be left together for the buzzard of the mountains,  
And for the beast of the earth;  
And upon him shall the buzzard summer,  
And every beast of the earth shall winter upon him.  
In that time shall a present be led to Jehovah of armies,  
Of a people drafted and drilled,  
Even from a people fearful henceforth and onward,  
A nation most valiant and dominant,  
Whose land rivers have split,  
To the place of the name of Jehovah of armies, Mount Zion.

The inhabitants of Ethiopia were a Hamitic race (Gen. x, 6), and are described in the Bible as a dark-complexioned (Jer. xliii, 23) and stalwart race (Isa. xlv, 14, "men of stature;" xviii, 2, for "scattered," some substitute "tall"). Their stature is noticed by Herodotus (ii, 20, 114) as well as their handsomeness. Not improbably the latter quality is intended by the term in Isa. xviii, 2, which in the A.V. is rendered "peeled," but which may mean "fine-looking." Their appearance led to their being selected as attendants in royal households (Jer. xxxviii, 7). The Ethiopians are on one occasion coupled with the Arabians, as occupying the opposite shores of the Red Sea (2 Chron. xxi, 16); but elsewhere they are connected with African nations, particularly Egypt (Isa. lxxviii, 31; Isa. xx, 3, 4; xliii, 3; xlv, 14), Phut (Jer. xli, 9), Lub and Lud (Ezek. xxx, 5), and the Sukkim (2 Chron. xii, 3). They were divided into various tribes, of which the Sabæans were the most powerful. See SEBA; SUKKIM.

The name Cush is found in the Egyptian KISH, which is evidently applied to the same territory, though we have the same difficulty in determining its limits, save on the north. The classical *Æthiopia* (Αἰθιοπία) may have the same origin, through the Coptic *ethos*, of which, unless it be derived from *thos*, "a boundary," the Sahidic form *esos* may be the purest, and connect the classical with the ancient Egyptian name. The Greeks themselves regarded it as expressive of a dark complexion (from αἶθεω, "to burn," and ἄν, "a countenance"). In the Bible there is no certain notice of any Ethiopian race but Cushites.

According to Dr. Brugsch, the first country above Egypt was TA-MERU-PET, or TA-KENS, corresponding to Nubia, and extending, under the Pharaohs, at least as far south as Napata. Dr. Brugsch supposes that TA-KENS was, in the earlier times, the whole tract south of Syene under Egyptian rule [therefore governed by the prince of KISH, and corresponding to or included in that country], and, in the later times, little more than the Dodecaschennus of the Ptolemies and Romans, the remains of the older territory (*Geographische Inschriften*, i, 100). As a nome, Nubia, before the formation of the Ombite Nome, included Omlos, Silsilis being probably the first city of the Egyptian Apollinopolite Nome. Although it is not impossible that at Silsilis was anciently the great natural barrier of Egypt on the south, we think that this extension of Nubia was simply for purposes of government, as Dr. Brugsch seems to admit (*Geogr. Inschr.* i, 100). South of the Nubia of the Pharaohs he places a region of which the name perhaps reads PENT-HEN?-NUFTE, which, however, was probably a district of the former country. Still further, and near Meroë, he puts the land of KISH, and in and about Meroë the land of the NEISI or negroes. Others, however, think that KISH commenced immediately above Egypt, probably always at the First Cataract, and included all the known country south of Egypt, TA-MERU-PET or TA-KENS, save as a nome, being a part of it, the modern Nubia. Names of conquered negro nations, tribes, or countries occur on the monuments of the empire: of these, the most suggestive are the BARBARTA and TAKRERR (see Brugsch, *Geogr. Inschr.* i, 100-107, 150-164; ii, 4, 13, 20; iii, 3, 4, and indices s. v. *Æthiopian*, Kes, etc.).

Ethiopia comprises two very different tracts. North of the region of tropical rains, it is generally an extremely narrow strip of cultivated land, sometimes but a few yards wide, on both sides, or occasionally on one side only, of the Nile. Anciently the watered tract was much broader, but the giving way of a barrier at Silsilis (Jebel es-Silsileh) or Syene (Asswân) has lowered the level of the river for some distance above the First Cataract; exactly how far cannot be accurately determined, but certainly for the whole space below the Third Cataract. The cultivable soil which was

anciently productive is now far above the highest level of the stream. The valley is, however, never broad, the mountains seldom leaving a space of more than a mile within the greater part of the region north of the limit of tropical rains. The aspect of the country is little varied. On either side of the river, here narrower than in its undivided course in Upper Egypt, rise sterile sandstone and limestone mountains, the former sometimes covered by yellow sand-drifts. At the First Cataract, at Kalab'sheb, and at the Second Cataract, the river is obstructed, though at the second place not enough to form a rapid, by red granite and other primary rocks. The groves of date-palms, here especially fine, are the most beautiful objects in the scene, but its general want of variety is often relieved by the splendid remains of Egyptian and Ethiopian civilization, and the clearness of the air throws a peculiar beauty over everything that the traveller beholds. As he ascends the river, the scenery, after a time, becomes more varied, until on the east he reaches the Abyssinian highlands, on the west the long meadows, the pasture-lands of herds of elephants, through which flows the broad and sluggish White Nile. In this upper region the climate is far less healthy than below, save in Abyssinia, which, from its height, is drained, and enjoys an air which is rare and free from exhalations. The country is thus for the most part mountainous, the ranges gradually increasing in altitude towards the S., until they attain an elevation of about 8000 feet in Abyssinia.

The Nile is the great fertilizer of the northern regions of Ethiopia, which depend wholly upon its yearly inundation. It is only towards the junction of the two great streams that the rains take an increasingly important share in the watering of the cultivable land. In about N. lat.  $17^{\circ} 40'$ , the great river receives its first tributary, the Astaboras, now called the Atbarah. In about N. lat.  $15^{\circ} 40'$  is the confluence of the Blue and White Niles. The Blue Nile, which has its source in Abyssinia, is a narrow, rapid stream, with high, steep mud-banks, like the Nile in Egypt; it is strongly charged with alluvial soil, to which it owes the dark color which has given it its distinctive name. From this stream the country below derives the annual alluvial deposits. The White Nile is a colorless river, very broad and shallow, creeping slowly through meadows and wide marsh-lands. Of the cultivation and natural products of Ethiopia little need be said, as they do not illustrate the few notices of it in Scripture. It has always been, excepting the northern part, productive, and rich in animal life. Its wild animals have gradually been reduced, yet still the hippopotamus, the crocodile, and the ostrich abound, though the second alone is found throughout its extent. The elephant and lion are only known in its southernmost part.

In the Bible a Cushite appears undoubtedly to be equivalent to a negro, from this passage, "Can the

Ethiopian change his skin, or the leopard his stripes?" (Jer. xiii, 23); and it is to be observed, that whenever the race of KISH is represented on the Egyptian monuments by a single individual, the type is that of the true negro (Wilkinson, *Anc. Eg.* i, 404, abridgm.). It is therefore probable that the negro race anciently extended further to the north than at present, the whole country watered by the Nile, as far as it is known, being now peopled by a race intermediate between the negro race and the Caucasian. There is no certain mention in the Bible of this intermediate race in Ethiopia, but the Egyptian and Ethiopian monuments afford us indications of its ancient existence in its modern territory, though probably it did not then extend as far south as now. At the present day, Ethiopia is inhabited by a great variety of tribes of this race: the Kunúz, said to be of Arab origin, nearest to Egypt, are very dark; the Núbeh, the next nation, much lighter; beyond them are some fair Arabs, the Caucasian Abyssinians, with scarcely any trace of negro influence save in their dark color, and tribes as black as the true negro, or nearly so, though not of the pure negro type. The languages of Ethiopia are as various as the tribes, and appear to hold the same intermediate place between the Shemitic group and the Nigritian, if we except the Ethiopic, which belongs to the former family. See ETHIOPIC LANGUAGE.

In all that relates to the civilization of ancient Ethiopia we see the same connection with Egypt that is constantly indicated in the Bible. So far as the Egyptian sway extended, which was probably, under the empire, as far as somewhat above the junction of the two Niles, the religion of Egypt was probably practised. While the tract was under Egyptian rule this was certainly the case, as the remains of the temples sufficiently show. We find it as the religion of Tirhakah in his Ethiopian as well as his Egyptian sculptures, and this is also the case with the later kings of Ethiopia who held no sway in Egypt. There were evidently local differences, but apparently nothing more. Respecting the laws and forms of government the same may be supposed. We have very little evidence as to the military matters of the Ethiopians, yet, from their importance to Egypt, there can be little doubt that they were skilful soldiers. Their armies were probably drawn from the Ethiopian or intermediate race, not from the negro. Of the domestic life of this people we have but slight hints. Probably they were more civilized than are their modern successors. Their art, as seen in the sculptures of their kings in Ethiopian temples from Tirhakah downwards, is merely a copy of that of Egypt, showing, after the first, an inferiority in style to the contemporary works of the original art. Their character can scarcely be determined from scanty statements, applying, it may be, to extremely different tribes. In one particular all accounts agree: they were warlike, as, for instance, we equally see in the defiance the Ethiopian king sent to Cambyses (Herod. iii, 21), and in the characteristic inscription at Kalab'sheb of Silco, "king (*βασιλευς*) of the Nubæe and all the Ethiopians" (*Modern Egypt and Thebes*, ii, 311, 312), who is to be regarded as a very late Ethiopian king or chief in the time of the Roman empire. The ancients, from Homer downwards, describe them as a happy and pious race. In the Bible they are spoken of as "secure" or "careless" (Ezek. xxx, 9), but this may merely refer to their state when danger was impending.

Probably the modern inhabitants of Ethiopia give us a far better picture of their predecessors than we can gather from the few notices to which we have alluded. If we compare the Nubians with the representations of the ancient Egyptians on the monuments, we are struck by a similarity of type, the same manner of wearing the hair, and a like scantiness of clothing. There can be

Ancient Ethiopians, as suppliants.—From the Egyptian Monuments. (The first cut shows their color.)

no question that the Nubians are mainly descended from an Egyptianized Ethiopian people of two thousand years ago, who were very nearly related to the Egyptians. The same may be said of many tribes further to the south, although sometimes we find the Arab type and Arab manners and dress. The Ethiopian monuments show us a people like the ancient Egyptians and the modern Nubians. The northern Nubians are a simple people, with some of the vices, but most of the virtues of savages. The chastity of their women is celebrated, and they are noted for their fidelity as servants. But they are inhospitable and cruel, and lack the generous qualities of the Arabs. Further south manners are corrupt, and the national character is that of Egypt without its humanity, and untouched by any but the rudest civilization.

In speaking of the history of the country, we may include what is known of its chronology, since this is no more than the order in which kings reigned. Until the time of the 12th dynasty of Egypt we have neither chronology nor history of Ethiopia. We can only speculate upon the earlier conditions of the country with the aid of some indications in the Bible. The first spread of the descendants of Cush seems to be indicated by the order in which the Cushite tribes, families, or heads are enumerated in Gen. x. All the names, excepting Nimrod, might be thought to indicate a colonization of Southern and Eastern Arabia, were there not good reason to suppose that Seba, though elsewhere mentioned with Sheba (Psa. lxxii, 10), is connected with Ethiopia, and is probably the Hebrew name of the chief Ethiopian kingdom from the time of Solomon downwards. (Josephus calls Meroë Saba, *Ant.* ii, 10, 2, and Seba of Cush he calls Sabas, *ib.* i, 6, 2.) If this be the case, it would be remarkable that Nimrod is mentioned at the end of the list and Seba at the beginning, while the intervening names, mostly if not all, are Arabian. This distribution may account for the strongly-Caucasian type of the Abyssinians, and the greater indication of Nigrinian influence in all the other Ethiopian races; for a curve drawn from Nimrod's first kingdom—there can, we think, be little doubt that the meaning in Genesis is, that he went northward and founded Nineveh—and extending along the South Arabian coast, if carried into Africa, would first touch Abyssinia. The connection of Southern Arabia and Abyssinia has been so strong for about two thousand years that we must admit the reasonableness of this theory of their ancient colonization by kindred tribes. The curious question of the direction from which Egyptian civilization came cannot here be discussed. It is possible that it may have descended the Nile, as was, until lately, supposed by many critics, in accordance with statements of the Greek writers. The idea or tradition on which these writers probably build may be due to the Nigrinian origin of the low nature-worship of the old Egyptian religion, and perhaps, as far as it is picture-writing, of the hieroglyphic system, of which the characters are sometimes called Ethiopic letters by ancient writers.

The history of Ethiopia is closely interwoven with that of Egypt. The two countries were not unfrequently united under the rule of the same sovereign. The first Egyptian king who governed Ethiopia was one of the 12th dynasty, named Osirtasen I, the Sesostris of Herod. ii, 110. During the occupation of Egypt by the Hyksos, the 13th dynasty retired to the Ethiopian capital, Napata; and again we find the kings of the 18th and 19th dynasties exercising a supremacy over Ethiopia, and erecting numerous temples, the ruins of which still exist at Semneh, Amada, Soleb, Abusimbel, and Jebel Berkel. The tradition of the successful expedition of Moses against the Ethiopians, recorded by Josephus (*Ant.* ii, 10), was doubtless founded on the general superiority of the Egyptians at that period of their history.

Under the 12th dynasty we find the first materials

for a history of Ethiopia. In these days Nubia seems to have been thoroughly Egyptianized as far as beyond the Second Cataract, but we have no indication of the existence at that time in Ethiopia of any race but the Egyptian. We find an allusion to the negroes in the time between the 12th dynasty and the 18th, in the name of a king of that period, which reads RA?NEUSI, or "the Sun? of the Negroes," rather than "the Negro Sun?" (*Turin Papyrus of Kings*, ap. Lepsius *Königsbuch*, pl. xviii, 197; xix, 278). The word NEUSI is the constant designation of the negro race in hieroglyphics.

Before passing to the beginning of the 18th dynasty, when the Egyptian empire definitely commenced [see EGYPT], we may notice two possible references to the Ethiopians in connection with the Exodus, an event which probably occurred at an early period of that empire. In Isa. xliii, which, though relating to the future, also speaks of the past, and especially mentions or alludes to the passage of the Red Sea (see particularly ver. 16, 17), Ethiopia is thus apparently connected with the Exodus: "I gave Egypt [for] thy ransom, Ethiopia and Seba for thee" (ver. 3). It can scarcely be supposed that this is an emphatic relation of future events, and it is difficult to connect it with any other known past event, as the conquest of Egypt by Sennacherib, which may have already occurred. If this passage refer to the Exodus, it would seem to favor the idea that the Israelites went out during the empire, for then Ethiopia was ruled by Egypt, and would have been injured by the calamities that befel that country. In Amos there is a passage that may possibly connect the Ethiopians with the Exodus: "[Are] ye not as children of the Ethiopians unto me, O children of Israel? saith the LORD. Have not I brought up Israel out of the land of Egypt? and the Philistines from Caphtor, and the Syrians from Kir?" (ix, 7). But the meaning may be that the Israelites were no better than the idolatrous people of Cush.

At the beginning of the 18th dynasty we find the Egyptians making expeditions into Ethiopia, no doubt into its farther regions, and bringing back slaves. At this time the Egyptians seem to have intermarried with people of Ethiopia, probably of the intermediate race, darker than the Egyptians, but not of the negro race. One of the wives of Aämwes, or Amosis, the first king of the 18th dynasty, is represented as black, though not with negro features. A later sovereign of the same dynasty, Amenoph III, is seen by his statues to have been partly Ethiopian, and this may have been one cause of his identification by the Greeks with Memnon. During this and the dynasty which succeeded it, the 19th, we have no proof that the regularly-governed Egyptian dominions extended beyond Napata, but it is probable that they reached a little beyond the junction of the White and Blue Niles. There can be no doubt that Ethiopia remained subject to Egypt as late as the reign of Rameses VI, soon after whom the proper Egyptian empire may be said to have closed, having lasted three centuries from the beginning of the 18th dynasty. Under that empire, Ethiopia, or at least the civilized portion, was ruled by a governor, who bore the title SUTEN-SA-EN-KISU, "Prince," literally "Royal son," "of Cush," etc. The office does not seem to have been hereditary at any time, nor is it known to have been held by a son of the reigning king, or any member of the royal family.

After the reign of Rameses VI, the feebleness of the later Theban kings may have led to the loss of Ethiopia, and we know that in Solomon's time there was a kingdom of Seba. Shishak, the first king of the 22d dynasty, probably made Ethiopia tributary. When this king, the Sheshonk I of the monuments, invaded the kingdom of Judah, he had in his army "the Lubim, the Sukkiim, and the Cushim" (2 Chron. xii, 13). The Lubim are a people of Northern Africa, near Egypt, and the Sukkiim are of doubtful place. The

indications are of an extensive dominion in Africa; for, though the Lubim and Sukkim may have been mercenaries, it is unlikely that the Cushim were also. There can be no doubt that Shishak was a powerful king, especially as he was strong enough to invade Judah, and it is therefore probable that he restored the influence of the Egyptians in Ethiopia. See SHISHAK, Zerah the Ethiopian, on account of his army being of Cushim and Lubim, and thus, as well as in consisting of chariots, horsemen, and foot, of like composition with that of Shishak (2 Chron. xvi, 8; xiv, 9, 12, 13; xii, 2, 3), seems certainly to have been either a king of this dynasty, or else a general of such a king. In the former case he would probably correspond to Osorkon II. The names Osorkon and Zerah seem very remote, but it must be remembered that Egyptian words transcribed in Hebrew are often much changed, and that in this case it is probable that both Egyptian and Hebrew forms, if they be two orthographical representations of one word, come from a third source. The style "Zerah the Cushite" is unlike that applied to kings of Egypt who were foreigners, or of foreign extraction, as in the cases of "So, king of Egypt," and "Shishak, king of Egypt." On this account, and especially from the omission of the word king, or any royal appellation, though we cannot infer positively from the few instances in Scripture, Zerah may be rather supposed to have been a general, but the army that he commanded must, from the resemblance of its composition to that of Shishak's, have been that of a king of the same line. Mr. Kenrick rather too hastily remarks as to the term Cushite, that "no king of the Bubastite [22d] dynasty could have been so designated," and is at some pains to explain what he considers to be a mistake (*Ancient Egypt*, ii, 297 sq.). It is recorded that Asa had an army of 580,000, and that Zerah the Ethiopian came against him with 1,000,000, and 300 chariots. These high numbers have been objected to; but the history of our times shows that war upon this large scale is not alone possible to great kingdoms, but also to states of no very large population which put forth their whole strength. It is to be noticed that Asa was evidently struck by the greatness of the hostile army, to which the prophet Hanani alludes, reproving him at a later time (2 Chron. xvi, 8). See NUMBER. Asa encountered Zerah "in the valley of Zephathah at Mareshah," and, praying for God's aid against this huge army, it was put to the rout, and he pursued it to Gerar, and smote all the cities round Gerar, which seem to have been in alliance with the invaders, and took much spoil from the cities, and also smote the tents of cattle, from which he took many sheep and camels (xiv, 8-15). This great overthrow may have been a main cause of the decline of the power of the 22d dynasty, which probably owed its importance to the successes of Shishak. See ZERAH.

During the later period of this dynasty, it is probable that Ethiopia became wholly independent. The 23d dynasty appears to have been an Egyptian line of little power. The 24th, according to Manetho, of but one king, Bocchoris the Saite, was probably contemporary with it. In the time of Bocchoris, Egypt was conquered by Sabaco the Ethiopian, who founded the 25th dynasty of Ethiopian kings. The chronology and history of this line is obscure. We take Manetho's list for the chronology, with a few necessary corrections in the length of the reigns, in the following table [see EGYPT]:

The duration here given to the first and second reigns can only be considered to be conjectural. Herodotus assigns 50 years as the duration of the Ethiopian dominion in Egypt (ii, 137, 139), and as he lived at no great distance from the time, and is to be depended upon for the chronology of the next dynasty, we should lay some stress upon his evidence did he not speak of but one Ethiopian king, Sabacos. Perhaps he includes in this single reign that of Tirhakah, and omits that of the first Sabacos. There are two Hebrew synchronisms and one Egyptian point of evidence which aid us in endeavoring to fix the chronology of this dynasty. Either the first or second king of the dynasty is supposed to be the So of the Bible, with whom Hoshea, who began to reign B.C. 729-8, made a treaty at least three years before the taking of Samaria: the latter event is fixed at B.C. 720; therefore one of these two Ethiopians was probably reigning in B.C. 723, or somewhat, perhaps seven years, earlier. See So. Nor is it supposable that the treaty may have been made before the conquest of Egypt; for So is expressly called "king of Egypt" (2 Kings xvii, 4), whereas Zerah and Tirhakah are distinctively styled Cushites (2 Chron. xiv, 9; 2 Kings xix, 9). Tirhakah was contemporary with Hezekiah and Sennacherib at the time of the destruction of the Assyrian army. The chronology of Hezekiah's reign is, with respect to these synchronisms, difficult; but we are disposed to think that the common reckoning, varying not more than three years, is correct, and that the preferable date of the accession of Hezekiah is B.C. 726. Some chronologers follow Dr. Oppert in supposing that the date of Sennacherib's invasion should be Hezekiah's 24th year instead of the 14th year (*Chronologie des Assyriens et des Babyloniens*, p. 14, 15), but we rather infer a long interval between two wars. See HEZEKIAH. The last year of Hezekiah is thus B.C. 697, unless we suppose that his reign was longer than is stated in the Masoretic text, and that it was for the latter part contemporary with Manasseh's. Tirhakah's reign is nearly determined by the record in a tablet of the tombs of the Bulls Apis, that one of them was born in his twenty-sixth year, and died at the end of the 20th of Psammetichus I. The length of its life is unfortunately not stated, but it exceeded twenty years, and the longest age recorded is twenty-six. Supposing it to have lived twenty-one years, the first year of Tirhakah's reign would fall in B.C. 690 (see Rawlinson's *Herod*, ii, 319, where the successor of Psammetichus is proved to date from B.C. 664), which would correspond to the 8th year of Manasseh. The contemporaneousness of Tirhakah and Hezekiah can be explained by one of two suppositions, either that Hezekiah's reign exceeded twenty-nine years, or that Tirhakah ruled in Ethiopia before coming to the throne of Egypt. It must be remembered that it cannot be proved that the reigns of Manetho's 25th dynasty form a series without any break, and also that the date of the taking of Samaria is considered fixed by the Assyrian scholars. At present, therefore, we cannot venture on any changes. See CHRONOLOGY.

We do not know the cause of the rise of the 25th dynasty. Probably the first king already had an Ethiopian sovereignty when he invaded Egypt. That he and his successors were natives of Ethiopia is probable from their being kings of Ethiopia and having non-Egyptian names. Though Sabaco conquered Bocchoris and put him to death, he does not seem to have overthrown his line or the 23d dynasty: both proba-

bly continued in a tributary or titular position, as the Sethos of Herodotus, an Egyptian king of the time of Tirhakah, appears to be the same as Zet, who, in the version of Manetho by Africanus, is the last king of the 23d dynasty, and as kings connected with Psammetichus I of the Saite 26th dynasty are shown by the monuments to have preceded him in the time of the Ethiopians, and probably to have continued the line of the Saite Bocchoris. We think it probable that Sabaco is the "So, king of Egypt," who was the cause of the downfall of Hoshea, the last king of Israel. The Hebrew name שֹׁ, if we omit the Masoretic points, is not very remote from the Egyptian SUEBEK. It was at this time that Egypt began strongly to influence the politics of the Hebrew kingdoms, and the prophecies of Hosea, denouncing an Egyptian alliance, probably refer to the reign of So or his successor; those of Isaiah, of similar purport, if his book be in chronological order, relate to the reign of Tirhakah. Tirhakah is far more fully commemorated by monuments than his predecessors. At Thebes he has left sculptures, and at Jebel-Berkel, Napata, one temple and part of another. There seems to be no doubt that Sethos (Zet?) was at least titular king of part of Egypt, or the whole country, under Tirhakah, on the following evidence: In the Bible, Tirhakah, when mentioned by name, is called "king of Cush (Ethiopia)," and a Pharaoh is spoken of at the same period (Isa. xxx, 2, 3; xxxvi, 6; 2 Kings xviii, 21); in the Assyrian inscriptions a Pharaoh is mentioned as contemporary with Sennacherib; and the Egyptian monuments indicate that two or three royal lines centred in that of the 26th dynasty. The only event of Tirhakah's reign certainly known to us is his advance against Sennacherib, apparently in fulfilment of a treaty made by Hezekiah with the Pharaoh whom we suppose to be Sethos. This expedition was rendered needless by the miraculous destruction of the Assyrian army, but it is probable that Tirhakah seized the occasion to recover some of the cities of Palestine which had before belonged to Egypt. Herodotus gives a traditional account of Sennacherib's overthrow, relating that when Egypt was ruled by Sethos, a priest-king, the country was invaded by Sennacherib, against whom Sethos, who had offended the military class, marched with an army of artificers and the like, and encamped near Pelusium, where in the night a multitude of field-mice gnawed the bow-strings and shield-straps of the Assyrians, who, being thus unable to defend themselves, took to flight (ii, 141). It has been well observed that it is said by Herodotus that a mouse denoted "disappearance" in hieroglyphics (*Hierog.* i, 50). Here we have evidently a confused tradition of the great overthrow of the Assyrians. Strabo, on the authority of Megasthenes, tells us that Tirhakah, in his extensive expeditions, rivalled Sesostris, and went as far as the Pillars of Hercules (xv, 686).

The beginning of the 26th dynasty was a time of disaster to Egypt. Tirhakah was either dead or had retired to Ethiopia, and Egypt fell into the hands of several petty princes, probably the dodecarchs of Herodotus, whose rule precedes, and perhaps overlaps, that of Psammetichus I, who is said to have been at first a dodecarch. In this time Esarhaddon twice invaded and conquered the country; but, after his second invasion, Psammetichus seems to have entirely thrown off the Assyrian yoke, and restored Egypt to somewhat of its ancient power. There are several passages in Scripture which probably refer to these invasions, and certainly show the relation of Ethiopia to Egypt at this time. The prophet Nahum, warning Nineveh, describes the fall of Thebes, "Art thou better than No Amion, that was situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall from the sea? Cush and Mizraim [were her] strength, and [it was] infi-

nite; Put and Lubim were in thy help" (iii, 8, 9). The sack and captivity of the city are then related. The exact period of Nahum is not known, but there is much probability that he lived about the time of the invasion of Judaea by Sennacherib (i, 11, 12). See NAHUM. He therefore appears to refer to one of the conquests of Egypt by Sennacherib, Sargon, or Shalmaneser. See No. The close alliance of Cush and Mizraim seems to point to the period of the Ethiopian rule, when the states would have united against a common enemy. Three chapters of Isaiah relate to the future of Ethiopia and Egypt, and it is probable that they contain what is virtually one connected subject, although divided into a prophecy against Ethiopia, the burden of Egypt, and the record of an event shown to prefigure the fall of both countries, these divisions having been followed by those who separated the book into chapters. The prophecy against Ethiopia is extremely obscure. (See the version above.) It appears to foretell the calamity of Ethiopia to its farthest people, to whom messengers should be sent in vessels of papyrus, by the sea, here the Nile, as in the description of Thebes by the prophet Nahum (*L. c.*), bearing, probably, that news which is related in the next chapter. In the end the Ethiopians would send a present to the Lord at Zion (chap. xviii). Then follows "the burden of Egypt," apparently foretelling the discord and strife of the dodecarchy, the delivering of the people into the hand of a cruel lord, probably the Assyrian conqueror, the failure of the waters of Egypt and of its chief sources of revenue, and the partial conversion of the Egyptians, and, as it seems, their ultimate admission to the Church (chap. xix). We then read how a Tartan, or general, of Sargon, the king of Assyria, took Ashdod, no doubt with a garrison from the Egyptian army. At this time Isaiah was commanded to walk "naked and barefoot," probably without an outer garment, three years, as a sign to show how the Egyptians and Ethiopians, as no doubt had been the case with the garrison of Ashdod, probably of both nations, should be led captive by the king of Assyria. This captivity was to be witnessed by the Jews who trusted in Ethiopia and Egypt to be delivered from the king of Assyria, and the invasions of Egypt by Esarhaddon are therefore probably foretold (chap. xx). In the books of later prophets Ethiopia does not take this prominent place: no longer a great power, it only appears as furnishing part of the Egyptian forces or sharing the calamities of Egypt, as in the history of Egypt we find Ethiopia occupying a position of little or no political importance, the successors of Tirhakah in that country being perhaps tributaries of the kings of the 26th dynasty. In the description by Jeremiah of Pharaoh-Necho's army, the Ethiopians (Cush) are first spoken of among the foreign warriors mentioned as serving in it (xli, 9). Ezekiel prophesies the fear of Ethiopia at the overthrow of Egypt by Nebuchadnezzar (xxx, 4-9), and though the helpers of Egypt were to fall, it does not seem that the invasion of their lands is necessarily to be understood. One passage illustrates the difficult 18th chapter of Isaiah: "In that day shall messengers go forth from me in ships to make ["secure" or] careless Ethiopia afraid, and great pain shall come upon them as in the day of Egypt" (Ezek. xxx, 9). Zephaniah, somewhat earlier, mentions the Ethiopians alone, predicting their overthrow (ii, 12). It is probable that the defeat of the Egyptian army at Carchemish by Nebuchadnezzar is referred to, or else the same king's invasion of Egypt.

The kings of Egypt do not appear to have regained the absolute rule of Ethiopia, or to have displaced the native kings, though it is probable that they made them tributary. Under Psammetichus I a revolt occurred in the Egyptian army, and a large body of rebels fled to Ethiopia, and there established themselves. A Greek inscription on one of the colossi of the great

temple of Abu-Simbil, not far below the Second Cataract, records the passage of Greek mercenaries on their return from an expedition up the river, "king Psamatichus" having, as it seems, not gone beyond Elephantine. This expedition was probably that which Herodotus mentions Psammetichus as having made in order to bring back the rebels (ii, 30), and, in any case, the inscription is valuable as the only record of the 26th dynasty which has been found above the First Cataract. It does not prove, more especially as the king remained at Elephantine, that he governed any part of Ethiopia. The next event of Ethiopian history is the disastrous expedition of Cambyses, defeated by the desert-march, and not by any valor of the invaded nation. From this time the country seems to have enjoyed tranquillity, until the earlier Ptolemies acquired part of Lower Nubia that was again lost to them in the decline of their dynasty. When Egypt became a Roman province, Syene was its frontier town to the south; but when, under Augustus, the garrison of that town had been overwhelmed by the Ethiopians, the prefect Petronius invaded Ethiopia, and took Napata, said to have been the capital of queen Candace. The extensive territory subdued was not held, and though the names of some of the Cæsars are found in the temples of Lower Nubia, in Strabo's time Syene marked the frontier. This part of Ethiopia must have been so unproductive, even before the falling of the level of the Nile, which Sir Gardner Wilkinson supposes to have happened between the early part of the 13th dynasty and the beginning of the 18th, that it may well have been regarded as a kind of neutral ground.

The chronology of the kings of Ethiopia after Tirhakah cannot yet be attempted. Professor Lepsius arranges all the Ethiopians under four periods: 1st. The 25th dynasty, first and second kings. 2d. Kings of Napata, beginning with Tirhakah, who, in his opinion, retired from Egypt, and made this his capital: of these kings, one, named NASTES-SES, or NASTES-NEN, has left a tablet at Dongolah, recording the taking in his wars of enormous booty in cattle and gold (Lepsius, *Denkmäler*, v, 16; Brugsch, *Geogr. Inscr.* i, 163, 164). 3d. Older kings of Meroë, among whom is a queen KENTAH, in whom a Candace is immediately recognised, and also MI-AMEN ASRU and ARKAMEN, the latter Ergamenes, the contemporary of Ptolemy Philadelphus, who had, according to Diodorus Siculus, received a Greek training, and changed the customs of Ethiopia (iii, 6). Some of these princes had an extensive dominion. The name of Ergamenes is found from Lower Nubia to Meroë. 4th. Later kings of Meroë, some, at least, of whom ruled both Meroë and Napata, though the former seems to have been the favorite capital in the later period (*Königsbuch*, pl. lxxi, lxxii, lxxiii). The importance of queens is remarkably characteristic of an African people. See MEROË.

The spread of Christianity in Ethiopia is a remarkable event in the history of the country, and one in which the truth of "the sure word of prophecy" has been especially evident. In this case, as in others, the Law may have been the predecessor of the Gospel. The pious eunuch, "Ebed-melech the Ethiopian," who befriended Jeremiah (xxxviii, 7-13; xxxix, 15-18), may have been one of many converts from paganism, but it is scarcely likely that any of these returned to their native land. The Abyssinian Jews, being probably a colony of those of Arabia, were perhaps of later origin than the time of the introduction of Christianity. But in the case of the Ethiopian eunuch, who had charge of all the treasure of Candace, queen of the Ethiopians, and who, on his return from worshipping at Jerusalem, was baptized by Philip the deacon, we see evidence of the spread of the old dispensation in Ethiopia, and of the reception there of the new (Acts viii, 27-39). In Psalm lxxviii (31), in Isaiah (xlv, 14), and probably in Zephaniah (iii, 10), the calling of Ethi-

opia to God's service is foretold. Whether conversion to the Law or to Christianity, or indeed to both, is intended, it is remarkable that, though long deprived of its actual geographical contact with the Coptic Church, of which it is a branch, by the falling away of Nubia, the Abyssinian Church yet remains, and the empire and the kingdom of Shoa are the only Christian sovereignties in the whole of Africa. See ABYSSINIAN CHURCH.

The ancient monuments of Ethiopia may be separated into two great classes, the Egyptian and the Egypto-Ethiopian. In Lower Nubia the Egyptian are almost universal; at Napata we find Egypto-Ethiopian, as well as higher up in the island of Meroë. In the monuments north of Napata, of which the chief lie between the first and second cataracts, we perceive no difference from those of Egypt save in the occurrence of the names of two Ethiopian kings—ARKAMEN, or Ergamenes, and ATSHERAMEN. The remains attest the wealth of the kings of Egypt rather than that of the country in which they are found; their abundance is partly owing to the scanty modern population's not having required the ancient masonry for building materials. The nearness of the mountains on either side to the river, and the value of the little tracts of alluvial soil, have rendered wholly or partly rock-hewn temples numerous here. Tombs are few and unimportant. Above the second cataract there are some similar remains, until the traveller reaches Jebel Berkel, the sacred mountain beneath which stood Napata, where, besides the remains of temples, he is struck with the sight of many pyramids. Other pyramids are seen in the neighborhood. They are peculiar in construction, the proportion of the height to the base being much greater than in the pyramids of Egypt. The temples are of Egyptian character, and one of them is wholly, and another partly, of the reign of Tirhakah. The pyramids are later, and are thoroughly Ethiopian. Yet higher up the river are the monuments of Meroë and neighboring places. They are pyramids, like those of Napata, and temples, with other buildings, of a more Ethiopian style than the temples of the other capital. The size and importance of these monuments prove that the sovereigns who ruled at Meroë must have been very rich, if not warlike. The farthest vestiges of ancient civilization that have been found are remains of an Egyptian character at Sôbah, on the Blue Nile, not far south of the junction of the two rivers. The name suggests the Biblical Seba, which, as a kingdom, may correspond to that of Meroë; but such resemblances are dangerous. The tendency of Ethiopian art was to imitate the earliest Egyptian forms of building, and even subjects of sculpture. This is plain in the adoption of pyramids. The same feeling is strongly evident in Egypt under the 26th dynasty, when there was a renaissance of the style of the pyramid period, though no pyramids seem to have been built. This renaissance appears to have begun under, or immediately after, the later part of the 25th dynasty, and is seen in the subjects of sculpture and the use of titles. The monuments of Ethiopian princes, at first as good as those of Egypt at the same time, become rapidly inferior, and at last are extremely barbarous, more so than any of Egypt. The use of hieroglyphics continues to the last for royal names, but the language seems, after the earlier period, to have been little understood. An Ethiopian demotic character has been found of the period, which succeeded the hieroglyphic for common use, and even for some inscriptions. We do not offer any opinion on the language of this character. The subject requires full investigation. The early Abyssinian remains, as the obelisk at Axum, do not seem to have any connection with those of more northern Ethiopia: they are of later times, and probably are of Arab origin. Throughout Ethiopia we find no traces of an original art or civilization, all the ancient monuments,

save those of Abyssinia, which can scarcely be called ancient, showing that the country was thoroughly Egyptianized. Lepsius has published the Ethiopian monuments in his *Denkmäler* (pt. v; pl. 1-75), as well as the inscriptions in Ethiopian demotic (pt. vi; pl. 1-11; see also 12, 13).—Kitto, s. v.

**Ethio'pian** (Ἀἰθίοψ, Acts viii, 27; כּוּשִׁי, *Kushí'*, Num. xii, 1; 2 Chron. xii, 3; xiv, 9, 12, 13; xvi, 8; xxi, 16; Jer. xiii, 23; xxxviii, 7, 10, 12; xxxix, 16; Dan. xi, 43; Amos ix, 7; Zeph. ii, 12; i. e. *Cushite*; elsewhere as a rendering of the simple כּוּשִׁי, *Kush*), an inhabitant of the land of ETHIOPIA (q. v.) or CUSH; properly "Cushite" (Jer. xiii, 23); used of Zerah (2 Chron. xiv, 9 [8]) and Elbedmelech (Jer. xxxviii, 7, 10, 12; xxxix, 16). See also CUSH.

**ETHIOPIAN EUNUCH** (ἀνήρ Αἰθίοψ, εὐνοῦχος), a person described (Acts viii, 27) as a chief officer (vizier) of the Ethiopian queen Candace (κυβερνήτης Κανδάκης τῆς βασιλίσσης Αἰθίοπων), who was converted to Christianity through the instrumentality of the evangelist Philip (q. v.). Ethioptic tradition calls him *Isidich* (see *Bzovii Annal.* ad 1524, p. 542; but comp. Ludolf, *Hist. Æth.* iii, 2), and Ireneus (iii, 12) and Eusebius (*Hist. Eccl.* ii, 1) make him the founder of Christianity in Arabia Felix and Ethiopia, but according to Sophronius he preached in the island of Ceylon, and suffered martyrdom there. His official title does not necessarily indicate an emasculated person [see ΕΥΝΟΥΧΟΝ], but probably here denotes a prime minister of state rather than a simple *cubicularius* or chamberlain (q. v.). Kuinöl (ad loc.) thinks he was a Jew of the *Diaspora*; and certainly he was at least a proselyte (q. v.). As to the place of his power, it is not quite certain that the passage in Pliny (*Hist. Nat.* vi, 5) refers to Meroë as the seat of government of the female sovereigns (comp. βασιλίσσας, Strabo, xvii, 2, 3); but possibly rather to Napata (Γαπάπη, Dion Cass. liv, 5), the capital of a different part of Ethiopia (Rawlinson, *Herodotus*, ii, 35), or perhaps an uncertain locality (Ritter, *Erdk.* i, 592). On the historical elements of the question, see Laurent, *Neuestenamen. Studien* (Gotha, 1866), p. 140 sq.; *Bibliotheca Sacra*, July, 1866, p. 515; on the religious teachings of the narrative, see Sam. Smith, *Sermon on the Eth. Eunuch's Conversion* (Lond. 1632). See CANDACE.

**ETHIOPIAN WOMAN** (Heb. *Kushít*, כּוּשִׁיָּת, fem. of *Cushite*; Sept. Αἰθιοπίσσα, Vulg. *Æthiopiassa*). Zipporah, the wife of Moses, is so described in Num. xii, 1. She is elsewhere said to have been the daughter of a Midianite (Exod. ii, 21, compared with 16), and, in consequence of this, Ewald and others have supposed that the allusion is to another wife whom Moses

married after the death of Zipporah; but the Arabian Ethiopia is probably referred to in this case. See ZIPPORAH.

**ETHIOPIANS** (עַמֵּי כּוּשׁ, Isa. xx, 4; Jer. xli, 9, עַמֵּי כּוּשׁ; Sept. Αἰθίοπες, Vulg. *Æthiopia, Æthiopes*), properly "Cush" or "Ethiopia" in two passages (Isa. xx, 4; Jer. xli, 9); elsewhere "Cushites," or inhabitants of Ethiopia (2 Chron. xii, 3; xiv, 12 [11], 13 [12]; xvi, 8; xxi, 16; Dan. xi, 43; Amos ix, 7; Zeph. ii, 12). See CUSHITE.

**Ethiopic Language.** As it is maintained by competent judges that the Amharic and the Tigré are really dialects of the ancient Ethiopic or Geez (which is doubted by Adelung and Vater in the *Mithridates*), it may be expected, from the recent progress of comparative grammar, that future scholars will apply them to elucidate the structure of the other Syro-Arabian languages. At present, however, as even the Amharic is not yet able to boast of adequate and accessible means for its study, and as neither possesses any ancient version of any part of the Bible, the Geez is the only one which claims a particular notice here. See AMHARIC LANGUAGE.

The ancient Ethiopic or Geez, which is the only one of the three dialects that either has been or is now generally used in written documents of a sacred or civil kind, is to be classed as an ancient branch of the Arabic. This affinity is evident from the entire grammatical structure of the language; it is confirmed by the relation of its written character to that of the Himyarite alphabet; and either supports, or is supported by, the assumption that Habesh or Abyssinia was actually peopled by a colony from Southern Arabia. The grammatical structure of the Geez shows a largely predominant identity with that of Arabic; but it also possesses some traits which are in closer accordance with the other Syro-Arabian idioms, and some which are peculiar to itself alone. The main features of its structure are as follows: The verb possesses the first ten conjugations of the Arabic verb, with the exception of the eighth and ninth; besides these it has two other conjugations which are unknown to the Arabic. There is a special conjunctive mood; the double infinitive is often used as a noun, irrespective of the absolute or construct form; the participle is wanting. The formation of nouns resembles most that of Hebrew; but nouns often have superfluous end-vowels, which are modified in particular cases, and are analogous to the Arabic nunation. As for the flexion of nouns, the masculine and feminine plurals are either formed by affixed syllables (*ân, ât*) on the principle common to the whole Syro-Arabian family, or by changes within the compass of the radical letters, after the manner of the so-called *broken* plurals of the Arabic grammar. The "construct state," and that relation of the noun which is equivalent to our objective case, are denoted by changes in the final vowels, or by employing the relative pronoun; the dative is indicated by prepositions. The comparative and superlative are expressed by means of particles. There is no form for the dual number either in the verb or the noun. With regard to the vocabulary of the language, one third of the roots are to be found in the same state in Arabic. By making allowance for commutations and transpositions, many other roots may be identified with their Arabic correspondents: some of its roots, however, do not exist in our present Arabic, but are to be found in Aramaic and Hebrew. Besides this, it has native roots peculiar to itself; it has adopted several Greek words, but shows no traces of the influence of Coptic.

The alphabet possesses twenty-six consonants, arranged in a peculiar order, twenty-four of which may, however, be regarded as essentially equivalent (although with different sounds in many instances) to the letters in the Arabic alphabet. The remaining two are letters adopted to express the Greek Φ and Ψ.

\* Exclusively Amharic.

The vowel-sounds, which are seven, are not expressed by separable signs, as in the Hebrew and Arabic punctuation, but are denoted by modifications in the original form of the consonants, after the manner of the Dēvanāgarī alphabet. The mode of writing is from left to right. The position of the accent depends upon many complicated rules. As for the written characters, Gesenius has traced the relation between some of them and their equivalents in the Phœnician alphabet. There is, however, the most striking resemblance between the Geez letters generally and those in the Himyarite inscriptions, a circumstance which accords well with the supposed connection of Southern Arabia and Habesh. Moreover, Lepsius, in an interesting essay, *Ueber die Anordnung und Verwandtschaft des Semitischen, Indischen, Äthiopischen, etc. Alphabets* (in his *Zwei sprachvergleichende Abhandlungen*, Berlin, 1836, 8vo, p. 74-80), has adduced some striking arguments to prove that the Dēvanāgarī alphabet must have had some influence on the development of the Geez.

The literature of the Geez language is very scanty indeed, and that little is almost exclusively of a Biblical or ecclesiastical character. Dr. Laurence has lately added considerably to this by the publication of the Book of Enoch (q. v.), the Ascension of Isaiah (q. v.), and the first Book of Esdras (q. v.), in the Ethiopic version. There also exist in Ethiopic the Christian *Book of Adam* (in Germ. by Dillmann, Gött. 1853), and several other apocryphal works relating the miracles of Christ, Mary, &c. It possesses nothing, not even an imitation of the national poetry, nor of the lexicographical and grammatical works of the Arabs. Some few historical works in the shape of chronicles, and a few medical treatises, constitute the main body of their profane literature. The Geez has ceased, ever since the beginning of the 14th century, to be the vernacular language of any part of the country, having been supplanted at the court of the sovereign by the Amharic. It still continues, however, to be the language used in religious rites, in domestic affairs of state, and in private correspondence.—Kitto, s. v. See Ludolf, *Grammatica Æthiopia* (2d edit. Freft. 1702, fol.), and his *Lexicon Æthiopicum-Latinum* (2d edit. ib. 1699, fol., originally Lond. 1661, 4to); Hase, *Prakt. Hdb. d. arab. u. äthiop. Sprache* (Jen. 1793, 8vo); Hupfeld, *Exercit. Æthiopicæ* (Lips. 1826, 4to); Gesenius, in Ersch und Gruber's *Allgemeine Encyclopædie*, s. v. *Äthiopische Sprache*; Dillmann, *Lexicon Ling. Æthiopicæ* (Lpz. 1862 sq., 4to); *Chrestomathia Æthiopia* (Lpz. 1865, 8vo); Castell, *Lexicon Heptaglotton* (Lond. 1669, fol.); Schrader, *De Lingue Æthiop. indole* (Vien. 1860 sq., 4to). See SUEMITIC LANGUAGES.

**Ethiopic Version.** The libraries of Europe contain some, although very rarely complete, manuscript copies of a translation of the Bible into the Geez dialect (see Ludolf, *Historia Æthiopia*, Lond. 1684; also Platt's *Catalogue of Æth. MSS.*, London, 1823). This version of the Old Testament was made from the Greek of the Septuagint, according to the Alexandrian recension, as is evinced, among other things, by the arrangement of the Biblical books, and by the admission of the Apocrypha without distinction. Tradition assigns it to Frumentius as the author, but this is probably proceeded from various Christian hands. Doorn supposes (*De Psalterio Æthiopicæ*, Lips. 1825) that the translator consulted the Heb. original, but this is disputed by Gesenius and Rödiger (*Allgem. Litt. Zeit.*

1832). It is divided into four parts: *The Law*, or the Octateuch, containing the Pentateuch and the books of Joshua, Judges, and Ruth; *The Kings*, in thirteen books, consisting of two books of Samuel, two of Kings, two of Chronicles, two of Ezra (Ezra and Nehemiah), Tobit, Judith, Esther, Job, the Psalms; *Solomon*, in five books, consisting of Proverbs, Ecclesiastes, Canticles, Wisdom, and Sirach; *Prophets*, in eighteen books, consisting of Isaiah, Jeremiah's prophecy and Lamentations, Baruch, Ezekiel, Daniel, and the twelve minor prophets; lastly, they have also two books of the Maccabees. Besides this, they possess an apocryphal book of Enoch, which they place next to that of Job. The critical uses of this version are almost exclusively confined to the evidence it gives as to the text of the Septuagint. The version of the New Testament was made directly from the Greek original (see Bode, *N. T. Æth. cum Græco collatum*, Brunswick, 1753). It follows the verbal arrangement of the Greek very closely, and has mistakes that are only to be explained by the confusion of words which resemble each other in that language. It is difficult to determine what recension it follows, but it frequently agrees with the Peshito and the Itala. It is impossible to ascertain the date of the

Specimen of an Ethiopic MS. in the possession of the Church Missionary Society of London (containing Num. xxiv, 17).

execution of either of these translations, but they may both be ascribed with much probability to the beginning of the fourth century.—Kitto, s. v. Although there are several MSS. in Europe containing the Ethiopic version entire, only parts have yet been printed: the Psalter, first by Potken, along with Canticles (Rom. 1513, 4to); also by the Bible Soc. (Lond. 1815), with notes by Ludolf (Freft. 1701, 4to); the Canticles alone, by Nissel (Lugd. 1660, 4to); Jonah, in Lat. by Petrus (ib. eod. 4to); Ruth, by Nissel (ib. eod. 4to); Malachi, in Lat. by Petrus (ib. 1661, 4to); Joel, by the same (ib. eod. 4to); first 4 chapters of Genesis, by Bürcklin (Freft. 1696, 4to); Jonah, with a glossary, &c., by Staudacher (ib. 1706, 8vo); various fragments, by Bode (Helmst. 1755, 4to). Dillmann is publishing for the first time the O. T. entire (*Biblia V. T. Æth.*, Lips. 1860 sq., 4to). The whole New Testament has, however, appeared. It was first published by three Abyssinians (Rome, 1548-9, 3 vols. 4to), reprinted in Walton's *Polyglot* (London, 1857, fol.; vol. v, with a Latin version, also 1698). Platt has edited the entire O. T. in Amharic (Lond. 1840, 4to). The Gospels were edited anew from MSS. by Platt (Lond. 1826, 4to), and the whole N. T. by the same in 1830. Bode published transla-

tions and critical editions of several portions: Ep. to Heb. (Rome, 1548, 4to), Matthew's Gosp. (Hal. 1749, 4to). See Rosenmüller, *Handb. f. d. Lit. d. bibl. Krit.* iii, 65 sq.; Davidson, *Biblical Criticism*, ii, 202 sq.; Dillmann, in Herzog's *Encyklopädie*, s. v. See VER- SIONS OF THE BIBLE.

**Eth'ma** (Ἐθμά v. r. *Noomá*, Vulg. *Nobei*), given (1 Esd. ix, 35) as the name of the head of one of the families of Israelites, several of whose "sons" divorced their Gentile wives after the exile; apparently a corruption of NEBO (q. v.) in the Heb. list (Ezra x, 43).

**Eth'nán** (Heb. *Ethnan'*, עֶתְנָן, a *gift*; Sept. Ἐσθανάμ v. r. Ἐρθαῖ; Vulg. *Ethnan*), a descendant of Judah; one of the sons of Helah, the wife of Ashur, "the father of Tekoa" (1 Chron. iv, 7). B.C. post 1618.

**Ethnarch** (ἔθναρχος), properly *ruler of a nation*; hence generally a *prefect* of a district or city (Lucian, *Macrob.* 17), e. g. Simon Maccabæus, as head of the Jewish commonwealth (1 Macc. xiv, 47, "governor;" xv, 1, 2, "prince;" Josephus, *Ant.* xiii, 6, 6); Archelaus, appointed by his father's will and the emperor's ratification, his viceroy in Judæa (Josephus, *War*, ii, 6, 3), of the national head (modern "*patriarch*") of the Jews in Egypt (Josephus, *Ant.* xiv, 7, 2; comp. Strabo, xvi, 798). Spoken of the "governor" or *mayor* of the city of Damascus (2 Cor. xi, 32), under the Arabian king Aretas (q. v.). (See Walch, *Dissert. in Acta Apost.* ii, 85.)

**Eth'ni** (Heb. *Ethni'*, עֶתְנִי, *munificent*, Sept. Ἐθαρί v. r. Ἐθαρεί), son of Zerah and father of Adaiab, of the Levitical family of Gershon (1 Chron. vi, 41 [26]). B.C. cir. 1420. In ver. 21, the same person appears to be designated by the name of JEATARA. See ASAPH.

**Ethnology** may be defined as that branch of modern science which treats of the various nations of the earth with respect to their *races*, i. e. their relative origin, and their linguistic and social affinities; and it is thus distinguished from political geography, which discusses their association under their several civil governments. In the Bible, this subject, like all other scientific questions, is rather touched upon incidentally as connected with the history of mankind than in any formal and exact manner; yet the information thus afforded is of inestimable value, being, in fact, the only trustworthy clew to guide the investigator through the labyrinth in which later complications, and especially recent speculations, have involved the whole matter. Infidelity has striven hard to impugn the statements of Scripture on this ground especially; and it is therefore satisfactory to know that the most candid and general researches strongly tend to corroborate the positions of Holy Writ relative to all the main points involved in the discussion. These, so far as the Bible is directly concerned, all centre in one cardinal topic, the unity of the human race; and they bear upon this chiefly in two lines of argument, namely, 1st, the analogous and common elements of various languages, showing an origin from one source; and, 2dly, the manner in which men are distributed, or, rather, grouped, over the surface of the earth, as illustrating the ethnological chart laid down in the tenth chapter of Genesis. This last only, or "the *Dispersion of Nations*," we propose to discuss in the present article, referring the other two to the article ADAM, and, especially, the article MAN, and articles there referred to; TONGUES (CONFESSION OF), and other articles there referred to. For the physiological part of the argument we refer to the researches of Blumenbach, Dr. Prichard in his elaborate volumes on this subject, the notes in J. Pye Smith's *Scripture and Geology*, and a dissertation by Samuel Forrey, M.D., entitled *The Mosaic Account of the Unity of the Human Race confirmed by the Natural History of the American Aborigines*, in the *American Biblical Repository*, July, 1843. For a complete synoptical view of the present races of men, see Prichard's

*Ethnological Maps* (London, 1843, fol.). The following account is chiefly compiled from Kitto, s. v. Nations.

I. *Fact of an early Dissemination of the Race.*—Many obvious reasons incline us to suppose that the small number of mankind which divine mercy spared from the extirpation of the Deluge, eight persons, forming at the utmost five families, would continue to dwell near each other as long as the utmost stretch of convenience would permit them. The undutiful conduct of Ham and his fourth son cannot well be assigned to a point of time earlier than twenty or thirty years after the Flood. So long, at least, family affection and mutual interests would urge the children of Noah not to break up their society. The dread of dangers, known and unknown, and every day's experience of the benefit derived from mutual aid, would strengthen other motives. It is evident from Gen. xi, 10-16, that about 100 years, according to the Hebrew text, were spent in this state of family propinquity, yet with a considerable degree of proximate diffusion, which necessity would urge; but the dates of the Septuagint, without including the generation of the post-diluvian Cainan (q. v.), give 400. The Hebrew period, much more the others, will afford a sufficient time for such an increase of mankind as would render an extensive outspread highly expedient. A crowded population would be likely to furnish means and incentives to turbulence on the one hand, and to some form of tyranny on the other. Many of the unoccupied districts would become dangerously unwholesome by stagnating waters and the accumulation of vegetable and animal putrescence. The products of cultivation and of other arts would have been acquired so slowly as to have retarded human improvement and comfort. Tardy expansion would have failed to reach distant regions till many hundreds or thousands of years had run out. The noxious animals would have multiplied immoderately. The religious obedience, associated, by the divine command, with the possession and use of the earth, would have been checked and perverted to a greater degree than the world's bitter experience proves that it actually has been. Thus it may appear with pretty strong evidence that a dispersion of mankind was highly desirable to be in a more prompt and active style than would have been effected by the impulses of mere convenience and vague inclination. See GEOGRAPHY.

That this dictate of reasonable conjecture was realized in fact, is determined by the Mosaic writings. Of the elder son of Eber, the narrative says his "name was Peleg (פֶּלֶג, *division*), because in his days the earth was divided" (Gen. x, 25); and this is repeated, evidently as a literal transcript, in 1 Chron. i, 19. If we might coin a word to imitate the Hebrew, we might show the paronomasia by saying "the earth was *pelegged*" (פֶּלֶגְגָּה). Some are of opinion that the event took place about the time of his birth, and that his birth-name was given to him as a memorial of the transaction. But it was the practice of probably all nations in the early times that persons assumed to themselves, or imposed upon their children and other connections, new names at different epochs of their lives, derived from coincident events in all the variety of associated ideas. Of that practice many examples occur in the Scriptures. The conjecture is more probable that, in this instance, the name was applied in the individual's maturer age, and *on account* of some personal concern which he had in the commencement or progress of the separation. But the signification usually given is by no means a matter of indubitable certainty. The verb occurs only in the two passages mentioned (strictly but one), and in Psa. lv, 9, "divide their tongues," and Job xxxviii, 25, "who hath divided a channel for the torrent" (produced by a heavy thunder-shower)? Respectable philologists have disputed whether it refers at all to a separation of man-

kind, and think that the event which singularly marked Peleg's life was an occurrence in physical geography, an earthquake which produced a vast chasm, separating two considerable parts of the earth in or near the district inhabited by men. That earthquakes and dislocations of land have taken place in and around that region at various times before the historical period, the present very different levels, and other results of volcanic agency, afford ample proofs. The possibility, therefore, of some geological convulsion cannot be denied; or that it might have been upon a great scale, and followed by imperfect effects upon the condition of mankind. The transpiration of some comparatively local interest, however, would seem a more appropriate occasion for the name of an individual than so world-wide an occurrence as the general distribution of mankind. But if the race was as yet confined to a narrow circle and a single community, the breaking up of that society would be a very signal event to celebrate in his name. See PELEG.

But neither the affirming nor the rejecting of this interpretation of "the earth's being divided" can affect the question upon the primeval separation and migratory distributions of men. The reasons which we have mentioned render it certain that some such event, and successive events, have taken place; and, without urging the passage of disputed interpretation, it is evident that Gen. x and xi assume the fact, and may be considered as rather a summary recognition of it than as a detailed account. Thus (ix, 19), "These are the three sons of Noah, and from these all the earth was scattered over" (נִפְּצָה). Again (x, 32), "These are the families of the sons of Noah, [according] to their generations, in their nations; and from these the nations were dispersed (נִפְּצָה) in the earth after the Flood." Here another verb is used, often occurring in the Old Testament, and the meaning of which admits of no doubt. We find it also at ver. 5, "From these the isles of the nations were dispersed (נִפְּצָה) in their lands, each [according] to its language, [according] to their families in their nations." The Biblical date thus assigned to the dispersion is not inconsistent with the most careful estimate of the antiquity of nations, such as Egypt and Assyria. See CHRONOLOGY.

In the latest composition of Moses is another passage, which, in this inquiry, must not be neglected (Deut. xxxii, 8, 9): "In the Most High's assigning abodes to the nations, in his dispersing the sons of Adam, he fixed boundaries to the peoples according to the number (מִסְפָּר, numeration) of the sons of Israel: for the assigned portion of Jehovah is his people; Jacob, the lot of his inheritance." Of this 8th verse the Septuagint translation is remarkable, and it thus became the source of extraordinary interpretations: "When the Most High apportioned nations, when he scattered abroad the sons of Adam he fixed boundaries of nations according to the number of the *angels of God*." There might be a reading (*El* or *Elohim* instead of *Israel*) which would yield that meaning from comparison with Job i, 6; ii, 1; xxxviii, 7. Also the Alexandrine translators might welcome a colorable reasoning for the rendering, that it might haply serve as a protection from the danger of the Maccdonico-Egyptian government, taking up the idea that the Jews claimed a divine right of supremacy over all other nations. This reading, however, gave occasion to the Greek fathers (Justin Martyr, Origen, Eusebius, etc.) to maintain the doctrine of a later Jewish origin, that the grandsons of Noah being seventy, each was the ancestor of a nation, each nation having its own language derived from the confusion of Babel, and each also its guardian angel set over it by the Creator, excepting the nation of Israel, of which Jehovah himself was the tutelary deity. The only real difficulty of this passage lies in its seeming to assert that the nascent population was distributed into groups with

the express design of effecting a numerical correspondence with the Israelitish family eight hundred years after. The names assigned to the third degree, that is, the sons (rather tribes or nations) of Noah's three sons, are, Japhet fourteen, Ham thirty-one, Shem twenty-five, making seventy; and the whole family of Jacob, when it came to be domiciliated in Egypt, was seventy (Gen. xli, 26; Exod. i, 5; Deut. x, 22). Some have also fancied a parallel in the seventy elders (Exod. xxiv, 1, 9; Num. xi, 16, 24, 25; see also Kitto, *Pictorial Palestine*, Civil History, Index, "Elders"). These puerilities might have been prevented had men considered that נִפְּצָה does not signify merely an arithmetical amount, but is used to denote an exact narration (Judg. vii, 15). The passage is in the highly poetical style of the magnificent ode in which it occurs, and, reduced to plain terms, simply declares that the Almighty Sovereign, in whose hands of necessity lies the disposal of human birth-places, had so arranged these, in mapping out the world, as best to subserve the future occupancy of Canaan by his chosen people.

But the main passage of Scripture usually relied upon to prove the fact of a sudden and violent disruption of primeval society into the germs of the early nations, as well as to explain its circumstances and cause, is the account of the building of the tower of Babel (Gen. xi, 1-9), in which the dispersion of those engaged in that enterprise has been regarded as a part of the disseverance commemorated in the name of Peleg. There are, however, some objections to this view of the narrative. In the first place, these two events are not thus connected in the account itself. The sporadic varieties of language, which is the grand distinction between the different tribes that have founded the ancient monarchies and cities, had not yet appeared; nor could they be accounted for in this manner if the original community had already begun to separate into the more modern states. The only supposition that would make the two occurrences compatible, if connected, is that the whole body of the Noachites, while in process of migration westward (מִן הַיָּם הַמִּזְבְּחוֹן), with a view to settling in different localities, were arrested by the inviting character of the plain of Shinar, until their purpose of diffusion (פְּנִי, the same word in ver. 4 and 8) was renewed by the divine interference. In the second place, it is not certain that either of the incidents thus associated is of so cosmopolitan a character as this theory assumes. By simply rendering נִפְּצָה, land or region, instead of "earth," the whole affair is reduced to a petty dispute or misunderstanding among the workmen engaged upon a public edifice, and a consequent dissolution of that particular cluster of inhabitants. Certain it is that all the dialects of this polyglot globe cannot be referred to a single incident or occasion like this. Such, at least, are in substance the arguments that have been offered against interpreting the sacred narrative here as having a general application to the whole race, nor can it be denied that they possess a certain degree of plausibility (see Bryant, *Ancient Mythology*, 2d ed. iv, 23-44, 92 sq.). On the other hand, if, as everything in the context seems to require, we conceive the descendants of Noah to have been at this time (say about the birth of Peleg, i. e. one hundred years after the Flood) quite limited in numbers and extent (as the longevity of the patriarchs and their pastoral habits both indicate), we shall find no particular difficulty in taking the entire statement in its broadest and most literal sense, as the opening wedge of that universal split, which has since widened more and more, in language and abode, among the sons of men. This narrative, then, of the Dispersion begins with the remarkable statement: "Now the whole earth was of one language and of one speech. And it came to pass, as they journeyed from [or "in"] the East, that they found a plain in the land of Shinar; and they dwelt there" (Gen. xi, 1, 2). The

expressions "language" (lip) and "speech" (words) are too precise to be understood (as Vitringa, *Obs. Sacra*, ch. ix, p. 109) as indicating merely an agreement in purpose. The journeying together shows that the time spoken of was before the Noachians had ceased to be a single nation, and perhaps when they formed but a great tribe, and were journeying (שׁוֹרְרִים, to pull up stakes, as a tent or encampment) after the manner of the Arabs across the plains watered by the Tigris and Euphrates. It cannot be doubted that Shinar was Babylonia. The name, indeed, is perhaps traceable in Mesopotamia in the modern Sinjâr, and it is noticeable that the ancient Egyptian transcription of Shinar (𓆎𓆏𓆑) is SANKAR.T (this *k* corresponding to the Hebrew שׁ, as though the שׁ had been pronounced like the Arabic *Gâin*). But there is no evidence that the Hebrews called any country except Babylonia "the land of Shinar." The direction of the journey, if it be indicated as "from the East," probably would only mark the previous halting-place of the Noachians, not the place at which they first began to repeople the earth. The narrative then relates the attempt to build a city and a tower in order to prevent the scattering of mankind, and the punishment of the builders by the confusion of their language and their being scattered abroad from the unfinished city Babel, or Confusion. Leaving the subject of the Confusion of Tongues for later discussion, we must observe the general agreement of profane historians as to the antiquity of Babylon, and the reminiscence of the Tower in the towers of the Babylonian temples. The Pyramids of Egypt and those of Mexico should be compared with these towers; and, in the case of the former, on account of their extreme antiquity, the comparison is very important. The exact character of the scattering is difficult to infer. The cause, according to the ordinary explanation of the narrative, was the Confusion of Tongues, but some have supposed the latter to have been the consequence of the Dispersion. From ver. 4 compared with ver. 9, it would appear to have been but a resumption of the original plan of immigration, now that their holding together had become impossible, for the want of a common medium of vocal communication. Whatever difficulties we may discover in this and the preceding chapter of Genesis, "it is no longer probable only, but it is absolutely certain, that the whole race of man proceeded from *Ira*n [the proper and native name of Persia and some connected regions] as from a centre, whence they migrated first in *three great colonies*; and that those three branches grew from a common stock, which had been miraculously preserved in a general convulsion and inundation of this globe" (Sir William Jones, *On the Origin and Families of Nations*, Works, ed. by Lord Teignmouth, 8vo, iii, 196). There is, perhaps, no distinct reference to the building of the Tower and the Dispersion in the traditions of any heathen nation. The Greek story of the giants who piled mountains one upon another to reach Olympus is perhaps the most probable trace. Unlike the case of the Flood, there is no clear evidence that the Dispersion made a strong impression upon the minds of those who witnessed and shared in it. This would indicate that it was unaccompanied by any great outward manifestation of God's anger, and was the immediate consequence of such difficulties as would arise from the sudden division of mankind into tribes speaking different languages or dialects. See BABEL (TOWER OF).

II. *Preliminary Considerations in examining the List of Gen. x.*—1. The enumeration comprises only nations existing in the age of Moses, and probably of them only the most conspicuous, as more or less connected with the history of the Israelites. Many nations have been formed in subsequent times, and, indeed, are still forming, by separation and by combination; these can be considered only as included on the ground of long

subsequent derivation. Such are the populations of Eastern Asia, Medial and South Africa, America, and Australasia.

2. It cannot be affirmed with certainty that we are here presented with a complete *Table of Nations*, even as existing in the time of Moses. Of each of the sons of Noah it gives the sons; but of their sons (Noah's great-grandsons) it is manifest that all are not mentioned, and we have no possible means of ascertaining how many are omitted. Thus, of the sons of Japheth, the line is pursued only of Gomer and Javan; Magog, Madai, Tubal, Meshech, and Tiras are dropped without any mention of their issue; yet we have evidence that nations of great importance in the history of mankind have descended from them. Ham had four sons; of three of them the sons, or rather clanish or national descendants, are specified; but to Phut, the fourth, no posterity is assigned. Shem had five sons, but the descendants of only two of them are recorded. It cannot be supposed that those whose sequence is thus cut off died without children; for, as we shall presently see, nations of great historical interest may be traced up to them.

3. Mere similarity, or even identity of name, is not a sure guide. So remarkable a name as Hazarmaveth can scarcely be mistaken when we find it in Hadramaut. Such a name would not be repeated, and the Hadramaut which we discover in Arabia cannot be doubted to indicate the settlement of Joktan's son Hazarmaveth; but this is an exceptional case. When the similarity of Dodanim to Dodona is considered to be a sufficient proof of identity, all criticism is set at defiance. For the investigation before us we have an aid, invaluable both for its ample comprehension and its divine authority, in the account of the traffic of Tyre (Ezek. xxvii).

4. The list is, in one aspect, a kind of geographical table: many names in its descents are found in later places of Scripture as geographical terms designating nations, or at least important tribes. Therefore—

(1.) We must not look for a name in that of a town. There is an exception, probably not the only one, in the case of Sidon, the city of the Sidonians, who were doubtless a Canaanitish tribe, but to trace names in general in those of towns is very hazardous.

(2.) The tracing of a nation or tribe to a name in the list is of little value, unless neighboring or kindred nations, or nations otherwise markedly connected with it, can also be traced to the same part of the list.

5. Preference must always be given to the oldest documents in seeking for identifications. Next to the O. T., the Egyptian, Assyrian, and Babylonian monuments must be cited. In each set of documents, the notices nearest in point of time are always likely to be the best commentators; for it must be remembered that migrations and deportations are less likely to affect evidence the earlier it is.

6. Although the list is geographical, its form is genealogical; and it does sometimes, and may frequently, state or convey the name of the founder of a nation or tribe—thus, all those terminating in the plural *im*, and those specified by the Gentilitian adjective, the Jebusite, the Hivite, etc. Yet

(1.) We must not attempt to identify a founder's name in the traditions of nations, except when it is distinctly mentioned there as such.

(2.) As before, we must not be satisfied unless the identification is supported by the geographical position of the founder's nation, or its ethnological character, or else by some marked characteristics connecting it with other names identified in the same part of the list.

III. *The Immediate Sons of Noah.*—Shem is always mentioned first of the three sons of Noah when their names occur together, the order being Shem, Ham, and Japheth. In Gen. x, 21 he is called "the elder brother of Japheth," which the A. V. incorrectly trans-

lates "the brother of Japheth the elder," where a comma after "Japheth" gives the correct sense. In the list of that chapter, notwithstanding the occurrence of the usual order in ver. 1, the sons of Japheth are first mentioned, then those of Ham, and lastly those of Shem, the order being inverted. It has been supposed that Shem was put at the close of the list in order that the insertion of the other descendants of Noah might not form a digression in the history of the Shemites and their Hebrew branch. The Japhethites may have been put at the head of the list as the most widely spread, and so the most distant; and, for a like reason, the Hamites may have preceded the Shemites, the order being that of the extent of colonization. Or, again, the order may be geographical, from west to east, in accordance with the western, central, and eastern positions of the three great stocks. We shall see that the details favor the last view.

Shem (שֵׁם) signifies "name, good name, fame;" Ham (חָם), "hot, warm;" Japheth (יָפֶתֶת), "spread," from יָפַתּ. The names are probably prophetic of the future renown of the Shemites, of the hot land of the Hamites, and the spread of the Japhethites. The prophecy of Noah (Gen. ix, 25, 26, 27) indicates the appropriateness of Japheth's name to his future; and a prophetic sense of the names of his brethren may therefore be conjectured. But there is no distinct allusion to any such sense in their cases. It might be thought that the appropriateness of Shem's name as illustrious could be traced in the prediction that his should be the believing stock, but there is no indication whatever of any moral significance in the name of Ham.

1. *Shem*.—There is no trace of any single nation or country named after Shem, probably because the Shemites, by an instinct afterwards remarkable in their descendants, early separated into distinct tribes, though not migrating very far. This was the case with the Israelites; and with the Arabs the same process is still in constant operation. See *SHEM*.

2. *Ham*.—The name of Ham has been connected with an appellation of Egypt in Hebrew, only occurring in three passages in the poetical books—"the land of Ham" (Psa. lxxvii, 51; cv, 23; cvi, 22), and with the most usual Egyptian name of the country, KEM, "the black (land)." The former term we cannot doubt contained the patriarch's name. Is the latter identical with it? The significations of Ham and KEM are sufficiently near. Ham may reasonably be derived from חָם, "he or it was warm," and compared with חָמָה, "he or it was black," and the Arabic *cham*, of the same signification as the last, and *chama*, "black fetid mud" (*Kāmis*), or "black mud" (*Sihāh* MS.). KEM cannot be taken for an Egyptian transcription of Ham, but it may be a word of cognate origin (comp. KAR, "a circle," חֶרֶב, חָרַב, "he or it turned, turned round;" KARR, "a furnace," חָרָה, "it burned;" חָה, "to bend," חָתָה, "he or it bowed down, inclined"). There can, therefore, be no reasonable doubt that the Egyptian name of the country is identical with the Hebrew name of the patriarch. Are they of separate origin? We must either suppose this, or that "the land of Ham" became changed to "Ham-land," or "black land." The genius of the Egyptian language would account for such a change, which seems not improbable. That Ham should have given his name to a country might be accounted for by the supposition that, except the Canaanites, the Hamites penetrated into Africa, and at first established themselves in Egypt. See *HAM*.

3. *Japheth*.—It is impossible not to see the name of Japheth in the Greek Japetus the Titan, son of Uranus and Ge, and the supposed ancestor of the human race; for, as we shall see, the Greeks, or at least those

of the Hellenic stock, are classed among the Japhethites in the list of Genesis. See *JAPHETH*.

IV. *The Descendants of Japheth*.—The following is the table of the Japhethites:

Japheth.	1. Gomer.	a. Ashkenaz.
		b. Riphath.
		c. Togamah.
	2. Magog.	
	3. Madai.	a. Elishah.
	4. Javan.	b. Tarshish.
		c. Kittim.
		d. Dodanim.
	5. Tubal.	
	6. Meshech.	
	7. Tiras.	

1. *Gomer*.—This name occurs in but one later place in connection with geography, as that of a nation or tribe allied with Magog, and it is there mentioned immediately before Togamah, distinguished as northern (Ezek. xxxviii, 6). It has therefore been supposed to point to a remote northern nation, Scythic, or perhaps European. Two great gentile names have been compared, the Cimmerians of the Tauric Chersonese, who invaded the west of Asia Minor early in the 7th century B.C., and the Cimbr and Cymry, whose ethnic and nominal identity cannot be doubted. Considering the migratory character of the Cimmerians and Cimbr, it is reasonable to suppose that they had the same origin. In the cuneiform inscriptions of Darius Hystaspes, Gimiri occurs as the Semicitic equivalent of the Arian name *Saka* (Σάκαι). (Sir H. Rawlinson, in Rawlinson's *Herodotus*, iii, 150, note 1.) See *GOMER*.

a. *Ashkenaz*.—In a single later mention Ashkenaz occurs, in a confederacy against Babylon, with Ararat, Minni, and Middai (Jer. ii, 27, 28). It was therefore a nation in the direction of Armenia.

b. *Riphath*, written in 1 Chron. i, 6, Diphath, does not occur elsewhere in Scripture. It has been compared with the Riphæan Mountains of Greek geography; but the statement of Josephus, commenting on this list, that the Paphlagonians were anciently called Riphathæans, is worthy of notice (*Ant. i, 6, 1*).

c. *Togamah* is mentioned in Ezekiel among the traders with Tyre, after Tarshish, Javan, Tubal, and Meshech, all Japhethites, and before Dedan, here probably the country of which the inhabitants, called Dodanim, are classed among the sons of the Japhethite Javan (Ezek. xxvii, 12-15); and, in a later place, "the house of Togamah, of the north quarters," follows Gomer in the list of the army of Gog, prince of a northern people not remote from Greece. Togamah traded with Tyre "with horses and horsemen, and mules" (xxvii, 14), whence we may suppose these traffickers came by land. All the indications agree very well with the opinion that Togamah may be connected with the Armenians.

2. *Magog* is elsewhere mentioned by Ezekiel only, first among the countries ruled by Gog, and especially associated with Rosh, Meshech, and Tubal (Ezek. xxxviii, 2, 3), and apparently spoken of as dwelling "in the isles" (xxxix, 6). The term "isles" certainly must not be taken necessarily to indicate islands, but it is apparently limited to maritime, transmarine, and very remote regions. It has generally been held that Magog, used for a nation, is applied to the Scythians of the Greeks, though perhaps in a restricted sense. Certainly, in the time of Ezekiel, the Scythians who invaded Western Asia were the most powerful nation of the country to which the confederacy mentioned by the prophet may reasonably be assigned; and the agreement of Josephus (*Ant. i, 6, 1*) and Jerome (*Quest. in Gen. x, 2*) in the identification is not to be overlooked. See *MAGOG*.

3. *Madai*, always later applied to the country Media, very appropriately follows Magog, if the latter, when used geographically, indicates the Scythian neighbors of the Medes. Madai, like other names af-

terwards employed for a country rather than a people, may originally have been a man's name (comp. *Mizraim*, infra). See MADAI.

4. *Javan*.—Except where applied to an Arabian place or tribe (Ezek. xxvii, 19; and perhaps Joel iii, 6), this is, in all later places, the name of the Greeks, or at least of the Hellenic Greeks. The Persians, like the Hebrews, called all the Greeks Iouians. See JAVAN.

a. Elishah, at the head of the descendants of Javan, is to be looked for in Hellenic geography. It is mentioned in Ezekiel as trading with Tyre, "Blue and purple, from the isles of Elishah, was that which covered thee" (xxvii, 7). The name has been compared with Elis, Hellas, and the Ælians. Etymologically the first and third are equally probable, but other circumstances seem almost decisive in favor of the latter. The coast of the Æolian settlements in Asia Minor produced purple, and the name of so important a division of the Hellenic nation would suit better than that of a city which never was rich and powerful enough to be classed with Sidon, Tyre, or Carthage.

b. Tarshish is in later Biblical history the name of a great mart, or, as some hold, of two. The famous Tarshish, supposing there were two, was one of the most important commercial cities of the period of the kings; second only, if second, to Tyre. It was accessible from the coast of Palestine, but its trade was carried on in large ships, "ships of Tarshish," which implies a distant voyage from Palestine. It brought to Tyre "silver, iron, tin, and lead" (Ezek. xxvii, 12). These products seem to point incontestably to a Spanish emporium, and the majority of modern commentators agree in fixing on the celebrated Tartessus, said to have been founded by the Phœnicians, and with which the Phœnicians traded. In some places Tarshish seems to be evidently a country.

c. Kittim.—This Gentile noun, usually written Chittim in the A. V., is generally connected with Citium of Cyprus. Other indications of Scripture seem not unfavorable to this identification, which would make the Kittim or Chittim a seafaring population of Cyprus.

d. Dodanim, closely connected in the table by construction as well as in form with Kittim—"Elishah and Tarshish, Kittim and Dodanim" (Gen. x, 4)—was a maritime or insular people. Ezekiel says of Tyre, "The men of Dedan [were] thy merchants; many isles [were] the merchandise of thine hand: they brought thee [for] a present horns of ivory and ebony" (xxvii, 15). The reading in the list as given in 1 Chron. (i, 7) is Rodanim, a form which is probably the true one, as supported by the Sept. and Samaritan versions. The Sept. identifies this people with the Rhodians in all instances, including that in Ezekiel. In the prophet's time Rhodes was a great seat of Phœnician commerce, and at the site of Camirus, one of its three important cities before the city Rhodes was founded, many objects of Phœnician style have been discovered. It may be added that ivory is one of the materials of its antiquities. The identification, considering the probable place of the Kittim, is very likely.

5. *Tubal*, and 6. *Meshech*, are in later places mentioned together (Ezek. xxvii, 13; xxxviii, 2, 3; xxxix, 1), and were evidently northern nations (xxxix, 2). They have been traced in the Moschi and Tibareni mentioned together by Herodotus (iii, 94; vii, 78), and as Muskai and Tuplai, in the Assyrian inscriptions (Rawlinson's *Herodotus*, i, 530), which inhabited the northern coast of Asia Minor towards the Caucasus.

7. *Tiras*, last in the list of the sons of Japheth, has not been satisfactorily identified. The best comparison is perhaps with the Thyrrenians or Tyrsenians, as then all the chief territories of Japhethite civilization would seem to have been indicated—Armenia, Asia Minor, Thrace, the Asiatic Islands, European Greece, Italy, and Spain.

### V. Descendants of Ham, or Hamites:

Ham.	1. Cush.	a. Seba.	
		b. Havilah.	
		c. Sabtah.	
		d. Raamah.	a. Sheba.
			b. Dedan.
		e. Sabtechah.	
		f. Nimrod.	
	2. Mizraim.	a. Ludim.	
		b. Anamim.	
		c. Lechabim.	
		d. Naphtuhim.	
		e. Pathrusim.	
		f. Casluhim.	a. Philistim.
		g. Caphtorim.	
	3. Phut.		
	4. Canaan.	a. Sidon.	
		b. Heth.	
		c. Jebusite.	
		d. Amorite.	
		e. Gizzasite.	
		f. Hivite.	
		g. Arkite.	
		h. Sinite.	
		i. Arvadite.	
		j. Zemarite.	
		k. Hamathite.	

1. *Cush* is immediately recognised in KISH, the ancient Egyptian name of Ethiopia above Egypt. With this identification all geographical mentions in Scripture, except that in the account of Paradise (Gen. ii, 13), agree. The latter may refer to a primaeva CUSH, but an Asiatic settlement is positively indicated in the history of Nimrod, and we shall see that the settlements of the Cushites extended from African Ethiopia to Babylon, through Arabia. See CUSH.

a. Seba is connected by Isaiiah with Egypt and Cush (xliii, 3; xlv, 14), and the statement of Josephus that the island and city of Meroë bore this name is therefore to be noticed. In the ancient Egyptian geographical lists, SAHABA and SABARA occur among names of tribes or places belonging to Ethiopia (Brugsch, *Geogr. Inschr.* ii, p. 9, pl. xii, k. l.).

b. Havilah.—The identification of Havilah is difficult, as the name recurs in the list of the sons of Joktan; and in Biblical geography, except only in the description of Eden, it is found in Arabia alone. If the two stocks intermixed, and thus bore a common name, a single localization would be sufficient.

c. Sabtah can only be doubtfully traced in Arabian geography.

d. Raamah, in the Sept. Περύα, is well traced in the Πέρυα of Ptol. (vi, 7), and Πήγμα of Steph. Byz. (s. v.), a city of Arabia on the Persian Gulf.

a. Sheba, and b. Dedan, bear the same names as two descendants of Keturah (Gen. xxv, 3), from which it has reasonably been supposed that we have here an indication of a mixture of Cushite and Abrahamite Arabs, like that of Cushite and Joktanite Arabs inferred in the case of the two Havilahs. It is to be remarked that the name of Dedan has been conjecturally traced in the modern name of the island of Dádan, on the east coast of Arabia, and that of Sheba in the ruins of an ancient city called Sebà, in the neighboring island of Awál.

e. Sabtechah is not identified.

f. Nimrod is generally thought to have been a remoter descendant of Cush than son, and this the usage of Hebrew genealogies may be held to sanction. He is the first and only known instance in the list of the leader of a dynasty rather than the parent of a nation or tribe. His name is followed by a parenthetical passage relating to his power and the establishment and extension of his kingdom. It is probable that this narrative is introduced to mark the commencement of the first Noachian monarchy. It may be compared with the notices of inventions in the account of Cain's descendants (Gen. iv, 20-22). The name of Nimrod is probably Shemitic, from נִמְרוֹד, "he was rebellious." It occurs in ancient Egyptian, in the form NAMURET, in the family of the 22d dynasty, which was certainly, at least in part, of foreign origin. The

like names SHESHENK, USARKEN, TEKERUT, appear to be Shemitic.

2. *Mizraim*, literally "the two Mazors," is the common name of Egypt in the Bible; the singular, Mazor, being rarely used. It has been thought to be a purely geographical name, from its having a dual form, but it has been discovered in ancient Egyptian as the name of a Hittite or kindred chief, B.C. cir. 1300, contemporary with Ramesses II, written in hieroglyphics MATIRMA, where the MA is known to express the Hebrew dual, as in MAHANMA for Mahanaim. That it should be used at so early a time as a proper name of a man suggests that the fact that Egypt was so called may be due to a Noachian's name having had a dual form, not to the division of the country into two regions. If, however, we suppose that in Gen. x Mizraim indicates the country, then we might infer that Ham's son was probably called Mazor. It is remarkable that Mazor appears to be equivalent to Ham: as we have seen, the meaning of the latter is evidently "hot" or "black," perhaps both, and a cognate word is used in Arabic for "black mud;" among the meanings of *misr*, the Arabic equivalent of Mazor, the *Ká-mús* gives "red earth or mud." Thus Ham and Mazor or Mizraim would especially apply to darkness of skin or earth; and, since both were used geographically to designate the "black land," as cultivated Egypt always was from the blackness of its alluvial soil, it is not surprising that the idea of earth came to be included in one of the significations of each. If Mizraim were purely geographical in the list, then we might perhaps suppose that it was derived from Mazor as a Shemitic equivalent of Ham. It is certainly remarkable that all the descendants of Mizraim are mentioned as tribes in the plurals of gentile nouns. See MIZRAIM.

a. Ludim, perhaps mentioned in passages of the prophets as Lud or Ludim (Isa. lxvi, 19; Jer. xlv, 9; Ezek. xxvii, 10; xxxviii, 5; xxx, 4, 5), where, however, the Shemitic Lud may be intended. There would be no doubt that in at least one of these passages (Ezek. xxx, 4, 5), where Egypt, and, as far as they are identified, African nations or countries are spoken of, the Ludim are those of the Mizraite stock, were it not possible that under the term Ludim or Lydian the Ionian and Carian mercenaries of the Pharaohs may be indicated.

b. Ananim, a nation as yet not identified.

c. Lehabim, no doubt the same as the Lubim or Libyans mentioned in later places of Scripture as allies or mercenaries contributing to the armies of the Pharaohs, and supporting or dependent on Egypt as a race in very close relations. They correspond to the REBU or LEBU of the Egyptian inscriptions, western neighbors of Egypt, conquered by the kings of the 19th and 20th dynasties.

d. Naphthulim strikingly resembles the Coptic name of the westernmost part of Lower Egypt, the territory of the city Mareia, probably the older Marœotic nome *Niphait* or *Niphaiad*, a plural form commencing with the definite article *ni*.

e. Pathrusim, a tribe of which the territory, "the country of Pathros," is mentioned in later places. The latter has been compared with the Egyptian Pathyrite or Phaturite Nome; in Coptic *papithours*, *papithoures*; in ancient Egyptian PA-HAT-HER; the chief objection to which identification is, that the geographical importance of the name seems scarcely sufficient.

f. Casluhim, not as yet identified.

g. Caphtorim, and the land of Caphtor, have given rise to much discussion. Poole has proposed as the equivalent of Caphtor the ancient Egyptian name of Coptos, KEBTU, KEBTA, KEBHER, probably pronounced Kubit, Kabt, Kelthor, the Coptic *Keft*, *Kepth*, *Kepth*, *Kebth*, Gr. *Κόπτος*, Arab. *Kufi*, and ventured to compare *Αἰγυπτος* with *כְּפִתּוֹר*. See CAPHTOR. It

must be remembered that the city Coptos, or its nome, has given its name to the whole nation of Egyptians, who were known as Copts by the Arabs at the time of the conquest. But good reasons have been urged in favor of Cyprus, especially the circumstance of the Philistine migration.

a. Philistim.—The Philistines are here said to have come forth from the Casluhim; elsewhere they are called Caphtorim, and said to have come out of Caphtor. It is not allowable to read that the Philistim and Caphtorim came from the Casluhim. Perhaps there is a transposition in the text. The origin of the Philistines from a Mizraite stock is a very important fact for the explanation of the list.

3. *Phut*.—In later places, Put or Phut occurs as the name of an African country or nation, closely connected with Egypt, like the Lubim. It may be compared with those geographical names in the ancient Egyptian inscriptions in which the element PUT, "the bow," occurs. Nubia was called the "bow-land," TU-PUT, where it is usual to read TU-KENS, but the bow has not the sound KENS elsewhere; and it is probable that a part of Nubia was called KENS, and that the bow was written as a determinative symbol to show that KENS was included in "the bow-land;" but the question is full of difficulties. See PUTT.

4. *Canaan*, in Gen. ix (18, 22, 25, 26, 27), is distinctly mentioned as the son of Ham. It has been thought that his name means the "degraded," "the subdued" man, "the lowlander," for both senses are possible. See CANAAN.

a. Sidon, "the first-born" of Canaan, like Heth, immediately following, is a proper name, whereas all the remaining names are gentile nouns in the singular. Sidon is thought to signify "the fishing-place," so that the name of the place would seem here to be put for that of the founder, "the fisherman." *Ἀλιεύς* of Sanchoniathon or Philo of Byblus. But it must be noticed that the next name, Heth, is treated in later places as that of a man. The position of the Sidonians, like that of most of the Canaanitish tribes, need not here be described.

b. Heth, ancestor of the "Children of Heth," or Hittites, a very important nation of Palestine and Syria. There are indications in Scripture of Hittites out of Palestine, and the ancient Egyptians warred with the KHEA in the valley of the Orontes, whose names show that they spoke a Shemitic language. The Egyptian monumental representations show that their armies were composed of men of two races, the one apparently Shemite in type, the other beardless, and resembling the Tatar type. See HITTITE.

c. The Jebusite, d. Amorite, e. Girsagite (properly Girsagshite), f. Hivite, all inhabitants of Palestine; but the Amorite, like the Hittite nation, seems to have had a wider extension, for the territory in which stood KETESH, the great stronghold of the KHEA on the Orontes, is called in Egyptian "the land of AMAR" (Brugsch, *Geogr. Inschr.* ii, p. 21, 22, pl. xviii, 44, 47).

g. The Arkite, compared with the Phœnician town of Arca.

h. The Sinite, not satisfactorily identified. Perhaps one of their settlements may be traced in Sin or Pelusium.

i. The Arvadite, no doubt the people of Aradus. The derivation from *רד*, with the sense "wandering," "place of fugitives," is in accordance with the tradition referred to by Strabo, who says that Aradus was built by Sidonian fugitives (xvi, 2, 13, 14). Aradus was a Phœnician city.

j. The Zemarite, conjecturally traced in the town Simyra, which has nothing to recommend it but its neighborhood to Arka and Aradus.

k. The Hamathite, well known to have been seated in Upper Syria, where Hamath, on the Orontes, was long a capital of an important kingdom.

Ethnographic Map of the World according to Moses.

## VI. Descendants of Shem, or Shemites:

- |              |          |                   |  |  |               |
|--------------|----------|-------------------|--|--|---------------|
| Shem.        |          |                   |  |  |               |
| 1. Elam.     |          |                   |  |  | (j.) Sheba.   |
| 2. Asshur.   |          |                   |  |  | (k.) Ophir.   |
| 3. Arphaxad. |          |                   |  |  | (l.) Havilah. |
| a. Salah.    | a. Eber. | (a.) Peleg.       |  |  | (m.) Jobab.   |
|              |          | (b.) Joktan.      |  |  |               |
|              |          | (a.) Almodad.     |  | 4. Lud.  |               |

|              |          | (c.) Hazarmaveth. |  | a. Uz.   |               |
|              |          | (d.) Jerah.       |  | b. Hul.  |               |
|              |          | (e.) Hadoram.     |  | c. Gether.   |               |
|              |          | (f.) Uzal.        |  | d. Mash.   |               |
|              |          | (g.) Diklah.      |  | 1. Elam, when used geographically, held to corre-    |               |
|              |          | (h.) Obal.        |  | spond to Susiana, not to Persia Proper.              |               |
|              |          | (i.) Abimael.     |  | 2. Asshur, afterwards the Assyrian nation. In the    |               |
|              |          |                   |  | euneiform inscriptions Asshur is the chief object of |               |
|              |          |                   |  | worship of the kings. See ASSHUR.                    |               |

3. *Arphaxad*, probably well traced in the province Arrapachitis.

a. Salah seems to be only a genealogical link. In the Shemitic family the list is clearly something more than ethnological and geographical; it is of the nature of a pedigree, at least as far as it deals with the ancestry of Abraham.

a. Eber.—It is impossible here to discuss the difficult question whether to this patriarch the name of the Hebrews owed its origin. The argument based on the mention in this list that Shem was "the father of all the children of Eber" (x, 21) seems to us almost unanswerable on the affirmative side. See EBER.

(a.) Peleg seems, like Salah, to be but a genealogical link.

(b.) Joktan is perhaps only a similar link; his descendants form an important series.

(a.) Almodad, supposed to be traceable in Arabian names.

(b.) Sheleph, traced in El-Yemen.

(c.) Hazarmaveth, identical in name with the great region of Hadramaut, in Southern Arabia.

(d.) Jerah, not certainly identified, and (e.) Hadoram, not traced.

(f.) Uzal, the same name as Awzâl, the ancient name of San'a, capital of El-Yemen.

(g.) Diklah, (h.) Obal, (i.) Abimael, not traced.

(j.) Sheba is the same name as the Arabic Sebâ, the old kingdom of El-Yemen. The mentions in the Bible of the kingdom of Sheba point towards Arabia, and the Arabic indication thus fixes the position of Joktanite Sheba in the south.

(k.) Ophir, perhaps traced in Southern Arabia.

(l.) Havilah, as already remarked under the head of the Cushite Havilah, may indicate a mixture of Cushite and Joktanite settlers in Arabia.

(m.) Jobab, not certainly identified.

4. *Lud* has been compared to Lydus, the traditional ancestor of the Lydians. The Shemitic character of the Lydian civilization is confirmatory of this view. The Egyptian monuments of the empire mention a powerful Asiatic people of Shemitic type, apparently living not far from Mesopotamia, called RUTEN or LUDEN. It is possible that the Lydians may have migrated into Asia Minor after the time of the Egyptian empire, or that there may have been two Lydian settlements. It is not clear whether the Lud or Ludim of later places of Scripture were of this stock, or the same as the Mizraite Ludim, as already remarked.

5. *Aram* is, in later places, the geographical designation of Syria, though the term is not of the same extent as our Syria. We read of Aram-naharaim, "Aram of the two rivers," either Mesopotamia, according to the general opinion, or the country of the Orontes and Leontes, of Padan-Aram, perhaps a part of the same tract, or another name for it; and also of Aram-Zobah, Aram-Beth-rehob, Aram-Maachah, and Aram-Damme-sek, or Syria of Damascus, all kingdoms in the country Aram (q. v.).

a. Uz. Mention is made of "the land of Uz" in the book of Job, where other indications seem to point to the north of Arabia.

b. Hul, and, c. Gether, are not identified; d. Mash is but conjuncturally traced in Mesene, in Lower Babylonia, or Mons Masius, at the north of Mesopotamia.

VII. *Results*.—These are twofold:

## RACES.

- I. Caucasian.
  1. White (as Greek).
  2. Tawny (Arab).
  3. Brown (Abyssinian).
- II. Lower Nilotic (Egyptian).
- III. Nigritian (Negro).
- IV. Tatar (Chinese).

## LANGUAGES.

- I. Shemitic (as Hebrew).
- II. Iranian (Greek).
- III. Barbaric.
  1. Egyptian.
  2. Nigritian.
  3. Tatar.

ethnological evidence from Egyptian (Eg.), Assyrian (As.), or other sources; the fourth exhibits the like philological evidence.

Name.	Identification.	Race.	Language.
Hain	Egypt?	Lower Nilotic	Barbaric, Egypt-
Gomer	Cimbri	Caucasian	Iranian [tiau]
Madal	Media	Caucasian	Iranian
Javin	Greeks	Caucasian, white	Iranian
Tubal	Phœneci		
Meshech	Moschi		
Cush	Ethiopia	Nigritian?	Barbaric, Nigri-
Seba	Meroc		tian?
Raamah	Regina (E. Arabia)		
Nimrod	King of Babylonia and Assyria		
Mizraim	Egypt	Lower Nilotic	Barbaric Egypt-
Lehabim	Libyans	Caucas., white (Eg.)	[tiau]
Naphthum	Egypt?		
Philistin	Philistines	L. Nilotic (Eg.)	
Canaan	Palestine and Syria	Caucasian (Eg.)	Shemitic
Sidon	Sidon		Shemitic
Hittites	Hittites	Caucasian and Ta-	Shemitic
Jebusite	Jebusite	(tar? (Eg.)	
Amorite	Amorite		
Girgassite	Girgassite		
Hivite	Hivite		
Arkite	Arkite		
Arvadite	Arvadite		
Hamathite	Hamathite		
Elam	Susiana	Caucasian (As.)	
Asshur	Assyria	Caucasian (As.)	Shemitic
Arphaxad	Arphaxad		
Eber	Hebrews?	Caucasian, tawny.	Shemitic
Sheph	Sheph		
Hazarmaveth	Hazarmaveth		
Uzal	Southern Arabia	Caucasian, tawny	Shemitic
Sheba	Sheba	(and brown)	
Lud	Ludia?	Caucasian	
Aram	Syria	Caucasian	Shemitic

From this evidence we may draw the following inferences on several important points:

1. *Order of Names*.—The Japhethites seem to be placed first, as the most distant nations. In the list of the Hamites, the southern, and, therefore, most distant Cushites, are arranged from west to east, Seba (Meroc) being followed by Raamah (in Arabia), and the series closing with Nimrod, who ruled in Babylonia and Assyria. North of Cush is Mizraim, in the enumeration of whose tribes the western Lehabim (Libyans) are followed after an interval by the easternmost Philistin, apparently the only Mizraites of Palestine. The list of the Canaanites begins with Sidon, the Phœnicians of the sea-coast north of the Philistines; then mentions under Heth the Hittites, perhaps on account of their southern settlement, and, going northwards, enumerates tribes near Lebanon, closing with the Syrian Hamathites. The Shemitic tribes begin in the east, extending regularly from Susiana to Arabia, and then ascending to Syria. Lud may be an exception, but, as we have seen, the Lydians may have been settled near Syria, otherwise Lud may be mentioned between the Arabs and Aram as an outlying Shemitic tribe, to be spoken of before the enumeration of those nearest Palestine.

2. *Race*.—All the names identified with a high degree of probability are, with six exceptions, of Caucasian nations. The exceptions are: three certainly of the Lower Nilotic race, which is intermediate between the Caucasian and Nigritian races, showing strong traits of both, a fourth probably of the same race, and two others which require more particular investigation. Cush, in ancient Egyptian, applies to Nigritians, for the race of Kisu is represented on the Egyptian monuments as of the most marked Nigritian type: the kings and other royal personages of Meroc, and the Ethiopians of rank under them, are, however, represented on their monuments as similar to the Lower Nilotic race. This suggests that Cush may indicate a country mainly peopled by Nigritians, yet with a governing mixed race. The remaining exception is the case of the Hittites, who are represented on the Egyptian monuments as of two types—the one Caucasian, the other apparently Tatar. This may show that two different races were ruled by those Hittite kings with whom the Pharaohs warred, as Og, the king of Bashan, was a Rephaite, not an Amorite.

3. *Language*.—The languages are all Iranian or Shemitic, with three exceptions. Egyptian, occurring twice in our table, has a monosyllabic barbaric

In the table which follows, the first column gives those names from Gen. x for which there are highly-probable geographical identifications; the second column states these identifications; the third contains

vocabulary, with an amalgamate Shemitic grammar. Here, therefore, as in race, there is a departure from the unmixed type. To Cush we have conjecturally assigned a barbaric Nigritian language, because the names of Ethiopian tribes conquered by the Egyptians, and of Ethiopian sovereigns of later times, are not readily traceable to either an Egyptian or a Shemitic source; but we cannot say certainly that a Shemitic element is wholly wanting in the languages to which these words belong.

The order indicates that the intention of the list is partly geographical. In the detail of each division the settlements of races are probably indicated rather in the order of position than of ancestral relationship, though the principle of relationship is never departed from, as far as we can see.

4. *Date*.—The list of Gen. x contains certain statements which may now be examined, in order to infer the date to which the document refers. It is said, "Afterward were the families of the Canaanites spread abroad" (x. 18); which may indicate the formation of the great Hittite settlement in the valley of the Orontes, or other like extensions. In any case it points to an event, or series of events almost certainly prior to the establishment of the Israelites in Palestine. So, too, the definition of the otherwise unknown Resen, as "the great city" (Gen. x, 12), indicates a period anterior to that of the kings who ruled at Asshur (Kal'ah Sherg'hat) and Calah (Nimrud), the earliest of whom is placed about B.C. 1270. At the time of the Egyptian empire the capital appears to have been Nineveh, and the date of the list would therefore be anterior to that time, or at least to the reign of Thothmes III, to whom it was tributary about 1450 B.C. It would appear, therefore, that the list was either written or put into its present form not long after, or at the time of Moses, if not earlier, and that it refers to a yet earlier period—that of the first spread of the Noachians.

VIII. *Omissions*.—The nations omitted in the list must now be noticed, as far as they seem to be of a like high antiquity. In Deut. ii there is mention of several tribes or nations which had been destroyed by other tribes or nations who reached Palestine or its neighborhood before the Israelitish occupation. Certain of these are called Rephaim, others not. The particulars are as follows, as far as they relate to our present subject:

1. *Emim, Rephaim*, succeeded by Moabites (Deut. ii, 9-11).

2. *Horim*, succeeded by Edomites (ver. 12, 22).

3. *Zamzummin*, elsewhere called *Zuzim* (Gen. xv, 5), Rephaim, succeeded by Ammonites (Deut. ii, 19-21).

4. *Avim*, succeeded by Caplitorim, that is, Philistines (ver. 23).

5. *Anakim*, here mentioned as Rephaim (ver. 10, 21), still occupying the south of Palestine at the time when the Israelites entered it.

The Avim were probably also a Rephaite nation, for as late as David's time giants were found among the Philistines. Elsewhere in Palestine the Israelites seem to have found, besides "the three sons of Anak," or the Anakim of Hebron, Og, the king of Bashan, who "remained of the remnant of Rephaim" (ii, 11), a man of gigantic stature. The position of these Rephaim is that of a few powerful chiefs among the Canaanites and Philistines, representing tribes destroyed by Hebrews, the only exceptional case being that of the Philistines, if, as we suppose, the Avim were Rephaim, for in that case the former must have first attacked, but ultimately changing their policy, abstained from annihilating the older population.

At an earlier time we find a very different condition of the country. The powerful confederacy of which Chedorlaomer was chief, attacked and conquered, besides the kings of the cities of the plain, the Rephaim, Zuzim, Emim, Horim, Amalekites, and Amorites. Here the Canaanites occupy a very inferior position

in the south and east of Palestine, but one Canaanitish nation being mentioned, and besides undoubted Rephaites, the Horim probably of the same stock, and the ancient and pedigreeless nation of Amalek.

We thus find an indication of an old population of Palestine distinct from both Canaanites and Hebrews, and especially remarkable for their great height. That they were in race still more remote from their successors than has usually been held, has been argued from the Anakim's being spoken of as "of the Nephilim" (Num. xiv, 33), the term applied to the giants before the Flood, where it is said "the Nephilim were in the earth in those days" (Gen. vi, 4). On this subject, compare Poole, *The Genesis of the Earth and of Man*, 2d ed. p. 80-82, 284, 285, where it is maintained that the Nephilim were a pre-Adamite race.

**Ets-Gopher.** See GOPHER-WOOD.

**Ets-Hadar.** See GOODY-TREE.

**Etshmiadzin**, a remarkable Armenian convent in Erivan, a Transcaucasian province of Russia, and about 16 miles west of the town of Erivan. "It is of great extent, is surrounded by a wall 50 feet in height, and  $1\frac{1}{2}$  miles in circuit. This wall incloses several distinct churches, each of which is presided over by a bishop; is cruciform in shape, and is surmounted by a kind of cupola crowned by a low spire. For many centuries this has been the seat of the Catholics (the head or patriarch of the Armenian Church). This patriarch presides at the synodical meetings, but cannot pass a decree without its having the approval of the moderator, an official appointed by the Russian emperor, in whose hands the control of the convent virtually rests. In the convent library there are 635 manuscripts, 462 of which are in the Armenian language."—Chambers, *Encycl.* s. v.

**Ets-Shemen.** See OIL-TREE.

**Ettwein**, JOHN, a distinguished divine of the Moravian Church, was born June 29, 1721, at Freudentstadt, Wurtemberg. In 1754 he came to America, where for nearly half a century he labored as an evangelist, as a member of the executive board, and finally as a bishop, to which latter office he was appointed in 1784. He travelled thousands of miles, often afoot, and preached the Gospel in eleven of the original thirteen colonies, as also in what is now the State of Ohio, to white people, negroes, and Indians. In 1772 he was the leader of the Christian Indians on their exodus from the Susquehanna country in Pennsylvania to the Tuscarawas in Ohio, exposing himself to great hardships and dangers. During the Revolutionary War he was in frequent intercourse and correspondence with Washington and several members

of Congress; and when the general hospital of the American army was transferred to Bethlehem, Pa., he devoted himself with singular disinterestedness to the spiritual wants of the sick, in spite of his many other duties. To him, too, must be ascribed the honor of originating, in 1787, "the Society of the United Brethren for Propagating the Gospel among the Heathen," which still exists, and now has a large funded capital, and to which Congress made a grant of several townships on the Tuscarawas, in trust for the Christian Indians. He died January 2, 1802. (E. de S.)

**Etun.** See LIXEN.

**Eubu'lus** (Ἐϋβούλιος, *good in counsel*), a Christian at Rome whose greeting Paul sent to Timothy during his last imprisonment (2 Tim. iv, 21), A.D. 64.

**Eucharist**, one of the names of the Lord's Supper, from εὐχαριστία, *giving of thanks*. See LORD'S SUPPER.

**Euchel**, ISAAC BEN ABRAHAM, a Jewish scholar, born in 1756, was a distinguished member of the Society for the Promotion of Biblical Literature and Exegesis, which was formed in the days of Mendelssohn (q. v.). He is the author of a very learned treatise on the ancient mode of burial among the Jews, *Ist nach jüdischen Gesetzen das Uebernachten der Todten wirklich verboten?* (Breslau, 1797.) He published also a translation of the Jewish Prayers, מִתְפָּלֵי נְבוּכַדְרֶצַּר, or *Mose Maimini's Mose Nebuchim*, with the Commentary of Mose Narboni, called מְפָרְשֵׁי נְבוּכַדְרֶצַּר, and others (Sulzbach, 1828, 3 vols. 4to); a history of the life of Moses Mendelssohn (Berlin, 1798, 8vo; Vienna, 1812); and as a part of the great Bible work started by Mendelssohn, *Die Sprüche Salomo's im Original ins Deutsche übersetzt und hebräisch commentirt* (8vo, Berlin, 1789, 1790, and often).—Fürst, *Bibliotheca Judaica*, p. 259, 260; Kitto, *Cyclop. of Biblical Literature*, s. v.

**Euchelaion**, *the oil of prayer*, a ceremony in the Greek Church answering to *extreme unction* in the Latin. To such penitents as are conscious of the guilt of any "mortal sin," as adultery, fornication, or pride, this sacrament is administered by the bishop or archbishop, assisted by seven priests, who commences with this prayer: "O Lord, who with the oil of thy mercies hast healed the wounds of our souls, do thou sanctify this oil, that they who are anointed therewith may be freed from their infirmities, and from all corporeal and spiritual evils." The *oil of prayer* is pure and unmixed, having in it no other ingredient. A quantity sufficient to serve for the whole year is consecrated on Wednesday in the Holy Week by the archbishop or bishop. In the administration, the priest dips some cotton at the end of a stick, and thereby anoints the penitent in the form of a cross on the forehead, on the chin, on each cheek, and on the backs and palms of the hands; after which he repeats this prayer: "Holy Father, physician of souls and bodies, who hast sent thine only Son Jesus Christ, healing infirmities and sins, to free us from death, heal this thy servant of corporeal and spiritual infirmities, and give him salvation and the grace of thy Christ, through the prayers of our more than holy lady, the mother of God, the eternal virgin, through the assistance of the glorious, celestial, and incorporeal persons, through the virtue of thy life-giving and holy cross, of the holy and glorious prophet, the forerunner, John the Baptist, and the holy and glorious apostles."—Farrar, *Eccles. Dictionary*, s. v.; Pinkerton, *Present State of the Greek Church*, 193.

**Eucherius**, bishop of Lyons in the 5th century, was born of a noble family at Lyons. He was a senator, happily married, and the father of two sons, Veranius and Salonius, who at an early age were sent to the monastery of Lerins (now St. Honorat) for education. In 422 Eucherius entered the same convent as a monk, having obtained the consent of his wife Galla, who likewise devoted herself to monastic life. Soon

after, Eucherius retired into solitude on the island of Lero (St. Marguerite). In 434 he was, in consequence of the reputation of his great piety, elected bishop of Lyons, and, as such, was present at the two synods of Orange (441 and 442). He died in 454 (according to others, in 450 or 449). He is commemorated as a saint on the 16th of November. He was followed on the see of Lyons by his son Veranius, while the second, Salonius, became bishop of Geneva. Eucherius wrote, about the year 427, *Epistola parennetica de contentu mundi et secularis philosophiæ* (edit. by Rosweid, Antwerp, 1621); in 428, *Epistola de laude eremi seu vita solitaria* (edit. by Rhenanus, Basel, 1516, and by Erasmus, Basel, 1520).—*Liber formularum spiritalis intelligentiæ*.—*Institutionum libri II*.—*Ehortatio ad Monachos*; and several homilies. Several other works are wrongly attributed to him. It seems that he sympathized with the Semiarians. A collection of all his works was published by Brassicanus (Basel, 1531), in the *Biblioth. Patr. Max. Lugd.* tom. vi and xxvii; and in Migne, *Patrol. Lat.* tom. l. See Herzog, *Real-Encyclop.* xix, 490. (A. J. S.)

**Euchites.** See MESSALIANS.

**Euchologion** (εὐχὴ λόγος), the common name of the liturgical books of the Greek Church, containing the services for the sacraments, conferring of orders, and other religious offices. There is an edition by Goar, entitled *Euchologion, sive Rituale Græcorum, complectens ritus et ordines diviniæ Liturgiæ, officiorum, sacramentorum, etc., juxta usum Orientalis ecclesiæ* (Par. 1647). See Covell, *Some Account of the Greek Church* (Lond. 1722, fol.), chaps. ii, iii; Neale, *History of the Holy Eastern Church*, pt. i (Lond. 1850), i, 317.

**Eudæmon**, JOHN ANDREW, a Greek Jesuit, was born at Canea, in Candia, about 1560. He derived his descent from the imperial family of the Paleologi; went to Italy when very young, and in 1581 entered the Society of Jesus. After having taught philosophy at Rome and theology at Padua, he was appointed rector of the Greek College, which pope Urban VIII had just established at Rome. He accompanied, as theologian, the papal legate, cardinal Barberini, to France, and died at Rome in 1625. He wrote a large number of controversial works against Casaubon, Brightman, John Barclay, Robert Abbot, and many others. Pamphlets against Henry IV and Louis XIII were also ascribed to him.—Hofer, *Nouv. Biogr. Génér.* xvi, 663. (A. J. S.)

**Eudæmonism** (Gr. εὐδαιμονία, happiness), a principle in philosophical ethics according to which the attainment of happiness is represented as the true aim of life. Those who hold this view are called EUDÆMONISTS. Opposed to eudæmonism are all those systems of ethics which regard not the pleasure of the individual, but the recognition of some universal law as the higher principle. Eudæmonism lay at the basis of the Cyrenaic school founded by Aristippus, and of the Epicurean philosophy (q. v.). It was developed to its utmost consequences by Hegesias, who taught that if no enjoyments are to be expected by men, death is preferable to life. Essentially different from this class of Eudæmonists is the system of Aristotle, who regarded virtue as a spiritual enjoyment, and in this sense represented ethics as the doctrine of seeking and finding a happy life. This view has found adherents among Christian writers on ethics, who define and treat ethics as the doctrine of a happy life. Others have combined with eudæmonism common usefulness, moral sentiment, and perfection, and thus have purified and ennobled it. Belonging properly to the schools of Aristippus and Epicurus are in modern times the different systems of sensualism (q. v.) and materialism (q. v.). In an ennobled form, Eudæmonism reappears in some representatives of the Scotch school, who, in opposition to the self-love of Hobbes, develop the longing for universal happiness as the supreme

ethical principle. In direct and keen opposition to every form of eudæmonism, Kant established the principle of the categorical superlative, according to which the good must be done for its own sake, and the moral law, with the duties emanating from it, can alone be made the central principle of ethics. See KANT. Schleiermacher assigned to the idea of the highest good the highest position in ethics, and likewise rejected Eudæmonism as a principle. This is now, in general, the attitude of writers on Christian ethics; the thirst of man for happiness is not absolutely rejected, but it is found unsuited for a fundamental principle, which must be sought in a universal divine law, not in the natural longings of the individual. See ERNICKS. Herzog, *Real-Encyclop.* iv, 207. (A. J. S.)

**Eudes**, JEAN, founder of the congregation called the Eudists, was born at Rye, Normandy, November 14, 1601, and died at Caen, August 19, 1680. At 14 he commenced his studies under the Jesuits at Caen, entered the Congregation of the Oratory in 1623, and was ordained priest in 1625. From 1627 to 1632 he was engaged in missionary labors among the plague-stricken people of Normandy, and in 1642 he became superior of the Congregation of the Oratory at Caen. Much of his time was spent in missions throughout France to reform the clergy. In 1643 he organized a new society, which took the name "Eudists," or the "Congregation of Jesus and Mary," and soon had numerous branches in France. Its members were devoted to the education of young candidates for the priesthood, and to "missions" (in the Roman Catholic sense) among the clergy. Eudes wrote a number of books of devotion. The Eudists were scattered at the Revolution, but were revived by the abbé Blanchard in 1826. They have a college, called St. Gabriel's, in the State of Indiana.

**Eudists.** See EUDES.

**Eudo de Stella.** See EON DE STELLA.

**Eudocia**, wife of the emperor Theodosius II, was the daughter of Leontius, an Athenian sophist. She was called Athenais, and was carefully instructed by her father in Greek letters. She was also noted for personal beauty. On the death of her father, the jealousy and avarice of her brothers compelled her to go to Constantinople, where she appealed to Pulcheria, sister of Theodosius II, who was so fascinated by her beauty and talent that she induced Theodosius to marry her, A.D. 421. She was baptized under the name of Eudocia, and long retained great influence with the emperor. In A.D. 438 she made a splendid pilgrimage to Jerusalem. Soon after she was charged with aspiring to the government of the Eastern empire; and later, with an intrigue with one Paulinus, a courtier. About A.D. 449, "the emperor, through jealousy, dismissed all her court, and had her exiled to Palestine, where she continued to reside after his death. She there embraced the opinions of Eutyches, and supported by her liberality and influence the monk Theodosius, who forced himself into the see of Jerusalem, after driving away Juvenal, the orthodox bishop, and kept it until he was himself driven away by order of the emperor Marcianus. Euthymius, called the Saint, by his reasonings brought back Eudocia to the orthodox faith, after which she spent the remainder of her days at Jerusalem, where she died in 460, protesting her innocence of the crime with which her husband had charged her." Eudocia wrote several works: (1) Photius quotes a translation in verse of the first eight books of the Old Testament. (2) There is also attributed to her a *Life of Christ*, composed of lines taken from Homer, translated into Latin by Eucharid, and published under the title of *Iliomero-centra*, or *Iliomericæ Centones* (Gr. and Lat. Francof. 1541, 1554; Par. 1578, 12mo; Lips. 1793, 8vo); an account of the martyrdom of St. Cyprian, Greek and Latin, ed. by Bandini, in his *Græcæ Eccles. vet. Monumenta*, i, 130-189.—Hoff-

mann, *Bibliogr. Lex.* ii, 63; Gibbon, *Decline and Fall*, ch. xxxii.

**Eudoxia**, wife of the emperor Arcadius, was born in the year 375, and was married to Arcadius in 395. She was the mother of Theodosius II, or the younger. Her name is mentioned here on account of her difficulties with Chrysostom. She used her influence for the banishment of Chrysostom, against whom her hatred was incited by the unsparing attacks which he made against all evil-doers, and especially, it is said, by his declaration that she was "a new Herodias, thirsting after the blood of John." She died in 404.—*Netzler und Welte, Kirchen-Lexikon*, iii, 736; Hoefler, *Nouvelle Biog. Générale*, xiii, 687; Gibbon, *Decline and Fall of the Roman Empire* (Harper's ed.), iii, 343 et sq.

**Eudoxians.** See EUDOXUS.

**Eudoxius**, an Arian, and bishop of Constantinople, was born at Arabissus, in Armenia, first mentioned as bishop of Germanicia (near Mount Taurus). About 356 he obtained by artifice the patriariate of Antioch, where he soon came forward as a patron of the Aëtians (Theodoret, *H. E.* bk. ii, chap. 25, 26). Sozomen says that "when Eudoxius found himself in possession of the Church of Antioch he ventured to uphold the Aëtian heresy openly. He assembled in Antioch all those who held the same opinions as himself, among whom were Acacius, bishop of Cæsarea in Palestine, and Uranius, bishop of Tyre, and rejected the terms of 'like substance' and 'con-substantial,' under the pretext that they had been denounced by the Western bishops" (*H. E.* bk. ii, ch. 12). Although he was deposed at the synod of Seleucia, yet he does not appear to have ever vacated his see; and on Macedonius being ejected from the see of Constantinople, says Sozrates, Eudoxius, who now despised that of Antioch, was promoted to the vacant bishopric (*H. E.* bk. ii, c. xliii). He obtained the see of Constantinople in 359, and retained it until his death in 370. Some fragments remain of a treatise of his *De Incarnatione Dei Verbi*.—Hोक, *Ecl. Biog.* v, 7; Neander, *Ch. Hist.* ii, 403-11; Cave, *Hist. Lit.* (Geneva, 1720), i, 138.

**Euergetes** (Ἐυεργέτης, *a benefactor*; see Josephus, *War*, iii, 9, 8; Diod. Sic. xi, 26; Xenoph. *Anab.* vii, 6, 38; sometimes Anglicized EUERGETES), a common surname and title of honor (comp. Plato, *Gorg.* p. 506 C, and Stallb. ad loc.) in Greek states, conferred at Athens by a public vote (Demosth. p. 475), and so notorious as to pass into a proverb (Luke xxii, 25). It was bestowed by states upon those who had conferred benefits upon them, and was taken by several kings. See PROLEMY; ANTIOCHUS.

A king is mentioned by this title in the 2d prologue to Ecclesiasticus, wherein the translator states that, having gone into Egypt in the 38th year of king Euergetes, and been there some time, he found this book by his grandfather (Ἐν γὰρ τῷ ὀνόματι καὶ τριακοστῷ ἔτι ἐπὶ τοῦ Ἐυεργέτου βασιλέως παραγενθῆς εἰς Αἴγυπτον, καὶ συγγροῦσας, εὗρον ὃν μὲν πρός ταύτας ἀπόμοιον). There can be no question that a king of Egypt is here meant; for, though a king of Syria could be intended by this title, Alexander I, Antiochus VII, and Demetrius III being shown by their coins to have been styled Euergetes, no one of them reigned more than a few years. It is more probable, on *primæ facie* grounds, that an Egyptian Euergetes is here spoken of, if the same discrepancy should not be found. Two of the Ptolemies bore this title: Ptolemy III, always known as Euergetes, who reigned twenty-five years, B.C. 247-222, and Ptolemy VII (or IX), Euergetes II, more commonly called Physcon, who began to reign jointly with his brother Ptolemy VI (or VIII), Philometor, B.C. 170, and became sole king in B.C. 146, dying in his fifty-fourth year, reckoned from the former date, and the twenty-ninth year of his sole reign, B.C. 117 (Fynes Clinton, *Fastæ Hellenicæ*, iii, 382, 383, 386, 399; Lepsius, *Königsbuch*, Synoptische Tafeln, p. 9). A

great difficulty has arisen in the attempt to decide which of these kings is intended. Everything hinges upon the manner in which the reigns were reckoned. There is no satisfactory evidence for supposing that Euergetes I counted his regnal years from a time before his accession; the evidence of the inscription at Adule, that Fynes Clinton adduces in favor of as high a date as the 27th year, is wholly inconclusive (p. 382, 383); besides, the 27th year is far short of the 38th. To ascertain the official reckoning of the years of Euergetes II, during the latter part of his rule, and thus to determine from what date he then counted his regnal years, we have only to examine the demotic papyri of his reign. From these Dr. Young collected a list of dates which appeared thirty years ago in his posthumous *Rudiments of an Egyptian Dictionary*. These dates are year 29, 34, 45, 46, 47 or 43, 52, 53 (p. 27-31). It is thus proved incontestably that Physcon counted his years from the commencement of his joint reign with Philometor, without any separate reckoning from his accession as sole king of Egypt. The hieroglyphic inscriptions, as we would expect, follow the same reckoning. Thus one of the Apis tablets gives the dates of the 28th, 31st, 51st, and 52d years of this king (Lepsius, *The 22d Egyptian Royal Dynasty*, transl. by Dr. Bell, p. 41). We must not pass by the idea of Jahu (*Einkünig*, ii, 930 sq.), that the 38th year refers to the translator's age instead of a king's reign. It would be better to suppose an æra. Three seem possible, the æra of the Seleucids, that of Simon the Maccabee, used in Palestine, and the æra of Dionysius used in Egypt. The æra of the Seleucids began B.C. 312, and its 38th year is therefore too early for the reign of Euergetes I; the æra of Simon the Maccabee began B.C. 143, or a little later, and its 38th year is too late for the reign of Euergetes II. The æra of Dionysius commenced B.C. 285 (Lepsius, *Königsbuch*, l. c.), and its 38th year was therefore the last of Ptolemy II, Euergetes I coming to the throne in the next year. The construction that does not allow the year of the reign of Euergetes to be intended, and thus necessitates some such explanation, is certainly the more correct; but as Dr. Davidson, who has laboriously collected upon this question much criticism which we have shown to be needless, observes, we need not here look for correct grammar (*Horne's Introd.* 1856, ii, 1026-1028). With this admission the usual reading cannot be doubted, and the date mentioned would be B.C. 133. Other evidence for the time of the composition of Ecclesiasticus, which, of course, can be approximately inferred from that of the translation, is rather in favor of the second than the first Euergetes.—Kitto, s. v. See ECCLESIASTICUS; JESUS, SON OF SIRACH.

**Eugenicus**, a Greek theologian, lived in the first half of the 15th century. He began public life as an instructor in rhetoric, but his learning and eloquence soon procured him the first positions in the Church, and towards 1436 he was made archbishop of Ephesus. Two years later he accompanied the emperor (John Palæologus) to the Council of Florence. Here he not only represented his own diocese, but acted also for the patriarchs of Antioch and of Jerusalem. A zealous defender of the Greek Church and adversary of the Roman, Eugenienus was the only one who, at the close of the council, refused to recognise the pretensions of the pope and to sign the acts of the council. On his return to Constantinople the people received him with great enthusiasm. Even upon his death-bed in 1447, he solemnly adjured George the Scholastic to continue the strife against the Latins. The numerous writings of Eugenienus are of a polemical nature, directed against the Latin Church and those prelates of the Greek Church who were favorable to the former. Many have never been published, but they are recorded by Fabricius. We make mention here only of his printed works: *Letter to the Emperor Palæologus*,

in which he advises the Greeks against the Council of Florence, and exposes the intrigues of the Latinists. This letter has been translated into Latin, with a reply by Joseph of Methone, in Labbe, *Concilia*, xiii, 677. An encyclical letter upon the same subject in Labbe, *Concilia*, xiii, 714; *A Treatise on Liturgical Topics*; *A Profession of Faith*, a fragment of which is given by Allatius, *De Consensu*, iii, 3.—Hoefler, *Nouv. Biog. Gen.* xvi, 706; Fabricius, *Bibliotheca Græca*, xi, 670; Oudin, *Script. Eccles.* iii, 2343.

**Eugenius Bulgaris.** See BULGARIS.

**Eugenius I**, Pope, a son of the Roman Rufinianus, was elected by the Romans Sept. 8, 654, as successor to Martin I, who had been sent into banishment to the Thracian Chersonesus by order of the emperor Constant II, who favored the schism of the Monothelites. Martin dying in the following year, Eugenius continued in dispute with the court of Constantinople till he died, June 1, 657, and was succeeded by Vitalianus. In order to establish peace with the Greeks, his legates made an arrangement with Peter, the Monothelite patriarch of Constantinople, that instead of one or two wills in Christ three should be assumed—one *substantial*, the two others *natural*.—Bower, *History of the Popes*, iii, 70.

**II**, Pope, a native of Rome, succeeded Paschal I Feb. 14, 824, in the midst of great disorder, which occurred at Rome, owing to the corrupt state of society and maladministration of that city. To reform these, the emperor Louis the Good sent his son Lotharius to Rome, who corrected many abuses, which, by the account of Eginhardt and other chroniclers, had grown to an enormous extent. He confirmed the right of electing the pope to the clergy and people of Rome; and the Council of Rome, which he convoked on Nov. 1, 826, issued many beneficent decrees for the restoration of Church discipline, for the establishment of schools, and against the worldly occupations of clergymen. He died Aug. 827.—Herzog, *Real-Encyclopädie*, iv, 214; Bower, *History of the Popes*, iv, 205.

**III**, Pope. He was a monk of Citeaux, disciple and friend of St. Bernard, and afterwards abbot of St. Anastasius. He was elected to the pontifical chair of Rome Feb. 27, 1145. He appears to have been a very sincere disciple of Bernard, and anxious, like him, to reform the manners of the clergy and consolidate the papal power. Through the greater part of his pontificate, owing to the turbulence of the Roman people [see ARNOLD OF BRESCIA], he was unable to reside in the city. This circumstance, however, did not hinder his being acknowledged as pope, or his exercising the functions of his office. During his reign the second crusade, under the preaching of St. Bernard, was undertaken. See CRUSADERS. Shortly after its mortifying failure the pontiff died at Tivoli, July 8, 1153. See Neander, *Bernard und s. Zeit.* 190-296; Herzog, *Real-Encyclop.* iv, 214.

**IV**, Pope, Gabriele Condolmiere, a native of Venice, succeeded Martin V as pope March 3, 1431. At the early age of twenty-four he was made by pope Gregory XII, with whom he was related, bishop of Siena, and soon after (1408) cardinal. "His was a most stormy pontificate. He drove away the powerful family of Colonna, including the nephews of the late pope, from Rome, charging them with having enriched themselves at the expense of the papal treasury. He afterwards made war against the various lords of Romagna, who were supported by the Visconti of Milan. But the greatest annoyance to Eugenius proceeded from the Council of Basle, which had been convoked by his predecessor, and which protracted its sittings year after year, broaching doctrines very unfavorable to the papal supremacy. See BASLE, COUNCIL OF. Eugenius, who had been obliged to escape from Rome in disguise on account of a popular revolt, and had taken up his residence at Bologna in 1437, issued a bull dis-

solving the council, recalling his nuncio who presided at it, and convoking another council at Ferrara. See FERRARA. Most of the fathers assembled at Basle refused to submit, and summoned the pope himself to appear before them, to answer the charge of simony, schism, and others, and after a time proceeded against him as contumacious, and deposed him. Eugenius meanwhile had opened in person his new council at Ferrara in February, 1438, in which, after annulling all the obnoxious decrees of the Council of Basle, he launched a bull of excommunication against the bishops who remained in that assembly, which he characterized as a 'satanic conclave, which was spreading the abomination of desolation into the bosom of the Church.' The Catholic world was divided between the two councils; that of Basle proceeded to elect a new pope in the person of Amadeus VIII of Savoy, who assumed the name of Felix V, and was solemnly crowned at Basle. Eugenius encouraged the Hungarians and Poles to break the peace they had solemnly sworn with the Turks, under pretence that their oaths were not valid without the sanction of the pope; he even sent cardinal Julian as his nuncio to attend the Christian army. The result was the battle of Varna, 1444, in which the Christians were completely defeated, and king Ladislaus of Poland and cardinal Julian lost their lives. Eugenius died at Rome Feb. 23, 1447. He left the Church in a state of schism between him and his competitor Felix, his own states a prey to war, and all Christendom alarmed at the progress of the Turkish arms" (*English Cyclopædia*). See Bower, *History of the Popes*, vii, 238.

**Eugippius**, or **Eugyppius**, a learned monk, who lived at the close of the fifth and the beginning of the sixth century. He seems to have been the descendant of an Italian family, and was at first monk in the monastery of St. Severin (q. v.) at Fariana, in Noricum (near the present Pöchlarn, in Austria), subsequently in the monastery of Castrum Lucullanum (now Castello del Novo, belonging to the city of Naples). He is sometimes called "abbot," but it is doubtful whether he was, in the later years of his life, abbot of Lucullanum, or whether the name was only given him as an honorary title. He is the author of a life of his teacher, St. Severinus (*Vita St. Severini*, publ. by Canisius, *Antiq. Lect.* t. vi, in *Acta Sanctorum*, Jan. 8; and by Welsch, Augsb. 1594), which is a very important contribution to the Church history of Germany. He also compiled a collection of Thoughts and Sentences from the works of St. Augustine (*Thesaurus Augustinæus* (Basle, 1542; Venice, 1543), which was dedicated to the Roman virgin Proba. The author of the second work was formerly believed by some writers to be a different person from the author of the life of St. Severin, but this opinion has now been generally abandoned. Among the letters of Fulgentius (q. v.) of Ruspe, there is one addressed to Eugippius; a letter of Eugippius to Fulgentius is lost. Eugippius was also in literary connection with Dionysius Exiguus. There is a monastic rule which is ascribed to Eugippius, but it was early superseded by that of St. Benedict.—Herzog, *Real-Encyclop.* iv, 217. (A. J. S.)

**Euhemerus**, a Greek historian, philosopher, and traveller, lived about the year B.C. 300. It is not exactly known whether he was born at Messina (in Sicily), at Tegea (in the Peloponnesus), on the island of Cos, or at Agrigentum. He belonged to the Cyrenaic school, well known for its scepticism in religious matters. As bold as the other philosophers of this school, and more systematic, Euhemerus proposed a general interpretation of the myths, which has been justly compared with modern German Rationalism. An exposition of his doctrine is given by Diodorus Siculus. "Euhemerus," he says, "friend of Cassander (king of Macedonia B.C. 320-296), was intrusted by this prince with certain missions to some of the Southern

countries. On his way he passed in the Indian Ocean a group of isles, of which the largest was called Panchæia. The Panchæans were distinguished for their piety, and honored the gods by sacrifice and offerings of gold and silver." They worshipped Jupiter, and such other gods as we meet with in Grecian mythology; but all these gods were really men distinguished for great actions, and deified on account of them. On his return from the voyage Euhemerus wrote a *Sacred History* (*Ἱερά ἀναγχαίη*), in about nine books, in which he showed, according to Lactantius and Arnobius, that these gods were but men (Lactantius, *De Falsa Religione*, i, 11). A Latin translation was made by the poet Ennius. Of this translation only ninety-five lines now remain (Amsterdam, 1707). This work contains the history of the gods of the Panchæans, of the people and their manners, Euhemerus himself leaning in fact to the doctrines of the Panchæans. The form in which he presented his system was not entirely new, for Plato had adopted a similar course in his *Republic*; the germ of the system itself is to be found in some passages of Herodotus and Thucydides. The originality of Euhemerus consists in exaggerating, and in carrying out even to absurdity, the idea that Mythology contains certain historical elements. In effect, he resolved all mythology into history, maintaining that the gods "were originally illustrious kings, deified after death either by the spontaneous reverence of the people or by the cunning of the rulers." But mythology contains, aside from this, so much that bears on astronomy, the physical sciences, metaphysics, and, most of all, so much of fiction, that it is next to impossible to determine what in this confusion is truly historical. Some historians, like Diodorus Siculus, who have attempted to interpret mythology after the plan of Euhemerus, have succeeded only in substituting prosaic fiction for the imaginative popular legends. The pagan writers generally treat Euhemerus with severity. After the origin of Christianity, the views of Euhemerus, as containing the satires of a pagan on pagan religions, were made great use of in argument by the Church fathers against paganism, with some exaggerations, perhaps, of the doctrines of Euhemerus. Tertullian, Clement of Alexandria, Minucius Felix, Cyprian, Lactantius, Chrysostom, in arguing against paganism, adopt the view of Euhemerus, that the worship of great men was the original source of all idolatry, and gave birth to all the pagan divinities. In 1611, Vossius, following an idea of Tertullian, sought to show that the gods of paganism were the patriarchs of the O. T.: Serapis was Joseph; Janus, Noah; Minerva, Naomi, etc. Huët, bishop of Avranches, discovered Moses in Osiris and Bacchus, as well as in many other pagan divinities. Euhemerism, as a method of interpreting the ancient mythology, was supplanted by the symbolism of Kreuzer, a system infinitely superior to the other two above mentioned, but still containing much that is illusory and erroneous.—Hoefler, *Nouv. Biogr. Générale*, xvi, 828; Donaldson, *History of Christian Literature and Doctrine* (see Index); Gerlach, *Historische Studien* (Hamb. 1841, 8vo); Lecky, *History of Rationalism*, i, 327; Brucker, *Hist. Crit. Philosophie*, i, 604 sq.; Clinton, *Fasti Hellenici* (Oxon. 1830), ii, 481; Meiners, *Hist. Doct. apud Grecos*, ii, 664 sq.; Fabricius, *Bibliotheca Græca*, iii, 616; Hoffman, *Bibliographisches Lexikon*, i, 65; Milman, *History of Christianity* (New York, 1866), i, 49, note. See MYTHOLOGY.

**Eulalia**, a saint of the Church of Rome, was born at Merida, Spain, in 290. She was the descendant of a noble Christian family. When the general persecution of Christians began under Maximian, Eulalia, contrary to the directions given by the Church, voluntarily sought martyrdom by presenting herself to the prefect of Lusitania, remonstrating with him against idolatry and the persecution of Christianity, and by personally insulting him (spitting in his face, etc.).

She was consequently burned alive Dec. 10 (or 12), 303 (or 304). Her relics were preserved at Merida, and many miracles were ascribed to them at the time of the invasion of the Goths and Vandals. Barcelona also claims the possession of the relics of St. Eulalia, and the legend of this saint is so much like that of Eulalia of Merida that it is generally believed that the two are only one person, and that, as is common in the Church of Rome, the same relics are claimed by two cities.—Hoefler, *Nouv. Biog. Génér.* xvi, 708. (A. J. S.)

**Eulalius**, anti-Pope, lived in the first part of the fifth century. Created arch-cardinal by Innocent I, he was, after the death of pope Zosimus, near the close of the year 418, through the influence of Symmachus, elected pope in opposition to Boniface I, who had been elected by a legal majority. For several months he contended against Boniface, but finally the emperor Honorius decided in favor of Boniface, being persuaded that Eulalius had been illegally elected, and gave orders to Symmachus, the governor of the city of Rome, to drive Eulalius from the city, and to put Boniface in possession of the see. Eulalius thereupon left Rome, and became bishop of Nepi. After the death of Boniface, at the election of Celestine I, the friends of Eulalius offered to contend again in his favor, but he promptly declined the papal dignity.—Bower, *History of the Popes*, i, 358 sq.; Hoefler, *Nouv. Biog. Gén.* xvi, 709; Wetzer and Welte, *Kirchen-Lex.* iii, 750; Jaffé, *Regesta Pontificum Romanorum.* (J. H. W.)

**Eulogia** (εὐλογία). (1.) A term used in reference to the consecrated bread of the Eucharist. In the early Church, at the end of mass, the loaves offered by the faithful (not consecrated) were blessed by the celebrant, and distributed as a sign of communion, as they now are in the Greek Church, to those who had not communed, and formerly to catechumens who were not admissible. They were called eulogies or *antidora*, compensations, by the Council of Antioch in 341.

(2.) *Eulogia* was one of the early titles of the sacrament of the Lord's Supper, and appears to have been taken from the language of Paul when he says, "The cup of blessing which we bless"—τὸ ποτήριον τῆς εὐλογίας. Down to the time of Cyril and Chrysostom, *eulogia* is used synonymously with *εὐχαριστία*, but after the fifth century the term was appropriated to the bread set apart from the oblations for the poor and the clergy. To this custom we may refer the origin of private masses, and of communion in one kind.

(3.) The practice of giving the *eulogia* also tends to explain the custom of non-communication which sprang up in the Church about the same time. The faithful who did not communicate retired from the assembly before the celebration of the Lord's Supper began, but not without receiving the benediction of the minister. The *fuldeles* were soon divided into two classes—*communicantes* and *non-communicantes*—of which the Church knew nothing in earlier ages. The Council of Nantes, about A.D. 890, ordered the presbyters to keep some portions of the oblations in a proper vessel, so that those persons who were not prepared to communicate might, on every festival and Lord's day, receive some of the *eulogia*, previously blessed with a proper benediction.—Bingham, *Orig. Eccl.* bk. x, ch. ii, §16; bk. xv, ch. iv, §3; Riddle, *Christ. Antiquities*, p. 545, 578.

**Eulogius**, patriarch of Alexandria from 581 to 608. Pope Gregory I makes particular mention of him as a successful polemic against the Nestorians, Severians, Theodosians, Cainites, Acephalians, and Agnoete. Photius preserves numerous fragments of his writings. He died in 608.—Wetzer and Welte, *Kirchen-Lex.* iii, 753, 754; Fabricius, *Bibl. Græca*, (ed. Harles), x, 753.

**Eulogius** of Cordova was in 859 elected archbishop of Toledo, but, by the opposition of the Moors, he was not permitted to enter upon the duties of his office. He was a learned and brave defender of

Christianity against Mohammedanism, and sealed his love for the cause by his own blood, being beheaded by the Moors, March 11, 859, for the assistance which he had rendered a young girl who had been converted and by him baptized in the Christian faith. His writings are: *Memoriale Sanctorum sive libri iii de Martyribus Cordubensibus*, a work in which the glory of the Spanish martyrs of his times is recorded:—*Exhortatio ad martyrrium sive documentum martyriale ad Floram et Marium virgines confessores*:—*Apologeticus pro martyribus adversus calumniatores*, in which he denies the assertion that the Christians desired martyrdom. He also wrote letters to the bishop Wilifindus of Pampeluna, his friend Alvarus, and others. His remains are to be found in Schott, *Hispania Illustrata*, vol. iv; in the *Bibliotheca Patrum*, xv, 242; also in Migne, *Patrol. Lat.* tom. cxv. A biography of Eulogius, written by his friend Alvarus, is also in Migne, t. cxv.—Ceillier, *Hist. des Aut. Sac. et Eccl.* xix, 64; Wetzer u. Welte, *Kirchen-Lex.* iii, 754, 755; Hoefler, *Nouv. Biog. Gén.* xvi, 719; Herzog, *Real-Encyclop.* iv, 220; Fabricius, *Bibliotheca Græca*, iv, 257; Clarke, *Sacred Literature*, vol. ii.

**Eulogy.** See FUNERAL.

**Eū'natan** (Ἐννατάν v. r. Ἐνναθάν, Vulg. *Ennatum*), given (1 Esd. viii, 44, where it is perhaps but an original misprint for *Ennaton*) as the name of one of the principal men directed by Ezra to procure priests for the returning party of exiles; apparently a corruption for the second ELNATHAN (q. v.) of the Heb. text (Ezra viii, 16).

**Euni'cè** (Ἐνίκη, *good victory*, originally the name of one of the Nereids), the mother of Timothy, and the wife of a Greek; spoken of (2 Tim. i, 5) as possessing unfeigned faith, and described in Acts xvi, 1 as a believing Jewess (γυνὴ Ἰουδαία πιστῆ). A. D. ante 47. See TIMOTHY.

**Eū'menès** (Εὐμένης, *well-disposed*) II, king of Pergamus, and son of Attalus I. His accession to the throne is fixed by the death of his predecessor to B.C. 197 (Clinton, *F. H.* iii, 403). He inherited from his father the friendship and alliance of the Romans, and when peace was made in B.C. 196 with Philip V, king of Macedonia, he was presented with the towns of Oreus and Eretria in Eubœa (Livy, xxxiii, 34). In B.C. 191 Eumenes and the Romans engaged the fleet of Antiochus (Livy, xxxvi, 43-45), and, seeing more than ever the policy of adhering to the Romans, he, in the following year, rendered them valuable assistance at the battle of Magnesia, commanding his own troops in person (Livy, xxxvii, 39-44; Justin, xxxi, 8; Appian, *Syr.* 34). As soon as peace was concluded, B.C. 188, Eumenes set out for Rome to ask some rewards for his services. The senate were pleased with the modesty of his behavior, and conferred upon him the Thracian Chersonese, Lysimachia, both Phrygias, Mysia, Lycaonia, Lydia, and Ionia, with some exceptions. One province only would have much enlarged his dominions, but by this large addition to his territory he found himself one of the most powerful of monarchs (Livy, xxxvii, 56; xxxviii, 39; Polyb. xxii, 27; Appian, *Syr.* 44). About the same time he married the daughter of Ariarathes IV, king of Cappadocia (Livy, xxxviii, 39). Eumenes continued in good favor with the Romans for several years, and repeatedly sent embassies to them. In B.C. 172 he again visited Rome, and in returning nearly lost his life through the treachery of Perseus, king of Macedonia (Livy, xlii, 11-16). In B.C. 169 Eumenes is said to have had secret correspondence with Perseus, by which act he lost the favor of the Romans (Polyb. *Frag. Vat.* xxix, Didot ed. p. 39, 40), and two years after he was forbidden to enter Rome (Livy, *Epit.* xlvi). The latter part of his reign was disturbed by frequent wars with Prusias, king of Bithynia. The Romans favorably received his brother Attalus, apparently for the purpose of exciting him

against Eumenes, who had sent him to Rome. Attalus, however, was induced, through the entreaties of a physician named Stratus, to abandon any such ideas. Eumenes thus managed to keep on friendly terms with his brother and the Romans till his death (Livy, xlv, 19, 20; Polyb. xxx, 1-3; xxxi, 9; xxxii, 5). The exact date of his death is not mentioned by any writer, but it must have taken place in B.C. 159 (Clinton, *F. H.* iii, 406). Eumenes II much improved the city of Pergamus by erecting magnificent temples and other public buildings. His greatest act was the foundation of a splendid library, which rose to be a rival in extent and value even to that of Alexandria (Strabo, xiii, 4, Diolot ed. p. 533; Pliny, xxii, 11 (see Smith, *Dict. of Class. Biog.* s. v.).—Kitto, s. v. See PERGAMUS.

The large accession of territory which was granted to Eumenes from the former dominions of Antiochus is mentioned 1 Macc. viii, 8, but the present reading of the Greek and Latin texts offers insuperable difficulties. "The Romans gave him," it is said, "the country of India and Media, and Lydia, and parts of his (Antiochus's) fairest countries (*ἀπὸ τῶν καλλ. χωρῶν αὐτοῦ*)." This is particularly out of the question, for neither India nor Media ever belonged to Antiochus or the Romans. Various conjectures have been proposed to remove these obvious errors; but, though it may reasonably be allowed that *Mysia* may have stood originally for Media (מדיא for מדי, Michaelis), it is not equally easy to explain the origin of *χωρῶν τῆν Ἰνδικήν*. Grotius was meant, which agrees with the account of Livy (xxxvii, 55). It is possible that *Ἰνδικήν* may have been substituted for *Ἰωνικήν* after *Μητιά* was already established in the text. Other explanations are given by Grimm, *Ereg. Handb.* ad loc.; Wernsdorf, *De file Libr. Macc.* p. 50 sq., but they have less plausibility. Josephus states the matter but summarily (*Ant.* xi, 10, 6).—Smith, s. v.

**Eunomians**, a sect of Arians, so called after their founder, EUNOMIUS. See EUNOMIUS.

**Eunomius**, a bishop and founder of a sect of Arians. He was born in the village of Dacora, in Cappadocia, and is described by his admirer, Philostorgius, as ugly in appearance, and somewhat stammering. He was educated by his father until, under the advice of the Arian bishop Secundus, of Antioch, he went to Alexandria, where he became the disciple, associate, and notary of Aëtius (q. v.), the head of the Anomœans. On a journey which he undertook to visit the emperor, he was seized by the Semiarious and sent to Phrygia; but in 360, his friend Eudoxius, formerly bishop of Antioch, but who had recently been called to Constantinople, procured for him the see of Cyzicum. There he proclaimed his views, first cautiously and moderately, but soon openly and unreservedly. The people of Cyzicum loudly complained of him, and, though he defended himself at Constantinople with great eloquence, he was abandoned by Eudoxius, who prevailed upon him to resign, since he was unwilling to subscribe the formula of Ariminum, or approve the deposition of Aëtius. After this time Eunomius acted as the acknowledged head of the party. Under Julian, who recalled all the exiled bishops, Eunomius was with Aëtius in Constantinople, disseminating their views, collecting adherents, and consecrating bishops, who settled in many regions of Asia Minor, Syria, and Egypt. Being suspected of intimate relations with Procopius, a rebel against the authority of emperor Valens, he was twice exiled, but each time soon recalled. In 383 the emperor Theodosius demanded from all the prominent men of the several religious parties an explanation of their theological views, rejected the profession of faith made by Eunomius, had him arrested at Chalcedon and exiled to Halmyris, in Mœsia, and from there to Cæsarea, in Cappadocia. From there, when his longer stay was not tolerated,

he returned to his native place, where he died about 396.

Eunomius wrote a commentary on the Epistle to the Romans, and a number of letters, which were known to Photius. Both the commentary and the letters are lost. His first defence (*ἀπολογητικός*), which was written either in 360 or (according to Rettberg) in 365, called forth a long reply from Basil. From several manuscripts of the latter, the text of this work of Eunomius has been restored. It is partly given by Cave (*Hist. Liter.* Genev. 1720, i, 130), and completely by Fabricius (*Biblioth. Græca*, viii), Canisius (*Lect. Antiq.* i), and Thilo (*Biblioth. dogmat.* ii). A second defence (*ἐπιτε ἀπολογία ἀπολογία*, as Gregory calls it) elicited in reply the twelve orations of Gregory of Nyssa. The fragments of Eunomius contained in the work of Gregory have been collected by Rettberg (*Marcelliana*, p. 125). His profession of faith (*ἐκθεσις τῆς πίστεως*), which Eunomius in 383 presented to the emperor Theodosius, has been published by Valsius (notes to Socrates, v, 10), Fabricius (*l. c.*), Cave (*l. c.*), and Rettberg (*Marcelliana*, p. 149).

Eunomius was one of the prominent leaders of the Arians. He was capable, keen, undaunted, and full of contempt for his opponents. He had a keener dialectic faculty than Arius, and anticipated Des Cartes in making clearness the test of truth. "An opponent of whatever was inconceivable and transcendental, he pursued knowledge in a one-sided direction, not deeply speculative, but proceeding from an empirical understanding to make everything clear, which was his principal aim. In short, he advocated an intelligent supernaturalism, in which a rationalistic tendency was concealed, similar to what we find in Socinus" (Neander, *Hist. of Dogmas*, ed. Ryland, i, 264). The following account of the confession of faith of the Eunomians is given by Cave (vol. i, p. 140), from a manuscript in archbishop Tension's library: "There is one God, uncreated and without beginning, who has nothing existing before him, for nothing can exist before what is uncreate; nor with him, for what is uncreate must be one; nor in him, for God is a simple and uncompounded Being. This one simple and eternal Being is God, the Creator and Ordainer of all things. For God created, begot, and made the Son only, by his direct operation and power, before all things, and every other creature; not producing, however, any being like himself, or imparting any of his own proper substance to his Son; for God is immortal, uniform, and indivisible, and therefore cannot communicate any part of his own proper substance to another. He alone is unbegotten, and it is impossible that any other being should be formed of an unbegotten substance. He did not use his own substance in begetting his Son, but his will only; nor did he beget him in the likeness of his substance, but according to his own good pleasure. He then created the Holy Spirit, the first and greatest of all spirits, by his own power and operation mediately, yet by the immediate power and operation of the Son. After the Holy Spirit, he created all other things in heaven and in earth, visible and invisible, corporeal and incorporeal, mediately by himself, by the power and operation of his Son."

The adherents of Eunomius, who were very numerous, were, together with those of Aëtius, condemned as heretics by the second Ecumenical Council. After the death of Eunomius, the Eunomians fully separated from the communion of the predominant Church. Some factions called themselves after prominent teachers, as Eutycheus, Theophrastus. The Church gave them a number of nicknames, as *ἀνοβόσται*, *σπαδονες*. They baptized, not upon the Trinity, but upon the death of Christ. They did not exist long as a sect, but soon died out, in consequence of internal dissensions and numerous secessions to the dominant Church.—Herzog, *Real-Encyclop.* iv, 220; Mosheim, *Ch. Hist.* i, 248, 301; Tillmont; Dörner, *Lehre Christi*, i, 815

(Edinb. transl., div. i, vol. ii, p. 243); Neander, *Church Hist.* ii, 319-425; Clarke, *Sacred Liter.* i, 318; Schaff, *Church History*, iii, § 121. (A. J. S.)

**Eunuch** (εὐνοῦχος) has, in its literal (Greek) sense, the harmless meaning of "bed-keeper," i. e. one who has the charge of beds and bed-chambers; but as only persons deprived of their virility have, from the most ancient times, been employed in Oriental harems, and as such persons are employed almost exclusively in this kind of service, the word "bed-keeper" became synonymous with "castratus." Castration, according to Josephus (*Ant.* iv, 8, 40), was not practised by the Jews upon either men or animals (see BEAST); yet the custom is frequently referred to in the Bible by the Hebrew term סַרִּיס (*saris*), Sept. εὐνοῦχος; Vulg. *spado*; A. V. "eunuch," "officer," and "chamberlain," apparently as though the word intended a class of attendants who were not always mutilated), which (from the Arabic root *saras*, to be impotent ad Venerem) clearly implies the incapacity which mutilation involves (*Isa.* lvi, 3; *Sirach* xx, 20 [21]), and perhaps includes all the classes mentioned in *Matt.* xix, 12, not signifying, as the Greek εὐνοῦχος, an office merely. The law, *Deut.* xxiii, 1 (comp. *Lev.* xxii, 24), is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1 *Sam.* viii, 15, marg.), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2 *Kings* xx, 18; *Isa.* xxxix, 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (*Herod.* iii, 49; vi, 32), not only of tender age (when a non-development of beard, and feminine mould of limbs and modulation of voice ensues), but, it would seem, when past puberty, which there occurs at an early age. Physiological considerations lead to the supposition that in the latter case a remnant of animal feeling is left, which may explain *Ecclesi.* xx, 4; xxv, 20 (comp. *Juv.* vi, 366, and *Mart.* vi, 67; *Philostr.* *Apoll.* *Tyan.* i, 37; *Ter. Eun.* iv, 3, 24), where a sexual function, though fruitless, is implied. *Busbecq* (*Ep.* iii, 122, *Oxf.* 1600) seems to ascribe the absence or presence of this to the total or partial character of the mutilation; but modern surgery would rather assign the earlier or later period of the operation as the real explanation. (*Comp. Juv.* xii, 35; *Philo.* *Opp.* ii, 264; *Mishna.* *Yebain.* viii, 2; *Deut.* xxiii, 2; see *Gesenius*, *Thes.* p. 338; *Paul.* *Egin.* vi, 68; *Fischer*, *Profuss.* p. 497; *Pierer*, *Medic. Reali.* I, ii, 63.) It is total among modern Turks (*Tournefort*, ii, 8, 9, 10, ed. *Par.* 1717, *taille à fleur de ventre*); a precaution arising from mixed ignorance and jealousy. The "officer" Potiphar (*Gen.* xxxvii, 36; xxxix, 1, marg. "eunuch") was an Egyptian, was married, and was the "captain of the guard." The Jewish tradition is that Joseph was made a eunuch on his first introduction to Egypt; and yet the accusation of Potiphar's wife, his marriage and the birth of his children, are related subsequently without any explanation. (See *Targum Pseudojon.* on *Gen.* xxxix, 1, xli, 50; and the details given at xxxix, 13.) On the Assyrian monuments a eunuch often appears, sometimes armed and in a warlike capacity, or as a scribe, noting the number of heads and amount of spoil, as receiving the prisoners, and even as officiating in religious ceremonies (*Layard*, *Ninereh*, ii, 324-6, 334.) A bloated beardless face and double chin is there their conventional type. See ATTIRE. *Chardin* (*Voyages en Perse*, ii, 283, ed. *Amst.* 1711) speaks of eunuchs having a harem of their own. If Potiphar had become such by operation for disease, by accident, or even by malice, such a marriage seems, therefore, according to Eastern notions, supposable. (See *Grotius* on *Deut.* xxiii, 1; comp. *Barckhardt*, *Trav. in Arab.* i, 290.) Nor is it wholly repugnant to that barbarous social standard to think that the prospect of rank, honor, and royal confidence might even

induce parents to thus treat their children at a later age, if they showed an aptness for such preferment. The characteristics as regards beard, voice, etc., might then perhaps be modified, or might gradually follow. The Potiphar of *Gen.* xli, 50, whose daughter Joseph married, was "priest of On," and no doubt a different person. (See *Delphini*, *Eunuchi conjugium*, Hal. 1680.) The origination of the practice is ascribed to Semiramis (*Amm. Marcell.* xiv, 6), and is no doubt as early, or nearly so, as Eastern despotism itself. Their incapacity, as in the case of mutes, is the ground of reliance upon them (*Clarke's Travels*, pt. ii, § 1, 13; *Busbecq*, *Ep.* i, 33). By reason of the mysterious distance at which the sovereign sought to keep his subjects (*Herod.* i, 99; comp. *Esth.* iv, 11), and of the malignant jealousy fostered by the debased relation of the sexes, such wretches, detached from social interests and hopes of issue (especially when, as commonly, and as amongst the Jews, foreigners), the natural slaves of either sex (*Esth.* iv, 5), and having no prospect in rebellion save the change of masters, were the fittest props of a government resting on a servile relation, the most complete organs of its despotism or its lust, the surest (but see *Esth.* ii, 21) guardians (*Xenoph.* *Cyrop.* vii, 5, § 15; *Herod.* viii, 105) of the monarch's person, and the sole confidential witnesses of his unguarded or undignified moments. Hence they have in all ages frequently risen to high offices of trust. Thus the "chief" of the cup-bearers (q. v.) and of the cooks of Pharaoh were eunuchs, as being near his person, though their inferior agents need not have been so (*Gen.* xl, 1). (*Wilkinson* [*Anc. Egypt.* ii, 61] denies the use of eunuchs in Egypt. *Herodotus*, indeed [ii, 9], confirms his statement as regards Egyptian monogamy; but if this as a rule applied to the kings, they seemed, at any rate, to have allowed themselves concubines [p. 181]. From the general beardless character of Egyptian heads, it is not easy to pronounce whether any eunuchs appear in the sculptures or not.) The complete assimilation of the kingdom of Israel, and latterly of Judah, to the neighboring models of despotism, is traceable in the rank and prominence of eunuchs (2 *Kings* viii, 6; ix, 32; xxiii, 11; xxv, 19; *Isa.* lvi, 3, 4; *Jer.* xxxix, 2; xxxiv, 19; xxxviii, 7; xli, 16; li, 25). They mostly appear in one of two relations—either military, as "set over the men of war," greater trustworthiness possibly counterbalancing inferior courage and military vigor, or associated, as we mostly recognise them, with women and children. (2 *Chron.* xxviii, 1 is remarkable as ascribing eunuchs to the period of David, nor can it be doubted that Solomon's polygamy made them a necessary consequence; but in the state they do not seem to have played an important part at this period.) We find the Assyrian Rab-Saris, or chief eunuch (2 *Kings* xviii, 17), employed, together with other high officials, as ambassador. Similarly, in the details of the travels of an embassy sent by the duke of Holstein (p. 136), we find a eunuch mentioned as sent on occasion of a state-marriage to negotiate, and of another (p. 275) who was the *Meheter*, or chamberlain of Shah Abbas, who was always near his person, and had his ear (comp. *Chardin*, iii, 37), and of another, originally a Georgian prisoner, who officiated as supreme judge. *Fryer* (*Travels in India and Persia*, p. 1698) and *Chardin* (ii, 283) describe them as being the base and ready tools of licentiousness, as tyrannical in humor, and pertinacious in the authority which they exercise; *Clarke* (*Travels in Europe*, etc., pt. ii, § 1, p. 22), as eluded and ridiculed by those whom it is their office to guard. A great number of them accompany the shah and his ladies when hunting, and no one is allowed, on pain of death, to come within two leagues of the field, unless the king sends a eunuch for him. So eunuchs run before the closed arabahs of the sultanas when abroad, crying out to all to keep at a distance. This illustrates *Esth.* i, 10, 12, 15, 16; ii, 3, 8, 14. The moral tendency of this

sad condition is well known to be the repression of courage, gentleness, shame, and remorse, the development of malice, and often of melancholy, and a disposition to suicide. The favorable description of them in Xenophon (*l. c.*) is overcharged, or, at least, is not confirmed by modern observation. They are not more liable to disease than others, unless of such as often follows the foul vices of which they are the tools. The operation itself, especially in infancy, is not more dangerous than an ordinary amputation. Chardin (ii, 285) says that only one in four survives; and Clot Bey, chief physician of the pasha, states that two thirds die. Burckhardt, therefore (*Nub.* p. 329), is mistaken when he says that the operation is only fatal in about two out of a hundred cases. See HAREM.

It is probable that Daniel and his companions were thus treated, in fulfilment of 2 Kings xx, 17, 18; Isa. xxxix, 7; comp. Dan. i, 3, 7. The court of Herod of course had its eunuchs (Josephus, *Ant.* xvi, 8, 1; xv, 7, 4), as had also that of queen Candace (Acts viii, 27). Michaelis (ii, 180) regards them as the proper consequence of the gross polygamy of the East, although his further remark that they tend to balance the sexual disparity which such monopoly of women causes is less just, since the countries despoiled of their women for the one purpose are not commonly those which furnish male children for the other.

In the three classes mentioned in Matt. xix, 12, the first is to be ranked with other examples of defective organization; the last, if taken literally, as it is said to have been personally exemplified in Origen (Euseb. *Ecl. Hist.* vi, 8; see Zorn, *De eunuchismo Origenis*, Giess, 1708), is an instance of human ways and means of ascetic devotion being valued by the Jews above revealed precept (see Schöttgen, *Hor. Heb.* i, 159). Our Saviour in that passage doubtless refers to the voluntary and ascetic celibacy of the Essenes (q. v.). But a figurative sense of *ἐνοσίχθωνος* (comp. 1 Cor. vii, 32, 34) is also possible. See CELIBACY.

In the A. V. of Esther the word "chamberlain" (marg. "eunuch") is the constant rendering of סָרִיס, *saris*, and as the word also occurs in Acts xii, 20, and Rom. xvi, 23, where the original expressions are very different, some caution is required. In Acts xii, 20, τὸν ἐπὶ τοῦ κοιτωνοῦ τοῦ βασιλέως may mean a "chamberlain" merely. Such were persons of public influence, as we learn from a Greek inscription preserved in Walpole's *Turkey* (ii, 559), in honor of P. Aelius Alcibiades, "chamberlain of the emperor" (ἐπὶ κοιτωνοῦ Σεβ.), the epithets in which exactly suggest the kind of patronage expressed. In Rom. xvi, 23, the word *ἐπίτροπος* is the one commonly rendered "steward" (e. g. Matt. xx, 8; Luke viii, 3), and means the one to whom the care of the city was committed. See generally Salden, *Otia Theol. de Eunuchis*, p. 494 sq.—Smith, s. v. See CHAMBERLAIN.

In Deut. xxiii, 1 (סָרִיס, מְטֻמָּא, one mutilated by crushing, i. e. the testicles, Sept. technically Ἐνακτίας), and also probably in Lev. xxi, 20 (מְטֻמָּא, מְטֻמָּא, one crushed as to his testicles, Sept. partially μονόρχις), the allusion is to a peculiar kind of emasculation still practised in the East, according to the Greek physicians (Paulus Ægineta, bk. vi), which consists in softening the testicles of very young boys in warm water, and then rubbing and pressing them till they disappear. As the heathen priests were often thus qualified for office, persons so mutilated were excluded from the Jewish Church. See ASHORETH.

**Eunuchs**, a sect of heretics in the third century, who were said to be mad enough to emasculate themselves under the assumption that they should thus eradicate their evil propensities, and qualify themselves for performing, in a more holy and acceptable manner, the duties of religion. Origen was the subject of this miserable delusion. The practice is pre-

alent at this day in Russia, among the sect of the Skoptzi (q. v.). In the Council of Nicaea persons of this class were condemned, and excluded from holy orders (Farrar, *Eccles. Dict.* s. v.). See CELIBACY and VALESIAINS.

**Euo'dias**, or, rather, EUODIA (*Ἐβόδια*, a good journey; for, as found in Phil. ix, 2, *Ἐβόδιαν* is fem., since the following verse refers to that and the associated name by ἀνδρῶν and ἀνδρες), a female member of the Church at Philippi, who seems to have been at variance with another female member named Syntyche. A. D. 57. Paul describes them as women who had "labored much with him in the Gospel," and implores them to be of one mind (Philip. iv, 2, 3).

**Euodius**. See EVODIUS.

**Euphemites**. See MESSALIAINS.

**Euphra'tès** is the Greek form (*Ἐβφράτης*) of the river designated in Heb. by the name פְּרָתִי or *Perath'* (פְּרָתִי, which Gesenius regards as i. q. "sweet water," referring to the present Arabic name *Frah* as having that signif.; but Fürst refers to an obsolete root indicating the impetuous character of the stream), and is probably a word of Arian origin, the initial element being 'u, which is in Sanscrit *su*, in Zend *hu*, and in Greek *eu*; and the second element being *fra*, the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its modern form of *Frát*, which is almost exactly what the Hebrew literation expresses. But it is most frequently denoted in the Bible by the term הַנְּהַר, *han-nahar'*, i. e. "the river," the river of Asia, in grand contrast with the shortlived torrents of Palestine, being by far the most considerable stream in that part of the continent. Thus, in Exod. xxiii, 31, we read, "from the desert unto the river" (comp. Isa. viii, 7). In like manner, it is termed in Deut. i, 7 "the great river." The Euphrates is named in the cuneiform inscriptions (q. v.).

1. It is first mentioned in Gen. ii, 14, where the Euphrates is stated to be the fourth of the rivers which flowed from a common stream in the garden of Eden. Its celebrity is there sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. See EDEX. We next hear of it in the covenant made with Abraham (Gen. xv, 18), where the whole country from "the great river, the river Euphrates," to the river of Egypt is promised to the chosen race. In Deuteronomy and Joshua we find that this promise was borne in mind at the time of the settlement in Canaan (Deut. i, 7; xi, 24; Josh. i, 4); and from an important passage in the first book of Chronicles it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times anterior to Saul (1 Chron. v, 9). Here they came in contact with the Hagarites, who appear upon the Middle Euphrates in the Assyrian inscriptions of the later empire. It is David, however, who seems for the first time to have entered on the full enjoyment of the promise by the victories which he gained over Hadadezer, king of Zobah, and his allies, the Syrians of Damascus (2 Sam. viii, 3-8; 1 Chron. xviii, 3). The object of his expedition was "to recover his border," and "to establish his dominion by the river Euphrates;" and in this object he appears to have been altogether successful, in so much that Solomon, his son, who was not a man of war, but only inherited his father's dominions, is said to have "reigned over all kingdoms from the river (i. e. the Euphrates) unto the land of the Philistines and unto the border of Egypt" (1 Kings iv, 21; comp. 2 Chron. ix, 26). Thus, during the reigns of David and Solomon, the dominion of Israel actually attained to the full extent both ways of the original promise, the Euphrates forming the boundary of their empire to the north-east, and the river of

Egypt to the south-west. This wide-spread dominion was lost upon the disruption of the empire under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Necho against the Babylonians in the reign of Josiah. The "Great River" had meanwhile served for some time as a boundary between Assyria and the country of the Hittites (see ASSYRIA), but had repeatedly been crossed by the armies of the Ninevite kings, who gradually established their sway over the countries upon its right bank. The crossing of the river was always difficult, and at the point where certain natural facilities fixed the ordinary passage the strong fort of Carchemish had been built, probably in very early times, to command the position. See CARCHEMISH. Hence, when Necho determined to attempt the permanent conquest of Syria, his march was directed upon "Carchemish by Euphrates" (2 Chron. xxxv, 20), which he captured and held, thus extending the dominion of Egypt to the Euphrates, and renewing the old glories of the Rameside kings. His triumph, however, was short-lived. Three years afterwards the Babylonians—who had inherited the Assyrian dominion in these parts—made an expedition under Nebuchadnezzar against Necho, defeated his army, "which was by the river Euphrates in Carchemish" (Jer. xlvi, 2), and recovered all Syria and Palestine. Then "the king of Egypt came no more out of his land, for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 Kings xxiv, 7).

These are the chief events which Scripture distinctly connects with the "Great River." The prophets made use of the Euphrates as a figurative description of the Assyrian power, as the Nile with them represented the power of Egypt; thus, in Isa. viii, 7, "The Lord bringeth up upon them the waters of the river, strong and many, even the king of Assyria" (Jer. ii, 18; comp. Rev. ix, 14; xvi, 12). It is probably included among the "rivers of Babylon," by the side of which the Jewish captives "remembered Zion" and "wept" (Psa. cxxxvii, 1); and no doubt is glanced at in the threats of Jeremiah against the Chaldean "waters" and "springs," upon which there was to be a "drought" that should "dry them up" (Jer. I, 38; ii, 26). The fulfilment of these prophecies has been noticed under the head of CHALDEA. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses along which it was in former times conveyed are dry, the main channel has shrunk, and the water stagnates in unwholesome marshes.

It is remarkable that Scripture contains no clear and distinct reference to that striking occasion when, according to profane historians (Herod. i, 191; Xenoph. *Cyrop.* vii, 5), the Euphrates was turned against its mistress, and used to effect the ruin of Babylon. The brevity of Daniel (v, 30, 31) is perhaps sufficient to account for his silence on the point; but it might have been expected from the fulness of Jeremiah (ch. I and li) that so remarkable a feature of the siege would not have escaped mention. We must, however, remember, in the first place, that a clear prophecy may have been purposely withheld, in order that the Babylonians might not be put upon their guard. And, secondly, we may notice that there does seem to be at least one reference to the circumstance, though it is covert, as it was necessary that it should be. In immediate conjunction with the passage which most clearly declares the taking of the city by a surprise is found an expression which reads very obscurely in our version—"the passages are stopped" (Jer. li, 32). Here the Hebrew term (פְּתָחֵי הַנְּהַרִּים) applies most properly to "fords or ferries over rivers" (comp. Judg. iii, 28); and the whole passage may best be translated, "the ferries are seized" or "occupied;" which agrees very

well with the entrance of the Persians by the river, and with the ordinary mode of transit in the place, where there was but one bridge (Herod. i, 186). The fords were at Thapsacus (Xenoph. *Anab.* i, 4, 11).

2. The Euphrates is the largest, the longest, and by far the most important of the rivers of Western Asia. It rises from two chief sources in the Armenian mountains, one of them at Domli, 25 miles N.E. of Erzeroum, and little more than a degree from the Black Sea; the other on the northern slope of the mountain range called Ala-Tagh, near the village of Diyadin, and not far from Mount Ararat. The former, or Northern Euphrates, has the name *Frât* from the first, but is known also as the *Kara-Su* (Black River); the latter, or Southern Euphrates, is not called the *Frât*, but the *Murad Chai*, yet it is in reality the main river. Both branches flow at the first towards the west or south-west, passing through the wildest mountain districts of Armenia; they meet at Kebban-Maden, nearly in long. 39° E. from Greenwich, having run respectively 400 and 270 miles. Here the stream formed by their combined waters is 120 yards wide, rapid, and very deep; it now flows nearly southward, but in a tortuous course, forcing a way through the ranges of Taurus and anti-Taurus, and still seeming as if it would empty itself in the Mediterranean, but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from it; the river at last desists from its endeavor, and in about lat. 36° turns towards the south-east, and proceeds in this direction for above 1000 miles to its embouchure in the Persian Gulf (Herod. i, 180; Strabo, ii, 521; Ptolem. v, 13; Pliny, *Hist. Nat.* v, 20; Q. Curt. i, 13; *Orbis Terrarum*, C. Kaercher Auct.). In conjunction with the Tigris, it forms the rich alluvial lands of Mesopotamia (q. v.), over which it flows or is carried by canals, and thus diffuses abroad fertility and beauty. At Bagdad and Hillah (Babylon), the Euphrates and Tigris approach comparatively near to each other, but separate again, forming a kind of ample basin, till they finally become one at Koorma. Under the Cæsars the Euphrates was the eastern boundary of the Roman empire, as under David it was the natural limit of the Hebrew monarchy. See TIGRIS.

The last part of its course, from Hit downwards, is through a low, flat, and alluvial plain, over which it has a tendency to spread and stagnate; above Hit, and from thence to Sumeisat (Samosata), the country along its banks is for the most part open, but hilly; north of Sumeisat the stream runs in a narrow valley among high mountains, and is interrupted by numerous rapids. The entire course is calculated at 1780 miles, nearly 650 more than that of the Tigris, and only 200 short of that of the Indus; and of this distance more than two thirds (1200 miles) is navigable for boats, and even, as the expedition of colonel Chesney proved, for small steamers. The width of the river is greatest at the distance of 700 or 800 miles from its mouth—that is to say, from its junction with the Khabour to the village of Werai. It there averages 400 yards, while lower down, from Werai to Lamlun, it continually decreases, until at the last-named place its width is not more than 120 yards, its depth having at the same time diminished from an average of 18 to one of 12 feet. The causes of this singular phenomenon are the entire lack of tributaries below the Khabour, and the employment of the water in irrigation. The river has also in this part of its course the tendency already noted, to run off and waste itself in vast marshes, which every year more and more cover the alluvial tract west and south of the stream. From this cause its lower course is continually varying, and it is doubted whether at present, except in the season of the inundation, any portion of the Euphrates water is poured into the *Shut-el-Arab*.

In point of current it is for the most part a slug-

ish stream; for, except in the height of the flooded season, when it approaches 5 miles an hour, it varies from  $2\frac{1}{2}$  to  $3\frac{1}{2}$ , with a much larger portion of its course under 3 than above. Its general description for some distance below Erzingan is that of a river of the first order, struggling through high hills, or rather low mountains, making an exceedingly tortuous course as it forces its way over a pebbly or rocky bed from one natural barrier to another. As it winds round its numerous barriers, it carries occasionally towards each of the cardinal points a considerable body of water, and is shallow enough in some places for loaded camels to pass in autumn, the water rising to their bellies, or about  $4\frac{1}{2}$  feet. The upper portion of the river is inclosed between two parallel ranges of hills, covered for the most part with high brushwood and timber of moderate size, having a succession of long, narrow islands, on several of which are moderate-sized towns; the borders of this ancient stream being still well inhabited, not only by Bedouins, but by permanent residents. The following towns may be named: Sumeis-at, Haorom, Romkala, Bir, Giaber, Deir, Rava, Anna, Hadisa, El-'Us, Jibba, Hit, Hillah, Lemlum, Korna, and Bussora. The scenery above Hit, in itself very picturesque, is greatly heightened by the frequent recurrence of ancient irrigating aqueducts, beautiful specimens of art, which are attributed by the Arabs to the Persians when fire-worshippers: they literally cover both banks, and prove that the borders of the Euphrates were once thickly inhabited by a highly civilized people. They are of stone. Ten miles below Hit is the last of these. The country now becomes flatter, with few hills; the river winds less; and the banks are covered with Arab villages of mats or tents, with beautiful mares, cattle, and numerous flocks of goats and sheep. From Hit to Babylon the black tent of the Bedouin is almost the only kind of habitation to be seen. This distance is cultivated only in part; the rest is desert, with the date-tree showing in occasional clusters. In descending, the irrigating cuts and canals become more frequent. Babylon is encircled by two streams, one above, the other below the principal ruin, beyond which they unite and produce abundance. For about thirty miles below Hillah both banks have numerous mud villages, imbedded in date-trees: to these succeed huts formed of bundles of reeds. The country lower down towards Lemlum is level, and little elevated above the river; irrigation is therefore easy: in consequence, both banks are covered with productive cultivation, and fringed with a double and nearly continuous belt of luxuriant date-trees, extending down to the Persian Gulf. At one mile and a half above the town of Devania is the first considerable deviation from this hitherto majestic river; another takes place 22 miles lower; and nine miles farther—at Lemlum—it again separates into two branches, forming a delta not unlike that of Damietta, and, when the river is swollen, inundating the country for a space of about 60 miles in width with a shallow sheet of water, forming the Lemlum marshes, nearly the whole of which is covered with rice and other grain the moment the river recedes (in June). Here mud villages are swept away by the water every year. Below Lemlum the Tigris sends a branch to the Euphrates, which is thus increased in its volume, and, turning to the east, receives the chief branch of the Tigris, thence running in one united stream, under the name of the *Shat-el-Arab*, as far as the sea (the Persian Gulf). In this last reach the river has a depth of from 3 to 5 fathoms, varies in breadth from 500 to 900 yards, and presents banks covered with villages and cultivation, having an appearance at once imposing and majestic. The length of that part of the river, reckoning from Bir to Bussora, navigable for large vessels at all times of the year, is 143 miles. It is very abundant in fish. The water is somewhat turbid, but, when purified, is pleasant and salubrious. The Ara-

bians set a high value on it, and name it *Morad-Su*; that is, Water of desire, or longing.

The annual inundation of the Euphrates occurs in the month of May. The river begins to rise in March, and continues rising till the latter end of May. The consequent increase of its volume and rapidity is attributable to the early rains, which, falling in the Armenian mountains, swell its mountain tributaries; and also, in the main, to the melting of the winter snows in these lofty regions. About the middle of November the Euphrates has reached its lowest ebb, and, ceasing to decrease, becomes tranquil and sluggish. The greatest rise of the Tigris is earlier, since it drains the southern flank of the great Armenian chain. The Tigris scarcely ever overflows [see HIDEKEL], but the Euphrates inundates large tracts on both sides of its course from Hit downwards. The great hydraulic works ascribed to Nebuchadnezzar (Abyden. *Fr.* 8) had for their great object to control the inundation by turning the waters through sluices into canals prepared for them, and distributing them in channels over a wide extent of country. "When the Euphrates," says Rich, "reaches its greatest elevation, it overflows the surrounding country, fills up, without the necessity of any human labor, the canals which are dug for the reception of its waters, and thus amazingly facilitates the operations of husbandry. The ruins of Babylon are then inundated, so as to render many parts inaccessible, the intermediate hollows being converted into marshes" (*Babylon and Persepolis*, p. 54). Raewolf observes, "The water of the Euphrates, being always troubled, and consequently unfit for drinking, is placed in earthen jars or pitchers for an hour or two, until the sand and other impurities sink to the bottom, where they are soon found lying to the thickness of a man's finger" (comp. Jer. ii, 18; xiii, 4-7). Mr. Ainsworth says, "The period at which the waters of the Euphrates are most loaded with mud, are in the first floods of January; the gradual melting of the snows in early summer, which preserves the high level of the waters, does not at the same time contribute much sedimentary matter. From numerous experiments made at Bir in December and January, 1836, I found the maximum of sediment mechanically suspended in the waters to be equal to one eightieth part of the bulk of fluid, or every cubic inch of water contained one eightieth part of its bulk of suspended matters; and from similar experiments, instituted in the month of October of the same year, at the issue of the waters from the Lemlum marshes, I only obtained a maximum of one two hundredth part of a cubic inch of water (mean temp. 74°). The sediments of the river Euphrates, which are not deposited in the upper part of the river's course, are finally deposited in the Lemlum marshes. In navigating the river in May, 1836, the water flowing into the marshes was colored deeply by mud, but left the marshes in a state of comparative purity" (*Researches*, p. 110, 111).

The Euphrates has at all times been of some importance as furnishing a line of traffic between the East and the West. Herodotus speaks of persons, probably merchants, using it regularly on their passage from the Mediterranean to Babylon (Her. i, 185). He also describes the boats which were in use upon the stream (i, 194), and mentions that their principal freight was wine, which he seems to have thought was furnished by Armenia. It was, however, more probably Syrian, as Armenia is too cold for the vine. Boats such as he describes, of wicker-work, and coated with bitumen, or sometimes covered with skins, still abound on the river (Chesney, *Euphrates*, ii, 639-651). Men wishing to swim across or along the stream simply throw themselves upon an inflated skin and thus float, precisely in the manner described by ancient writers, and depicted on the Assyrian sculptures (Botta, *Nineveh*, p. 238 sq.). Alexander appears to have brought to Babylon by the Euphrates route vessels of some considera-

ble size, which he had made in Cyprus and Phœnicia. They were so constructed that they could be taken to pieces, and were thus carried piecemeal to Thapsacus, where they were put together and launched (Aristobol. ap. Strab. xvi, 1, 11). The disadvantage of the route was the difficulty of conveying return cargoes against the current. According to Herodotus, the boats which descended the river were broken to pieces and sold at Babylon, and the owners returned on foot to Armenia, taking with them only the skins (i, 194). Aristobolus, however, related (ap. Strab. xvi, 3, 3) that the Gerrhæans ascended the river in their rafts not only to Babylon, but to Thapsacus, whence they carried their wares on foot in all directions. The spices and other products of Arabia formed their principal merchandise. On the whole, there are sufficient grounds for believing that throughout the Babylonian and Persian periods this route was made use of by the merchants of various nations, and that by it the east and west continually interchanged their most important products (see Layard's *Nineveh and Babylon*, p. 456, 457). Caravans were employed above Thapsacus (Heeren, *Asiatic Nations*, i, 429, 430). The emperor Trajan constructed a fleet in the mountains of Nisibis, and floated it down the Euphrates. The emperor Julian also came down the river from the same mountains with a fleet of not fewer than 1100 vessels. A great deal of navigation is still carried on from Bagdad to Hillah, the ancient Babylon, but the disturbed state of the country prevents any above the latter place. In the time of queen Elizabeth merchants from England went by this river, which was then the high road to India. There were anciently many canals which connected the Tigris with the Euphrates; many of them are still in being. The Euphrates steamer passed from the Euphrates to the Tigris by the Iva canal, which leaves the former a few miles above Felugo, and enters the latter a short way below Bagdad. The steam navigation of the Euphrates must be a question of considerable importance, and colonel Chesney has proved that it may be navigated as high as Bir by steamers drawing four feet of water; yet it can hardly be expected that it can ever be made available as an ordinary channel between Europe and India. Its navigation would undoubtedly confer the greatest advantages on the inhabitants of the vast and fertile countries through which it flows, should they once more be emancipated from the barbarism under which they have so long been oppressed.

3. See, for a general account of the Euphrates, colonel Chesney's *Euphrates Expedition*, vol. i.; and, for the lower course of the stream, compare Loftus's *Chaldea and Susiana*. See also Rawlinson's *Herodotus*, vol. i, Essay ix; and Layard's *Nineveh and Babylon*, chaps. xxi and xxii; Wahl's *Asien*, p. 700; Ritter's *Erdk.* ii, 120; *Traité Élément. Géographique* (Bruxelles, 1832), vol. ii; Mannert's *Geogr.* ii, 142; Reichard's *Kl. Geogr. Schrif.* p. 210; *Parliam. Rep. of Steam Navigation to India* (1834); McCulloch's *Geograph. Dict.* s. v.; Ainsworth's *Travels in Asia Minor*, etc. (1842); Ker Porter, *Travels*, ii, 403; Forbiger, *Alle Geographie*, ii, 69 sq.; Rosenmüller, *Alterth.* i, 188 sq.—Kitto, s. v.; Smith, s. v. See BABYLON.

**Euphrates**, bishop of Cologne, was the successor of bishop Maternus. He was present at the Synod of Sardica in 347, and was sent by the bishops of that synod with commendatory letters from the emperor Constance to the emperor Constantius to obtain the recall of the exiled catholic bishops. The report that a synod held at Cologne in 346 deposed Euphrates for not believing in the divinity of Christ is now generally regarded as spurious. The acts of this pretended synod were probably compiled in the eighth century, and are from beginning to end a forgery.—Wetzer und Welte, *Kirchen-Lexik.* xii, 241; Kettberg, *Kirchen-Geschichte Deutschlands*, vol. i. (A. J. S.)

**Eupo'emus** (Ἐπόλεμος, *good in war*, a frequent

Greek name), the "son of John, the son of Accos" (q. v.), one of the envoys sent to Rome by Judas Maccabæus, B. C. cir. 161, to negotiate an alliance with the Romans (1 Macc. viii, 17; Josephus, *Ant.* xii, 10, 6). He has been identified (Euseb. *Præp. Ev.* ix, 17 sq.) with the historian of the same name (Josephus, *Apion*, i, 23), who wrote several works on the affairs of the Jews (Kuhlmeijer, *Eupolemi fragmenta*, Berlin, 1840, 8vo); but it is by no means clear that the historian was of Jewish descent (yet comp. Jerome, *de Vir. Illustr.* 38). His father, John (q. v.), is spoken of as having procured special privileges for the Jews from the Syrian kings (2 Macc. iv, 11).

**Euroclydon** (Ἐυροκλύδων, q. d. *south-east billow*), the name given (Acts xxvii, 14) to the gale of wind in the Adriatic Gulf, which off the south coast of Crete seized the ship in which Paul was ultimately wrecked on the coast of Malta. See SHIPWRECK OF PAUL. The circumstances of this gale are described with much particularity, and they admit abundant illustration from the experience of modern seamen in the Levant. In the first place it came down from the island (*κατ' ἀντίε*), and therefore must have blown more or less from the northward, since the ship was sailing along the south coast, not far from Mount Ida, and on the way from Fair-Havens towards Phœnicæ. So Captain Spratt, after leaving Fair-Havens with a light southerly wind, fell in with "a strong northerly breeze blowing direct from Mount Ida" (Smith, *Voyage and Shipwreck of St. Paul*, 1856, p. 97, 245). Next, the wind is described as being like a *typhoon* (mod. *tuffone*, i. e. "striker") or whirlwind (*τυφονικός*, A. V. "tempestuous;" comp. *τυφών*, Aristot. *Meteor.* 1; *De Mundo*, iv, 18); and the same authority speaks of such gales in the Levant as being generally "accompanied by terrific gusts and squalls from those high mountains" (Conybeare, *Life and Epistles of St. Paul*, 1856, ii, 401). It is also observable that the change of wind in the voyage before us (xxvii, 13, 14) is exactly what might have been expected; for Captain J. Stewart observes, in his remarks on the Archipelago, that "it is always safe to anchor under the lee of an island with a northerly wind, as it dies away gradually, but it would be extremely dangerous with southerly winds, as they almost invariably shift to a violent northerly wind" (Purdy's *Sailing Directory*, pt. ii, p. 61). The long duration of the gale ("the fourteenth night," ver. 27), the overclouded state of the sky ("neither sun nor stars appearing," ver. 20), and even the heavy rain which concluded the storm (*τὸν ἕτερον*, xxviii, 2), could easily be matched with parallel instances in modern times (see Smith, *Voyage and Shipwreck*, p. 144; Conybeare, *Life and Epp.* ii, 412). We have seen that the wind was more or less northerly. The context gives us full materials for determining its direction with great exactitude. The vessel was driven from the coast of Crete to Clauda (xxvii, 16), and apprehension was felt that she would be driven into the African Syrtis (v. 17). Combining these two circumstances with the fact that she was less than half way from Fair-Havens to Phœnicæ when the storm began (v. 14), we come to the conclusion that it came from the N.E. or E.N.E., and hence might fitly be termed a *north-easter*. This is quite in harmony with the natural sense of Ἐυροκλύδων (Vulg. *Euro-aquilo*, i. e. north-east wind, the modern *Gregalia* of those seas), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but we are disposed to adhere to the received text, more especially as it is the more difficult reading, and the phrase used by Luke (*ὁ καλούμενος Ἐυροκλύδων*) seems to point to some peculiar word in use among the sailors. Alford thinks that the true name of the wind was *ευρακίλων*, but that the Greek sailors, not understanding the Latin termination, corrupted the word into *εὐροκλύδων*, and that so Luke wrote it (*Comment.* in loc.).—Smith, s. v. Such winds are known to modern mariners in the Mediterranean by

the name of *Levanter*. They are not confined to any single point, but blow in all directions from the north-east round by the north to the south-east. The "great wind" or mighty tempest experienced by the prophet Jonah on his way from Joppa to Tarshish (1, 4; comp. the destructive "east wind" of *Psa. xlviii, 7*) appears to have been one of these gales (comp. *Josephus, War, iii, 8, 3*, who calls it the "black north wind," *μελαμβόροτο*). See *WIND*.

**Europe**, the smallest, but also the most highly civilized and most populous of the three great divisions of the old continent.

I. It is separated from America on the west and north-west by the Atlantic; from Africa on the south by the Mediterranean; and from Asia by the Archipelago, Sea of Marmora, Black Sea, Caucasian ridge, Caspian Sea, Ural River and Mountains, and the Kara River. It is in the form of a huge peninsula, projecting from the north-west of Asia. Its extent from Cape St. Vincent on the south-west to the mouth of the Kara River on the north-east is 3400 miles; and from Cape Nordkun, the most northerly point of the Scandinavian main land, to Cape Matapan, the southmost point of Greece, 2400 miles. The continent of Europe, irrespective of islands, lies within lat.  $36^{\circ} 1' - 71^{\circ} 6' N.$ , and long.  $9^{\circ} 30' W. - 68^{\circ} 30' E.$  Its area is estimated at nearly 3,800,000 square miles; and its coastline, more extensive in proportion to its size than that of any other great natural division of the globe, is estimated at 19,500 miles, giving a proportion of 1 linear mile of coast for every 190 square miles of surface. It had in 1868 a population of 293,000,000, which gives an average of about 77 for every square mile.

II. *Church History*.—Europe early received the seed of Christianity from the apostles themselves. The territory embraced in what is now Turkey, Greece, and Italy was for many years the scene of the apostolic labors of Paul, who founded a number of churches, and wrote epistles to the Romans, Corinthians, and Thessalonians. Whether he visited Spain, England, and other countries of Europe, as has been asserted by some writers, is doubtful. Peter is claimed by the Roman Catholic Church to have been for twenty-five years bishop of Rome. The fact of his having been in Rome, and having presided for several years over the Church there, is generally recognised by most of the historians. The share of the other apostles in the Christianization of Europe is doubtful, and the accounts of their missionary labors rest more on legends than historic documents (see the articles on each of the apostles, and each of the European countries); but it is a well-established fact that, even before the close of the first century, numerous churches were established in Turkey, Greece, Malta, Italy, France, Spain, and Southern and Western Germany. The growing authority of the bishops of Rome [see *ROMAN CATHOLIC CHURCH*] soon made Europe the centre of the Christian world. When Constantine became a Christian, the Christianization of all that portion of Europe which belonged to the Roman empire made rapid progress, and was soon completed. In the fifth and sixth centuries, Spain, France, Scotland, England, and several German tribes became Christian. Christianity steadily advanced in all directions, but it was not until the sixteenth century that every pagan people of Europe had adopted the Christian doctrine. In the mean while, however, part of the Christian territory in Southern Europe had been conquered by the Mohammedans, who at one time even hoped for the conquest of all Europe. They lost, however, in the course of the following centuries, most of their conquests, retaining only the control of one empire in Eastern Europe. Thus Europe has been for many centuries a predominantly Christian division of the world, while of both Asia and Africa only small sections became Christian. The schism between the Greek and the Latin churches became complete in the ninth century,

and the ecclesiastical connection between Eastern and Western Europe has been interrupted ever since. Still greater became the alienation between the countries which adhered to the Reformation of the sixteenth century and those over which the Church of Rome retained control, and more than one destructive war grew out of this division. See *REFORMATION*; *PROTESTANTISM*.

III. *Ecclesiastical Statistics*.—The following tabular statement of the statistics of the Roman Catholic, Protestant, and Eastern churches, prepared by Prof. A. J. Schem, is taken from the *American Year-book* for 1869.

Countries.	Total Population.	Roman Catholic.	Protestant.	Eastern Churches.
Portugal. . . . .	3,937,861	4,340,000	7,000	
Azores and Madeira. . . . .	363,658			
Spain. . . . .	16,302,625	16,250,000	10,000	
Andorra. . . . .	12,000	12,000		
France. . . . .	38,067,094	36,000,000	1,600,000	
N. German Confed. . . . .	29,332,834	7,875,000	20,682,000	2,000
S. Germ. States	8,524,460	4,935,000	3,351,000	
Austria. . . . .	35,292,547	27,000,000	3,600,000	3,200,000
Italy. . . . .	24,308,787	24,000,000	60,000	
Papal States. . . . .	723,121	710,000	1,000	
San Marino. . . . .	5,700	5,700		
Monaco. . . . .	1,887	1,800		
Switzerland. . . . .	2,510,494	1,023,000	1,482,000	
Holland. . . . .	3,552,665	1,450,000	2,200,000	
Luxemburg. . . . .	296,574			
Belgium. . . . .	4,984,451	4,850,000	25,000	
Great Britain. . . . .	29,935,404			
Helligo'd, Gibraltar, and Malta. . . . .	163,683	6,100,000	23,400,000	
Denmark. . . . .	1,608,095			
Faro and Iceland. . . . .	75,909	1,000	1,075,000	
Sweden. . . . .	4,070,061		5,000	5,760,000
Norway. . . . .	1,701,478			
Turkey. . . . .	13,544,000			
Roumania. . . . .	3,864,848	700,000	50,000	12,500,000
Servia. . . . .	1,078,281			
Montenegro. . . . .	196,238			
Greece. . . . .	1,096,810	60,000	3,000	1,270,000
Ionian Islds. . . . .	251,712			
Russia. . . . .	67,260,431	6,763,000	4,122,000	52,810,000
Total. . . . .	293,083,708	142,717,500	68,028,000	69,782,000

It will be seen from the above table that the Eastern churches (or, more particularly, the Greek Church) prevail in Russia, Turkey, and Greece. In Turkey the government is Mohammedan, but the majority of the population belong to the Greek Church. The Roman Catholic Church prevails in Portugal, Spain, France, the South German States, Austria, Italy (inclusive of the Papal States, San Marino and Monaco), and Belgium, while Protestantism is the prevailing religion in the North German Confederation, Switzerland, Holland, Great Britain, Denmark, Sweden, and Norway. (A. J. S.)

**Eusebians**, a name given to the Arians from Eusebius of Nicomedia. See *EUSEBIUS OF NICOMEDIA*.

**Eusebius**, the only pope of this name, and, according to a tradition, the son of a physician, became bishop of Rome in 310, after the death of Marcellus. The time of his pontificate is variously stated at from four months to six years. No events of importance are recorded of his pontificate. According to an epitaph published by Baronius (but which Baronius himself refers, not to the pope, but to some priest of the same name), the *lapsi* (q. v.) in Rome demanded immediate absolution, which Eusebius refused. Tumult arose, in consequence of which Eusebius was exiled by the usurper Maxentius to Sicily. He is commemorated as a saint on the 26th of September. Several decrees circulating under his name, as well as three letters to the bishops of Gaul, to the Egyptians, and to the bishops of Tusciana and Campania, are spurious.—*Herzog, Real-Encyclopädie*, iv, 246; *Acta Sanct. ad 26 Septbr.*; *Pagi, Breviarum pontific. Roman.* (i, p. 65); *Bower, Hist. of the Popes*; *Ersch u. Gruber, Allgem. Encyclop.* (sect. i, vol. xl, p. 445).

**Eusebius of Alexandria.** I. In the Eastern churches, a number of homilies, ascribed to one Eusebius of Alexandria, enjoyed a great reputation, especially during the 6th and 7th centuries. They are either dramatic representations of the chief events in the life of Christ, or discussions of moral and practical questions. Their author is variously designated as monk, bishop, archbishop, or papa; most frequently bishop or archbishop of Alexandria. An ancient biography, published by cardinal Mai (*Spicil. Rom.* ix, p. 103), represents him as a sainted monk living near Alexandria, and endowed with the faculty of working miracles, who became successor of Cyril in the see of Alexandria, transferred his episcopal functions, after seven years (another reading says twenty years), to a noble Alexandrine named Alexander, and died in the retirement of a monastery. That this account is false we know from the list of bishops of Alexandria, which nowhere leaves room for a bishop Eusebius. According to Thilo (*Ueber die Schriften des Eusebius von Alexandria und des Eusebius von Emesa*, Halle, 1832), the author was either one of the four monks known in the Origenistic controversies under the name of the four "tall brothers," and distinguished among the monks of the Nitrian desert for piety and theological learning, or a presbyter at the court of Justinian I, who, honored with the title Papa, took an active part in the dogmatic controversies of the 6th century. Semisch (in Herzog's *Real-Encyklop.* s. v.) thinks that neither of those two men has all the qualifications which one would expect from the author of the Homilies. The only thing certain, in his opinion, is that the homilies were compiled in the 5th or 6th century. The number of homilies that are at present known is twenty-one. Some of them were published at Paris, 1575, and Antwerp, 1602. Augusti (*Euseb. Emes. quæ supersunt opuscula*, Elberfeld, 1829) wrongly attributed three of the homilies (of the dramatic class) to Eusebius of Emesa. Thilo, in the work already mentioned, combated the views of Augusti, and in an appendix published a revised text of four of the homilies, to which, in 1834, he added an edition of a new homily on astrology. His views were confirmed by cardinal Mai (*Spicil. Roman.* ix), who, from a Vatican manuscript, published a number of homilies for the first time. A homily on alms, which has never been printed, is to be found in the Vienna Imperial Library.—Herzog, *Real-Encyklop.* iv, 226; Fabricius, *Bibl. Græc.* (ed. Harles), vii, 409. (A. J. S.)

II. Eusebius, bishop of Laodicea, being a native of Alexandria, is sometimes called Eusebius of Alexandria.

**Eusebius**, with the surname **Bruno**, after 1047 bishop of Angers. Little is known of his early life. Soon after becoming bishop he was suspended with a number of other bishops, being suspected, it is thought, of simony. But he seems to have fully justified himself, for in 1049 he was present at the reformatory council of Rheims, and was chosen a member of the committee to welcome pope Leo IX in the name of the council. In a letter written from Rome (1049), he complained of the measures taken by the pope against Berengar, who, in his opinion, was free from any heresy. Berengar himself counted Eusebius among his patrons, and it was the advice of Eusebius which induced him to take, at the Synod of Tours in 1054, the oath which the synod demanded from him. One of the foremost opponents of Berengar, bishop Theotwin of Liege, calls Eusebius one of the chief renewers of the heresy which finds in the Lord's Supper nothing but a shadow and an image of the body of Christ. But when count Geoffroi of Anjou, the powerful protector of the French heretics, died (1060), the courage of Eusebius was at an end. At the Episcopal Convention of Angers in 1062 he showed an inclination to accept the doctrine of the Church, though he still made a profession of personal friendship for Berengar. The

same indecision shows itself in the celebrated letter, written between 1063 and 1066, in which Eusebius declines to act as arbiter at a theological disputation which Berengar desired to hold with the priest Gaurid Martini, and defines his dogmatical position. The letter (which is regarded by Lessing as the ablest theological essay of the 11th century) deprecates new dogmatic explanations concerning the Eucharist, and declares that we ought not to appeal to the fathers, but to adhere to Scripture, and abide by the simple words that the bread and wine are the true body and blood of Christ as a duty of pious faith. The letter may be found in Menardus (*Augustini c. Juliani operis imperfecti l. 2 priores*), with arbitrary alterations in De Roye (*Vita, hæres. et poenit. Berengar.*), and Boulay (*Hist. Univer. Paris*). Two other letters of Eusebius are given by Sudendorf (*Bereng. Turon.* 1850). Eusebius died at Angers Aug. 27, 1061.—*Real-Encyklop.* iv, 228; Lessing, *Werke* (edit. Lachmann), vol. viii; Hofer, *Nouv. Biog. Génér.* xvi, 778; Neander, *Church History* (Torrey), iii, 576; Neander, *Hist. of Dogmas* (Ryland), ii, 462. (A. J. S.)

**Eusebius of Cæsarea**, the "father of Church history," was born about 270. The place of his birth is not certainly known, but it is supposed to have been Cæsarea in Palestine. Coming to Antioch towards the end of the 3d century, he there studied the Scriptures under Dorotheus (Eusebius, *H. E.* vii, 32). On his return to Cæsarea he was ordained by Agapius, then bishop of that place. Here he became intimate with Pamphilus, a learned presbyter, who was head of a divinity school at Cæsarea, and who had gathered many books illustrative of Scripture and theology, especially the writings of Origen. This friendship was lifelong, and from it Eusebius took the name *Ἐπισκοπικός* (*ὁ φίλος*) *τοῦ Παμφίλου*, Eusebius Pamphili. It was probably under Pamphilus that Eusebius imbibed his fondness for the writings of Origen. During the persecution by Dioclesian, Pamphilus was imprisoned, and finally died a martyr (A. D. 309). Eusebius taught in the school of Pamphilus for years, but during the persecution he went to Tyre and to Egypt, where he himself was imprisoned as a confessor, and where he witnessed the sufferings of the faithful described in his *Church History* (bk. viii, c. 7, 9). Epiphanius (*Hæc.* lxxviii, 7) tells us that Eusebius was charged at the Synod of Tyre (A. D. 335, where he sided against Athanasius), by Potamon, bishop of Hæraclea, with having shown cowardice during the persecution in Egypt, and even with having offered incense to idols. But the charge doubtless arose from party feeling, as it is not likely that he could, with such a character, have been made bishop in that age. In 313 or 315 he was chosen bishop of Cæsarea, which see he administered with eminent success for twenty-five years.

The part taken by Eusebius in the Arian controversy has been the subject of much dispute. When Arius was deposed by Alexander, he enlisted numerous bishops in his behalf, especially Eusebius of Nicomedia, namesake and friend of Eusebius of Cæsarea; and the latter wrote to Alexander, bishop of Alexandria (two letters, of which fragments are extant), aiming, not to settle the doctrinal dispute, but rather to show that the views of Arius were misrepresented. He sought to reconcile the contending parties, and this conciliatory, if not compromising temper, characterized Eusebius through life. See **ARIUS**; **ATHANASIUS**. The part taken by Eusebius in the Council of Nicea (Nice, A. D. 325) is described by Valesius (Introduct. to his edit. of Eusebius) as follows: "In this greatest and most celebrated council, Eusebius was far from an unimportant person; for he both had the first seat on the right hand, and in the name of the whole synod addressed the emperor Constantine, who sat on a golden chair, between the two rows of the opposite parties. This is affirmed by Eusebius himself (*Life of Constantine*), and by Sozomen (*Eccl. Hist.*). Afterwards, when there

was a considerable contest amongst the bishops relative to a creed or form of faith, Eusebius proposed a formula at once simple and orthodox, which received the general commendation both of the bishops and of the emperor himself. Something, notwithstanding, seeming to be wanting in the creed, to confute the impuety of the new opinion, the fathers of the Nicene Council determined that these words, 'VERY GOD OF VERY GOD; BEGOTTEN, NOT MADE; BEING OF ONE SUBSTANCE WITH THE FATHER,' should be added. They also annexed anathemas against those who should assert that the Son of God was made of things not existing, and that there was a time when he was not. At first, indeed, Eusebius refused to admit the term *ὁμοούσιος*, but when the import of that word was explained to him by the other bishops he consented, and, as he himself relates in his letter to his diocese at Cæsarea, subscribed to the creed (Socrates, *H. E.* i, 8). Some affirm that it was the necessity of circumstances, or the fear of the emperor, and not the conviction of his own mind, that induced Eusebius to subscribe to the Nicene Council. Of some present at the synod this might be believed, but we cannot think it of Eusebius, bishop of Cæsarea. After the Nicene Council, too, Eusebius always condemned those who asserted that the Son of God was made of things not existing. Athanasius likewise affirms the same concerning him, and, though he frequently mentions that Eusebius subscribed to the Nicene Council, nowhere intimates that he did it insincerely. Had Eusebius subscribed to that council, not according to his own mind, but fraudulently and in pretence, why did he afterwards send the letter we have mentioned to his diocese at Cæsarea, and therein ingenuously profess that he had embraced the faith which had been published in the Nicene Council?" (For details, see Socrates, *Hist. Eccl.* i, 8, 9.)

After the deposition of Eustathius (q. v.), A.D. 331, the see of Antioch was offered to Eusebius, but he declined the honor, probably in fear of tumult, and even bloodshed, from the excited state of the popular mind in Antioch. The conduct of Eusebius in this case greatly gratified the emperor Constantine, who wrote him a letter praising his prudence, and saying that he was worthy of being bishop, "not of the city merely, but of almost the whole world" (Socrates, *H. E.* i, 24). In the later course of the Arian dispute, Eusebius, though theoretically orthodox, substantially acted with the Arians to a great extent. Even in his *Church History* he avoids even mentioning the controversy, ending his book with A.D. 324. He presided at the Council of Tyre, A.D. 335 (Epiphanius, *Her.* lxxviii, 7), summoned for the trial of Athanasius, and joined in the condemnation of that great man (see art. ATHANASIVS, vol. i, p. 505). The prelates assembled at Jerusalem, and deputed Eusebius to the emperor Constantine, to obtain his approval of their decision, and he seems to have used his influence with the emperor to secure both the recall of Arius and the exile of Athanasius.

In his last years Eusebius lived in close intimacy with the emperor Constantine, who cherished the warmest esteem and affection for him. In A.D. 336 Eusebius wrote his *Panegyric on Constantine*. The emperor had assigned him the task of superintending the transcription of fifty copies of the Scriptures on parchment, for the use of the churches of Constantinople. This was the last literary labor in which he was engaged (*Vita Constant.* iv, 35) before his death, which took place A.D. 340.

From the general tenor of his life as sketched above, it is not to be wondered that Eusebius has been charged with a leaning towards Arianism. "So thought, among the ancients, Hilary, Jerome (who otherwise speaks favorably of Eusebius), Theodoret, and the second Council of Nicea (A.D. 787), which unjustly condemned him, even expressly, as an Arian heretic; and so have thought, among moderns, Baroni-

us, Petavius, Clericus, Tillemont, Gieseler; while the Church historian Socrates, the Roman bishops Gelasius and Pelagius II, Valesius, G. Bull. Cave (who enters into a full vindication, vol. i, p. 111), and Samuel Lee (and most Anglicans), have defended the orthodoxy of Eusebius, or at least mention him with very high respect. The Gallican Church has even placed him in the catalogue of saints. Athanasius never expressly charges him with apostasy from the Nicene faith to Arianism, or to semi-Arianism, but frequently says that before 325 he held with Arius, and changed his opinion at Nicea. This is the view of Möhler also (*Christology*, i, 792) inaccurately reckons among the opponents of the orthodoxy of Eusebius. The testimonies of the ancients for and against Eusebius are collected in Migne's edition of his works, tom. i, p. 68-98. Among recent writers, Dr. Samuel Lee has most fully investigated the orthodoxy of Eusebius in the preliminary dissertation to his translation of the Theophania from the Syriac, p. xxiv-xxcix. He arrives at the conclusion (p. xcvi) 'that Eusebius was no Arian, and that the same reasoning must prove that he was no semi-Arian; that he did in no degree partake of the error of Origen, ascribed to him so positively and so groundlessly by Photius.' But this is merely a negative result."—Schaff, *Hist. of the Christian Church*, ii, 874. Compare also Dupin, *Ant. Eccl.* (Paris, 1683), ii, 1-15.

It is in the field of Church history that the merits and services of Eusebius stand pre-eminent among early writers. He had large acquaintance with both Christian and pagan learning, and used it, if not with critical or philosophical skill, yet with patient industry and with literary integrity. He was the first to collect the scattered annals of the first three centuries of the Church in his *Ecclesiastical History*, the most important of all his writings, which traces the history of Christianity from the advent of the Messiah to the defeat of Licinius, A.D. 324. In this work he rejects, with greater care than is usually attributed to him, the doubtful facts and the fabulous narratives. And this is not his only merit. A living sympathy with the fortunes of Christianity, and earnest admiration for the heroism of its martyrs and confessors, inspires him throughout. "Others," he says in the beginning of the fifth book, "that compose historical narratives, would record nothing but victories in battle, the trophies of enemies, the warlike achievements of generals, the bravery of soldiers, sullied with blood and innumerable murders, for the sake of children, and country, and property. But our narrative embraces that conversation and conduct which is acceptable to God—the wars and conflicts of a most pacific character, whose ultimate tendency is to establish the peace of the soul." In Dr. Schaff's opinion (*Ch. Hist.* iii, 877), the *Church History* of Eusebius "gives a colorless, defective, incoherent, fragmentary, yet interesting picture of the heroic youth of the Church, and owes its incalculable value not to the historic art of the author, but almost entirely to his copious and mostly literal extracts from foreign, and, in some cases, now extinct sources."

In the 8th book of the *Ecclesiastical History* (c. ii) Eusebius states that it is no part of his plan to relate all the wickedness and dissensions of the Christians before the persecution, or to name those who were untrue to the faith; adding, "we shall only, upon the whole, introduce those events into our history that may be profitable first to us of the present day, and hereafter to posterity." In the *Martyr. Palestin.* (ch. xii) he states as a historical principle that the "events most suitable to be recorded in a history of the martyrs are those which redound to their honor." Gibbon (*Decline and Fall*, ch. xvi) remarks that "such an acknowledgment will naturally excite a suspicion that a writer who has so openly violated one of the fundamental laws of his-

tory has not paid a very strict regard to the observance of the other." Certainly it was an error of judgment in Eusebius to hold back anything in his accounts. The Scripture might have taught him better; it does not omit the faults of patriarchs or saints. If nothing, moreover, is to be told of martyrs but "what redounds to their honor," one's admiration of these honorable facts must be lessened by the fear that what is kept back might counterbalance what is told. The principle of Eusebius is here historically bad. But Gibbon attacks Eusebius still more strongly in his *Vindication of Chapters xv and xvi* of his history. Eusebius gives as the title of ch. xxxi, bk. xii, of the *Preparat. Evang.*, the question "How far it may be lawful to use falsehood as a medicine for the benefit of those who need such a procedure?" He begins the chapter with a citation from Plato (*De Legibus*, ii), as follows: "A legislator of any value, even if the fact were not such as our discourse has just established it, if in any case he might make bold to deceive young persons for their advantage; could he possibly inculcate any falsehood more profitable than this, or more potent to lead all without force or compulsion to the practice of all justice? 'Truth, my friend, is honorable and permanent; but not, it would seem, very easy of persuasion.' To this passage of Plato, Eusebius adds: "You may find a thousand such instances in the Scriptures, where God is described as jealous, or sleeping, or angry, or liable to other human affections, so expressed for the advantage of those who require such a method (ἐπ' ὀφελεία τῶν δεομένων τοῦ τοιοῦτου τρόπου)." This is all that is said on the subject, and it may be interpreted to mean nothing more than that one's statements must be adapted to the understanding of his hearers or readers. But the use of the word "falsehood" in the heading of the chapter shows that, in the mind of Eusebius, either there was no just appreciation of the difference between "falsehood" and "accommodation," or else that his moral sense as to veracity had been vitiated by the ecclesiastical casuistry which even in his time had begun to show itself. It is easily to be seen, however, that Gibbon really misleads his readers by his statement of the case: "In this chapter," says he, "Eusebius alleges a passage of Plato which approves the occasional practice of pious and salutary frauds; nor is he ashamed to justify the sentiments of the Athenian philosopher by the example of the sacred writers of the Old Testament." This is not warranted by the passage, which is fully cited above. We adopt, nevertheless, the remark of Waddington (*History of the Church*, ch. vi, ad fin.): "It was disgraceful to the less enlightened fathers of the second and third centuries that, even in the midst of trial and tribulation, they borrowed a momentary succor from the profession of falsehood; but the same expedient was still more shameful to Eusebius, who flourished during the prosperity of the Church, whose age and more extensive learning left him no excuse in ignorance or inexperience, and whose great name and unquestionable piety gave sanction and authority to all his opinions. There can be no doubt, then, that the publication of that detestable principle in any one of his writings, however modified and limited by his explanation, must to a certain extent disturb our confidence in the rest; the mind which does not profess to be constantly guided by truth possesses no claim to our implicit submission. Nevertheless, the works of Eusebius must at last be judged by the character which severally pervades them, not by any single principle which the author has once only laid down, to which he has not intended (as it would seem) to give general application, and which he has manifestly proposed rather as a philosophical speculation than as a rule for his own composition. At least we feel convinced that whoever shall calmly peruse his *Ecclesiastical History* will not discover in it any deliberate intention to deceive; in the relation of miraculous stories he is more

sparing than most of the Church historians who succeeded him, and seemingly even than those whom he has copied; and, upon the whole, we shall not do him more than justice if we consider him as an avowed but honest advocate, many of whose statements must be examined with suspicion, while the greater part bear direct and incontestable marks of truth."

Of his *Chronicon* it has also been justly asserted, "that for centuries it was the source of all synchro-nical knowledge of history in the Greek, Latin, Oriental, and Christian world, everywhere translated, continued, excerpted, and made the basis of the different works on this subject." His panegyric writings on Constantine, however, afford, with much that is commendable and historically useful, abundant proofs of the weakness of his moral fibre, and of his sycophancy in dealing with the emperor. But it is to his credit that he never used his influence at court for merely personal ends. When Constantine on one occasion at Caesarea asked Eusebius to demand a favor for his Church, he declared "his Church was not in need of any favors. The only boon he asked was permission to use the public archives to enable him to write a history of the martyrs, which favor was readily granted him" (Jerome, *Ep. ad Chromatium et Heliodorum*; comp. Hefele in the *Freib. Kirchen-Lex.* vi, 135 et sq.). Less important than the historical works of Eusebius, but nevertheless very meritorious, are his *Apologetical* writings, the most extensive in ancient apologetics. His notices of the oldest mythologies in the *Preparatio Evangelica* are a valuable storehouse for theologians and philologists. In the field of doctrinal theology (*contra Marcellum*) the writings of Eusebius appear to less advantage than in any other. They touch upon the great question of his time, the Person of Christ. In these writings, as in his practical life, he appears to waver between orthodoxy and subordinationism.

The writings of Eusebius are here classified as A. Historical; B. Apologetic; C. Dogmatic; D. Exegetical.

A. *Historical*.—1. The *ἱστορία ἐκκλησιαστικῆ, Ecclesiastical History*, in ten books, beginning with the incarnation of Christ, relates the history of the Church, including accounts of writers, martyrs, persecutions, etc., up to A.C. 324. It was probably composed before the Nicene Council (325), as, near its close, Crispus, the eldest son of Constantine, is very favorably mentioned, which could hardly have happened after the execution of Crispus (325). The best editions of the *History*, with the Greek text, are Valesius, with life of Eusebius prefixed (Par. 1659-1673, 3 vols. fol., often reprinted); Reading's edition of Valesius's Eusebius (Gr. and Lat.), with the fragments of Theodoret, Evagrius, and Philostorgius (Camb. 1720 and 1746, 3 vols. fol.); Zimmermann, *Hist. Eccles.* (Frankfort, 1822, Gr. and Lat., 2 vols. 8vo); Heinichen, *Hist. Eccles.*, Reading's edition of Valesius, with Stroth's notes, and additional notes and indices by the editor (Leips. 1827-8, 3 vols. 8vo; also see below); Burton, *Hist. Eccles.* (Gr.) (Oxon, 1838, 1845, 1856, 8vo), also *Annotations Variorum*, 2 vols. 8vo (Oxon, 1842, 2 vols. 8vo); cheap edition by Schwegler (Tübing. 1852, 8vo); Laemmer, *Hist. Eccles.*, cum tabulis specimen cod. vii cont. (Schaffhausen, 1862, large 8vo, pp. 836, with tables in fol.).

*English Translations*.—Hammer, *Ch. History of Eusebius, Socrates, and Evagrius, with the Life and Panegyric of Constantine* (Cambridge, 1577, and often, fol.); the same, with Saltonstall's translation of *The Life of Constantine* (1650, fol.; 1663, fol.); Wells (based on the preceding, 1709, fol.); Parker's abridged (Lond. 1729, 4to); best translation, Cruse's (with Boyle's *Council of Nice*, Philadelphia, 1846; 10th ed. N. Y. 1856, 8vo; also in Bohn's *Ecclesiastical Library*, Lond. 12mo; and in Bagster's *Greek Eccl. Historians*, Lond. 1843, 8vo).

*German Translations.*—Hedion (Strasb. 1545, fol.); Stroth (Quedlinburg, 1777, 3 vols. 8vo); Closs (in two editions, one for Romanists, the other for Protestants, Stuttgart, 1839, 8vo). *French translation* by Cousin (Paris, 1675, and often). On the Moscow MS. of the *Ecl. Hist.*, see *Zeits. Hist. Theol.* 1861, p. 311, and *Theolog. Stud. u. Krit.* 1858, heft iii.

2. The *χρονικῶν κανόνων παντοδαπῆ ἱστορία*, generally called *Chronicon*, lib. ii, is an abridgment of the history of the world from its creation up to A.D. 325, with chronological tables, in which the chronography of Julius Africanus is largely made use of. For the arbitrary changes made by Eusebius in the text of Africanus, see Brunet de Presle, *Dynasties Egyptiennes* (Paris, 1850, 8vo). Of this chronicle there remain fragments in Greek and two translations: one in Latin by Jerome, and one in Armenian. The latter was first edited by Zohrab (Milan, 1818), Latin, by A. Mai; better ed. by Aucher (Lat. version from the Armenian, with the Greek fragments, Venet. 1818, 4to; reprinted in Migne, *Patrol. Grec.* tom. xix); new edition by Schöne (the Armenian translated by Petermann and Rödiger, Berlin, 1866).

3. *The Life of Constantine*, εἰς τὸν βίον Κωνσταντίνου τοῦ βασιλέως λόγος iv; de vita Constantini, lib. iv; generally printed with the *Ecclesiastical Hist.* (see above); also separately, ed. by Heinichen, with Reading's and Stroth's notes, etc. (Leipsic, 1829, 8vo); English translation in Bohn's *Eccles. Library* (London, 12mo).

4. *Panegyric on Constantine*, εἰς Κωνσταντίνου τριακόντα ετήριος, an oration in praise of Constantine on the thirtieth anniversary of his accession; generally printed with the *Church History*; also in Heinichen's *Life of Constantine* (see above, §).

5. *Σύγγραμμα περὶ τῶν κατ' αὐτὸν μαρτυρισάντων*, de martyribus Palestine; really, de martyribus suis temporis; containing reports of numerous martyrs of the Diocletian persecution (A.D. 303-310), printed as an appendix to the eighth book of the *Eccles. History*; specially interesting is Cureton's *History of the Martyrs of Palestine*, by Eusebius, discovered in a very ancient Syrian MS., and transl. into English (Lond. 1860, 8vo); given also in Migne, *Patrol. Grec.* tom. xx.

6. The *Acta St. Pamphili et sociorum* (on the martyrdom of his teacher Pamphilus) is only a fragment of a work on the life of Pamphilus, in three books, which seems to have been lost.

B. *Apologetic*.—1. The *Preparation of the Gospel History*, προπαρασκευὴ εὐαγγελικῆ, preparatio evangelica, in fifteen books. In the first six books Eusebius vindicates Christianity by extracts from Grecian and Roman writers, and by criticisms on them and on the Phœnician and Egyptian mythologies and worship. In books 7-15 he treats of Judaism, its religion, history, and institutions, showing its superiority to heathenism. The work pictures the condition of the world previous to the advent of Christ. Ed. by Rob. Stephens (Gr. 1544), and with Latin version by Viger (Paris, 1628, Cologne, 1688); ed. by Heinichen (Lips. 1842-3, 2 vols. 8vo); ed. by Gaisford (Oxf. 1843, 4 vols. 8vo); also in Migne, *Patrol. Grec.* t. xxi. Cumberland translated Sanchoniathon's *Phœnician History* from bk. i of the *Præp. Evang.* (Lond. 1720, 8vo).

2. The *Evangelical Demonstration*, ἀπόδειξις εὐαγγελικῆ, demonstratio evangelica, in twenty books, of which only ten remain. Eusebius wrote in order to prove that the Christian religion is demonstrably true, from its internal character, and from the fulfilment of the Jewish prophecies. He points out the true relations between Judaism and Christianity, and the provisional character of the latter; and in books 3-10 he comments on the Messianic prophecies. This work is intended to be the complement of the *Præp. Evang.* (see above). Translated into Latin by Donatus of Verona, and published either at Rome or Venice in 1498, and at Cologne in 1542. The Greek text appear-

ed, with that of the *Preparatio*, at Paris in the editions both of Robt. Stephens and Viger (see above, 1); also separately by Stephens (Paris, 1545, fol.), edited by Gaisford (Gr. and Latin, Oxford, 1852, 2 vols. 8vo); abridged German version in Rössler, *Bibl. der Kirchenväter* (1778, 8vo), v, 203 sq.

3. Of a similar character are (a) the ἐκλογαὶ προφητικαί, *Eloge Propheticæ*, of which four books only are preserved. They give mostly allegorical interpretations of Old-Test. Messianic passages (edited by Gaisford, Oxon. 1842, 8vo; also in Migne, *Patrologia Græc.*). (b) The five books of *The Theophany*, Θεοφάνεια, preserved in a Syriac translation, long lost, but discovered by Tattam in 1839 in a Nitrian monastery, and published under the title *Eusebius on the Theophania, or divine Manifestation of our Lord and Saviour Jesus Christ, translated from an ancient Syriac Version of the Greek Original now lost, with Notes, and a Vindication of the Orthodoxy and prophetic Views of the Author*, by Prof. S. Lee (Camb. 1843, 8vo). Dr. Lee assigns the MS. (now in the British Museum) to the year A.D. 411. The Greek fragments, with Lat. version, compared also with Lee's edition, are given in Migne, *Patrol. Grec.* xxiv, 607 sq. See a full treatment of this subject in Ceillier, *Aut. Sacr.* (Par. 1865, 8vo), p. 258 sq.

4. The small work, *Against Hierocles*, πρὸς τὰ ὑπὸ Φιλοστράτου εἰς Ἀπολλώνιον τὸν Τυανῆα διὰ τὴν Ἱεροκλεῖ παραληφθεῖσαν αὐτοῦ τε καὶ Χριστοῦ σύγκρισιν, generally cited *Adversus Hieroclem*, shows very ably that the magician and philosopher Apollonius of Tyana cannot bear comparison with Christ. It is to be found in Morell's *Philostratus* (Gr. and Lat., Paris, 1608); edited, with new transl. and notes, by Olearius (Leips. 1709); and, with the *libri contra Marcellum*, ed. by Gaisford (Oxon, 1852, 8vo); also in Migne, *Patrol. Grec.* xxii, 795 sq.

C. *Dogmatical and Polemical*.—1. Two books, κατὰ Μαρκέλλον, contra Marcellum, written by desire of the Council of Constantinople (held A.D. 336) to vindicate the condemnation of Marcellus for Sabellianism by that council (see Hefele, *Concilieneschichte*, vol. i, § 51). It is given in Viger's ed. of the *Præp. Evang.* (1628 and 1688); also in Gaisford's edition of the *Liber cont. Hieroclem* (Oxon, 1852, 8vo); and in Migne, *Patrol. Grec.* xxiv, 707.

2. The three books, *Of the Ecclesiastical Theology*, περὶ τῆς ἐκκλησιαστικῆς Θεολογίας, De ecclesiastica theologia, are likewise intended against Marcellus, as evangelogia here means sermo de Filio Dei ejusque natura divina, with a biblico-dogmatical proof of the hypostatical existence of the Son. It is given (Greek and Latin) by Retberg (Göttingen, 1794); in *Cont. Hieroclem*, ed. by Gaisford (Oxon, 1852, 8vo); and in Migne, *Patrol. Grec.* xxiv, 826 sq.

3. The short treatise, περὶ τῆς τοῦ πάσχα ἱορτῆς, De solemnitate paschali, treats of the typical character of the Jewish Passover, and of its consummation in the new covenant. It is in Migne, *Patrologia Græc.* xxiv, 694 sq.

4. Fourteen smaller treatises, among which the most important are, *De fide adv. Sabellium*, *De resurrectione*, *De incorporati anima*; quod Deus Pater incorporalis sit, which remain only in Latin, and are all contained in Migne, *Patrologia Græca*, tom. xxiv.

D. *Ezegetical*.—These are partly introductory, partly commentaries, written upon the allegorical method of Origen, and without any knowledge of Hebrew. (1) The *Onomasticon*, or περὶ τῶν τοπικῶν ὀνομάτων ἐν τῇ Σεία γραφῆ, De locis Hebraicis, a topographical and alphabetical index of the names of places occurring in the Bible. It was translated into Latin by Jerome, and edited in Greek by Bouffrierus (Paris, 1631 and 1659, fol.); Gr. and Lat. in Hieron. *Opera*, t. ii (Paris, 1699); by Clericus (Amst. 1707, fol.); by Larsson and Parthey (Berlin, 1862, 8vo).

2. *Evangelicæ canonæ*, a kind of Gospel harmony, to

be found in the editions of the N. T. by Erasmus, Stephens, and Mill; also in Migne, *Patrolog. Græc.* xxii, 1273 sq.

3. *Ἐπιτομὰ καὶ λύσεις, Questiones evangelicæ*, in three books, containing solutions of seeming contradictions of the evangelists; edited by Mai in his *Coll. Script. Vet.* (1825, 4to), i, 101 sq.

4. *Commentaries on the Psalms and On Isaiah*, which are preserved to a great extent, and given in Migne, *Patrol. Græca*, tom. xxiv and xxv. Of his commentary on *Solomon's Song*, *Proverbs*, *Daniel*, and *Luke*, only fragments are left us, which are given in Migne, *Patrol. Græc.* tom. xxiv, who prints also Mai's newly-discovered fragments from his *Nov. Patr. Bibliotheca*, vol. iv.

There is no absolutely complete edition of the works of Eusebius. The nearest to such are Eusebii Pamphili *Opera Omnia*, Lat. (Basil. 1542, 4 vols. fol.; 1559, 2 vols. fol.; Paris, 1581, fol.); most complete of all (following Valesius, Montfaucon, Mai, and Gaisford), Migne, *Patrol. Græc.* vols. xix-xxiv. A new edition of the *Scripta Historica*, by Heinichen, was begun in 1837 (vol. i, 8vo, the *Hist. Eccles.*); and of the *Opera Omnia* by Dindorf (Leipsic, 1865-67, vols. i-iii, 8vo).

See Cave, *Hist. Lit.* i, 111; Dupin, *Auteurs Eccl.* ii, 1-15; Fabricius, *Bibl. Græca*, ed. Harles, vii, 335 sq.; Oudin, *Script. Eccles.* i, 312 sq.; Lardner, *Works*, iv, 69 sq.; Hoffmann, *Biblog. Lexikon*, i, 98 sq.; Ceillier, *Auteurs Sacrés* (Paris, 1865), iii, 168 sq.; Neander, *Ch. History*, Torrey's transl., ii, 367, 383; Jortin, *Remarks on Eccles. Hist.* (London, 1767), ii, 252; Waddington, *Church History* (in 1 vol.), ch. vi; Schaff, *History of the Christian Church*, vol. iii, § 161; Alzog, *Patrologie*, § 44; Lardner, *Works*, iv, 69; Hefele, *Conciliengesch.* i, 233 et al.; Dowling, *On the Study of Eccles. Hist.* p. 13 sq.; Kestner, *De Fide Eusebii* (Göttingen, 1817); Baur, *Comp. Euseb. cum Herodoto* (Tübing. 1834, 12mo); Hännell, *De Eusebio Relig. Christ. Defensore* (Götting. 1843); Lamson, *Church of the First Three Centuries*, 233 sq.; Dorner, *Person of Christ* (Edinb. transl.), div. i, vol. ii, 218 sq.; Waterland, *Works*, ii, 475 sq.

**Eusebius of DORYLÆUM**, born at the end of the fifth century, began his public life as a lawyer, and obtained the place of imperial commissioner (*agens in rebus*). Evagrius (*Hist. Eccles.* i, 9) says of him that, "while still practising as a rhetorician, he was the first to expose the blasphemy of Nestorius." It seems to have been he who interrupted Nestorius in a sermon about A. D. 430 (when he denied to Mary the title *θεοτόκος*), by crying aloud "No; the eternal Logos himself subjected himself to a second birth." This, at least, is the conclusion of Neander (*Church History*, Torrey's transl., ii, 504). He also thinks it probable that Eusebius was the author of the formal complaint publicly posted against Nestorius in the church of Constantinople, comparing him to Paul of Samosata (Neander, *l. c.*). It is possible that it was as a reward for this zeal that he was made bishop.

At all events, he entered into orders, and became bishop of Dorylæum, in Phrygia. In the year 448, at the *Home Council* (*σύνδος ἐνὶ οἴκῳ*), held at Constantinople, he entered complaint against Eutyches (whom he had previously warned privately), as holding false and blasphemous doctrines, contrary to the fathers, as to the person of Christ (Mansi, *Concil.* vi, 495, 650). See **EUTYCHES**. At this synod Eutyches was condemned, but in the next year, at the Robber-Council (see **EPHESUS, ROBBER-COUNCIL OF**), Eutyches was restored, and Eusebius condemned and deprived of his see. When he attempted at this council to explain the doctrine of two natures in Christ, voices exclaimed, "Burn Eusebius! As he has cut Christ asunder, so let him be cut asunder." He fled to Rome. The tide was turned by the death of Theodosius, A. D. 450. Leo the Great, bishop of Rome, prevailed upon Marcian, the successor of Theodosius, to convene another general council, which met at Chalcedon A. D.

451, and Eusebius was restored to his see. A few polemical writings of Eusebius are still extant, as *Conservatio adversus Nestorium* (in the works of Marius Mercator, ii, p. 18):—*Libellus adversus Eutycheten* (in Labbe, vol. iv, p. 151):—*Libellus adversus Dioscurum* (ib. vol. iv, p. 380):—*Epistola ad Marcianum imperatorem* (ib. p. 95).—Neander, *Ch. Hist.* ii, 505-513; Hofer, *Nouv. Biog. Génér.* xvi, 777.

**Eusebius**, bishop of Emesa, fourth century. Sozomen (*Hist. Eccles.* ii, 9) gives the following account of him: "Who this person was, George, bishop of Laodicea, who was present on this occasion, informs us; for he says, in the book which he has composed on his life, that he was descended from a noble family of Edessa, in Mesopotamia, and that from a child he had studied the Holy Scriptures; that he was afterwards instructed in Greek literature by a master resident at Edessa; and finally, that the sacred books were expounded to him by Patrophilus and Eusebius, the latter of whom presided over the church at Cæsarea, and the former over that at Scythopolis. Having afterwards gone to Antioch, about the time that Eustathius was deposed on the accusation of Cyrus of Beroea for holding the tenets of Sabellius, he lived on terms of familiar intercourse with Euphronius, that prelate's successor. When, however, a bishopric was offered him, he retired to Alexandria to avoid the intended honor, and there devoted himself to the study of philosophy. On his return to Antioch he formed an intimate acquaintance with Placitus or Flaccillus, the successor of Euphronius. At length he was ordained bishop of Alexandria by Eusebius, bishop of Constantinople, but did not go thither in consequence of the attachment of the people of that city to Athanasius. He was therefore sent to Emesa, where the inhabitants excited a sedition on account of his appointment, for they reproached him with the study and practice of judicial astrology; whereupon he fled to Laodicea and abode with George, who has given so many historical details of him. George, having taken him to Antioch, procured his being again brought back to Emesa by Flaccillus and Narcissus; but he was afterwards charged with holding the Sabellian heresy. His ordination is elaborately described by the same writer, who adds at the close that the emperor (Constantius) took him with him in his expedition against the barbarians, and that miracles were wrought by his hand" (see also Sozomen, *Hist. Ecclesiast.* iii, 6). During the latter years of his life he lived at Antioch, devoted to study. He died at Antioch about A. D. 360. Among the numerous works of Eusebius, Jerome mentions treatises against the Jews, the Pagans, and Novatians; a Commentary, in 10 books, to the Epistle to the Galatians, and Homilies on the Gospels. Theodoret mentions works of Eusebius against the Marcionites and Manichæans; Ebedjesu, Questions on the Old Testament; and Xenajas (Asseman, *Bibl.* ii, p. 28) a work on faith, and other addresses. Of all these works only fragments are extant. Two homilies (against Marcellus) undoubtedly belonging to him were falsely ascribed to Eusebius of Cæsarea. Some homilies are of a more recent date. See **EUSEBIUS OF ALEXANDRIA**. A biography of Eusebius, by bishop George, of Laodicea, is lost. A work on Eusebius and his writings has been written by Augusti (*Euseb. Emes. opuscula quæ supersunt græca*, Elberfeld, 1829); and some of the statements in this work have been refuted by Thilo (*Ueber d. Schriften des Euseb. v. Alex. u. des Euseb. von Emisa* (Halle, 1832). Some of the homilies ascribed to Eusebius of Cæsarea are attributed to Eusebius of Emesa.

**Eusebius**, a Nitrian monk (beginning of 5th century), one of the "four tall brothers" condemned by Theophilus, bishop of Alexandria, for defending the opinions of Origen. The three others were Dioscurus, Ammonius, and Euthymius. They retired first to Je-

rusalem and Scythopolis, and then to Constantinople, where Chrysostom received them kindly, but did not admit them to communion. They were "pious men, though not wholly exempt from a certain fanatical ascetic tendency."—Neander, *Ch. Hist.* ii, 691; Sozomen, *Hist. Eccl.* viii, 12, 13; Socrates, *Hist. Eccl.* vi, 7.

**Eusebius of LAODICEA**, a native of Alexandria, and therefore sometimes called Eusebius of Alexandria. As deacon in Alexandria, he accompanied his bishop, Dionysius, in the Valerian persecution of Christians before the proconsul Emilianus (257), and by nursing the imprisoned Christians and burying the martyrs gave a shining testimony of his undaunted faith. When (from 260 to 263) a terrible epidemic and civil war devastated Alexandria, Eusebius again distinguished himself by his zeal in nursing the sick, both pagan and Christian, and, in union with his friend Anatolius, procured relief to thousands of inhabitants who were threatened with starvation. In 264 he attended, as the representative of bishop Dionysius, whom old age and sickness retained in Alexandria, the Synod of Antioch, which was to take action on the heresy of Paul of Samosata. Subsequently he became bishop of Laodicea in Syria, where he died in 270. He was succeeded by his friend Anatolius.—Herzog, *Real-Encyklop.* iv, 240; Eusebius, *Hist. Eccl.* vii, 32. (A. J. S.)

**Eusebius of NICOMEDIA**, who may be called the leader, if not the organizer, of the Arian party in the fourth century, was a distant relative of the emperor Julian, and was born about A. D. 324 (Ammianus Marcellinus, *Hist.* xxii, 9). He was first bishop of Berytus, in Phœnicia, but got himself translated to Nicomedia—Theodoret says (i, 19) in violation of the canons—by the influence of Constantia, sister of the emperor Constantine, whose confidence he had completely won. After the excommunication of Arius by Alexander, bishop of Alexandria (A. D. 321), Eusebius took Arius (who had written him a letter asking his aid) under his protection, offered him an asylum in his own house, and wrote urgently, though at the present time respectfully, in his favor, to Alexander, the patriarch of Alexandria (for details, see **ARIANISM**, vol. i, p. 389). As Eusebius had been a disciple of Lucian, he probably held the opinions of Arius at the time. Socrates says that "Eusebius of Nicomedia and his partisans, with such as embraced the sentiments of Arius, demanded by letter that the sentence of excommunication which had been pronounced against him should be rescinded, and that those who had been excluded should be readmitted into the Church, as they held no unsound doctrine" (*Hist. Eccl.* i, 6; see also Sozomen, i, 15).

At the Council of Niceæ (A. D. 325), Eusebius and his friends used all possible efforts first to carry their own opinions through, and then to hinder a definitive sentence. Their opposition was finally concentrated against the application of the term *ὁμοούσιος* (*consubstantial*) to the Son. All opposition failed, and the orthodox doctrine was established by the council. See **ARIANISM**, vol. i, p. 389; **NICEÆ, COUNCIL OF**. Eusebius, finding himself standing nearly alone, affixed his signature at last. Philostorgius (i, 9) asserts that instead of the term *ὁμοούσιος* (of the same essence), Eusebius and his friends secretly introduced the semi-Arian term *ὁμοεισίστος* (of like essence); but the statements of Philostorgius are not to be implicitly believed. The decree of the council contained not only the Nicene Creed, but also an anathema of certain propositions of Arius. This last Eusebius refused to sign, declaring to the council that he "submitted to their determinations concerning the faith, and consented to subscribe to it, even admitting the word *consubstantial*, according to the genuine signification of it, and consequently that he held no erroneous opinion; but that as for the condemnation of Arius, he could

not subscribe to it; not that he had a mind to reject the points of faith which they had decided, but because he did not think that he, whom they accused, was in the error that they laid to his charge: that, on the contrary, he was entirely persuaded, by the letters which he received from him, and by the conferences which he had had with him, that he was a man whose sentiments were entirely different from those for which he was condemned." Theognis of Nice, Theonas of Marmorica, and Secundus of Ptolemais, agreed with him in this. The council condemned them as heretics, and Constantine condemned them to banishment. But Arius, Theonas, and Secundus having submitted, Eusebius and Theognis finally signed, and were forgiven by the emperor.

Soon after the close of the council "Eusebius showed a desire to revive the controversy, for which he was deprived of his see and banished into Gaul. On this occasion Constantine addressed a letter to the people of Nicomedia, censuring their exiled bishop in the strongest manner as disaffected to his government, as the principal supporter of heresy, and a man wholly regardless of truth (Theodoret, *Eccl. Hist.* i, 20). But he did not long remain under the imperial displeasure; indeed, he subsequently so completely regained Constantine's favor as to be selected to baptize him, not long before his death (A. D. 337). His Arian feelings, however, broke out again. He procured the deprivation of Eustathius (q. v.), bishop of Antioch, and, if we may believe Theodoret (i, 21), by suborning a woman to bring against him a false accusation of the most infamous kind. He was, perhaps, the most bitter opponent of Athanasius (see **ATHANASIUS**), and exerted himself to procure the restoration of Arius to the full privileges of churchmanship, menacing Alexander, bishop of Constantinople, with deposition unless he at once admitted him to the holy communion, in which he would have succeeded but for the sudden death of Arius. In 339 Eusebius managed to procure his election to the see of Constantinople, in defiance of a canon against translations agreed to at Niceæ. He died about A. D. 342. Though Eusebius lies under the disadvantage of having his character handed down to posterity almost entirely by the description of theological enemies, yet it is difficult to imagine that he was in any way deserving of esteem. His signature to the Nicene Creed was a gross evasion; nor can he be considered to have signed it merely as an article of peace, since he was ever afterwards a zealous opponent of its principles. It can scarcely be doubted that he was worldly and ambitious. Athanasius considers him as the teacher rather than the disciple of Arius; and afterwards, when the Arians were divided among themselves into parties, those who maintained the perfect likeness which the substance of the Son bore to that of the father (*Homoiouians*) against the Consubstantialists on the one hand, and the pure Arians or *Anomoiouians* on the other, pleaded the authority of this Eusebius. The tenets of this party were sanctioned by the Council of Seleucia, A. D. 359" (Smith, *Dict. of Biography*, s. v.). See, besides the works already cited, Cave, *Hist. Lit.* (Genev.) i, 118; Neander, *Ch. Hist.* ii, 367 sq.; Newman, *History of the Arians*; Lardner, *Works*, iii, 594; Herzog, *Real-Encyklop.* iv, 242; Waterland, *Works* (Oxf. 1843), ii, 369 sq.

**Eusebius of VERCELLI**, was born in Sardinia; was baptized in Rome by pope Eusebius; and became *lector*, or ecclesiastical reader at Rome. He was ordained bishop of Vercelli, in Piedmont, A. D. 340, with the unanimous consent of clergy and people. He was the first in the West who united the monastic life with the clerical (Ambrose, cited by Ceillier, v, 500). Pope Liberius requested him to go with Lucifer of Cagliari, and other legates, on an embassy to Constantius, by whom the persecution of Athanasius had been sanctioned. They visited the emperor (at Arles or Valence), and prevailed on him to summon the Council

of Milan, which met A.D. 355. The Eusebians (Arians) at this council urged the condemnation of Athanasius, and the emperor sided with them. Eusebius of Vercelli having received the emperor's order to sign the condemnation of Athanasius, refused, but expressed his willingness to subscribe the Nicene Creed. Lucifer of Cagliari and Dionysius of Milan refused also. The third session was held in the palace, the Arian party fearing the violence of the people. The emperor himself then sent for the three above-mentioned bishops, and commanded them either to sign the document or to prepare for banishment; they, on their part, earnestly entreated him to remember the account he would be called upon to give in the day of judgment, and besought him not to introduce the heresy of Arius into the Church; but all was of no avail, and Eusebius, Dionysius, and Lucifer were sentenced to banishment. At Scythopolis, in Palestine, his place of exile, he was warmly welcomed, and also encouraged by an embassy from his people at Vercelli. But at last he was brutally outraged, dragged naked through the streets, and imprisoned in a dungeon. He was then transferred to Cappadocia, and thence to the Thebaid (Theodoret, *Hist. Eccles.* iii, 4; Sozomen, *Hist. Eccles.* v, 12). After the death of Constantius, his successor, Julian, issued an edict recalling the exiled bishops. Eusebius went first to Alexandria, where he stood by Athanasius in the council of A.D. 362 in taking measures to heal the Antiochian schism. See **EUSTATHIANS**. The council sent him to Antioch to end the strife there, but the ordination of Paulinus (q. v.) by Lucifer of Cagliari had made matters worse than ever. After travelling through the East he returned to Italy, where he was welcomed with enthusiasm, particularly in his own diocese. He showed himself, in the latter years of his life, a great admirer of monasticism, and introduced among the clergy of his diocese the common life. Having learned that the bishop Auxentius, of Milan, with the support of the emperor Valentinian, was very actively laboring for the triumph of Arianism, Eusebius, in 364, suddenly appeared in Milan to attack Arianism in its stronghold, but the emperor soon ordered him back to his diocese. He died in 371. An inscription on his tomb calls him a martyr, and, according to a later legend, he was killed by the Arians; but the writers that are best informed about him (Ambrose, Gregory of Tours, etc.) know nothing of his martyrdom. The Church of Rome formerly commemorated him as a martyr on the 1st of August, and now on the 16th of December. We possess three *Epistole* of Eusebius: 1. *Ad Constantium Augustum*.—2. *Ad presbyteros et plebes Italie*, written on the occasion of his banishment, to which is attached *Libellus facti*, a sort of protest against the violent conduct of the Arian bishop Patrophilus, who was in some sort his jailor during his residence at Scythopolis:—3. *Ad Gregorium Episc. Hisp.*, found among the fragments of Hilary (xi, § 5). He executed, also, a translation of the Commentary of his namesake, Eusebius of Cæsarea, on the Psalms; and an edition of the Evangelists, from a copy said to be transcribed by his own hand, preserved at Vercelli, was published at Milan (1748, 4to) by J. A. Irico; and again by Bianchini, at Rome, 1748. This edition is given also in Migne, *Patrol. Lat.* vol. xii. The *Epistole* will be found in *Bibl. Patr. Galland.* vol. v; part of them in *Bib. Max. Patr.* vol. v; and all in Migne, *Patrol. Lat.* vol. xii.—Herzog, *Real-Encyclopädie*, iv, 245; Möhler, *Athanasius der Grosse*; Ceillier, *Auteurs Sacrés* (Paris, 1865), iv, 271 sq.

**Eusebius, Sr.**, of SAMOSATA, one of the pillars of the orthodox Church of the fourth century in its conflicts with Arianism. Nothing is known of his early life. He was appointed bishop of Samosata in 361, and in the same year was present at the Synod of Antioch, at which both Arians and Catholics elected Meletius patriarch of Antioch. The document of elec-

tion, signed by both parties, was deposited with Eusebius. When Meletius, in his very first sermon, declared himself strongly in favor of the doctrine of the Council of Nice, the Arians induced the emperor to demand from Eusebius the surrender of the certificate of election. On his refusal he was threatened with having his right hand cut off; but he resolutely held out both hands, declaring his readiness to lose both his hands rather than "resign a document containing so manifest a demonstration of the impiety of the Arians" (Theodoret, *Hist. Eccles.* ii, 32). During the persecution of the orthodox by Valens, he travelled, disguised as a soldier, through Syria, Phœnicia, and Palestine, everywhere consecrating orthodox priests, and confirming the people in the Nicene faith. At the disputed election of a bishop for Cæsarea, in Cappadocia (370), he aided in securing the success of the orthodox Basil (q. v.). He ever after remained an intimate friend of Basil, and with him, in 372 and 373, took a leading part in the effort to secure, with the support of the Western churches, the success of the Nicene party also in the East. He was, therefore, a special object of hatred to the Arians, who in 373 prevailed upon the emperor to exile him to Thracia. After the death of Valens (378) Eusebius was allowed to return to his diocese. He at once began to display an extraordinary activity in appointing Nicene in the place of Arian bishops. While entering the town of Dolica for this purpose in 379 (or 380), he was killed by a stone thrown by the hand of some Arian woman (Theodoret, *Hist. Eccles.* v, 4). The Church of Rome venerates him as a saint on July 21, and the Greek Church on July 22.—Herzog, *Real-Encyclop.* iv, 499; Ceillier, *Auteurs Sacrés* (Paris, 1865), v, 1 sq. (A. J. S.)

**Eusebius**, bishop of Thessalonica, A.D. 601, wrote against the *Aphthartodoctes*, especially in reply to a monk Andreas, "who taught that Christ's body became incorruptible when joined to his divinity; that Adam's body was not created liable to corruption; and that the world, in its original form, was incorruptible also." These and other errors Eusebius wished him to retract; but, instead of prevailing, Andreas attempted to fortify his posts by farther defences, which induced Eusebius to write ten books against the positions he had before attacked, showing that Andreas had misunderstood Scripture and wilfully misquoted the fathers. Of these works there are no remains except what are preserved by Photius in his *Biblioth. Cod.* 162.—Cave, *Hist. Lit.* (Genev. 1720), i, 373; Clarke, *Succ. Sac. Lit.* ii, 376.

**Eustathians**. 1. Eustathius, bishop of Antioch, was deposed at the Arian Council of A.D. 331. See **EUSTATHIUS**. The orthodox people of Antioch refused to receive an Arian bishop as his successor, and kept aloof, thereby gaining the name "Eustathians." In A.D. 360, Meletius (q. v.) was transferred by the Arians from the see of Sebaste to Antioch; but, though he adhered to the Nicene Creed, the "Eustathians" would not recognise him, as they refused to regard an Arian ordination. A moderate party, however, of the orthodox in Antioch did recognise him, and so arose the opposition of the "Meletians" to the "Eustathians." The schism was made worse by the appointment of Paulinus (A.D. 362) as bishop of the Eustathians. The Western churches, with the Egyptian, recognised Paulinus, while the Orientals recognised Meletius.—Neander, *Ch. Hist.* Torrey's transl. ii, 411; Guericke, *Ch. Hist.* Shedd's transl. § 85. See **MELETIUS**.

2. A sect in the fourth century, which taught that married people were excluded from salvation, prohibited their followers from praying in their houses, and obliged them to quit all their possessions as incompatible with the hope of salvation. They wore a particular habit; appointed Sunday as a fast, and taught that the ordinary fasts of the Church are needless after

people have attained to a certain degree of purity. The sect probably derived its name from Eustathius, semi-Arian bishop of Sebaste († 380), who was condemned in the Council of Gangra, in Paphlagonia, held between the years 326 and 341. But it has been strongly argued on the other hand that the Eustathius who founded the sect was a different person, an Armenian monk. Walch (*Hist. d. Ketzereien*, iii, 536) has treated the subject at large.—Murd. Mosheim, *Ch. Hist.* bk. ii, c. iv, pt. ii, ch. iii, § 19, n. 39; Socrates, *H. E.* ii, 43; Sozomen, *H. E.* iii, 14; Neander, *Ch. Hist.* ii, 419; Dupin, *Hist. Eccl.* cent. iv; Bingham, *Orig. Eccl.* bk. xxii, ch. i, § 8. See EUSTATHIUS OF SEBASTE.

**Eustathius of Antioch** was born at Sida, in Pamphylia (Hieron. *Catal.* 85). He was for some time bishop of Berea, from whence he was translated to the see of Antioch in 325 by the unanimous suffrage of clergy and people (Theodoret, *H. E.* i, 7). At the Council of Nice, in 325, he earnestly opposed the Arians, who, at the (Arian) Synod of Antioch, A. D. 331, took their revenge upon him. Eusebius of Nicomedia (or Cyrus of Berea) charged him with Sabellianism (Socrates, *H. E.* i, 24); but, according to Sozomen (*H. E.* ii, 19), the pretext resorted to for his deposition was that he "had defiled the priesthood by unholy deeds." The synod deposed him, and the people of Antioch were stirred by the act almost to the point of sedition. This angered Constantine, who, moreover, was now, under the influence of Eusebius of Nicomedia, favorable to the Arians. Eustathius had also incurred the ill will of Eusebius of Caesarea, whom he charged with unfaithfulness to the Nicene Creed. He was banished to Thrace, where he died before A. D. 337 (Socrates, i, 24, 25; Sozomen, *l. c.*). His innocence as to the charge of immorality was fully shown by the confession of the woman who had sworn against him. The orthodox people of Antioch refused to acknowledge any other bishop, and, so long as they remained in this separate condition (until the fifth century), they were called Eustathians (Neander, *Ch. Hist.* Torrey's, ii, 411). Eustathius was a thorough opponent of the school of Origen, and this constituted one of the points of antagonism between him and Eusebius of Caesarea. He was a copious writer, but only one work of his known to be genuine is now extant, viz. "Κατὰ Ωριγίνου διαγνωστικός εἰς τὸ τῆς ἑγγαστρομύθου θεώρημα," against Origen, on the subject of the Pythoness consulted by Saul. Origen had asserted that the witch of Endor had really brought up the spirit of Samuel; Eustathius refutes him with great acuteness, but also not without an unworthy disdain in replying to so great a man. This treatise is to be found at the end of Leo Allatius's edition of the *Heptameron* (1629, 4to, improperly ascribed to Eustathius). It is also given in the *Critica Sacra*, viii, 331 sq., and in *Bibl. Mus. Patr.* xvii. There are fragments of a treatise of his on *The Soul*, and of his *Homilies*; all of which, with the treatise against Origen above named, are given in Migne, *Patrol. Græc.* xviii, 614 sq. See Fabricius, *Bib. Græca*, ed. Harles, ix, 131 sq.; Oudin, *Script. Eccles.* i, 317 sq.; Ceillier, *Auteurs Sacrés*, Paris, 1865, iii, 168 sq.; Cave, *Hist. Lit. Genev.* 1720, i, 119; Lardner, *Works*, iv, 149; Dorner, *Person of Christ*, Edinburgh transl., div. i, vol. ii, p. 518 sq.

**Eustathius of Thessalonica**, one of the most learned bishops of the Greek Church in the Middle Ages, was a native of Constantinople. He was at first a monk, subsequently a deacon of the church of St. Sophia, and a teacher of eloquence. He also held a position at the court, having charge of all petitions, and in this capacity presented to the emperor a petition of the city of Constantinople on the occasion of a great scarcity of water. In this period of his life Eustathius compiled his celebrated commentaries on Greek classics, which give proof of an immense amount of reading, and are the more valuable as they contain many extracts from works which are now lost. It is

especially the commentary on Homer (Rome, 1542-50, 4 vols.; Basel, 1559-60, 3 vols.; with register by Devarius, edited by Stallbaum, Leips. 1825-30, 6 vols.), which is a storehouse of learning. Of his commentary on Pindar, only the *proemium* is now extant (published by Schneidewin, Götting, 1837). In 1174 (or 1175) he was elected bishop of Myra, in Lycia, but before he had assumed the administration of this diocese the emperor appointed him metropolitan of Thessalonica. In 1180, when the emperor Manuel desired a mitigation of the formula of abjuration which the converts from Mohammedanism had to pronounce, Eustathius, at the synod, firmly opposed the emperor, who was greatly displeased with this opposition, but nevertheless remained a patron of Eustathius. When, in 1185, Thessalonica was conquered and plundered by the Normans under William II of Sicily, Eustathius was indefatigable in his efforts in behalf of the city. His theological writings were for the first time published by Dr. Tafel (*Opuscula e codd. Basil. Paris. Veneto, nunc primum editi* Th. L. F. Tafel, Francof. 1832; and with an Appendix, in Tafel, *De Thessalonica*, Berlin, 1839). They are noted for outspoken evangelical sentiments. Of special importance in this respect is the work *Meditations on the Monastic State* (εὐσεβείας βίου μοναχικοί; transl. into German [*Betrachtungen über d. Mönchsstand*] by G. L. F. Tafel, Berlin, 1847). Some of his works, e. g. a commentary on John of Damascus, are still extant in MS. Eustathius died in Thessalonica about 1194.—Herzog, *Real-Encykl.* iv, 247; Wetzler u. Welte, *Kirch.-Ler.* iii, 771; Neander, *Karakteristik des Eustathius in seiner reformator. Richtung*, in Neander, *Wissenschaftliche Abhandl.* (Berlin, 1851). (A. J. S.)

**Eustathius**, semi-Arian bishop of Sebaste, in Armenia, in the fourth century, was a great advocate of monasticism, which he introduced into Armenia. The ascetic fanatics called Eustathians are supposed to have taken their name and their practices from him (but see EUSTATHIANS, 2). He also founded in Sebaste a hospital for the poor, over which he placed Ærius, then his devoted friend. But later Ærius charged him with avarice, and they quarrelled. See ÆRIANS. Eustathius died about A. D. 380.—Socrates, *Hist. Eccles.* ii, 43; Sozomen, *Hist. Eccles.* iii, 14; Neander, *Church Hist.* Torrey's transl. ii, 342; Helefer, *Conciliengeschichte*, i, 652 sq.

**Eustochium**, JULIA, was born at Rome about A. D. 365. A daughter of Paula (q. v.), she imitated the ascetic piety of her mother. In 382 she took the vow of virginity, and put herself under the direction of Jerome, who gave her instructions relative to the life she had chosen. It was for her that he wrote (383) his treatise on *Virginity*. On his departure from Rome, Paula and Eustochium accompanied him, and settled near him in a monastery near Bethlehem. After the death of Paula (403), Eustochium succeeded her as superior of the monastery. So greatly was she profited by Jerome's instructions that she gained a knowledge of the Greek and Hebrew languages. To her Jerome dedicated his Commentaries on Ezekiel and Isaiah. He translated also the rules of Pachomius into Latin for the use of the members of the monastery at Bethlehem. In 416 the Pelagians burned this monastery and outraged the inmates. She is celebrated as a saint in the Roman Church on the 28th of September.—Hoefler, *Now. Biog. Générale*, xvi, 792; Butler, *Lives of the Saints*, ix, 775; Milman, *Hist. of Christianity* (N. Y. 1866), iii, 234.

**Euthalius**, bishop of Sulce, 5th century, is supposed to have been the first to divide the N. T. into verses. Some of the poetical parts of the O. T. had been arranged in lines (στίχοι), and Euthalius (A. D. 438) divided Paul's epistles into verses. Afterwards he so arranged Acts and the Catholic Epistles. The division into chapters had been made by a previous writer (A. D. 396), and Euthalius adopted it. Erasmus,

in his N. T., inserts the Arguments of Euthalius to the Acts and to Paul's epistles. His *Prologue to St. Paul's Epistles*, including a sketch of Paul's life, was published by J. H. Boecelerus at the end of his N. T. (Argentero, 1645, 1660). All the remains of Euthalius are given by Zaccagni, *Coll. Mon. Vet. Eccles. Græc.* (Rome, 1698, 4to).—Horne, *Introduction*, pt. i, ch. ii, § 3; Cave, *Hist. Lit.* (Genev. 1720), i.

**Euthymius Zigabēnus** (or ZIGADENUS), a Greek monk and theologian of the 12th century. He lived in the time of the emperor Alexius Comnenus (about A. D. 1120), and was his intimate friend. Of his life little is known, except from the *Alexius* of Anna Comnena (lib. xv), who praises his talent and scholarship. The following writings of his have been published: (1.) *Πανοπλία δογματική, Παροπλία Δογματικά*, against all heresies, written by the order of Alexius Comnenus, and divided into two parts and 24 sections, each treating of a heresy. It consists chiefly of digested extracts from preceding writers. A Latin translation of it was published by Zinus (Venice, 1555, fol.; reprinted at Lyons, 1556 and 1580, 8vo); also in *Bibl. Patrum* (Lyons), xix. This translation omits the 12th and 13th titles "against the Pope and the Italians." The Greek original was published at Tergovist, in Wallachia (1710, fol.), and is very rare. It omits the last title, which is contained in Sylburg's *Saraceniæ*, p. 1-54. (2.) *Victoria et triumphus de impiâ Massaliamorum secta*, etc. (Victory and Triumph over the impious, manifold, and execrable sect of the Messalians, etc.), together with fourteen anathemas against them; edited, Gr., with Latin version and notes, by Tollius, in his *Insignia Itineris Italici* (Traject. ad Rhen. 1696, 4to); also in Gallandii *Bibl. Patr.* xiv; 293. (3.) *Commentarius in Psalmos* (*Commentary on all the Psalms of David*); Latin version by Saulus (Verona, 1530, fol.; often reprinted); also (Gr. and Lat.) in Theophylacti *Opera Omnia*, vol. iv (Venet. 1763, fol.). (4.) A *Commentary on the four Gospels*, his most important work, compiled from St. Chrysostom and other fathers; Latin version by J. Hentenius (Louvain, 1544, fol.; Paris, 1547, 1560, and 1602, 8vo); best edited, by C. F. Matthæi, Gr. and Lat. (Lips. 1792, 4 vols.). The work is still considered one of great value. See Matthæi's preface for full notices of Euthymius, and for the judgments of the learned concerning his writings. Many of his writings yet remain in MS. All his published works are given in Migne, *Patrologia Græca*, vol. cxxviii-cxxxii.—Fabricius, *Bibl. Græca*, ed. Harles, viii, 328 sq.; Cave, *Hist. Lit.* (Genev. 1720), i, 567; Oudin, *Script. Eccles.* ii, 979; Lardner, *Works*, v, 164; Ullmann, in *Theol. Stud. u. Krit.* 1833, p. 647 sq.

**Eutyches**, the so-called founder of Eutychianism, though the opinions advocated by him existed before (see Selig, *De Eutychianismo ante Eutychen*). His name Eutyches means "the Fortunate, but his opponents said he should rather have been named *Atyches*, the Unfortunate. He must not be confounded with the deacon Eutyches, who attended Cyril to the Council of Ephesus. Leo the Great, in his renowned letter to Flavian, calls him very 'ignorant and unskilled,' multum imprudens et nimis imperitus, and justly attributes his error rather to imperitia than to versutia. So also Petavius and Hefele (ii, 300). His relation to the Alexandrian Christology is like that of Nestorius to the Antiochian; that is, he drew it to a head, brought it to popular expression, and adhered obstinately to it; but he is considerably inferior to Nestorius in talent and learning. His connection with this controversy is in a great measure accidental" (Schaff, *Hist. of Christ. Church*, iii, 736). He led, from his early age, an ascetic life; was for thirty years archimandrite of a monastery near Constantinople, and had reached his 70th year without being known for anything except his illiterate fanaticism, his intimate relations with the all-powerful Chrysaphius, minister of Theodosius, and his

influence with the monastic party which blindly followed the lead of Cyril of Alexandria. He used his influence in favor of Cyril at the Œcumenical Council of Ephesus, a copy of the minutes of which was sent to him by Cyril. After the death of Cyril he was on intimate terms with Cyril's successor, Dioscurus (q. v.). In 448 Eutyches wrote a letter to the Roman bishop Leo to prejudice him against the school of Antioch (q. v.), which, he insinuated, was bent on reviving Nestorianism. To counteract his operations, patriarch Domnus, of Antioch, in 448 charged Eutyches with renewing the heresy of Apollinaris. No notice seems to have been taken at the imperial court of this charge; but the charges brought against him before the Synod of Constantinople (448) by his former friend Eusebius, bishop of Dorylæum (q. v.), had more effect. Patriarch Flavian, of Constantinople (q. v.), wished to avoid taking any decisive action, but Eusebius prevailed upon the synod to summon Eutyches. The latter, after making several excuses, obeyed the third summons, and presented himself before the synod, attended by a large number of monks and imperial officers. He defended his views in a long speech, but the synod, largely consisting of adherents of the Antioch school, found him guilty of heresy, and, in spite of all the secular pressure brought to bear upon them in favor of Eutyches, deprived him of his position of archimandrite, and excommunicated him. Eutyches, with the aid of his friend Chrysaphius, obtained from the emperor a revision of the trial by a new general council to be convoked at Ephesus. Flavian and Leo of Rome strenuously opposed the holding of the council. Leo, who had been written to by both parties, was encouraged by this circumstance to claim a right to decide the controversy, and for this purpose wrote the celebrated epistle to Flavian (Mansi, v, 1266 sq.). See the article CHALCEDON, vol. ii, p. 196; and LEO. But, owing to the influence of Eutyches and Dioscurus of Alexandria, the council was held, under the presidency of Dioscurus, and, amidst scenes of unheard-of violence, which have given to the council the name of the Robber Council, the bishops were compelled to restore Eutyches to the Church and his former position, and to condemn the prominent men of the Antioch school. See EPHESUS, ROBBER-COUNCIL OF. The emperor promptly sanctioned this decision, and thus Eutychianism was on the point of becoming the predominant doctrine of the Eastern Church, when the death of Theodosius (450) gave a new turn to the controversy. The empress Pulcheria and her husband Marcian sympathized with the opponents of Eutyches, recalled the exiled bishops, and convened the Œcumenical Council of Chalcedon (451), which condemned the views held by Eutyches, and declared that "in Christ two distinct natures are united in one person, and that without any change, mixture, or confusion." See CHALCEDON, COUNCIL OF. Even before the meeting of the council Eutyches had again been excommunicated by patriarch Anatolius of Constantinople, and expelled from his monastery by Marcian. The council did not again condemn him by name. Of the last years of Eutyches we only know that he died in exile.—Herzog, *Real-Encyklop.* iv, 251; Baur, *Lehre von d. Dreieinigkeith*, i, 800; Neander, *Church History* (Torrey's), iii, 501-505; Dörner, *Person of Christ*, div. ii, vol. i and ii; Waterland, *Works* (Oxford), iii, 411, 481. (A. J. S.)

**Eutychianism**, the name of a doctrinal system called after Eutyches, according to which there was in Christ only one nature, that of the incarnate Word, his human nature having been absorbed in a manner by his divine nature. Eutyches, like Cyril, laid chief stress on the divine in Christ, and denied that two natures could be spoken of after the incarnation. In our Lord, after his birth, he worshipped only one nature, the nature of God become flesh and man: *μὴν φύσιν προσκυνεῖν, καὶ ταύτην Θεοῦ σαρκωθέντος καὶ ἰαν-*

Ἐρωπήσαντος, or, as he declared before the synod at Constantinople, 'Ὁμολογῶ ἐκ δύο φύσεων γεγενῆσθαι τὸν κύριον ἡμῶν πρὸ τῆς ἐνίσεως· μετὰ δὲ τὴν ἔνωσιν μίαν φύσιν ὁμολογῶ (Mansi, vi, 744). In behalf of his view he appealed to the Scriptures, to Athanasius and Cyril, and to the Council of Ephesus in 431. The impersonal human nature is assimilated, and, as it were, deified by the personal Logos, so that his body is by no means of the same substance (ὁμοούσιον) with ours, but a divine body. All human attributes are transferred to the one subject, the humanized Logos. Hence it may and must be said, God is born, God suffered, God was crucified and died. He asserted, therefore, on the one hand, the capability of suffering and death in the Logos-personality, and, on the other hand, the deification of the human in Christ. The other side imputed to Eutychianism the doctrine of a heavenly body, or of an apparent body, or of the transformation of the Logos into flesh. So Theodoret (*Fab. her.* iv, 13). Eutyches said Christ had a σῶμα ἀνθρώπου, but not a σῶμα ἀνθρώπινον, and he denied the consubstantiality of his σῶμα with ours. Yet he expressly guarded himself against Docetism, and against all speculation: Φυσιολογεῖν ἡμαντῆρ οὐκ ἐπιτρέπω. He was really neither a philosopher nor a theologian, but only insisted on some theological opinions and points of doctrine with great tenacity and obstinacy" (Schaff, *History of the Christian Church*, iii, 737 sq.).

Bishop Forbes cites Photius and Johannes Damascenus aptly on Eutychianism as follows, viz.: "If there be one nature in Christ, it is either the divine or the human nature; if it be only the divine nature, where is the human? and if there be only the human, you cannot escape from denying the divine. But if it be something different from these (for this is the only other alternative they have, and they seem to lean that way), how shall not in that case Christ be of a different nature, both from his Father and from us? Can anything be more impious or absurd to say that the Word of God, who is God, became man, to the corruption of his own deity, and to the annihilation of the humanity he assumed? For this absolutely follows with those who have dared to speak of Christ as of neither nature, but of one besides these" (Photius, *Epist.* i, cont. *Eutych. cū. Suicer*). "The two natures were without conversion or alteration joined together, and the divine nature did not depart from its own simplicity, nor did the nature of man turn into the nature of God, nor was it deprived of existence, nor was one composite nature made out of two; for a composite nature cannot be consubstantial with either of those natures from whence it is compounded. If, therefore, according to the heretics, Christ exist in one compounded nature after the union, he is changed from a simple into a compounded nature, and is not consubstantial with his Father, who is of a simple nature, nor with his mother, for she is not made up of the Godhead and manhood. And he will be neither in the Godhead nor in the manhood, nor will he be called God or man, but Christ only; and Christ will be the name not of his person, but of his own nature, as they deem. But we do not hold Christ to be of a composite nature, as the body and soul make the man, but we believe and confess that he is of the Godhead and manhood; perfect God and perfect man from and in two natures. Were he of one nature, the same nature would be at once created and increate, simple and composite, mortal and immortal. And the union of two natures in Jesus Christ has taken place neither by disorder (ἁρμογῆς) nor by mixture (syncrasis or anacrisis), as Eutyches, Dioscorus (of Alexandria), and Severus say; neither is it personal (προσωπικῶς) nor relative, nor κατ' ἄξιαν, nor from identity of will, nor from equality of honor, nor from the same name, as Nestorius, Diodorus (of Tarsus), and Theodorus (of Mopsuestia) said; but by synthesis; or personally

(κατ' ὑπόστασιν), immutably, inconfusedly, unalterably, inherently, inseparably, in two perfect natures in one person. And we term this union essential (ὀυσιωδῶς), that is, true and not fantastic; essential, not in that one nature is made of the two, but that they are mutually united in truth into one composite person of the Son of God. And their substantial differences are preserved, for that which is created remains created, and that which is increate remains increate; the mortal remains mortal, the immortal abides immortal. The one shines forth in miracles, the other submits to injuries; and the Word appropriates to itself that which is of man. For its are the things that pertain to the Sacred Flesh, and it gives its own properties to the flesh, according to the law of the communication of properties and the unity of person, for he is the same who performs both the God-like and the man-like actions in either form with the communion of the other. Wherefore the Lord of glory is said to be crucified, although the divine nature did not suffer, and the Son of man, even before his passion, is confessed to be in heaven, as the Lord himself said (John iii) For there is one and the same Lord of glory, who is naturally and in truth the Son of man, that is, made man. We acknowledge both his miracles and his sufferings, though the first were performed according to one nature, the latter endured according to the other. Thus we know that his one person and his two natures are preserved. By the difference of the natures he is, on the one hand, one with the Father and the Holy Ghost; on the other hand, he is one with his mother and with us. And these two natures are joined in one composite person, in which he differs as from the Father and the Holy Ghost, so from his mother and us also" (Joh. Damascenus, *Fid. Orth.* iii, 3, abr.). Bishop Forbes adds: "Now we have all a great tendency to Eutychianism. It gets over a great difficulty in the reception of truth to believe the humanity of our Lord destroyed. For faith now requires of us to believe that the human body of Jesus Christ still is, and that to it the Word is hypostatically joined, and that beyond the spheres and systems of which we are cognizant, it, partaking of our nature, is at the right hand of God" (*On the Nicene Creed*, Oxford, 1852, p. 201 sq.).

The Council of Chalcedon (A. D. 451) adopted the doctrine stated by pope Leo in his letter to Flavianus [see *Leo*], viz. in substance, "that in Christ two distinct natures were united in one person, without any change, mixture, or confusion." The Creed of Chalcedon states that "the one Son of God, our Lord Jesus Christ, is of one substance with the Father according to the Godhead, and of one substance with us according to the manhood—like to us in all things except sin; one and the same Christ, Son, Lord, Only-begotten, in two natures, without confusion, without conversion, without division, without separation—the difference of the natures not being taken away by reason of the unity, but the propriety of each being preserved and joined together to form one person." The creed of the council was not by any means universally received in the East. But the name Eutychianism gave way to that of Monophysitism. The ecclesiastical organizations adhering to the heresy are commonly known by the names of Jacobites, Armenian Church, Copts, and Abyssinian Church (see the special articles on these churches). For a sketch of the fortunes of the theory known as Eutychianism, see *MONOPHYTES*. See also *CHALCEDON*; *CHRISTOLOGY*; *EUTYCHES*; *DIOSCURI*; and consult Pearson, *On the Creed* (Oxford, 1820), ii, 179 sq.; Schaff, *Ch. History*, i. c.; Waterland, *Works* (Oxford), iii, 115, 411; Heffele, *Conciliengeschichte*, ii, 249 et al.; Baur, *Dogmengeschichte*, i, 2, 256 sq.; Cunningham, *Historical Theology*, ch. x, § 1.

**Eutychianus**, pope and martyr, succeeded Felix I, bishop of Rome, Jan. 275; died as martyr and confessor Dec. 8, 283. Some decretals are ascribed to him,

which may be found in Migne's ed. of the remains of *Sixti Pope*, et al. (*Patrol. Latina*, vol. v).

**Euty chius** OF CONSTANTINOPLE "was originally a monk of the town of Amaseia, whence he was sent by his fellow-citizens to Constantinople as proxy for their bishop. The great talent he displayed in some theological controversy gained him general admiration, and the emperor, in A.D. 553, raised him to the highest dignity in the Church at Constantinople. In the same year he accordingly presided at an oecumenical synod which was held in that city. In A.D. 564 he incurred the anger of the emperor Justinian by refusing to give his assent to a decree respecting the incorruptibility of the body of Christ previous to his resurrection, and was expelled from his see in consequence. He was at first confined in a monastery, then transported to an island, Princeps, and at last to his original convent, Amaseia. In 578 the emperor Tiberius restored him to his see, which he henceforth retained until his death in 585, at the age of 73. There is extant by him a letter addressed to pope Vigilius on the occasion of his elevation in A.D. 553. It is printed in Greek and Latin among the *Acta Synodi quintæ Concil.* v, 425, etc. He also wrote other treatises, which, however, are lost" (Smith, *Dict. of Biography*, s. v.).—Evagrius, *Hist. Eccl.* iv, 38; Cave, *Hist. Lit.* (Genev. 1720) i, 341.

**Euty chius**, patriarch of Alexandria, was born at Postat (ancient Cairo) in 876. His Arabic name was *Said-ibn-Batrik*. He was originally a physician, applied himself to the study of theology towards the close of his life, and was elected Melchite (or orthodox) patriarch of Alexandria in 933, and died about A.D. 946. He wrote, in Arabic, a *Chronicle* or *Annals* from the creation of the world to A.D. 937, under the Arabic title *Natlm-el-Ganhar, String of Pearls*; translated and edited by E. Pococke under the title *Contectio Gemmarum, sive Annales*, Arab. et Lat. (Oxonii, 1658-59, some copies 1656-64, 2 vols. 4to).—*Fragmenta duo de Paschute*, et de *SS. Eucharistie institutione* (in Mai, *Script. Vet.* ix, 623). Selden published an extract under the title *Eclesiæ sue origines, ex Arabico cum vers. Lut.* (Lond. 1642, 4to), to which Abraham Ecchelenis replied in *Euty chius vindicatus, sive Responso ad J. Seldeni Origines* (Rom. 1661, 4to).—Hoefer, *Nouv. Biog. Générale*, xvi, 810; Graesse, *Trésor de Livres Rares*, i, 530.

**Euty chius** (Εὐτυχός, of good fortune, a frequent name; see Josephus, *Ant.* xviii, 6, 5; xix, 4, 4), a young man of Troas, who sat in the open window of the third floor while Paul was preaching late in the night, and who, being overcome by sleep, fell out into the court below, May, A.D. 55. He was "taken up dead" (ἵσθη νεκρός); but the apostle, going down, extended himself upon the body and embraced it, like the prophets of old (1 Kings xvii, 21; 2 Kings iv, 34); and when he felt the signs of returning life, restored him to his friends, with the assurance that "his life was in him." Before Paul departed in the morning the youth was brought to him alive and well (Acts xx, 5-12). All the intimations of the narrative forbid us for a moment to entertain the view of those critics who suppose that animation was merely suspended (Bloomfield, Hackett, in loc.). See PAUL.

Mr. Jowett states that, during his residence at Hainvali in May, 1818, the house in which he abode gave him a correct idea of the falling of Euty chius from the upper loft while Paul was preaching at Troas. "According to our idea of houses," he remarks, "the scene of Euty chius's falling from the upper loft is very far from intelligible; and besides this, the circumstance of preaching generally leaves on the mind of cursory readers the notion of a church. To describe this house, which is not many miles distant from the Troad, and perhaps, from the unchanging character of Oriental customs, nearly resembles the houses then built, will fully illustrate the narrative. On entering my host's

door, we find the ground floor entirely used as a store; it is filled with large barrels of oil, the produce of the rich country for many miles round; this space, so far from being habitable, is sometimes so dirty with the dripping of the oil that it is difficult to pick out a clean footing from the door to the first step of the staircase. On ascending, we find the first floor, consisting of a humble suite of rooms, not very high; these are occupied by the family for their daily use. It is on the next story that all their expense is lavished; here my courteous host has appointed my lodging; beautiful curtains, and mats, and cushions to the divan, display the respect with which they mean to receive their guest; here, likewise, their splendor, being at the top of the house, is enjoyed by the poor Greeks with more retirement and less chance of molestation from the intrusion of the Turks; here, when the professors of the college waited upon me to pay their respects, they were received in ceremony and sat at the window. The room is both higher and also larger than those below; it has two projecting windows; and the whole floor is so much extended in front beyond the lower part of the building, that the projecting windows considerably overhang the street. In such an upper room—secluded, spacious, commodious—Paul was invited to preach his parting discourse. The divan, or raised seat, with mats or cushions, encircles the interior of each projecting window; and I have remarked, that when the company is numerous, they sometimes place large cushions behind the company seated on the divan, so that a second tier of company, with their feet upon the seat of the divan, are sitting behind, higher than the front row. Euty chius, thus sitting, would be on a level with the open window, and, being overcome with sleep, he would easily fall out from the third loft of the house into the street, and be almost certain, from such a height, to lose his life. Thither Paul went down, and comforted the alarmed company by bringing up Euty chius alive. It is noted that there were many lights in the upper chamber. The very great plenty of oil in this neighborhood would enable them to afford many lamps; the heat of these and so much company would cause the drowsiness of Euty chius at that late hour, and be the occasion likewise of the windows being open." See HOUSE.

**Evagrius Ponticus** (Ἐβάργιος), monk and ascetic writer, was born at Iberis, on the Black Sea, about A.D. 345. He was made deacon by Gregory of Nyssa or Gregory of Nazianzum, and received his theological culture to some extent under the latter, who took him to Constantinople in 379 or 380, and made him archdeacon. In the Origenistic controversies he took the side of Origen. After some experience of the dangers of personal beauty and vanity, he renounced the world, assumed the monastic garb, and departed for Egypt in 383 or 384, where he lived as an ascetic up to the day of his death in (probably) 399. Socrates speaks very highly (*H. E.* iv, 23) of his character and writings, of which there remain, 1. *Μοραχός* (in Cotelierus, *Mon. Græc.* iii, 68);—2. *Ἀπὸ ἁγριώσεως* (in Pallad. *Vita Chrysost.* p. 349);—3. *Rerum Monachalium rationes*; and a few other tracts, collected in Galland. *Bibl. Patrol.* vii, 553; also in Migne, *Patrol. Græc.* xl, 1219 sq. See Tillemont, *Mémoires*, x, 368; Socrates, *Hist. Eccl.* iii, 7; iv, 23; Sozomen, *Hist. Eccl.* vi, 30; Cave, *Hist. Lit.* Anno 380.

**Evagrius Scholasticus**, the Church historian, was probably born at Epiphaneia, on the Orontes, in or about A.D. 536, and had a good education. He lived in Antioch, where he was a lawyer (*scholasticus*), whence his surname. He rendered essential service to the patriarch Gregory, whom he defended (against charges of adultery and incest) at a synod in Constantinople, A.D. 589. He was made *questorium*, as a reward for his professional skill, by the emperor Tiberius. Evagrius wrote *An Ecclesiastical History*, in con-

tinuation of Eusebius and Theodoret, which extends from the Council of Ephesus, A.D. 431, to the twelfth year of the reign of the emperor Maurice, A.D. 593-4. He is credulous and superstitious, but orthodox. The best edition, Gr. and Lat., is that of Valesii (Henri de Valois), which includes Eusebius and the other early Greek ecclesiastical historians (Par. 1659-73, fol.; reprinted, with some additional "variorum" notes, under the title *Ecl. Scriptores cum notis Valesii et Reading*, Cantab. 1720, 3 vols.); also in Migne, *Patrol. Græca*, vol. lxxxix; translated into English, *A History of the Church, with an account of the Author and his Writings*, trans. by Meredith Hanmer, in Bagster's *Ecl. Historians* (Lond. 6 vols. 8vo); and in Bohn's *Eccles. Library* (Lond. 1851, 12mo); into German by Rössler, in his *Bibl. d. Kirchenväter*, vol. vii (1775, 8vo).—Fabricius, *Bibliotheca Græca*, ed. Harles, ix, 284 sq.; Hoffmann, *Bibliog. Lexikon*, ii, 37; Schaif, *History of the Christian Church*, iii, 882.

**Evangeliarium.** See EVANGELISTARY.

**Evangelical**, *appertaining to, or characteristic of, the Gospel.* (1.) The term "has been applied to a portion of the English Church who either profess, or are supposed to 'know and inculcate the Gospel' in an especial manner, and to give peculiar prominence to the doctrine of salvation by faith in the atonement. It is probably true that among this portion of the Church of England many, but not all, maintain the *peculiar* doctrines of Calvinism; and there may have been a time when (in the opinion of some) lower views of the sacraments and of Church authority prevailed among them than what are generally received among other members of that Church. Very many persons lament the use of this term, and consider that, like all party appellations, it tends to perpetuate division in the Church; and accordingly, they desire that it should be disused as a party term, and carefully confined to its original meaning" (Eden).

(2.) In Prussia, the United Established Church (since 1817) has been called the "Evangelical Church." See PRUSSIA and UNITED EVANGELICAL CHURCH.

(3.) In England and America the term "evangelical" is frequently used to distinguish those churches which believe in the divinity of Christ and the atonement from those that do not.

**Evangelical Alliance** is the name of an association of Christians belonging to the denominations collectively called Evangelical, and having for its object to represent the unity of these churches in all the more important articles of faith, notwithstanding their separation by external organization. The Alliance originated in Great Britain, and the rupture in the Presbyterian Church of Scotland seems to have greatly contributed to its establishment. On Aug. 5, 1845, a number of persons belonging to different denominations drew up a proposal of closer union. The advantages promised by such a movement were at once appreciated in England, and an assembly was convoked at Liverpool Oct. 1, 1845, which was in session three days, and at which were present 216 persons, representing 20 different religious societies. The first General Assembly of the Evangelical Alliance was held in Freemasons' Hall, Great Queen Street, London, and lasted from Aug. 19 to Sept. 2, 1846; 921 Christians from all parts of the world took part in its 26 sessions; among them were 47 from the European continent, and 87 from America and other parts. Among them we find the names of Dr. Barth, of Calw, in Württemberg; Dr. Baird, of New York; Rev. Dr. Bonnet, of Frankfort on the Maine (editor of the letters of Calvin); Dr. Buchanan, of Glasgow; Dr. Cunningham, of Edinburgh; William Jones, president of the Tract Society; Dr. Marriott, of Basel; the missionary Mögling, of Mangalur; the missionary inspector (subsequently superintendent general), Dr. Hoffmann; Rev. Adolphe Monod (then in Montauban); Rev. Dr. Oncken, of

Hamburg; Rev. Dr. Panchaud, of Brussels; Rev. Baptist Noel, of London; and Dr. Tholuck, of Halle. Some fifty different denominations were represented, some of which, however, as the reformed churches of France and Geneva, and the Lutheran churches of North America and Württemberg, differed only on local points. Some colored preachers also took part in the proceedings. Sir Culling Eardley (q. v.) was chosen as chairman, and remained the head of the Alliance until his death. The platform was clearly and unanimously defined: the Evangelical Alliance is not to be a union of the different denominations, neither is it its aim to bring about such as its result; its object is only to promote Christian feelings, loving, friendly intercourse between the different denominations, and an effective co-operation in the efforts to repulse the common enemies and dangers. As the means of effecting this purpose, it advocates, not a sort of official or semi-official representative assembly of the different denominations, but rather the union of individuals. It is to be a Christian union, not a Church union; one in which a number of earnest, faithful Christians of the different denominations may join. Being a union of Christians, not of churches, the doors of the Evangelical Alliance are open to all who admit the fundamental principles of Christianity, without inquiring into the minutæ of their particular confessions. It only asks its members to accept (whether because or in spite of their particular confession does not matter) the fundamental principles and doctrines of the Gospel. This naturally led to a definition of these fundamental principles, the admission of which should be considered the basis of the Alliance. On the motion being made by Dr. Edward Bickersteth, the following nine articles were, after mature deliberation, received as the fundamental principles of the Evangelical Alliance:

"The parties composing the Alliance shall be such parties only as hold and maintain what are usually understood to be evangelical views in regard to the matter of doctrines understated, namely: 1. The divine inspiration, authority, and sufficiency of the Holy Scriptures. 2. The right and duty of private judgment in the interpretation of the Holy Scriptures. 3. The unity of the Godhead, and the trinity of persons therein. 4. The utter depravity of human nature in consequence of the Fall. 5. The incarnation of the Son of God, his work of atonement for sinners and mankind, and his mediatorial intercession and reign. 6. The justification of the sinners by faith alone. 7. The work of the Holy Spirit in the conversion and sanctification of the sinner. 8. The immortality of the soul, the resurrection of the body, the judgment of the world by our Lord Jesus Christ, with the eternal blessedness of the righteous, and the eternal punishment of the wicked. 9. The divine institution of the Christian ministry, and the obligation and perpetuity of the ordinances of Baptism and the Lord's Supper."

These principles were embodied in a document entitled *Societatis Evangelicæ constitutionis et statutorum expressio brevis*. The members bind themselves to pray zealously for the Holy Spirit to descend upon all believers, and to employ jointly the morning of the first weekday as a season of prayer, as also the first week of each year; as also to use Christian circumspection in their speech and writings when touching on points of difference. The Alliance was organized on the 2d of September. They organized a series of seven branch associations: 1. Great Britain and Ireland; 2. United States of North America; 3. France, Belgium, and the French portion of Switzerland; 4. Northern Germany; 5. South Germany, and the German portion of Switzerland; 6. British North America; 7. West Indies. These branch associations went into actual operation afterwards. The Alliance spread in France, Switzerland, and Belgium, without agreement with its definition of the evangelical creed being insisted on. It met with

much opposition in Germany from the Lutherans, who did not find the creed sufficiently explicit on certain points, and from the disciples of Schleiermacher, who disapproved of some of the articles. A *second assembly* was held in Paris in 1855 on the occasion of the World's Exhibition. The *third meeting* was held in Berlin in 1857. The ("Confessional") Lutherans became more determined in their opposition, while the evangelical party of Germany, though approving of the general scope of the Alliance, deemed it inexpedient to insist on the acceptance of the nine principles as a condition of membership. This meeting was largely attended, delegates from Macao, Africa, and Australia being present, and brought the Alliance more prominently before the churches of Continental Europe. The *fourth meeting* was held at Geneva in 1860. It was successful, notwithstanding the declension of the Genevan National Church to sympathize with its objects. Dr. Guthrie, of Scotland; Dr. Baird, of the United States; Monod, Pressensé, and Gasparin, of France; Krummacher and Dörner, of Germany; Groen van Prinsterer, of Holland; and Merle d'Aubigné, of Switzerland, were among the most prominent and active members. The fifth meeting was to have been held at Amsterdam in 1866, but was postponed on account of the prevalence of the cholera at the appointed time till 1867. The *fifth General Conference* actually took place at Amsterdam on Aug. 18, 1867, and was largely attended. There were delegates from France, Germany, Switzerland, Holland, Great Britain, the United States, the British American provinces, Italy, Spain, Sweden, and Eastern countries. Baron Van Wassenaar Catwijk presided. Among the more prominent delegates were Dr. Krummacher, Prof. Herzog, Dr. Tholuck, and Prof. Lange, of Germany; Pasteur Bersier, Dr. de Pressensé, and Prof. St. Hilaire, of France; Dr. Guthrie, of Scotland; John Pye Smith, archdeacon Philpot, and S. Gurney, M.P., of England; Merle d'Aubigné, of Switzerland; the Rev. Dr. Prime, of the United States, and many others. The opening sermon was preached by Prof. Van Oosterzee. Among the subjects discussed were the religious condition of the Church of England, the Scottish churches, the connection of missions with civilization, Christianity, and literature, and art and science; the methods of operating missions; the religious condition of Germany, France, Holland, Belgium, and Italy; evangelical non-conformity; Christianity and the nationalities; and various subjects of theology and philosophy. Interesting reports were received of the progress of religious liberty in Turkey, and of the thralldom of opinion in Spain. The observance of the Sabbath received especial consideration, resulting in the adoption of a resolution calling upon the members of the Alliance to use in their several places of abode and spheres of influence earnest endeavors to secure from states, municipalities, and masters of establishments, from every one, the weekly day of rest from labor, "in order that all may freely and fully participate in the temporal and spiritual benefits of the Lord's day." A letter of affection and sympathy was adopted to Christians scattered abroad, particularly to those who are laboring against the hostile influences of heathenism or of superstition, and whose rights of public worship are restrained or abridged. A protest against war was adopted. Special meetings were held on Sunday-schools and systematic benevolence. A series of meetings for the poor were held in one of the mission-rooms of the city with wholesome effect, and two temperance meetings. The assembly adjourned on Tuesday, Aug. 27.

The Evangelical Alliance of the United States was organized in New York city on Jan. 30, 1867. Eminent divines and laymen of the Methodist Episcopal, Presbyterian, Protestant Episcopal, German Reformed, Reformed, and Baptist churches, and from various parts of the country, signified their approval of the movement either by attendance in person or by letter. A

letter of co-operation was read from the secretary of the British branch of the Alliance. The Hon. William E. Dodge was elected president of the American branch. At a meeting held in New York Nov. 12, 1868, it was resolved to convene a new General Conference of the Evangelical Alliance in the city of New York in the autumn of 1869. The British branch only of the national branches has been in the practice of holding annual meetings.

"Among the results already attained by the Alliance as incidental and secondary to its great object may be mentioned, The supply of an obvious want, namely, the existence of an organized body with and by whom correspondence and co-operation may be easily and effectually carried on between Christians in different parts of the world, and which may greatly aid in uniting Christians in this country separated by ecclesiastical differences and other causes; the holding of conferences of Christians from all parts of the world, for devotion and mutual consultation, in London, Paris, Berlin, and other cities; aiding in the revival of religion both at home and abroad; the convening of very many meetings for united prayer for the outpouring of the Spirit, and in reference to passing events of importance; the communication of much information as to the religious condition of Christendom; the encouragement of Christians exposed to trials and difficulties by the expression of sympathy, and in several instances by eliciting pecuniary aid; successful interference on behalf of Christians and others when persecuted in Roman Catholic and Mohammedan countries; the mitigation or removal of the persecution of Protestants by their fellow-Protestants in Germany and elsewhere; the presentation of memorials to the sovereigns of Europe, including the sultan himself, on behalf of liberty of conscience for Mussulmen; the encouragement and assistance of the friends of pure evangelical doctrine in all Protestant countries in their struggle with Rationalism or infidelity; the uniting of evangelical Christians in different countries for fraternal intercourse and for mutual protection; opposition, in common with other bodies, to the progress of popery; the resistance of projects which would tend to the desecration of the Lord's day; the origination and extensive circulation of prize essays on the Sabbath, and on Popery and infidelity; and the origination of societies established on the principle of united action among evangelical Christians, such as the Turkish Missions Aid Society, the Continental Committee for Religious Liberty, Christian Vernacular Education Society for India, and German Aid Society. Although these practical results are thus referred to, yet it is to be understood that, even if no such secondary objects had been accomplished or attempted, the great value of the Alliance would still remain in its adaptation to promote and manifest union among Christians. The preceding is from an authoritative statement made by the Alliance" (*Eadie, Ecclesiastical Encyclopedia*, s. v.).—Herzog, *Real-Encyclopädie*, p. 270; Schem, *American Ecclesiastical Almanac for 1868*; the full reports of the General Assemblies of the Alliance; Dr. Massie, *The Evangelical Alliance, its Origin and Development* (Lond. John Snow, 1847); L. Bonnet, *L'unité de l'esprit par le lieu de la paix; Lettres sur l'alliance évangélique* (Paris, Delay, 1847); *Am. and For. Ch. Union*, Sept. 1856, p. 269; Dec. 1856, p. 367; *Princeton Rev.* Oct. 1846. (A. J. S.)

**Evangelical Association**, an ecclesiastical body which took its rise in the year 1800, in the eastern part of Pennsylvania, and resulted from an organization into classes and congregations of the disciples of Rev. Jacob Albright, a native of Eastern Pennsylvania, who, being impressed by the general decline of religious life, and the corruption of doctrines and morals that prevailed in the German churches in that portion of country, undertook, about 1790, to work a reform among them. The effect of his first labors encouraged

him to travel through a great part of the country at his own expense, preaching the Gospel as he had opportunity in churches, schools, private houses, on public roads, etc. Although he commenced his labors without any ulterior design of forming a distinct ecclesiastical organization, yet he soon found it necessary to unite his converts, scattered over several counties, into small societies for mutual support and sympathy. At a meeting called for the purpose of consulting upon the best measures to be adopted for the furtherance of a cause in which they all felt a deep interest, the assembly, without regard to the teachings of High-Churchism respecting a valid ministry, unanimously elected and ordained Mr. Albright as their pastor or bishop, authorizing him to exercise all the functions of the ministerial office over them, and declared the Bible to be their rule of faith and practice. This organization, incomplete at first, was soon after considerably improved by the adoption of a creed and rules for Church government. In course of time, as laborers increased and the society spread, annual conferences were held; and in 1816, sixteen years after the first organization of the Church, a general conference was held, for the first time, in Union County, Pa., which consisted of all the elders in the ministry. Since 1843 a general conference, composed of delegates elected by the annual conferences from among their elders, has held quadrennial sessions. For the first thirty years of its existence the society struggled against violent opposition; but for the last thirty-eight years it has made rapid progress, so that it now (1868) comprises 14 annual conferences, and 486 itinerant and 379 local preachers, whose field of labor extends over the Northern, Western, and Pacific states, and into Canada and Europe. The membership approximates 65,000, all adults; the number of churches is 791 and parsonages 297, valued together at \$1,600,000; Sunday-schools 834, and scholars 45,000; catechetical classes, exclusive of those connected with Sunday-schools, 341, with 3559 catechumens. In the year 1838 a missionary society was formed, which has up to this time supported about 600 home missions, most of which are now self-supporting stations, circuits, or even conferences. At present this society supports 153 missions in America and Europe. For a number of years it has been gathering funds for heathen missions, and is expected to enter upon that field ere long. There is also a Sunday-school and tract society in operation, publishing Sunday-school books and religious tracts. A charitable society was founded in the year 1835, which has received funds amounting to a considerable sum, by bequests, the interest of which is annually applied to the support of the widows and orphans of poor itinerant preachers. There are also church-building societies established in several conferences. The North-western College, a flourishing institution of learning located at Plainfield, Ill., has been founded, and is supported by the Western conferences of the Church, and an endowment is being collected which now amounts to \$65,000. Several seminaries are also patronized by the Church. An orphan institution, favorably located at Flat Rock, Ohio, has been founded within a few years, and is in successful operation. A prosperous publishing-house at Cleveland, Ohio, issues four periodicals: one, its German organ, *Der Christliche Botschafter*, a large weekly, and the oldest German religious paper published in America; another, its English organ, *The Evangelical Messenger*, also a weekly; and the third and fourth, *Der Christliche Kinderfreund*, and the *Sunday-school Messenger*, are monthly juvenile papers, intended chiefly for Sunday-schools. The weekly papers have together a circulation of 25,000, and the juveniles 30,000. Perhaps no other religious denomination in America is better organized and disciplined for work than the Evangelical Association. In doctrine and theology this Church is Arminian; with regard

to sanctification, Wesleyan; but generally holds the essential doctrines of the Gospel as they are held in common by the evangelical churches of the land, with all of whom it aims to cultivate a fraternal spirit. The ministry is divided into two orders, deacons and elders; and, faithful to the principles and examples of their founder, they practise itinerancy. The highest permanent order is the eldership; for, although the society has its bishops (elected by General Conference) and presiding elders (elected by the individual conferences), yet these, to be continued, must be re-elected every four years; and if not re-elected they hold no higher rank or privilege than an elder. The General Conference meets every four years, and constitutes the highest legislative and judicial authority recognised in the Church; then come the annual and quarterly conferences, whose transactions are mostly of an executive and practical nature for the promotion of the work. In its mode of worship and usages the Evangelical Association is Methodistic; and for this reason, as well as the fact that Mr. Albright was a member of the Methodist Episcopal Church until he commenced his labors among the Germans of Pennsylvania, it is sometimes, though erroneously, called the German Methodist Church. For a number of years after its rise the Evangelical Association labored almost exclusively in the German language; but the rising generation, and the success of some preachers who labored also in the English language, have, during the last fifteen years, demanded considerable attention to the English, and the Church is now energetically engaged in both languages to accomplish her mission, to which she believes herself to be providentially called—to save souls, and bring glory to God in the highest. (R. Y.)

The following table, taken from the *Almanac of the Evangelical Association* for 1869, gives the names of the annual conferences, the year of the organization of each, the number of itinerant preachers, local preachers, Church members, Probationers, Sunday-schools, S. school scholars, and Sunday-school scholars:

Conferences.	When organized.	Itinerant preachers.	Local preachers.	Church members.	Probationers.	Sunday-schools.	S. school scholars.	Churches.

**Evangelical Church Conference**, the name of periodical meetings of delegates of the Protestant state churches of Germany. The object of these meetings is to have a free exchange of opinion on important questions of ecclesiastical life, to furnish a bond of union for the several Protestant state churches of Germany, and to advance their harmonious development. The impulse to meetings of this kind proceeded, in 1815, from king Wilhelm of Würtemberg. Invitations to a conference were issued conjointly by Prussia and Würtemberg to the governments of South Germany, and by Prussia and Hanover to the governments of Northern Germany. At the first conference, which met at Berlin in 1846, the Church boards of all the German states except Austria, Bavaria, Oldenburg, and the Free Cities were represented. This meeting was secret, and the proceedings have never been officially published. It is known, however, that they concerned

the periodical holding of conferences of this kind, confessions, liturgy, and Church constitution. The second meeting was to have been held at Stuttgart in 1848, but did not take place, in consequence of the disturbances caused by the revolution. At the Church diets (q. v.) of Stuttgart (1850) and Elberfeld (1851), ecclesiastical officers of several countries deliberated on the resumption of the official Church conferences, and suggested the establishment of a central organ, which was to contain the decrees of all the supreme Church boards of the German States. Accordingly, the conference met again at Eisenach in June, 1852, and in the same year an official central organ of the German Church governments was established at Stuttgart (*Allgem. Kirchenblatt für das evangel. Deutschland*). Since then the conference has met always at Eisenach, in 1855, 1857, 1859, 1861, 1863, 1865, and 1868. One of the first results of the conferences was a compilation of 150 of the best German Protestant hymns (*Kirchenlieder*), which was recommended to the several states as a proper basis of, or appendix to, the hymn-books of the several churches. In 1855 some resolutions concerning the treatment of sects by the state churches were unanimously adopted. These resolutions declared against the principle of full religious liberty, but recommended that the members of sects be allowed to contract valid civil marriages. The same conference adopted resolutions in behalf of a better observance of Sunday; of giving to congregations the right of co-operation (*totum negativum*) in the appointment of ecclesiastical officers, and of introducing special liturgical devotions during the week of Passion. The conference of 1857 held important discussions on the revival of Church discipline, on reforms in the legislation concerning divorces, and on Christian burial. Among the results of the later meetings of the conference were the following: The introduction of a prayer for the German fatherland, to be used every Sunday in every Protestant church; resolutions on Church patronage, on liturgical matters, on the examinations of theological students, on catechization, on the revision of the Lutheran Bible, on the best way of collecting the statistics of the German Lutheran Church, on the construction of evangelical churches, on the State-Church system, etc. An account of each meeting of the conference since 1855 is given in Matthes, *Allgem. Kirchliche Chronik*; see also Herzog, *Real-Encycl.* iv, 273.

**Evangelical Councils.** See CONSILIA EVANGELICA.

**Evangelical Union,** "the name assumed by a religious body constituted in Scotland in 1843 by the Rev. James Morison, of Kilmarnock, and other ministers, whose doctrinal views had been condemned in the United Secession Church, to which they previously belonged, and the congregations adhering to them. They were soon afterwards joined by a number of ministers and congregations of similar views previously connected with the Congregational Union or Independents of Scotland, and have since extended themselves considerably in Scotland and the north of England. Their doctrinal views are those which, from the name of Mr. Morison, have now become known in Scotland as *Morisonian*. See MORISONIANISM. Their church government is Independent, but in some of the congregations originally Presbyterian the office of the eldership is retained. A notable practice of this denomination is the very frequent advertising of sermons and their subjects" (Chambers, *Cyclop.* s. y.). In 1851 the Union had in Scotland 28 places of worship, with 10,319 sittings.

**Evangelist** (*εὐαγγελιστής*), the name of an order or body of men included in the constitution of the Apostolic Church (q. v.). The term is applied in the New Testament to a certain class of Christian teachers who were not fixed to any particular spot, but travelled either independently, or under the direction of

one or other of the apostles, for the purpose of propagating the Gospel. The absence of any detailed account of the organization and practical working of the Church of the first century leaves us in some uncertainty as to their functions and position. The meaning of the name, "The publishers of glad tidings," seems common to the work of the Christian ministry generally, yet in Eph. iv, 11 the "evangelists" appear, on the one hand, after the "apostles" and "prophets" on the other, before the "pastors" and "teachers" (thus: *αὐτὸς ἔδωκε τοῖς μὲν ἀποστόλοις, τοῖς δὲ προφήταις, τοῖς δὲ εὐαγγελιστάς, τοῖς δὲ ποιμένας καὶ διδασκάλους*). Assuming that the apostles here, whether limited to the twelve or not, are those who were looked upon as the special delegates and representatives of Christ, and therefore higher than all others in their authority, and that the prophets were men speaking under the immediate impulse of the Spirit words that were mighty in their effects on men's hearts and consciences, it would follow that the evangelists had a function subordinate to theirs, yet more conspicuous, and so far higher than that of the pastors who watched over a church that had been founded, and of the teachers who carried on the work of systematic instruction. This passage, accordingly, would lead us to think of them as standing between the two other groups—sent forth as missionary preachers of the Gospel by the first, and as such preparing the way for the labors of the second. The same inference would seem to follow the occurrence of the word as applied to Philip in Acts xxi, 8. He had been one of those who had gone everywhere "preaching" (*εὐαγγελιζόμενοι*) the word (Acts viii, 4), now in one city, now in another (viii, 40); but he has not the power or authority of an apostle, does not speak as a prophet himself, though the gift of prophecy belongs to his four daughters (xxi, 9), and he exercises apparently no pastoral superintendence over any portion of the flock. The omission of evangelists in the list of 1 Cor. xii may be explained on the hypothesis that the nature of Paul's argument led him there to speak of the settled organization of a given local Church, which of course presupposed the work of the missionary preacher as already accomplished, while the train of thought in Eph. iv, 11 brought before his mind all who were in any way instrumental in building up the Church universal. It follows, from what has been said, that the calling of the evangelist is expressed by the word *κηρύσσειν*, "preach," rather than *ἐδασκῶν*, "teach," or *παρακαλεῖν*, "exhort;" it is the proclamation of the glad tidings to those who have not known them, rather than the instruction and pastoral care of those who have believed and been baptized. This is also what we gather from 2 Tim. iv, 2, 5. Timothy is "to preach the word;" in doing this he is to fulfil "the work of an evangelist." It follows, also, that the name denotes a *work* rather than an *order*. The evangelist might or might not be a bishop-elder or a deacon. The apostles, so far as they evangelized (Acts viii, 25; xiv, 7; 1 Cor. i, 17), might claim the title, though there were many evangelists who were not apostles. The brother "whose praise was in the Gospel" (2 Cor. viii, 18) may be looked upon as one of Paul's companions in this work, and probably known by the same name. In short, the *itinerant* and temporary character of their calling chiefly serves to distinguish them from the other classes of Christian laborers. In this, as in other points connected with the organization of the Church in the apostolic age, but little information is to be gained from later writers. The name was no longer explained by the presence of those to whom it had been specially applied, and it came to be variously interpreted. Theodoret (on Eph. iv, 11) describes the evangelists (as they have been described above) as travelling missionaries. Chrysostom, as men who preached the Gospel, but without going everywhere (*ὡς περιηγητοὶ πανταχοῦ*); by which he probably denotes a re-

stricted sphere to their labors, in contrast with the world-wide commission of the apostles. The account given by Eusebius (*Hist. Eccles.* iii, 37), though somewhat rhetorical and vague, gives prominence to the idea of itinerant missionary preaching. Referring to the state of the Church in the time of Trajan, he says, "Many of the disciples of that time, whose souls the divine word had inspired with an ardent love of philosophy, first fulfilled our Saviour's precept by distributing their substance among the poor. Then traveling abroad, they performed the work of evangelists (*ἔργον ἐπιτέλουον εὐαγγελιστῶν*), being ambitious to preach Christ, and deliver the Scripture of the divine Gospels. Having laid the foundations of the faith in foreign nations, they appointed other pastors (*ποιμίνας τε καθιστάντες ἐτέρους*), to whom they intrusted the cultivation of the parts they had recently occupied, while they proceeded to other countries and nations." One clause of this description indicates a change in the work, which before long affected the meaning of the name. If the Gospel was a written book, and the office of the evangelists was to read or distribute it, then the writers of such books were *κατ' ἐξοχήν* THE evangelists. It is thus, accordingly, that Eusebius (*Hist. Eccles.* iii, 39) speaks of them, though the old meaning of the word (as in *Hist. Eccles.* v, 10, where he applies it to Pantænus) is not forgotten by him. Soon this meaning so overshadowed the old that Ecumenius (Estius on Eph. iv, 11) has no other notion of the evangelists than as those who have written a Gospel (compare Harless on Eph. iv, 11). Augustine, though commonly using the word in this sense, at times remembers its earlier signification (*Sermon* xcix and cclxvi). Ambrosianus (Estius, *l. c.*) identifies them with deacons. In later liturgical language the work was applied to the reader of the Gospel for the day (comp. Hooker, *Ecclesiastical Polity*, bk. lxxviii, 7, 9). In modern phraseology the term is almost exclusively applied to the writers of the canonical Gospels (q. v.). See Campbell's *Lectures on Ecclesiastical History*, i, 148-150; Neander's *History of the Planting of the Christian Church*, i, 173; Middelboe, *De evangelistis ecclesie apostolicæ* (Hafn. 1779); Schaff, *Apostolical Church*, § 131.—Kitto, s. v.; Smith, s. v.

**Evangelistarium** (*Book of the Gospels*), the name given in the earlier ages to a volume containing the portions appointed to be read from the Gospels. If the four Gospels complete were contained in the book, it was called *Evangelistarium Plenarium*.—Procter, *Common Prayer*, p. 9; Siegel, *Alterthümer*, iii, 249. See MANUSCRIPTS OF THE BIBLE.

**Evangelium Æternum** (*Everlasting Gospel*), the name given to a book published in the 13th century (A. D. 1254), which was properly entitled *Introductorius in Evangelium æternum*, probably written by the Franciscan Gerhardus. The idea of a new "everlasting Gospel" was one of the peculiar notions of Joachim of Floris († 1202), who attacked the corruptions of the Church, and predicted an approaching renovation. See JOACHIM OF FLORIS. These predictions were appropriated by the Franciscans as really referring to the rise and character of their order, which was founded by Francis of Assisi six years after Joachim's death. An apocalyptic party arose among the Franciscans, which seems to have been led by Gerhardus, and by Johannes of Parma (q. v.). The *Introductorius in Evangelium æternum* seems to have been chiefly made up from three of the writings of Joachim, viz. *Concordiæ Veter. et Nov. Test.*; *Psalm. decem Chordarum*; and *Apocalypsis nova*. It set forth Joachim's doctrine of the "dispensations" (*status*) of the Church, the last of which, the dispensation of the Spirit, was to be opened about A. D. 1200. The movement was a new form of Montanism. "Many vague notions were entertained about the Eternal Gospel of the Franciscans, arising from superficial views, or a superficial understanding

of Joachim's writings, and the offspring of mere rumor of the heresy-hunting spirit. Men spoke of the Eternal Gospel as of a book composed under this title, and circulated among the Franciscans. Occasionally, also, this Eternal Gospel was confounded perhaps with the above-mentioned *Introductorius*. In reality, there was no book existing under this title of the Eternal Gospel, but all that is said about it relates simply to the writings of Joachim. The opponents of the Franciscan order objected to the preachers of the Eternal Gospel, that, according to their teaching, Christianity was but a transient thing, and a new, more perfect religion, the absolute form, destined to endure forever, was to succeed it. William of St. Amour (*De periculis novissimorum temporum*, p. 38) says: 'For the past fifty-five years some have been striving to substitute in place of the Gospel of Christ another gospel, which is said to be a more perfect one, which they call the Gospel of the Holy Spirit, or the Everlasting Gospel;' whence it is manifest that the anti-Christian doctrine would even now be preached from the pulpits if there were not still something that *withholdeth* (2 Thess. ii, 6), namely, the power of the pope and the bishops. It is said in that accursed book, which they called the Everlasting Gospel, which had already been made known in the Church, that the Everlasting Gospel is as much superior to the Gospel of Christ as the sun is to the moon in brightness, the kernel to the shell in value. The kingdom of the Church, or the Gospel of Christ, was to last only till the year '1200.' In a sermon, St. Amour points out the following as doctrines of the Everlasting Gospel: that the sacrament of the Church is nothing; that a new law of life was to be given, and a new constitution of the Church introduced; and he labors to show that, on the contrary, the form of the hierarchy under which the Church then subsisted was one resting on the divine order, and altogether necessary and immutable" (Neander, *Church Hist.* iv, 619). The *Introductorius* has not come down to us, but its contents are partly known from a writing of Hugo of Caro, preserved in Quetif and Echard, *Script. Ord. Prædic.* i, 262 sq., and partly from extracts given by the inquisitor Nicolas Eymeric, in his *Directorium Inquisitorium*, pt. ii, qu. ix, No. 4. The theologians of Paris attacked the book upon its first appearance, and it was formally condemned by Alexander IV, A. D. 1255.—Neander, *Church History* (Torrey's transl.), iv, 618; Engelhardt *Kircheng. Abhandlungen* (Erlang. 1832); Engelhardt in Herzog, *Real-Encyclop.* iv, 275; Gieseler, *Ch. Hist.* per. iii, § 70.

**Evans, Caleb**, D. D., son of the Rev. Hugh Evans, was born at Bristol about the year 1737, and was educated at the Ilomerton Academy. In 1767 he became colleague to his father as pastor of the church, and tutor in the academy at Broadmead. In 1770 he originated "The Bristol Education Society," to supply the dissenting congregations, and especially the Baptist, with able and evangelical ministers, as well as missionaries for propagating the Gospel in the world. From this time to the period of his death, August 9, 1791, Dr. Evans continued to discharge the duties of president of the society. He published an *Answer to Dr. Priestley's Appeal*, and a small volume entitled *Christ Crucified, or the Scripture Doctrine of the Atonement* (Bristol, 1789, sm. 8vo), besides occasional sermons. On the breaking out of the American War he advocated the freedom of the colonies, and wrote *A Letter to John Wesley, in reply to his Calm Address to the American Colonies* (London, 1775, 12mo); also a *Reply to Fletcher's Vindication of Wesley's Address* (Bristol, 1776, 12mo).—Jones, *Christian Biography*, p. 144; Allibone, *Dict. of Authors*, s. v.

**Evans, Christmas**, an eloquent Welsh preacher, was born December 25, 1766, at Llandyssul, Cardiganshire. His father was poor, and he had no school education. At seventeen he was converted, and joined

the Baptist Church. He then first learned to read the Welsh Bible, and soon after began to exhort. His first settlement as a preacher was at Lley'n; two years after he went to Anglesea to labor as an evangelist at ten preaching places, on a salary at first of £17 a year. Here he spent thirty-four years. He early showed oratorical powers, but in Anglesea he began to be a wonder. For a series of years he made preaching tours through South Wales, and the memory of his sermons remains to this day. The following sketch of one of these sermons is given by his biographer, the Rev. D. M. Evans: "In the midst of a general hum and restlessness the preacher had read for his text, 'And you that were some time alienated and enemies in your mind by wicked works, yet now hath he reconciled in the body of his flesh through death, to present you holy and unblamable, and unapproachable in his sight.' His first movements were stiff, awkward, and wrestling, while his observations were perhaps crude and commonplace rather than striking or novel; but he had not proceeded far before, having thus prepared himself, he took one of his wildest flights, bursting forth at the same time into those unmelodious but all-piercing shrieks under which his hearers often confessed his resistless power. Closer and closer draw in the scattered groups, the weary loungers, and the hitherto listless among the motley multitude. The crowd becomes dense with eager listeners as they press on insensibly towards the preacher. He gradually gets into the thickening plot of his homely but dramatic representation, while, all forgetful of the spot on which they stood, old men and women, accustomed to prosy thoughts and ways, look up with open mouth through smiles and tears. Big burly country folk, in whom it might have been thought that the faculty of imagination had long since been extinguished, became engrossed with ideal scenes. Men 'whose talk is of bullocks' are allured into converse with the most spiritual realities. The preachers present become dazzled with the brilliance of this new star on the horizon; they start on their feet round the strange young man, look hard at him in perfect amazement; loud and rapturous confirmations break forth from their lips: 'Amen,' 'Ben digedig,' 'Dioelch byth,' fall tumultuously on the ear; the charm swells onwards from the platform to the extreme margin of the wondering crowd, and to the occasional loud laugh there has now succeeded the baptism of tears. The excitement is at its highest; the preacher concludes, but the weeping and rejoicing continue till worn out nature brings the scene to an end." His chief qualities as a preacher "include passion, or ardent excited feeling, a dramatic imagination, and grotesque humor. The published scraps of sermons which remain, and have been translated into English, illustrate these qualities, and almost only these."—*Christian Spectator* (London) Sept. 1863, reprinted in *The Theolog. Eclectic*, i, 147; Evans, *Memoir of Christmas Evans* (1862); Stephen, *Life of Christmas Evans* (London, 1847); *Sermons of C. Evans, with Memoir by Jas. Cross* (Phila. 1854, 8vo).

**Evans, John, D. D.**, an eminent Nonconformist divine, was born in 1680, at Wrexham, in Denbighshire. His father was minister of Wrexham. The son was first placed under the care of Mr. Thomas Rowe, near London, and studied afterwards at the seminary of Mr. Timothy Jollie. He was ordained and settled at Wrexham, August 18, 1702. "Dr. Daniel Williams, of London, hearing that Mr. Evans was invited to Dublin, to prevent his leaving England sent for him to the metropolis, where he first assisted the doctor, afterwards became co-pastor, and at length succeeded him at his death. In the Arian controversy he refused to subscribe to any articles, but maintained the orthodox sentiments. In the public services of the dissenters he was often called to preside, and was appointed to assist in completing Matthew Henry's Commentary, of which he supplied the notes on the Epistles

to the Romans so well, that Dr. Doddridge says, 'The exposition of the Romans, begun by Henry, and finished by Dr. Evans, is the best I ever saw.' He was for some years preparing to write a history of non-conformity from the Reformation to the civil wars, but, by his death, the work devolved on Mr. Neal. He died May 16, 1730." Besides a number of separate sermons, he published *Discourses concerning the Christian Temper*, 38 Sermons (4th ed. London, 1737, 2 vols. 8vo), with *Life by John Erskine* (1825, 8vo), which are called by Dr. Watts "the most complete summary of those duties which make up the Christian life," and by Doddridge "the best practical pieces in our language." See Bogue and Bennett, *History of Dissenters*, ii, 364; Jones, *Christian Biography*, p. 143; Skeats, *Free Churches of England* (London, 1868, 8vo), p. 249.

**Evanson, Edward**, a minister of the Church of England, was born at Warrington, Lancashire, in 1731, and was educated at Emmanuel College, Cambridge, where he passed M.A. in 1753. In 1768 he became vicar of South Mimms; in 1770, rector of Tewkesbury. He soon began to manifest doubts about the Christian doctrines of the Incarnation and the Trinity. For a sermon preached in 1771 he was prosecuted. In 1778 he resigned his preferments in the Church, and retired to Mitcham, where he kept a school. He died Sept. 25, 1805. Among his writings are, *On the Observance of Sunday* (Ipswich, 1792);—*The Dissonance of the four Evangelists, and their Authority* (Gloucester, 1805, 8vo). In this work Evanson rejects all the Gospels but Mark, and also Romans, Ephesians, Colossians, Hebrews, James, Peter, John, and Jude. It was refuted by Falconer, *Bampton Lectures*, 1810.

**Evaristus**, bishop of Rome, is said to have been born at Bethlechem, and to have succeeded Clement as bishop of Rome about A.D. 100. He is said to have first organized Rome into parishes, and to have fallen a martyr A.D. 109.

**Evarts, Jeremiah**, secretary of the American Board of Commissioners for Foreign Missions, was born in Sunderland, Vt., Feb. 3, 1781, and graduated at Yale College in 1802. He studied law, and practised it at New Haven up to 1810, when he removed to Charlestown in order to edit *The Panoplist*, which he continued up to 1820. In 1811 he entered the service of the American Board as treasurer. He continued in that work, first as treasurer, then as secretary (in 1821), during the rest of his life. In 1820 *The Panoplist* was discontinued, and the publication of *The Missionary Herald* was begun by the American Board, with Mr. Evarts as its editor. He died in Charleston, S. C. (whither he had gone for the benefit of his health), May 10, 1831. The Reports of the Board during his connection with it were generally from his pen, and that of 1830, the last which he wrote, is a document of great power. His essays, under the signature of William Penn, on the rights and claims of the Indians, were published in 1829. See Tracy, *Memoirs of Jeremiah Evarts* (Boston, 1845); *Christian Review*, xi, 20; *Spirit of Pilgrims*, iv, 599.

**Eve** (Heb. *Chavak'*, חַוָּה, *life or living*, so called as the progenitor of all the human family; Sept. accordingly translates *Zoë* in Gen. iii, 20, elsewhere *Eva*, N. Test. *Eva*, Josephus *Evea*, *Ant.* i, 1, 2, 4), the name given by Adam to the first woman, his wife (Gen. iii, 20; iv. 1). B.C. 4172. The account of her creation is found at Gen. ii, 21, 22. It is supposed that she was created on the sixth day, after Adam had reviewed the animals. Upon the failure of a companion suitable for Adam among the creatures which were brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs (according to the Targum of Jonathan, the thirteenth from the right side!), which he fashioned into a woman.

an, and brought her to the man (comp. Plato, *Sympos.* p. 189, 191). The Almighty, by declaring that "it was not good for man to be alone," and by providing for him a suitable companion, gave the divine sanction to marriage and to *monogamy*. "This companion was taken from his side," remarks an old commentator, "to signify that she was to be dear unto him as his own flesh. Not from his head, lest she should rule over him; nor from his feet, lest he should tyrannize over her; but from his side, to denote that species of equality which is to subsist in the marriage state" (Matthew Henry, *Comment.* in loc.). Perhaps that which is chiefly adumbrated by it is the foundation upon which the union between man and wife is built, viz. identity of nature and oneness of origin. Through the subtlety of the serpent (q. v.), Eve was beguiled into a violation of the one commandment which had been imposed upon her and Adam. She took of the fruit of the forbidden tree and gave it her husband (comp. 2 Cor. xi, 3; 1 Tim. ii, 13). See ADAM. The apostle seems to intimate (1 Tim. ii, 14, 15) that she was less aware than her husband of the character of her sin; and that the pangs of maternity were to be in some sort an expiation of her offence. The different aspects under which Eve regarded her mission as a mother are seen in the names of her sons. At the birth of the first she said "I have gotten a man from the Lord," or, as some have rashly rendered it, "I have gotten a man, *even* the Lord," mistaking him for the Redeemer. When the second was born, finding her hopes frustrated, she named him Abel, or *vanity*. When his brother had slain him, and she again bare a son, she called his name Seth, and the joy of a mother seemed to outweigh the sense of the vanity of life: "For God," said she, "hath appointed me another seed instead of Abel, for Cain slew him." See ABEL.

The Eastern people have paid honors to Adam and Eve as to saints, and have some curious traditions concerning them (see D'Herbelot, *Bibliothèque Orientale*, s. v. Havah; Fabricius, *Pseudepigr. V. Test.* i, 103 sq.). There is a remarkable tradition preserved among the Rabbis that Eve was not the first wife of Adam, but that previous to her creation one had been created in the same way, which, they sagaciously observe, accounts for the number of a man's ribs being equal on each side. *Lilith*, or *Lilis*, for this was the name of Adam's first consort, fell from her state of innocence without tempting, or, at all events, without successfully tempting her husband. She was immediately ranked among the fallen angels, and has ever since, according to the same tradition, exercised an inveterate hatred against all women and children. Up to a very late period she was held in great dread lest she should destroy male children previous to circumcision, after which her power over them ceased. When that rite was solemnized, those who were present were in the habit of pronouncing, with a loud voice, the names of Adam and Eve, and a command to Lilith to depart (see Eisenmenger, *Entdecktes Judenthum*, ii, 421). She has been compared with the *Pandora* of classic fable (Bauer, *Mythol.* i, 96 sq.; Buttman, *Mythologus*, i, 48 sq.; Hasse, *Entdeckung*, i, 232).

See Olmsted, *Our First Mother* (N. Y. 1852); Reineccius, *De Adamo androgyno* (Weissenf. 1725); Thilo, *Filius matris viventium in virum Jehovam* (Erlangen, 1748); Köcher, *Comment. philol. ad Gen. vi*, 18-20 (Jen. 1779); Schulthess, *Exeget. theolog. Forschungen*, i, 421 sq.; Bastard, *Doctrine of Geneva*, ii, 61; Hughes, *Female Characters*, p. 1.

**Evelyn, JOHN**, was born Oct. 31, 1620, at his father's seat of Wotton, in Surrey. He was educated at Balliol College, Oxford, served a short time as a volunteer in the Low Countries, and returned at the breaking out of the Civil War to rejoin the king's forces; but, on the king's defeat at Gloucester, he left England, and during the rest of the troubles he travelled in France and Italy. In 1652 he returned

to England, and on the restoration he took an honorable part in public business. He died Feb. 27, 1706. He was one of the original members of the Royal Society, and a frequent contributor to its transactions. His most valuable work was *Sylva, or a Discourse on Forest Trees*. His *Diary* (not published till 1818) is exceedingly useful for the knowledge it conveys of the times in which Evelyn lived. The *Diary and Correspondence* has lately been re-edited, with much new matter (Lond. 1850-52, 4 vols. 8vo). His *History of Religion, a rational Account of the true Religion*, was also first published from the MS. in 1850 by the Rev. N. M. Evanson (London, 2 vols. 8vo); and in 1848 his *Life of Mrs. Godolphin* (from MSS.) was published by bishop Wilberforce.—Allibone, *Dict. of Authors*, s. v.

**Evening** (עֶרֶב, *e' reb, dusk*; ἑσπέρα, ὄψια), the period following sunset, with which the Jewish day (νύχθήμερον) began (Gen. i, 5; Mark xiii, 35). See DAY. Some writers have argued that the first creative day (Gen. i, 5) is reckoned from the *morning*, when light first appeared (ver. 3), as if "evening" then designated not a *portion* of time, but a *termination* of the first creative period or age; but this does violence to the whole order of the narrative, in which a period of night invariably precedes one of daylight, precisely in accordance with the conventional Hebrew usage of a νύχθήμερον or "evening-and-morning," and as the terms are expressly defined in the former clause of ver. 5. If "evening" in the phrase in question be distinguishable from the "night" as a terminus, it is certainly a *terminus à quo*, as dating the latter from the aboriginal "darkness," ver. 2, and not a *terminus ad quem* of the ensuing day. See NIGHT.

The Hebrews appear to have reckoned *two* evenings in each day; as in the phrase בֵּין עֶרְבָיִם בֵּין, *between the two evenings* (Exod. xvi, 12; xxx, 8), by which they designated that part of the day in which the paschal lamb was to be killed (Exod. xii, 6; Lev. xxiii, 5; Num. ix, 3, 5; in the Heb. and margin); and, at the same time, the evening sacrifice was offered, the lamps lighted, and the incense burned (Exod. xxix, 39, 41; Num. xxviii, 4). But the ancients themselves disagreed concerning this usage; for the Samaritans and Caraites (comp. Reland, *De Samarit.* § 22, in his *Diss. Miscell.* vol. ii; Trigland, *De Caraitis*, chap. iv) understood the time to be that between sunset and twilight, and so Aben Ezra at Exod. xii, 6, who writes that it was about the third hour (9 o'clock P.M.); the Pharisees, on the other hand, as early as the time of Josephus (*War*, vi, 9, 3), and the Rabbins (*Pesach*, v, 3), thought that "the first evening" was that period of the afternoon when the sun is verging towards setting (Gr. *ἑσπέρα πρώτη*), "the second evening" the precise moment of sunset itself (*ἑσπέρα ὄψια*), according to which opinion the paschal lamb would be slaughtered from the ninth to the eleventh hour (3 to 5 o'clock P.M.). The former of these opinions seems preferable on account of the expression in Deut. xvi, 6, "when the sun goeth down," בְּבֹאֵי הַשָּׁמֶשׁ; and also on account of the similar phraseology among the Arabs (Borhaneddin, *Enchiridion Studiosi*, viii, 36, ed. Caspin, Lips. 1838; *Kamis*, p. 1917; on the contrary, see Pococke, *Ad Carmen Tograi*, p. 71; Talmud Hieros. *Berach.* chap. i; *Babyl. Sabb.* ii, 346, fol.; Bochart, *Hieroz.* i, 634, Lips.).—Gesenius, *Thes. Heb.* p. 1065. See PASSOVER.

**EVENING SACRIFICE.** See DAILY OFFERING.

**Even-Song**, the form of divine service appointed to be "said or sung" in the evening of each day in the Church of England, the expression "sung" meaning not an intonation of the voice, where the service is otherwise professedly read, but the chanting of the service, as in cathedrals.—Eden, *Churchman's Dictionary*, s. v.

**Everett, JOSEPH**, an early Methodist Episcopal

minister, was born in Queen Anne's Co., Md., June 17, 1732; was converted in the time of Whitefield, under the preaching of the Presbyterians (then called "New Lights"), in June, 1763, but soon lost his religion, and remained in sin until in 1778 or 1779 he was reclaimed through Asbury's preaching. In 1780 he entered the itinerant ministry, and labored as pastor and presiding elder with great unction and success until 1804, when he became superannuated, and died in Dorchester, Md., Oct. 16, 1809, having preached Christ earnestly for thirty years, and been instrumental in the salvation of many souls. He was a preacher "mighty through God," and died in great triumph. See *Minutes of Conferences*, i, 179; also *Autobiographical Sketch in the Arminian Magazine*, vol. ii; Sprague, *Annals*, vii, 71; Stevens, *Hist. M. E. Church*. (G. L. T.)

**Everlasting.** See ETERNAL.

**Everlasting Gospel.** See EVANGELIUM ÆTERNUM.

**Eves, or Vigils,** the nights or *evenings* before certain holidays of the Church. In the primitive times, it was the custom for Christians to pass great part of the nights that preceded certain holidays in religious exercises; these, from their being performed in the night-time, were called vigils or watchings. One of the most remarkable in the early Church was the Easter vigil. According to the testimony of Lactantius and Jerome, the early Christians expected the second coming of Christ on this night, and prepared themselves, by fasting, prayer, and other spiritual exercises, for that great event. The illuminations on these vigils were often splendid. The night-watchings, in all probability, owed their origin to the necessity under which the primitive Christians lay of meeting by night: when the occasion ceased, the custom still continued. These night-meetings came to be much abused. Vigilantius, in the 4th century, strongly inveighed against them on the ground of their being injurious to the morals of young persons. He was opposed in this view by Jerome. Complaints, however, continued to increase, till at length the custom was abolished. The fasts, however, were retained, keeping the former name of vigils. The Church of England has assigned vigils to several of her festivals, but has prescribed no other observance of them than the reading of the collect peculiar to the festival. The holidays which have vigils may be seen in the English Prayer-book, in the table of the vigils, fasts, and days of abstinence to be observed in the year. There are no vigils recognised in the Protestant Episcopal Church, the table of vigils being left out by the revisers. The Methodist Episcopal Church observes one vigil in the year, the *Watch-night*, Dec. 31, in which service is kept up until midnight.—Bingham, *Orig. Eccl.* bk. viii, ch. x, § 1; xiii, 111, 4; Eden, *Churchman's Dict.* s. v.

**E'vi** (Heb. *Evi'*, עֵבִי, *desire* or *dwelling*; Sept. *Ebi', Ebit'*), one of the five kings ("dukes") of the Midianites (near Sihon) slain by the Israelites in the war arising out of the idolatry of Balaam, induced by the suggestion of Balaam (Num. xxxi, 8), and whose lands were afterwards allotted to Reuben (Josh. xiii, 21). See MIDIAN.

**Evidence.** I. Evidence is the rendering in the A. V. of עֵדוּת, *se'pher*, a *book* (as usually rendered), or writing (q. v.) generally, hence a document of title, i. q. *deed* or *bill of sale* (Jer. xxxii, 10, 11, 14, 41); ἔλεγχος, *proof* (Heb. xi, 1; "reproof," 2 Tim. iii, 16, i. e. *conviction*).

II. Evidence is defined by Blackstone "to signify that which demonstrates, makes clear, or ascertains the truth of the very fact or point in issue, either on the one side or the other" (*Comm.* iii, 23). "*Intuitive evidence* comprehends all first truths, or principles of common sense, as 'every cause implies the operation of a cause;' axioms in science, as 'things equal to the

same thing are equal to one another;' and the evidence of *consciousness*, whether by sense, or memory, or thought, as when we touch, or remember, or know, or feel anything. Evidence of this kind arises directly from the presence or contemplation of the object, and gives knowledge without any effort upon our parts. *Deductive evidence* is distinguished as demonstrative and probable. *Demonstrative evidence* rests upon axioms, or first truths, from which, by ratiocination, we attain to other truths. It is scientific, and leads to certainty. It admits not of degrees; and it is impossible to conceive the contrary of the truth which it establishes. *Probable evidence* has reference, not to necessary, but contingent truth. It admits of degrees, and is derived from various sources; e. g. experience, analogy, and testimony" (Fleming, *Vocabulary of Philosophy*, s. v.).

The Scotch school of metaphysics presents the doctrine of evidence as follows: "The theory of evidence was not unknown to Aristotle and the ancient writers, but it is chiefly to the researches of modern logicians, from Bacon downwards, that we are indebted for a complete exposition of it. The grounds on which we believe a statement to be either true or false are termed the evidence. These grounds, it is obvious, may vary in kind as well as in degree. Some truths are capable of being established with undoubted certainty; others, again, admit of a proof more or less strong. It is of great importance, therefore, to know by what kind of evidence any fact or statement can be supported, and thus we may readily ascertain to what extent our belief in it may be carried. The two great classes into which all kinds of evidence are usually reduced are *intuitive* and *deductive*, the former calling for immediate and irresistible belief, independently of any process of argumentation whatever; the latter requiring for its proof various consecutive steps of reasoning. Some writers are in the habit of dividing evidence into three classes: intuitive, deductive, and demonstrative, and the evidence of testimony. Under intuitive evidence, which commands instant and irresistible belief, are generally included, besides those *à priori* truths which are necessarily involved in an act of consciousness, the evidence of sense, of memory, and of axioms or general principles. It is well, however, to bear in mind that consciousness and intuitive evidence are convertible terms, and that in no sense entitled to be considered as resting on intuitive evidence which is not involved in an act of consciousness. This view of the subject to doubt limits the number of intuitive, and therefore dogmatically certain truths; sufficient, however, remains to establish a sure foundation for all future reasonings of every kind. And this is all that ought to be desired. Those truths only are entitled to be ranked as intuitions which we cannot deny without involving ourselves in an obvious contradiction. What is essentially necessary to the operation of our intellectual and moral nature is intuitive. We cannot think, for example, without being subjected to the influence of the evidence of consciousness. To these, then, in so far as man is concerned, dogmatical certainty belongs. He cannot doubt their truth without disclaiming the nature with which he has been endowed. The evidence of intuition, or consciousness, is certain in itself, but from its truths no other truths can be deduced. Hence the distinction drawn between this and all the other species of evidence, which are classed under one head, termed deductive. Deductive evidence, or that which is chiefly available in the evolution of unknown from known truths, is usually distinguished into two kinds, demonstrative and moral, or probable evidence, giving rise to a corresponding distinction in modes of reasoning. It is of great importance that the difference between demonstrative and probable evidence be kept constantly in view, that we may be prevented from confounding two species of truth so completely distinct from

one another. The evidence of demonstration applies to necessary, moral or probable evidence to contingent, truth. The great mass of objects upon which our judgment and reasonings are exercised rests upon probable evidence. Demonstrative evidence is very limited in the range of its application, extending no farther than to the relations of number and quantity, which are capable of being expressed in language so strictly definite as to admit of no misunderstanding or mistake. On the strict definition of terms rests the whole certainty of mathematical truth, which is not an absolute, therefore, but a hypothetical certainty; and to the great mass of phenomena, and events with which we are familiarly conversant, such a mode of reasoning would be altogether inapplicable. The language employed is too vague and ambiguous to admit of strict definition; and such is the imperfection of language that, however desirable it might be to have words used in a fixed meaning, it is impracticable. The idea has, no doubt, been entertained of reducing words, expressive of our views on general subjects, to a fixed and certain signification; and even the illustrious names of Leibnitz and Locke are found in connection with such a plan, and yet we fear the experience of all past ages must pronounce it utopian. However advantageous, indeed, such a plan in some respects might be, it is very doubtful whether it might not so fetter and constrain the mind that no scope would be given for the exercise of those powers which the labor required in procuring probable evidence summons into action. It is very injurious to the mind to entertain too strong a partiality for one species of evidence rather than another. We thereby lose sight of the important fact that the same kind of evidence is not equally applicable in all cases, and that therefore we ought only to require such evidences as the particular circumstances of the case admit. Instead, therefore, of being dissatisfied with the kind of evidence adduced, it ought to be our chief inquiry whether, in any given case, we have obtained the strongest evidence of that kind which is applicable."

On the distinction between probable and demonstrative evidence, see Butler, *Analogy of Religion* (Introduction). See also Gardner, *Christian Cyclopaedia*, p. 352; Bergier, *Dict. de Théologie*, ii, 531; Brown, *On Cause and Effect*, notes E, F; Abercrombie, *On Intellectual Powers*, pt. ii; Starkie, *On Evidence*, i, 471; Gambier, *On Moral Evidence* (London, 1824, 8vo); Locke, *Essay*, bk. iv, ch. 15.

**Evidences of Christianity**, the title generally given by English writers to the proofs of the divine origin of the Christian revelation. This branch of theology does not include demonstrations of the being of God against the atheists, but is directed against all who deny the divine authority of Christianity and of the Scriptures on which it rests. The term *Apologetics* has been adopted in Germany for the name of this science, and under that title and that of *Apoloogy* we have given an account of the forms which the proofs and defences of Christianity have assumed in the various periods of Church history. In this article we give (I.) a summary of the evidences as they are commonly stated by English writers; (II.) a summary of the views held by different writers as to the relative value of the several branches of evidence.

I. *Summary of Christian Evidences*.—The evidences of Christianity are usually classed by English writers under three heads—External, Internal, and Collateral. The *External* evidences are those which demonstrate the authenticity, credibility, and divine authority of the Scriptures, including the arguments from miracles and prophecy. The *Internal* evidence is drawn from the excellence and beneficial tendency of the doctrines and morals of Scripture, from the character of Christ, and from the marks of integrity, consistency, and inspiration which are inherent in the record. The *Collateral* evidence is drawn from the history of Chris-

tianity itself, from its marvellous diffusion, its effects upon human nature, upon the progress of society, and upon what is generally called civilization. One of the best sketches of the evidences, according to this classification of them, is that given by Watson (*Institutes*, vol. i). Preliminary to a consideration of these direct evidences, he gives an excellent sketch of the *presumptive* evidence, of which the following is a brief outline. Man is universally admitted, by all who admit the being of God, to be a moral and responsible agent, under the dominion of the law of God. But deists assert that this law is given in nature sufficiently, and that revelation is unnecessary. It can be shown, on the other hand, that human reason, unaided, has never afforded to man any clear standard of moral quality for actions, and that, even if it could do so, its decisions lack authority to control the will; they are, at best, but *opinions*, which may be received or not, at pleasure. History shows that sober views of religion have been found nowhere since the times of the patriarchs, except in the writings of the O. and N. T., and in writings drawn from them; and that whatever truth has been found in the religious systems of the heathen can be traced to revelation. Their notions as to the very rudimentary doctrines of religion, e. g. God, providence, immortality, etc., clearly show the necessity of revelation. Admitting, then, the presumption that a revelation should be given in some way, we may show, *à priori*, that it must (1) contain information on the subjects most important to man; (2) that it must accord with the principles of former revelations; (3) that it must have an external authentication; and (4) that it must contain provisions for its own effectual promulgation. All these conditions are fulfilled by the revelation given in the Scriptures of the Old and New Testament, and nowhere else.

1. The *external* evidences include miracles and prophecy. "We need not inquire whether external evidence of a revelation is in all cases requisite to him who immediately and at first receives it; for the question is not whether private revelations have ever been made by God to individuals, and what evidence is required to authenticate them, but what is the kind of evidence which we ought to require of one who professes to have received a revelation of the will of God, with a command to communicate it to us, and to enjoin it upon our acceptance and submission as the rule of our opinions and manners. He may believe that a divine communication has been made to himself, but *his* belief has no authority to command *ours*. He may have actually received it, but we have not the means of knowing it without *proof*. That proof is not the high and excellent nature of the truths he teaches; in other words, that which is called the *internal evidence* cannot be that proof. For we cannot tell whether the doctrines he teaches, though they should be capable of a higher degree of rational demonstration than any delivered to the world before, may not be the fruits of his own mental labor. He may be conscious that they are not, but *we* have no means of knowing that of which he is conscious except by his own testimony. To us, therefore, they would have no authority but as the opinions of a man whose intellectual attainments we might admire, but to whom we could not submit as to an infallible guide, and the less so if any part of the doctrine taught by him were either mysterious or above our reason, or contrary to our interests, prejudices, and passions. If, therefore, any person should profess to have received a revelation of truth from God to teach to mankind, and that he was directed to command their obedience to it on pain of the divine displeasure, he would be asked for some external authentication of his mission; nor would the reasonableness and excellence of his doctrines be accepted in place of this. The latter might entitle him to attention, but nothing short of the former would be thought a ground sufficiently strong for yielding to

him an absolute obedience. Without it he might reason and be heard with respect, but he could not *command*. On this very reasonable ground the Jews on one occasion asked our Lord, "By what authority doest thou these things?" and on another, "What sign showest thou unto us?" Agreeably to this, the authors both of the Jewish and the Christian revelations profess to have authenticated their mission by the two great external proofs, *MIRACLES* and *PROPHECY*, and it remains to be considered whether this kind of authentication be reasonably sufficient to command our faith and obedience.

The question is not whether we may not conceive of external proofs of the mission of Moses, and of Christ and his apostles, differing from those which are assumed to have been given, and more convincing. In whatever way the authentication had been made, we might have conceived of modes of proof differing in kind, or more ample in circumstance; so that to ground an objection upon the absence of a particular kind of proof, for which we have a preference, would be trifling. But this is the question: Is a mission to teach the will of God to man, under his immediate authority, sufficiently authenticated when *miracles* are really performed, and *prophecies* actually and unequivocally accomplished? We have, then, first to show that miracles and prophecies are possible, that their credibility can be established by human testimony, and that, when thus authenticated, they afford the necessary evidence of revelation. These topics will be treated under the heads of *MIRACLES* and *PROPHECY* (q. v.). The records of both miracles and prophecy are found in the Scriptures of the Old and New Testaments. The *antiquity* of these writings is demonstrated by the very fact of the existence, on the one hand, of the Jewish polity, and, on the other, of the Christian religion, as well as by the concurrent testimony of ancient profane authors. These books can be shown, by testimony more accurate and minute than exists with regard to any other ancient records, to be substantially the same now as when originally written, nay, that they have come down to our times without any material alteration whatsoever. The credibility of the testimony of the sacred writers themselves is fairly proved by the character of the men, by the circumstances under which they wrote, and by the entire absence of motive for falsification. Allowing, then, the New Testament to be genuine, it follows, "1. That the writers knew whether the facts they state were true or false (John i, 3; xix, 27, 35; Acts xxvii, 7, 9). 2. That the character of these writers, so far as we can judge by their works, seems to render them worthy of regard, and leaves no room to imagine they intended to deceive us. The manner in which they tell their story is most happily adapted to gain our belief. There is no air of declamation and harangue; nothing that looks like artifice and design: no apologies, no encomiums, no characters, no reflections, no digressions; but the facts are recounted with great simplicity, just as they seem to have happened, and those facts are left to speak for themselves. Their integrity, likewise, evidently appears in the freedom with which they mention those circumstances which might have exposed their Master and themselves to the greatest contempt amongst prejudiced and inconsiderate men, such as they knew they must generally expect to meet with (John i, 45, 46; vii, 52; Luke ii, 4, 7; Mark vi, 3; Matt. viii, 20; John vii, 48). It is certain that there are in their writings the most genuine traces not only of a plain and honest, but a most pious and devout, a most benevolent and generous disposition, as every one must acknowledge who reads their writings. 3. The apostles were under no temptation to forge a story of this kind, or to publish it to the world knowing it to be false. 4. Had they done so, humanly speaking, they must quickly have perished in it, and their foolish cause must have died with them, without

ever gaining any credit in the world. Reflect more particularly on the nature of those grand facts, the death, resurrection, and exaltation of Christ, which formed the great foundation of the Christian scheme, as first exhibited to the apostles. The resurrection of a dead man, and his ascension into an abode in the upper world, were such strange things that a thousand objections would immediately have been raised against them, and some extraordinary proof would have been justly required as a balance to them. Consider the manner in which the apostles undertook to prove the truth of their testimony to these facts, and it will evidently appear that, instead of confirming their scheme, it must have been sufficient utterly to have overthrown it, had it been itself the most probable imposture that the wit of man could ever have contrived. See Acts iii, ix, xiv, xix, etc. They did not merely assert that they had seen miracles wrought by Jesus, but that he had endowed them with a variety of miraculous powers; and these they undertook to display, not in such idle and useless tricks as sleight of hand might perform, but in such solid and important works as appeared worthy of divine interposition, and entirely superior to human power. Nor were these things undertaken in a corner, in a circle of friends or dependents; nor were they said to be wrought, as might be suspected, by any confederates in the fraud; but they were done often in the most public manner. Would impostors have made such pretensions as these? or, if they had, must they not immediately have been exposed and ruined? Now, if the New Testament be genuine, then it is certain that the apostles pretend to have wrought miracles in the very presence of those to whom their writings were addressed; nay, more, they profess likewise to have conferred those miraculous gifts in some considerable degrees on others, even on the very persons to whom they write, and they appeal to their consciences as to the truth of it. And could there possibly be room for delusion here? 5. It is likewise certain that the apostles did gain early credit, and succeeded in a most wonderful manner. This is abundantly proved by the vast number of churches established in early ages at Rome, Corinth, Ephesus, Colosse, etc. 6. That, admitting the facts which they testified concerning Christ to be true, then it was reasonable for their contemporaries, and is reasonable for us, to receive the Gospel which they have transmitted to us as a divine revelation. The great thing they asserted was, that Jesus was the Christ, and that he was proved to be so by prophecies accomplished in him, and by miracles wrought by him, and by others in his name. If we attend to these, we shall find them to be no contemptible arguments, but must be forced to acknowledge that, the premises being established, the conclusion most easily and necessarily follows; and this conclusion, that Jesus is the Christ, taken in all its extent, is an abstract of the Gospel revelation, and therefore is sometimes put for the whole of it (Acts viii, 37; xvii, 18)" (Buck, *Theol. Dict.* s. v. Christianity).

2. The *Internal* evidence of Christianity is drawn from a consideration of the doctrines of Scripture, of their consistency with the character of God, and their tendency to promote the virtue and happiness of men. It takes note also of the morals of Christianity, and of their superiority to all other systems of ethics; and especially of the character of Christ, as a real life far transcending even the highest imaginations of merely human moralists. "Of its just and sublime conceptions and exhibitions of the divine character; of the truth of that view of the moral state of man upon which its disciplinary treatment is founded; of the correspondence that there is between its views of man's mixed relation to God as a sinful creature, and yet pitied and cared for, and that actual mixture of good and evil, penalty and forbearance, which the condition of the world presents; of the connection of its

doctrine of atonement with hope; of the adaptation of its doctrine of divine influence to the moral condition of mankind when rightly understood, and the affecting benevolence and condescension which it implies; and of its noble and sanctifying revelations of the blessedness of a future life, much might be said—they are subjects, indeed, on which volumes have been written, and they can never be exhausted. Nowhere except in the Scriptures have we a perfect system of morals; and the deficiencies of pagan morality only exalt the purity, the comprehensiveness, the practicability of ours. The character of the Being acknowledged as supreme must always impress itself upon moral feeling and practice, the obligation of which rests upon his will. The God of the Bible is ‘holy,’ without spot; ‘just,’ without partiality; ‘good,’ boundlessly benevolent and beneficent; and his law is the image of himself, ‘holy, just, and good.’ These great moral qualities are not made known to us merely in the abstract, so as to be comparatively feeble in their influence, but in the person of Christ, our God incarnate, they are seen exemplified in action, displaying themselves amidst human relations, and the actual circumstances of human life. With pagans the authority of moral rules was either the opinion of the wise, or the tradition of the ancient, confirmed, it is true, in some degree, by observation and experience; but to us they are given as commands immediately issuing from the supreme Governor, and ratified as his by the most solemn and explicit attestations. With them many great moral principles, being indistinctly apprehended, were matters of doubt and debate; to us, the explicit manner in which they are given excludes both: for it cannot be questioned whether we are commanded to love our neighbor as ourselves; to do to others as we would that they should do to us, a precept which comprehends almost all relative morality in one plain principle; to forgive our enemies; to love all mankind; to live righteously and soberly, as well as godly; that magistrates must be a terror only to evil-doers, and a praise to them that do well; that subjects are to render honor to whom honor, and tribute to whom tribute, is due; that masters are to be just and merciful, and servants faithful and obedient. These, and many other familiar precepts, are too explicit to be mistaken, and too authoritative to be disputed; two of the most powerful means of rendering law effectual. Those who never enjoyed the benefit of revelation, never conceived justly and comprehensively of that moral state of the heart from which right and beneficent conduct alone can flow; and, therefore, when they speak of the same virtues as those enjoined by Christianity, they are to be understood as attaching to them a lower idea. In this the infinite superiority of Christianity displays itself. The principle of obedience is not only a sense of duty to God and the fear of his displeasure, but a tender love, excited by his infinite compassions to us in the gift of his Son, which shrinks from offending. To this influential motive as a *reason* of obedience is added another, drawn from its *end*: one not less influential, but which heathen moralists never knew—the testimony that we please God, manifested in the acceptance of our prayers, and in spiritual and felicitous communion with him. By Christianity, impurity of thought and desire is restrained in an equal degree as are their overt acts in the lips and conduct. Humanity, meekness, gentleness, placability, disinterestedness, and charity are all as clearly and solemnly enjoined as the grosser vices are prohibited; and on the unruly tongue itself is impressed ‘the law of kindness.’ Nor are the injunctions feeble; they are strictly LAW, and not mere advice and recommendations: ‘Without holiness no man shall see the Lord;’ and thus our entrance into heaven, and our escape from perdition, are made to depend upon this preparation of mind. To all this is added possibility, nay, certainty of attainment, if we

use the appointed means. A pagan could draw, though not with lines so perfect, a *beau idéal* of virtue which he never thought attainable; but the ‘full assurance of hope’ is given by the religion of Christ to all who are seeking the moral renovation of their nature, because ‘it is God that worketh in us to will and to do of his good pleasure.’ When such is the moral nature of Christianity, how obvious is it that its tendency, both as to individuals and to society, must be in the highest sense beneficial! From every passion which wastes, and burns, and frets, and enfeebles the spirit, the individual is set free, and his inward peace renders his obedience cheerful and voluntary; and we might appeal to infidels themselves whether, if the moral principles of the Gospel were wrought into the hearts and embodied in the conduct of all men, the world would not be happy; whether if governments ruled, and subjects obeyed, by the laws of Christ; whether if the rules of strict justice which are enjoined upon us regulated all the transactions of men, and all that mercy to the distressed which we are taught to feel and to practise came into operation; and whether, if the precepts which delineate and enforce the duties of husbands, wives, masters, servants, parents, children, did, in fact, fully and generally govern all these relations—whether a better age than that called *golden* by the poets would not then be realized, and Virgil’s

*Jam redit et Virgo, redeunt Saturnia regna,  
[Now Astræa returns, and the Saturnian reign.]*

be far too weak to express the mighty change? [It was in the reign of Saturn that the heathen poets fixed the Golden Age. At that period, according to them, Astræa (the goddess of justice), and many other deities, lived on earth, but, being offended with the wickedness of men, they successively fled to heaven. Astræa staid longest, but at last retired to her native seat, and was translated into the sign Virgo, next to Libra, who holds her balance.] Such is the tendency of Christianity. On immense numbers of individuals it has superinduced these moral changes; all nations, where it has been fully and faithfully exhibited, bear, amidst their remaining vices, the impress of its hallowing and benevolent influence: it is now in active exertion in many of the darkest and worst parts of the earth, to convey the same blessings; and he who would arrest its progress, were he able, would quench the only hope which remains to our world, and prove himself an enemy not only to himself, but to all mankind. What, then, we ask, does all this prove, but that the Scriptures are worthy of God, and propose the very ends which rendered a revelation necessary? Of the whole system of practical religion which it contains we may say, as of that which is embodied in our Lord’s sermon on the mount, in the words of one who, in a course of sermons on that divine composition, has entered most deeply into its spirit, and presented a most instructive delineation of the character which it was intended to form, ‘Behold Christianity in its native form, as delivered by its great author. See a picture of God, as far as he is imitable by man, drawn by God’s own hand. What beauty appears in the whole! How just a symmetry! What exact proportion in every part! How desirable is the happiness here described! How venerable, how lovely is the holiness!’ ‘If,’ says Jeremy Taylor, ‘wisdom, and mercy, and justice, and simplicity, and holiness, and purity, and meekness, and contentedness, and charity be images of God and rays of divinity, then that doctrine, in which all these shine so gloriously, and in which nothing else is ingredient, must, needs be from God. If the holy Jesus had come into the world with less splendor of power and mighty demonstrations, yet the excellency of what he taught makes him alone fit to be the master of the world;’ and agreeable to all this has been its actual influence upon mankind. Although, says Bishop Porteus, Christianity has not always been so well understood or so honestly practised as it ought

to have been; although its spirit has been often mistaken and its precepts misapplied, yet under all these disadvantages it has gradually produced a visible change in those points which most materially concern the peace and quiet of the world. Its beneficent spirit has spread itself through all the different relations and modifications of life, and communicated its kindly influence to almost every public and private concern of mankind. It has insensibly worked itself into the inmost frame and constitution of civil states. It has given a tinge to the complexion of their governments, to the temper and administration of their laws. It has restrained the spirit of the prince and the madness of the people. It has softened the rigors of despotism and tamed the insolence of conquest. It has, in some degree, taken away the edge of the sword, and thrown even over the horrors of war a veil of mercy. It has descended into families; has diminished the pressure of private tyranny; improved every domestic endearment; given tenderness to the parent, humanity to the master, respect to superiors, to inferiors ease; so that mankind are, upon the whole, even in a temporal view, under infinite obligations to the mild and pacific temper of the Gospel, and have reaped from it more substantial worldly benefits than from any other institution upon earth. As one proof of this among many others, consider only the shocking carnage made in the human species by the exposure of infants, the gladiatorial shows, which sometimes cost Rome twenty or thirty lives in a month; and the exceedingly cruel usage of slaves allowed and practised by the ancient pagans. These were not the accidental and temporary excesses of a sudden fury, but were legal, and established, and constant methods of murdering and tormenting mankind. Had Christianity done nothing more than brought into disuse, as it confessedly has done, the two former of these inhuman customs entirely, and the latter to a very great degree, it has justly merited the title of the benevolent religion. But this is far from being all. Throughout the more enlightened parts of Christendom there prevails a gentleness of manners widely different from the ferocity of the most civilized nations of antiquity; and that liberality with which every species of distress is relieved is a virtue peculiar to the Christian name. But we may ask farther, What success has it had on the mind of man as it respects his eternal welfare? How many thousands have felt its power, rejoiced in its benign influence, and under its dictates been constrained to devote themselves to the glory and praise of God! Burdened with guilt, incapable of finding relief from human resources, the mind has here found peace unspokeable in beholding that sacrifice which alone could atone for transgression. Here the hard and impenitent heart has been softened, the impetuous passions restrained, the ferocious temper subdued, powerful prejudices conquered, ignorance dispelled, and the obstacles to real happiness removed. Here the Christian, looking round on the glories and blandishments of this world, has been enabled, with a noble contempt, to despise all. Here death itself, the king of terrors, has lost all his sting; and the soul, with a holy magnanimity, has borne up in the agonies of a dying hour, and sweetly sung itself away to everlasting bliss. In respect to its future spread, we have reason to believe that all nations shall feel its happy effects. The prophecies are pregnant with matter as to this belief. It seems that not only a nation or a country, but the whole habitable globe, shall become the kingdom of our God and of his Christ" (Watson, *Dictionary*, s. v. Christianity).

3. The *Collateral* evidence treats of the marvellous diffusion of the Gospel, and of its actual effects upon mankind and upon the history of civilization, as proofs of its divine origin. "Of its early triumphs, the history of the Acts of the Apostles is a splendid record; and in process of time it made a wonderful progress through Europe, Asia, and Africa. In the third cen-

tury there were Christians in the camp, in the senate, and in the palace; in short, everywhere, as we are informed, except in the temples and the theatres: they filled the towns, the country, and the islands. Men and women of all ages and ranks, and even those of the first dignity, embraced the Christian faith, inasmuch that the pagans complained that the revenues of their temples were ruined. They were in such great numbers in the empire, that, as Tertullian expresses it, if they had retired into another country, they would have left the Roman territory only a frightful solitude. For the illustration of this argument, we may observe that the Christian religion was introduced everywhere in opposition to the sword of the magistrate, the craft and interest of the priests, the pride of the philosophers, the passions and prejudices of the people, all closely combined in support of the national worship, and to crush the Christian faith, which aimed at the subversion of heathenism and idolatry. Moreover, this religion was not propagated in the dark by persons who tacitly endeavored to deceive the credulous, nor delivered out by little and little, so that one doctrine might prepare the way for the reception of another; but it was fully and without disguise laid before men all at once, that they might judge of the whole under one view. Consequently mankind were not deluded into the belief of it, but received it upon proper examination and conviction. Besides, the Gospel was first preached and first believed by multitudes in Judæa, where Jesus exercised his ministry, and where every individual had the means of knowing whether the things that were told him were matters of fact; and in this country, the scene of the principal transactions on which its credibility depended, the history of Christ could never have been received unless it had been true, and known to all as truth. Again: the doctrine and history of Jesus were preached and believed in the most noted countries and cities of the world, in the very age when he is said to have lived. On the fiftieth day after our Lord's crucifixion, three thousand persons were converted in Jerusalem by a single sermon of the apostles; and a few weeks after this, five thousand who believed were present at another sermon preached also in Jerusalem (Acts ii, 41; iv, 4; vi, 7; viii, 1; ix, 1, 20). About eight or ten years after our Lord's death, the disciples were become so numerous at Jerusalem and in the adjacent country that they were objects of jealousy and alarm to Herod himself (Acts xii, 1). In the twenty-second year after the crucifixion, the disciples in Judæa are said to have been many myriads (Acts xxi, 20). The age in which Christianity was introduced and received was famous for men whose faculties were improved by the most perfect state of social life, but who were good judges of the evidence offered in support of the facts recorded in the Gospel history; for it should be recollected that the success of the Gospel was not restricted to Judæa, but it was preached in all the different provinces of the Roman empire. The first triumphs of Christianity were in the heart of Greece itself, the nursery of learning and the polite arts, for churches were planted at a very early period at Corinth, Ephesus, Berea, Thessalonica, and Philippi. Even Rome herself, the seat of wealth and empire, was not able to resist the force of truth at a time when the facts related were recent, and when they might, if they had been false, have easily been disproved. From Greece and Rome, at a period of cultivation and refinement, of general peace and extensive intercourse, when one great empire united different nations and distant people, the confutation of these facts would very soon have passed from one country to another, to the utter confusion of the persons who endeavored to propagate the belief of them. Nor ought it to be forgotten that the religion to which such numbers were proselyted was an exclusive one. It denied, without reserve, the truth of every article

of heathen mythology, and the existence of every object of their worship. It accepted no compromise; it admitted of no comprehension. If it prevailed at all, it must prevail by the overthrow of every statue, altar, and temple in the world. It pronounced all other gods to be false, and all other worship vain. These are considerations which must have strengthened the opposition to it, augmented the hostility which it must encounter, and enhanced the difficulty of gaining proselytes; and more especially when we recollect that, among the converts to Christianity in the earliest age, a number of persons remarkable for their station, office, genius, education, and fortune, and who were personally interested by their emoluments and honors in either Judaism or heathenism, appeared among the Christian proselytes. Its evidences approved themselves not only to the multitude, but to men of the most refined sense and most distinguished abilities, and it dissolved the attachments which all powerful interest and authority created and upheld" (Watson, *l. c.*).

Paley's *View of the Evidences of Christianity* for a long time held the first place as a text-book on evidences in England. Paley even goes so far as to say we can conceive of no way in which a revelation could be made except by miracles. "In whatever degree it is probable, or not very improbable, that a revelation should be communicated to mankind at all, in the same degree it is probable, or not very improbable, that miracles should be wrought. Therefore, when miracles are related to have been wrought in the promulgation of a revelation manifestly wanted, and, if true, of inestimable value, the improbability which arises from the miraculous nature of the things related is not greater than the original improbability that such a revelation should be imparted by God." The book is divided into two parts: I. The direct historical evidence of Christianity, and wherein it is distinguished from the evidence alleged for other miracles; II. The auxiliary evidences of Christianity. The first part is then divided into two propositions: (I.) "That there is satisfactory evidence that many, professing to be original witnesses of the Christian miracles, passed their lives in labors, dangers, and sufferings, voluntarily undergone in attestation of the accounts which they delivered, and solely in consequence of their belief in those accounts; and that they also submitted, from the same motives, to new rules of conduct." (II.) "That there is not satisfactory evidence that persons pretending to be original witnesses of any other similar miracles have acted in the same manner, in attestation of the accounts which they delivered, and solely in consequence of their belief in the truth of those accounts." The argument rests on the credibility of testimony, and aims to show that the testimony in this case is indubitable. The second part treats briefly the argument from prophecy, from the morality of the Gospel, and the internal evidences afforded both by the sacred writings, and by the doctrines and histories which they contain.

Coleridge, who disparaged the comparative value of evidence from miracles and prophecy, dictated to a friend the following scheme of evidences: "I. Miracles, as precluding the contrary evidence of no miracles. II. The material of Christianity, its existence and history. III. The doctrines of Christianity, and the correspondence of human nature to these doctrines, illustrated, 1st, historically, as the actual production of the new world, and the dependence of the fate of the planet upon it; 2d, individually, from its appeal for its truth to an asserted fact, which, whether it be real or not, every man possessing reason has an equal power of ascertaining within himself, namely, a will which has more or less lost its freedom, though not the consciousness that it ought to be and may become free; the conviction that this cannot be achieved without the operation of a principle connatural with

itself; the evident rationality of an entire confidence in that principle, being the condition and means of its operation; the experience in his own nature of the truth of the process described by Scripture as far as he can place himself within the process, aided by the confident assurances of others as to the effects experienced by them, and which he is striving to arrive at. All these form a practical Christian. Add, however, a gradual opening out of the intellect to more and more clear perceptions of the strict coincidence of the doctrines of Christianity, with the truths evolved by the mind from inflexions on its own nature. To such a man one main test of the objectivity, the entity, the objective truth of his faith, is its accompaniment by an increase of insight into the moral beauty and necessity of the process which it comprises, and the dependence of that proof on the causes asserted. Believe, and, if thy belief be right, that insight which gradually transmutes faith into knowledge will be the reward of that belief. The Christian, to whom, after a long profession of Christianity, the mysteries remain as much mysteries as before, is in the same state as a school-boy with regard to his arithmetic, to whom the *fact* at the end of the examples in his ciphering-book is the whole ground for his assuming that such and such figures amount to so and so. 3d. In the above I include the increasing discoveries in the correspondence of the history, the doctrines, and the promises of Christianity with the past, present, and probable future of human nature; and in this state a fair comparison of the religion as a divine philosophy with all other religions which have pretended to revelations and all other systems of philosophy, both with regard to the totality of its truth and its identification with the manifest march of affairs. I should conclude that, if we suppose a man to have convinced himself that not only the doctrines of Christianity, which may be conceived independently of history or time, as the Trinity, spiritual influences, etc., are coincident with the truths which his reason, thus strengthened, has evolved from its own sources, but that the historical dogmas, namely, of the incarnation of the creative Logos, and his becoming a personal agent, are themselves founded in philosophical necessity, then it seems irrational that such a man should reject the belief of the actual appearance of a religion strictly correspondent therewith, at a given time recorded, even as much as that he should reject Caesar's account of his wars in Gaul after he had convinced himself *à priori* of their possibility. As the result of these convictions, he will not scruple to receive the particular miracles recorded, inasmuch as it would be miraculous that an incarnate God should not work what must to mere man appear as miracles, inasmuch as it is strictly accordant with the ends and benevolent nature of such a being to commence the elevation of man above his mere senses by attracting and enforcing attention, first, through an appeal to those senses. But with equal reason will he expect that no other or greater force should be laid on those miracles as such; that they should not be spoken of as good in themselves, much less as the adequate and ultimate proof of that religion; and, likewise, he will receive additional satisfaction should he find these miracles so wrought, and on such occasions, as to give them a personal value as symbols of important truths when their miraculousness was no longer needful or efficacious" (Coleridge, *Works*, N. Y., v, 555).

On the argument of Butler's *Analogy*, see the article BUTLER (vol. i, p. 937).

II. As to the comparative value of the different classes of the Christian evidences there has been much dispute. Coleridge admitted the value of the testimony from miracles for the Jews at the beginning of Christianity, but considered that argument as much less valuable *now* than the internal evidence. "It was only to overthrow the usurpation exercised in and through the senses that the senses were miraculously

appealed to. *Reason and religion are their own evidence.* The natural sun is in this respect a symbol of the spiritual. Ere he is fully risen, and while his glories are still under veil, he calls up the breeze to chase away the usurping vapors of the night season, and thus converts the air itself into the minister of its own purification: not surely a proof or elucidation of the light from heaven, but to prevent its interception. Wherever, therefore, similar circumstances coexist with the same moral causes, the principles revealed and the examples recorded in the inspired writings render miracles superfluous; and if we neglect to apply truths in expectation of wonders, or under pretext of the cessation of the latter, we tempt God, and merit the same reply which our Lord gave to the Pharisees on a like occasion. I shall merely state here what my belief is concerning the true evidences of Christianity.

1. Its consistency with right reason I consider as the outer court of the temple, the common area within which it stands. 2. The miracles, with and through which the religion was first revealed and attested, I regard as the steps, the vestibule, and the portal of the temple. 3. The sense, the inward feeling in the soul of each believer of its exceeding *desirableness*, the experience that he *needs* something, joined with the strong foretoking that the redemption and the graces propounded to us in Christ are *what* he needs—this I hold to be the true *foundation* of the spiritual edifice. With the strong *a priori* probability that flows in from 1 and 3 on the correspondent historical evidence of 2, no man can refuse or neglect to make the experiment without guilt. But, 4, it is the experience derived from a practical conformity to the conditions of the Gospel; it is the opening eye, the dawning light, the terrors and the promises of spiritual growth, the blessedness of loving God as God, the nascent sense of sin hated as sin, and of the incapability of attaining to either without Christ; it is the sorrow that still rises up from beneath, and the consolation that meets it from above; the bosom treacheries of the principal in the warfare, and the exceeding faithfulness and long-suffering of the uninterested ally; in a word, it is the actual *trial* of the faith in Christ, with its accompaniments and results, that must form the arched roof, and faith itself is the completing KEY-STONE. In order to an efficient belief in Christianity a man must have been a Christian, and this is the seeming *argumentum in circulo* incident to all spiritual truths, to every subject not presentable under the forms of time and space, as long as we attempt to master by the reflex acts of the understanding what we can only *know* by the act of *becoming*. 'Do the will of my father, and ye shall *know* whether I am of God.' These four evidences I believe to have been, and still to be, for the world, for the whole Church, all necessary, all equally necessary; but that at present, and for the majority of Christians born in Christian countries, I believe the third and the fourth evidence to be the most operative; not as superseding, but as involving a glad, undoubting faith in the two former" (Oleridge, *Biographia Literaria*, c. xxiv).

Ullmann (*Sinlessness of Jesus*, § 1) remarks "that the nature of the case, and the necessities of their contemporaries, justified the apostles in proving the divine mission of Christ by the argument from miracles and prophecy. But the necessity of the times and of individuals may in this respect vary; and although the Gospel in its *essence* remains the same, and contains eternal, unchangeable truth, yet in a different age a different method of proof may lead more immediately to the acknowledgment of this truth. In our own time it seems proper to fix our eyes especially upon the spiritual character of Jesus in order to obtain satisfactory proof of the divinity of his mission and instructions, not because the apostolical mode of proof has become untenable, but because the other mode has a more vital efficacy on account of the style of ed-

ucation prevalent at the present day. We do not find ourselves in immediate, conscious connection with the spirit and prophecies of the Old Testament, as the Jews were in the time of the apostles; we live among contemporaries to whom miracles are more a ground of doubt than of faith; we should not forget that the proof from miracles exerts its full power, properly speaking, on none but the eye-witnesses of them, and conducts us to the desired conclusion only by a circuitous path. On the other hand, a vivid apprehension of the inward character of Jesus brings us nearer to the operative centre of Christianity, and at the same time makes us feel the influence of the moral power which goes forth from that centre. Here faith in Jesus rests immediately on himself; it is free, spiritual confidence in his person. As with his contemporaries everything depended on the yielding confidence with which they received the favors which he brought them, so likewise with us this confidence may be the element of a full belief in Christianity, and is, at all events, a condition of receiving benefit from our Redeemer."

The tendency of German theology has gone against the external evidences of Christianity, but this very tendency opened the door to rationalism and infidelity, above which German orthodoxy has only recently begun to emerge. On this point, see the *New York Review*, ii, 141 sq. See also bishop Butler's admirable discussion of the "particular" evidence for Christianity in his *Analogy of Religion*, pt. ii, ch. vii. See also Mansell, in *Aids to Faith*, Essay i (London, 1861, 8vo). The tendency of the best modern apologists is not to thrust the argument from miracles into the background, but to vindicate it afresh. So Auberlen, *Göttliche Offenbarung* (1864); Mozley, *On Miracles*; Fisher, *Essays on the supernatural Origin of Christianity*, p. 12 sq., 503 sq. The rejection of miracles generally leads to a rejection of the doctrine of the personality of God. See, for a fuller treatment of this branch of the subject, the article MIRACLES. The chief task of the apologist for Christianity in the present age (apart from the metaphysical conflict with Pantheism and Positivism, for which see articles under those heads) is to vindicate the authenticity and the early date of the books of the N. T. against the assaults not merely of avowed skeptics, but also of theologians within the Christian Church, such as those of the Tübingen school (q. v.). This task resolves itself, again, into that of vindicating the historical reality of the scriptural miracles. "The recent criticism of the N.-T. canon, embracing the attempt to impeach the genuineness of various books, is only a part of the great discussion of the historical truth of the N. T.; for it is difficult to attack the credibility of the Gospel historians without first disproving their genuineness" (Fisher, *Essays*, p. 14). In the noted *Essays and Reviews* (Boston ed. 1865, 12mo), Prof. Baden Powell has an article on "The Study of the Evidences of Christianity," in which he undertakes to state the present condition of the discussion, and to indicate the true line of Christian evidences. He disparages the "professed advocates of an external revelation and historical evidence" by innuendo as well as by direct attack, and *assumes* the inconceivability and impossibility of miracles. See Goodwin's article in the *American Theological Review*, July, 1861, which closes as follows: "It is one thing to urge other evidences of Christianity as stronger and more satisfactory than that from miracles; it is another thing to reject all miracles as incredible and absurd. He who takes the former course may show an eminently Christian spirit, and for ourselves we cordially sympathize with his position; but he who takes the latter course, if not an infidel himself, is certainly playing into the hands of infidels and atheists."

One of the chief forms taken by recent Christian apologetics is the argument drawn from the actual

phenomena of Christianity, the *existing facts* which nobody can deny. The first of these is the *character of Christ*, which has been so described by rationalistic and infidel writers (e. g. Strauss, Renan, Schenkel) as to bring the argument down almost, if not quite, to the point whether Jesus were an impostor or no. The replies to these attacks within the last twenty years have brought with greater force than ever the eternal light of evidence which the person and life of the Redeemer contain in favor of the whole system of Christianity. See the works on this subject of Neander, Lange, Schaff, Pressensé, Ellicott, Young, Plumtree, and others. Dr. Schaff sums up the result of a study of Christ in one strong passage: "Jesus of Nazareth is the one absolute and unaccountable exception to the universal experience of mankind. He is the great central miracle of the whole Gospel history; and all his miracles are but the natural and necessary manifestations of his miraculous person, performed with the same ease with which we perform our ordinary daily works." The second of these phenomena is found in the *books of the New Testament* themselves, as affording abundant internal evidence of reality and truthfulness. The third is the specific Christian doctrine, which can be traced up (through the Epistles to the Thessalonians, Corinthians, Romans, and Galatians, the genuineness and early date of which are admitted even by the Tübingen school) to within thirty years after the death of Christ. (See an excellent article on the *Unexhausted Resources of Christian Evidence*, by Prof. Lorimer, in *B. and F. Ev. Review*, Jan. 1865, reprinted in *The Theolog. Eclectic*, New Haven, iii, 30 sq.) Dr. H. Schmidt, of Meiningen, taking the Tübingen critics at their word, undertakes to find in the four unquestioned epistles (Galatians, 1st and 2d Corinthians, and Romans) a full vindication of the truth and divine origin of Christianity. See his *Der Paulinische Christus* (Weimar, 1867, 8vo).

The *comparison of Christianity with heathen religions* is opening a new and rich mine of Christian evidences. The science of "Comparative Religion," so called, is yet in its infancy, but all contributions to it only tend to bring out the argument for the divine origin of Christianity into clearer relief. See Maurice, *Religions of the World* (1846, 12mo); Pressensé, *Religions before Christ* (1866, 8vo); Müller, *Chips from a German Workshop* (1867, 2 vols, 12mo); Hardwick, *Christ and other Masters* (Lond. 2d ed., 1863, 2 vols, 12mo); and an article by Caldwell, *Bapt. Quart. Rev.* Oct. 1868.

The question of the origin and dates of the several gospels is treated under the separate articles Matthew, Mark, Luke, and John. The Tübingen school, and the modern critics who follow them, put the dates forward into the second century. See TÜBINGEN SCHOOL. On the questions involved, see Fisher, *Essays*, already cited; Westcott, *On the Canon of the N. T.* (Cambridge, 1855); Tischendorf, *Wann wurden unsere Evangelien verfasst* (Leipsig, 1865; transl. by W. L. Gage, under the title *Origin of the four Gospels*, Lond. 1868; Amer. Tract Society, 1868).

*Literature.*—For a pretty copious account of the literature of the subject, see APOLOGETICS; APOLOGY. We add here the following: Translation of Luthardt's *Apol. Vorträge* (noticed in vol. i, p. 305), entitled *Apologetic Lectures on the fundamental Truths of Christianity* (1867, crown 8vo); and Anberlen's *Offenbarung* (see our vol. i, p. 301), entitled *The Divine Revelation* (Edinburgh, 1867); Norton's *Genuineness of the Gospels*, abridged edit. (Boston, 1867, 12mo); Barnes, *Lectures on the Evidences of Christianity in the Nineteenth Century* (New York, 1868, 12mo); M'Cosh, *The Supernatural in its Relations to the Natural*; Westcott, *Introduction to the Study of the Gospels* (Boston, 1867), chap. iii; Schaff, *Person of Christ* (Am. Tract Society); Plumtree, *Christ and Christendom* (Lond. 1867, 8vo); Grady, *Les Sophistes et la Critique* (Paris, 1864, 8vo); *Princeton Review*, April, 1852, art. vi; Bartlett on "Christi-

anity and prominent Forms of Assault," in *Bibliotheca Sacra*, January, 1868; *Brit. and For. Evang. Review*, July, 1868, art. vi. See APOLOGETICS; APOLOGY; INSPIRATION; JESUS; MIRACLES.

Evil is discord or disturbance in the order of the universe. Leibnitz divides it into metaphysical evil, i. e. imperfection; physical evil, i. e. suffering; moral evil, i. e. sin. Origen defined evil to be the negation of good; and in this he has been followed by many Christian thinkers. The distinction into natural and moral evil is the only one now generally recognised. 1. "Natural evil is whatever destroys or any way disturbs the perfection of natural beings, such as blindness, diseases, death, etc. But as *all* that we call natural evil is not the penalty of sin, nor, as some have supposed, *only* the penalty of it, such disturbance is not necessarily an evil, inasmuch as it may be counterpoised, in the whole, with an equal if not greater good, as in the afflictions and sufferings of good men. When such disturbance occurs as the penalty of transgression, it is the necessary consequence of moral evil." The tendency of modern thought is towards the doctrine that the (apparent) disturbances of the physical world are likely to be reconciled with universal law as science advances. 2. "Moral evil is the disagreement between the actions of a moral agent and the rule of those actions, whatever it be. Applied to choice, or acting contrary to the revealed law of God, it is termed *wickedness* or *sin*. Applied to an act contrary to a mere rule of fitness, it is called a *fault*" (Buck, s. v.).

On the origin of evil, and its relations to the government of God, see SIN; THEODICY.

**E'vil-mer'odach** (Heb. *Evil' Merodak'*, עִוִּיל מְרֹדַךְ; Sept. *Εὐιλμερωδᾶκ*, Οὐλαμερῶαχαρ), son and successor of Nebuchadnezzar, king of Babylon, who, on his accession to the throne (B.C. 561), released the captive king of Judah, Jehoiachin, from prison, after 37 years of incarceration, treated him with kindness and distinction, and set his throne above the other conquered kings who were detained at Babylon (2 Kings xxv, 27; Jer. lii, 31-34). See CHALDEAN. A Jewish tradition (noticed by Jerome on Isa. xiv, 29) ascribes this kindness to a personal friendship which Evil-merodach had contracted with the Jewish king when he was himself consigned to prison by Nebuchadnezzar, who, on recovering from his seven years' monomania, took offence at some part of the conduct of his son, by whom the government had in the mean time been administered. This story was probably invented to account for the fact. His name is naturally written by other ancient authors (*Εὐειλμερῶδονκος* by Berosus, in Josephus, *Apion*, i, 20; *Εὐιλμερῶδονχος* by Megasthenes and Abydenus, in Euseb. *Chron. Armen.* p. 28; *Ἐβειλμερῶαχος* by Josephus, *Ant.* x, 11, 2). Hales identifies him with the king of Babylon who formed a powerful confederacy against the Medes, which was broken up, and the king slain by Cyrus, then acting for his uncle Cyaxares. But this rests on the authority of Xenophon's *Cyropædia*, the historical value of which he estimates far too highly. See CYRUS. He is doubtless the same as the *Iloradani* of Ptolemy's "Canon," who reigned but a short time, having ascended the throne on the death of Nebuchadnezzar in B.C. 561, and being himself succeeded by Neriglissar in B.C. 559. See BABYLON. He thus appears to have reigned but two years, which is the time assigned to him by Abydenus (*Fr.* 9) and Berosus (*Fr.* 14). At the end of this brief space Evil-merodach was murdered by Neriglissar [see NEIGAL-SHAREZER], a Babylonian noble married to his sister, who then seized the crown. The other ancient authorities assign him different lengths of reign. According to Berosus, Evil-merodach provoked his fate by lawless government and intemperance. Perhaps the departure from the policy of his father, and the substitution

of mild for severe measures, may have been viewed in this light.

The latter half of the name Evil-merodach is that of a Babylonian god MERODACH (q. v.). Two modes of explaining the former part of it have been attempted. Since *evil*, as a Hebrew word, means "foolish," Simonis proposes to consider it the derivative of עֵוֶל, in the Arabic signification of "to be first," affording the sense of "prince of Merodach." This rests on the assumption that the Babylonian language was of Syro-Arabian origin. Gesenius, on the other hand, who does not admit that origin, believes that some Indo-Germanic word, of similar sound, but reputable sense, is concealed under *evil*, and that the Hebrews made some slight perversion in its form to produce a word of contemptuous signification in Hebrew, just as is assumed in the case of Beelzebul.—Kitto, s. v.; Smith, s. v.

**Evil-speaking**, "the using language either reproachful or untrue respecting others, and thereby injuring them. It is an express command of Scripture 'to speak evil of no man' (Titus iii, 2; James iv, 11); by which, however, we are not to understand that there are no occasions on which we are at liberty to speak of others that which may be considered as evil. 1. Persons in the administration of justice may speak words which in private intercourse would be reproachful. 2. God's ministers may inveigh against vice with sharpness and severity, both privately and publicly (Isa. lviii, 1; Titus i, 13). 3. Private persons may reprove others when they commit sin (Lev. xix, 17). 4. Some vehemence of speech may be used in defence of truth and impugning errors of bad consequence (Jude iii). 5. It may be necessary, upon some important occasions, with some heat of language, to express disapprobation of notorious wickedness (Acts viii, 23). Yet in all these the greatest equity, moderation, and candor should be used; and we should take care, 1. Never to speak in severe terms without reasonable warrant or apparent just cause. 2. Nor beyond measure. 3. Nor out of bad principles or wrong ends; from ill will, contempt, revenge, envy, to compass our own ends; from wantonness or negligence, but from pure charity for the good of those to whom or of whom we speak. This is an evil, however, which greatly abounds, and which is not sufficiently watched against; for it is not when we openly speak evil of others only that we are guilty, but even in speaking what is true we are in danger of speaking evil of others. There is sometimes a malignant pleasure manifested; a studious recollection of everything that can be brought forward; a delight in bearing anything spoken against others; a secret rejoicing in knowing that another's fall will be an occasion of our rise. All this is base to an extreme. The impropriety and sinfulness of evil-speaking will appear if we consider, 1. That it is entirely opposite to the whole tenor of the Christian religion. 2. Expressly condemned and prohibited as evil (Psa. lxiv, 3; James iv, 11). 3. No practice hath more severe punishments denounced against it (1 Cor. v, 11; vi, 10). 4. It is an evidence of a weak and distempered mind. 5. It is even indicative of ill breeding and bad manners. 6. It is the abhorrence of all wise and good men (Psa. xv, 3). 7. It is exceedingly injurious to society, and inconsistent with the relation we bear to each other as Christians (James iii, 6). 8. It is branded with the epithet of folly (Prov. xviii, 6, 7). 9. It is perverting the design of speech. 10. It is opposite to the example of Christ, whom we profess to follow. See SLANDER." (Barrow, *Works*, vol. i, serm. xvi: Tillotson, *Sermons*, serm. xlii; Jack, *Sermons on Evil Speaking*; Seed, *Sermons*, i, 339; Campbell, *Dissertations*, diss. iii, § 22).—Buck, *Theol. Dictionary*, s. v.

**Evodius**, a Latin theologian, was born about the middle of the fourth century, at Tagaste, in Africa. He was a countryman of St. Augustine, and was united

with him in an intimate and lifelong friendship. After following in his youth a secular profession, he became, in 396 or 397, bishop of Uzalis. Augustine asserts that while there he performed several miracles by means of the relics of St. Stephen, which Orosius, in 416, had brought from Palestine. Evodius took an active part in the controversy against the Donatists and Pelagians, and in 427 wrote on this subject a letter to the monks of Adrumetum. He died about 430. We have from him four letters to St. Augustine (160, 161, 163, and 177 in the edition of the Benedictines); a letter addressed by him, conjointly with four other bishops, to bishop Innocent I, of Rome (published in vol. vi of the Benedictine edit. of the works of Augustine); fragments of a letter to the monks of Adrumetum (joined to the letter 216 of St. Augustine). His treatise on the miracles performed by the relics of St. Stephen is lost; for the *Libri duo de Miraculis S. Stephani*, appended to Augustine's *De Civitate Dei* (in vol. vii of his works), cannot be attributed to him. A treatise *De Fide*, or *De Unitate Trinitatis contra Manichæos*, is by some likewise ascribed to Evodius.—Hoefler, *Nov. Biog. Gén.* xvi, 842. (A. J. S.)

**Ewald**, JOHANN LUDWIG, theologian, was born at Dreieichenhain, Hesse, September 16, 1747. He studied at the University of Marburg. After serving two years as tutor to the children of the prince of Hesse-Philippsthal, he became pastor at Offenbach, 1768. He began preaching as a Rationalist, but in a few years he found reason alone inadequate for his personal guidance and for his public teaching. In 1778 he announced publicly this change of conviction. In 1781 he became general superintendent and court preacher at Detmold; but his pungent preaching soon got him into trouble. He founded at Detmold a seminary for teachers. In 1796 he accepted a pastoral charge at Breichen; and here, also, he greatly promoted the schools, visiting the establishments of Pestalozzi and Fellenberg, in Switzerland, to inform himself on their systems. In 1805 he was called to Heidelberg as professor of ethics, and in 1807 became church councillor at Carlsruhe, where he died, March 19, 1822. He was a voluminous author. Doering gives a list of eighty-nine different publications of his. The chief are, *Predigerbeschäftigung* (Lemgo, 1783-94, 9 parts);—*Christenthum und Kosmopolitismus* (Lemgo, 1788-89, 2 vols. 8vo);—*Salomo; Versuch einer psychologisch-biographischen Darstellung* (Gera, 1800, 8vo);—*Die Göttlichkeit d. Christenthums* (Brem. 1800, 8vo);—*Briefe über die alte Mystik u. d. neuen Mysticismus* (Leipzig, 1822, 8vo); besides numerous sermons and books on practical religion and education.—Doering, *Die deutschen Kanzel-Redner*, i, 46.

**Ewe** stands in the Auth. Vers. as the representative of the following Heb. words: רַחֵל (*rachel*, fem.), a "ewe" (Gen. xxxi, 38; xxxii, 14) or "sheep" generally (Cant. vi, 6; Isa. liii, 7); שֶׁה (*seh*, masc. Exod. xii, 5; fem. Jer. i, 17; Ezek. xxxiv, 20), a sheep or goat from a flock generally, variously rendered ("cattle," "sheep," "goat," "ewe"); קִבְסָה (*kibshah*) or קִבְסָה (*kabsah*), fem., so called from being fit for *coupling*, a "ewe-lamb," i. e. from one to three years old (Gen. xxi, 28, 29, 30; Lev. xiv, 10; Num. vi, 14; 2 Sam. xii, 3, 4, 6); אֹלוֹת (*aloth*, 'milk-giving, fem. plur.), *milk* ("[ewes] with young," Psa. lxxviii, 71; Isa. xl, 11). See SHEEP, etc.

**Ewer**, or picher (q. v.) accompanying a wash-hand basin (q. v.). It is stated as a description of Elisha (2 Kings iii, 11) that he "poured water on the hands of Elijah." This was the act of an attendant or disciple; and it was so much his established duty, that the mere mention of it sufficed to indicate the relation in which Elisha had stood to Elijah. It is also an indication that the Hebrews were accustomed to wash their

hands in the manner which is now universal in the East, and which, whatever may be thought of its convenience, is unquestionably more refreshing and cleanly than washing in the water as it stands in a basin, which is a process regarded by the Orientals with great dislike. The hands are therefore held over a basin, the use of which is only to receive the water which has been poured upon the hands, sometimes of several persons successively, from the jug or ewer held above them (Lane, *Modern Egyptians*, i, 212). A servant or some other person approaches with the ewer in his right hand and the basin in his left; and when the hands have been placed in proper position over the basin, which he continues to hold, lets fall a stream of water upon them from the ewer, suspending it occasionally to allow the hands to be soaped or rubbed together. No towel is offered, as every one dries his hands in his handkerchief, or however else he pleases. The water is usually tepid, and always so after a meal, in order to clear the grease contracted by eating with the hands. In the East, the basin, which, as well as the ewer, is usually of tinned copper, has commonly a

Oriental Ewer and Basin.

sort of cover, rising in the middle and sunk into the basin at the margin, which, being pierced with holes, allows the water to pass through, thus concealing it after it has been defiled by use. The ewer has a long spout, and a long, narrow neck, with a cover, and is altogether not unlike our coffee-pots in general appearance: it is the same which the Orientals use in all their ablutions. It is evident that a person cannot conveniently thus wash his own hands without assistance. If he does, he is obliged to fix the basin, and to take up and lay down the ewer several times, changing it from one hand to the other. Therefore a person never does so except when alone. If he has no servant, he asks some by-stander to pour the water upon his hands, and offers a return of the obligation, if it seems to be required (Kitto, *Pict. Bible*, note ad loc.). See WASHING OF HANDS.

**Ewing, Finis**, one of the founders of the Cumberland Presbyterian Church, was born July 10, 1773, in Bedford County, Va. His father was of Scotch-Irish descent, and both his parents were eminent for their piety, the father for many years being an elder in the Presbyterian Church. Mr. Ewing had but little early education. He spent some time in college, but where is not known. His biographer says, "Like Franklin, he seems very early to have acquired a fondness for books. His varied and extensive reading made him emphatically a learned man, though not systematically educated, and the brilliancy of his success as a minister of the Gospel evinced intellectual endowments of a high order." His parents having died in Virginia, the surviving family moved to what was called the "Cumberland Country," and settled in Davidson County, Tennessee, near Nashville. On Jan. 15, 1793, he married the daughter of general William Davidson, of North Carolina. The county was named from him (Davidson), in honor of his many valuable services during the war of the Revolution. Here Mr. Ewing and his wife united with Rev. Dr. Craighead's church, and lived in its communion some years before either of them knew anything about experimental religion. After the birth of their first child (but at what time is not known) Mr. Ewing removed to Kentucky, and settled in what was afterwards Logan County, near Red River Church, of which Rev. James McGready was pastor. In the great revival of 1800, which swept over all the Western States, and out of which originated the Cumberland Presbyte-

rian Church, Mr. Ewing heard for the first time in his life the doctrines of regeneration and *personal* holiness insisted upon from the pulpit. He became satisfied that he had not a saving knowledge of the truth, and communicated his feelings to his wife, whom he found in a similar state of mind. After many prayers and tears, while engaged in family worship, he "became filled with joy and peace in believing." Some time after this (the precise period is not known) he told his impressions to preach the Gospel to Transylvania Presbytery, which body, at the advice of Rev. David Rice, D.D., one of the oldest ministers in the presbytery, licensed Mr. Ewing and three others to exhort. His success was wonderful; scores of sinners were converted wherever he went. His talents, piety, commanding language, and zeal carried everything before them. He was soon licensed to preach as a probationer, but the prevailing party in the presbytery opposed his licensure. He went on preaching very successfully, however, revival attending his labors wherever he travelled. His labor was so much called for, and so marked with success, that at the urgent call of several congregations he was ordained, in November, 1803, to the work of the ministry. The revival went on with unabated power for several years; in the mean time Kentucky Synod had pretended to dissolve Cumberland Presbytery, which had ordained him, because of alleged irregularities. The presbytery remained for four years not attempting to exercise its functions as a presbytery; after which, failing to secure a redress of their grievances from the General Assembly, they determined to organize again, even contrary to the wishes of a majority of Kentucky Synod. On February 4, 1810, Mr. Ewing and two other ordained ministers united and formed the first presbytery of the new Cumberland Presbyterian Church, giving it the name of the presbytery Kentucky Synod had dissolved, viz. *Cumberland Presbytery*; hence the name "Cumberland Presbyterians." Mr. Ewing removed after some years to Todd County, Ky., and became pastor of Lebanon congregation, near Ewingsville. Here under his eye was sustained for many years a flourishing classical seminary of learning. In 1820, at the urgent call of many friends and brethren, he removed to the State of Missouri, and settled in what is now Cooper County. It was not long until he built up a large congregation at New Lebanon, which still flourishes. Here he prepared and published his *Lectures on Divinity*, which have been extensively circulated and read, and which contain the germ of the peculiarities of Cumberland Presbyterians. He labored here with great acceptance and success until 1836, when he removed to the town of Lexington, Lafayette County, Mo. Here he soon gathered a congregation, built a church, and, with others, was the means of extending the work of grace all over the vast incoming territories of the West. Mr. Ewing died here July 4, 1841, in his 68th year. He was tall, portly in appearance, had a keen, penetrating eye, always bore a dignified look, was a man of extraordinary pulpit talents, and of great success among all classes in winning souls to the Redeemer. In our troubles with Great Britain in 1812 he did not hesitate to give all the weight of his great influence in favor of his country. He was no politician, yet at one time, being an intimate friend and acquaintance of general Jackson, he was by him appointed register of the land office at Lexington, Mo. He died lamented by a large and growing denomination, and by many others, as a great and good man. His remains rest in the cemetery at Lexington, Mo. (J. B. L.)

**Ewing, John, D.D.**, a Presbyterian minister, and provost of the University of Pennsylvania, was born in Nottingham, Cecil County, Md., June 22, 1732, and graduated in 1754 in New Jersey College, of which he remained tutor for two years. Having completed his

theological course, he was ordained, became instructor in the College of Philadelphia, and was installed pastor of the first Presbyterian church, Philadelphia, in 1759. He visited England and Scotland in 1773 in behalf of the academy in Newark, Del., and returned in 1775 to the duties of his ministry. In 1779 he was appointed provost of the University of Pennsylvania, and professor of natural philosophy, in which science he delivered annually a course of learned lectures. In this station, united with that of pastor, he continued to the end of life. He was also one of the vice-presidents of the American Philosophical Society. He died Sept. 8, 1802. He published *Lectures on Natural Philosophy* (2 vols. 8vo), and *Sermons* (8vo).—Sprague, *Annals*, iii, 216.

**Exactions** (Lat. *exactiones, talie*), the name given in ecclesiastical law to taxes of an extraordinary kind, which either were not in use before, or the rate of which has been increased. As a general rule, taxes of this kind are forbidden. Thus the third Council of Toledo prohibited the bishops from "imposing exactions upon the diocese," and Leo IV designates as unlawful exactions any "gifts beyond the statutes of the fathers" that bishops may impose upon clergymen or laymen. The prohibition was renewed at the Council of Lateran in 1179 by Alexander III, who "prohibited bishops or abbots, or any other prelates, from imposing new taxes upon the churches, or from increasing the old ones, or from appropriating for their private uses any portion of the revenue." The imposition of exactions requires a reasonable cause, and limitation to what is necessary. State churches cannot impose an exaction without previously obtaining the permission of the state government.—Herzog, *Real-Encyclop.* iv, 280. (A. J. S.)

**Exactor**, the rendering (Isa. lx, 17) of *נֹגֵס׳*, *noges'*, *z driver* (task-master, Exod. iii, 7; Job iii, 18; Isa. ix, 3; or simply driver of animals, Job xxxix, 7); hence *exactor* of a debt (or tribute, Dan. xi, 20; Zech. ix, 8); hence (in accordance with Oriental ideas and customs) a ruler, king, tyrant (Isa. iii, 12; xiv, 2; Zech. x, 4), as the parallel term "prince" in the above passage of Isaiah shows to be there the meaning.

**Exaltation of Christ** (*status exaltationis*), a theological phrase, including in its scope the resurrection of Christ, his ascension into heaven, his sitting at the right hand of God the Father, and his coming to judge the world at the last day. See articles on these heads; also **CHRISTOLOGY** (vol. ii, p. 281); and Hagenbach, *History of Doctrines*, Smith's ed., ii, 352.

**Exaltation of the Cross.** See **CROSS**, **EXALTATION OF THE**, vol. ii, p. 581.

**Example** (*ἔδειγμα*, Jude 7), especially **CHRIST'S** (*ὑπόδειγμα*, 1 Pet. ii, 21) for the imitation of his followers (*ὑπόδειγμα*, John xiii, 15; elsewhere in other relations, 1 Th. iv, 11; viii, 5; ix, 23; Jas. v, 10; 2 Pet. ii, 6), and subordinately pastors for their flock (*ἄριστος*, Phil. iii, 17; 2 Thess. iii, 9; 1 Tim. iv, 12; 1 Pet. v, 3, etc.). See Flatt, *Das Beispiel Jesu* (in the *Magaz. für chr. Dogmat.* i, 179 sq.); Keil, *De Exemplo Christi* (Lips. 1792; *Opusc.* i, 100-135); Oeder, *De Christi imitatione* (in his *Obs. sacr.* i, 33-56); Schmid, *De perverso Christi imitatione* (Lips. 1710); Stöber, *De exemplorum imitatione* (Argent. 1771-6); Wolf, *De exemplis cuncte adhibendis* (Lips. 1785-6); Kempis, *Imitation of Christ* (often published).

**Example**, "a copy or pattern, in a moral sense, is either taken for a type, instance, or precedent for our admonition, that we may be cautioned against the faults or crimes which others have committed, by the bad consequences which have ensued from them; or example is taken for a pattern for our imitation, or a model for us to copy after. - That good examples have a peculiar power above naked precepts to dispose us to the practice of virtue and holiness may appear by con-

sidering, '1. That they most clearly express to us the nature of our duties in their subjects and sensible effects. General precepts form abstract ideas of virtue, but in examples, virtues are most visible in all their circumstances. 2. Precepts instruct us in what things are our duty, but examples assure us that they are possible. 3. Examples, by secret and lively incentive, urge us to imitation. We are touched in another manner by the visible practice of good men, which reproaches our defects, and obliges us to the same zeal, which laws, though wise and good, will not effect.' The life of Jesus Christ forms the most beautiful example the Christian can imitate. Unlike all others, it was absolutely perfect and uniform, and every way accommodated to our present state. In him we behold all light without a shade, all beauty without a spot, all the purity of the law and the excellency of the Gospel. Here we see piety without superstition, and morality without ostentation; humility without meanness, and fortitude without temerity; patience without apathy, and compassion without weakness; zeal without rashness, and beneficence without prodigality. The obligation we are under to imitate this example arises from duty, relationship, engagement, interest, and gratitude. See art. **JESUS CHRIST**. Those who set bad examples should consider, 1. That they are the ministers of the devil's designs to destroy souls. 2. That they are acting in direct opposition to Christ, who came to save and not to destroy. 3. That they are adding to the misery and calamities which are already in the world. 4. That the effects of their example may be incalculable on society to the end of time, and perhaps in eternity; for who can tell what may be the consequence of one sin on a family, a nation, or posterity? 5. They are acting contrary to the divine command, and thus exposing themselves to final ruin" (Tillotson, *Sermons*, ser. clxxxix, cxc; Barrow, *Works*, vol. iii, ser. ii and iii; Flavel, *Works*, i, 29, 30; Dwight, *Theology*, ser. liv; *Christ our Example*, by Caroline Fry).—Buck, *Theological Dictionary*, s. v.

**Exarch** (*ἐξαρχος*), (1.) the title given, under the Byzantine emperors, to their viceroys in Italy and Africa, after Justinian's reconquest of those provinces.

(2.) The title was adopted in the early Church for the highest orders of the hierarchy. Primates or metropolitans were styled *ἐξαρχοι τῆς ἐπαρχίας*, and the patriarchs were called *ἐξαρχοι τῆς οἰκουμένης*. In the 6th canon of Sardica (A.D. 344) the former title (exarch of the eparchy) is given to primates; the third Council of Carthage, A.D. 397, forbade its use (Riddle, *Antiquities*, bk. iii, ch. iii). The *exarch*, as primate, was "inferior to the patriarch, and superior to the metropolitan. In the third century there were three exarchs, viz. Ephesus, with the diocese of Asia, 12 provinces and 300 sees; Hæraclæa, with the diocese of Thrace, and 6 provinces; Cæsarea, 13 provinces and 104 sees. The privileges of these exarchates were transferred by the Council of Chalcedon (A.D. 451) to the patriarch of Constantinople" (Walcot, *Sacred Archaeology*, p. 268).

(3.) The *exarch* in the Greek Church at the present day is the patriarch's deputy, whose duty it is to visit the provinces under his inspection, to inform himself as to the lives and morals of the clergy; to take cognizance of ecclesiastical causes—the manner of celebrating divine ordinances—the sacraments, particularly confession, the observance of the canons, monastic discipline, affairs of marriages, divorces, etc.; but, above all, to take account of the revenues which the patriarch receives from the several churches.—Bingham, *Orig. Eccles.* Bohn's ed. i, 61, 67.

**Exchanger** (*τραπέζιτης*, so called from the *table* used for holding the coin [see **CHANGER OF MONEY**]), a broker or banker (i. e. bench-man) [see **BANK**], one who exchanged money, and also received money on deposit at interest, in order to loan it out to others at a

higher rate (Matt. xxv, 27). (See Smith's *Dict. of Class. Ant.* s. v. *Mensarii*.) See MONEY-CHANGER; LOAN.

**Excommunication**, the judicial exclusion of offenders from the religious rites and privileges of the particular community to which they belong. It is a power founded upon a right inherent in all religious societies, and is analogous to the powers of capital punishment, banishment, and exclusion from membership which are exercised by political and municipal bodies. If Christianity is merely a philosophical idea thrown into the world to do battle with other theories, and to be valued according as it maintains its ground or not in the conflict of opinions, excommunication, and ecclesiastical punishments and discipline are unreasonable. If a society has been instituted for maintaining any body of doctrine and any code of morals, they are necessary to the existence of that society. That the Christian Church is an organized polity, a spiritual "kingdom of God" on earth, is the declaration of the Bible; and that the Jewish Church was at once a spiritual and a temporal organization is clear. Among the Jews, however, excommunication was not only an ecclesiastical, but also a civil punishment, because in their theocracy there was no distinction between the divine and the statutory right (Exod. xxxi, 14; Ezra x, 3, 11; Neh. xiii, 28). But among Christians excommunication was strictly confined to ecclesiastical relations, as the situation and constitution of the Church during the first three centuries admitted of no intermingling or confounding of civil and religious privileges or penalties. Excommunication, in the Christian Church, consisted at first simply in exclusion from the communion of the Lord's Supper and the love-feasts: "with such a one, no, not to eat" (1 Cor. v, 11). It might also include a total separation from the body of the faithful; and such a person was, with regard to the Church, "as a heathen man and a publican." But this excision did not exempt him from any duties to which he was liable in civil life, neither did it withhold from him any natural obligations, such as are founded on nature, humanity, and the law of nations (Matt. xviii, 17; 1 Cor. v, 5, 11; x, 16-18; 2 Thess. iii, 6, 14; 2 John 10, 11). See CHURCH.

I. *Jewish*.—The Jewish system of excommunication was threefold. For a first offence a delinquent was subjected to the penalty of *קידוּן* (*quiddun*). Rambam (quoted by Lightfoot, *Hore Hebraica*, on 1 Cor. v, 5), Morinus (*De Penitentia*, iv, 27), and Buxtorf (*Lexicon Talm.* col. 1203 sq.) enumerate the twenty-four offences for which it was inflicted. They are various, and range in heinousness from the offence of keeping a fierce dog to that of taking God's name in vain. Elsewhere (Talm. Bab. *Moad Katon*, fol. 16, 1) the causes of its infliction are reduced to two, termed money and epicurism, by which is meant debt and wanton insolence. The offender was first cited to appear in court, and if he refused to appear or to make amends, his sentence was pronounced—"Let M. or N. be under excommunication." The excommunicated person was prohibited the use of the bath, or of the razor, or of the convivial table; and all who had to do with him were commanded to keep him at four cubits' distance. He was allowed to go to the Temple, but not to make the circuit in the ordinary manner. The term of this punishment was thirty days, and it was extended to a second and to a third thirty days when necessary. If at the end of that time the offender was still contumacious, he was subjected to the second excommunication termed *כְּרֵמ* (*cherem*), a word meaning something devoted to God (Lev. xxvii, 21, 28; Exod. xxii, 20 [19]; Num. xviii, 14). Severer penalties were now attached. The offender was not allowed to teach or to be taught in company with others, to hire or to be hired, nor to perform any commercial transactions beyond purchasing the necessaries of life. The sentence was delivered

ed by a court of ten, and was accompanied by a solemn malediction, for which authority was supposed to be found in the "Curse ye Meroz" of Judg. v, 23. Lastly followed *שַׁמְמָתָה* (*shammathá*), which was an entire cutting off from the congregation. It has been supposed by some that these two latter forms of excommunication were undistinguishable from each other. See BAN.

The punishment of excommunication is not appointed by the law of Moses. It is founded on the natural right of self-protection which all societies enjoy. The case of Korah, Dathan, and Abiram (Num. xvi), the curse denounced on Meroz (Judg. v, 23), the commission and proclamation of Ezra (vii, 26; x, 8), and the reformation of Nehemiah (xiii, 25), are appealed to by the Talmudists as precedents by which their proceedings are regulated. In respect to the principle involved, the "cutting off from the people" commanded for certain sins (Exod. xxx, 33, 38; xxxi, 14; Lev. xvii, 4), and the exclusion from the camp denounced on the leprous (Lev. xiii, 46; Num. xii, 14), are more apposite.

In the New Testament, Jewish excommunication is brought prominently before us in the case of the man that was born blind and restored to sight (John ix). "The Jews had agreed already that if any man did confess that he was Christ, he should be put out of the synagogue. Therefore said his parents, He is of age, ask him" (ver. 22, 23). "And they cast him out. Jesus heard that they had cast him out" (ver. 34, 35). The expressions here used, *ἀποσυναγωγος γίνηται*—*ἐξέβαλον αὐτὸν ἐξω*, refer, no doubt, to the first form of excommunication, or *niddui*. Our Lord warns his disciples that they will have to suffer excommunication at the hands of their countrymen (John xvi, 2), and the fear of it is described as sufficient to prevent persons in a respectable position from acknowledging their belief in Christ (John xii, 42). In Luke vi, 22, it has been thought that our Lord referred specifically to the three forms of Jewish excommunication, "Blessed are ye when men shall hate you, and when they shall separate you from their company [*ἀφορίσωσιν*], and shall reproach you [*ἐνεικίσωσιν*], and cast out your name as evil [*ἐκβάλοσιν*], for the Son of man's sake." The three words very accurately express the simple separation, the additional malediction, and the final exclusion of *niddui*, *cherem*, and *shammathá*. This verse makes it probable that the three stages were already formally distinguished from each other, though, no doubt, the words appropriate to each are occasionally used inaccurately. See the monographs in Latin on Jewish excommunication by Musculus (Lips. 1703), Opitz (Kilon. 1680).

II. *In the New Testament*.—Excommunication in the New Testament is not merely founded on the natural right possessed by all societies, nor merely on the example of the Jewish Church and nation. It was instituted by our Lord (Matt. xviii, 15, 18), and it was practised by and commanded by Paul (1 Tim. i, 20; 1 Cor. v, 11; Tit. iii, 10).

1. *Its Institution*.—The passage in Matthew has led to much controversy, into which we do not enter. It runs as follows: "If thy brother shall trespass against thee, go and tell him his fault between thee and him alone; if he shall hear thee, thou hast gained thy brother. But if he will not hear thee, then take with thee one or two more, that in the mouth of two or three witnesses every word may be established. And if he shall neglect to hear them, tell it unto the Church; but if he neglect to hear the Church, let him be unto thee as a heathen man and a publican. Verily I say unto you, Whatsoever ye shall bind on earth shall be bound in heaven, and whatsoever ye shall loose on earth shall be loosed in heaven." Our Lord here recognises and appoints a way in which a member of his Church is to become to his brethren as a heathen man and a publican, i. e. be reduced to a state analogous to

that of the Jew suffering the penalty of the third form of excommunication. It is to follow on his contempt of the censure of the Church passed on him for a trespass which he has committed. The final excommunication is to be preceded, as in the case of the Jew, by two warnings.

2. *Apostolic Example.*—In the Epistles we find Paul frequently claiming the right to exercise discipline over his converts (comp. 2 Cor. i, 23; xiii, 10). In two cases we find him exercising this authority to the extent of cutting off offenders from the Church. One of these is the case of the incestuous Corinthian: "Ye are puffed up, and have not rather mourned, that he that hath done this deed might be taken away from among you. For I verily, as absent in body, but present in spirit, have judged already, as though I were present, concerning him that hath so done this deed, in the name of our Lord Jesus Christ, when ye are gathered together, and my spirit, with the power of our Lord Jesus Christ, to deliver such a one unto Satan for the destruction of the flesh, that the spirit might be saved in the day of the Lord Jesus" (1 Cor. v, 2-5). The other case is that of Hymeneus and Alexander: "Holding faith and a good conscience, which some, having put away concerning faith, have made shipwreck; of whom is Hymeneus and Alexander, whom I have delivered unto Satan, that they may learn not to blaspheme" (1 Tim. i, 19, 20). It seems certain that these persons were excommunicated, the first for immorality, the others for heresy. What is the full meaning of the expression "deliver unto Satan" is doubtful. All agree that excommunication is contained in it, but whether it implies any further punishment, inflicted by the extraordinary powers committed specially to the apostles, has been questioned. The strongest argument for the phrase meaning no more than excommunication may be drawn from a comparison of Col. i, 13. Addressing himself to the "saints and faithful brethren in Christ which are at Colosse," Paul exhorts them to "give thanks unto the Father, which hath made us meet to be partakers of the inheritance of the saints in light: who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: in whom we have redemption through his blood, even the forgiveness of sins." The conception of the apostle here is of men lying in the realm of darkness, and transported from thence into the kingdom of the Son of God, which is the inheritance of the saints in light, by admission into the Church. What he means by the power of darkness is abundantly clear from many other passages in his writings, of which it will be sufficient to quote Eph. vi, 12: "Put on the whole armor of God, that ye may be able to stand against the wiles of the devil; for we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places." Introduction into the Church is therefore, in Paul's mind, a translation from the kingdom and power of Satan to the kingdom and government of Christ. This being so, he could hardly more naturally describe the effect of excluding a man from the Church than by the words "deliver him unto Satan," the idea being that the man ceasing to be a subject of Christ's kingdom of light, was at once transported back to the kingdom of darkness, and delivered therefore into the power of its ruler, Satan. This interpretation is strongly confirmed by the terms in which Paul describes the commission which he received from the Lord Jesus Christ when he was sent to the Gentiles: "To open their eyes, and to turn them from darkness to light, and from the power of Satan unto God, that they may receive forgiveness of sins, and inheritance among them which are sanctified by faith that is in me" (Acts xxvi, 18). Here again the act of being placed in Christ's kingdom, the Church, is pronounced to be a translation from darkness to light, from the power of

Satan unto God. Conversely, to be cast out of the Church would be to be removed from light to darkness, to be withdrawn from God's government, and delivered into the power of Satan (so Balsamon, and Zonaras, in *Basil. Can.* 7; Estius, in *1 Cor.* v; Beveridge, in *Crit. Apost.* x). If, however, the expression means more than excommunication, it would imply the additional exercise of a special apostolical power, similar to that exerted on Ananias and Sapphira (Acts v, 1), Simon Magus (viii, 20), and Elymas (xiii, 10). (So Chrysostom, Ambrose, Augustine, Hammond, Grotius, Lightfoot.)

3. *Apostolic Precept.*—In addition to the claim to exercise discipline, and its actual exercise in the form of excommunication by the apostles, we find apostolic precepts directing that discipline should be exercised by the rulers of the Church, and that in some cases excommunication should be resorted to: "If any man obey not our word by this epistle, note that man, and have no company with him, that he may be ashamed. Yet count him not as an enemy, but admonish him as a brother," writes Paul to the Thessalonians (2 Thess. iii, 14). To the Romans: "Mark them which cause divisions and offences contrary to the doctrine which ye have heard, and avoid them" (Rom. xvi, 17). To the Galatians: "I would they were even cut off that trouble you" (Gal. v, 12). To Timothy: "If any man teach otherwise, . . . from such withdraw thyself" (1 Tim. vi, 8). To Titus he uses a still stronger expression: "A man that is a heretic, after the first and second admonition, reject" (Tit. iii, 10). John instructs the lady to whom he addresses his second epistle not to receive into her house, nor bid God speed to any who did not believe in Christ (2 John 10); and we read that in the case of Cerinthus he acted himself on the precept that he had given (Eusebius, *Hist. Eccl.* iii, 28). In his third epistle he describes Diotrephes, apparently a Judaizing presbyter, "who loved to have the pre-eminence," as "casting out of the Church," i. e. refusing Church communion to the stranger brethren who were travelling about preaching to the Gentiles (3 John 10). In the addresses to the Seven Churches the angels or rulers of the church of Pergamos and of Thyatira are rebuked for "suffering" the Nicolaitans and Balaamites "to teach and to seduce my servants to commit fornication, and to eat things sacrificed unto idols" (Rev. ii, 20). There are two passages still more important to our subject. In the epistle to the Galatians, Paul denounces, "Though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed [*ἀνάθεμα ἔστω*]." As I said before, so say I now again, if any man preach any other gospel unto you than that ye have received, let him be accursed" (*ἀνάθεμα ἔστω*, Gal. i, 8, 9). And in the second epistle to the Corinthians: "If any man love not the Lord Jesus Christ, let him be Anathema Maran-atha" (1 Cor. xvi, 22). It has been supposed that these two expressions, "let him be Anathema," "let him be Anathema Maran-atha," refer respectively to the two later stages of Jewish excommunication—the *cherem* and the *shammudhā*. This requires consideration.

The words *ἀνάθεμα* and *ἀνάθημα* have evidently the same derivation, and originally they bore the same meaning. They express a person or thing set apart, laid up, or devoted. But whereas a thing may be set apart by way of honor or for destruction, the words, like the Latin "sacer" and the English "devoted," came to have opposite senses—*τὸ ἀπυλοποιεῖν Θεοῦ*, and *τὸ ἀφοραστῆναι Θεῷ*. The Sept. and several ecclesiastical writers use the two words almost indiscriminately, but in general the form *ἀνάθημα* is applied to the votive offering (see 2 Macc. ix, 16; Luke xxi, 5; and Chrysost. *Hom.* xvi in *Ep. ad Rom.*), and the form *ἀνάθεμα* to that which is devoted to evil (see Deut. vii, 26; Josh. vi, 17; vii, 13). Thus Paul de-

clares that he could wish himself an *ánáthema* from Christ if he could thereby save the Jews (Rom. ix, 3). His meaning is that he would be willing to be set apart as a vile thing, to be cast aside and destroyed, if only it could bring about the salvation of his brethren. Hence we see the force of *ánáthema éstō* in Gal. i, 8. "Have nothing to do with him," would be the apostle's injunction, "but let him be set apart as an evil thing, for God to deal with him as he thinks fit." Hammond (in loc.) paraphrases it as follows: "You are to disclaim and renounce all communion with him, to look on him as on an excommunicated person, under the second degree of excommunication, that none is to have any commerce with in sacred things." Hence it is that *ánáthema éstō* came to be the common expression employed by councils at the termination of each canon which they enacted, meaning that whoever was disobedient to the canon was to be separated from the communion of the Church and its privileges, and from the favor of God, until he repented (see Bingham, *Ant.* xvi, 2, 16). See ANATHEMA.

The expression *Áνάθημα μακαρανά,* as it stands by itself without explanation in 1 Cor. xvi, 22, is so peculiar, that it has tempted a number of ingenious expositions. Parkhurst hesitatingly derives it from מְרִירָה מְרִירָה, "Cursed be thou." But this derivation is not tenable. Buxtorf, Morinus, Hammond, Bingham, and others identify it with the Jewish *shammáthá*. They do so by translating *shammáthá*, "The Lord comes." But *shammáthá* cannot be made to mean "The Lord comes" (see Lightfoot, in loc.). Several fanciful derivations are given by rabbinical writers, as "There is death," "There is desolation;" but there is no mention by them of such a signification as "The Lord comes." Lightfoot derives it from מְרִירָה, and it probably means a thing excluded or shut out. Maranatha, however peculiar its use in the text may seem to us, is a Syro-Chaldaic expression, signifying "The Lord is come" (Chrysostom, Jerome, Estius, Lightfoot), or "The Lord cometh." If we take the former meaning, we may regard it as giving the reason why the offender was to be anathematized; if the latter, it would either imply that the separation was to be in perpetuity, "donec Dominus redeat" (Augustine), or, more properly, it would be a form of solemn appeal to the day on which the judgment should be ratified by the Lord (comp. Jude 14). In any case it is a strengthened form of the simple *ánáthema éstō*. And thus it may be regarded as holding towards it a similar relation to that which existed between the *shammáthá* and the *cherem*, but not on any supposed ground of etymological identity between the two words *shammáthá* and *maron-atha*. Perhaps we ought to interpunctuate more strongly between *ánáthema* and *μαραναθά*, and read *ήνω άνάθημα μαραναθά*, i. e. "Let him be anathema. The Lord will come." The *anathema* and the *cherem* answer very exactly to each other (see Lev. xxvii, 28; Num. xxi, 3; Isa. xlili, 28). See MARANATHA.

4. *Restoration to Communion.*—Two cases of excommunication are related in Holy Scripture, and in one of them the restitution of the offender is specially recounted. The incestuous Corinthian had been excommunicated by the authority of Paul, who had issued his sentence from a distance without any consultation with the Corinthians. He had required them publicly to promulgate it and act upon it. They had done so. The offender had been brought to repentance, and was overwhelmed with grief. Hereupon Paul, still absent as before, forbids the further infliction of the punishment, pronounces the forgiveness of the penitent, and exhorts the Corinthians to receive him back to communion, and to confirm their love towards him.

5. *The Nature of Excommunication* is made more evident by these acts of Paul than by any investigation of Jewish practice or of the etymology of words. We

thus find (1) that it is a spiritual penalty, involving no temporal punishment except accidentally; (2) that it consists in separation from the communion of the Church; (3) that its object is the good of the sufferer (1 Cor. v, 5), and the protection of the sound members of the Church (2 Tim. iii, 17); (4) that its subjects are those who are guilty of heresy (1 Tim. i, 20) or gross immorality (1 Cor. v, 1); (5) that it is inflicted by the authority of the Church at large (Matt. xviii, 18), wielded by the highest ecclesiastical officer (1 Cor. v, 3; Tit. iii, 10); (6) that this officer's sentence is promulgated by the congregation to which the offender belongs (1 Cor. v, 4), in deference to his superior judgment and command (2 Cor. ii, 9), and in spite of any opposition on the part of a minority (*ib.* 6); (7) that the exclusion may be of indefinite duration or for a period; (8) that its duration may be abridged at the discretion and by the indulgence of the person who has imposed the penalty (*ib.* 8); (9) that penitence is the condition on which restoration to communion is granted (*ib.* 7); (10) that the sentence is to be publicly reversed as it was publicly promulgated (*ib.* 10).—Smith, *Appendix*, s. v.

III. *In the Post-Apostolic Christian Church.*—(I.) *In general.*—Such a power is necessarily inherent in every community; and although "the only sense in which the apostles, or, of course, any of their successors in the Christian ministry, can be empowered to 'forgive sins' as against God is by pronouncing and proclaiming his forgiveness of all those who, coming to him through Christ, repent and forsake their sins," yet since offences *as against a community* may "be visited with penalties by the regular appointed officers of that community, they may enforce or remit such penalties. On these principles is founded the right which the Church claims both to punish ecclesiastical offences, and to pronounce an absolute and complete pardon of a particular offender on his making the requisite submission and reparation" (Eden, s. v.).

(II.) *In the early Christian Church.*—1. In the discipline of the primitive Church, according to the apostolic injunction, recourse was not had to excommunication until "after the first and second admonition" (*προβοήθεια*). If the offender proved refractory after the time granted for repentance (Siegel, *Alterthümer*, ii, 131), he was liable to excommunication, which at first consisted simply in the removal of the offender from the Lord's Supper and the love-feasts; hence the word *excommunication*, separation from *communio*. The practice was founded on the words of the apostle (1 Cor. v, 11), "with such an one, no, not to eat;" which do not refer to ordinary meals and the common intercourse of life, but to the *agape* and other solemnities. The chief difference between Jewish and Christian excommunication consisted in this: the former extended in its consequences to the affairs of civil life, whereas the latter was strictly confined to ecclesiastical relations. It was impossible, in the constitution and situation of the Church during the three first centuries, that there should have been any confounding or intermingling of civil and religious privileges or penalties. But, though instituted at first for the purpose of preserving the purity of the Church, excommunication was afterwards by degrees converted by ambitious ecclesiastics into an engine for promoting their own power, and was often inflicted on the most frivolous occasions (Bingham, *Orig. Eccles.* bk. xv, chap. ii). The primitive Church was very cautious in exercising its power of excommunication. No man could be condemned to it in his absence, or without being allowed liberty to answer for himself. Legal conviction was always required, i. e. by his own confession, by credible evidence, or by open notoriety. Minors were subjected to corporal discipline rather than to this censure (Bingham, *Orig. Eccles.* bk. xvi, ch. ii; Cave, *Prim. Christianity*, iii, 5).

2. There were two excommunications, the greater

(*major*) and lesser (*minor*). The *excommunicatio minor* (*ἀφορισμός*) excluded from participation in the Eucharist and prayers of the faithful, but did not expel from the Church; for the person under its sentence might stay to hear the psalmody, reading of the Scripture, sermons and prayers of the catechumens and penitents, and then depart as soon as the first service, called the *service of catechumens*, was ended (Theod. Ep. 77; *ad Eubul.* iii, 797). This punishment was commonly inflicted upon lesser crimes, or if upon greater, upon such sinners only as showed a willingness to repent—upon those who had lapsed rather through infirmity than maliciousness. The *excommunicatio major*, greater excommunication (*παρατέλλης ἀφορισμός*), was a total expulsion from the Church, and separation from communion in all holy offices with it (*Encyclop. Metropolitana*). When attended with execrations, excommunication was called *anathema* (see article, vol. i, p. 219). The several churches mutually informed each other of their own separate excommunications, in order that a person excommunicated by one church might be held so by all; and any church which received him was held deserving of similar punishment. He who was guilty of any intercourse with an excommunicated person, himself incurred a like sentence, which deprived him of Christian burial and insertion in the diptychs or catalogues of the faithful. No gifts or oblations were received from the excommunicated. No intermarriages might take place with them. Their books might not be read, but were to be burned (Bingham, *Orig. Eccl.* bk. xv). For the restoration of excommunicated persons, penances (q. v.) and public professions of repentance were required; and in Africa and Spain the absolution of *lapsed* persons (i. e. those who, in time of persecution, had yielded to the force of temptation, and fallen away from their Christian profession by the crime of actual sacrifice to idols) was forbidden, except at the hour of death, or in cases where martyrs interceded for them. See LAPSE.

(III.) *The Roman Church.*—As the pretensions of the hierarchy increased, excommunication became more and more an instrument of ecclesiastical power, as well as a means of enlarging it. When the Church had full control of the state, its sentences were attended with the gravest civil as well as ecclesiastical consequences. There are three degrees of excommunication, the *minor*, the *major*, and the *anathema*.

1. The *minor* is incurred by holding communion with an excommunicated person: *oratiōne, locutiōne, bibendo, comedendo*—praying, speaking, drinking, eating; and absolution may be given by any priest on confession. Priests who have incurred the *minor* ban may administer the Eucharist, but cannot partake of it.

2. The *major excommunicatio* falls upon those who disobey the commands of the pope, or who, having been found guilty of any offence, civil or criminal, refuse to submit to certain points of discipline; in consequence of which they are excommunicated from the Church triumphant, and delivered over to the devil and his angels. It requires a written sentence from a bishop after three admonitions. It deprives the condemned person of all the blessings of the Church in any shape, except that he is not debarred from hearing the Word. So long as the State obeyed the Church, civil disabilities followed the sentence of excommunication; no obedience was due to the excommunicated; the laws could give them no redress for injuries; and none could hold intercourse with them under penalty of excommunication. On this last point, however, a distinction has been made since the 15th century between those who are called *tolerati* (tolerated) and those who are designated as *vivendi* (persons to be shunned). Only in the case of the latter (a case extremely rare, and confined to heresiarchs, and other signal offenders against the faith or public order of the Church) are the ancient rules for prohibition of intercourse enforced. With the 'tolerated,' since the

celebrated decree of Pope Martin V in the Council of Constance, the faithful are permitted to maintain the ordinary intercourse. By the 12th century the word ban (*bannus, bannum*), which in ancient jurisprudence denoted a declaration of outlawry, had come into ecclesiastical use to denote the official act of excommunication. See BAN.

The professed aim of excommunication was the reform of the offender as well as the purification of the Church. Absolution can be granted, in case of the major ban, only by the authority which laid the ban, or its successor. Before absolution the authorities must be satisfied of penitence. The "penitent must first swear to obey the commands of the Church, and to make all necessary atonement for his special offence; he must then be *reconciled* by kneeling, bare-headed and stripped to his shirt, before the bishop sitting at the church gates. Here he again repeats his oath, and the bishop, reciting the psalm *Deus misericorditer*, strikes him with a rod during each verse. Then, after certain prayers, he absolves him and leads him into the church."

3. The *anathema* is attended with special ceremonies. "The bishop must be attended by twelve priests, each of whom, as well as himself, bears a lighted candle. He then sits before the high altar, or any other public place which he prefers, and delivers his sentence, which adjudges the offender to be *anathematizatum et damnatum cum diabolo et angelis ejus et omnibus reprobis in aeternum ignem*—cursed and damned with the devil and his angels and all the reprobate to eternal fire. The candles are then dashed down. The ceremonies of absolution from this sentence are not very different from the last, although the form of prayer is varied" (*Encyclop. Metrop.* s. v.). The effects of the anathema were summed up in the monkish lines

Si pro delicto anathema quis efficiatur,  
Os, orare, vale, communiō, mensa negatur.

See ANATHEMA; BELL, BOOK, AND CANDLE.

"In the Roman Catholic Church the power of excommunicating is held to reside, not in the congregation, but in the bishop; and this is believed to be in exact accordance with the remarkable proceeding commemorated in the First Epistle of St. Paul to the Corinthians (1 Cor. v, 3, 5), and with all the earliest recorded examples of its exercise. Like all the powers of the episcopate, it is held to belong, in an especial and eminent degree, to the Roman bishop, as primate of the Church; but it is by no means believed to belong to him exclusively, nor has such exclusive right ever been claimed by the bishops of Rome. On the contrary, bishops within their sees, archbishops while exercising visitatorial jurisdiction, heads of religious orders within their own communities, all possess the power to issue excommunication, not only by the ancient law of the Church, but also by the most modern discipline" (Chambers, s. v.). But Aquinas held that excommunication, as not belonging to the keys of order, not to those of jurisdiction, and as not referring to grace directly, but only accidentally, might be exercised by persons not in holy orders, but yet having jurisdiction in ecclesiastical courts (*Summa, Suppl.* iii, qu. 22). See Marshall, *Penitential Discipline*, Oxf. 1844, p. 139. The Council of Trent declares (sess. xxv, ch. iii, *de Reform.*) that, "Although the sword of excommunication is the very sinews of ecclesiastical discipline, and very salutary for keeping the people in their duty, yet it is to be used with sobriety and great circumspection; seeing that experience teaches that if it be rashly or for slight causes wielded, it is more despised than feared, and produces destruction rather than safety. . . . It shall be a crime for any secular magistrate to prohibit an ecclesiastical judge from excommunicating any one, or to command that he revoke an excommunication issued, under pretext that the things contained in the present decree have not

been observed; whereas the cognizance hereof does not pertain to seculars, but to ecclesiastics. And every excommunicated person soever who, after the lawful monitions, does not change his mind, shall not only not be received to the sacraments and to communion and intercourse with the faithful, but if, being bound with censures, he shall, with obdurate heart, remain for a year in the defilement thereof, he may even be proceeded against as suspected of heresy." The popes have exercised the power of excommunication against entire communities at once. The *Capitularies* of Pepin the Less, in the 8th century, ordained that the greater excommunication should be followed by banishment from the country. On the claim of the popes to excommunicate and depose monarchs, and to free subjects from their allegiance, see McClintock, *Temporal Power of the Pope* (N. Y. 1855, 12mo). "The latest examples of papal excommunication of monarchs were Napoleon I in 1809, and Victor Emmanuel, king of Italy, in 1860; neither of whom, however, was excommunicated by name, the pope having confined himself to a solemn and reiterated publication of the penalties decreed by his predecessors against those who unjustly invaded the territories of the Holy See, usurped or violated its rights, or violently impeded their free exercise. The excommunication of a sovereign was regarded as freeing subjects from their allegiance; and, in the year 1102, this sentence was pronounced against the emperor Henry IV, an example which subsequent popes likewise ventured to follow. But the fearful weapons with which the popes armed themselves in this power of excommunication were rendered much less effective through their incautions employment, the evident worldly motives by which it was sometimes governed, and the excommunications which rival popes hurled against each other during the time of the great papal schism" (Chambers, s. v.).

(IV.) *The Greek Church.*—In the Greek Church excommunication cuts off the offender from all communion with the 318 fathers of the first Council of Nicea, consigns him to the devil and his angels, and condemns his body to remain after death as hard as a piece of flint, unless he humbles himself and makes atonement for his sins by a sincere repentance. "The form abounds with dreadful imprecations; and the Greeks assert that, if a person dies excommunicated, the devil enters into the lifeless corpse; and, therefore, in order to prevent it, the relations of the deceased cut his body in pieces and boil them in wine. Every year, on a fixed Sunday, the greater ban is pronounced against the pope and the Church of Rome, on which occasion, together with a great deal of idle ceremony, he drives a nail into the ground with a hammer as a mark of malediction" (Buck, s. v.). Sir Paul Rycout (*Present State of the Greek and Armenian Churches*, Lond. 1679, 8vo), who wrote his observations on the state of that communion in 1678, has given, in the original Greek, the form of an excommunication issued against an unknown thief whom the authorities were seeking to discover. It runs as follows: "If they restore not to him that which is his own, and possess him peaceably of it, but suffer him to remain injured and damned, let him be separated from the Lord God Creatour, and be accursed, and unpardoned, and undissolvable after death in this world, and in the other which is to come. Let wood, stones, and iron be dissolved, but not they: may they inherit the leprose of *Gehazi* and the confusion of *Judas*; may the earth be divided, and devour them like *Dathan* and *Abiram*; may they sigh and tremble on earth like *Cain*, and the wrath of God be upon their heads and countenances; may they see nothing of that for which they labor, and beg their bread all the days of their lives; may their works, possessions, labors, and services be accursed; always without effect or success, and blown away like dust; may they have the curses of the holy and righteous patriarchs *Abram*, *Isaac*, and *Jacob*; of the 318 saints

who were the divine fathers of the Synod of *Nicee*, and of all other holy synods; and being without the Church of Christ, let no man administer unto them the things of the Church, or bless them, or offer sacrifice for them, or give them the *ἀγρῖσσορον*, or the blessed bread, or eat, or drink, or work with them, or converse with them; and after death let no man bury them, in penalty of being under the same state of excommunication; for so let them remain until they have performed what is here written."

(V.) *In Protestant Churches.*—New relations between Church and State followed hard upon the Reformation, and new limits were soon assigned to the exercise of discipline. According to the view of the Wittenberg reformers, the ban could have no civil effect unless ratified by the State. The necessity of the power of excommunication in the Church was asserted by all the Reformers. They maintained that excommunication is the affair of the whole Church, clergy and laity (Calvin, *Institut.* vol. iv, chap. xi; Melancthon, *Corpus Ref. ed. Bretschneider*, iii, 965). See ERASTIANISM. They disclaimed the right of using the *excommunicatio major*. In general, the "Reformers retained only that power of excommunication which appeared to them to be inherent in the constitution of the Christian society, and to be sanctioned by the Word of God; nor have any civil consequences been generally connected with it in Protestant countries. To connect such consequences with excommunication in any measure whatever is certainly inconsistent with the principles of the Reformation" (Chambers, s. v.).

The causes of excommunication in the established Church of England are, contempt of the bishops' court, heresy, neglect of public worship and the sacraments, incontinency, adultery, simony, etc. If the judge of any spiritual court excommunicates a man for a cause of which he has not the legal cognizance, the party may have an action against him at common law, and he is also liable to be indicted at the suit of the king (*Can.* 65, 68; see also the Homily *On the Right Uses of the Church*). The 33d Article of Religion is as follows: "That person which, by open denunciation of the Church, is rightly cut off from the unity of the Church, and excommunicated, ought to be taken of the whole multitude of the faithful as a heathen and publican until he be openly reconciled by penance, and received into the Church by a judge that hath authority thereunto." "By old English law an excommunicated person was disabled from doing any act required to be done by one that is *probus et legalis homo*. He could not serve on juries, nor be witness in any court, nor bring an action real or personal to recover lands or money due to him. By stat. 5 and 6 Edward VI, cap. 4, striking, or drawing a weapon to strike, in a church or church-yard, incurred *ipso facto* excommunication; *ipso facto* excommunication, or *lute sententia*, meaning some act so clear or manifest that no sentence is requisite, in contradistinction from *sententia ferenda*, i. e. when sentence must be passed before the offender be considered excommunicated. The offences which, in the reign of Edward III, 1373, were punished by *ipso facto* excommunication, are enumerated in some *articuli* issued when Wittlesey was archbishop of Canterbury; most of them are such as might be injurious to the persons or properties of the clergy. The document may be found in *Conc. Magn. Britt.* iii, 95. By 3 James I, cap. 5, every popish recusant convict stands to all intents and purposes disabled, as a person lawfully excommunicated. The ecclesiastical law denies Christian burial to those excommunicated *majori excommunicatione*, and an injunction to the ministers to that effect will be found in the sixty-eighth canon, and in the rubric of the burial service. The law acknowledged two excommunications: the *lesser* excluded the offender from the communion of the Church only; the *greater* from that communion, and also from the company of the faithful, etc. The sixty-

fifth canon enjoins ministers solemnly to denounce those who stand lawfully excommunicated every six months, as well in the parish church as in the cathedral church of the diocese in which they remain, 'openly in time of divine service, upon some Sunday,' 'that others may be thereby both admonished to refrain their company and society, and excited the rather to procure out a writ de excommunicato capiendo, thereby to bring and reduce them into due order and obedience.' By statute 52 George III, cap. 127, excommunications, and the proceedings following thereupon, are discontinued, except in certain cases specified in the act; which may receive definitive sentences as spiritual censures for offences of ecclesiastical cognizance; and instead of sentence of excommunication, which used to be pronounced by the ecclesiastical courts in cases of contumacy, the offenders are to be declared contumacious, and to be referred to the court of chancery, by which a writ de contumace capiendo is issued instead of the old writ de excommunicato capiendo. Formerly this writ de excommunicato capiendo was issued by the court of chancery upon it being signified by the bishop's certificate that forty days have elapsed since sentence of excommunication has been published in the church without submission of the offender. The sheriff then received the writ, called also a *significavit*, and lodged the culprit in the county jail till the bishop certified his reconciliation. A similar method of proceeding to that now adopted was recommended by a report of a committee of both houses of Parliament as far back as March 7, 1710, and again on April 30, 1714. No person excommunicated for such offences as are still liable to the punishment can now be imprisoned for a longer term than six months (Burns, *Eccle. Law*, by Tyrwhit, *ad v.*). In Scotland, when the lesser excommunication, or exclusion from the sacraments has failed, the minister pronounces a form by which the impenitent offender is declared 'excommunicated, shut out from the communion of the faithful, debarred from their privileges, and delivered unto Satan for the destruction of his flesh, that his spirit may be saved in the day of the Lord Jesus.' The people are then warned to avoid all unnecessary intercourse with him. Anciently, in Scotland, an excommunicated person was incapable of holding feudal rights, but at present the sentence is unaccompanied by any civil penalty or disqualification (*Encyclopædia Metropolitana*, s. v.).

The law of the Protestant Episcopal Church in America, as expressed by the 42d canon of 1832, is as follows: Sec. 1. If any persons within this Church offend their brethren by any wickedness of life, such persons shall be repelled from the holy communion, agreeably to the rubric. Sec. 2. On information being laid before the bishop that any one has been repelled from communion, it shall not be his duty to institute an inquiry unless there be a complaint made to him in writing by the repelled party. But on receiving complaint, it shall be the duty of the bishop, unless he think fit to restore him from the insufficiency of the cause assigned by the minister, to institute an inquiry, as may be directed by the canons of the diocese in which the event has taken place. Sec. 3. In the case of a great heinousness of offence on the part of members of this Church, they may be proceeded against to the depriving them of all privileges of church membership, according to such rules or process as may be provided by the General Convention, and, until such rules and process shall be provided, by such as may be provided by the different State Conventions. See also the 33d Article of Religion.

In the Methodist Episcopal Church the power of excommunication lies with the minister after trial before a jury of the peers of the accused party. The grounds and forms of trial are given in the *Discipline*, part iii, chap. i. It is provided in the Constitution that no law shall ever be made doing away the privilege of accused

ministers or members to have trial and right of appeal (*Discipline*, pt. ii, ch. i, § 1).

"Among the *Independents, Congregationalists, and Baptists*, the persons who are or should be excommunicated are such as are quarrelsome and litigious (Gal. v, 12); such as desert their privileges, withdraw themselves from the ordinances of God, and forsake his people (Jude 19); such as are irregular and immoral in their lives, railers, drunkards, extortioners, fornicators, and covetous (Eph. v, 5; 1 Cor. v, 11). In the United States these simple principles of Church discipline are very generally followed by all evangelical denominations" (Buck, s. v.). See particularly the *Form of Government of the Presbyterian Church*, bk. ii of Discipline; Dexter, *On Congregationalism* (Boston, 1865), p. 191-2; Ripley, *On Church Polity* (Bost. 1867), p. 81 sq.; Edwards, *Nature and Use of Excommunication* (*Works*, N. Y., 1848), iv, 638.

Board), p. 249; Gibbon, *Decline and Fall*, ch. xv, pt. v. See ANATHEMA; BAN; DISCIPLINE.

**Exeat**, a Latin term, signifying either the permission given by a bishop to a clergyman of his diocese that he may for a time go out of his diocese, or the same permission given by an abbot to one of the "religious" of his monastery, or by the authorities of a college (in England), to a student (Eden).

**Execration** (עֲרִיצָה, *alah*, Jer. xlii, 18; xlv, 12; a "curse" or "oath," abstractly, as elsewhere) is properly the representative of the Greek word *κατάρα*, which occurs (in the verb *καταράσθαι*) in the Sept. at Num. xxiii, 8; xxiv, 9; Josh. vi, 26; 1 Sam. xvii, 43, etc., as a rendering of various Heb. terms (עֲרִיצָה, עֲרִיצָה, עֲרִיצָה, etc.), and also in the N. T. ("curse," Matt. v, 44; Mark ii, 21, etc.). It is used also in profane authors to denote the imprecations which it was customary among ancient nations to pronounce upon their enemies for the purpose of calling down the divine wrath, branding them with infamy, and exciting against them the passions of the multitude. By this means they also devoted their enemies to the ruin they considered them to deserve. These imprecations were chiefly pronounced by priests, enchanters, or prophets. See BALAAM. The Athenians made use of them against Philip of Macedon. They convened an assembly, in which it was decreed that all statues, inscriptions, or festivals among them, in any way relating to him or his ancestors, should be destroyed, and every other possible reminiscence of him profaned; and that the priests, as often as they prayed for the success of the Athenian affairs, should pray for the ruin of Philip. It was also customary, both among the Greeks and Romans, after having destroyed cities in war, the revival of whose strength they dreaded, to pronounce execrations upon those who should rebuild them. Strabo observes that Agamemnon pronounced execrations on those who should rebuild *Troy*, as Cræsus did against those who should rebuild *Sidena*; and this mode of execrating cities Strabo calls an ancient custom (*κατὰ παλαιὴν ἔθος*, xiii, p. 898, edit. 1707). The Romans published a decree full of execrations against

those who should rebuild Carthage (Zonaras, *Annal.*). An incident somewhat analogous is related (Josh. vi, 26) after the taking of Jericho. From the words "and Joshua adjured them at that time," it is likely that he acted under a divine intimation that Jericho should continue in ruins, as a monument of the divine displeasure and a warning to posterity. The words "cursed be the man (the individual) before the Lord that riseth up and buildeth this city Jericho," although transformed into an execration by the word supplied by the translators, amount to no more than a prediction that "he shall lay the foundation thereof in his first-born, and in his youngest son shall he set up the gates of it," that is, he shall meet with so many impediments to his undertaking that he shall outlive all his children, dying in the course of nature before he shall complete it. See JERICHO. Execrations were also pronounced upon cities and their inhabitants before undertaking a siege (Macrobius has preserved two of the ancient forms used in reference to the destruction of Carthage, *Saturnal.* iii, 9), and before engaging with enemies in war. Tacitus relates that the priestesses of ancient Britain devoted their Roman invaders to destruction with imprecations, ceremonies, and attitudes, which for a time overwhelmed the soldiers with terror (*Annal.* xiv, 29). The execrations in the 83d Psalm, probably written on the occasion of the confederacy against Jehoshaphat, and other instances of a like nature, partake of the execrations of the heathen in nothing but form, being the inspired predictions or denunciations of divine vengeance against the avowed enemies of the God of Israel, notwithstanding the proofs they had witnessed of his supremacy; and the object of these imprecations, as in many other instances, is charitable, namely, their conversion to the true religion (ver. 18; see also Psa. lix, 12).—Kitto, s. v. See ANATHEMA; IMPRECATION.

**Execution**, or capital punishment, among the Jews, when lawful and regular, was of one of the following kinds. 1. *Death by the sword* (כָּרַח הַחֶבֶד, or כָּרַח הַחֶבֶד, also simply כָּרַח הַחֶבֶד, 2 Sam. i, 15; 2 Kings x, 25; Jer. xxvi, 23), by which, however, we are not to understand beheading (in 2 Kings x, 7, the bodies were probably decapitated after death), as the Rabbins will have it (Mishna, *Sanhedr.* vii, 3), a penalty that early occurs in Egypt (Gen. xl, 19), and later in the Roman period among the Jews, as the introduction of foreign princes (Matt. xiv, 10 sq.), and as is probably meant in Acts xii, 2 (comp. Josephus, *Ant.* xv, 1, 2); but the offender was stabbed or cut to death, as the case might be. 2. *Stoning* (q. v.); since the shooting with a dart, mentioned in Exod. xix, 13, was only selected in place of this when an individual was to be put to death at a distance. These punishments were intensified by indignities to the corpse; namely, (a.) *Burning* (שָׂרַף הַחַי, Lev. xx, 14; xxi, 9; compare Josh. vii, 15, 25; Gen. xxxviii, 24; 1 Macc. iii, 5; [see Michaelis in loc.]). That we are here not to think of a burning alive, we may gather from Josh. vii, 25; and it is the more probable from the procedure detailed in the Mishna (*Sanhedr.* vii, 2), which directs that the delinquent's mouth should be forced open by a cloth drawn around the neck, and melted lead then be poured in! (b.) *Hanging* (הָרַח הַחַי) on a tree or post (Deut. xxi, 22; Num. xxv, 4; comp. Josh. x, 26; 2 Sam. iv, 12; 1 Sam. xxxi, 8, 10), with which mutilation of the dead body was often connected (2 Sam. iv, 12). The person hung was regarded as execrated (Deut. xxi, 23; comp. Gal. iii, 13), and was not allowed to remain suspended over night (Deut. xxi, 23; comp. Josh. viii, 29; x, 26 sq.), through fear of tainting the atmosphere, since putrescence soon began. The opposite treatment was deemed an extraordinary severity (2 Sam. xxi, 6, 9 sq.). The hanging of a living person (Ezra vi, 11) is a Persian punishment. Under

the Herods this custom was likewise introduced among the Jews (Josephus, *Ant.* xvi, 11, 6), as in the Roman period in Egypt (Philo, ii, 529). (c.) Finally, a heap of stones (בְּרֹחַ אֲבָבִים) was thrown over the body, i. e. the grave (Josh. vii, 25 sq.; viii, 29; 2 Sam. xviii, 17). This dishonor is still common in the East (Paulus, *Nen. Repert.* ii, 53; Jahn, *Archäol.* II, ii, 353). One of these kinds of punishment is constantly referred to by the legislative precept, "That soul shall be cut off from the people" (כָּרַח הַחַי הַחַי הַחַי הַחַי, or כָּרַח הַחַי), as especially appears from Exod. xxxi, 14; Lev. xvii, 4; xx, 17 (see Michaelis, *Mos. Recht.* v, 37 sq.); the cases are specified in the Mishna, *Cherithuth.* i, 1; but the Rabbins are not altogether agreed; comp. Abarbanel on Num. xv, 30; also in Ugolini *Thesaur.* xxx); not, as most will have it, a mere interdiction from political or religious privileges. See EXCOMMUNICATION. All penal inflictions were usually speedy (Josh. vii, 24 sq.; 1 Sam. xxii, 16), and originally inflicted directly by the populace, but under the kings by their body-guard, or one of their attendants. See CHERETHITE.

Foreign punishments, unknown to the Jewish law, were the following: 1. *Sawing* in pieces (2 Sam. xii, 31). See SAW. 2. *Dichotomy*, i. e. cutting asunder (ἐξοτομῆν or μελιζίναι = "quartering") or dismemberment (כָּרַח הַחַי, 1 Sam. xv, 33; μελιστὶ διαρῆν, Josephus, *Ant.* xv, 8, 4; a barbarous instance is given in Josephus, *Ant.* xiii, 12, 6; and an inhuman murder in Judg. xix, 29; but 1 Kings iii, 25, does not belong here) of the living being (see Krumholz, *De pœna per τὸ ἐξοτομῆν significata*, in the *Bibl. Brem.* vii, 234 sq.), which was universal among the Babylonians (Dan. ii, 5; iii, 29; in 2 Sam. iv, 12; 2 Macc. i, 16, mangling after death is indicated by way of infamy; compare Livy, viii, 28; in Ezek. xvi, 40; xx, 47, dichotomy is not to be understood), as well as Egyptians (Herod. ii, 139; iii, 13) and Persians (Herod. vii, 39; Diod. Sic. xvii, 83; comp. Horace, *Sat.* i, 1, 99 sq.; 2 Macc. vii, 8; Matt. xxiv, 51; Luke xii, 46; Koran, xx, 74; xxvi, 49; Assemani, *Martyrol. Or.* i, 241 sq.). 3. *Precipitation* (כָּרַח הַחַי, 2 Chron. xxv, 12; comp. Psa. cxli, 6; κατακοιμισμός, Luke iv, 29; comp. 2 Macc. vi, 10) from a rock ("dejecere de saxo Tarpeio" or "ex aggere," Suetonius, *Calig.* 27) is well known as a Roman mode of execution (for the Athenians, see Wachsmuth, *Hellen. Alterth.* ii, 20). 4. *Tyrannism* (τυρπανισμός), or beating to death (Heb. xi, 35; A. V. "torture;"; comp. Aristot. *Rhet.* ii, 5; Lucian, *Jup. Trag.* 19, etc.), of which the instrument was a cudgel (τύμπανον, 2 Macc. vi, 19, 28, A. V. "torment;"; Aristophanes, *Plut.* 476); but it is uncertain whether we are thereby to understand simply a club with which the unfortunates were dispatched, or a wooden hoop upon which they were stretched in the manner of a rack (comp. Josephus, *De Maccab.* viii, 5 and 9). See TYRANNISM.

Besides the above, the following methods of execution are named in the Bible as practised by nations in the neighborhood of Palestine: 1. *Burning* alive in a furnace (Dan. iii, 6, 11, 15, 19 sq.), which occurs in modern Persia (Chardin, *Voyage*, vi, 218), is of very early date (if we may trust the traditions concerning Abraham [q. v.], Targ. on 2 Chron. xxviii, 3); likewise roasting or boiling convicts over a slow fire (Jer. xxix, 22 [see Hebenstreit, *De Achabi et Zedekie supplicio*, Lips. 1736]; 2 Macc. vi, 5). See JOHN (THE APOSTLE). An example of burning alive does not occur (2 Sam. xxi, 31, marg. כָּרַח הַחַי; see Thenius, in loc.) until the time of Herod (Josephus, *War.* i, 33, 4); but in Egypt the vindictive Roman magistrates took pleasure in burning Jews (Philo, ii, 612, 527). No instances of burying alive (Ctesias, *Pers.* xli. 53; Livy, viii, 15, etc.) are found in the Scriptures (Num. xvi, 30 sq., is not in point). 2. *Casting into the lions' den* (Dan. vi). See LION; DEN. 3. *Suffocation* in hot

ashes (2 Macc. xiii, 5 sq.; comp. Valer. Max. ix, 2, 6, "He filled with ashes a place inclosed by high walls, with a beam projecting within, upon which he placed the doomed, so that, when overcome with drowsiness, they fell into the insidious ash-heap below;" see Ctesias, *Pers.* 47 and 52). See ASHES. 4. Dashing in pieces children (sucklings) on the corners of walls, which occurred on the sack of cities (Isa. xiii, 16, 18; Hos. xiv, 1; Nah. iii, 10; comp. Psa. cxxxvii, 9), like the ripping open of pregnant women (2 Kings viii, 12; xv, 16; Hos. xiv, 1; Amos i, 13), is, with the exception of 2 Kings xiv, 16, only a heathenish barbarity. On crucifixion, see CRUCIFY. 5. Finally, drowning (*καταποντισμός*, Matt. xviii, 6), and fighting with wild beasts (*θηρομαχία*, 1 Cor. xv, 32), are but casually alluded to in the N. T. Drowning, as a mode of inflicting death, is old (comp. Exod. i, 22). Among the Romans, those guilty of parricide were sewed in sacks (*culei*) and then drowned (Cicero, *Rosc. Am.* 25; *ad Herem.* i, 13; Seneca, *Clem.* i, 15; Juvenal, viii, 214); but this in the time of the emperors came to be deemed an inhuman mode of execution (comp. Josephus, *Ant.* xiv, 15, 10; *War.* i, 22, 2; Lactantius, *Mort. persec.* xv, 3); and thus remaining under the water (Jer. li, 63) was thought a peculiarly severe fate (Josephus, *Apion.* i, 34; comp. Matt. xviii, 6; see Götz, *De pistrinis vett.* p. 131 sq.; Gräfe, *De καταποντισμῷ, νῦν fuerit supplic. Judaeorum*, Lips. 1662; Welleins, *De supplicio submers.* Havn. 1701; Scherer, *De καταποντ. ap. antiq.* Argent. xvii, 4). Such cruel punishments sometimes followed the mutilations of martyrdom (2 Macc. vii, 4, 7, 10). On *theriomachy*, see GAMES; and on the passage 3 Macc. 5, comp. Porphyry, *Abst. in.* ii, 57. See generally Carpov, *Appar.* p. 581 sq.; Michaelis, *De judiciis pœnitæ capitulibus in S. S.* (Hal. 1749; also in Ugolini *Thesaur.* xxvi, and Pott's *Sylloge*, iv, 177 sq.); Jahn, *Archæol.* II, ii, 347 sq.; Michaelis, *Mos. Recht*, v, 11 sq.—Winer, ii, 11. Compare PUNISHMENT.

**Executioner** (*σπεκουλάτωρ*, for Lat. *speculator*, originally a *scout*, afterwards a *life-guard* under the emperor), a member of the royal body-guard adopted by Herod in imitation of the Romans (see Tacitus, *Hist.* ii, 11; Suetonius, *Claud.* 35), and in accordance with Oriental despotism, and employed to execute his sanguinary orders (Mark vi, 27). (See Smith's *Dict. of Class. Antiq.* s. v. *Speculatores*; Schwarz, *De Speculatoribus vett. Romanorum*, Altd. 1726.) See CHIERE-TIITE.

In ancient times persons of the highest rank and station were employed to execute the sentence of the law. The office of Potiphar, in the Egyptian court, mentioned in Genesis xxxvii, 36, is thought to have been "chief of the executioners," as in the margin of our version. See GUARD. This is still a high office in the East as a *court* office. Such executioners have nothing to do with carrying into effect the awards of the law in its ordinary course, but only with those of the king. It is there an office of great responsibility; and to insure its due and strict fulfilment, it is intrusted to an officer of the court, who has necessarily under his command a body of men whose duty it is to preserve the order and peace of the palace and its precincts, and to attend and guard the royal person on public occasions; and, under the direction of their chief, to inflict such punishment as the king awards upon those who incur his displeasure. Potiphar, therefore, in this sense might be called captain of the guard. He had his official residence at the public jail (Gen. xl, 2). Nebuzaradan (2 Kings xxv, 8; Jer. xxxix, 9) and Arioch (Dan. ii, 14) held the same office. That the "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 Kings ii, 25, 34. Nevertheless the post was one of high dignity, and something beyond the present position of the *zâbit* of modern Egypt (comp. Lane, i, 163), with which Wilkinson (ii, 45) compares it. It is still

not unusual for officers of high rank to inflict corporal punishment with their own hands (Wilkinson, ii, 43). It does not appear that the Jews had public executioners, but the prince or general laid his commands on any of his attendants. Gideon commanded Jether, his eldest son, to execute his sentence on the kings of Midian; Saul ordered the footmen who stood around him, and were probably a chosen body of soldiers for the defence of his person, to put to death the priests of the Lord, and when they refused, Doeg, an Edomite, one of his principal officers, executed the command (1 Sam. xxii, 18). Long after the days of Saul, the reigning monarch commanded Benaiah, the chief captain of his armies, to perform the duty of putting Joab to death. Sometimes the chief magistrate executed the sentence of the law with his own hands; for when Jether shrank from the duty which his father required, Gideon, at that time the supreme magistrate in Israel, did not hesitate to do it himself. Thus also in Homer (*Odyss.* xxi, fin.; xxii, init.) we read that the exasperated Ulysses commanded his son Telemachus to put to death the suitors of Penelope, which was immediately done. In condemnations under the Mosaic law, the congregation or assembly of people executed the criminal, but the witnesses commenced the work of death (Lev. xxiv, 16; Dent. xvii, 7; John viii, 7; Acts vii, 57-60). Executions in the East are often very prompt and arbitrary. In many cases, among the Turks and Persians, the suspicion is no sooner entertained, or the cause of offence given, than the fatal order is issued, the messenger of death hurries to the unsuspecting victim, shows his warrant, and executes his order that instant in silence and solitude (2 Kings vi, 32; Prov. xvi, 14; Mark vi, 27). See PUNISHMENT.

**Exedrae**, buildings contiguous to the church. See CHURCH EDIFICES.

**Exegesis**. See EXEGETICAL THEOLOGY.

**Exegetical Collections**. See CATENA; COMMENTARIES.

**Exegetical Theology**, that branch of theology which treats of the exposition and interpretation of the Old and New Testaments. See ENCYCLOPEDIA OF THEOLOGY. Exegesis (*ἐξηγησις*) is *statement, explanation*, from *ἐξηγεῖσθαι*, *I lead, describe, explain*; and from this, an *exegete*, *ἐξηγητής*, *guide, interpreter*. The word exegetical, then, includes all that belongs to *explanation*, and Exegetical Theology includes all that belongs to the explanation and interpretation of the holy Scriptures.

**I. Matter of Exegetical Theology**.—The Bible, including both the O. and N. T., is the material on which the science of exegetical theology is employed. Some writers therefore designate it as Biblical theology; but the real work of exegesis is to gather from the word the material of Biblical theology, leaving the arrangement and co-ordination of this material to fall into a separate branch of the science. See BIBLICAL THEOLOGY; THEOLOGY. In fact, the results of exegetical study may fall, according to their nature, into historical, doctrinal, or practical theology. See BIBLE. As the Bible comes to us as the record of a revelation from God, its claims in this respect form the subject of a separate branch, entitled INSPIRATION (q. v.). The study of inspiration leads to the general question of the possibility and nature of REVELATION (q. v.).

**II. Method of Exegetical Theology**.—1. *Philology*.—As the Bible comes to us in ancient languages (Hebrew, Chaldee, Hellenistic Greek), the first requisite of exegesis is the knowledge of these languages, both as to their grammatical structure and their vocabulary. This branch is called *Sacred Linguistics*, or *Sacred Philology*. The knowledge of classical Greek is of course presupposed, while Syriac, Samaritan, and Arabic are cognate and auxiliary. For details, see

the separate articles in this work on the various topics named.

2. *Archæology*.—Not only does the Bible come to us in ancient languages, but it was also written at various times, in various countries, and under various conditions of life (social, political, religious, etc.). Thus arise the various branches of Bible history (belonging partly to exegetical and partly to historical theology), Biblical geography, chronology, ethnography, natural history of the Bible, laws, usages, domestic economy, agriculture, sacred rites, and worship. All these branches are summed up under the general title Antiquities, or Archæology. See both these heads in this Cyclopædia, and also the other topics named, for the details and the literature.

3. *Canon*.—As these books come to us claiming to be authoritative, we must be able to answer the question, What books belong to the Bible as a sacred book? The answer to this question gives rise to that branch called the science of the *Canon* of Scripture. It is divided into canon of the O. T. and canon of the N. T. See the article CANON OF SCRIPTURE.

4. *Criticism*.—Granting that we have certain books admitted to be canonical, the farther question arises, Have we these writings in their original and correct forms? The answer to this question gives rise to *Criticism*, which is divided into the lower or text-criticism, which seeks to ascertain the true and original reading of the text as accurately as possible, and the higher criticism, which examines into the integrity, genuineness, and authenticity of the books. The higher criticism seeks to distinguish the true from the false, and forms, to a certain degree, the basis of Apologetics (q. v.); the text-criticism distinguishes the original from the altered or corrupted. See CRITICISM.

5. *Interpretation*.—All the studies heretofore named are preparatory to the work of getting at the meaning of the sacred Scriptures, which is the function of *Interpretation*, or *Hermeneutics* (ἑρμηνεία). The general principles on which any other writings would be interpreted are of course applicable here (General Hermeneutics); but the special character of these writings as sacred gives rise to an enlargement of those general principles of interpretation (Sacred Hermeneutics). When the sense of Scripture is sought simply by the use of linguistics or criticism, the interpretation is called *Grammatical*. When not only linguistics and criticism, but also all the knowledges embraced above under archæology are employed, the interpretation is called *Grammatico-Historical*. When, in addition, the traditional sense of the Church as to the substantial facts and doctrines of revelation is brought to bear upon the Word, the interpretation is called *Doctrinal*, or *Dogmatical*. Finally, when a farther sense than that conveyed in the words of the writer is sought, the interpretation is called *Allegorical*. For the nature, history, and value of these, see HERMENEUTICS; INTERPRETATION.

III. *Results or Products of Exegetical Theology*.—The application of the laws of hermeneutics, and of the preparatory or propædæutic sciences mentioned above, in practical work, is *Exegesis*. The fruit of this labor may appear, within the sphere of exegetical theology itself, in translations of the Bible, or of any of its parts [see VERSIONS]; or in commentaries on the Bible, or on separate books of the Bible, or on separate passages in any of the books. See COMMENTARIES. The principles and rules of exegesis are also to be used by the preacher in the preparation of his discourses for the congregation. See HOMILETICS; SERMON.

Most of the topics of exegetical theology are embraced in what is called *Introduction to the Scriptures*, a vague title, formerly much in use, but now giving way to more scientific and distinctive terms, such as *Literary History of the Bible*, for a general name, and the several titles mentioned above for special branches. The books on Introduction are often rather useful

collections of propædæutic knowledge than scientific treatises. See INTRODUCTION. There are no books in English treating exegetical theology as a separate branch in scientific form; but English literature abounds in excellent works on the several branches, which will be found indicated under the several titles in this Cyclopædia. The most important general works are the so-called books of "Introduction," such as Horne, *Introduction* (new ed., London, 1860, 4 vols. 8vo); Davidson, *Introduction to N. T.* (Lond. 1848-51 [Dr. Davidson's later writings are not so trustworthy as his earlier]); Westcott, *Introduction to the Study of the Gospels* (reprinted, Bost. 1867, 12mo). On the literature, see farther under the head INTRODUCTION. On the scope of exegetical theology, and its relations to the other branches of the science, see Hagenbach, *Encyklopædie und Methodologie* (Leipzig, 1864, 7th edit., § 34-56); Marsh, *Lectures on the Arrangement of the several Branches of Divinity* (Cambridge, 1809, 8vo); Pelt, *Theologische Encyklopædie als System* (Hamburg, 1843, 8vo), § 10-28; Clarisse, *Encyklopædie Theologica Epitome* (Lugd. Bat. 1835, 8vo), sect. i, ii; and our articles ENCYCLOPÆDIA OF THEOLOGY; THEOLOGY.

**Exemption** designates, in ecclesiastical law, the release of persons or institutions from the jurisdiction of the regular superior, and their subordination to a higher or special superior.

1. *Roman Catholic Church*.—The first example of formal exemption is the release of monasteries from the episcopal jurisdiction. Many wealthy convents induced the popes, emperors, and kings to allow them a free election of their superiors, and a free administration of their property. Subsequently many of the monastic orders were altogether exempted from the jurisdiction of the bishops, the members being subordinate only to their monastic superiors and the pope. The bishops incessantly labored for a restoration of their full jurisdiction, and the Council of Constance favored them, but most of the popes sided with the monks rather than with the bishops. The Council of Trent granted most of the demands of the bishops, but the difficulties between bishops and monastic orders have never wholly ceased. Bishops sometimes are exempt from the usual subordination to an archbishop, being subordinate directly to the pope. Sometimes (as in Austria) the army was exempted from the jurisdiction of the bishops, and placed under the jurisdiction of a special army-bishop.

2. *Protestant Churches*.—The Protestant state churches retained, with other parts of the ecclesiastical law, the idea of exemption. The princes claimed for themselves exemption from the usual ecclesiastical jurisdiction; later, the same exemption was claimed for civil and military officers. In some countries the nobility also were exempt. In Prussia, a circular of the government in 1817 abolished all exemptions, but it was not executed. Churches which are based on the voluntary principle know of no exemption, because they compel none of their members to belong to any particular congregation.

In many districts in Germany, Roman Catholic, Lutheran, and Reformed pastors had jurisdiction even over members of the two other churches; and the exemption of Protestants from Roman Catholic jurisdiction, and vice versa, is not yet fully carried through.—Herzog, *Real-Encyklop.* iv, 286; Wetzler und Welte, *Kirchen-Lex.* iii, 841. (A. J. S.)

**Exercise**, BODILY (σωματικὴ γυμνασία, i. e. *physical training*, i. q. *gymnastics*, 1 Tim. iv, 8). What the apostle seems to disparage under this term is not the athletic discipline which it classically imports (Arrian, *Epict.* i, 27, 6; Polyb. iv, 7, 6), and which his frequent allusions to the Grecian games (q. v.) might imply, but rather that ascetic mortification of the fleshly appetites, and even innocent affections (comp. ver. 3; Col. ii, 23), which characterized some of the Jewish

fanatics (ver. 7), especially the Essenes (q. v.).—Fleischmann, *Interpretatio*, in loc.; Seelen, *De Gymnastiis ad que Paulus* (in hoc loc.) *alludit* (Lubec, 1758). See TIMOTHY.

**EXERCISES, SPIRITUAL** (*exercitia spiritualia*), a title given by Romanists to certain exercises held under the leadership generally of a confessor (*magister exercitiorum*), for spiritual edification. They consist, generally, in alternate meditations and prayers at regularly appointed hours, with seclusion, mortification, etc. These exercises are practised both by clergy and laity, especially before communion, and as preparatory to the great Church festivals. Especially before ordination to the priesthood, such exercises are not only commended, but required of candidates. The most elaborate form of the exercises is that of Ignatius Loyola. His method received the approbation of the pope, and Alexander VII granted, in a brief dated Oct. 12, 1657, full absolution to all, whether priests or laymen, who should submit to them for eight days in the houses of the Company of Jesus. These exercises consist in alternate meditations, readings, oral prayers, and self-scrutiny, as special preparation for the reception of the sacraments of penitence and communion. In case of there being several persons exercising together, silence is recommended as a duty. The new missions established by the Jesuits and Redemptorists make use of these exercises, transforming the work of sanctification into a dead mechanical action.—Herzog, *Real-Encyclop.* iii, 289; Aschbach, *Allg. Kirchen-Lex.* ii, 707; Ferraris, *Promta Bibliotheca*, iii, 916 sq. See Bellocius, *Medulla asceseos seu exercitia Sancti Patris Ignatii* (new ed. by Westhoff); and the articles JESUITS and LOYOLA.

**Exhortation** (*παράκλησις*, strictly a *calling near*, invitation, and so “*entreaty*,” 2 Cor. viii, 4; hence *almonition*, special hortatory instruction in public, Luke iii, 18; Acts xiii, 15; 1 Tim. iv, 13; also “*consolation*” or comfort, Rom. xv, 4, etc.) seems to have been recognised in the Apostolic Church as a distinct supernatural or prophetic office or function (*χάρισμα*, “*gift*”) bestowed by the Holy Spirit (Rom. xii, 8). As such, it was doubtless a subordinate exercise of the general faculty of teaching (1 Cor. xiv, 31). Olshausen (*Comment.* in loc.) thinks that Paul does not distinguish it as a special *charism*, but rather regards it as co-ordinate with eldership. See GIFT (SPIRITUAL).

2. It is defined as “the act of laying such motives before a person as may excite him to the performance of any duty. It differs only from *suasion* in that the latter principally endeavors to convince the understanding, and the former to work on the affections. It is considered as a great branch of preaching, though not confined to that, as a man may exhort, though he do not preach; though a man can hardly be said to preach if he do not exhort. See EXHORTERS. The Scriptures enjoin ministers to exhort men, that is, to rouse them to duty by proposing suitable motives (Isa. lviii, 1; 1 Tim. vi, 2; 1leb. iii, 13; Rom. xii, 8); it was likewise the constant practice of prophets, apostles, and Christ himself (Isa. i, 17; Jer. iv, 14; Ezek. xxxvii; Luke iii, 18; xii, 3; Acts xi, 23)” (Buck, *Theological Dictionary*, s. v.). “The above, and numerous other passages of Scripture, indicate several important particulars: 1. That it was not beneath the dignity, or foreign to the office of the inspired apostles, frequently to *exhort*. 2. That they enjoined a similar practice and the duty of exhortation upon young ministers of their day. 3. That exhortation, as separate from preaching, was the special office of a certain class of religious teachers in the New-Testament Church. 4. That mutual exhortation for their own profit and edification was enjoined by the apostles upon Christians generally” (Kidder, *Homiletics*, p. 105). See EXHORTERS.

3. In the book of Common Prayer, the short addresses of the minister to the people in the daily service, in

the communion office, and in the office for the visitation of the sick, are called *Exhortations*. The first of these, beginning “Dearly beloved brethren, the Scripture moveth us,” etc., was introduced into the English formulary at the Reformation. Palmer (*Orig. Liturg.* i, 211) compares it to a passage in a sermon of Avitus of Vienne, fifth century. Procter (*Common Prayer*, p. 206) remarks that “it was constructed partly from the preceding sentences, and partly by adaptations from previously existing forms.” But, in fact, this exhortation, with the other opening portions of morning prayer, is chiefly due to a ritual drawn up by Calvin for the church at Strasburg, entitled *La Forme des Prières et Chantes ecclesiastiques* (Strasburg, 1545). See Baird, *Eutaxia* (N. York, 1855, p. 191). The exhortations to the communion were also introduced at the Reformation. “The ancient Church, indeed, had no such exhortations, for their daily, or at least weekly communions made it known that there was then no solemn assembly of Christians without it, and every one (not under censure) was expected to communicate. But now, when the time is somewhat uncertain, and our long omissions have made some of us ignorant, and others forgetful of this duty; most of us unwilling, and all of us more or less indisposed for it, it was thought both prudent and necessary to provide these exhortations, to be read when the minister gives warning of the communion, which he is always to do upon the Sunday or some holy day immediately preceding” (Wheatly, *On Common Prayer*, p. 284). The second exhortation was compiled apparently by Peter Martyr at the instance of Bucer (Procter, *On Common Prayer*, p. 344).

**Exhorters**, a class of lay persons licensed in the Methodist Episcopal Church to *exhort*, not to preach. The leaders’ meeting (q. v.), or class (q. v.), recommend such persons, and the preacher issues the license. The duties of an exhorter are “to hold meetings for prayer and exhortation wherever opportunity is afforded, subject to the direction of the preacher in charge; to attend all the sessions of the Quarterly Conference; to be subject to an annual examination of character in the Quarterly Conference, and renewal of license annually by the presiding elder, or preacher having the charge, if approved by the Quarterly Conference.” This office has been found very useful, both in the edification of the Church, and in developing the talent of persons likely to be called to the ministry.—*Discipline of the Methodist Episcopal Church*, 1868, p. 113, 114.

**Exile** (only occurs of an expatriated person, *גלות*, *tsolk*, *beut*, “captive exile,” Isa. li, 14; *גולה*, *goleh*, a transported captive, as elsewhere often [see BANISH]), ASSYRIO-BABYLONIAN, of the Israelitish nation (comp. Cellarii *Dissertat.* p. 178 sq.). See also CAPTIVITY.

1. Of the kingdom of Israel, as early as the time of Pekah (q. v.), B.C. cir. 741. Tiglath Pileser (q. v.), in accordance with a formal maxim of Oriental despots (compare Heeren, *Idea*, I, i, 405 sq.; Gesenius, *Jesa*, i, 949), transported to Assyria (2 Kings xv, 29; comp. Isa. viii, 23) a part of the inhabitants of Galilee and the Trans-Jordanic provinces (Gilead). A still earlier deportation (1 Chron. v, 26) seems to have been made by Pul (q. v.). After the destruction of Samaria (q. v.) and the entire northern state (B.C. 720) by Shalmaneser (q. v.), the same fate overtook all the distinguished and serviceable Israelites (2 Kings xvii, 6; xviii, 9 sq.; 1 Chron. v, 26). They were assigned a residence on the Chaboras, in Mesopotamia [see HABOR], and in Media (comp. Josephus, *Ant.* ix, 14, 1), and there established the worship of Jehovah after their corrupt fashion (2 Kings xvii, 27 sq.). See WITSIUS, *Δεκάβουρ*, *sive de decem tribubus Isr.* (in his *Ægyptiacis*, p. 318 sq.); Michaelis, *De exilio decem tribuum* (in his *Commentt. Soc. Gott. Brem.* 1774, p. 31 sq.). Compare ISRAEL (KINGDOM OF).

2. Respecting the carrying away of the *Jews* in several colonies, there are various accounts in the Hebrew historical books, which modern writers have not carefully distinguished (see Bauer, *Heb. Gesch.* ii, 370 sq.; Jahn, *Archäol.* II, i, 195 sq.; Bertholdt, *Zeittafel zum Daniel*, p. 503 sq.). (a.) The books of Kings mention only two deportations: the first occurred after the surrender of Jerusalem to Nebuchadnezzar, in the time of Jehoiachin (2 Kings xxiv, 14 sq.; comp. Jer. xxvii, 20 sq.; in this was involved Mordecai (Esth. ii, 6), and it befel (besides the king himself) the affluent and useful citizens, 10,000 and upwards in number (Josephus says 10,832, *Ant.* x, 7, 1); the second was the result of a formal capture of Jerusalem by assault of the Chaldeans in the time of Zedekiah, and was effected by Nebuchadnezzar's general (in that prince's 19th year) Nebuzaradan (2 Kings xxv, 11). Only the common people, devoted to agriculture, remained (2 Kings xxv, 12, 22). (b.) The books of Chronicles expressly record only the carrying away under Zedekiah (2 Chron. xxvi, 20), while (ver. 10), in mentioning the transportation of king Jehoiachin, they say nothing of a deportation of the people at that time. (c.) Jer. lii, 28 sq., specifies three distinct carryings away, and assigns to each not only the number of those deported, but also a date: namely, the first deportation in the 7th year (of Nebuchadnezzar, comp. ver. 29, 30), which consisted of 3023 Jews; the second in the 18th of Nebuch., of 832 chiefs of Jerusalem; the third in the 23d of Neb., of 745 individuals. Finally (d.), according to Dan. i, 1, 3 sq., as early as the 3d year of Jehoiachin's reign, some Jewish youths of noble families (among them Daniel himself) must have been carried to Babylon. These difficulties (see Hengstenberg, *Genuineness of Daniel* [Clarke's ed.], p. 43 sq., against De Wette, in the *Hall. Encyclop.* xxiii, 7 sq.; Lengerke, *Daniel*, p. 13 sq.) are readily adjusted by observing, 1st, that the years of Nebuchadnezzar in this passage of Jeremiah bear date from his full accession to the throne of Babylon (the beginning of B.C. 604), while those in Kings are reckoned from the epoch of his viceroyship, a little over one year earlier [see NEBUCHADNEZZAR]; and, 2dly, that the apparent discrepancy in the number of citizens transported naturally arises from the different manner in which they are enumerated and classified in the several narratives. Thus viewed, the transactions will appear concisely as follows:

1. (Early in B.C. 604.) Nebuchadnezzar's invasion, in the 3d year of Jehoiachin (Dan. i, 1).

2. (Summer of B.C. 606.) Subjugation by Nebuchadnezzar in his first associate year, and the 4th of Jehoiachin (Jer. xxv, 1); when, besides some of the sacred vessels (2 Chron. xxxvi, 5), a few royal youths were taken away as hostages, including Daniel and his companions (Dan. i, 2 sq.).

3. (Spring of B.C. 598.) First general deportation, in the 7th year of Nebuchadnezzar's reign (Jer. lii, 28), or the 8th of his viceroyship (2 Kings xxiv, 12), and the beginning of Jehoiachin's reign (2 Kings xxiv, 8), when 3023 eminent Jews (Jer. lii, 28), including the king (2 Chron. xxxvi, 10), his family, and officers (2 Kings xxiv, 12), with such men as Mordecai (Esth. ii, 6), also some 700 warriors (2 Kings xxiv, 16), were carried away, making about 10,000 individuals of note (2 Kings xxiv, 14), besides about 1000 artisans (2 Kings xxiv, 16), and leaving only the poorer classes of the city and its neighborhood (2 Kings xxiv, 14).

4. (Late in B.C. 588.) Second general deportation, in Nebuchadnezzar's 18th year of reign (Jer. lii, 29), or the 19th of his viceroyship (2 Kings xxv, 8), when, besides the rest of the sacred vessels (2 Chron. xxxvi, 18), 832 more of the principal men who had by that time rallied to Jerusalem were taken away (Jer. lii, 29), including especially the refugees (2 Kings xxv, 11), and leaving but the commonest agricultural laborers (2 Kings xxv, 12).

5. (Early in B.C. 582.) Final deportation. In Nebuchadnezzar's 23d year (Jer. lii, 30), when the last 745 private persons (Jer. lii, 30) who had not fled to Egypt (Jer. xliii, 5-7), nor been destroyed in the previous massacres (2 Chron. xxxvi, 20), were taken away—making 4500 definitely enumerated (Jer. lii, 30), but in all some 12,600 male heads of families, with their wives, children, and dependents, from Jerusalem and its vicinity alone, and a proportionate number from the residue of the country of Judæa.

The Babylonian exile thus began with the Jews

partially in B.C. 598, but generally in B.C. 588. It ended in the first year of the reign of Cyrus (over Babylon), i. e. B.C. 536, and therefore lasted strictly 51-52 years. The reckoning of Jeremiah, however (xxv, 11 sq.; xxix, 10; compare 2 Chron. xxxvi, 21; Zech. i, 12; vii, 5; Josephus, *War*, v, 9, 4), which assigns it a length of 70 years, is to be understood as computed from Nebuchadnezzar's invasion of Western Asia in B.C. 606, when, as appears from Dan. i, 1 sq., some of the members of the royal family of Judah were carried into captivity, in fulfilment of Isa. xxxix, 6, 7. (See Offerhaus, *Spicilegium*, p. 181 sq.; Schröer, *Regn. Babyl.* p. 286 sq.). This was the more natural epoch to the Jews, inasmuch as from that time Nebuchadnezzar became to all intents and purposes the liege lord of the Jewish kings, and in the above table we see the years of his reign are dated accordingly. It is a remarkable coincidence that from the date of the destruction of the Temple, B.C. 588 (2 Kings xxv, 8), to the time of its complete restoration, B.C. 517 (Ezra vi, 15), is precisely the commensurate (and sacred) term of 70 years; and this period is sometimes employed as an æra by the sacred writers (Ezek. xl, 1). Other very strained conjectures as to this time are those of Behm (in Iken and Hase's *Theaur. theol. philol.* i, 954 sq.), Bengel (*Ordo temporum*, p. 196 sq.), etc. Ideler deems the desolation of the Temple to be exclusively referred to (*Handbuch d. Chronol.* i, 530). Gramberg (*Religiösiid.* ii, 388 sq.) and Hitzig (*Jerem.* p. 230) think the 70 years merely a round number. See SEVENTY YEARS' CAPTIVITY.

The condition of the Hebrews in the exile was certainly, as a general thing, not so severe (Jahn, *Archäologie*, II, i, 209; comp. Leydecker, *De var. reip. Hebr. statu*, p. 299 sq., especially p. 310 sq.; Verbrugge, *De statu ac condit. Judæorum tempore erit. Babyl.*, in his work *De nomin. Hebr. plur. num.* [Groning. 1730], p. 71 sq.) as is usually held. Most of them became settled (Jer. xxix, 5 sq.), and acquired property, even to affluence (Tob. i, 22, 25; ii, 1; vi, 13; viii, 21; ix, 3; x, 11; xiv, 15, etc.), and the possession of slaves (Tob. viii, 14 sq.; xi, 10). Several were taken to court (Dan. i, 3 sq., 19), and even promoted to high station (Dan. ii, 48 sq.; vi, 2; compare Esth. x, 3), or were honored with important trusts (Tob. i, 16); indeed, in one instance a Jewess actually reached queenly dignities (Esth. ii, 17). They also appear to have kept up in some sort their national constitution (Ezek. xiv, i; xx, 1; Susan, v, 28), and to have maintained among themselves an observance of the Mosaic law (Tob. vii, 14; Susan, v, 62). According to the Talmud (R. Gedaliah in *Shalsheh. Hakkab.* folio 13; Gemara, *Makkoth*, i, 1; *Sanhedr.* i, 12 and 21), they were under the general direction of an *aichmalotarch* (q. v.), or "chief of the exiles" (אַיְחַמְלוֹתָרְחַי), one of their own nation (Buddæi *Hist. Vet. T.* ii, 863). Religious discipline was exercised among them; but, as they could not lawfully offer sacrifice outside Jerusalem, their worship necessarily consisted of prayer (and public reading, out of which naturally grew expounding) in stated assemblies (comp. Psal. cxxxvii). See SYNAGOGUE. They did not lack strong comfort and exhortation: Ezekiel (q. v.) lifted in their midst his prophetic voice, and Jeremiah (q. v.) sent them from afar a monitory epistle (chap. xxix). Probably many surrendered themselves to levity and vice (Ezek. xxxiii, 31), and yielded an ear to false prophets (Jer. xxix, 21; but comp. Tob. ii, 14 sq., 22).

Of the permission to return to Palestine, which Cyrus granted to the entire people (Ezra i, 5; vii, 13), Jews alone, in the first instance at least, availed themselves (Ezra ii; Neh. vii; comp. Josephus, *Ant.* xi, 5, 2: "But the whole people of the Israelites remained in the same country . . . The ten tribes are beyond the Euphrates to this day, unknown and innumerable myriads"); for the return mentioned in Ezra ii, 1, is

only of such exiles as had been carried away by Nebuchadnezzar, and in the list there following there are (besides priests and Levites) only recited Judahites and Benjaminites; nor can "Israel" (ver. 59; compare Neh. vii, 61) be there referred to the former kingdom so called. The indications of Jer. l, 4 sq., 17, 19; Ezek. xxxvii, 11 sq., had, moreover, not at that time been fulfilled (the date in 1 Chron. v, 26 is uncertain; Keil, *On Kings*, p. 497, n.). (See Witsius, *Δεκάλογος*, p. 344 sq.; Ritter, *Ersk.* x, 250.) Yet it cannot well be doubted that many of the exiles from the northern kingdom, who were likewise embraced in the decree of Cyrus, and at the time included in his dominions, did eventually join their Jewish brethren, if not in some of the homeward expeditions named in Scripture as having taken place under Ezra, Zerubbabel, and Nehemiah, yet in some smaller, later, or less distinguished companies. This supposition is not only justified by the nature of the case, but fortified by the numerous intimations in the prophets (e. g. Jer. l, 4, 5, 17-20, 33-35) coupling the return of both the kingdoms (see *Metb. Quart. Review*, July, 1855, p. 419 sq.), and is well-nigh established by the Palestinian occurrence in a late age of individuals from the northern tribes (e. g. Luke ii, 36; comp. Acts xxvi, 7). What proportion thus returned we have no means of determining; it was doubtless small, as was indeed that of the exiles from the southern tribes compared with the great mass who still remained in the land of their captivity, now become their home. Community of lot must have drawn both branches of the common stock of Israel nearer together during the captivity under the same heathen government, and it is altogether likely that in a few centuries those who permanently remained lost all trace of the sectarian distinction that had once estranged "Judah and Ephraim." See RESTORATION (OF THE JEWS).

The descendants of those who did not return either centred at certain points, especially Babylon (q. v.), where they afterwards became celebrated for their Jewish schools of Rabbinical literature; or, as was chiefly the case, it may be presumed, with the more distant and earlier removed ten tribes, wandered still farther in numerous Jewish colonies into the Medo-Babylonian provinces (Lightfoot, *Append. to Hor. Hebr.* in Acts, p. 264 sq.), remnants of which have survived to a late day (Benj. of Tndela, quoted in Ritter, *Ersk.* x, 241 sq.). It is possible even that the *Samaritans* may have owed their mongrel origin to some such source (Gesenius, *De Pentat. Samar.* p. 4), as they were transplanted to Palestine before the deportation of the Jews, and yet sufficiently late to have allowed a partial amalgamation with the heathen whence they came to have taken place, and especially as they had only the Pentateuch (Paulus, in *Eichhorn's Biblioth.* i, 931). From the provinces of the Persian empire the Jewish colonists may readily have spread into Arabia, India, and even China. Wild attempts at their discovery have been abundantly made, such as those of Adair (*History of the American Indians*, Lond. 1775), Noah (*The Amer. Indians the Descendants of the ten Lost Tribes of Israel*, N. Y. 1835), and Grant (*Nestorians, or the Lost Tribes*, N. Y. 1841).—Winer, i, 257. See DISPERSED JEWS.

**Exinanition.** See CHRISTOLOGY (vol. ii, p. 281, col. 2).

**Existence of God.** See GOD.

**Exocontians** (or EXOUCONTIANS, Ἐξοκόντιοι), a name given to the strict Arians, because they maintained that Christ was created ἐξ οὐκ ὄντων, before the beginning of things. They were also called Anomæans, Aëtians. See these titles, and also ARIANS.

**Exode OF THE ISRAELITES FROM EGYPT TO CANAAN** (usually referred to in Heb. by the phrase הַיְצִיאָה מִמִּצְרַיִם אֶת־בְּנֵי־יִשְׂרָאֵל אֶל־אֶרֶץ־כְּנָעַן, "The

Lord did bring the children of Israel out of the land of Egypt," Exod. xii, 51; to which is often emphatically added, בְּיָמָיו הַיְצִיאָהוּ אֶת־בְּנֵי־יִשְׂרָאֵל אֶת־אֶרֶץ־מִצְרָיִם, "with a mighty hand and an outstretched arm," Deut. xxvi, 8, to express the miraculous interventions of Providence in the series of events), the great national epoch of the Hebrew people, in fact their "independence day," and as such constantly referred to in all their subsequent history and vaticinations. Several of the Psalms are but a poetical rehearsal of its scenes (e. g. Ps. cxiv, cxxxvi); it is the burden of Habakkuk's lofty ode (Hab. iii); and besides the recapitulation of many of its incidents by Moses in Deuteronomy, it constitutes the main topic of one of the books of Scripture. The following account, with the exception of the date of the event, and the identifications of the place of crossing the Red Sea and of the stations in the desert, is chiefly compiled from the articles in Kitto and Smith. See EXODUS.

**I. Date.**—The particular Egyptian monarch under whom this great event, the first definite link of the Hebrew with other ancient history, occurred, is so differently identified with those of early profane chronicles, and of the monuments by various Egyptologists, that but little reliance, unfortunately, can be placed upon any of them, based as they almost entirely are upon conjectural adaptations or arbitrary premises. The only one of these hypotheses that seems to afford any independent evidence of agreement is that lately propounded by Osburn (in the *Journ. of Sac. Lit.* for July, 1860), who conceives that the Egyptian king in question was Sethos II, the grandson of the great Sesostris, but of so odious a character and so inglorious a reign that his sarcophagus was demolished and his cartouche effaced by the early Egyptians themselves. See PHARAON. This king, however, began to reign about B. C. 1240, a date entirely too late for the event under consideration. The historical questions connected with this point are noticed under EGYPT. Hales places the Exode in B. C. 1648, Usher in B. C. 1491, Bunsen in B. C. 1320, and Poole in B. C. 1652. A careful collation of the Biblical elements of the calculation, the only definite and trustworthy data, point to the spring of B. C. 1658 as the most probable date of the beginning of the series of exodic transactions. See CHRONOLOGY. As to the account of the Exode given by Manetho, it was confessedly a mere popular story, for he admitted it was not a part of the Egyptian records, but a tale of uncertain authorship (Josephus, *c. Apion.* i, 16). A critical examination shows that it cannot claim to be a veritable tradition of the Exode: it is, indeed, if based on any such tradition, so distorted that it is impossible to be sure that it relates to the king to whose reign it is assigned. Yet, upon the supposition that the king is really Menptah, son of Rameses II, the advocates of the Rabbinical date entirely base their adjustment of Hebrew with Egyptian history at this period. See MANETHO.

**II. The Outset.**—The Exode is a great turning-point in Biblical history. With it the patriarchal dispensation ends and the law begins, and with it the Israelites cease to be a family and become a nation. It is therefore important to observe how the previous history led to this event. The advancement of Joseph, and the placing of his kinsmen in what was, to a pastoral people at least, "the best of the land," yet, as far as possible, apart from Egyptian influence, favored the multiplying of the Israelites and the preservation of their nationality. The subsequent persecution bound them more firmly together, and at the same time loosened the hold that Egypt had gained upon them. It was thus that the Israelites were ready, when Moses declared his mission, to go forth as one man from the land of their bondage. See JOSEPH.

The intention of Jehovah to deliver the Israelites from Egyptian bondage was made known to Moses from the

burning bush at Mount Horeb, while he kept the flock of Jethro, his father-in-law. Under the divine direction, Moses, in conjunction with Aaron, assembled the elders of the nation, and acquainted them with the gracious design of Heaven. After this they had an interview with Pharaoh, and requested permission for the people to go, in order to hold a feast unto God in the wilderness. The result was not only refusal, but the doubling of all the burdens which the Israelites had previously had to bear. Moses hereupon, suffering reproach from his people, consults Jehovah, who assures him that he would compel Pharaoh "to drive them out of his land." "I will rid you out of their bondage, and I will redeem you with a stretched-out arm and with great judgments" (Exod. iii-vi, 6). Then ensue a series of miracles (Exod. vi-xii), commonly called the **PLAGUES OF EGYPT** (q. v.). At last, overcome by the calamities sent upon him, Pharaoh yielded all that was demanded, saying, "Rise up, and get you forth from among my people, both ye and the children of Israel; and go serve the Lord as ye have said; also take your flocks and your herds, and be gone." Thus driven out, the Israelites, to the number of about 600,000 adults, besides children, left the land, attended by a mixed multitude, with their flocks and herds, even very much cattle (Exod. xii, 31 sq.). Being "thrust out" of the country, they had not time to prepare for themselves suitable provisions, and therefore they baked unleavened cakes of the dough which they brought forth out of Egypt. See **MOSES**.

On the night of the self-same day that terminated a period of 430 years, during which they had been in Egypt, were they led forth from Rameses or Goshen. They are not said to have crossed the River Nile, whence we may infer that Goshen lay on the eastern side of the river. Their first station was at Succoth (Exod. xii, 37). See **SUCCOTH**. The nearest way into the Land of Promise was through the land of the Philistines. This route would have required them to keep on in a north-east direction. It pleased their divine conductor, however, not to take this path, lest, being opposed by the Philistines, the Israelites should turn back at the sight of war into Egypt. If, then, Philistia was to be avoided, the course would lie nearly direct east, or south-east. Pursuing this route, "the armies" come to Etham, their next station, "in the edge of the wilderness" (Exod. xiii, 17 sq.). Here they encamped. Dispatch, however, was desirable. They journey day and night, not without divine guidance, for "the Lord went before them by day in a pillar of a cloud, to lead them the way, and by night in a pillar of fire, to give them light, to go by day and night." This special guidance could not well have been meant merely to show the way through the desert, for it can hardly be supposed that in so great a multitude no persons knew the road over a country lying near to that in which they and their ancestors had dwelt, and which did not exceed more than some forty miles across. The divine guides were doubtless intended to conduct the Israelites in that way and to that spot where the hand of God would be most signally displayed in their rescue and in the destruction of Pharaoh. See **PILLAR**.

The Land of Goshen may be concluded, from the Biblical narrative, to have been part of Egypt, but not of what was then held to be Egypt proper. It must therefore have been an outer eastern province of Lower Egypt. It is enough here to say that it was on the eastern side of the Nile, probably in the province of Esh-Shurkiyeh. Rameses was the place of rendezvous. But it is evident, from the frequent communications of Moses with the Egyptian court on the one hand, and with the Israelites on the other, that the latter must have been, at the time of starting, congregated at a point not far from the capital. They could only, therefore, have gone by the valley now called the wady et-Tumeylat, for every other cultivated or

cultivable tract is too far from the Red Sea. In the Roman time, the route to Gaza from Memphis and Heliopolis passed the western end of the wady et-Tumeylat, as may be seen by the *Itinerary of Antoninus* (Parthey, *Zur Erdk. d. Alt. Egyptens*, map vi), and the chief modern route from Cairo to Syria passes along the wady et-Tumeylat and leads to Gaza (Wilkinson, *Handbook*, new ed. p. 209). Rameses, as we shall see, must have lain in this valley, which thus corresponded in part at least to Goshen. That it wholly corresponded to that region is evident from its being markedly a single valley, and from the insufficiency of any smaller territory to support the Israelites. See **GOSHEN**. It is not difficult to fix very nearly the length of each day's march of the Israelites. As they had with them women, children, and cattle, it cannot be supposed that they averaged more than fifteen miles daily; at the same time, it is unlikely that they fell far short of this. The three journeys would therefore give a distance of about forty-five miles. There seems, however, as we shall see, to have been a deflexion from a direct course, so that we cannot consider the whole distance from the starting-point, Rameses, to the shore of the Red Sea, as much more than about forty miles in a direct line. Measuring from the western shore of the Arabian Gulf south-east of the wady et-Tumeylat, a distance of forty miles in a direct line places the site of Rameses near the ruins called in the present day Abu Kesheib, not far from the middle of the valley. This is in accordance with the location of Robinson and Lepsius. That the Israelites started from a place in this position is farther evident from the account of the two routes that lay before them: "And it came to pass, when Pharaoh had let the people go, that God led them not [by] the way of the land of the Philistines, although that [was] near; for God said, Lest peradventure the people repent when they see war, and they return to Egypt; but God let the people turn to the way of the wilderness of the Red Sea" (Exod. xiii, 17, 18). The expression used, **וּבְדֶרֶךְ**, does not necessarily imply a change in the direction of the journey, but may mean that God did not lead the Israelites into Palestine by the nearest route, but took them about by the way of the wilderness. Were the meaning that the people turned, we should have to suppose Rameses to have been beyond the valley to the west, and this would probably make the distance to the Red Sea too great for the time occupied in traversing it, besides overthrowing the reasonable identification of the land of Goshen. Rameses is evidently the Rameses of Exod. i, 11. It seems to have been the chief town of the land of Goshen, for that region, or possibly a part of it, is called the land of Rameses in Gen. xlvii, 11; comp. 4, 6. See **RAMESES**.

1. The direct route thence to the Red Sea was along the valley of the ancient canal. If, however, they rendezvoused near the metropolis, their route would be different. From the vicinity of Cairo there runs a range of hills eastward to the Red Sea, the western extremity of which, not far from Cairo, is named *Jebel Mokatten*; the eastern extremity is termed *Jebel-Ataka*, which, with its promontory *Ras Ataka*, runs into the Red Sea. Between the two extremes, somewhere about the middle of the range, is an opening which affords a road for caravans. Two routes offered themselves here. Supposing that the actual starting-point lay nearer Cairo, the Israelites might strike in from the north of the range of hills at the opening just mentioned, and pursue the ordinary caravan road which leads from Cairo to Suez; or they might go southward from *Mokatten*, through the wady et-Tih, that is, the Valley of Wandering, through which also a road, though less used, runs to Suez. According to Niebuhr, they took the first; according to ancient tradition, *Father Sicard* (*Ueber der Weg der Israeliten*), *Paulus* (*Samml. v, 211 sq.*), and others, they took the

last. Sicard found traces of the Israelites in the valley. He held Rameses to be the starting-point, and Rameses he placed about six miles from ancient Cairo, where Bezatin is now found. Here is a capacious sandy plain, on which Sicard thinks the Israelites assembled on the morning when they began their journey. In this vicinity a plain is still found, which the Arabs call the Jews' Cemetery, and where, from an indefinite period, the Jews have buried their dead. In the Mokattam chain is a hill, a part of which is called Mejanat Musa, "Moses's Station." On another hill in the vicinity ruins are found, which the Arabs name Meravad Musa, "Moses's Delight." Thus several things seem to carry the mind back to the time of the Hebrew legislator. Through the valley which leads from Bezatin (the Valley of Wandering) to the Red Sea, Sicard travelled in three days. He reckons the length to be twenty-six hours, which, if we give two miles to each hour (Robinson), would make the distance fifty-two miles. This length is also assigned by Girard (*Descrip. Topograp. de la Vallée de l'Egarement*). The valley, running pretty much in a plain surface, would afford a convenient passage to the mixed bands of Israelites. About eighteen miles from Bezatin you meet with Gendelhy, a plain with a fountain. The name signifies a military station, and in this Sicard finds the Succoth (tents) of Exodus, the first station of Moses. The haste with which they left (were driven out) would enable them to reach this place at night-fall of their first day's march. Sicard places their second station, Etham, in the plain Ramlyeh, eighteen miles from Gendelhy, and sixteen from the sea. From this plain is a pass four miles in length, so narrow that not more than twenty men can go abreast. To avoid this, which would have caused dangerous delay, the order was given them to turn (Exod. xiv, 2). Etham is said (Exod. xiii, 20) to be on the edge of the wilderness. Jablonski says the word means "terminus maris," the termination or boundary of the sea. Now, in the plain where Sicard fixes Etham (not to be confounded with the Eastern Etham, through which afterwards the Israelites travelled three days, Numb. xxxiii, 8), is the spot where the waters divide which run to the Nile and to the Gulf of Suez, and Etham is therefore truly *terminus maris*.

On the other hand, if, as the position of Rameses, and the nature of the ground between that point and the head of the gulf seems to indicate, they pursued the direct route thence down the valley of the bitter lakes, we may locate Succoth not far from the ruins of Serapeum, and Etham at a point about half way between that spot and the head of the gulf; for we may suppose that the encumbered multitude made but little progress the first day, whereas on the third their march may have been quickened by apprehensions of the approaching Egyptians in pursuit. See ETHAM.

2. At the end of the second day's march, for each camping-place seems to mark the close of a day's journey, the route appears to have been altered from the natural thoroughfare around the head of the gulf. The first passage relating to the journey, after the mention of the encamping at Etham, is this, stating a command given to Moses: "Speak unto the children of Israel that they turn [or 'return'] and encamp [or 'that they encamp again,' וּשְׁבוּ וַיִּחַן] before Pi-hahiroth, between Migdol, and the sea, over against Baal-zephon" (Exod. xiv, 2). This explanation is added: "And Pharaoh will say of the children of Israel, They [are] entangled in the land, the wilderness hath shut them in" (ver. 3). The rendering of the A. V., "That they turn and encamp," seems to us the most probable of those we have given; "return" is the closer translation, but appears to be difficult to reconcile with the narrative of the route; for the more likely inference is that the direction was changed, not that the people returned: the third rendering does not

appear probable, as it does not explain the entanglement. It is most likely that they at once turned, although they may have done so later in the march. The direction cannot be doubted, for they would have been entangled (ver. 5) only by turning southward, not northward. They encamped for the night by the sea, probably after a full day's journey. Pi-hahiroth (the mouth of the hiding-places) Sicard identifies with Tuarek (small caves), which is the name still given to three or four salt springs of the plain Baideah, on the south side of Mount Attaka, which last Sicard identifies with Baal-zephon, and which is the northern boundary of the plain Baideah, while Kulalah (Migdol) is its southern limit. But we would prefer to transpose these names, assigning Migdol to Jebel Attaka, and Baal-zephon to Jebel Deraj or Kulalah, while Wady Tuwarik will remain for Pi-hahiroth. (See each in its order.) The pass which leads to Suez, between Attaka and the sea, is very narrow, and could easily be stopped by the Egyptians. In this plain of Baideah Pharaoh had the Israelites hemmed in on all sides. This, then, according to all appearance, is the spot where the passage through the sea was effected. Such is the judgment of Sicard and of Raumer (*Der Zug der Israeliten*, Leipzig, 1837; for a description of the Valley of Wandering, see also Ritter, *Erkunde*, i, 858). It cannot be denied that this route satisfies all the conditions of the case. Equally does the spot correspond with the miraculous narrative furnished by holy writ. A different route is laid down by Niebuhr (*Arab.* p. 407). Other writers, who, like him, endeavor to explain the facts without the aid of miracle, imitate his example. (See below.)

It is no small corroboration of the view now given from Sicard and Raumer that in substance it has the support of Josephus, of whose account we shall, from its importance, give an abridgment. The Hebrews, he says, took their journey by Latopolis, where Babylon was built afterwards when Cambyses laid Egypt waste. As they went in haste, on the third day they came to a place called Baal-zephon, on the Red Sea. Moses led them this way in order that the Egyptians might be punished should they venture in pursuit, and also because the Hebrews had a quarrel with the Philistines. When the Egyptians had overtaken the Hebrews they prepared to fight them, and by their multitude drove them into a narrow place; for the number that went in pursuit was 600 chariots, 50,000 horsemen, and 200,000 infantry, all armed. They also seized the passages, shutting the Hebrews up between inaccessible precipices and the sea; for there was on each side a ridge of mountains that terminated at the sea, which were impassable, and obstructed their flight. Moses, however, prayed to God, and smote the sea with his rod, when the waters parted, and gave the Israelites free passage. The Egyptians at first supposed them distracted; but when they saw the Israelites proceed in safety, they followed. As soon as the entire Egyptian army was in the channel, the sea closed, and the pursuers perished amid torrents of rain and the most terrific thunder and lightning (*Ant.* ii, 15).

III. *Passage of the Red Sea.*—This was the crisis of the Exode. It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. All the particulars relating to this event, and especially those which show its miraculous character, require careful examination.

1. It is usual to suppose that the most northern place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. This supposition depends upon the idea that in the time of Moses the gulf did not extend farther to the northward than at present. An examination of the country north of Suez has convinced some geographers, however, that the sea has receded many miles, and that this change has taken place within the historical period, possibly in fulfilment of the prophecy of Isaiah (xi, 15; xix, 5; comp.

Zech. x, 11). The old bed is thought by them to be indicated by the Birket et-Timsàh, or "Lake of the Crocodile," and the more southern bitter lakes, the northernmost part of the former corresponding to the ancient head of the gulf. In previous centuries it is not supposed that the gulf extended farther north, but that it was deeper in its northernmost part. We are inclined to believe, however, that such a change, if it ever took place, cannot materially affect the question of the place of the Israelites' passage.

From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are that the sea was divided by an east wind, whence we may reasonably infer that it was crossed from west to east, and that the whole Egyptian army perished, which shows that it must have been some miles broad. Pharaoh took at least six hundred chariots, which, three abreast, would have occupied about half a mile, and the rest of the army cannot be supposed to have taken up less than several times that space. Even if in a broad formation some miles would have been required. It is more difficult to calculate the space taken up by the Israelitish multitude, but probably it was even greater. On the whole, we may reasonably suppose about twelve miles as the smallest breadth of the sea.

2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. News is carried to the monarch which leads him to see that the reason assigned (namely, a sacrifice in the wilderness) is but a pretext; that the Israelites had really fled from his yoke; and also that, through some (to him) unaccountable error, they had gone towards the south-east, had reached the sea, and were hemmed in on all sides. He summons his troops and sets out in pursuit—"all the horses and chariots of Pharaoh, and his horsemen and his army;" and he "overtook them encamping by the sea, beside Pi-hahiroth, before Baal-zephon" (Exod. xiv, 9). It might be conjectured, from one part of the narrative (ver. 1-4), that he determined to pursue them when he knew that they had encamped before Pi-hahiroth, did not what follows this imply that he set out soon after they had gone, and also indicate that the place in question refers to the pursuit through the sea, not to that from the city whence he started (ver. 5-10). This city was most probably Zoan, and could scarcely have been much nearer to Pi-hahiroth, and the distance is therefore too great to have been twice traversed, first by those who told Pharaoh, then by Pharaoh's army, within a few hours. The strength of Pharaoh's army is not farther specified than by the statement that "he took six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (ver. 7). The war-chariots of the Egyptians held each but two men, an archer and a charioteer. The former must be intended by the word סוּרְמָיִם, rendered in the A. V. "captains." Throughout the narrative the chariots and horsemen of Pharaoh are mentioned, and "the horse and his rider" (xv, 21) are spoken of in Miriam's song, but we can scarcely infer hence that there was in Pharaoh's army a body of horsemen as well as of men in chariots, as in ancient Egyptian the chariot-force is always called ḤTAR or ḤETRA, "the horse," and these expressions may therefore be respectively pleonastic and poetical. There is no evidence in the records of the ancient Egyptians that they used cavalry, and, therefore, had the Biblical narrative expressly mentioned a force of this kind, it might have been thought conclusive of the theory that the Pharaoh of the Exode was a shepherd-king. With this army, which, even if a small one, was mighty in comparison with the Israelitish multitude, encumbered with women, children, and cattle, Pharaoh overtook the people "en-

camping by the sea" (ver. 9). When the Israelites saw the oppressor's army they were terrified, and murmured against Moses. "Because [there were] no graves in Egypt, hast thou taken us away to die in the wilderness?" (ver. 11.) Along the bare mountains that skirt the valley of Upper Egypt are abundant sepulchral grottoes, of which the entrances are conspicuously seen from the river and the fields it waters: in the sandy slopes at the foot of the mountains are pits without number and many built tombs, all of ancient times. No doubt the plain of Lower Egypt, to which Memphis, with part of its far-extending necropolis, belonged politically, though not geographically, was throughout as well provided with places of sepulture. The Israelites recalled these cities of the dead, and looked with Egyptian horror at the prospect that their carcases should be left on the face of the wilderness. Better, they said, to have continued to serve the Egyptians than thus to perish (ver. 12). Then Moses encouraged them, bidding them see how God would save them, and telling them that they should behold their enemies no more. There are few cases in the Bible in which those for whom a miracle is wrought are commanded merely to stand by and see it. Generally the divine support is promised to those who use their utmost exertions. It seems from the narrative that Moses did not know at this time how the people would be saved, and spoke only from a heart full of faith, for we read, "And the Lord said unto Moses, Wherefore criest thou unto me? Speak unto the children of Israel that they go forward; but lift thou up thy rod, and stretch out thine hand over the sea, and divide it; and the children of Israel shall go on dry [ground] through the midst of the sea" (ver. 15, 16). That night the two armies, the fugitives and the pursuers, were encamped near together. Here a very extraordinary event takes place: "The angel of God, which went before the camp of Israel, removed and went behind them; and the pillar of the cloud went from before their face and stood behind them; and it came between the camp of the Egyptians and the camp of Israel; and it was a cloud and darkness to them, but it gave light by night to these; so that the one came not near the other all the night" (ver. 19, 20). The monuments of Egypt portray an encampment of an army of Rameses II during a campaign in Syria; it is well-planned and carefully guarded: the rude modern Arab encampments bring before us that of Israel on this memorable night. Perhaps in the camp of Israel the sounds of the hostile camp might be heard on the one hand, and on the other the roaring of the sea. But the pillar was a barrier and a sign of deliverance. The time had now come for the great decisive miracle of the Exode. "And Moses stretched out his hand over the sea: and the Lord caused the sea to go [back] by a strong east wind all that night, and made the sea dry [land], and the waters were divided. And the children of Israel went through the midst of the sea upon the dry [ground]; and the waters [were] a wall unto them on their right hand and on their left" (ver. 21, 22; comp. 29). The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier; as the former idea implies a seemingly needless addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea (ver. 23-25). Delays are now occasioned to the Egyptians; their chariot-wheels are supernaturally taken off, so that "in the morning-watch they drove them heavily." The Egyptians are troubled; they urge each

other to fly from the face of Israel. Then was Moses commanded again to stretch out his hand, and the sea returned to its strength and overwhelmed the Egyptians, of whom not one remained alive (ver. 26-28). The statement is so explicit that there could be no reasonable doubt that Pharaoh himself, the great offender, was at last made an example, and perished with his army, did it not seem to be distinctly stated in Psa. cxxxvi that he was included in the same destruction (ver. 15). The sea cast up the dead Egyptians, whose bodies the Israelites saw upon the shore. From the song of triumph which Moses sang upon this occasion we learn some other particulars, as that "the depths covered Pharaoh's host, they sank to the bottom as a stone;" language which, whatever deduction may be made for its poetic character, implies that the miracle took place in deep water (Exod. xv; comp. Psa. cvi, 9 sq.). In a later passage some particulars are mentioned which are not distinctly stated in the narrative in Exodus. The place is indeed a poetical one, but its meaning is clear, and we learn from it that at the time of the passage of the sea there was a storm of rain, with thunder and lightning, perhaps accompanied by an earthquake (Psa. lxxvii, 15-20). To this Paul may allude where he says that the fathers "were all baptized unto Moses in the cloud and in the sea" (1 Cor. x, 2); for the idea of baptism seems to involve either immersion or sprinkling, and the latter could have here occurred: the reference is evidently to the pillar of the cloud: it would, however, be impious to attempt an explanation of what is manifestly miraculous. These additional particulars may illustrate the troubling of the Egyptians, for their chariots may have been thus overthrown.

Here, at the end of their long oppression, delivered finally from the Egyptians, the Israelites glorified God. In what words they sang his praise we know from the Song of Moses, which, in its vigorous brevity, represents the events of that memorable night, scarcely of less moment than the night of the Passover (Exod. xv, 1-18; ver. 19 is probably a kind of comment, not part of the song). Moses seems to have sung this song with the men, Miriam with the women also singing and dancing, or perhaps there were two choruses (ver. 20, 21). Such a picture does not recur in the history of the nation. Neither the triumphal song of Deborah, nor the rejoicing when the Temple was recovered from the Syrians, celebrated so great a deliverance, or was joined in by the whole people. In leaving Goshen, Israel became a nation; after crossing the sea, it was free. There is evidently great significance, as we have suggested, in Paul's use of this miracle as a type of baptism; for, to make the analogy complete, it must have been the beginning of a new period of the life of the Israelites.

3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times. In them it is the chief fact of Jewish history. Not the call of Abraham, not the rule of Joseph, not the first Passover, not the conquest of Canaan, are referred to in such a manner as this great deliverance. In the Psalms it is related as foremost among the deeds that God had wrought for his people. The prophet Isaiah recalls it as the great manifestation of God's interference for Israel, and an encouragement for the descendants of those who witnessed that great sight. There are events so striking that they are remembered in the life of a nation, and that, like great heights, increasing distance only gives them more majesty. So no doubt was this remembered long after those were dead who saw the sea return to its strength and the warriors of Pharaoh dead upon the shore.

It may be inquired how it is that there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should

be assigned. The date of the Exode, according to different chronologers, varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary fully one hundred. The period to which the Exode may be assigned therefore virtually corresponds to four hundred years of Egyptian history. If the lowest date of the beginning of the 18th dynasty be taken, and the highest date of the Exode, both which we consider the most probable of those that have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wholly wanting. Of the 18th and subsequent dynasties we have as yet no continuous history, and rarely records of events which occurred in a succession of years. We know much of many reigns, and of some we can be almost sure that they could not correspond to that of the Pharaoh of the Exode. We can in no case expect a distinct Egyptian monumental record of so great a calamity, for the monuments only record success; but it might be related in a papyrus. There would doubtless have long remained a popular tradition of the Exode; but if the king who perished was one of the shepherd strangers, this tradition would probably have been local, and perhaps indistinct. Josephus, indeed, gives us some extracts from the last work of Manetho, who appears, if we may trust the criticisms of the Jewish historian (*contra Apionem*, § 14, 26), to have greatly garbled the account in favor of the Egyptians. See HuxsOL.

Endeavors have been made to explain away the miraculous character of the passage of the Red Sea. It has been argued that Moses might have carried the Israelites over by a ford, and that an unusual tide might have overwhelmed the Egyptians. But no real diminution of the wonder is thus effected. How was it that the sea admitted the passing of the Israelites, and drowned Pharaoh and his army? How was it that it was shallow at the right time, and deep at the right time? Some writers (*Wolfenb. Fragm.* p. 64 sq.) have at once declared the whole fabulous, a course which appears to have been taken as early as the time of Josephus (*Ant.* ii, 16, 5). Others, who do not deny miracles as such, yet with no small inconsistency seek to reduce this particular miracle to the smallest dimensions. Writers who see in the deliverance of the Hebrews the hand of God and the fulfilment of the divine purposes, follow the account in Scripture implicitly, placing the passage at Ras Attaka, at the termination of the Valley of Wandering; others, who go on rationalistic principles, find the sea here too wide and deep for their purpose, and endeavor to fix the passage a little to the south or the north of Suez. The most recent advocate of the passage at or near Suez is the learned Dr. Robinson (*Biblical Researches in Palestine*). The route taken by Moses was, according to Robinson, from Rameses to the head of the Arabian Gulf, through Succoth to Etham. The last place he fixes on the edge of the desert, on the eastern side of the line of the gulf. Instead of passing down the eastern side, at the top of which they were, the Israelites thence marched down the western side of the arm of the gulf, stopping in the vicinity of Suez, where the passage was effected. This view of the miracle, however, entirely fails to satisfy the Scripture account, and has been amply refuted by Dr. Olin (*Travels in the East*, N. Y. 1843) and others. (See the account of Mr. Blumhardt's visit, Oct. 1836, in the *Church Missionary Record*, Jan. 1836; Kitto's *Scripture Louls*, p. 58; *Daily Bible Illustrat.* ii, 95.) Some have supposed the Red Sea anciently extended farther north, and have sought to identify the localities of the passage on that theory (see Sharpe in Bartlett's *Forty Days in the Desert*, p. 23 sq.); but this is quite improbable and without evidence. Another explanation (Dr. Durbin, *Observations in the East*, i, 254) makes the Israelites to have turned from the vicinity of the bitter lakes to the western side of the head of Suez, and

50 to have followed the shore to the plain of Baideah at the mouth of wady Tuwarik, and there crossed; but if (as some travellers affirm) there is room for such a passage along the shore by Ras Attaka, the Israelites might have escaped by the same route by simply retreating, or, if that had been prevented by the Egyptians following along the same path behind them, they might still have fled up the wady Tih, and thence around Jebel Attaka and the head of the sea. A still later view (Captain Moyses, in Aiton's *Lands of the Messiah*, p. 107) places the scene of the passage still farther south, at the mouth of the next valley opening on the Red Sea near Ras Abu Deraj; but it would be difficult to show how the Israelites could have reached this spot from their former position in the edge of the wilderness, and it would also bring them out too far south on the other side of the Red Sea. Indeed, the mountains approach so steeply the shore all along at these points, that they could only have arrived at the valley or plain of Baideah, where we have supposed the passage to have been made, by turning sharply at Etham around the western base of Mount Attaka, and so partly back into the wady et-Tih, through which they were immediately pursued by the Egyptians. The latter thus hemmed them in completely, and drove them forward to the extreme edge of the shore projecting in front of Mount Attaka, around which they were unable to escape. Here it was that Providence opened to them a miraculous path through the deep waters to the opposite point (at the mouth of wady Beyaneh), near which are situated the wells of Moses, which doubtless derived their name from the first encampment of the Hebrews after their rescue. See RED SEA.

IV. *The Route from the Red Sea to Sinai*.—When safe on the eastern shore, the Israelites, had they taken the shortest route into Palestine, would have struck at once across the desert in a south-easterly direction to el-Arish or Gaza. But this route would have brought them into direct collision with the Philistines, with whom they were as yet quite unable to cope. Or they might have traversed the desert of Paran, following the pilgrim road of the present day to Elath, and, turning to the north, have made for Palestine. In order to accomplish this, however, hostile hordes and nations would have to be encountered, whose superior skill and experience in war might have proved fatal to the newly-liberated tribes of Israel. Wisely, therefore, did their leader take a course which necessitated the lapse of time, and gave promise of affording intellectual and moral discipline of the highest value. He resolved to lead his flock to Sinai, in order that they might see the wonders there to be exhibited, and hear the lessons there to be given. At Sinai, and on the journey thither, might the great leader hope that the moral brand which slavery had imprinted on his people would be effaced, and that they would acquire that self-respect, that regard to God's will, that capacity of self-guidance which alone could make liberty a blessing to the nation, and enable Moses to realize on their behalf the great and benign intentions which God had led him to form. There were, however, two ways by which he might reach Sinai. By following a south-easterly direction, and proceeding across the desert et-Tih, he would have reached at once the heart of the Sinaitic region. This was the shorter and the more expeditious road. The other route lay along the shore of the Red Sea, which must be pursued till an opening gave the means of turning suddenly to the east, and ascending at once into the lofty district. The latter was preferable for the reason before assigned, namely, the additional opportunities which it offered for the education of the undisciplined tribes of recently emancipated slaves.

Moses did not begin his arduous journey till, with a piety and a warmth of gratitude which well befitted the signal deliverance that his people had just been

favoured with, he celebrated the power, majesty, and goodness of God in a triumphal ode, full of the most appropriate, striking, and splendid images; in which commemorative festivity he was assisted by "Miriam the prophetess, the sister of Aaron," and her associated female band, with poetry, music, and dancing. The nature of these festivities gives us full reason to conclude that, if the people at large were still slaves in intellect and morals, there were not wanting individuals in the camp who were eminently skilled in the best refinements of the age. The spot where these rejoicings were held could not have been far from that which still bears the name of *Ayûn Mûsa*, "the fountains of Moses," the situation of which is even now marked by a few palm-trees. This was a suitable place for the encampment, because well supplied with water. Here Robinson counted seven fountains, near which he saw a patch of barley and a few cabbage-plants.

1. In tracing the track pursued by the host, we should bear in mind the limitation that a variety of converging or parallel routes must often have been required to allow of the passage of so great a number (Robinson, *Researches*, i, 106). Assuming the passage of the Red Sea to have been effected at the spot indicated above, they would march from their point of landing a little to the E. of S. Here they were in the wilderness of Shur, and in it "they went three days and found no water." The Israelites seem to have proceeded along the coast, probably following the route usually pursued by modern travellers, being at a short distance from the shore and parallel with it. The district is hilly and sandy, with a few water-courses running into the Red Sea, which, failing rain, are dry. "These wadis," says Robinson, "are mere depressions in the desert, with only a few scattered herbs and shrubs, now withered and parched with drought." See SHUR.

At the end of three days the Israelites reached the fountain Marah, but the waters were bitter, and could not be drunk. The stock which they had brought with them being now exhausted, they began to utter murmurings on finding themselves disappointed at Marah. Moses appealed to God, who directed him to a tree, which, being thrown into the waters, sweetened them. The people were satisfied and admonished. The present *Ain el-Hawâra* has been thought by most travellers since Burckhardt's time to be Marah. The basin is six or eight feet in diameter, and the water Robinson found about two feet deep. Its taste is unpleasant, saltish, and somewhat bitter. The Arabs pronounce it bitter, and consider it as the worst water in all these regions. Near the spring are numerous bushes of the shrub *ghurkud*—a low, bushy, thorny shrub, producing a small fruit, which ripens in June, not unlike the blackberry, very juicy, and slightly acidulous. It delights in a saline soil, and is found growing near the brackish fountains in and around Palestine, affording a grateful refreshment to travellers. By means of the berries, or, if they were not ripe, the leaves of this plant, the bitterness may have been removed from the waters of Marah. Not improbably the miracle in the case lay in this, that Jehovah directed Moses to use the tree (bush) itself, instead of what was usual, the berries, as from the time of year, shortly after Easter, they could hardly have been ripe. Between Ain Howarah and Ayûn Mûsa the plain is alternately gravelly, stony, and sandy, while under the range of Jebel Wardân (a branch of et-Tih) chalk and flints are found. There is no water on the direct line of route (Robinson, i, 127-134). Hawâra stands in the lime and gypsum region which lines the eastern shore of the Gulf of Suez at its northern extremity. Seetzen (*Reisen*, iii, 117) describes the water as salt, with purgative qualities; but adds that his Bedouins and their camels drank of it. He argues, from its inconsiderable size, that it could not be the Marah of Moses. This, however, seems an inconclusive reason. It would not be too near the point of

landing assumed, as above, as Dr. Stewart argues (p. 55), when we consider the encumbrances which would delay the host, and, especially while they were new to the desert, prevent rapid marches. But the whole region appears to abound in brackish or bitter springs (Seetzen, *ib.* iii, 117, etc.; *Anmerk.* p. 430). For instance, about  $1\frac{1}{2}$  hours nearer Suez than the wady Ghüründel (which Lepsius took for Marah, but which Niebuhr and Robinson regard as more probably Elim), Seetzen (*ib.* iii, 113, 114) found a wady Tâl, with a salt spring and a salt crust on the surface of its bed, the same, he thinks, as the spot where Niebuhr speaks of finding rock-salt. This corresponds in general proximity with Marah. The neighboring region is described as a low plain girt with limestone hills, or more rarely chalk. On this first section of their desert march, Dr. Stanley (*Sinai and Palest.* p. 37) remarks, "There can be no dispute as to the general track of the Israelites after the passage (of the Red Sea). If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the Tih, till they entered the low hills of Ghüründel." He adds in a note, "Dr. Graul, however, was told . . . of a spring near Tih el-Amâra, right (i. e. south) of Hawâra, so bitter that neither men nor camels could drink of it. From hence the road goes straight to wady Ghüründel." Seetzen also inclines to view favorably the identification of el-Amâra with Marah. He gives it the title of a "wady," and precisely on this ground rejects the pretensions of el-Hawâra as being no "wady," but only a brook; whereas, from the statement "they encamped" at Marah, Marah must, he argues, have been a wady. See MARAH.

2. The next station mentioned in Scripture is Elim, where were twelve wells of water, and threescore and ten palm-trees. As is customary with travellers in these regions, "they encamped there by the waters" (Exod. xvi, 1). The indications given in the Bible are not numerous nor very distinct. Neither time nor distance is accurately laid down. Hence we can expect only general accuracy in our maps, and but partial success in fixing localities. Elim, however, is generally admitted to be wady Ghüründel, lying about half a day's journey south-east from Marah. The way from Egypt to Sinai lies through this valley, and, on account of its water and verdure, it is a chief caravan station at the present day. It seems certain, at all events, that wady Ghüründel—whether it be Marah, as Lepsius and (although doubtfully) Seetzen thought, or Elim, as Niebuhr, Robinson, and Kruse—must have been on the line of march, and almost equally certain that it furnished a camping station. In this wady Seetzen found more trees, shrubs, and bushes than he anywhere else saw in his journey from Sinai to Suez. He particularizes several date-palms and many tamarisks, and notes that the largest quantity of the vegetable manna, now to be found anywhere in the Peninsula, is gathered here (iii, 116) from the leaves of the last-named tree, which here grows "with gnarled boughs and hoary head; the wild acacia, tangled by its desert growth into a thicket, also shoots out its gray foliage and white blossoms over the desert" (Stanley, *Sinai and Palest.* p. 68). The "scenery" in this region becomes "a succession of water-courses" (*ib.*); and the wady Taiyibeh, connected with Ghüründel by Useit, is so named from the goodly water and vegetation which it contains. These three wadys encompass on three sides the Jebel Himmâm; the sea, which it precipitously overhangs, being on the fourth. They are the principal ones of those which the Israelites, going from north-west to south-east along the coast, would come upon in the following order—wady Ghüründel, wady Useit, wady Thâl, and wady Shubeikeh, the last being in its lower part called also wady Taiyibeh, or having a junction with one of that name. Between Useit and Taiyibeh, the coast-range of these

hills rises into the Jebel Himmâm, "lofty and precipitous, extending in several peaks along the shore, apparently of chalky limestone, mostly covered with flints . . . its precipices . . . cut off all passage along-shore from the hot springs (lying a little west of south from the mouth of wady Useit, along the coast) to the mouth of wady Taiyibeh" (Robinson, i, 150; compare Stanley, *Sin. and Palest.* p. 35). Hence, between the courses of these wadys the track of the Israelites must have been inland. Stanley says "Elim must be Ghüründel, Useit, or Taiyibeh (p. 37); elsewhere (p. 68) that "one of two valleys, or perhaps both, must be Elim;" these appear from the sequel to be Ghüründel and Useit, "fringed with trees and shrubs, the first vegetation he had met with in the desert;" among these are "wild palms," not stately trees, but dwarf or savage, "tamarisks," and the "wild acacia." To judge from the configuration as given in the maps, there seems to be no reason why all three should not have combined to form Elim, or, at any rate, as Stanley suggests, two of them. Only, from Num. xxxiii, 9, 10, as Elim appears not to have been on the sea, we must suppose that the encampment, if it extended into three wadys, stopped short of their seaward extremities. The Israelitish host would scarcely find in all three more than adequate ground for their encampment. Beyond (i. e. to the south-east of Ghüründel), the ridges and spurs of limestone mountain push down to the sea, across the path along the plain (Robinson, i, 101, and *Map*). This portion of the question may be summed up by presenting, in a tabular form, the views of some leading travellers or annotators on the site of Elim:

Wady Ghüründel.	One or both, Stanley.	Wady Useit. Laborde "possibly."	Some warm springs north of <i>Tîr</i> , which feed the rich date plantations of the convent there, Seetzen.
Niebuhr, Robinson, Kruse.			

[By Lepsius identified with Marah.]

Dr. Kruse (*Anmerk.* p. 418) singularly takes the words of Exod. xv, 27, "they encamped there (in Elim) by the waters," as meaning "by the sea;" whereas, from Num. xxxiii, 9, 10, it appears they did not reach the sea till a stage farther, although their distance from it previously had been but small. See ELIM.

3. From Elim the Israelites marched, encamping on the shore of the Red Sea, for which purpose they must have kept the high ground for some time, since the precipices of Jebel Himmâm—a lofty and precipitous mountain of chalky limestone—run down to the brink of the sea. They therefore went on the land side of this mountain to the head of wady Taiyibeh, which passes down south-west through the mountains to the shore. On the plain of *Ius Zetima*, at the mouth of this valley, was probably (Stanley, p. 37) the encampment "by the Red Sea" (Num. xxxiii, 10).

4. According to Num. xxxii, 11, the Israelites removed from the Red Sea, and encamped next in the wilderness of Sin; an appellation no doubt representing some natural feature, and none more probably than the alluvial plain, which, lying at the edge of the sea, about the spot we now regard them as having reached, begins to assume a significant appearance. The modern name for this is *el-Kâa*, identified by Seetzen with this wilderness (iii, pt. iii, 412). Stanley calls el-Kâa, at its initial point, "the plain of *Mîrk-hâh*," and thinks it is probably this wilderness (p. 37). Robinson likewise identifies it with "the great plain, which, beginning near el-Mîrk-hâh, extends with greater or less breadth almost to the extremity of the peninsula. In its broadest part it is called el-Kâ-a" (i, 106). Thus they kept along the shore, and did not yet ascend any of the fruitful valleys which run up towards the centre of the district. The account in Exod.

xvi knows nothing of the foregoing encampment by the sea, but brings the host at once into "the wilderness of Sin;" but we must bear in mind the general purpose there of recording not the people's history so much as God's dealings with them, and the former rather as illustrative of the latter, and subordinate to it. The evident design, however, in Num. xxxiii being to place on record their itinerary, this latter is to be esteemed as the *locus classicus* on any topographical questions as compared with others having a less special relation to the track. Indeed, we may regard the encampment by the Red Sea as being essentially in the wilderness of Shur itself. See SIN (DESERT OF).

The Israelites arrived in the wilderness of Sin on the fifteenth day of the second month after their departure out of the land of Egypt (Exod. xxi, 1), and being now wearied of their journey and tired of their scanty fare, they began again to murmur. Indeed, it is not easy to see how the most ordinary and niggardly food could have been supplied to them, constituting as they did nearly two millions of persons, in such a country as that into which they had come. It is true that some provision might have been made by individuals ere the march from Suez began. It is also probable that the accounts of encampments which we have are to be regarded as chiefly those of Moses and his principal men, with a chosen body of troops, while the multitude were allowed to traverse the open country and forage in the valleys. Still the region was unfavorable for the purpose, and some have hence concluded that here we have one of those numerical difficulties which are not uncommon in the Old-Testament Scripture, and which make many suspect some radical error in our conceptions of the Hebrew system of numbers. The contrast between the scanty supply of the desert and the abundance of Egypt furnished the immediate occasion of the outbreak of dissatisfaction. Bread and flesh were the chief demand; bread and flesh were miraculously supplied; the former by manna, the latter by quails (Exod. xvi, 13). Manna grows in some of the neighboring valleys; but the Israelites were in the wilderness, so that the supply could not have proceeded from natural resources, even had such existed to a sufficient extent for the purpose. The modern confection sold under that name is the exudation collected from the leaves of the tamarisk-tree (*tamarix Orientalis*, Linn.; Arab. *tarfu*, Heb. תַּרְפּוּ) only in the Sinaitic valleys, and in no great abundance. If it results from the punctures made in the leaf by an insect (the *coccus manniparus*, Ehrenberg) in the course of June, July, and August, this will not precisely suit the time of the people's entering the region, which was about May. It is said to keep as a hardened sirup for years (Laborde, *Comment. Geogr.* on Exod. xvi, 13, 14), and thus does not answer to the more striking characteristics described in Exod. xvi, 14-26. Seetzen thought that the gum Arabic, an exudation of the acacia, was the real manna of the Israelites; i. e. he regards the statement of "bread from heaven" as a fiction (*Reisen*, iii, 75-79). A caravan of a thousand persons is said by Hasselquist (*Voyages*, etc., *Materia Medica*, p. 298, transl. ed. 1766) to have subsisted solely on this substance for two months. See MANNA.

5. The next station mentioned in Exodus is Rephidim; but in Numbers Dophkah and Alush are added. The two latter were reached after the people had taken "their journey out of the wilderness of Sin." Exact precision and minute agreement are not to be expected. The circumstances of the case forbid us to look for them. In a desert, mountainous, and rarely frequented country, the names of places are not lasting. There was the less reason for permanence in the case before us, because the Israelites had not taken the shorter and more frequented road over the mountains to Sinai, but kept along the shore of the Red Sea. It still deserves notice, that in Exodus (xvii, 1) there is

something like an intimation given of other stations besides Rephidim in the words "after their journeys." Dophkah is probably to be found near the spot where wady Feirân runs into the Gulf of Suez. See DOFKAH. Alush may have lain on the shore near Ras Jehan. See ALUSH. From this point a range of calcareous rocks, termed Jebal Hemam, stretches along the shore, near the southern end of which the Hebrews took a sudden turn to the north-east, and, going up wady Hibrân, reached the central Sinaitic district. On the opposite side, the eastern, the Sinaitic mountains come to a sudden stop, breaking off, and presenting like a wall nearly perpendicular granite cliffs. These cliffs are cut by wady Hibrân, and at the point of intersection with the plain which runs between the two ranges probably lay Rephidim. The tabernacle was not yet set up, nor the order of march organized, as subsequently (Numb. x, 13, etc.); hence the words "track" or "route," as indicating a line, can only be taken in the most wide and general sense. See REPHIDIM.

This was the last station before Sinai itself was reached. Naturally enough it is recorded that "there was no water for the people to drink." The road was an arid gravelly plain; on either side were barren rocks. A natural supply was impossible. A miracle was wrought, and water was given. The Scripture makes it clear that it was from the Sinaitic group that the water was produced (Exod. xvii, 6). The plain received two descriptive names: Massah, "Temptation," and Meribah, "Strife." It appears that the congregation was not allowed to pursue their way to Sinai unmolested. The Arabs thought the Israelites suitable for plunder, and fell upon them. These hordes are termed Amalek. The Amalekites may have been out on a predatory expedition, or they may have followed the Israelites from the north, and only overtaken them at Rephidim; any way, no conclusion can be gathered from this fact as to the ordinary abode of these nomades. It appears, however, that the conflict was a severe and doubtful one, which by some extraordinary aid ended in favor of the children of Israel. This aggression on the part of Amalek gave occasion to a permanent national hatred, which ended only in the extermination of the tribe (Numb. xxiv, 20; Exod. xvii, 14-16). In commemoration of this victory, Moses was commanded to write an account of it in a book: he also erected there an altar to Jehovah, and called the name of it "Jehovah, my banner." There is no occasion to inquire whether or not there was space for a battle in the spot where Moses was. It was a nomade horde that made the attack, and not a modern army. The fight was not a pitched battle. See AMALEK.

The word Horeb, applied by Moses to the place whence the water was gained, suggests the idea that Horeb was the general, and Sinai the specific name; Horeb standing for the entire district, and Sinai for one particular mountain. Many passages sanction this distinction; but in the New Testament Sinai only is read, having then apparently become a general name, as it is at the present day (Acts vii, 30-38; Gal. iv, 24). It is a monkish usage which gives the name Sinai to Jebel Mûsa, and Horeb to the northern part of the same ridge. See HOREB.

6. The route from Rephidim to Horeb is usually supposed to have been by way of wady Feirân, but we can see no good reason for so circuitous a course, supposing that we have correctly located Rephidim. The Israelites may more probably have ascended wady Hibrân as far as its junction with wady Bughabigh, and through this first south-easterly, and then north-easterly between Jebel Madsus and Jebel es-Sik; thence, in a northerly direction, along the western base of Jebel Katherin, through wady Um-Kuraf, across wady Tulah. Here they may have followed the path between Jebel Hunir and Jebel el-Ghubshah, which comes out at the modern gardens in the recess of the

hills. We thus place them before Mount Horeb, in the capacious plain Râhah, which, having its widest part in the immediate front of that immense mass of rock, extends as if with two arms, one towards the north-west, the other towards the north-east. The review of the plain by so competent a person as Robinson is of great consequence for the interests of scientific geography, and the yet more important interests of religious truth; the rather because a belief prevailed, even among the best informed, that there was no spot in the Sinaitic district which answered to the demands of the scriptural narrative. Even the accurate Wiener (*Real-Wört.* in art. "Sinai," not "Horeb," as referred to by Robinson, i, 17; ii, 550) says, "Which-ever mountain may be considered as the place for the promulgation of the law, the common representation still remains false—that at the foot of the hill there spreads out a great plain, on which the people of Israel might assemble" (comp. Rosenmüller, *Alterth.* iii, 129). We shall therefore transcribe Robinson's words in extenso: "We came to Sinai with some incredulity, wishing to investigate the point whether there was any probable ground, beyond monkish tradition, for fixing upon the present supposed site. We were led to the conviction that the plain er-Râhah is the probable spot where the congregation of Israel were assembled; and that the mountain impending over it, the present Horeb, was the scene of the awful phenomena in which the law was given. We were surprised as well as gratified to find here, in the inmost recesses of these dark granite cliffs, this fine plain spread out before the mountain, and I know not where I have felt a thrill of stronger emotion than when, in first crossing the plain, the dark precipices of Horeb rising in solemn grandeur before us, we became aware of the entire adaptedness of the scene to the purposes for which it was chosen by the great Hebrew legislator. Moses doubtless, during the forty years in which he kept the flocks of Jethro, had often wandered over these mountains, and was well acquainted with their valleys and deep recesses, like the Arabs of the present day. At any rate, he knew and had visited the spot to which he was to conduct his people—this *olytum* in the midst of the great circular granite region; a secret holy place, shut out from the world amid lone and desolate mountains" (i, 175 sq.). We subjoin what Robinson reports of the climate: "The weather, during our residence at the convent (of Sinai), as, indeed, during all our journey through the peninsula (March and April), was very fine. At the convent the thermometer ranged only between 47° and 67° F. But the winter nights are said here to be cold; water freezes as late as February, and snow often falls upon the mountains. But the air is exceedingly pure, and the climate healthy, as is testified by the great age and vigor of many of the monks; and if in general few of the Arabs attain to so great an age, the cause is doubtless to be sought in the scantiness of their fare, and their exposure to privations, and not to any injurious influence of the climate" (p. 175). Other travellers, however, have since contended for the plain of wady es-Sebaiyeh, at the south-eastern base of Sinai, as the scene of the giving of the law (Kitto's *Daily Bible Illust.* ii, 123). This appears a less favorable position for that purpose, but it might easily have been reached by the Israelites by keeping along the shore of the Red Sea, and ascending by the next valley opposite Jebel Um-Shaamer. See SINAI.

V. *From Sinai to Kadesh.*—The sojourn of a year in the neighborhood of Mount Sinai was an eventful one. The statements of the scriptural narrative which relate to the receiving of the two tables, the golden calf, Moses's vision of God, and the visit of Jethro, are too well known to need special mention here; but, besides these, it is certain, from Numb. iii, 4, that before they quitted the wilderness of Sinai the Israelites were thrown into mourning by the untimely death of Aaron's

two sons, Nadab and Abihu. This event is probably connected with the setting up of the tabernacle and the enkindling of that holy fire, the sanctity of which their death avenged. That it has a determinate chronological relation with the promulgations which from time to time were made in that wilderness, is proved by an edict in Lev. xvi, being fixed as subsequent to it (Lev. x; comp. xvi. 1). The only other fact of history contained in Leviticus is the punishment of the son of mixed parentage for blasphemy (xxiv, 10-14). Of course the consecration of Aaron and his sons is mentioned early in the book in connection with the laws relating to their office (viii, ix). In the same wilderness region the people were numbered, and the exchange of the Levites against the first-born was effected; these last, since their delivery when God smote those of Egypt, having incurred the obligation of sanctity to him. The offerings of the princes of Israel were here also received. The last incident mentioned before the wilderness of Sinai was quitted for that of Paran is the intended departure of Hobab the Kenite, which it seems he abandoned at Moses's urgency. See HOBAB.

1. After having been thus about a year in the midst of this mountainous region, the Israelites broke up their encampment and began their journey in the order of their tribes, Judah leading the way with the ark of the covenant, under the guidance of the directing cloud (Numb. ix, 15 sq.; x, 11 sq.). They doubtless proceeded down wady Sheik, having the wilderness of Paran (Debbet er-Ramleh) before them, in a northerly direction; but having come to a gorge in the mountains not far from Sinai, they appear to have struck in a north-easterly direction across some low swells into *wady Sal*, where the subsequent route obliges us to place the station Taberah. It took the army three days to reach this station. Whatever name the place bore before, it now received that of Taberah (fire), from a supernatural fire with which murderers, in the extreme parts of the camp, were destroyed as a punishment for their guilt. Here, too, the mixed multitude that was among the Israelites not only fell a-lusting themselves, but also excited the Hebrews to remember Egyptian fish and vegetables with strong desire, and to complain of the divinely supplied manna. The discontent was intense and widely spread. Moses became aware of it, and forthwith felt his spirit misgive him. He brings the matter before Jehovah, and receives divine aid by the appointment of seventy elders to assist him in the important and perilous office of governing the gross, sensuous, and self-willed myriads whom he had to lead to Canaan. Moreover, an abundance of flesh-meat was given in a most profuse supply of quails. It appears that there were now 600,000 footmen in the congregation. See TABERAH.

2. The next station was Kibroth-hattaavah (probably at the intersection of their north-easterly course with *wady Murrah*), near which there are fine springs and excellent pasturage. This spot, the name of which signifies "graves of lust," was so denominated from a plague inflicted on the people in punishment of their rebellious disposition (Numb. xi, 33; 1 Cor. x, 6). Raumer (*Beiträge z. bib. Geog.* p. 6, also *Poläst.* 1850, p. 442) infers from Dent. i, 3, that Dizahab (now Dahab) lay on the route of the Israelites, and therefore identifies it with Kibroth-hattavah; but this is improbable, and requires a large detour. See KIBROTH-HATTA AVAH.

3. Thence they journeyed to Hazeroth, which Robinson, after Burckhardt, finds in *el-Hudherah*, where is a fountain, together with palm-trees. "The determination of this point," says Robinson, "is perhaps of more importance in Biblical history than would at first appear; for, if this position be adopted for Hazeroth, it settles at once the question as to the whole route of the Israelites between Sinai and Kadesh. It shows that they must have followed the route upon

which we now were to the sea, and so along the coast to Akabah (at the head of the eastern arm of the Red Sea), and thence, probably, through the great wady el-'Arabah to Kadesh. Indeed, such is the nature of the country, that, having once arrived at this fountain, they could not well have varied their course so as to keep aloof from the sea, and continue along the high plateau of the western desert' (i, 223). A glance at Kiepert's, or any map showing the region in detail, will show that a choice of two main routes exists, in order to cross the intervening space between Sinai and Canaan, which they certainly approached in the first instance on the southern, and not on the eastern side. Here the higher plateau surmounting the Tih region would almost certainly, assuming the main features of the wilderness to have been then as they are now, have compelled them to turn its western side nearly by the route by which Setzen came in the opposite direction from Hebron to Sinai, or to turn it on the east by going up the 'Arabah, or between the 'Arabah and the higher plateau. Over its southern face there is no pass, and hence the roads from Sinai, and those from Petra towards Gaza and Hebron, all converge into one of two trunk-lines of route (Robinson, i, 147, 151, 2; ii, 186). One reason for thinking that they did not strike northwards across the Tih range from Sinai is Moses's question when they murmur, "Shall all the fish of the sea be gathered together for them, to suffice them?" which is natural enough if they were rapidly nearing the Gulf of 'Akabah, but strange if they were posting towards the inland heart of the desert. Again, the quails are brought by "a wind from the sea" (Numb. xi, 22, 31); and various travellers (Burchardt, Schubert, Stanley) testify to the occurrence of vast flights of birds in this precise region between Sinai and 'Akabah. Again, Hazeroth, the next station after these, is coupled with Dizahab, which last seems undoubtedly the Dahab on the shore of that gulf (Deut. i, 1, and Robinson, ii, 600, note). This makes a seaward position likely for Hazeroth. Now as Taberah, previously reached, was three days' journey or more from the wilderness of Sinai, they had probably advanced that distance towards the north-east and 'Akabah; and the distance required for this will bring us so near el-Hüdheräh (the spot which Robinson thought represented Hazeroth in fact, as it seems to do in name), that it may be accepted as a highly probable site. Thus they were now not far from the coast of the Gulf of 'Akabah. A spot which seems almost certain to attract their course was the wady el-'Ain, being the water, the spring of that region of the desert, which would have drawn around it such "nomadic settlements as are implied in the name of Hazeroth, and such as that of Israel must have been" (Stanley, p. 82). Stanley nevertheless thinks this identification of Hazeroth a "faint probability," and the more uncertain as regards identity, "as the name Hazeroth is one of the least likely to be attached to any permanent or natural feature of the desert," meaning "simply the inclosures, such as may still be seen in the Bedonin villages, hardly less transitory than tents" (*Sinai and Palestine*, p. 81, 82). We rely, however, as much on the combination of the various circumstances mentioned above as on the name. The wady Hüdheräh and wady el-'Ain appear to run nearly parallel with each other, from south-west to north-east, nearly from the eastern extremity of the wady es-Sheikh, and their north-east extremity comes nearly to the coast, marking about a midway distance between the Jebel Músa and 'Akabah. After reaching the sea, however, at Ain el-Wáseit, the Israelites may have made a detour by way of wady Wetir nearly to its head, and thence passed through the water-course running directly northward into the Derb es-Sanna, thence around the northern face of Jebel Herte, down wady Hessi and wady Kureiyeh to the sea again; thus avoiding the narrow shore and the difficult pass across

the hill between wady el-Huweimiraty and wady el-Huweimirat. (See Stanley's *Sinai and Palestine*, p. 84). See HAZEROTH.

At Hazeroth, where the people seem to have remained a short time, there arose a family dissension to increase the difficulties of Moses. Aaron, apparently led on by his sister Miriam, who may have been actuated by some feminine pique or jealousy, complained of Moses on the ground that he had married a Cushite, that is, an Arab wife, and the malcontents went so far as to set up their own claims to authority as not less valid than those of Moses. An appeal is made to Jehovah, who vindicates Moses, rebukes Aaron, and punishes Miriam (Numb. xii). See MIRIAM.

The two preceding stations seem from Numb. x, 11-13, 33-36, to have lain in the wilderness of Paran; but possibly the passage in x, 11-13 should come after that of 33-36, and the "three days' journey" of ver. 33 lie still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xi, xii, also there. Thus the Israelites would reach Paran only in xii, 16; and x, 12 would be either misplaced, or mentioned by anticipation only. See PARAN (WILDERNESS OF).

4. The next permanent encampment brought them into the wilderness of Paran, and here the local commentator's greatest difficulty begins. "And afterwards the people removed from Hazeroth, and pitched in the wilderness of Paran," at Kadesh (Numb. xii, 16; xiii, 26). In Deut. i, 19-21, we read, "And when we departed from Horeb we went through all that great and terrible wilderness which ye saw by the way of the mountain of the Amorites, as the Lord our God commanded us; and we came to Kadesh-barnea. And I said unto you, Ye are come unto the mountain of the Amorites, which the Lord our God doth give unto us. Behold, the Lord thy God hath set the land before thee: go up and possess it; fear not, neither be discouraged." Accordingly, here it was that twelve men (spies) were sent into Canaan to survey the country, who went up from the wilderness of Zin (Numb. xiii, 21) to Hebron, and returning after forty days, brought back a very alarming account of what they had seen. Let it, however, be remarked that the Scriptures here supply several local data to this effect: Kadesh-barnea lay not far from Canaan, near the mountain of the Amorites, in the wilderness of Zin, in the wilderness of Paran. It is evident that there is here a great *lacuna*, which some have attempted to fill up by turning the route a little to the west to Rithmah (q. v.), on the borders of Idumæa, and then conducting it with a sudden bend to the west and the south, into what is considered the wilderness of Paran (*Relievo Map of Arabia Petraea*, published by Dobbs, London). In this view, however, we cannot concur. Both Robinson and Raumer are of a different opinion. At the same time it must be admitted that so great a gap in the itinerary is extraordinary. If, however, we find ourselves in regard to the journey from Horeb to Kadesh possessed of fewer and less definite materials of information, we have also the satisfaction of feeling that no great scriptural fact or doctrine is concerned. It is certain that the narrative in the early part of Numbers goes at once from Hazeroth to Kadesh; and although the second account (in Numb. xxxiii) supplies other places, these seem to belong properly to a second route and a second visit to Kadesh. The history in the book of Numbers is not, indeed, a consecutive narrative; for after the defeat of the Israelites in their foolish attempt to force an entrance into Canaan contrary to the will of God (Numb. xiv, 45), it breaks suddenly off, and, leaving the journeyings and the doings of the camp, proceeds to recite certain laws. Yet it offers, as we think, a clear intimation of a second visit to the wilderness of Zin and to Kadesh. Without having said a word as to the removal of the Israelites southward, and therefore leaving them in the wilder-

ness of Zin, at Kadesh, it records in the twentieth chap. (ver. 1), "Then came the children of Israel, the whole congregation, into the desert of Zin, in the first month, and the people abode in Kadesh." And this view appears confirmed by the fact that the writer immediately proceeds to narrate the passage of the Israelites hence on by Mount Hor southwards to Gilgal and Canaan. Robinson's remarks (ii, 611) on this point have much force: "I have thus far assumed that the Israelites were twice at Kadesh, and this appears from a comparison of the various accounts. They broke up from Sinai on the twentieth day of the second month in the second year of their departure out of Egypt, corresponding to the early part of May; they came into the desert of Paran, whence spies were sent up the mountain into Palestine, 'in the time of the first ripe grapes;' and these returned after forty days to the camp at Kadesh. As grapes begin to ripen on the mountains of Judah in July, the return of the spies is to be placed in August or September. The people now murmured at the report of the spies, and received the sentence from Jehovah that their carcasses should fall in the wilderness, and their children wander in the desert forty years. They were ordered to turn back into the desert 'by the way of the Red Sea,' although it appears that they abode 'many' days in Kadesh. The next notice of the Israelites is, that in the first month they came into the desert of Zin and abode again at Kadesh; here Miriam dies; Moses and Aaron bring water from the rock; a passage is demanded through the land of Edom, and refused; and they then journeyed from Kadesh to Mount Hor, where Aaron dies in the fortieth year of the departure from Egypt, in the first day of the fifth month, corresponding to a part of August and September. Here, then, between August of the second year and August of the fortieth year, we have an interval of thirty-eight years of wandering in the desert. With this coincides another account. From Mount Hor they proceeded to Elath on the Red Sea, and so around the land of Edom to the brook Zered, on the border of Moab; and from the time of their departure from Kadesh (meaning, of course, their first departure) until they thus came to the brook Zered, there is said to have been an interval of thirty-eight years."

In this way the scriptural account of the journeyings of the Israelites become perfectly harmonious and intelligible. The eighteen stations mentioned only in the general list in the book of Numbers as preceding the arrival at Kadesh are then apparently to be referred to this eight-and-thirty years of wandering, during which the people at last approached Zion-geber, and afterwards returned northwards a second time to Kadesh, in the hope of passing directly through the land of Edom. Their wanderings extended, doubtless, over the western desert, although the stations named are probably only those head-quarters where the tabernacle was pitched, and where Moses, and the elders, and priests encamped, while the main body of the people was scattered in various directions.

Where, then, was Kadesh? Clearly on the borders of Palestine. We agree with Robinson and Raumer in placing it nearly at the top of the wady 'Arabah, where, indeed, it is fixed by Scripture, for in Numb. xii, 16 we read, "Kadesh, a city in the uttermost of thy (Edom's) border." The precise spot it may be difficult to ascertain; but here, in the wilderness of Zin, which lay in the more comprehensive district of Paran, is Kadesh to be placed. Raumer, however, has attempted to fix the locality, and in his views Robinson and Schubert generally concur. Raumer places it south from the Dead Sea, in the low lands between the mountain of the Edomites and that of the Amorites. The country gradually descends from the mountains of Judah southward, and where the descent terminates Raumer sets Kadesh. With this view the words of Moses entirely correspond, when, at Kadesh, he said

to the spies, "Get you *up southward* (rather on the south,  $\text{זָרְדָּה}$ ), and go up into the mountain" (Numb. xiii, 17). The ascent may have been made up the pass es-Sufah; up this the self-willed Hebrews went, and were driven back by the Canaanites as far as to Hormah, then called Zephath (Numb. xii, 17; xiv, 40-45; Judg. i, 17). The spot where Kadesh lay Robinson finds in the present Ain el-Weibeh. But Raumer prefers a spot to the north of this place—that where the road mounts by wady el-Khurur to the pass Sufah. It ought, he thinks, to be fixed on a spot where the Israelites would be near the pass, and where the pass would lie before their eyes. This is not the case, according to Schubert, at Ain el-Weibeh. Raumer, therefore, inclines to fix on Ain Hash, which lies near Ain el-Khurur. This is probably Kadesh. The distance from the pass Sufah to Ain Hash is little more than half the length of that from the same pass to Ain el-Weibeh. According to the Arabs, there is at Ain Hash a copious fountain of sweet water, surrounded by verdure and traces of ruins, which must be of considerable magnitude, as they were seen by Robinson at a distance of some miles. These may be the ruins of Kadesh; but at Ain el-Weibeh there are no ruins (see Raumer, *Palist.* 1850, p. 445). See KADESH.

By what route, then, did the Israelites come from Hazeroth to Kadesh? We are here supplied with scarcely any information. The entire distance, which is considerable, is passed by the historian in silence. Nothing more remains than the direction of the two places, the general features of the country, and one or two allusions. The option seems to lie between two routes. From Hazeroth, pursuing a direction to the north-east, they would come upon the sea-coast, along which they might go till they came to the top of the Bahr Akabah, and thence up wady Arabah to Kadesh, nearly at its extremity. Or they might have taken a north-western course and crossed the mountain Jebel et-Tih. If so, they must still have avoided the western side of Mount Araf, otherwise they would have been carried to Beer-sheba, which lay far to the west of Kadesh. Robinson prefers the first route, Raumer the second. "I," says the latter, "am of opinion that Israel went through the desert et-Tih, then down Jebel Araf, but not along wady 'Arabah." This view is thought to be supported by the words found in Deut. i, 19, "When we departed from Horeb we went through all that great and terrible wilderness which we saw by the way of the mountain of the Amorites [as if Jebel Araf], and we came to Kadesh-barnea." This journey from Horeb to Kadesh-barnea took the Hebrews eleven days (Deut. i, 2). But in this last passage the route is expressly said to be "by the way of Mount *Sir*" (which must therefore be the "mount of the Amorites" above referred to), and in ver. 1 the "wilderness is said to be in the 'Arabah ("plain"), with several places designated as extreme boundary points. See ARABAH.

VI. *The Wanderings in the Desert.*—At the direct command of Jehovah the Hebrews left Kadesh, came down to the wady 'Arabah, and entered the wilderness by the way of the Red Sea (Numb. xiv, 25). In this wilderness they wandered eight-and-thirty years, but little can be set forth respecting the course of their march. It may in general be observed that their route would not resemble that of a regular modern army. They were a disciplined horde of nomades, and would follow nomadic customs. It is also clear that their stations, as well as their course, would necessarily be determined by the nature of the country, and its natural supplies of the necessaries of life. Hence regularity of movement is not to be expected. A common error is that of supposing that from station to station (in Numb. xxxiii) always represents a day's march merely, whereas it is plain, from a comparison of two passages in Exod. (xv, 22) and Numb. (x, 23),

that on two occasions three days formed the period of transition between station and station, and therefore that not day's marches, but intervals of an indefinite number of days between permanent encampments are intended by that itinerary; and as it is equally clear from Numb. ix, 22 that the ground may have been occupied for "two days, or a month, or a year," we may suppose that the occupations of a longer period only may be marked in the itinerary; and thus the difficulty of apparent chasms in its enumeration, for instance the greatest, between Ezion-Geber and Kadesh (xxxiii, 35-37), altogether vanishes. How, except by a constant miracle, two millions of people were supported for forty years in the peninsula of Sinai, has been thought, under the actual circumstances of the case, to be inexplicable; nor will such scanty supplies as an occasional well or a chance oasis do much to relieve the subject. Much of the difficulty experienced by commentators on this head, however, arises from a misconception of the nature of the so-called "desert" (דֶּשֶׁת), which is rather an open uninhabited country than a desolate wilderness in the strict sense. Indeed, Jobath (q. v.), one of the stations named in this part of the route, is explicitly called "a land of rivers of waters" (Deut. x, 8). Modern travellers through the region in question speak of many parts of it as well watered, and actually sustaining a numerous nomadic population (comp. *Meth. Quart. Rev.* April, 1863, p. 301 sq.). See WILDERNESS.

1. In the absence of detailed information, any attempt to lay down the path pursued by the Israelites after their emerging from the 'Arabah can be little better than conjectural. Some authorities carry them quite over to the eastern bank of the Red Sea; but the expression "by the way of the Red Sea" denotes nothing more than the western wilderness, or the wilderness in the direction of the Red Sea. The stations over which the Israelites passed are set down in Numb. xxxiii, 18 sq. (comp. Deut. x, 6, 7), and little beyond the bare record can be given. Only it seems extraordinary, and is much to be regretted, that for so long a period as eight-and-thirty years our information should be so exceedingly small. Raumer, indeed, makes a feeble effort (*Beiträge zur biblische Geographie*, Leips, 1843) to fix the direction in which some of the stations lay to each other, but he locates them all in the valley of the 'Arabah, without being able to identify one of the names with a modern locality (see his *Palästina*, 1850, p. 446; also map). Were the interior of the peninsula thoroughly explored, we doubt not many of the ancient names might be found still subsisting, which would serve as landmarks to determine the route. As it is, we do not altogether despair of finding some clew to the subject. [See below.] It may be of service to subjoin the following table of the places through which the Israelites passed (not all of them exactly stations) from the time of their leaving Egypt to their arrival in Canaan, which we take with some alterations) from Dr. Robinson's paper in the *Biblical Repos.* for 1832, p. 794-797.

(3.) From Kadesh to the Jordan.

(NUMB. xx, xxi; DEUT. i, ii, x.)	(NUMBERS xxxiii.)
From Kadesh (Numb. xx, 22).	From Kadesh (ver. 37).
[39.] Beeroth Bene-jaakan (Deut. x, 6).	Mount Hor (ver. 37).
[40.] Mount Hor (Numb. xx, 22), or Mosera (Deut. x, 6), where Aaron died.	
[41.] Gudgodah (Deut. x, 7).	
[42.] Jotbath (Deut. x, 7).	
[43.] Way of the Red Sea (Numb. xxi, 4), by Ezion-geber (Deut. ii, 8).	
[44.] Elath (Deut. ii, 8).	Zalmonah (ver. 41).
[45.] Panon (ver. 42).	
[46.] Oboth (Numb. xxi, 10).	Oboth (ver. 43).
[47.] Ije-abarim (Numb. xxi, 11).	Ije-abarim, or Iim (ver. 44, 45).
[49.] The brook Zered (Numb. xxi, 12; Deut. ii, 13, 14).	
[50.] The brook Arnon (Numb. xxi, 13; Deut. ii, 24).	
[51.] Dibon-gad (ver. 45).	
[52.] Almon-diblathaim (ver. 46).	
[53.] Beer (well), in the desert (Numb. xxi, 16, 18).	
[54.] Mattanah (xxi, 18).	
[55.] Nahaliel (xxi, 19).	
[56.] Bamoth (xxi, 19).	
[57.] Pisgah, put for the range of Abarim, of which Pisgah was part (xxi, 20).	Mountains of Abarim, near Nebo (ver. 47).
[58.] By the way of Bashan to the plains of Moab by Jordan, near Jericho (Numb. xxi, 33; xxii, 1).	Plains of Moab by Jordan, near Jericho (ver. 48).

The points indicated in the above route as far as Kadesh have already been identified with considerable precision. It remains to consider how far the residue are capable of identification. For this purpose we have a few coincidences with modern or well-known

Map of the Arabian Peninsula, exhibiting the Route of the Israelites. (The dotted parts are uncertain. The numbers show the order and direction of the journeys.)

localities, and several repetitions of the same or similar names, indicating a passage through the same spot from different directions. The rest must be supplied by conjecture, assisted by such suggestions as the nature of the region furnishes. It is a question whether the station Rithmah (Numb. xxxiii, 18) was one reached by the Israelites before or after their first arrival at Kadesh; but as it is mentioned in immediate connection with Hazeroth, we may infer that it was either another name for Kadesh itself, or a locality so near it as to permit the omission of Kadesh in the summary where it occurs. After their repulse by the Canaanites at the pass called Nukb es-Sufah, the Israelites may be supposed to have retreated along the westerly shore of the 'Arabah till they reached the wady el-Kafatiyeh, or that of Abu Jeradeh, which would afford them an ascent to the mountainous region occupying the northern interior of the desert, somewhere near the summit of which we may place their next encampment, called Rimmon-parez. Libnah, where they next encamped, may not improbably be the same with Laban, given (Deut. i, 1) as one of the extreme points of their region of wandering, and may have been situated on the western declivity of the mountains, in the neighborhood of the wady el-Ain, running down from

Ain el-Kudeirat. Thence they may have proceeded down wady el-Ain to its junction with the large wady el-Arish, where we may place the next station, Rissah, in the vicinity of el-Kusaby, opposite Jebel el-Helal. Pursuing this last valley southward, they next halted at Kehelathah, perhaps at its junction with wady el-Hasana, opposite Jebel Achmar, and thence eastward up wady el-Mayein, around the northern base of the Arait en-Nakah, which we may identify with Mount Shapher, to the summit just beyond Ain el-Mayein, where we may locate their next station, Haradah. Makheloth and Tahath may be located at suitable intervals along the northern base of the ridge el-Mukrah, and Tara: at the intersection of the route southeasterly thence with the wady el-Jerafeh, which they would be likely to pursue (stopping at Mithcah on the way) to its intersection with the wady el-Jeib, in the 'Arabah, where we may locate Hahshmonah. Thence is an easy stage to the next station, Moseroth, which is doubtless the same with Mosera, afterwards visited (Deut. x, 6), and there identified with the vicinity of Mount Hor, where Aaron died. Here we have a fixed point, whatever may be thought of the preceding conjectural circuit, which doubtless occupied several years. We notice that Schwarz, although unable to fix the

stations at this portion of the itinerary of the Israelites, believes that they must have been in this high, rocky plateau, now occupied by the tribe Azazumeh (*Palestine*, p. 215).

From Mount Hor the next station indicated is Bene-jaakan (q. v.), evidently identical with the wells (Beeroth) of the same name, mentioned subsequently in the reverse order between Kadesh and Mosera (Deut. x, 6), and probably a general term for the well-watered region including the fountains el-Hufeiry, el-Buweirideh, el-Webeh, and el-Ghamr. At this last-named spot, having crossed the 'Arabah in a north-easterly direction, the Israelites may have pursued their route up wady el-Ghamr, avoiding their late track in that vicinity (for the same names do not reappear), and thus by a south-westerly, and then southerly course, have fallen again into wady el-Jerafeh, and followed it up to where it forks into wady el-Ghudhagidh. This last name is probably a relic of that of their next station, Hor-hagidgad, essentially the same with the Gudgodah (q. v.) afterwards visited by them (Deut. x, 7) in retracing their steps through this region; for although the letters of the Arabic and Heb. names are not identical (as given in Robinson's lists, *Researches*, iii, Appendix, 210, where the orthography was probably taken only by ear), yet they are equivalent in sound, and in both cases contain the same peculiar reduplication. Thence making a southerly circuit across the heads of several wadys running easterly from the little Jebel et-Tih, their next encampment was Jotbathah, coincident with the Jotbath of Deut. x, 7, and there described as "a land of rivers and streams," which we may naturally locate at the intersection of the route thus indicated with the upper wady Jerafeh, where is a confluence of several branch wadys. Following up the chief of these, wady Mukutta et-Tawarik, in a south-easterly direction, they would fall in (at the station Ebronah) with the modern Haj route from Cairo, and follow it through the pass of 'Akabah to Ezion-geber on the Red Sea. Thence they appear to have taken their first path through the 'Arabah to Kadesh again. The following is a table of a few of the most definite of these results:

NUMB. xxxiii, 30-35.	DEUT. x, 6, 7.	CONJECTURAL SITE.
(1.) Moseroth.	(2.) Mosera.	<i>Ain et - Tu'iyibeh</i> , near the foot of Mount Hor.
(2.) Bene-jaakan.	(1.) Beeroth of the children of Jaakan.	<i>'Ain el - Webeh</i> .
(3.) Hor-hagidgad.	(3.) Gudgodah.	<i>Wady el - Ghudhagidh</i> .
(4.) Jotbathah.	(4.) Jotbath.	Confluence of <i>wady el - A'bbeh</i> with <i>el - Jerafeh</i> .

2. The only events recorded during this period (and these are interspersed with sundry promulgations of the ceremonial law), are the execution of the offender who gathered sticks on the Sabbath (Numb. xv, 32-36), the rebellion of Korah (ch. xvi), and, closely connected with it, the adjudgment of the pre-eminence to Aaron's house with their kindred tribe, solemnly confirmed by the judicial miracle of the rod that blossomed. This seems to have been followed by a more rigid separation between Levi and the other tribes as regards the approach to the tabernacle than had been practically recognised before (xxvii; xviii, 22; comp. xvi, 40).

We are not told how the Israelites came into possession of the city Kadesh-Barnea, as seems implied in the narrative of their second arrival there, nor who were its previous occupants. The probability is that these last were a remnant of the Horites, who, after their expulsion by Edom from Mount Seir [see Edom], may have here retained their last hold on the territory between Edom and the Canaanitish Amorites of "the south." Probably Israel took it by force of arms, which may have induced the attack of "Arad the Canaanite," who would then feel his border immediately

threatened (Numb. xxxiii, 40; comp. xxi, 1). This warlike exploit of Israel may perhaps be alluded to in Judg. v, 4 as the occasion when Jehovah "went out of Seir" and "marched out of the field of Edom" to give his people victory. The attack of Arad, however, though with some slight success at first, only brought defeat upon himself and destruction upon his cities (xxi, 3). We learn from xxxiii, 36 only that Israel marched without permanent halt from Ezion-geber upon Kadesh. This sudden activity, after their long period of desultory and purposeless wandering, may have alarmed king Arad. The itinerary takes here another stride from Kadesh to Mount Hor. There their being occupied with the burial of Aaron may have given Arad his fancied opportunity of assaulting the rear of their march, he descending from the north whilst they also were facing southwards. In direct connection with these events we come upon a single passage in Deuteronomy (x, 6, 7), which is a scrap of narrative imbedded in Moses's recital of events at Hor-be long previous. This contains a short list of names of localities, on comparing which with the itinerary we get some clew to the line of march from the region Kadesh to Ezion-geber southwards. See KADESH.

#### VII. From Kadesh to Canaan.

1. This third division of the Israelites' route is more susceptible of identification than either of the others, after having fixed by the foregoing process some important points, and in its latter portion is quite unmistakable. The Israelites evidently retraced their steps down the 'Arabah, perhaps keeping along its western side, at the farthest distance from the borders of Edom, till they arrived once more at the well-watered tract of the descendants of Jaakan, about half way between Kadesh and Mount Hor, or Mosera, to which they next crossed over, and where Aaron died (Deut. x, 6). From this point, again avoiding the territory of the Edomites, they passed over by a considerable deflection, in a south-westerly direction, through wady el-Jerafeh to wady el-Ghudhagidh (which we have before identified with Gudgodah, or Hor-hagidgad), on their former track, around through Jotbath (Deut. x, 7), and back again to the Red Sea at Ezion-geber and Elath (Deut. ii, 8, where, however, the two latter names occur in the reverse order). From this last point, having crossed the plain of the 'Arabah, they doubled the southern extremity of Mount Seir, through wady el-Ithm, and pitched at Zalmonah, probably in the edge of the eastern desert plain, near the junction of wady el-Amran. Pursuing thence their route north-easterly along the present road that skirts the base of Mount Seir, they next arrived at Punon, which we may locate near the intersection of their route with the Haj road from Damascus. Keeping still along the base of the Mount-Seir range, they next halted at Oboth, situated probably in the region of wady el-Ghuweit, where the first stream takes its rise, emptying into the Dead Sea from the south. Pursuing the same road northwards that travellers at this day take along this route, they doubtless passed near Tufileh (Topel), one of the points in their wanderings, Deut. i, 1), and halted at Ije-abarim, probably near the wady el-Ahsy, which runs into wady el-Kurahy, the southern border of Moab. Their next stations are easily identified: the brook Zered can be no other than wady el-Deraah, the two forks of which inclose Kerak; the brook Arnon is conceded to be wady Mojeb; and Dibon-gad is evidently the modern Dhiban. From this last point they appear to have diverged considerably (apparently with a view to meet the hostile Sihon at Jahaz) to the east of the modern road, into the desert, where they passed through several unknown localities (in short stages, while waiting for the return of messengers asking leave of passage), Almon-Diblathaim, Beer, Mattanah, and Nahaliel [see each in its alphabetical place], and then returned by a slight north-westerly circuit to Bamoth (perhaps Jebel-Humej), apparently some point

opposite Pisgah, a peak (specially corresponding probably to Jebel Attarus) of the mountains inclosing the valley of the Jordan on the east. About this time the expedition was sent out against Sihon, Og, and the inhabitants of Bashan; upon the successful return of which they passed northward around the heights of Nebo (probably west of Heshbon), and so across the general range of Abarim by one of the valleys running south-westerly into the Jordan (probably wady Heshban). In this last vicinity they encamped in the plains of Moab, preparatory to crossing the Jordan opposite Jericho. (See each of the stations above-named in its alphabetical place.)

2. When we begin to take up the thread of the story at the second visit to Kadesh, we find that time had, in the interval, been busy at its destructive work, and we thus gain confirmation of the view which has been taken of such second visit. No sooner has the sacred historian told us of the return of the Israelites to Kadesh, than he records the death and burial of Miriam, and has, at no great distance of time, to narrate that of Aaron and Moses. While still at Kadesh a rising against these leaders takes place, on the alleged ground of a want of water. Water is produced from the rock at a spot called hence Meribah (strife). But Moses and Aaron displeased God in this proceeding, probably because they distrusted God's providence and applied for extraordinary resources. On account of this displeasure, it was announced to them that they should not enter Canaan. A similar transaction has been already spoken of as taking place in Replidim (Exod. xvii, 1). The same name, Meribah, was occasioned in that as in this matter. Hence it has been thought that we have here two versions of the same story. But there is nothing surprising, under the circumstances, in the outbreak of discontent for want of water, which may well have happened even more than twice. The places are different, very wide apart; the time is different; and there is also the great variation arising out of the conduct and punishment of Moses and Aaron. On the whole, therefore, we judge the two records to speak of different transactions.

Relying on the ties of blood (Gen. xxxii, 8), Moses sent to ask of the Edomites a passage through their territory into Canaan. The answer was a refusal, accompanied by a display of force. We suggest as an explanation of this unnatural churlishness that perhaps the request chanced to be preferred to the native Horite "king" (probably the very Hadad last mentioned in the list in Gen. xxxvi, 29) rather than to the phylarch of the Esauites contemporary with him (Gen. xxxvi, 43). See Esau. The Israelites, therefore, were compelled to turn their face southward, and, making a turn around the end of the Elanitic gulf, reached Mount Hor, near Petra, on the top of which Aaron died. Finding the country bad for travelling, and their food unpleasant, Israel again broke out into rebellious discontent, and was punished by fiery serpents which bit the people, and many died, when a remedy was provided in a serpent of brass set on the flag-staff (Numb. xxi, 4 sq.). There is near Elath a promontory known as the *Rds Um Haye*, "the mother of serpents," which seem to abound in the region adjacent; and, if we may suppose this the scene of that judgment, the event would thus be connected with the line of march, rounding the southern border of Mount Seir, laid down in Deut. ii, 8 as being "through the way of the plain (i. e. the 'Arabah) from Elath and from Ezion-geber," whence "turning northward," having "compassed that mountain (Mount Seir) long enough," they "passed by the way of the wilderness of Moab" (v, 3, 8). Still going northward, and probably pursuing the caravan route from Damascus, they at length reached the valley of Zered (the brook), which may be the present wady Kerek, that runs from the east into the Dead Sea. Hence they "removed and pitched on the other side of Arnon, which is in the

border of Moab, between Moab and the Amorites" (Numb. xxi, 13). Beer (the well) was the next station, where, finding a plentiful supply of water, and being rejoiced at the prospect of the speedy termination of their journey, the people indulged in music and song, singing "the song of the well" (Numb. xxi, 17, 18). The Amorites being requested, refused to give Israel a passage through their borders, and so the nation was again compelled to proceed still in a northerly course. At length, having beaten the Amorites, and Og, king of Bashan, they reached the Jordan, and pitched their tents at a spot which lay opposite Jericho. Here Balak, king of the Moabites, alarmed at their numbers and their successful prowess, invited Balaam to curse Israel, in the hope of being thus aided to overcome them and drive them out. The intended curse proved a blessing in the prophet's mouth. While here the people gave way to the idolatrous practices of the Moabites, when a terrible punishment was inflicted, partly by a plague which took off 24,000, and partly by the avenging sword. Moses, being commanded to take the sum of the children of Israel, from twenty years upwards, found they amounted to 600,730, among whom there was not a man of those whom Moses and Aaron numbered in the wilderness of Sinai (Numb. xxvi, 47, 64). Moses is now directed to ascend Abarim, to Mount Nebo, in the land of Moab, over against Jericho, in order that he might survey the land which he was not to enter on account of his having rebelled against God's commandment in the desert of Zin (Numb. xxvii, 12; Deut. xxxii, 49). Conformably with the divine command, Moses went up from the plains of Moab unto the mountains of Nebo, to the top of Pisgah, and there he died, at the age of 120 years: "His eye was not dim, nor his natural force abated" (Deut. xxxiv). Under his successor, Joshua, the Hebrews were forthwith led across the Jordan, and established in the Land of Promise.

Thus a journey, which they might have performed in a few months, they spent forty years in accomplishing, bringing on themselves unspeakable toil and trouble, and, in the end, death, as a punishment for their gross and sensual appetites, and their unbending inobedience to the divine will (Numb. xiv, 23; xxvi, 65). Joshua, however, gained thereby a great advantage, inasmuch as it was with an entirely new generation that he laid the foundations of the civil and religious institutions of the Mosiac polity in Palestine. This advantage may be assigned as the reason why so long a period of years was spent in the wilderness.

VIII. *Literature*.—Besides the incidental treatment of this subject in general works on sacred geography, the writings of travellers through the region in question, and commentaries on the parts of Scripture relating to it, the following special treatises exist:—Laborde, *Commentaire Géographique sur l'Exode et les Nombres* (Paris and Leipzig, 1811, fol.); Hase, *Tabula Synoptica stat'orum Israelitarum*, etc. (Norimb. 1789, fol.); Berthold, *De rebus a Mose in Ægypto gestis* (Erl. 1795, 8vo); Plitt, *Die 40 jährige Reisen d. Israeliten durch d. Wüste* (Cassel, 1775, 8vo); Calmet, *De transfretatione Erythraei* (in vol. i, p. 214 sq. of his *Dissertationes in V. T.*, Wirceb. 1789, 8vo); Benzell, *De transitu Israel. per Mare Rubrum* (in his *Syntagma Dissert.* ii, 137 sq.); Michaelis (ed.), *Essai sur l'heure du passage des Hébreux de la Mer Rouge* (Göttingen, 1758, 8vo); Zeibich, *Durchgang d. Israeliten*, etc. (in his *Verm. Beitr.* i, 42 sq.); also *De dissidio in enarrando itinere Isr. per Mare* (Viteb. 1752, 4to); Reimarus, *Durchg. d. Israel. durchs rothe Meer* (in Lessing's *Beitrage*, fragm. 3); Richter, *Meer durch welches d. Israel. gegangen*, etc. (Lpz. 1778, 8vo); Kleuker, *Wanderung d. Israel. durchs rothe Meer* (Frankf. 1778, 8vo); Moldenhauer, *Prüfung d. dritten Fragments* (Hamb. 1779, 8vo); Lüderwald, *Durchg. d. Isr. durchs rothe Meer* (Helmst. 1779, 8vo); Döderlein, *Fragmente u. Antifragmente*, i, 35-112; Ritter, *Ueberg.*

d. *Isr. durch d. rothe Meer* (in Henke's *Magaz.* iv, 291 sq.); treatises, *De transitu populi Israel.* etc., in the *Critici Sacri*, *Theor. Nos.* i, 274, 292, 300; Auspitz, מַצֵּי־הַיָּם (s. l. 1818, 8vo); Dietz, *Vestimenta Israel. in deserto* (Witten. 1676, 4to); Dorsche, *De educ. Israel ex Ægypto* (Strasb. 1652, 4to); Holste, *Iter Isr. ex Ægypt. ad Canaan* (Rost. 1707, 4to); Klein, *Israel's Wanderungen* (Bamberg, 1839, 8vo); Raumer, *Zug der Isr. aus Ægypto nach Canaan* (Leipzig 1837, 8vo); Thierbach, *id.* (ib. cod. 8vo); also *Durchg. d. Isr. durch einen Theil d. s. mittell. Meeres* (Erfurt, 1830, 8vo); Unruh, *Zug der Isr. aus Æg. nach Canaan* (Langensl. 1860, 8vo); Zinck, *De transitu Maris Erythraei* (Augsb. 1778, 4to); Banadius, *Itinerarium filiorum Israel* (Antw. 1621, fol.); Lightfoot, *Itinera Israelitarum* (*Works*, ii, 415); Anon. *Journeys of the Children of Israel* (Lond. 1832, 18mo); Seaton, *Church in the Wilderness* (London, 1821, 2 vols. 12mo); Alexander, *De exitu ex Ægypto* (*Hist. Eccles.* ii, 137); Bp. Lloyd, *Origins of Jewish Church* (in Whiston's *Sacred History*, i, 46); Berton, *L'itinéraire des Israélites* (Par. 1860, 4to); Fischendorf, *De Isr. per Mare Rubrum transitu* (Lips. 1847, 8vo); Miss Corbaux, *Exodus Papyri* (London, 1855, 8vo); Krummacher, *Israel's Wanderings in the Wilderness* (London, 1837-8, 2 vols. 12mo); Bräm, *Israel's Wanderung von Gosen bis zum Sinai* (Elbeuf, 1859, 8vo); Forster, *Israel in the Wilderness* (Lond. 1865, 8vo); see the *Stud. u. Krit.* 1839, ii, 397 sq.; *Jour. Sac. Lit.* April, 1859; April, 1860. The best map of the region where the passage of the Red Sea was effected is Linant's, in the Atlas of the official surveys for the Suez Canal, entitled "*Percement de l'isthme de Suez*" (Paris, 1855 sq.). See WILDERNESS.

**Ex'odus** (Gr. Ἔξοδος, an exit; in the Hebrew canon מִצֵּי־הַיָּם, *ve-el'leh shemoth'*, its initial words, or simply מִצֵּי־הַיָּם; in the Masora to Gen. xxiv, 8 called מִצֵּי־הַיָּם, see Buxt. *Lex. Talm.* col. 1325; Vulg. *Exodus*), the second book of the law or Pentateuch, so called from the principal event recorded in it, namely, the departure of the Israelites from Egypt. See EXODE. With this book begins the proper history of that people, continuing it until their arrival at Sinai, and the erection of the sanctuary there.

I. *Contents*.—1. *Preparation for the Deliverance of Israel from their Bondage in Egypt*.—This first section (j, 1-xii, 36) contains an account of the following particulars: The great increase of Jacob's posterity in the land of Egypt, and their oppression under a new dynasty, which occupied the throne after the death of Joseph (ch. i); the birth, education, and flight of Moses (ch. ii); his solemn call to be the deliverer of his people (iii, 1-iv, 17), and his return to Egypt in consequence (iv, 18-31); his first ineffectual attempt to prevail upon Pharaoh to let the Israelites go, which only resulted in an increase of their burdens (v, 1-21); a farther preparation of Moses and Aaron for their office, together with the account of their genealogies (v, 22-vii, 7); the successive signs and wonders, by means of which the deliverance of Israel from the land of bondage is at length accomplished, and the institution of the Passover (vii, 8-xii, 36).

2. *Narrative of Events from the Departure out of Egypt to the Arrival of the Israelites at Mount Sinai*.—We have in this section (a) the departure and (mentioned in connection with it) the injunctions then given respecting the Passover and the sanctification of the first-born (xii, 37-xiii, 16); the march to the Red Sea, the passage through it, and the destruction of Pharaoh and his host in the midst of the sea, together with Moses's song of triumph upon the occasion (xiii, 17-xv, 21); (b) the principal events on the journey from the Red Sea to Sinai, the bitter waters at Marah, the giving of quails and of the manna, the observance of the Sabbath, the miraculous supply of water from the rock at Rephidim, and the battle there with

the Amalekites (xv, 22-xvii, 16); the arrival of Jethro in the Israelitish camp, and his advice as to the civil government of the people (xviii).

3. *The Solemn Establishment of the Theocracy on Mount Sinai*.—The people are set apart to God as "a kingdom of priests and a holy nation" (xix, 6); the ten commandments are given, and the laws which are to regulate the social life of the people are enacted (xxi, 1-xxiii, 19); an angel is promised as their guide to the Promised Land, and the covenant between God and Moses, Nadab and Abihu, and seventy elders, as the representatives of the people, is most solemnly ratified (xxiii, 20-xxiv, 18); instructions are given respecting the tabernacle, the ark, the mercy-seat, the altar of burnt-offering, the separation of Aaron and his sons for the priest's office, the vestments which they are to wear, the ceremonies to be observed at their consecration, the altar of incense, the laver, the holy oil, the selection of Bezaleel and Aholiab for the work of the tabernacle, the observance of the Sabbath and the delivery of the two tables of the law into the hands of Moses (xxv, 1-xxxi, 18); the sin of the people in the matter of the golden calf, their rejection in consequence, and their restoration to God's favor at the intercession of Moses (xxxii, 1-xxxiv, 35); lastly, the construction of the tabernacle, and all pertaining to its service in accordance with the injunctions previously given (xxxv, 1-xl, 38).

This book, in short, gives a sketch of the early history of Israel as a nation: and the history has three clearly marked stages. First we see a nation enslaved; next a nation redeemed; lastly a nation set apart, and through the blending of its religious and political life, consecrated to the service of God. The close literary connection between the books of Genesis and Exodus is clearly marked by the Hebrew conjunctive particle וְ (*etw*), "and," with which the latter begins, and still more by the recapitulation of the name of Jacob's sons who accompanied him to Egypt, abridged from the fuller account in Gen. xli, 8-17. Still the book of Exodus is not a continuation in strict chronological sequence of the preceding history; for a very considerable interval is passed over in silence, saving only the remark, "And the children of Israel were fruitful and increased abundantly, and multiplied, and waxed exceedingly mighty; and the land was filled with them" (Exod. i, 7). The premission of all that concerned Israel during this period and their intercourse with the Egyptians, instead of being an indication, as Rationalists allege, of the fragmentary character of the Pentateuch, only shows the sacred purpose of the history, and that, in the plan of the writer, considerations of a merely political interest were entirely subordinate to the divine intentions already partially unfolded in Genesis, and to be still farther developed in the course of the present narrative regarding the national constitution of the seed of Abraham.

II. *Unity*.—According to Von Lengerke (*Kenaan*, lxxxviii, xc), the following portions of the book belong to the original or Elohist document: Chap. i, 1-14; ii, 23-25; vi, 2-vii, 7; xii, 1-28, 37, 38, 40-51 (xiii, 1, 2, perhaps); xvi; xix, 1; xx; xxv-xxxi; xxxv-xl. Stähelin (*Krit. Unterss.*) and De Wette (*Einleitung*) agree in the main with this division. Knobel, the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books still more carefully, and with regard to many passages has formed a different judgment. He assigns to the Elohist: i, 1-7, 13, 14; ii, 23-25, from מִצֵּי־הַיָּם, vi, 2-vii, 7; except vi, 8; vii, 8-13, 19-22; viii, 1-3, 11 from יָלַד, and 12-15; ix, 8-12 and 35; xi, 9, 10; xii, 1-23, 28, 37 a, 40-42, 43-51; xiii, 1, 2, 20; xiv, 1-4, 8, 9, 15-18 (except בַּיּוֹם הַזֶּה אֵלֶי in ver. 15, and אֵלֶּי יִבְטַח in ver. 16), 21-23, and 26-29 (except מִיָּדָם in ver. 27 from יָיִשָׁב); xv, 19, 22, 23, 27; xvi, 1, 2, 9-26, 31-

36; xvii, 1; xix, 2 a; xxv-xxxi, 11, 12-17 in the main; xxxv, 1-xl, 38.

A mere comparison of the two lists of passages selected by these different writers as belonging to the original document is sufficient to show how very uncertain all such critical processes must be. The first, that of Lengerke, is open to many objections, which have been urged by Hävernick (*Einleit. in der Pent.* § 117), Ranke, and others. Thus, for instance, vi, 6, which all agree in regarding as Elohistie, speaks of "great judgments" (גְּדוּלֹת שְׁפָטִים גדולים in the plural), wherewith God would redeem Israel, and yet not a word is said of these in the so-called original document. Again, xii, 12, 23, 27 contains the announcement of the destruction of the first-born of Egypt, but the fulfilment of the threat is to be found, according to the critics, only in the later Jehovistic additions. Hupfeld has tried to escape this difficulty by supposing that the original documents did contain an account of the slaying of the first-born, as the institution of the Passover in xii, 12, etc., has clearly a reference to it: only he will not allow that the story as it now stands is that account. But even then the difficulty is only partially removed, for thus *one* judgment only is mentioned, not *many* (vi, 6). Knobel has done his best to obviate this glaring inconsistency. Feeling no doubt that the ground taken by his predecessors was not tenable, he retains as a part of the original work much which they had rejected. It is especially worthy of notice that he considers some at least of the miraculous portions of the story to belong to the older document, and so accounts for the expression in vi, 6. The changing of Aaron's rod into a serpent, of the waters of the Nile into blood, the plague of frogs, of mosquitoes (A. V. lice), and of boils, and the destruction of the first-born, are, according to Knobel, Elohistie. He points out what he considers here links of connection, and a regular sequence in the narrative. He bids us observe that Jehovah always addresses Moses, and that Moses directs Aaron how to act. The miracles, then, are arranged in order of importance: first there is the sign which serves to accredit the mission of Aaron; next follow three plagues, which, however, do not touch men, and these are sent through the instrumentality of Aaron; the fourth plague is a plague upon man, and here Moses takes the most prominent part; the fifth and last is accomplished by Jehovah himself. Thus the miracles increase in intensity as they go on. The agents likewise rise in dignity. If Aaron with his rod of might begins the work, he gives way afterwards to his greater brother, whilst for the last act of redemption Jehovah employs no human agency, but himself with a mighty hand and outstretched arm effects the deliverance of his people. The passages thus selected have no doubt a sort of connection, but it is in the highest degree arbitrary to conclude that because portions of a work may be omitted without seriously disturbing the sense, these portions do not belong to the original work, but must be regarded as subsequent embellishments and additions.

Again, all agree in assigning chaps. iii and iv to the Jehovist. The call of Moses, as there described, is said to be merely the Jehovistic parallel to vi, 2-vii, 7. Yet it seems improbable that the Elohist should introduce Moses with the bare words, "And God spake to Moses" (vi, 2), without a single word as to the previous history of so remarkable a man. So argues Hävernick, and, as it appears to us, not without reason. It will be observed that none of these critics attempt to make the divine names a criterion whereby to distinguish the several documents. Thus, in the Jehovistic portion (i, 15-22), De Wette is obliged to remark, with a sort of uneasy candor, "but ver. 17, 20, *Elohim* (?)," and again (iii, 4, 6, 11-15), "here seven times *Elohim*." In other places there is the same difficulty as in xix, 17, 19, which Stähelin, as well as Knobel, gives to the

Jehovist. In the passages in chaps. vii, viii, ix, which Knobel classes in the earlier record, the name Jehovah occurs throughout. It is obvious, then, that there must be other means of determining the relative antiquity of the different portions of the book, or the attempt to ascertain which are earlier and which are later must entirely fail.

Accordingly, certain peculiarities of style are supposed to be characteristic of the two documents. Thus, for instance, De Wette (*Einl.* § 151, S. 183) appeals to חָסִים הָיָה בְּעַצְמָם ה' הוּזָהוּ, i, 7; פָּרַח וְרִבְבָה יְדִדְבָר יְרָ אֶל מֹשֶׁה לְאָמַר בְּרִיחַ, vi, 4; xxv, i; xxx, 11, etc.; צְבָאוֹת, vi, 26; vii, 4; xii, 17, 41, 51; בֵּין הַתְּרַבִּים, xii, 6; xxix, 41; xxx, 8, and other expressions, as decisive of the Elohist. Stähelin also proposes on very similar grounds to separate the first from the second legislation. "Wherever," he says, "I find mention of a pillar of fire, or of a cloud (Exod. xxxiii, 9, 10), or an 'angel of Jehovah,' as Exod. xxiii, xxiv, or the phrase 'flowing with milk and honey,' as Exod. xiii, 5; xxxiii, 3 . . . where mention is made of a coming down of God, as Exod. xix, xxxiv, 5, or where the Canaanitish nations are numbered, or the tabernacle supposed to be without the camp (Exod. xxxiii, 7), I feel tolerably certain that I am reading the words of the author of the second legislation (i. e. the Jehovist)." But these nice critical distinctions are very precarious, especially in a stereotyped language like the Hebrew.

Unfortunately, too, dogmatical prepossessions have been allowed some share in the controversy. De Wette and his school chose to set down everything which savored of a miracle as proof of later authorship. The love of the marvellous, which is all they see in the stories of miracles, according to them could not have existed in an earlier and simpler age. But on their own hypothesis this is a very extraordinary view; for the earlier traditions of a people are not generally the least wonderful, but the reverse; and one cannot thus acquit the second writer of a *design* in embellishing his narrative. However, this is not the place to argue with those who deny the possibility of a miracle, or who make the narration of miracles proof sufficient of later authorship. Into this error Knobel, it is true, has not fallen. By admitting some of the plagues into his Elohistie catalogue, he shows that he is at least free from the dogmatic prejudices of critics like De Wette. But his own critical tests are not conclusive. And the way in which he cuts verses to pieces, as in viii, 11, and xiii, 15, 16, 27, where it suits his purpose, is so completely arbitrary, and results so evidently from the stern constraint of a theory, that his labors in this direction are not more satisfactory than those of his predecessors.

On the whole, there seems much reason to doubt whether critical acumen will ever be able plausibly to distinguish between the original and the supplement in the book of Exodus. There is nothing indeed forced or improbable in the supposition either that Moses himself incorporated in his memoirs ancient tradition, whether oral or written, or that a writer later than Moses made use of materials left by the great legislator in a somewhat fragmentary form. There is an occasional abruptness in the narrative, which suggests that this may possibly have been the case, as in the introduction of the genealogy, vi, 13-27. The remarks in xi, 3; xvi, 35, 36, lead to the same conclusion. The apparent confusion at xi, 1-3 may be explained by regarding these verses as parenthetical. Inasmuch, however, as there exists no definite proof or knowledge of any later editor, except it be Joshua or Ezra, to whom isolated and unimportant additions may be attributed, we are not warranted in attributing the book to any other author than Moses. See PENTATEUCH.

III. *Credibility*.—Almost every historical fact mentioned in Exodus has at some time or other been called

in question; but it is certain that all investigation has hitherto only tended to establish the veracity of the narrator. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, for instance, Manetho's story of the Hyksos, questionable as much of it is, and differently as it has been interpreted by different writers, points at least to some early connection between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that, at the time of the Israelitish sojourn, Egypt was ruled by a foreign dynasty. See EGYPT. Manetho speaks, too, of strangers from the East who occupied the eastern part of Lower Egypt; and his account shows that the Israelites had become a numerous and formidable people. According to Exod. xii, 37, the number of men, besides women and children, who left Egypt was 600,000. This would give for the whole nation about two millions and a half. There is no doubt some difficulty in accounting for this immense increase, if we suppose (as on many accounts seems probable) that the actual residence of the children of Israel was only 215 years. We must remember, indeed, that the number who went into Egypt with Jacob was considerably more than "threescore and ten souls" [see CRYPTOLOGY]; we must also take into account the extraordinary fruitfulness of Egypt (concerning which all writers are agreed—Strabo, xv, 478; Aristot. *Hist. Anim.* vii, 4; Pliny, *H. N.* vii, 3; Seneca, *Qu. Nat.* iii, 25, quoted by Hävernick), and especially of that part of it in which the Israelites dwelt; and, finally, we must take into the account the "mixed multitude" that accompanied the Israelites (Exod. xii, 38).

According to De Wette, the story of Moses's birth is mythical, and arises from an attempt to account etymologically for his name. But the beautiful simplicity of the narrative places it far above the stories of Romulus, Cyrus, and Semiramis, with which it has been compared (Knobel, p. 14). As regards the etymology of the name, there can be very little doubt that it is Egyptian (from the Copt. *mo*, "water," and *si*, "to take"), and if so, the author has merely played upon the name. But this does not prove that the whole story is nothing but a myth. Philology as a science is of very modern growth, and the truth of history does not stand or fall with the explanation of etymologies. The same remark applies to De Wette's objection to the etymology in ii, 22.

Other objections are of a very arbitrary kind. Thus Knobel thinks the command to destroy the male children (i, 15 sq.) extremely improbable, because the object of the king was not to destroy the people, but to make use of them as slaves. To require the midwives to act as the enemies of their own people, and to issue an injunction that every son born of Israelitish parents should be thrown into the Nile, was a piece of downright madness of which he thinks the king would not be guilty. But we do not know that the midwives were Hebrew; they may have been Egyptian; and kings, like other slave-owners, may act contrary to their interest in obedience to their fears or their passions; indeed, Knobel himself compares the story of king Bochoris, who commanded all the unclean in his land to be cast into the sea (Lysim. ap. Josephus, c. *Apion.* i, 34), and the destruction of the Spartan helots (Plutarch, *Lycorg.* 28). He objects further that it is not easy to reconcile such a command with the number of the Israelites at their exode. But we suppose that in very many instances the command of the king would be evaded, and probably it did not long continue in force.

Again, De Wette objects to the call of Moses that he could not have thus formed the resolve to become the saviour of his people, which, as Hävernick justly remarks, is a dogmatical, not a critical decision.

It has been alleged that the place, according to the

original narrative, where God first appeared to Moses was Egypt, God making himself known as Jehovah, that being the first intimation of the name (Exod. vi, 2). Another account, it is further alleged, places the scene at Horeb (ch. iii, 2), God appearing as the God of the patriarchs (ver. 6), and declaring his name Jehovah (ver. 14); while a third makes Midian the scene of the interview (ch. iv, 19). These assumptions require no refutation. It need only be remarked that the name Jehovah in ch. vi, 2 necessarily presupposes the explanation given of it in chap. iii, 14. Further, Moses's abode in Midian, and connection with Jethro, were matters, Knobel affirms, quite unknown to the older writer, while his statement that Moses was eighty years old when he appeared before Pharaoh (chap. vii, 7), is declared irreconcilable with the supplementary narrative which represents him as a young man at the time of his flight from Egypt (ch. ii, 11), and a son by Zipporah, whom he married probably on his arrival in Midian, is still young when he returned to Egypt (ch. iv, 20, 25; xviii, 2). There can be no question that from Moses's leaving Egypt till his return thither a considerable time elapsed. It is stated in Exod. ii, 23 as "many days," and by Stephen (Acts vii, 30) as forty years. But it is not necessary to suppose that his abode in Midian extended over the whole of that period. The expression *וַיֵּשֶׁב*, "he sat down," or settled (Exod. ii, 15), may only point to Midian as the end of his wanderings; or if otherwise, his marriage need not have followed immediately on his arrival, or there may have been a considerable interval between the birth of his two sons. The silence, indeed, of this part of the narrative regarding the birth of the second son may possibly be referrible to this circumstance, more probably indicated, however, by the different feelings of the father as expressed in the names Gershom and Eliezer (ch. ii, 22; xviii, 4). The order of these names is perplexing to expositors who conceive that the first thoughts of the fugitive would have been thankfulness for his safety, and that only afterwards would spring up the feelings of exile. But if the name Eliezer was bestowed in connection with the preparation to return to Egypt, and particularly with the intimation "all the men are dead which sought thy life" (ch. iv, 19), the whole is strikingly consistent. Another instance of the alleged discrepancies is that, according to one account, Moses's reception from his brethren was very discouraging (chap. vi, 9), whereas the other narrative describes it as quite the reverse (ch. iv, 31). De Wette calls this a striking contradiction, but it is only such when the intermediate section (ch. v, 19-23), which shows the change that in the interval had occurred in the prospects of the Israelites, is violently ejected from the narrative—a process fitted to produce contradictions in any composition. See MOSES.

The only alleged anachronism of importance in this book is the remark relative to the continuance of the manna (chap. xvi, 35), which would seem to extend it beyond the time of Moses, particularly when compared with Josh. v, 11, 12, according to which the manna ceased not until after the passage of the Jordan. But, as remarked by Hengstenberg, it is not of the cessation of the manna that the historian here writes, but of its continuance. Besides, "forty years" must be taken as a round number, for the manna, strictly speaking, lasted about one month less (ch. xvi, 1). See MANNA.

The ten plagues are physically, many of them, what might be expected in Egypt, although in their intensity and in their rapid succession they are clearly supernatural. Even the order in which they occur is an order in which physical causes are allowed to operate. The corruption of the river is followed by the plague of frogs. From the dead frogs are bred the gnats and flies; from these came the murrain among the cattle

and the boils on men; and so on. Most of the plagues, indeed, though of course in a much less aggravated form, and without such succession, are actually experienced at this day in Egypt. Of the plague of locusts it is expressly remarked that "before them were no such locusts, neither after them shall be such." And all travellers in Egypt have observed swarms of locusts, brought generally by a south-west wind (Denon, however, mentions their coming with an east wind), and in the winter or spring of the year. This last fact agrees also with our narrative. Lepsius speaks of being in a "regular snow-drift of locusts," which came from the desert in hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." This continued for six days, indeed in weaker flights much longer. He also saw *hail* in Egypt. In January, 1843, he and his party were surprised by a storm. "Suddenly," he writes, "the storm grew to a tremendous hurricane, such as I have never seen in Europe, and hail fell upon us in such masses as almost to turn day into night." He notices, too, an extraordinary cattle *murrain* "which carried off 40,000 head of cattle" (*Letters from Egypt*, Eng. transl. p. 49, 27, 14). See PLAGUES (OF EGYPT).

The institution of the Passover (ch. xii) has been subjected to severe criticism. This has also been called a mythic fiction. The alleged circumstances are not historical, it is said, but arise out of a later attempt to explain the origin of the ceremony and to refer it to the time of Moses. The critics rest mainly on the difference between the directions given for the observance of this the first, and those given for subsequent passovers. But there is no reason why, considering the very remarkable circumstances under which it was instituted, the first Passover should not have had its own peculiar solemnities, or why instructions should not then have been given for a somewhat different observance for the future. See PASSOVER.

In minor details the writer shows a remarkable acquaintance with Egypt. Thus, for instance, Pharaoh's daughter goes to the river to bathe. At the present day, it is true that only women of the lower orders bathe in the river. But Herodotus (ii, 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but apparently lived more in public than the men. To this must be added that the Egyptians supposed a sovereign virtue to exist in the Nile-waters. The writer speaks of chariots and "chosen chariots" (xiv, 7) as constituting an important element in the Egyptian army, and of the king as leading in person. The monuments amply confirm this representation. The Pharaohs lead their armies to battle, and the armies consist entirely of infantry and chariots. See CHARIOT.

As the events of this history are laid in Egypt and Arabia, we have ample opportunity of testing the accuracy of the Mosaic accounts, and surely we find nowhere the least transgression against Egyptian institutions and customs; on the contrary, it is most evident that the author had a thorough knowledge of the Egyptian institutions and of the spirit that pervaded them. Exodus contains a mass of incidents and detailed descriptions which have gained new force from the modern discoveries and researches in the field of Egyptian antiquities (comp. Hengstenberg, *Die Bücher Moses und Ägypten*, Berlin, 1841). The description of the passage of the Israelites through the desert also evinces such a thorough familiarity with the localities as to excite the utmost respect of scrupulous and scientific travellers of our own time for the authenticity of the Pentateuch (comp. *ex. gr.* Kaumer, *Der Zug der Israeliten aus Ägypten nach Canaan*, Leipz. 1837).

The arrangements of the tabernacle, described in the second part of Exodus, likewise throw a favorable light on the historical authenticity of the preceding events; and the least tenable of all the objections against it are, that the architectural arrangements of

the tabernacle were too artificial, and the materials and richness too costly and precious for the condition and position of the Jews at that early period, etc. But the critics seem to have overlooked the fact that the Israelites of that period were a people who had come out from Egypt, a people possessing wealth, Egyptian culture and arts, which we admire even now, in the works which have descended to us from ancient Egypt; so that it cannot seem strange to see the Hebrews in possession of the materials or artistic knowledge requisite for the construction of the tabernacle. Moreover, the establishment of a tent as a sanctuary for the Hebrews can only be explained from their abode in the desert, being in perfect unison with their then roving and nomadic life; and it is therefore a decided mistake in those critics who give to the sacred tent a later date than the Mosaic; while other critics (such as De Wette, Von Bohlen, Vatke) proceed much more consistently with their views by considering the narrative of the construction of a sacred tabernacle to be a mere fiction in Exodus, introduced for the purpose of ascribing to the Temple of Solomon a higher antiquity and authority. However, independently of the circumstance that the Temple necessarily presupposes the existence of a far older analogous sanctuary, the whole process of such a forced hypothesis is but calculated to strike out a portion from the Jewish history on purely arbitrary grounds.

The extremely simple and sober style and views throughout the whole narrative afford a sure guarantee for its authenticity and originality. Not a vestige of a poetical hand can be discovered in Exod. xviii; not even the most sceptical critics can deny that we tread here on purely historical ground. The same may fairly be maintained of ch. xx-xxiii. How is it then possible that one and the same book should contain so strange a mixture of truth and fiction as its opponents assert to be found in it? The most striking proofs against such an assumption are, in particular, the accounts, such as in Exod. xxxii sq, where the most vehement complaints are made against the Israelites, where the high-priest of the covenant-people participates most shamefully in the idolatry of his people. All these incidents are described in plain and clear terms, without the least vestige of later embellishments and false extolling of former ages. The Pentateuch, some critics assert, is written for the interest and in favor of the hierarchy; but can there be more anti-hierarchical details than are found in that book? The whole representation indicates the strictest impartiality and truth.—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

IV. The *authorship and date* of the book will be discussed under PENTATEUCH.

V. *Commentaries, etc.*—The following is a list of exegetical helps on the whole book, the most important being designated by an asterisk (\*) prefixed: Origen, *Commentarii* (in *Opp.* ii, 110); *Selecta* (ib. ii, 121); also *Homilæ* (ib. ii, 129); Ephraem Syrus, *Explanatio* (in his *Opp.* iv, 194); Isidore, *Commentaria* (in his *Opp.*); Theodoret, *Questiones* (in his *Opp.* i, 1); Hugo à St. Victoire, *Adnotationes* (in his *Opp.* i); Aben-Esra, *Commentar.* (Prague, 1840, 8vo); Bede, *Explanatio* (in his *Opp.* iv); *Questiones* (ib. viii); Rupert, *In Exod.* (in his *Opp.* i, 150); Zuingle, *Adnotationes* (Tigurini, 1527); Brent, *Commentatio* (in his *Opp.* i); Ziegler, *Commentarii* (Basil. 1540, fol.); Phrygius, *Commentarius* (Tub. 1543, 4to); Lippoman, *Catena* (Par. 1550; Leyd. 1657, fol.); Chytraeus, *Enarrationes* (Vitemb. 1556, 1563, 1579, 8vo); Galasius, *Commentarius* (Genev. 1560, fol.); Strigel, *Commentarius* (Lips. 1566, 1572; Brem. 1585, 8vo); Simler, *Commentarius* (Tigur. 1584, 1605, fol.); Ystella, *Commentaria* (Rom. 1601, fol.); Pererius, *Disputationes* (Ingolst. 1601, 4to); \*Mechilta, *Commentarius* (in Ugolini *Theaurus*, xiv); Willet, *Conventio* (London, 1608, 1622, 2 vols. fol.); Rung, *Prolectiones* (Vitemb. 1614, 8vo); Babington, *Notes* (in *Works*, p.

165); Reuter, *Commentarius* (Francf. 1616, 4to); \*Rivet, *Commentarii* (L. B. 1634, 4to); Jackson, *Paraphrase* (in *Works*, ix, 384); De la Haye, *Commentarii* (Paris 1639, 1641, 2 vols. fol.); Lightfoot, *Cleanings* (London, 1643, 4to); Sylvius, *Commentarius* (Duac. 1644, 4to); Cartwright, *Adnotationes* (Lond. 1653, 8vo); Calixtus, *Erpösio* (Helmst. 1641, 1654, 4to); Cocceius, *Observationes* (in his *Opp.*, i, 136); Hughes, *Erposition* (Lond. 1672, fol.); \*Patriek, *Commentary* (Lond. 1697, 4to); Hagemann, *Betrachtungen* (Brunsw. 1738, 4to); Torellius, *Animalversiones* (Lips. 1746, 4to); Haitsma, *Commentarii* (Franc. 1771, 4to); Hopkins, *Notes* (London, 1784, 4to); à St. Cruce, *Hermeneia* (Heidell. 1787, 4to); \*Horsley, *Notes* (in *Bib. Criticism*, i, 47); Cockburn, *Credibility*, etc. (Lond. 1809, 8vo); \*Rosenmüller, *Scholia* (Lips. 1822, 8vo); Newham, *Illustrations* (Lond. n. d. 8vo); Vizard, *Commentary* (London, 1838, 12mo); Buddicom, *Exodus* (2d ed. Liverp. 1839, 2 vols. 12mo); Trower, *Sermons* (Lond. 1843, 8vo); Kitto, *Illustration* (*Daily Bible Illust.*, ii); \*Bush, *Notes* (N. Y. 1852, 2 vols. 12mo); Cumming, *Readings* (Lond. 1853, 8vo); \*Kalisch, *Commentary* (London, 1853, 8vo); Osburn, *Israel in Egypt* (London, 1856, 12mo); \*Knobel, *Erklärung* (Lpz. 1857, 8vo); Howard, *Notes* (Camb. 1857, 8vo); \*Keil and Delitzsch, *Comment.* (from their *Bibelwerk*, Edinb. 1864, 8vo); \*Lange, *Comment.* (in his *Bibelwerk*, ii, Lpz. 1864, 8vo); \*Murphy, *Comment.* (Edinb. 1866, Andov. 1868, 8vo). See OLD TESTAMENT.

**Exomologesis** (ἔξομολόγησις, *confession*). The word was used in the ancient Church to denote not only confession in words, but also the various acts required of penitents to give expression to sorrow for sin, and resolution of amendment.

1. It is common with Romanist writers, when "they meet with the word *exomologesis* in any of the ancient writers, to interpret it as private or auricular confession, such as is now practised in the communion of that Church, and imposed upon men as absolutely necessary to salvation. But they who, with greater judgment and ingenuity among themselves, have more narrowly considered the matter, make no scruple to confess that the *exomologesis* of the ancients signifies a quite different thing, viz. the whole exercise of public penance, of which public confession was a noted part. The learned Albaspinæus very strenuously sets himself to refute this error in the writers of his own party. Cardinal Bellarmine, says he (*Observatt.*, lib. ii, cap. 26), and Baronius, and Maldonat in his controversies, and Pamelius in his commentaries upon Tertullian and Cyprian, lay it down as a certain truth that the fathers generally take the word *exomologesis* for private and auricular confession; but, having long and accurately considered all the places where it is mentioned, I cannot come in to their opinion. The fathers, adds he, always use this word when they would describe the external rites of penance, viz. weeping, and mourning, and self-accusation, and other the like things, which penitents usually practised in the course of public penance" (Bingham, *Orig. Eccles.*, bk. xviii, ch. iii).

2. So anxious was the primitive Church to preserve the voluntary character of penance, that it was deemed unlawful to exhort or invite any one to submit to this kind of discipline. It was required that the offenders should seek it as a favor, and should supplicate for admission among the penitents. The following are the duties or burdens imposed upon them. Penitents of the first three classes—the mourners (*flentes*), the hearers (*audientes*), the kneelers or prostrators (*genuflectentes* or *substrati*)—were never allowed to stand during public prayers, but were obliged to kneel. Open and public confession before the whole church was to be made with lamentations, tears, and other expressions of grief, and these were to be often repeated. All ornaments of dress were to be laid aside, and all expressions of joy or pleasure to be abandoned. Male penitents were required to cut their hair and shave their beard in token of sorrow, and females

were to appear with their hair dishevelled, and wearing a veil. During the whole time of penance the candidates were required to abstain from bathing, feasting, and corporeal pleasures lawful at other times. They were forbidden to marry during this period of humiliation. In addition, they were obliged to be present at every religious ceremony, and to perform works of love and charity, particularly almsgiving. They were also expected to perform the office of the *parabolani* in visiting and relieving the sick and burying the dead (Riddle, *Christian Antiquities*, bk. iv, ch. iv).

3. The greater litanies are sometimes termed *exomologeses*, confessions; because fasting, and weeping, and mourning, and confession of sins was usually joined with supplication to avert God's wrath and reconcile him to a sinful people (Bingham, *Orig. Eccles.*, bk. xiii, ch. i, § 11).

**Exorcism, Exorcist** (ἔξορκιστής, Acts xix, 13). I. In General.—The belief in dæmoniacal possessions, which may be traced in almost every nation, has always been attended by the professed ability, on the part of some individuals, to release the unhappy victims from their calamity. In Greece, men of no less distinction than both Epicurus (Diog. Laertius, x, 4) and Æschines were sons of women who lived by this art, and both were bitterly reproached, the one by the Stoics, and the other by his great rival orator Demosthenes (*De Cor.*), for having assisted their parents in these practices. In some instances this power was considered as a divine gift; in others it was thought to be acquired by investigations into the nature of dæmons and the qualities of natural productions, as herbs, stones, etc., and of drugs compounded of them, by the use of certain forms of adjurations, invocations, ceremonies, and other observances. Indeed, the various forms of exorcism, alluded to in authors of all nations, are innumerable, varying from the bloody human sacrifice down to the fumes of brimstone, etc. See SORCERY.

II. In the Old and New Testaments.—The verb ἔξορκίζω occurs once in the New Testament and once in the Sept. version of the Old Testament. In both cases it is used, not in the sense of *exorcise*, but as a synonym of the simple verb ὀρκίζω, to charge with an oath, to adjure. Compare Gen. xxiv, 3 (עָרַבְתִּיךָ, A. V. "I will make thee swear") with 37, and Matt. xxvi, 63 with Mark v, 7; and see 1 Thess. v, 27 (ἐνορκίζω, Lachmann, Tischendorf). The cognate noun, however, together with the simple verb, is found once (Acts xix, 13) with reference to the ejection of evil spirits from persons possessed by them (comp. ἔξορκωσις, ὀρκίζω, Josephus, *Ant.*, viii, 2, 5). The use of the term exorcists in that passage, as the designation of a well-known class of persons to which the individuals mentioned belonged, confirms what we know from other sources as to the common practice of exorcism amongst the Jews (see the Talm. *Babyl. Yoma*, fol. lviii, 1). That some, at least, of them not only pretended to, but possessed the power of exorcising, appears by our Lord's admission when he asks the Pharisees, "If I by Beelzebub cast out devils, by whom do your disciples (*υἱοί*) cast them out?" (*Matt.*, xii, 27). What means were employed by real exorcists we are not informed. David, by playing skilfully on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xvi, 23). The power of expelling dæmons Josephus places among the endowments of Solomon, and relates that he *l fl behind him* the manner of using exorcisms by which they drive away dæmons (for the pretended fragments of these books, see Fabricius, *Cod. Pseud. Vet. Test.*, p. 1054). He declares that he had seen a man, named Eleazar, releasing people that were dæmoniacal, in the presence of Vespasian, his sons, captains, and the whole multitude of his soldiers. He describes the manner of cure thus: "He put a ring that had a *root* of one of those sorts mentioned by Solomon to the nos-

trils of the *dæmoniac*; after which he drew out the *dæmon* through his nostrils, and when the man fell down he adjured him to return no more, making still mention of Solomon and reciting the incantations he composed." He further adds, that when Eleazar would persuade and demonstrate to the spectators that he had such a power, he set a cup or basin full of water a little way off, and commanded the *dæmon* as he went out of the man to overturn it, and thereby to let the spectators know he had left the man (*Ant.* viii, 2, 5). He also describes the mode of obtaining the root *baaras*, which, he says, "if it be only brought to sick persons, it quickly drives away the *dæmons*," under circumstances which, for their strangeness, may vie with any prescription in the whole science of exorcism (*War*, vii, 6, 3). Among all the references to exorcism, as practised by the Jews, in the New Testament (*Matt.* xii, 27; *Mark* ix, 38; *Luke* ix, 49, 50), we find only one instance which affords any clew to the means employed (*Acts* xix, 13); from which passage it appears that certain professed exorcists took upon them to call over a *dæmoniac* the name of the Lord Jesus, saying, "We adjure you by Jesus whom Paul preacheth." Their proceeding seems to have been in conformity with the well-known opinions of the Jews in those days, that miracles might be wrought by invoking the names of the Deity, or angels, or patriarchs, etc., as we learn from Justin Martyr, Irenæus, Origen, etc., and Lucian (*Frag.* p. 141). The epithet applied in the above text to these exorcists (*περιοχόμενοι*, Vulgate, *circumvenientes Judæi*) indicates that they were travelling mountebanks, who, besides skill in medicine, pretended to the knowledge of magic. Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the God of Abraham, Isaac, and Jacob (*Dial. cum Tryph.* c. 85, p. 311, C. See also *Apol.* II, c. 6, p. 45, B, where he claims for Christianity superior but not necessarily exclusive power in this respect. Compare the statements of Irenæus, *adv. Hæres.* ii, 5, and the authorities quoted by Grotius on *Matt.* xii, 27). But Justin goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen (*comp.* Pliny, xxx, 2). See *DEMON*.

The power of casting out devils was bestowed by Christ while on earth upon the apostles (*Matt.* x, 8), and the seventy disciples (*Luke* x, 17-19), and was, according to his promise (*Mark* xvi, 17), exercised by believers after his ascension (*Acts* xvi, 18); but to the Christian miracle, whether as performed by our Lord himself or by his followers, the N.-T. writers never apply the terms "exorcise" or "exorcist." Nor is the office of the exorcist mentioned by Paul in his enumeration of the miraculous gifts (*1 Cor.* xii, 9). Mosheim says that the particular order of exorcists did not exist till the close of the third century, and he ascribes its introduction to the prevalent fancies of the Gnostics (*cent.* iii, 11, c. 4). We notice Jahn's remark upon the *silence* of John himself in his gospel on the subject of possessions, although he introduces the *Jews* as speaking in the customary way respecting *dæmons* and *dæmoniacal* possessions, and although he often speaks of the sick who were healed by the Saviour; coupled with the fact that John wrote his gospel in Asia Minor, where *medical science* was very flourishing, and where it was generally known that the diseases attributed to *dæmons* were merely natural diseases (Jahn, *Archæol.* I, ii, 232, 477-480; see also Lomeirus, *De Vet. Gent. Lustra.*; Bekker, *Le Monde enchanté*; Van Dale, *De divinât. idol.* c. vi, p. 519 sq.; Annell, *Diss. ad loc. in Actis*, Upsal. 1758).—Kitto, s. v.; Smith, s. v.

III. *In the early Church.*—1. As Christians were supposed to be in constant conflict with the devil, they used not only prayer, but also *exorcism*, which was held to be a power given to the Church. Thus Tertullian (A. D.

220), speaking of the warfare of the Christian soldier (*De Corona Milit.* c. 11) with *dæmons*, says *exorcismis fugavit* (he routs them with exorcisms). So in his *Apologeticus* (c. 23) he says that the "evil spirit will confess himself to be a *dæmon* when commanded to speak by any Christian" (*Jussus a quolibet Christiano*). So also Origen, *cont. Celsum*, lib. vi, *ἰδιῶτα τὸ τοιοῦτον πᾶρτρουαι* (the common unlettered people do the same). "Oh, could you but hear," says Cyprian (*Ep.* 76), "and see those *dæmons* when they are tortured by us, and afflicted with spiritual chastisement and *vehal* anguish, and thus ejected from the bodies of the possessed (*obsessorum*), moaning and lamenting with human voice, through the power divine, as they feel the rods and stripes they confess the judgment to come. The exorcists rule with commanding right over the whole army of the insolent adversary. Oftentimes the devil promises to depart, but departs not; but when we come to baptism, then indeed we ought to be assured and confident, because the *dæmon* is then oppressed, and the man is consecrated to God and liberated." The invocation of Christ, attended by the sign of the cross, and pronounced by persons formally appointed to the office, was the method by which those stupendous effects were usually produced; and one among the many evils which proceeded from this absurd practice was an opinion, which gained some prevalence among the less enlightened converts, that the object of Christ's mission was to emancipate mankind from the yoke of their invisible enemy, and that the promised *redemption* was nothing more than a sensible liberation from the manifest influence of evil spirits" (*Waddington, Church History*, ch. xliii). The *Apostolical Constitutions*, viii, 26, says: "An exorcist is not appointed, for the prize pertaineth to voluntary goodness and the grace of God, through Christ, by the influence of the Holy Spirit; for he who hath received the gift of healing is declared by revelation from God, the grace that is in him being manifest unto all. But if there be need of him for a bishop, or presbyter, or deacon, he is appointed accordingly." Thus it appears (1) that the power of casting out devils was held to exist in the Church; (2) that as late as the third century it was not held to belong exclusively to the clergy, but to the whole Church, or at least to some among the laity. The use of exorcism seems to have been at first confined to the case of persons "possessed with devils," *ἐνεργούμενοι*, who were given into the care of persons set apart for the purpose (*Cyprian, Epist.* 75, 76). See *ENERGUMENS*. But Cyprian also speaks here of baptismal exorcism (see below).

2. *Exorcists.*—A special order of exorcists arose as early as the third century. Before that time, although, as has been seen, the power of exorcising was held to be a spiritual gift common to all classes in the Church, it yet appears to have been chiefly exercised by the clergy. On the date of the rise of the order of exorcists, and of their ordination and office, Bingham (*Orig. Eccles.* bk. iii, ch. iv) speaks as follows: "I take Bona's opinion to be the truest, that it came in upon the withdrawing (*Rerum Liturg.* lib. i, c. xxv, note. 17) of that extraordinary and miraculous power, which probably was by degrees, and not at the same time in all places. Cornelius (*ap. Euseb.* lib. vi, c. xliii), who lived in the third century, reckons exorcists among the inferior orders of the Church of Rome; yet the author of the *Constitutions*, who lived after him, says it was no certain order (*Constit. Apost.* lib. viii, c. xxvi), but God bestowed the gift of exorcising as a free grace upon whom he pleased; and therefore, consonant to that hypothesis, there is no rule among those *Constitutions* for giving any ordination to exorcists, as being appointed by God only, and not by the Church. But the credit of the *Constitutions* is not to be relied upon in this matter; for it is certain by this time exorcists were settled as an order in most parts of the Greek Church, as well as the Latin; which is evident from

the Council of Antioch, A.D. 341, in one of whose canons (*Conc. Antioch. c. x*) leave is given to the *chorepiscopi* to promote subdeacons, readers, and exorcists, which argues that those were then all standing orders of the Church. After this exorcists are frequently mentioned among the inferior orders by the writers of the fourth century, as in the Council of Laodicea (*Conc. Laodic. c. xxiv and xxvi*), Epiphanius (*Expos. Fid. note 21*), Paulinus (*Natal. iv, S. Felicis.*), Sulpicius Severus (*Vit. S. Martin. c. v*), and the Rescripts of Theodosius (*Cod. Theodos. lib. xii, tit. i, De Decurione Leg. 121*), and Gratian (*id. ib. lib. xvi, tit. ii, De Episc. Leg. 24*) in the Theodosian Code, where those emperors grant them the same immunities from civil offices as they do to the other orders of the clergy. Their ordination and office is thus described by the fourth Council of Carthage (*Conc. Carth. iv, c. vii: Exorcista quum ordinator, accipiat de manu episcopi libellum, in quo scripti sunt exorcismi, dicente sibi episcopo: Accipe et commenda memorie, et habeto potestatem imponendi manus super energumenum, sive baptizatum, sive catechumenum*): "When an exorcist is ordained, he shall receive at the hands of the bishop a book, wherein the forms of exorcising are written, the bishop saying, Receive thou these and commit them to memory, and have thou power to lay hands upon the energumens, whether they be baptized or only catechumens." These forms were certain prayers, together with adjurations in the name of Christ, commanding the unclean spirit to depart out of the possessed person, which may be collected from the words of Paulinus concerning the promotion of St. Felix to this office, where he says (*Natal. iv, S. Felicis. : Primis lector servivit in annis, inde gradum cepit, cui munus voce fidei adjurare malos, et sacris pellere verbis*), from a reader he arose to that degree whose office was to adjure evil spirits, and to drive them out by certain holy words. It does not appear that they were ordained to this office by any imposition of hands either in the Greek or Latin Church; but yet no one might pretend to exercise it either publicly or privately, in the church or in any house, without the appointment of the bishop, as the Council of Laodicea directs (*Conc. Laod. c. xxvi*); or at least the license of a *chorepiscopus*, who in that case was authorized (*Concil. Antiochen. cap. x*) by the bishop's deputation."

3. *Exorcism in Baptism.*—In the third century (at least after the Council of Carthage, A.D. 256) we find exorcism used in the catechumenate in preparation for baptism, and also as part of the ordinary ceremony of baptism. Riddle (*Christian Antiquities, bk. iv, ch. ii*) gives the following view of its origin: "Baptism, as the sacrament of the Holy Ghost, contributes to deliver men from the power of Satan and evil spirits; and hence it appears expedient and right at the reception of that rite to renounce the devil and his works. And when the number of candidates for baptism was multiplied from among the heathen, who are spoken of in Scripture as in a peculiar sense sinners (Gal. ii, 15), and who were regarded as being especially under the power of the prince of darkness, it seemed more particularly needful that admission into the Gospel Church—the kingdom of heaven—should be preceded by a formal abjuration of all heathen and superstitious practices or worship; in one word, by a renunciation of Satan. Such appears to be the most natural and simple account of the origin of exorcism at baptism in the Christian Church. Justin Martyr, the first uninspired writer who describes Christian baptism, knew nothing of this practice, although he was not unacquainted with the custom of exorcising evil spirits in the case of persons possessed. Tertullian, however, treats expressly of this matter, and says that the practice of renouncing the devil on occasion of baptism is founded not on Scripture, but on tradition (*De Corona Mil. c. iii*). Cyprian also treats of baptismal exorcism (*Ep. lxxvi, ad Magn.*). At first, indeed, this cere-

mony was confined to a renunciation of 'the devil and all his works' on the part of the person about to be baptized; and it was not until the fourth century that a form of abjuration by the officiating minister, commanding the evil spirit to depart from the new servant of Christ, was brought into use. And hence it is that some writers, making a distinction between the renunciation (*ἀπορρηγή*, *abrenuntiatio*) and exorcism (*ἐξορκισμός*), contend that the practice of exorcism was altogether unknown until the fourth, or, as others say, the seventh century. The fact, however, appears to be, that these customs are substantially one and the same, differing only in form. And the true state of the case with respect to baptismal exorcism appears to be as follows: 1. In the first century we find no trace of a renunciation of the devil in baptism. 2. In the second and third centuries this practice was in use, as appears from the testimonies of Tertullian and Cyprian, as well as of later writers who appeal to tradition. 3. In the fourth century the fathers speak of exorcism as not being highly expedient, inasmuch as, without it, children would not be free from the influence of evil spirits (Optat. Milev. *De Schism. Donat. lib. iv, c. vi*; Basil. M. *De Spiritu Sancto, c. xxxvii*; Gregor. Naz. *Orat. xl*). We find mention of baptismal exorcism also in the canons of the Council of Carthage held in the year 256, and those of the first Council of Constantinople, A.D. 381. The exorcists, who were concerned at first only with the energumens, or persons possessed, were afterwards called upon to assist at the baptism of all adults; but, as infant baptism gained ground, the duties of this office became superfluous, and they are very rarely mentioned in works posterior to the sixth century."

Cyril of Jerusalem († 386) gives a somewhat detailed account of the form of exorcism. The ceremonies used were: 1. Preliminary fasting, prayers, and genuflections. These, however, may be regarded as general preliminaries to baptism. 2. Imposition of hands upon the head of the candidate, who stood with his head bowed down in a submissive posture. 3. Putting off the shoes and clothing, with the exception of an under garment. 4. Facing the candidate to the west, which was the symbol of darkness, as the east was of light. In the Eastern Church he was required to thrust out his hand towards the west, as if in the act of pushing away an object in that direction. This was a token of his abhorrence of Satan and his works, and his determination to resist and repel them. 5. A renunciation of Satan and his works thus: 'I renounce Satan and his works, and his pomps and his services, and all things that are his.' This or a similar form was thrice repeated. 6. The exorcist then breathed upon the candidate either once or three times, and adjured the unclean spirit in the name of the Father, Son, and Holy Ghost, to come out of him. This form of adjuration seems not to have been in use until the fourth century; and these several formalities were apparently introduced gradually and at different times. The whole ceremony was at first confined to the renunciation of 'the devil and his works' on the part of the person about to be baptized (Coleman, *Christian Antiquities, ch. xiv, § 9*; Riddle. *l. c.*).

IV. *Roman Catholic Church.*—In the Roman Catholic Church exorcists constitute one of the four minor orders of the clergy—acolytes, exorcists, readers, porters (*Council of Trent, sess. xxiii, chap. ii, of Orders*). When initiating the exorcist the bishop gives him a book containing the exorcisms (or the Missal), and says, "*Accipe et commenda memorie, et habeto potestatem imponendi manus super energumenum, sive baptizatum sive catechumenum*" (Take this and commit it to memory, and have power to impose hands on persons possessed, be they baptized or catechumens). Every candidate for priests' orders in the Roman Church first receives the four lower orders, including that of exorcist. The process of exorcising water for baptism is

given under BAPTISM (vol. i, p. 650, col. 2). Children are regarded as belonging to the devil until baptized, and the priest or assisting exorcist blows out the evil spirit by the breath (*exsufflation*), and also breathes on the child again (*insufflation*), as a symbol of the gift of the Spirit. So the *Rituale*: "Sacerdos exsufflat ter in faciem catechumeni, semel dicens: Exi ab eo (ea), spiritus immunde, et da locum Spiritui Sancto Paraclyto. Hic in modum crucis halet in faciem ipsius dicit: Accipe Spiritum bonum per istam insufflationem, et Dei benedictionem. † Pax tibi." In cases where the priest is to practise exorcism on a person supposed to be "possessed of the devil," he is to prepare himself specially by prayer, fasting, confession, and mass. The ceremony may be performed in the church, or, if the sufferer be ill, at his house; but there must always be witnesses present. "Here, arrayed in robe, cope, and a blue stole, he first sprinkles the subject with holy water, and, kneeling down, prays the All Saints' litany, the Lord's prayer, and Psalm liii, *Deus in nomine tuo* (in our version Psalm liv); then two prayers in which, making the sign of the cross over the patient, he commands the evil spirit to depart, by the mysteries of the incarnation, the suffering and death, the resurrection and ascension of Christ, the sending of the Spirit, and the coming again to judgment. Thereupon follows the lesson from John i, *In principio erat Verbum*, with Mark xvi, 15-18, and Luke x, 17-19. Then he lays both hands upon the head of the exorcism, saying, 'Ecce crucem Domini: fugite partes adverse: viciit leo de tribu Juda,' and the prayer follows, with the proper formula of exorcism (*Exorcizo te, immunde spiritus*, etc.): 'I exorcise thee, unclean spirit, in the name of Jesus Christ; tremble, O Satan! thou enemy of the faith, thou foe of mankind, who hast brought death into the world, who hast deprived men of life, and hast rebelled against justice; thou seducer of mankind, thou root of all evil, thou source of avarice, discord, and envy', the priest meanwhile making three crosses, in the name of the Trinity, on the brow and breast of the possessed person. If the evil spirit does not depart, all these ceremonies must be repeated. In regard to the *exorcism of things*, the view of St. Paul, that every creature of God, used with thanksgiving, is good, stands true at all times. But in consequence of the curse, which the first sin brought upon all nature, the Church of Rome exorcises beforehand things designed for sacred use, such as the *water* and *salt* required for holy water. Beasts also, horses, fields, and fruits, are so treated, more frequently in the Greek Church than in the Roman' (Herzog, *Encyclopaedia*, Bombarger's transl., i, 255). When a house is infested with evil spirits the priest is sent for, who, on his arrival, sprinkles the place plentifully with holy water, repeats some prayers, and then pronounces the form of exorcism, whereupon, it is supposed, the devils depart. Should they again return the ceremony of exorcism is repeated, and again if necessary, until at length the Church proves itself victorious over the powers of hell (*Encycl. Metropolitana*; see also Jeremy Taylor, *Dissuasive from Popery*, § 9, for an account of the forms of exorcism; and the copious collection entitled *Thesaurus exorcismorum atque conjurationum terribilium, potentissimorum, efficacissimorum cum practica probatissima: quibus spiritus maligni, demones maleficeque omnia de corporibus humanis obsessis, tanquam flagellis fustibusque fugantur, expelluntur, doctrinis re-jertissimus atque uberrimus*, Coloniae, 1628, 8vo).

V. The Greek Church also continues the order of exorcists and the practice of exorcism. The exorcism of catechumens is designated *ἀφορκισμός*, and it is thrice administered in making a catechumen (see Eulogion, *cap. εἰχὴ εἰς τὸ ποιῆσαι κατηχούμενον*). Exorcism is also practised upon the baptism of infants. The priest, having received the child at the church door, marks him with the sign of the cross on the forehead, then carries him to the font, where, before his

immersion, he is exorcised. The ancient forms are preserved with very little change in modern use. Three forms are employed, which may be found in Schmitt, *Morgenländ.-griech.-russische Kirche* (Mainz, 1826, p. 141). In Assemani, *Codex Liturg.* ii, 318 sq., may be found twenty-one forms for exorcising the devil and all evil spirits. In Metrophanis Critopuli *Confessio* (1661), cap. vii, *de Ecclesia*, is the statement that baptism must be performed with prayers and exorcisms (*μετὰ εὐχῶν καὶ ἔξορκισμῶν*); also (*ἔχορευεν δὲ ἔξορκισμὸν παρὰ τῶν ἀρχαίων πατέρων θανησιῶς συνθεμίονον*) "we have forms of exorcism admirably prepared by the ancient fathers;" and in cap. xi, *de Sacerdotio*, he states the duty of the exorcists to be "to exorcise the catechumens and catechize them" (see Kimmel, *Monum. Fid. Eccles. Orient.* (Jena, 1840, 8vo).

VI. In *Protestant Churches*.—Luther approved of exorcism. In his *Taufbüchlein* he preserved the spirit of the Roman Catholic form of renunciation of the devil. He did not consider it as essential, but as very useful to "remind the people earnestly of the power of sin and the devil." The immediate successors of Luther adopted his views, and they were generally diffused in Saxony, Würtemberg, and the other strongly Lutheran parts of Germany (Siegel, *Alterthümer*, ii, 64; Wiedenfeld, *De Exorcismi Origine*, etc., Marburg, 1824). In 1583 Heshusius wrote in favor of abolishing its use. Justus Menius, in a treatise *Vom Exorcismo*, 1590, advocated its retention. Calvin (*Instit.* iv, 12, 19), speaking of the "wax taper" and "exorcism" as used by the Romanists in baptism, says, "I am not ignorant of the ancient origin of this adventitious medley, yet it is lawful for me, and for all the faithful, to reject everything that men have presumed to add to the institution of Christ." In the Swedish Church, when the Augsburg Confession was proclaimed anew at the Council of Upsala, 1593, exorcism was retained, in its milder expressions, "as a free ceremony, on account of its utility as an admonition to the audience looking on at the baptism" (Ranke, *History of the Papacy*, i, 11, Austin's transl., Edinb. 1851, 2 vols. 8vo). Zuinglius agreed with Calvin in rejecting exorcism, and from the beginning the Reformed Church was disinclined to it. The question became a sort of test between Lutherans and Calvinists. In the Crypto-Calvinistic struggles the question of exorcism played a part, and one of the accusations against Nicolas Crell (q. v.) was that he "sought to extirpate exorcism from the Church, to its great injury (see Boehmer, *Jus. Eccl. Protest.* iii, 843). Among later Lutheran theologians, Gerhard, Quenstedt, and Hollaz place it among things indifferent; Baur, Baumgarten, and Reinhard urge its abolition. From Reinhard's time it has gradually become obsolete in the Lutheran Church. Since 1822 the "High" Lutherans have attempted to revive its use.

In the *Church of England*.—In the first liturgy of Edward VI, a form of exorcism at baptism is given. The priest, looking upon the children, was to say, "I command thee, unclean spirit, in the name of the Father, the Son, and the Holy Ghost, that thou come out and depart from these infants, whom our Lord Jesus Christ has vouchsafed to call to his holy baptism, to be made members of his body and of his holy congregation. Therefore, thou accursed spirit, remember thy sentence, remember thy judgment, remember the day to be at hand wherein thou shalt burn in fire everlasting, prepared for thee and thy angels; and presume not henceforth to exercise any tyranny towards these infants whom Christ hath bought with his precious blood, and, by his holy baptism, calleth to be of his flock." See BAPTISM. Ducer's remonstrance against the indiscriminate use of the form of exorcism, on the ground that it would be uncharitable to suppose that all were demoniacs who came to be baptized, was listened to by the Reformers; for in their revision of the *Prayer-book*, in the 5th and 6th of Edward VI, they de-

ceded on omitting it altogether. The seventy-second canon of the Church of England forbids any minister attempting to expel a devil or devils, under pain of the imputation of imposture, and cozenage, and deposition from the ministry, except he first obtains the license of the bishop of his diocese, had under his hand and seal (Wheatly, *On Common Prayer*, chap. vii, § 2). In the form of baptism used in the Church of England, the Methodist Episcopal Church, and the Protestant Episcopal Church, the question is put to the candidate, "Dost thou renounce the devil and all his works?" etc. This is a remnant of the old form of renunciation (connected with the exorcism at the baptism of catechumens), but of exorcism itself there is nothing in their formularies.

*Literature.*—See, besides the works already cited, Suicer, *Theaurus*, s. v. ἀφορισμός, ἔξορκισμός; Stolle, *De Origine Exorcismi in Baptismo*; Augusti, *Denkwürdigkeiten*, vii, 268 sq.; Bingham, *Orig. Eccles.*, Bohu's ed., i, 435; ii, 110 sq.; Augusti, *Christl. Archaeologie*, ii, 427 sq.; iii, 402; Ferraris, *Promta Bibliotheca*, iii, 927 sq.; Kraft, *Ausführ. Hist. von Exorcismo* (Hamburg, 1750, 8vo); Elliott, *Delineation of Romanism*, bk. ii, ch. xv; Procter, *On Common Prayer*, p. 365.

**Exordium.** See HOMILETICS; SERMON.

**Expectancy** (Lat. *expectantia*, *expectiva*, *gratia expectativa*) in canon law, the name of a prospective claim to an ecclesiastical benefice which has not yet become vacant. At first the German emperors granted expectancies for the first place in every chapter that became vacant after their accession to the throne (*Jus prius precis*). After the eleventh century the popes granted expectancies at first in the shape of a request, and subsequently in the shape of an order. The expectancy was either for a definite benefice, or for any benefice of a certain class or chapter. The third Council of Lateran (1179), and later papal rescripts, forbade the expectancies, but the popes themselves continued to grant them. They were again restricted by the Council of Constance, and forbidden by the Council of Basel. The Council of Trent totally abolished them, except in cases of bishops and monastic superiors, to whom, in some specified cases, a coadjutor, with the right of succession, was given. In the Protestant state churches the princes have claimed the right to grant expectancies.—*Allgem. Real-Encykl.* i, 622; Herzog, *Real-Encykl.* iv, 292. (A. J. S.)

**Expectation Week**, the time between Ascension Day and Whitsunday, the period during which the apostles tarried at Jerusalem in expectation of the fulfilment of the Master's promise as to the outpouring of the Comforter.—Procter, *On Common Prayer*, p. 289.

**Expediency**, fitness of means to ends. On expediency as the ground of morals, see Dwight, *Theology*, ser. xcix; Robert Hall, *Complete Works*, i, 96; ii, 295; *Lit. and Theol. Review*, iv, 358; Wayland, in *Bibliotheca Sacra*, 1843, p. 301; and the article ETHICS.

**Experience** (δοκιμή, Rom. v, 4, "proof," as elsewhere rendered), approval of integrity as the result of trial. "The three stages of ὑπομονή, endurance, δοκιμή, approval, and ἔλπις, hope, are considered by the apostle as proceeding from the sufferings; the first denoting the state of moral earnestness implied in patient and faithful endurance, the second that state of approval as genuine which thence results, and bears within it hope as its blossom" (Olshausen, *Comment.* in loc.).

**EXPERIENCE.** I. *In Philosophy.*—"Experience, in its strict sense, applies to what has occurred within a person's own knowledge. Experience, in this sense, of course relates to the past alone. Thus it is that a man knows by experience what sufferings he has undergone in some disease, or what height the tide reached at a certain time and place. More frequently the word is used to denote that judgment which is de-

rived from experience in the primary sense, by reasoning from that in combination with other data. Thus a man may assert, on the ground of experience, that he was cured of a disorder by such a medicine—that that medicine is generally beneficial in that disorder; that the tide may always be expected, under such circumstances, to rise to such a height. Strictly speaking, none of these can be known by experience, but are conclusions from experience. It is in this sense only that experience can be applied to the future, or, which comes to the same thing, to any general fact; as, e. g. when it is said that we know by experience that water exposed to a certain temperature will freeze" (Wheatly, *Logic*, app. i).

Locke (*Essay on Human Understand.* bk. ii, ch. i) assigns experience as the only and universal source of human knowledge. "Whence hath the mind all the materials of reason and knowledge? To this I answer, in one word, from experience; in that all our knowledge is founded, and from that ultimately derives itself. Our observation, employed either about external sensible objects, or about the internal operations of our minds, perceived and reflected on by ourselves, is that which supplies our understanding with all the materials of thinking. These are the fountains of knowledge from whence all the ideas we have, or can naturally have, do spring—that is, sensation and reflection." In opposition to this view, according to which all human knowledge is *à posteriori*, or the result of experience, it is contended that man has knowledge *à priori*—knowledge which experience neither does nor can give, and knowledge without which there could be no experience, inasmuch as all the generalizations of experience proceed and rest upon it. "No accumulation of experiments whatever can bring a general law home to the mind of man, because, if we rest upon experiments, our conclusion can never logically pass beyond the bounds of our premises; we can never infer more than we have proved; and all the past, which we have not seen, and the future, which we cannot see, is still left open, in which new experiences may arise to overturn the present theory. And yet the child will believe at once upon a single experiment, as having been once burned by fire. Why? Because a hand divine has implanted in him the tendency to generalize this rapidly. Because he does it by an instinct of which he can give no account, except that he is so formed by his Maker" (Sewell, *Christian Mor.* ch. xxiv). "We may have seen one circle and investigated its properties, but why, when our individual experience is so circumscribed, do we assume the same relations of all? Simply because the understanding has the conviction intuitively that similar objects will have similar properties; it does not acquire this idea by sensation or custom; the mind develops it by its own intrinsic force—it is a law of our faculties, ultimate and universal, from which all reasoning proceeds" (Dr. Mill, *Essays*, p. 337).—Fleming, *Vocabulary of Philosophy*, s. v.

II. *In Religion.*—(1.) Knowledge gained by trial or practice. "A man unacquainted with those spiritual changes in the mind which are mentioned in the Scripture can form no notion of them. He may have some idea of the possibility of the changes called the new birth, sanctification, etc., but he does not understand their nature; they are foolishness to him. Nothing is more common with unregenerate persons than to ridicule as enthusiastic religious experience. But if the constitution of human nature is considered, it will be seen that man has emotions as well as intellect. His passions are original parts of his mental constitution, and must be exercised in religion. They cannot be destroyed. However beautiful religion may be as a theory, its excellency and energy can only be displayed as experienced. Hence the Bible employs the analogous terms *tasting*, *feeling*, to indicate the internal enjoyment of a Christian. He has peace through

believing. He joys in God, through whom he has received the atonement. The love of God is shed abroad in his heart. He is conscious that he is a new creature" (Farrar, *Bibl. Dict.* s. v.). "That our experience is always absolutely pure in the present state cannot be expected; but if it be genuine, it will not fail, through the exercise of Christian diligence, to become more and more pure. The main point, therefore, is to guard well against mistaking the illusions of the imagination for the operation of divine truth on the conscience and the heart (1 Thess. ii, 13). See AFFECTIONS. (2.) The most valuable things are most apt to be counterfeited. But Christian experience may be considered as genuine, 1. When it accords with the revelation of God's mind and will, or what he has revealed in his word. Anything contrary to this, however pleasing, cannot be sound, or produced by divine agency. 2. When its tendency is to promote humility in us; that experience by which we learn our own weakness, and to subdue pride, must be good. 3. When it teaches us to hear with others, and to do them good. 4. When it operates so as to excite us to be ardent in our devotion, and sincere in our regard to God. A powerful experience of the divine favor will lead us to acknowledge the same, and to manifest our gratitude both by constant praise and genuine piety. (3.) Christian experience, however, may be abused. There are some good people who certainly have felt and enjoyed the power of religion, and yet have not always acted with prudence as to their experience. 1. Some boast of their experiences, or talk of them as if they were very extraordinary; whereas, were they acquainted with others, they would find it not so. That a man may make mention of his experience is no way improper, but often useful; but to hear persons always talking of themselves seems to indicate a spirit of pride, and that their experience cannot be very deep. 2. Another abuse of experience is dependence on it. We ought certainly to take encouragement from past circumstances if we can; but if we are so dependent on past experience as to preclude present exertions, or always expect to have exactly the same assistance in every state, trial, or ordinance, we shall be disappointed. God has wisely ordered it that, though he never will leave his people, yet he will suspend or bestow comfort in his own time; for this very reason, that we may rely on him, and not on the circumstance or ordinance. 3. It is an abuse of experience when introduced at improper times and before improper persons. It is true, we ought never to be ashamed of our profession; but to be always talking to irreligious people respecting experience, which they know nothing of, is, as our Saviour says, casting pearls before swine" (Buck, *Theol. Dict.* s. v.).—Buck, *Treatise on Experience*; Gurnall, *Christian Armor*; Edwards, *On the Affections*; Doddridge, *Rise and Progress*; Wesley, *Sermons*.

EXPERIENCE, Hume's argument from. See HUME; MIRACLE.

**Experience Meetings** are assemblies of religious persons, who meet for the purpose of relating their experience to each other. They are sometimes called covenant and conference meetings, and, in the Methodist Church, *class-meetings* (q. v.). "It has been doubted by some whether these meetings are of any great utility, and whether they do not, in some measure, force people to say more than is true, and puff up those with pride who are able to communicate their ideas with facility; but to this it has been answered, 1. That the abuse of a thing is no proof of the evil of it. 2. That the most eminent saints of old did not neglect this practice (Psa. lvi, 16; Mal. iii, 16). 3. That by a wise and prudent relation of experience the Christian is led to see that others have participated of the same joys and sorrows with himself; he is excited to love and serve God; and animated to perseverance in

duty by finding that others, of like passions with himself, are zealous, active, and diligent. 4. That the Scriptures seem to enjoin the frequent intercourse of Christians for the purpose of strengthening each other in religious services (Heb. x, 24, 25; Col. iii, 16; Matt. xviii, 20)" (Buck, *Theol. Dictionary*, s. v.). See CLASS-MEETINGS.

**Expiation, JEWISH DAY OF ANNUAL** (Lev. xvi, 1-34; comp. xxiii, 26, 29; Numb. xxix, 7-11), a solemn fast (Acts xxvii, 9; Philo, *Opp.* ii, 206, 296, 591; Josephus, *Ant.* xiv, 16, 4) and holy day (יְוֹם הַכִּפּוּרִים, Lev. xvi, 31; xxiii, 32), held from the evening of the 9th till that of the 10th day of the 5th month, Tisri, five days before the feast of Tabernacles. The modern Mohammedan fast called "Ramadan," held during an entire (lunar) month, has sometimes been referred to as having its analogies; likewise the fast of Isis among the ancient Egyptians (Herod. iv, 186; comp. ii, 40), and the Hindu fast-day "Sandrajonon," etc. See FASTER.

**EXPIATION**, "a religious act, by which satisfaction or atonement is made for the commission of some crime, the guilt done away, and the obligation to punishment cancelled. The chief methods of expiation among the Jews were by sacrifices; and it is important always to recollect that the Levitical sacrifices were of an expiatory character; because as among the Jews sacrifices were unquestionably of divine original, and as the terms taken from them are found applied so frequently to Christ and to his sufferings in the New Testament, they serve to explain that peculiarity under which the apostles regarded the death of Christ, and afford additional proof that it was considered by them as a sacrifice of expiation, as the grand universal sin-offering for the whole world. For our Lord is announced by John as 'the Lamb of God;' and that not with reference to meekness or any other moral virtue, but with an accompanying phrase, which would communicate to a Jew the full sacrificial sense of the term employed, 'the Lamb of God, which taketh away the sin of the world.' He is called 'our Passover, sacrificed for us.' He is said to have given 'himself for us, an offering and a sacrifice to God, for a sweet-smelling savor.' As a priest, it was necessary 'he should have somewhat to offer;' and he offered 'himself,' 'his own blood,' to which is ascribed the washing away of sin, and our eternal redemption. He is declared to have 'put away sin by the sacrifice of himself,' to have 'by himself purged our sins,' to have 'sanctified the people by his own blood,' to have 'offered to God one sacrifice for sins.' Add to these, and to innumerable other similar expressions and allusions, the argument of the apostle in the Epistle to the Hebrews, in which, by proving at length that the sacrifice of Christ was superior in efficacy to the sacrifices of the law, he most unequivocally assumes that the death of Christ was a sacrifice and sin-offering; for without that it would no more have been capable of comparison with the sacrifices of the law, than the death of John the Baptist, St. Stephen, or St. James, all martyrs and sufferers for the truth, who had recently sealed their testimony with their blood. This very comparison, we may affirm, is utterly unaccountable and absurd on any hypothesis which denies the sacrifice of Christ; for what relation could his death have to the Levitical immolations and offerings if it had no sacrificial character? Nothing could, in fact, be more misleading, and even absurd, than to apply those terms which, both among Jews and Gentiles, were in use to express the various processes and means of atonement and peculiar propitiation, if the apostles and Christ himself did not intend to represent his death strictly as an expiation for sin—misleading, because such would be the natural and necessary inference from the terms themselves, which had acquired this as their established meaning; and absurd, because if, as Socinians say, they used them

metaphorically, there was not even an ideal resemblance between the figure and that which it was intended to illustrate. So totally irrelevant, indeed, will those terms appear to any notion entertained of the death of Christ which excludes its expiatory character, that to assume that our Lord and his apostles used them as metaphors is profanely to assume them to be such writers as would not in any other case be tolerated; writers wholly unacquainted with the common rules of language, and therefore wholly unfit to be teachers of others, and that not only in religion, but in things of inferior importance.

2. "The use of such terms, we have said, would not only be wholly absurd, but criminally misleading to the Gentiles, as well as to the Jews, who were first converted to Christianity. To them the notion of propitiatory offerings, offerings to avert the displeasure of the gods, and which expiated the crimes of offenders, was most familiar, and terms corresponding to it were in constant use. The bold denial of this by Dr. Priestly might well bring upon him the reproof of archbishop Magee, who, after establishing this point from the Greek and Latin writers, observes, 'So clearly does their language announce the notion of a propitiatory atonement, that if we would avoid an imputation on Dr. Priestly's fairness, we are driven, of necessity, to question the extent of his acquaintance with those writers.' The reader may consult the instances given by this writer in No. 5 of his 'Illustrations,' appended to his 'Discourses on the Atonement;' and also the tenth chapter of Grotius's *De Satisfactione*, whose learning has most amply illustrated and firmly settled this view of the heathen sacrifices. The use to be made of this in the argument is, that as the apostles found the very terms they used with reference to the nature and efficacy of the death of Christ fixed in an expiatory signification among the Greeks, they could not, in honesty, use them in a distant figurative sense, much less in a contrary one, without giving their readers due notice of their having invested them with a new import. From *ἄγος*, a *pollution*, an *impurity*, which was to be expiated by sacrifice, are derived *ἀγνίζω* and *ἀγιάζω*, which denote the act of expiation; *καθαίρω*, too, to *purify*, *cleanse*, is applied to the effect of expiation; and *ἱλάσκομαι* denotes the method of propitiating the gods by sacrifice. These, and other words of similar import, are used by the authors of the Septuagint, and by the evangelists and apostles; but they give no premonition of using them in any strange and altered sense; and when they apply them to the death of Christ, they must, therefore, be understood to use them in their received meaning. In like manner the Jews had their expiatory sacrifices, and the terms and phrases used in them are, in like manner, employed by the apostles to characterize the death of their Lord; and they would have been as guilty of misleading their Jewish as their Gentile readers had they employed them in a new sense, and without warning, which, unquestionably, they never gave.

3. "As to the expiatory nature of the sacrifices of the law, it is not required by the argument to show that *all* the Levitical offerings were of this character. There were also offerings for persons and for things prescribed for purification, which were identical; but even they grew out of the leading notion of expiatory sacrifice, and that legal purification which resulted from the forgiveness of sins. It is enough to prove that the grand and eminent sacrifices of the Jews were strictly expiatory, and that by them the offenders were released from punishment and death, for which ends they were appointed by the lawgiver. When we speak, too, of vicarious sacrifice, we do not mean either, on the one hand, such a substitution as that the victim should bear the same quantum of pain and suffering as the offender himself; or, on the other hand, that it was put in the place of the offender as a mere symbolical act, by which he confessed his desert of punish-

ment; but *substitution made by divine appointment*, by which the victim was exposed to sufferings and death instead of the offender, in virtue of which the offender himself was released. With this view, one can scarcely conceive why so able a writer as archbishop Magee should prefer to use the term 'vicarious import' rather than the simple and established term 'vicarious,' since the Antinomian notion of substitution may be otherwise sufficiently guarded against, and the phrase 'vicarious import' is certainly capable of being resolved into that figurative notion of mere symbolical action, which, however plausible, does in fact deprive the ancient sacrifices of their *typical*, and the oblation of Christ of its *real* efficacy. Vicarious acting is acting for another; vicarious suffering is suffering for another; but the nature and circumstances of that suffering in the case of Christ are to be determined by the doctrine of Scripture at large, and not wholly by the term itself, which is, however, useful for this purpose (and therefore to be preserved), that it indicates the sense in which those who use it understand the declaration of Scripture, 'Christ died for us,' so as that he died not merely for our *benefit*, but *in our stead*; in other words, that, but for his having died, those who believe in him would personally have suffered that death which is the penalty of every violation of the law of God.

4. "That sacrifices under the law were expiatory and vicarious admits of abundant proof. The chief objections made to this doctrine are, (1.) That under the law, in all capital cases, the offender, upon legal proof or conviction, was doomed to die, and that no sacrifice could exempt him from the penalty. (2.) That in all lower cases to which the law had not attached capital punishment, but pecuniary mulcts, or personal labor or servitude upon their non-payment, this penalty was to be strictly executed, and none could plead any privilege for exemption on account of sacrifice; and that when sacrifices were ordained with a pecuniary mulct, they are to be regarded in the light of *fine*, one part of which was paid to the state, the other to the Church. This was the mode of argument adopted by the author of *The Moral Philosopher*, and nothing of weight has been added to these objections since his day. Now much of this may be granted without any prejudice to the argument, and, indeed, is no more than the most orthodox writers on this subject have often remarked. The law under which the Jews were placed was at once, as to them, both a moral and a political law; and the lawgiver excepted certain offences from the benefit of pardon, because that would have been exemption from temporal death, which was the state penalty. He therefore would accept no atonement for such transgressions. Blasphemy, idolatry, murder, and adultery were the 'presumptuous sins' which were thus exempted; and the reason will be seen in the political relation of the people to God; for, in refusing to exempt them from punishment in this world, respect was had to the order and benefit of society. Running parallel, however, with this political application of the law to the Jews as subjects of the theocracy, we see the authority of the moral law kept over them as men and creatures; and if these 'presumptuous sins' of blasphemy and idolatry, of murder and adultery, and a few others, were the only capital crimes considered politically, they were not the only capital crimes considered morally; that is, there were other crimes which would have subjected the offender to death but for this provision of expiatory oblations. The true question, then, is whether such sacrifices were appointed by God, and accepted instead of the personal punishment or life of the offender, which otherwise would have been forfeited, as in the other cases; and, if so, if the life of animal sacrifices was accepted instead of the life of man, then the notion that 'they were mere mulcts and pecuniary penalties' falls to the ground, and the vicarious nature of most of the Levitical oblations is established. That other

offences besides those above mentioned were capital, that is, exposed the offender to death, is clear from this, that all offences against the law had this capital character. As death was the sanction of the commandment given to Adam, so any one who transgressed any part of the law of Moses became guilty of death; every man was 'accursed,' that is, devoted to die, who 'continued not in all things written in the book of the law.' 'The man only that doeth these things shall live by them' was the rule; and it was, therefore, to redeem the offenders from this penalty that sacrifices were appointed. So, with reference to the great day of expiation, we read, 'For on that day shall the priest make an atonement for you, to cleanse you, that you may be clean from all your sins; and this shall be an everlasting statute unto you, to make an atonement for the children of Israel for all their sins once a year' (Lev. xvi, 30-34).

5. "To prove that this was the intention and effect of the annual sacrifices of the Jews, we need do little more than refer to Lev. xvii, 10, 11: 'I will set my face against that soul that eateth blood, and will cut him off from among his people. For the life of the flesh is in the blood; and I have given it to you upon the altar to make an atonement for your souls: for it is the blood that maketh an atonement for the soul.' Here the blood which is said to make an atonement for the soul is the blood of the victims; and to make an atonement for the soul is the same as to be a ransom for the soul, as will appear by referring to Exod. xxx, 12-16; and to be a ransom for the soul is to avert death. 'They shall give every man a ransom for his soul unto the Lord, that there be no plague among them,' by which their lives might be suddenly taken away. The 'soul' is also here used obviously for the life; the blood, or the life of the victims in all sacrifices, was substituted for the life of man, to preserve him from death, and the victims were therefore vicarious.

6. "The Hebrew word *כִּפּוּר*, rendered *atonement*, signifying primarily *to cover, to overspread*, has been the subject of some evasive criticisms. It comes, however, in the secondary sense, to signify atonement or propitiation, because the effect of that is to cover, or, in Scripture meaning, to remit offences. The Septuagint also renders it by *ἱλαστικόν*, *to appease, to make propitious*. It is used, indeed, where the means of atonement are not of the sacrificial kind; but these instances equally serve to evince the Scripture sense of the term, in cases of transgression, to be that of reconciling the offended deity by averting his displeasure, so that when the atonement for sin is said to be made by sacrifice, no doubt can remain that the sacrifice was strictly a sacrifice of propitiation. Agreeably to this conclusion, we find it expressly declared, in the several cases of piacular oblations for transgression of the divine commands, that the sins for which atonement was made by those oblations should be forgiven.

7. "As the notion that the sacrifices of the law were not vicarious, but mere mulcts and fines, is overturned by the general appointment of the blood to be an atonement for the souls, the forfeited lives, of men, so also is it contradicted by particular instances. Let us refer to Lev. vi, 15, 16: 'If a soul commit a trespass, and sin through ignorance in the holy things of the Lord, he shall make amends for the harm that he hath done in the holy thing, and shall add a fifth part thereto, and shall give it to the priest.' Here, indeed, is the proper fine for the trespass; but it is added, 'He shall bring for his trespass unto the Lord a ram without blemish, and the priest shall make atonement for him with the ram of the trespass offering, and it shall be forgiven him.' Thus, then, so far from the sacrifice being the fine, the fine is distinguished from it, and with the ram only was the atonement made to the Lord for his trespass. Nor can the ceremonies with

which the trespass and sin offerings were accompanied agree with any notion but that of their vicarious character. The worshipper, conscious of his trespass, brought an animal, his own property, to the door of the tabernacle. This was not a eucharistical act; not a memorial of mercies received, but of sins committed. He laid his hands upon the head of the animal, the symbolical act of transferring punishment, then slew it with his own hand, and delivered it to the priest, who burned the fat and part of the animal upon the altar; and, having sprinkled part of the blood upon the altar, and in some cases upon the offerer himself, poured the rest at the bottom of the altar. And thus, we are told, 'The priest shall make an atonement for him as concerning his sin, and it shall be forgiven him.' So clearly is it made manifest by these actions, and by the description of their nature and end, that the animal bore the punishment of the offender, and that by this appointment he was reconciled to God, and obtained the forgiveness of his offences.

8. "An equally strong proof that the life of the animal sacrifice was accepted in the place of the life of man is afforded by the fact that atonement was required by the law to be made, by sin offerings and burnt offerings, for even bodily distempers and disorders. It is not necessary to the argument to explain the distinctions between these various oblations, nor yet to inquire into the reason for requiring propitiation to be made for corporal infirmities, which in many cases could not be avoided. They were, however, thus connected with sin as the cause of all these disorders; and God, who had placed his residence among the Israelites, insisted upon a perfect ceremonial purity, to impress upon them a sense of his moral purity, and the necessity of purification of mind. Whether these were the reasons, or some others not at all discoverable by us, all such unclean persons were liable to death, and were exempted from it only by animal sacrifices. This appears from the conclusion to all the Levitical directions concerning the ceremonial to be observed in all such cases: 'Thus shall ye separate the children of Israel from their uncleanness; that they die not in,' or by, 'their uncleanness, which they defile my tabernacle which is among them' (Lev. xv, 31). So that, by virtue of the sin offerings, the children of Israel were saved from a death which otherwise they would have suffered from their uncleanness, and that by substituting the life of the animal for the life of the offerer. Nor can it be urged that death is in these instances threatened only as the punishment of not observing these laws of purification; for the reason given in the passage just quoted shows that the threatening of death was not hypothetical upon their not bringing the prescribed purification, but is grounded upon the fact of 'defiling the tabernacle of the Lord which was among them,' which is supposed to be done by all uncleanness, as such, in the first instance.

9. "As a farther proof of the vicarious character of the principal sacrifices of the Mosaic economy we may instance those stately offered for the whole congregation. Every day were offered two lambs, one in the morning and the other in the evening, 'for a continual burnt offering.' To these daily victims were to be added weekly two other lambs for the burnt offering of every Sabbath. None of these could be considered in the light of fines for offences, since they were offered for no particular person, and must be considered, therefore, unless resolved into an unmeaning ceremony, piacular and vicarious. To pass over, however, the monthly sacrifices, and those offered at the great feasts, it is sufficient to fix upon those, so often alluded to in the Epistle to the Hebrews, offered on the solemn anniversary of expiation. On that day, to other prescribed sacrifices, were to be added another ram for a burnt offering, and another goat, the most eminent of the sacrifices for a sin offering, whose blood was to be carried by the high-priest into the inner sanctuary,

which was not done by the blood of any other victim, except the bullock, which was offered the same day as a sin offering for the family of Aaron. The circumstances of this ceremony, whereby atonement was to be made 'for all the sins' of the whole Jewish people, are so strikingly significant that they deserve a particular detail. On the day appointed for this general expiation the priest is commanded to offer a bullock and a goat as sin offerings, the one for himself and the other for the people; and, having sprinkled the blood of these in due form before the mercy seat, to lead forth a second goat, denominated 'the scape-goat;' and, after laying both his hands upon the head of the scape-goat, and confessing over him all the iniquities of the people, to put them upon the head of the goat, and to send the animal, thus bearing the sins of the people, away into the wilderness; in this manner expressing, by an action which cannot be misunderstood, that the atonement, which, it is affirmed, was to be effected by the sacrifice of the sin offering, consisted in removing from the people their iniquities by this translation of them to the animal. For it is to be remarked that the ceremony of the scape-goat is not a distinct one: it is a continuation of the process, and is evidently the concluding part and symbolical consummation of the sin offering; so that the transfer of the iniquities of the people upon the head of the scape-goat, and the bearing them away into the wilderness, manifestly imply that the atonement effected by the sacrifice of the sin offering consisted in the transfer and consequent removal of those iniquities.

10. "How, then, is this impressive and singular ceremonial to be explained? Shall we resort to the notion of mulets and fines? If so, then this and other stated sacrifices must be considered in the light of penal enactments. But this cannot agree with the appointment of such sacrifices annually in succeeding generations: 'This shall be a statute forever unto you.' The law appoints a certain day in the year for expiating the sins both of the high-priest himself and of the whole congregation, and that for all high-priests and all generations of the congregation. Now, could a law be enacted inflicting a certain penalty, at a certain time, upon a whole people, as well as upon their high-priest, thus presuming upon their actual transgression of it? The sacrifice was also for sins in general; and yet the penalty, if it were one, is not greater than individual persons were often obliged to undergo for single trespasses. Nothing, certainly, can be more absurd than this hypothesis. Shall we account for it by saying that sacrifices were offered for the benefit of the worshipper, but exclude the notion of expiation? But here we are obliged to confine the benefit to reconciliation and the taking away of sins, and that by the appointed means of the shedding of blood, and the presentation of blood in the holy place, accompanied by the expressive ceremony of imposition of hands upon the head of the victim; the import of which act is fixed, beyond all controversy, by the priests confessing over that victim the sins of all the people, and at the same time imprecating upon its head the vengeance due to them (Lev. xvi, 21). Shall we content ourselves with merely saying that this was a symbol? But the question remains, Of what was it the symbol? To determine this, let the several parts of the symbolic action be enumerated. Here is confession of sin; confession before God at the door of the tabernacle; the substitution of a victim; the figurative transfer of sins to that victim; the shedding of blood, which God appointed to make atonement for the soul; the carrying the blood into the holiest place, the very permission of which clearly marked the divine acceptance; the bearing away of iniquity; and the actual reconciliation of the people to God. If, then, this is symbolical, it has nothing very correspondent with it; it never had or can have anything correspondent to it but the sacrificial death of Jesus Christ, and the com-

munication of the benefits of his passion in the forgiveness of sins to those that believe in him, and in their reconciliation with God. Shall we, finally, say that those sacrifices had respect, not to God, to obtain pardon by expiation, but to the offerer, teaching him moral lessons, and calling forth moral dispositions? We answer that this hypothesis leaves many of the essential circumstances of the ceremonial wholly unaccounted for. The tabernacle and temple were erected for the residence of God by his own command. There it was his will to be approached, and to these sacred places the victims were required to be brought. Anywhere else they might as well have been offered, if they had had respect only to the offerer; but they were required to be brought to God, to be offered according to a prescribed ritual, and by an order of men appointed for that purpose. Now truly there is no reason why they should be offered in the sanctuary rather than in any other place, except that they were offered to the Inhabitant of the sanctuary; nor could they be offered in his presence without having respect to him. There were some victims whose blood, on the day of atonement, was to be carried into the inner sanctuary; but for what purpose can we suppose the blood to have been carried into the most secret place of the divine residence, except to obtain the favor of him in whose presence it was sprinkled? To this we may add that the reason given for these sacred services is not in any case a mere moral effect to be produced upon the minds of the worshippers; they were 'to make atonement,' that is, to avert God's displeasure, that the people might not 'die.'

11. "We may find, also, another more explicit illustration in the sacrifice of the passover. The sacrificial character of this offering is strongly marked; for it was an offering brought to the tabernacle; it was slain in the sanctuary, and the blood was sprinkled upon the altar by the priests. It derives its name from the passing over and sparing of the houses of the Israelites, on the door-posts of which the blood of the immolated lamb was sprinkled, when the first-born in the houses of the Egyptians were slain; and thus we have another instance of life being spared by the instituted means of animal sacrifice. Nor need we confine ourselves to particular instances. 'Almost all things,' says an apostle, who surely knew his subject, 'are by the law purged with blood; and without shedding of blood there is no remission.' Thus, by their very law, and by constant usage, were the Jews familiarized to the notion of expiatory sacrifice, as well as by the history contained in their sacred books, especially in Genesis, which speaks of the vicarious sacrifices offered by the patriarchs; and in the book of Job, in which that patriarch is said to have offered sacrifices for the supposed sins of his sons; and where Eliphaz is commanded, by a divine oracle, to offer a burnt-offering for himself and his friends, 'lest God should deal with them after their folly.'

12. "On the sentiments of the uninspired Jewish writers on this point, the substitution of the life of the animal for that of the offerer, and, consequently, the expiatory nature of their sacrifices, Outram has given many quotations from their writings, which the reader may consult in his work on Sacrifices. Two or three only may be adduced by way of specimen. R. Levi ben-Gerson says, 'The imposition of the hands of the offerers was designed to indicate that their sins were removed from themselves and transferred to the animal.' Isaac ben-Arama; 'He transfers his sins from himself, and lays them upon the head of the victim.' R. Moses ben-Nachman says, with respect to a sinner offering a victim, 'It was just that his blood should be shed, and that his body should be burned; but the Creator, of his mercy, accepted the victim from him as his substitute and ransom, that the blood of the animal might be shed instead of his blood—that is, that the blood of the animal might be given for his life.'

13. "Full of these ideas of vicarious expiation, then, the apostles wrote and spoke, and the Jews of their time heard and read, the books of the New Testament. The Socinian pretence is, that the inspired penmen used the sacrificial terms which occur in their writings figuratively; but we not only reply, as before, that they could not do this honestly unless they had given notice of this new application of the established terms of the Jewish theology; but, if this be assumed, it leaves us wholly at a loss to discover what that really was which they intended to teach by these sacrificial terms and allusions. They are themselves utterly silent as to this point; and the varying theories of those who reject the doctrine of atonement, in fact, confess that their writings afford no solution of the difficulty. If, therefore, it is blasphemous to suppose, on the one hand, that inspired men should write on purpose to mislead, so, on the other, it is utterly inconceivable that, had they only been ordinary writers, they should construct a figurative language out of terms which had a definite and established sense, without giving any intimation at all that they employed them otherwise than in their received meaning, or telling us why they adopted them at all, and more especially when they knew that they must be interpreted, both by Jews and Greeks, in a sense which, if the Socinians are right, was in direct opposition to that which they intended to convey."—Watson, *Theol. Dictionary*, s. v.

Some modern writers deny the expiatory character of the Jewish sacrifices. So Bushnell (*Vicarious Sacrifice*, p. 425) asserts that no such thing as expiation is contained or supposed to be wrought out in the Scripture sacrifices. On this see *British Quarterly*, Oct. 1866, reprinted in the *Theol. Eclectic* (New Haven), iv, 397; and also an article on the *Expiatory Nature of the Atonement* (*Brit. Quarterly*, Oct. 1867; also in the *Theol. Eclectic*, v, 201 sq.). See the articles ATONEMENT; REDEMPTION; SACRIFICE.

**Exposition**, "the opening up and interpreting larger portions of Scripture in public discourses. In Scotland, where the practice has long obtained, and still extensively prevails, it is called *lecturing*. While the striking and insulated texts of Scripture, which furnish abundant matter for sermons, are calculated, when judiciously treated, to rouse and fix attention; and the discourses founded on them may be more useful to general hearers, especially the careless and unconverted, expository discourses furnish peculiar advantages as it regards the enlargement of the Christian's views of divine truth, and his consequent advancement in the ways of God. By judiciously expounding the Scriptures, a minister may hope to give a clearer exhibition of the great principles of religion in their mutual connections and diversified bearings than could otherwise be done. He will have a better opportunity of unfolding the true meaning of those parts of the Bible which are difficult—of bringing a vast variety of topics before his hearers, which may be of the utmost importance to them, but which he could not so conveniently have treated in preaching from detached texts—of exhibiting the doctrines and duties of Christianity in their relative positions—of successfully counteracting and arresting the progress of dangerous errors, and of storing the minds of his people with correct and influential views of divine things. (See *Dodbridge on Preaching*.) Such a mode of public instruction cannot but prove of great use to a minister's own mind, by rousing his energies, habituating him to close and accurate research, and saving him much of that indecision in the choice of texts which is so much lamented" (Buck, *Theolog. Dictionary*, s. v.). Dr. James W. Alexander was very earnest in advising expository preaching. "It is the most obvious and natural way of conveying to the hearers the import of the sacred volume. It is the very work (to interpret the Scriptures) for which the ministry was instituted." He advises exposition of whole chapters or books in

course, pleading for it not only the sanction of ancient usage, but also certain great advantages of the method both to the preacher and his hearers (*Thoughts on Preaching*, N. Y. 1867, 12mo, p. 272 sq.). See HOMILETICS.

**Expositions of Scripture.** See COMMENTARY.

**Exsuperius**, bishop of Toulouse in the end of the 4th and beginning of the 5th century, celebrated for the exercise of remarkable charity during a great famine. After having given away all his own property, he sold the sacred vessels of gold and silver to help the poor. Jerome compared him to the widow of Sarepta, and dedicated to him his *Commentary on Zechariah*. Pope Innocent addressed a decretal to him. He died about A. D. 417. See *Acta Sanctorum*, Sept. 28; Tillemont, *Mémoires*, x, 617, 825; A. Butler, *Lives of Saints*, September 28.

**Extempore Preaching.** See HOMILETICS.

**Extravagants** (*Extravagantes*), a name given to decretal epistles of the popes issued after Gratian's *Decretum*, and not contained in that work (see CANON LAW, vol. ii, p. 87, col. 2). They were therefore called *extra decretum vagantes*, or, briefly, *extravagantes*; and this name was still given to them after their insertion in the body of the canon law. For an account of the different collections of *extravagantes*, see CANON LAW.

**Extreme Unction**, one of the sacraments (the 5th) of the Roman Church, administered to sick persons in *extremis*, by anointing them with oil when death appears near. It dates from the 11th century, though the Roman Church, of course, seeks to trace it back to the apostolic age.

I. *Origin of the Practice.*—The Church of Rome appeals (see below) to Mark vi, 13, and James v, 14-16, as Scripture authority for extreme unction. In Mark we are told that the apostles "anointed with oil many that were sick, and healed them." Clearly there is no trace of the "sacrament" here. The Council of Trent, in citing this passage, shrewdly says that it is "intimated" only in Mark, because, according to Rome, the apostles were not "priests" until the Last Supper. If, then, the passage in Mark teaches the *institution* of the sacrament, it would follow that others beside priests could administer it. Cardinal Cajetan, as cited by Catharinus, rejects this text as inapplicable to this sacrament; and Suarez (in part iii, dis-p. 39, § 1, n. 5) says that "when the apostles are said to anoint the sick and heal them (Mark vi, 13), this was not said in reference to the sacrament of unction, because their cures had not of themselves an immediate respect to the soul." As to the passage in James, it speaks of an anointing for "healing" by all the elders of the Church, who might or might not be laymen; it was "the prayer of faith that was to save the sick" (see, for a thorough discussion of this passage, Elliott, *Delineation of Romanism*, bk. ii, ch. xiv).

II. *The Ancient Greek Church.*—The ancient writers of the Greek Church use the passage of James only for exegetical, not for dogmatical purposes. Origen, in the second homily on Levit. iv, quotes the words of James when he speaks of the different ways which are given to the Christian for the remission of their sins. As the seventh way he mentions severe penance, in which he finds a compliance with the words of James: "If any be sick, let him call for the elders of the Church, and let them lay their hands on him, anointing him with oil in the name of the Lord," etc. The connection shows that Origen applies the words to mental and physical sickness, and the laying on of hands, which he adds to the apostolic words, points to a local use of anointment in Alexandria at the reconciliation of the *lapsi*. Chrysostom (*On the Priesthood*, iii, 196) quotes the words of James *only* as an argument that the priests have the power of remitting sins. John of Damascus, in speaking of the mysteries of the

Church, treats only of baptism and the Lord's Supper. The first certain testimony for the use of the anointment of the sick in the Greek Church is given by a Western writer about 798, Theodulf of Orleans.

III. *The Ancient Latin Church.*—In the Western Church, Irenæus (i, 21, 5) states that the Gnostics, and in particular the Heracleonites, poured upon dying members a mixture of water and oil, amidst an invocation of prayer, in order that their souls might become invisible and inaccessible to the hostile powers of the spiritual world. It is uncritical in the highest degree for Roman Catholic writers to infer from the existence of a Gnostic rite the existence of a similar rite in the orthodox Church. Tertullian and Cyprian, to whom we are indebted for so full information of the ecclesiastical usages of the Western Church, know nothing of extreme unction as a sacrament. This silence can not be explained by a reference to the *disciplina arcani*, as the latter exclusively embraced baptism and the Lord's Supper, and as even these topics, notwithstanding the *disciplina arcani*, are frequently and fully discussed by the ecclesiastical writers. Many of the latter mention the frequent use of oil as a peculiar charisma for miraculous cures. Thus it is related by Tertullian that the *pagan* Severus, father of the emperor Antoninus, was cured by the Christian Proclus by means of anointment. This certainly can have no reference to a sacrament for the use of *Christians*. (Many other examples of this use of oil may be found in Chemnitz, and in Binterim, *Denkwürdigkeiten*, vol. vi, pt. iii, p. 289.) Superstition developed this usage, and it occurred, according to the testimony of Chrysostom, that the lamps burning in the churches were plundered for the purpose of using the oil as a preservative against possible, and, as a miraculous remedy, against actual diseases. It is easy to comprehend how this medicinal and miraculous anointment could become the basis and the origin of a sacrament (see on this point Marheineke, *Symbolik*, i, 3, p. 258). The transition is visible in an epistle from the Roman bishop Innocent I to bishop Decentius, of Eugubium, written in 416. Innocent calls the anointment of the sick a "kind of sacrament" (*genus sacramenti*); and while he reserves to the bishops the right of preparing the sacred oil, he states that both priests *and laymen* may apply the oil (*quod ab episcopo confectum non solum sacerdotibus sed omnibus uti Christianis licet in sua aut in suorum necessitate unguendum*), which is entirely at variance with the present teaching of the Church of Rome, according to which the sacrament can be administered only by priests. From the beginning of the ninth century the anointment of the sick is frequently mentioned in the acts of the Councils. Theodulf of Orleans (798), and the first Council of Mentz (847), place it by the side of penance and the Eucharist, but preceding the two latter. The recovery of the sick is always regarded as the chief object. Its use appears to have been considered necessary only for sinners; for abbot Adalhard, of Corbie, was asked by the monks of the monastery whether he desired to be anointed with the sacred oil, as they were certain that he was free from sins. The conception of the anointment of the sick as an act of penance caused a discussion of the question whether it could be repeated. Ivo of Chartres, and Godfrey, abbot of Vendôme (about 1100), denied that the rite could be administered more than once, comparing it with the public penance; and it was a popular belief that a person recovering from sickness after receiving the anointment must not touch the ground with bare feet, and abstain from marital intercourse and the eating of meat. It was in the course of the 12th century that the names *sacramentum exunctum* and *extrema unctio* came first into use.

IV. *Extreme Unction as a Sacrament in the Church of Rome.*—A full dogmatical treatment of the anointment of the sick, according to the teaching gradually developed in the Church, was first given by Hugo of

St. Victor (*De Sacram. fidei lib. ii, p. xv*). Peter Lombardus assigned to it, in the series of the seven sacraments which he is the first to mention, the fifth place (*Sentent. lib. iv, diet. 23*). The scholastics, and, in particular, Thomas Aquinas, completed the scientific development of this doctrine, and the shape given to it by Thomas received the sanction of the Councils of Florence and of Trent.

The canons of Trent on this subject are: "Canon 1. If any shall say that extreme unction is not truly and properly a sacrament, instituted by our Lord Jesus Christ, and declared by the blessed apostle James, but only a rite received from the fathers, or a human invention, let him be accursed. Canon 2. If any shall say that the holy anointing of the sick does not confer grace, nor remit sins, nor relieve the sick, but that it has ceased, as if it were formerly only the grace of healing, let him be accursed. Canon 3. If any shall say that the rite and usage of extreme unction, which the holy Roman Church observes, is contrary to the sentence of the blessed apostle James, and therefore should be changed, and may be despised by Christians without sin, let him be accursed. Canon 4. If any shall say that the presbyters of the Church, whom St. James directs to be called for the anointing of the sick, are not priests ordained by the bishops, but elders in age in any community, and that therefore the priest is not the only proper minister of extreme unction, let him be accursed" (*Concil. Trident. sess. xiv, c. i sq.*). The authority for this sacrament is stated by the Council (same session, c. i) as follows: "This sacred unction of the sick was instituted as a true and proper sacrament of the New Testament by Christ Jesus our Lord, being first intimated by Mark (vi, 13), and afterwards recommended and published to the faithful by James the apostle, brother of our Lord. 'Is any man,' saith he, 'sick among you? Let him bring in the priests of the Church, and let them pray over him, anointing him with oil in the name of the Lord; and the prayer of faith shall save the sick man; and the Lord shall raise him up; and if he be in sins, they shall be forgiven him' (Jas. v, 14, 15). In which words, as the Church has learned by apostolical tradition, handed down from age to age, he teaches the matter, form, proper minister, and effect of this salutary sacrament. For the Church understands the matter of the sacrament to be the oil, blessed by the bishop; the unction most fitly representing the grace of the Holy Spirit, wherewith the soul of the sick man is invisibly anointed. The form is contained in the words of administration."

The ceremony must be performed by a priest. The oil must be olive oil consecrated by a bishop. "No other sort of oil can be the matter of this sacrament; and this its matter is most significant of its efficacy. Oil is very efficacious in soothing bodily pain, and this sacrament soothes and alleviates the pain and anguish of the soul. Oil also contributes to restore health and spirits, serves to give light, and refreshes fatigue; and these effects correspond with and are expressive of those produced, through the divine power, on the sick by the administration of this sacrament" (*Catechism of Trent*, Baltimore, 8vo, p. 206). The form of the ceremony is as follows: The priest, having dipped the thumb of his right hand in the holy oil, proceeds to mark the organs of the five senses of the patient with the sign of the cross; and after each application he wipes the part with a ball of cotton, for which purpose he brings with him seven balls already prepared. The order observed is this: the right eye is first anointed, then the left eye, the ears, and after them the nostrils (not the tip of the nose) are attended to in the same order, then the lips; after which the palms of the hands and soles of the feet receive the touch of the consecrated unguent. Men are also anointed in the reins, but this is dispensed with in the case of women. At each application the priest says, "*Per hanc sacram unctionem, et suam piissimam misericordiam indulget*

*tibi Deus quicquid peccasti, per visum,*” or “*auditum,*” “*olfactum,*” “*gustum,*” “*et tactum,*” as the case may be—“May God, by this holy anointing, and by his most pious mercy, pardon you the sins that you have committed by the eyes,” “ears,” “nose,” “taste,” and “touch.” “The anointing being ended, the priest rubs those of his fingers which have touched the oil with small pieces of bread, and then washes his hands. The crumbs of bread and the water are next thrown into the fire; and the pieces of cotton employed in the ceremony are carried into the church and burned, the ashes of which must be thrown into the *sacrarium.*” As to the *persons* to whom extreme unction is to be administered, the Catechism (*l. c.*) limits it “to those whose malady is such as to excite apprehensions of approaching dissolution. It is, however, a very grievous sin to defer the holy unction until, all hope of recovery now lost, life begins to ebb, and the sick person is fast verging into insensibility.” . . . “Extreme unction, then, can be administered only to the sick, and not to persons in health, although engaged in anything however dangerous, such as a perilous voyage, or the fatal dangers of battle. It cannot be administered even to persons condemned to death, and already ordered for execution. Its participation is also denied to insane persons, and to children incapable of committing sin, who, therefore, do not require to be purified from its stains, and also to those who labor under the awful visitation of madness, unless they give indications in their lucid intervals of a disposition to piety, and express a desire to be anointed. To persons insane from their birth this sacrament is not to be administered; but if a sick person, while in the possession of his faculties, expressed a wish to receive extreme unction, and afterwards becomes delirious, he is to be anointed.” . . . “The pastor will follow the uniform practice of the Catholic Church, and not administer extreme unction until the penitent has confessed and received the Eucharist.”

The effect of extreme unction is stated by the Council of Trent (sess. xiv, ch. ii) as follows: “The power and effect of this sacrament are explained in the words ‘and the prayer of faith shall save the sick man, and the Lord shall raise him up; and if he be in sins, they shall be forgiven him.’ For this power is the grace of the Holy Spirit, whose unction cleanses away sins, if any remain to be expiated, even the last traces of sin, and relieves and confirms the soul of the sick man, exciting in him strong confidence of the divine mercy: by which strengthened, he bears far better the inconveniences and pains of his disorder; resists more easily the temptations of the devil, who does, as it were, lie in wait at his heels; and sometimes obtains the restoration of his bodily health, if the same shall further the salvation of his soul.”

V. *The Greek Church.*—The Greek Church uses anointing with oil [see *EUCHELAION*] as one of its “mysteries,” but does not limit it to cases of supposed mortal illness. She counts it as the seventh of the sacraments, and regards it as instituted by Christ (Mark vi, 13), and introduced into practice by the Church (James v, 14). The oil may be consecrated by common priests, and is consecrated for every particular case. The anointment is generally performed by seven priests, but it may validly be performed by one. Those who are well enough go to church for the purpose of being anointed, after previously receiving absolution and the Eucharist. On the Thursday of the Passion Week in particular, many sufferers go to church for that purpose. The aim of the rite is to aid the recovery of the sick person, as is seen from the form of prayer used in applying the oil: “O holy Father, the physician of our souls and bodies, who didst send thy only begotten Son, our Lord Jesus Christ, to heal all diseases, and to deliver us from death, heal this thy servant M. from the bodily infirmity under which he now labors, and raise him up by the grace of Christ” (Per-

ceval, *Roman Schism*; King, *Greek Church*). In the *Confession* of Metrophanes Critopulos (ed. by Kimmel, Jená, 1850), p. 152, it is further stated that, as many bodily diseases depend on sin, it is proper (*ἐηλοῖ*) that prayer should be offered at the same time for the remission of the sin for which the disease is a penalty. He adds that this *Euchelaion* is not extreme unction (*ὀκὶ ἰσχάτη χοίσιε*). It can be administered whenever a person is ill, and hence to the same person many times. For a description of this ceremony as performed in the Greek Church, see Schmidt, *Darstellung der griechisch-russischen Kirche* (Mentz, 1826, p. 220 sq.).

VI. *Extreme Unction and Protestantism.*—As the ancient Waldenses recognised the seven sacraments of the Roman Catholic Church, there is no doubt that they also accepted extreme unction. Wycliffe doubted many points of the doctrine of the Church of Rome concerning extreme unction, but was willing to regard it as a sacrament for the physical cure of the sick, provided the priests could obtain this effect by their prayer. Luther had no objection to the anointing of the sick if the priests prayed with them and exhorted them, but he denied the anointment to be a sacrament. Like Luther, all the other Protestant Churches reject extreme unction altogether. The 25th article of the Church of England puts it among the five so-called sacraments of Rome which “are not to be counted for sacraments of the Gospel.” Bishop Forbes (who represents the Romanizing tendency in the Church of England) calls “the unction of the sick the lost pleiad of the Anglican firmament,” and recommends its restoration (*On 39 Articles*, Art. xxv *ad fin.*). Among the High-Church Lutherans there are also some who urge the introduction of the anointing of the sick. On the general subject, see, besides the authors already cited, Siegel, *christl.-kirchl. Alterthümer*, iv, 119 sq.; Cramp, *Text-book of Popery*, ch. ix; Riddle, *Christian Antiquities*, bk. vii, ch. ii; Burnet, *On 39 Articles* (Art. xxv); Herzog, *Real-Encykl.* x, 551; and the article SACRAMENTS.

EYCK, HUBERT VAN. See PAINTING.

**Eye** (עַיַן, *á'yin*, from the idea of *flowing* [see below]; ὀφθαλμός). In most languages this important organ is used by figurative application, as the symbol of a large number of objects and ideas. In the East such applications of the word “eye” have always been uncommonly numerous, and they were so among the Hebrews. It may be serviceable to distinguish the following uses of the word, few of which are common among us except so far as they have become so through the translation of the Bible. (See Gesenius, *Heb. Lex.*; Wemys's *Symbol. Dict.*)

(1.) *A fountain.* This use of the word has already been indicated. See AIN. It probably originated from the eye being regarded as the fountain of tears.

(2.) *Color*, as in the phrase “and the eye (color) of the manna was as the eye (color) of bdellium” (Num. xi, 7). This originated, perhaps, in the eye being the part of the body which exhibits different colors in different persons.

(3.) *The surface*, as “the surface (eye) of the land” (Exod. x, 5, 15; Numb. xxii, 5, 11): the last is the passage which affords most sanction to the notion that עַיַן means in some places “face.” This is the sense which our own and other versions give to “eye to eye” (Num. xiv, 14, etc.), translated “face to face.” The phrases are indeed equivalent in meaning; but we are not thence to conclude that the Hebrews meant “face” when they said “eye,” but that they chose the opposition of the eyes, instead of that of the faces, to express the general meaning. Hence, therefore, we may object to the extension of the signification in such passages as 1 Sam. xvi, 12, where “beautiful eyes” (עַיַן יְפֵי) is rendered “fair countenance.”

(4.) It is also alleged that “between (or about) the

eyes" means the forehead, in Exod. xiii, 9, 16, and the forepart of the head, in Deut. vi, 8; but the passages are sufficiently intelligible if understood to denote what they literally express; and with reference to the last it may be remarked that there is hair about the eyes as well as on the head, the removal of which might well be interdicted as an act of lamentation.

(5.) In Cant. iv, 9, "eye" seems to be used poetical-ly for "look;" as is usual in most languages: "thou hast stolen my heart with one of thy looks" (eyes).

(6.) In Prov. xxiii, 31, the term "eye" is applied to the beads or bubbles of wine, when poured out, but our version preserves the sense of "color."

(7.) To these some other phrases, requiring notice and explanation, may be added:

"Before the eyes" of any one, meaning in his presence, or, as we should say, "before his face" (Gen. xxiii, 11, 18; Exod. iv, 30).

"In the eyes" of any one means what appears to be so or so in his individual judgment or opinion, and is equivalent to "seeming" or "appearing" (Gen. xix, 8; xxix, 20; 1 Sam. xii, 3).

"To set the eyes" upon any one is usually to regard him with favor (Gen. xlv, 21; Job xxiv, 23; Jer. xxxix, 12); but it occurs in a bad sense, as of looking with anger, in Amos ix, 8. But anger is more usually expressed by the contrary action of turning the eyes away.

As many of the passions, such as envy, pride, pity, desire, are expressed by the eye, so, in the scriptural style, they are often ascribed to that organ. Hence such phrases as "evil eye" (Matt. xx, 15), "bountiful eye" (Prov. xxii, 9), "haughty eyes" (Prov. vi, 17), "wanton eyes" (Isa. iii, 16), "eyes full of adultery" (2 Pet. ii, 14), "the lust of the eyes" (1 John ii, 16). This last phrase is applied by some to lasciviousness, by others to covetousness; but it is best to take the expression in the most extensive sense, as denoting a craving for the gay vanities of this life (comp. Ezek. xxiv, 25). In the same chapter of Ezekiel (ver. 16), "the desire of thy eyes" is put not for the prophet's wife directly, as often understood, but for whatever is one's greatest solace and delight, which in this case was the prophet's wife, but which in another case might have been something else.

Whether the Hebrews attached the same ideas to the expression "evil eye" (Prov. xxiii, 6; xxviii, 22) as is done by the Orientals at the present day is not easy to ascertain. It has been observed by Mr. Lane, and also by Mrs. Poole, that "nothing distresses an Egyptian parent more than that which in other countries is considered to convey a compliment—admiration of the child. If any one is seen to stare at so as to envy the offspring, the mother hastily snatches it away, to perform some superstitious rite, as a charm against the supposed evil eye." And Mr. Roberts says, among the Hindoos, the *kan-nuru*, "evil eye," of some people is believed to have a most baneful effect upon whatsoever it shall be fixed. Those who are reputed to have such eyes are always avoided, and none but near relations will invite them to a feast.

In Zech. iv, 10, the angels of the Lord are called "his eyes," as being the executioners of his judgments, and watching and attending for his glory. From some such association of ideas, the favorite ministers of state in the Persian monarchy were called "the king's eyes." So, in Numb. x, 31, "to be instead of eyes" is equivalent to being a prince, to rule and guide the people. This occurs also in the Greek poets, as in Pindar (*Olymp.* ii, 10), where "the eye of Sicilia" is given as a title to one of the chief men in Sicily,

showing his power. In like manner, in the same poet, "the eye of the army" stands for a good commander (*Olymp.* vi, 16).

To keep anything as the apple or pupil of the eye is to preserve it with particular care (Deut. xxxii, 10; Zech. ii, 8).

Eye-service is peculiar to slaves, who are governed by fear only, and is to be carefully guarded against by Christians, who ought to serve from a principle of duty and affection (Eph. vi, 6; Col. iii, 22).

The expression in Psalm cxxiii, 2, "As the eyes of servants look unto the hands of their masters," has suggested a number of curious illustrations from Oriental history and customs, tending to show that masters, especially when in the presence of others, are in the habit of communicating to their servants orders and intimations by certain motions of their hands, which, although scarcely noticeable by other persons present, are clearly understood and promptly acted upon by the attendants. This custom keeps them with their attention bent upon the hand of their master, watching its slightest motions. (See Kitto's *Daily Bible Illustra.* on Prov. vi, 13.)

The celebrated passage "Why beholdest thou the mote that is in thy brother's eye, and considerest not the beam that is in thine own eye" (Matt. vii, 3), has occasioned much waste of explanation. It seems much better to understand it as a hyperbolic proverbial expression, than to contend that as *εὐκός* cannot literally mean "a beam," it must here signify something else, a disease, a thorn, etc. (see Doddridge and Campbell, in loc.). As a proverbial phrase, parallels have been produced abundantly from the Rabbins, from the fathers, and from the classics. See BLIND.

BLINDING THE EYES as a punishment or political disqualification was a heathen cruelty sometimes referred to in the Scriptures, and is found exhibited on the Assyrian monuments. The custom of putting out the eyes of captives especially was very common in the East (1 Sam. xi, 2). Thus Samson was deprived

Ancient Assyrian King blinding a Prisoner.

of sight by the Philistines (Judg. xvi, 21), and Zedekiah by the Chaldees (2 Kings xxv, 7). In 1820 Rae Wilson saw a number of individuals at Aere who were disfigured in various ways, by a hand amputated, an eye torn out, or a nose which had been split, or partly or totally cut off. In 1826 two emirs had their eyes burnt out, and their tongues in part cut off, by the prince of Mount Lebanon, on account of their having been concerned in some disturbances against his government. In some cases the Orientals deprive the criminal of the light of day by sealing up his eyes with some kind of adhesive plaster (Isa. xlv, 10). See PUNISHMENT.

"PAINTING THE EYES," or rather the eyelids, is more than once alluded to in Scripture, although this scarcely appears in the Authorized Version, as our translators, unaware of the custom, usually render "eye" by "face," although "eye" is still preserved in the margin. So Jezebel "painted her eyes," literally

"put her eyes in paint," before she showed herself publicly (2 Kings ix, 30). This action is forcibly expressed by Jeremiah (iv, 30), "Though thou rentest thine eyes with painting." Ezekiel (xxiii, 40) also represents this as a part of high dress: "For whom thou didst wash thyself, *paintedst thy eyes*, and deckedst thyself with ornaments." The custom is also, very possibly, alluded to in Prov. vi, 25: "Lust not after her beauty in thine heart, neither let her take thee *with her eyelids*." It certainly is the impression in Western Asia that this embellishment adds much to the languishing expression and seducement of the eyes, although Europeans find some difficulty in appreciating the beauty which the Orientals find in this adornment. (See Hartmann's *Hebræorum*, ii, 149 sq.)

The following description of the process is from Lane's *Modern Egyptians* (i, 41-43): "The eyes, with very few exceptions, are black, large, and of a long almond form, with long and beautiful lashes, and an exquisitely soft, bewitching expression: eyes more beautiful can hardly be conceived: their charming effect is much heightened by the concealment of the other features (however pleasing the latter may be), and is rendered still more striking by a practice universal among the females of the higher and middle classes, and very common among those of the lower orders, which is that of blackening the edge of the eyelids, both above and below the eyes, with a black pow-

Modern Egyptian Lady with painted Eyes. (The vessel for holding the paint, and the probe for applying it, are from the Monuments.)

der called *kohl*. This is a collyrium, commonly composed of the smoke-black which is produced by burning a kind of *libân*—an aromatic resin—a species of frankincense, used, I am told, in preference to the better kind of frankincense, as being cheaper and equally good for the purpose. Kohl is also prepared of the smoke-black produced from burning the shells of almonds. These two kinds, though believed to be beneficial to the eyes, are used merely for ornament; but there are several kinds used for their real or supposed medical properties, particularly the powder of several kinds of lead ore, to which are often added sarcocolla, long pepper, sugar-candy, fine dust of a Venetian sequin, and sometimes powdered pearls. Antimony, it is said, was formerly used for painting the edges of the eyelids. The kohl is applied with a small probe of wood, ivory, or silver, tapering towards the end, but blunt: this is moistened, sometimes with rose-water, then dipped in the powder and drawn along the edges of the eyelids: it is called *mirved*; and the glass vessel in which the kohl is kept, *mulekotal*. The custom of thus ornamenting the eyes prevailed among both sexes in Egypt in very ancient times: this is shown by the sculptures and paintings in the temples and tombs of this country; and kohl-vessels, with the probes, and

Ancient Egyptian Boxes or Bottles, holding the *Kohl* for staining the Eyelids. *a*. In the British Museum. The others are in the Museum of Alnwick Castle. *b*, *c*, is the Bodkin for applying the *Kohl*.

even with the remains of the black powder, have often been found in the ancient tombs. I have two in my possession. But, in many cases, the ancient mode of ornamenting with the kohl was a little different from the modern. I have, however, seen this ancient mode practised in the present day in the neighborhood of Cairo, though I only remember to have noticed it in two instances. The same custom existed among the Greek ladies, and among the Jewish women in early times."

Sir J. G. Wilkinson alludes to this passage in Mr. Lane's book, and admits that the lengthened form of the ancient Egyptian eye, represented in the paintings, was probably produced by this means. "Such," he adds, "is the effect described by Juvenal (*Sat.* ii, 93), Pliny (*Ep.* vi, 2), and other writers who notice the custom among the Romans. At Rome it was considered disgraceful for men to adopt it, as at present in [most parts of] the East, except medicinally; but, if we may judge from the similarity of the eyes of men and women in the paintings at Thebes, it appears to have been used by both sexes among the ancient Egyptians. Many of the kohl-bottles have been found in the tombs, together with the bodkin used for applying the moistened powder. They are of various materials, usually of stone, wood, or pottery; sometimes composed of two, sometimes of three or four separate cells, apparently containing each a mixture, differing slightly in its quality and hue from the other three. Many were simple round tubes, vases, or small boxes; some were ornamented with the figure of an ape or monster, supposed to assist in holding the bottle between his arms, while the lady dipped into it the pin with which she painted her eyes; and others were in imitation of a column made of stone, or rich porcelain of the choicest manufacture" (*Ancient Egyptians*, iii, 382).—Kitto, s. v. See PAINT.

**Eylert**, RÜHELMANN FRIEDRICH, was born at Hamm, in Prussian Westphalia, April 5, 1770. He studied theology at Halle, where he imbibed the moderate Rationalism of Niemyer. In 1794 he became a preacher in his native city; in 1806 court preacher at Potsdam, and after the death of Sack in 1817 he be-

came superintendent, being at the same time appointed minister of public instruction. In his later years his theology assumed a positively orthodox character. He died Feb. 3, 1852. While at court he was the friend and counsellor of king Frederick William III, over whom he exerted a great influence, especially in the matter of the Union and the Liturgy. See PRUSSIA, CHURCH OF. He was a prolific writer. The most important of his works are, *Betrachtungen ü. d. trustvollen Wahrheiten des Christenthums*, etc. (1804; 4th ed. 1834); — *Homilien ü. d. Parabeln Jesu* (1806; 2d ed. 1819); — *Predigten ü. Bedürfnisse unsers Herzens* (1805); — *Karakterzüge Friedrich Wilhelm's III* (1846-47). See *Neuer Nekrolog d. Deutschen* (1852).—Herzog, *Real-Encyclop.* iv, 295.

**Eymeric**, NICOLAS, a Spanish inquisitor, was born about 1320 at Gerona. He entered the Dominican order in 1334, and was made inquisitor general of Aragon in 1336. His zeal was too great even for his superiors, and he was removed from his office for a time, but after some years he returned to it. He was noted especially for his fierce pursuit of the partisans of Raymond Lull (q. v.). His *Directorium Inquisitorum* has been often reprinted (Rome, 1578, 1589, 1597, fol.; Venice, 1591, 1607). He died Jan. 4, 1399.—Quétif et Echard, *Script. Ord. Præd.* i, 716; Hoefer, *Nouv. Biog. Générale*, xvi, 867. See INQUISITION.

**Eyre**, JOHN, a minister of the Church of England, was born at Bodmin, Cornwall, January, 1754. He had a good elementary education, and at fifteen was bound apprentice to a clothier. Before the termination of his apprenticeship he embraced a religious life, and on returning to his father's house he commenced holding public religious meetings. His father was offended at this, and drove him from his house. He was soon after admitted into lady Huntingdon's College at Trevecca, and in 1778 he was appointed minister to her chapel at Mulberry Gardens, London. In the same year he entered Emmanuel College, Oxford, and in December, 1779, he was made curate of Weston. In 1781 he became curate of St. Giles's, Reading, and in 1782 of St. Luke's, Chelsea. In 1785 he became pastor of the Episcopal chapel at Homerton, and opened a school there, which became very successful. He was very popular as a preacher, free from bigotry, and active in all schemes of benevolence. The *Evangelical Magazine* and the *London Missionary* were originated and for a time edited by him. From the profits of the *Evangelical Magazine* between twenty and thirty thousand pounds were paid out for the support of widows of ministers of various denominations. He was also one of the founders of the *London Missionary Society* (q. v.), of the scheme of "Village Itinerancy," and of the Hackney Seminary for theological training. After a life of earnest piety and usefulness, he died March 28, 1803.—Morison, *Missionary Fathers*, p. 9.

**Eyster**, MICHAEL, a minister of the Lutheran Church, was born in York County, Pa., May 16, 1814. He was principally educated at the institutions in Gettysburg, Pa., and was licensed to preach the Gospel in 1838. He labored in the ministry successively at Williamsburg, Greencastle, and Greensburg with great acceptance and success. He died Aug. 12, 1853. He was a man of rare promise, and, although comparatively young, had gained a strong hold upon the affections of the Church. In the pulpit his power over an audience was very great. He usually made a deep and an abiding impression. There was an originality and a freshness in his discourses not always found at the present day. (M. L. S.)

**Ez**. See GOAT.

**Ez'zar**, a less correct mode of Anglicizing (1 Chron. i, 38) the name EZER (q. v.).

**Ez'bai** [many *Ez'bai*, some *Ezba'î*] (Heb. *Ezbaif*, עֲזַבַּי, in pause עֲזַבַּי, signif. uncertain; Sept. Ἀζβί

v. Ἀζοβαί, Vulg. *Asbai*), the father of Naarai, which latter was one of David's thirty heroes (1 Chron. xi, 37). B.C. 1046. In the parallel list (2 Sam. xxiii, 35) the names are given "ΠΑΡΑΙΤΗ Ἀρβίτη," which Kennicott decides to be a corruption of the reading in Chronicles (*Dissertation*, p. 209).

**Ez'bon** (Heb. *Etsbon'*, עֲזַבֹּן, perhaps *working*), the name of two men.

1. (Sept. Θεσοβών, Vulg. *Esebon*.) The fourth son of the patriarch Gad (Gen. xlv, 16); called also (Numb. xxvi, 16) OZAI (q. v.). B.C. 1856.

2. (עֲזַבֹּן, Sept. Ἀσεβών v. r. Εσεβών, Vulg. *Esbon*.) The first-named of the sons (2 descendants) of Bela, the son of Benjamin, according to 1 Chron. vii, 7. It is singular, however, that while Ezbon is nowhere else mentioned among the sons of Bela, or Benjamin, he appears here in company with Ἰρί, Iri, which is, nevertheless, not a Benjamite family, according to the other lists, but is found in company with Ezbon among the Gadite families, both in Gen. xlv, 16 (Eri, Ἰρί, and Numb. xxvi, 16. Were these two Gadite families incorporated into Benjamin after the slaughter mentioned Judg. xx? Possibly they were from Jabesh-Gilead (comp. xxi, 12-14). See BECHER. 1 Chron. vii, 2 seems to fix the date of the census as in king David's time. B.C. cir. 1020.—Smith, s. v.

**Ezech'as** (Ἐζεκιᾶς), a mode of Anglicizing, in the Apocrypha, the name of two men.

1. The "son of Theocanus," and one of the two Israelitish leaders prominent in the reform under Ezra (1 Esdr. ix, 14); evidently the JAHAZIAH (q. v.) of the Heb. text (Ezra x, 15).

2. One who is represented as having prayed for the chosen people in the time of Sennacherib (2 Esdr. vii, 40), obviously referring to king HEZEKIAH (q. v.)

**Ezezi'as** (Ἐζεκιᾶς), one of those who supported Ezra on the right while expounding the law (1 Esdr. ix, 43), corresponding to the HILKIAH (q. v.) of the parallel passage (Neh. viii, 4).

**Ezeki'as** (Ἐζεκιᾶς), a Grecized form (Ecclus. xlviii, 17, 22; xlix, 4; 2 Macc. xv, 22; Matt. i, 9, 10) of the name of king HEZEKIAH (q. v.).

**Eze'kiël** (Heb. *Yechezkel'*, יְחֶזְקֵאל, either meaning *Whom God will strengthen* or *God will prevail*), the name of two men.

1. (Sept. Ἐζεκιήλ.) The head of the twentieth "course" of priests under David (1 Chron. xxiv, 16, where the name is Anglicized JEHEZEKIEL [q. v.]).

2. (Ἰεζεκιήλ, Josephus Ἰεζεκιήλος, Ant. x, 5, 1.) One of the four greater prophets. See PROPHET.

1. There have been various fancies about his name: according to Abarbanel (*Prof. in Ezech.*), it implies "one who narrates the might of God to be displayed in the future," and some (as Villalpandus, *Prof. in Ezech.* p. x) see a play on the word in the expressions עֲזַבֵּי, and עֲזַבֵּי (iii, 7, 8, 9), whence the groundless conjecture of Sanctius (*Prolegom. in Ezech.* p. 2, n. 2) that the name was given him subsequently to the commencement of his career (Carpzov, *Introduct. ad Libr. Bibl. Vet. Testam.* ii, pt. iii, ch. v.).

2. He was the son of a priest named Buzi (i, 3), respecting whom fresh conjectures have been recorded, although nothing is known about him (as archbishop Newcome observes) beyond the fact that he must have given his son a careful and learned education. The Rabbis had a rule that every prophet in Scripture was also the son of a prophet, and hence (as R. David Kimchi in his Commentary) they absurdly identify Buzi with Jeremiah, who, they say, was so called because he was rejected and despised. Another tradition makes Ezekiel the servant of Jeremiah (Gregory Naz. *Or.* xlviii), and Jerome supposes that the prophets being contemporaries during a part of their mission

interchanged their prophecies, sending them respectively to Jerusalem and Chaldea for mutual confirmation and encouragement, that the Jews might hear, as it were, a strophe and antistrophe of warning and promise, "velut ac si duo cantores alter ad alterius vocem sese componerent" (Calvin, *Comment. ad Ezek.* i, 2). Although it was only towards the very close of Jeremiah's lengthened office that Ezekiel received his commission, yet these suppositions are easily accounted for by the internal harmony between the two prophets, in proof of which Hävernäck (*Introduct. to Ezek.*) quotes Ezek. xiii as compared with Jer. xxiii, 9 sq., and Ezek. xxxiv with Jer. xxxiii, etc. This inner resemblance is the more striking from the otherwise wide difference of character which separates the two prophets; for the elegiac tenderness of Jeremiah is the reflex of his gentle, calm, and introspective spirit, while Ezekiel, in that age when true prophets were so rare (Ezek. xii, 21; Lam. ii, 9), "comes forward with all abruptness and iron consistency. Has he to contend with a people of brazen front and unbending neck? He possesses on his own part an unbending nature, opposing the evil with an unflinching spirit of boldness, with words full of consuming fire" (Hävernäck, *Introl.*, transl. by Rev. F. W. Gotch in *Jour. of Sac. Lit.* i, 23).

3. Unlike his predecessor in the prophetic office, who gives us the amplest details of his personal history, Ezekiel rarely alludes to the facts of his own life, and we have to complete the imperfect picture by the colors of late and dubious tradition. He was taken captive from a place called Sarera (ἐκ γῆς Σαρρά, Isidor. *De Vit. et Ob. Sanct.* 39; Epiphani. *De Vit. et Mort. Prophet.* ix, ap. Carpzov) in the captivity (or transmigration, as Jerome more accurately prefers to render  $\text{גלות}$ , i, 2) of Jehoiachin (not Jehoiakim, as Josephus [*Ant.* x, 6, 3] states, probably by a slip of memory) with other distinguishing exiles (2 Kings xxiv, 15) eleven years before the destruction of Jerusalem. B. C. 598. Josephus (*l. c.*) says that this removal happened when he was a boy, and although we cannot consider the assertion to be refuted by Hävernäck's argument from the matured, vigorous, priestly character of his writings, and feel still less inclined to say that he had "undoubtedly" exercised for some considerable time the function of a priest, yet the statement is questionable, because it is improbable (as Hävernäck also points out) that Ezekiel long survived the twenty-seventh year of his exile (xxix, 17), so that, if Josephus be correct, he must have died very young. He was a member of a community of Jewish exiles who settled on the banks of the Chebar, a "river" or stream of Babylonia, which is sometimes taken to be the Khabour, but which the latest investigators suppose to be the Nahr Malcha, or royal canal of Nebuchadnezzar. See CHEBAR. The actual name of the spot where he resided was Tel-Abib ( $\text{תֵּל אַבִּיב}$ , Vulg. "acervus novarum frugum," Sept.  $\mu\epsilon\tau\epsilon\theta\omicron\sigma\omicron\varsigma\ \kappa\alpha\iota\ \pi\epsilon\sigma\iota\mu\eta\theta\omicron\nu\ \text{?}$ ), Syr. "the hill of grief"), a name which Jerome, as usual, allegorizes; it is thought by Michaelis to be the same as Thallaba in D'Anville's map (Rosenmüller, *Bibl. Geog.* ii, 188). It was by this river "in the land of the Chaldeans" that God's message first reached him (i, 2); the Chaldee version, however, interpolates the words "in the land [of Israel: and again a second time he spake to him in the land] of the Chaldeans," because the Jews had a notion that the Shechinah could not overshadow a prophet out of the Holy Land. Hence R. Jarchi thinks that chap. xvii was Ezekiel's first prophecy, and was uttered before the captivity, a view which he supports by the Hebrew idiom  $\text{הִיאָה עָלַי}$  (A. V. "came expressly") in i, 3. R. Kimchi, however, makes an exception to the rule in case the prophecy was inspired in some pure and quiet spot like a river's bank (comp. Psa. cxxxvii, 1). His call took place "in the fifth year of king Jehoiachin's captiv-

ity," B. C. 594 (i, 2), "in the thirtieth year, in the fourth month." The latter expression is very uncertain. Most commentators (see Poli *Synopsis*, in loc.) take it to mean the thirtieth year of his age (so Carpzov, *Appar. Crit.* p. 201; Fairbairn, *Dict. s. v.*, and others), the recognised period for assuming full priestly functions (Numb. iv, 23, 30). Origen, following this assumption, makes the prophet a type of Christ, to whom also "the heavens were opened" when he was baptized in Jordan. But, as Pradus argues, such a computation would be unusual, and would not be sufficiently important or well known as a mark of genuineness, and would require some more definite addition. Moreover, the statute referred to required an age of at least thirty full years. The Chaldee paraphrase by Jonah ben-Uzziel has "thirty years after Hilkiash, the high-priest, had found the book of the law in the sanctuary, in the vestibule under the porch, at midnight, after the setting of the moon, in the days of Josiah, etc., in the month Tammuz, in the fifth day of the month" (comp. 2 Kings xxii), i. e. the eighteenth of Josiah, or B. C. 623. This view is adopted by Jerome, Usher, Hävernäck, etc., and is, on the whole, the most probable, although it has been objected to its adoption that, had this been a recognised era, we should have found traces of it elsewhere, whereas even Ezekiel never refers to it again. But, whatever starting-point we adopt, this will still remain an isolated date in Ezekiel; and the example of Jeremiah, who computes the years of his prophetic ministrations from the reform in the days of Josiah (Jer. xxv, 3; comp. 2 Chron. xxiv, 3), warrants the supposition that his contemporary and parallel would note his own call from a similar religious epoch, the renewal of the pass-over in the same reign (2 Kings xxiii, 23). There are similar and more forcible objections to its being the thirtieth year from the jubilee, as Hitzig supposes, following many of the early commentators. It has been proposed by Scaliger (*De Emendatione Temporum*, Lugd. Bat. 1598, p. 374) that it was the thirtieth year from the new era of Nabopolassar, father of Nebuchadnezzar, who began to reign B. C. 625, an interpretation adopted by Eichhorn, Pradus, Rosenmüller, Henderson, etc. The use of this Chaldee epoch is the more appropriate as the prophet wrote in Babylonia, and he gives a Jewish chronology in ver. 2. Compare the notes of time in Dan. ii, 1; vii, 1; Ezra vii, 7; Neh. ii, 1; v, 14. But this would make the date in question B. C. 596 instead of 594. Moreover, as Nabopolassar was long since dead, the reckoning would doubtless have been by the years of the reigning monarch, as in the other passages cited. The decision of the question is the less important, because in all other places Ezekiel dates from the year of Jehoiachin's captivity (xxix, 17; xxx, 20, et passim). It appears that the call of Ezekiel to the prophetic office was connected with the communication of Jeremiah's predictions to Babylon (Jer. li, 59), which took place in the earlier part of the same year (Hävernäck, p. ix). We learn from an incidental allusion (xxiv, 18)—the only reference which he makes to his personal history—that he was married, and had a house (viii, 1) in his place of exile, and lost his wife by a sudden and unforeseen stroke. He lived in the highest consideration among his companions in exile, and their elders consulted him on all occasions (viii, 1; xi, 25; xiv, 1; xx, 1, etc.), because in his united office of priest and prophet he was a living witness to "them of the captivity" that God had not abandoned them (comp. Vitringa, *Synag. Tct.* p. 332). There seems to be little ground for Theodoret's supposition that he was a Nazarite. The last date he mentions is the twenty-seventh year of the captivity (xxix, 17), so that his mission extended over twenty-two years, during part of which period Daniel was probably living, and already famous (Ezek. xiv, 14; xxxviii, 3).

Tradition ascribes various miracles to him, as, for

instance, escaping from his enemies by walking dry-shod across the Chebar; feeding the furnished people with a miraculous draught of fishes, etc. He is said to have been murdered in Babylon by some Jewish prince (? ὁ ἠγοούμενος τοῦ λαοῦ, called in the Roman martyrology for vi Id. Apr. "judex populi," Carpzov. *Introd.* l. c.), whom he had convicted of idolatry; and to have been buried in a double tomb (σηπλάσιον ἐπιπλοῦν), the tomb of Shem and Arphaxad, on the banks of the Euphrates (Epiphanius. *De Vit. et Mort. Prophet.*). The tomb, said to have been built by Jehoiachin, was shown a few days' journey from Bagdad (Menasse ben-Israel, *De Resurrec. Mort.* p. 23), and was called "the abode of elegance" (habitaaculum elegantiae). A lamp was kept there continually burning, and the autograph copy of the prophecies was said to be there preserved. This tomb is mentioned by Pietro de la Valle, and fully described in the Itinerary of R. Benjamin of Tudela (Hottinger, *Theas. Phil.* II, i, 3; *Cippii Hebraici*, p. 82). His tomb is still pointed out in the vicinity of Babylon (Layard's *Nineveh and Babylon*, p. 427), at a place called Keffil; and Mr. Loftus is inclined to ac-

Keffil and the Tomb of Ezekiel.

cept the tradition which assigns this as the resting-place of the prophet's remains (*Chaldea*, p. 35). The spire is the frustum of an elongated cone, tapering to a blunted top by a succession of steps, and peculiarly ornamented (*ib.*). A curious conjecture (discredited by Clemens Alexandrinus [*Strom.* i], but considered not impossible by Selden [*Synagoga de Diis Syr.* ii, 120], Meyer, and others) identifies him with "Nazarus the Assyrian," the teacher of Pythagoras. We need hardly mention the ridiculous suppositions that he is identical with Zoroaster, or with the Ἐσκιόλογος ὁ πῶν λουδαϊκῶν τραγωδιῶν ποιητής (Clem. Alexand. *Strom.* i; Euseb. *Prap. Evang.* ix, 28, 29), who wrote a treatise on the Exodus, called Ἐξαγωγή (Fabricius, *Bibl. Græc.* ii, 19). This Ezekiel lived B.C. 40 (Sixt. Sen. *Bibl. Sanct.* iv, 235), or later.

4. But, as Hävernick remarks, "by the side of the scattered data of his external life, those of his internal life appear so much the richer." We have already noticed his stern and inflexible energy of will and character; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always visible, especially in chaps. viii-xi, xl-xlviii, and in iv, 13 sq.; xx, 12 sq.; xxii, 8, etc. It is strange of De Wette and Gesenius to attribute this to a "contracted spirituality," and of Ewald to see in it "a one-sided conception of antiquity which he obtained merely from books and traditions," and "a depression of spirit (!) enhanced by the long continuance of the banishment and bondage of the people" (Hävernick's *Introd.*). It was surely this very intensity of patriotic loyalty to a system whose partial suspension he both predicted and survived, which cheered the exiles with the confidence of his hopes in the future, and tended to preserve their decaying nationality. Mr. F. Newman is even more contemptuous than the German critics. "The writ-

ings of Ezekiel," he says (*Hebr. Monarchy*, p. 330, 2d ed.), "painfully show the growth of what is merely visionary, and an increasing value of hard sacerdotalism;" and he speaks of the "heavy materialism" of Ezekiel's Temple, with its priests, sacrifices, etc., as "tedious and unedifying as Leviticus itself." His own remark that Ezekiel's predictions "so kept alive in the minds of the next generation a belief in certain return from captivity, as to have tended exceedingly towards the result," is a sufficient refutation of such criticisms.

We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery (except indeed ceremonial pollution, from which he shrinks with characteristic loathing, iv, 14), if thereby he may give any warning or lesson to his people (iv; xxiv, 15, 16, etc.), whom he so ardently loved (ix, 8; xi, 13). On one occasion, and on one only, the feelings of the man burst, in one single expression, through the self-devotion of the prophet; and while even then his obedience is unwavering, yet the inexpressible depth of submissive pathos in the brief words which tell how it, one day "the desire of his eyes was taken from him" (xxiv, 15-18), shows what well-springs of the tenderest human emotion were concealed under his uncompromising opposition to every form of sin.—Smith, s. v. See Friderici, *Disputatio de Ezechiele* (Lips. 1719); Verpoorten, *De scriptis Ezechieis* (in his *Dissert.* p. 107); Alexander, *Hist. Ecclesias.* iii, 560; Kitto, *Jour. Sac. Lit.* i; Williams, *Characters of O. T.* p. 288.

EZEKIEL, BOOK OF. This, both in the Hebrew and Alexandrian canons, is placed next to the writings of Jeremiah.

I. *Order of Contents.*—The central point of Ezekiel's predictions is the destruction of Jerusalem. Previously to this catastrophe his chief object is to call to repentance those who were living in careless security; to warn them against indulging in blind confidence, that by the help of the Egyptians (Ezek. xvii, 15-17; comp. Jer. xxxvii, 7) the Babylonian yoke would be shaken off; and to assure them that the destruction of their city and Temple was inevitable and fast approaching. After this event his principal care is to console the captives by promises of future deliverance and return to their own land, and to encourage them by assurances of future blessings. His predictions against foreign nations stand between these two great divisions, and were for the most part uttered during the interval of suspense between the divine intimation that Nebuchadnezzar was besieging Jerusalem (chap. xxiv, 2) and the arrival of the news that he had taken it (ch. xxxiii, 21). The predictions are evidently arranged on a plan corresponding with these the chief subjects of them, and the time of their utterance is so frequently noted that there is little difficulty in ascertaining their chronological order. This order is followed throughout, except in the middle portion relating to foreign nations, where it is in some instances departed from to secure greater unity of subject (e. g. ch. xxix, 17). The want of exact chronological order in this portion of the book has led to various hypotheses respecting the manner in which the collection of the separate predictions was originally made. Jahn (*Introd.* p. 356) supposes that the predictions against foreign nations were placed in their present position by some transcriber in the order in which they happened to come into his hands, and that he through forgetfulness omitted chaps. xxxv, xxxviii, and xxxix. Eichhorn (*Einleit.* iii, 193) thinks it probable that the predictions were written on several greater or smaller rolls, which were put together in their present form without sufficient regard to chronological accuracy. Bertholdt (*Einleit.* iv, 1487, quoted by Hävernick) supposes that the collector of the whole book found two smaller collections already in existence (chaps. xxv-xxxii, and xxxiii, 21-xxxix), and that he arranged

the other predictions chronologically. All such hypotheses belong, as Hävernick remarks, to a former age of criticism.

The arrangement, by whomsoever made, is very evidently intentional, and it seems on many accounts most probable that it was made by Ezekiel himself. This is maintained by Hävernick on the following grounds: (1.) The arrangement proceeds throughout on a plan corresponding with the subjects of the predictions. In those against foreign nations chronological is united with material order, whilst in those which relate to Israel the order of time is strictly followed. (2.) The predictions stand in such connection with each other that every part has reference to what has preceded it. (3.) Historical notices are occasionally appended to the predictions, which would scarcely be done by a transcriber; e. g. the notice respecting himself in chaps. xi, xxiv, xxv, and the close of ch. xix, which Hävernick translates "This is a lamentation and was for a lamentation." The whole book is divided by Hävernick into nine sections, as follows:

1. Ezekiel's call to the prophetic office (ch. i-iii, 15).  
2. The general carrying out of the commission, in a series of symbolical representations and particular predictions foretelling the approaching destruction of Judah and Jerusalem (ch. iii, 16-vii).

3. The rejection of the people because of their idolatrous worship; a series of visions presented to the prophet a year and two months later than the former, in which he is shown the Temple polluted by the worship of Adonis, the consequent judgment on the inhabitants of Jerusalem and on the priests, and closing with promises of happier times and a purer worship (ch. viii-xi).

4. The sins of the people rebuked in detail; a series of reproofs and warnings directed especially against the particular errors and prejudices then prevalent amongst his contemporaries (ch. xii-xix).

5. The nature of the judgment, and the guilt which caused it; another series of warnings delivered about a year later, announcing the coming judgments to be yet nearer (ch. xx-xxiii).

6. The meaning of the now commencing punishment; predictions uttered two years and five months later, when Jerusalem was besieged, announcing to the captives that very day as the commencement of the siege (comp. 2 Kings xxv, 1), and assuring them of the complete overthrow of the city (ch. xxiv).

7. God's judgment denounced on seven heathen nations (Ammon, xxv, 1-7; Moab, 8-11; Edom, 12-14; the Philistines, 15-17; Tyre, xxvi-xxviii, 19; Sidon, 20-24; Egypt, xxix-xxxii).

8. After the destruction of Jerusalem a prophetic representation of the triumph of Israel and of the kingdom of God on earth (ch. xxxiii-xxxix).

9. The glorious consummation; a symbolic representation of Messianic times, and of the establishment and prosperity of the kingdom of God (ch. xl-xlvi). See § 3 below.

**II. *Genuineness and Completeness.***—According to Jewish tradition, doubts were entertained as to the canonicity of the book on the ground of its containing some apparent contradictions to the law, as well as because of the obscurity of many of its visions. These, however, were removed, it is said, by Rabbi Hananias, who wrote a commentary on the book, in which all these difficulties were satisfactorily solved (*Mischna*, ed. Surenhusius, *Præf. ad Part. iv.*; Carpzov, *Introd.* pt. iii, p. 215); but still, on account of their obscurity, the visions at the beginning and close of the book were forbidden to be read by those who were under thirty years of age (Carpzov, p. 212). Some Continental critics of the last century have impugned the canonicity of the last nine chapters, and have attributed them to some Samaritan or Hebrew who had returned in later times to the land of Judæa (Oeder, *Freie Untersuchung über einige Bücher des A. T.*, Hal. Sax. 1771; Vogel,

in his remarks on the above; and Corrodi, *Beleuchtung des Jüdisch. und Christl. Bibelkanons*, pt. i, p. 105, quoted by Rosenmüller, *Schol. in Ezech.* ad e. xl). These objections have been fully answered by Eichhorn (*Einführung*, iii, 203), Jahn (*Introd. in Lib. Sac. V. T.*, p. 356), and others. Jahn has also taken notice of and answered some objections raised by an anonymous writer in the *Monthly Magazine* (1798), to the canonicity of chaps. xxv-xxxii, xxxv, xxxvi, xxxviii, xxxix. A translation of Jahn's arguments will be found in Horne's *Introd.* iv, 222, old ed. These and similar objections have so little weight or probability that we shall content ourselves with quoting the general remark of Gesenius in reference to the whole of Ezekiel's writings: "This book belongs to that not very numerous class, which, from beginning to end, maintains, by means of favorite expressions and peculiar phrases, such a oneness of tone as by that circumstance alone to prevent any suspicion that separate portions of it are not genuine" (*Geschichte der Heb. Spr.* p. 35). The canonicity of the book of Ezekiel in general is satisfactorily established by Jewish and Christian authorities. There is, indeed, no explicit reference to it, or quotation from it, in the New Testament. Eichhorn (*Einführung*, p. 218) mentions the following passages as having apparently a reference to this book: Rom. ii, 24; comp. Ezek. xxxvi, 21; Rom. x, 5; Gal. iii, 12; comp. Ezek. xx, 11; 2 Pet. iii, 4; comp. Ezek. xii, 22; but none of these are quotations. The closing visions of Ezekiel are clearly referred to, though not quoted, in the last chapters of the Apocalypse. The prophet Ezekiel is distinctly referred to by the son of Sirach (*Eccles.* xlix, 8), and by Josephus (*Ant.* x, 5, 1; 6, 3; 7, 2; 8, 2). The book of Ezekiel is also mentioned as forming part of the canon in the catalogues of Melito (Eusebius, *Hist. Eccles.* iv, 26), Origen (apud Euseb. l. c. vi, 25), Jerome (*Prologus Galeatus*), and the Talmud (Eichhorn, iii, 218; i, 126-137).

One of the passages of Josephus to which we have referred has occasioned much controversy and many conjectures, because he seems to affirm that Ezekiel had written two books of prophecies (*Ant.* x, 5, 1). According to the ordinary and, indeed, as it would seem, necessary interpretation of this passage, Ezekiel was the first who wrote two books respecting the Babylonian captivity. The question then arises, Has one of his books been lost, or are the two now joined into one? The former supposition has been maintained by some in order to account for certain professed quotations from the prophet Ezekiel of passages which are not found in his writings at present. Thus Clemens Romanus (1 *Ep. ad Cor.* c. 8) refers to such a passage, which is given more at length by Clemens Alexand. (*Pædagog.* i, 10). Thus, again, Tertullian (*De carne Christi*, c. 23, p. 394, ed. Semler) says, "Legimus quod Ezechielem de vacca illa quæ peperit et non peperit." Other instances may be seen in Fabricius (*Codex Pseudepigraphus V. T.*, 2d ed., p. 1118), and quoted from him by Carpzov (*Introd.* pt. iii, p. 208). Both these critics, however, agree that the most probable explanation of such references is that they were derived from Jewish tradition. The latter hypothesis, that our present book was originally two, the second containing the last nine chapters, has received the support of very many critics (see Le Moyne, *Varia Sacra*, ii, 332; Carpzov, *Introd.* p. 208). This view, however, is not without serious difficulties. There is no evidence that the book, as at present existing, was ever considered two; and the testimony of Josephus himself, that only twenty-two books were received as sacred (*Contr. Apion.* i, 8), appears quite opposed to such a supposition, since in whatever way the division of the Old Testament into twenty-two books is made there cannot be two out of the number left for Ezekiel. Eichhorn (*Einführung*, iii, 146) maintains that it is Jeremiah of whom Josephus speaks, a position to which we should at once assent if we could with him consider the words ὁς πῶτος αὐς

equivalent to ὁ δὲ πρῶτος. If this is what Josephus meant, we must suppose some corruption of his text. Becker omits the ὁ.

III. *Interpretation.*—The latter part of the book has always been regarded as very obscure. It will be seen, by the brief notices of the contents given above, that Hävernick considers the whole to relate to Messianic times. The predictions respecting Gog (chaps. xxxviii, xxxix) have been referred by some to Antiochus Epiphanes; by others to Cambyses, to the Chaldeans, the Scythians, the Turks, etc. Mr. Granville Penn has interpreted them of Napoleon and the French (*The Prophecy of Ezekiel concerning Gogoe, etc.*, 1815). See GOG. The description of the Temple (chaps. xl–xliii) has been thought by many to contain an account of what Solomon's Temple was; by others, of what the second Temple should be. (See Hävernick's *Commentar über Ezechiel*, Erlangen, 1843.) The best interpretation of these predictions is to be found in that of the similar ones of the Apocalypse. See TEMPLE.

We cannot now enter into the difficulties of these or other chapters (for which we must refer to some of the commentaries mentioned below); but we will enumerate, following Fairbairn, the four main lines of interpretation, viz., 1. The Historico-literal, adopted by Villalpandus, Grotius, Lowth, etc., who make them a prosaic description intended to preserve the memory of Solomon's Temple. 2. The Historico-ideal (of Eichhorn, Dathe, etc.), which reduces them "to a sort of vague and well-meaning announcement of future good." 3. The Jewish-carnal (of Lightfoot, Hoffman, etc.), which maintains that their outline was actually adopted by the exiles. 4. The Christian-spiritual (or Messianic), followed by Luther, Calvin, Cocceus, and most modern commentators, which makes them "a grand complicated symbol of the good God had in reserve for his Church." Rosenmüller, who disapproves alike of the literalism of Grotius, and the arbitrary, ambiguous allegorizing of others, remarks (*Schol.* in xxviii, 26) that it seems a useless task to attempt to refer these prophecies to distinct events, or to refer their poetical descriptions to naked fact. It is most safe to regard them, in accordance with the nature of allegorical representations and visions in general, as having a literal or material basis in the near past or future (i.e. recollections of Solomon's Temple, and prevision of hostile powers), which is made the vehicle of a higher and spiritual import setting forth the distant grandeur, glory, and triumph of the kingdom of God. See DOUBLE SENSE (OF PROPHECY).

IV. *Style.*—The depth of Ezekiel's matter, and the marvellous nature of his visions, make him occasionally obscure. Hence his prophecy was placed by the Jews among the  $\text{רֵזֵיזָה}$  (treasures), those portions of Scripture which (like the early part of Genesis, and the Canticles) were not allowed to be read till the age of thirty (Jerome, *Ep. ad Eustach.*; Origen, *Proem. homil. iv. in Cantic.*; Hottinger, *Theol. Phil.* ii, 1, 3). Hence Jerome compares the "inextricable error" of his writings to Virgil's labyrinth ("Oceanus Scripturam, mysteriorumque Dei labyrinthus"), and also to the Catacombs. The Jews classed him in the very highest rank of prophets. Gregory Naz. (*Or.* 23) bestows the loftiest encomiums upon him. Isidore (*De vit. et ob. Sanct.* 39) makes him a type of Christ from the title "Son of Man," but that is equally applied to Daniel (viii, 17). Other similar testimonies are quoted by Carpovz (*Introd.* ii, 193 sq.). The Sanhedrim is said to have hesitated long whether his book should form part of the canon, from the occasional obscurity, and from the supposed contradiction of xviii, 20 to Exod. xx, 5; xxxiv, 7; Jer. xxxii, 18. But, in point of fact, these apparent oppositions are the mere expression of truths complementary to each other, as Moses himself might have taught them (Deut. xxiv, 16). Although, generally speaking, comments on this

III.—F B

book were forbidden, a certain R. Nananias undertook to reconcile the supposed differences. (Spinoza, *Tract. Theol. Polit.* ii, 27, partly from these considerations, infers that the present book is made up of mere ἀποσπασματα, but his argument from its commencing with a  $\gamma$ , and from the expression in i, 3 above alluded to, hardly needs refutation.)

That Ezekiel was a poet of no mean order is acknowledged by almost all critics (Lowth, *De sacra Poësi Hebræorum*, ed. J. D. Michaelis, Göttingen, 1770, p. 431). Michaelis and Dathe are the only critics of any eminence (as far as we know) who think slightly of his poetical genius. The question is altogether one of taste, and has, we imagine, been decided by common consent against Michaelis. He remarks more truly that Ezekiel lived at a period when the Hebrew language was declining in purity, when the silver age was succeeding to the golden one. It is, indeed, to the matter rather than the language of Ezekiel that we are to look for evidence of poetic genius. His style is often simply didactic, and he abounds in peculiarities of expression, Aramaisms, and grammatical anomalies which, while they give individuality to his writings, plainly evince the decline of the language in which he wrote. An extended account of such peculiarities is given by Eichhorn (*Einleitung in das A. T.* iii, 196) and Gesenius (*Geschichte der Heb. Sprache u. Schrift*, p. 35). Among the most splendid passages are ch. i (called by the Rabbis  $\text{הַרְבֵּי הַקֹּדֶשׁ}$ ), the prophecy against Tyrus (ch. xxvi–xxviii), that against Assyria, "the noblest monument of Eastern history" (ch. xxxi), and ch. viii, the account of what he saw in the Temple porch,

"When, by the vision led,  
His eye surveyed the dark idolatries  
Of alienated Judah."—Milton, *Par. Lost*, l.

—Kitto, s. v.; Smith, s. v.

V. *Commentaries.*—The following are special exegetical works on the entire book; the most important have an asterisk (\*) prefixed: Origen, *Commentarii*, etc. (in *Opera*, iii, 351 sq., 406); Ephraem Syrus, *Explanatio* (in *Opera*, v, 165); Gregory Nazianzen, *Significatio* (in *Opera Spuria*, i, 870); Jerome, *Commentarii*, etc. (in *Opera*, v); Theodoret, *Interpretatio* (in *Opera*, II, ii; also Rome, 1662, fol.); Gregory the Great, *Homilie* (in *Opera*, i, 1174); Raban, *Commentarii* (in *Opera*); Rupert, *In Ezech.* (in *Opera*, p. 489); Ecolampadius, *Commentarius* (Basil. 1534, 4to; 1543, 8vo; Argent. 1634, 4to); Strigel, *Scholæ* (Lips. 1539, 1564, 1575, 1579, 8vo); Calvin, *Praelectiones* (Geneva, 1565, 8vo, and since; in French, Genev. 1565, fol.; in English, Edinb. 1849–50, 2 vols. 8vo); Junius, *Commentaria* (Genev. 1609, fol.; 1610, 8vo); Maldonatus, *In Ezech.* (in his *Commentarii*, p. 542); Selnecker, *Auslegung* (Lips. 1567, 4to); Pinto, *Commentarius* (Salam. 1568, fol., and later); Lavater, *Commentarii* (Geneva, 1571, fol.); Serranus, *Commentarius* (Antw. 1572, 1607, fol.); Heilbrunner, *Questiones* (Laving. 1587, 8vo); Abraham ben-Mose, *Übersetzung* (Prag. 1602, 4to); \*Pradus and Villalpandus, *Explanaciones* (Romæ, 1605, 3 vols. fol.); Polan, *Commentaria* (Geneva, 1609, fol.; 1610, 8vo); à Lajode, *In Ezech.* (in his *Commentaria*); Sanctius, *Commentarius* (Lugd. 1612, 1619, fol.); Brandmüller, *Commentarius* (Basil. 1621, 4to); \*Greenhill, *Exposition* (London, 1645–67, 5 vols. 4to; also 1827, 1863, 8vo; in Dutch, Hague, 1732–6, 4 vols. 4to); Cocceus, *Commentarius* (Leyd. 1668, 4to; Amst. 1700, fol.); Hennisch, *Clavis* (Rotenburg, 1684; Lips. 1697, 4to); Petersen, *Zeugniss* (Freft. 1719, 4to); \*Lowth, *Commentary* (London, 1723, 4to); \*Starck, *Commentarius* (Freft. ad M. 1731, 4to); Vogel, *Weisagungen* (Hal. 1772, 8vo); Volbrunth, *Anmerk.* (Gött. 1787, 8vo); Newcome, *Explanation* (Dub. 1788, 8vo, and since); Venema, *Lectiones* (Leov. 1790, 4to); \*Horsley, *Notes* (in *Bib. Criticism*, ii, 65); Hancker, *Consideration* (in *Works*, ix, 719); \*Rosenmüller, *Scholæ* (Lpz. 8vo, 1808–10, 2 vols.; also

1826); Rhesa, *Observationes* (Regiom. 1819, 4to); Stern, *מגן עזרא*, etc. (Vienna, 1842, 8vo); \*Hävernick, *Commentar* (Erlangen, 1843, 8vo); \*Umbreit, *Commentar* (Hamb. 1843, 8vo); Macfarlan, *Version* (London, 1845, 8vo); \*Hitzig, *Erklärung* (in the *Kurtz. Exeget. Hdb.*, Lpz. 1847, 8vo); \*Fairbairn, *Exposition* (Edinb. 1851, 1855, 8vo); \*Henderson, *Commentary* (London, 1855, 8vo); Guthrie, *Discourses* (Edinb. 1856, 8vo); Shrewsbury, *Notes* (Manch. 1863, 8vo); Kliefoth, *Erklärung* (Rost. 1864-5, 8vo); \*Hengstenberg, *Erläuterung* (Berl. 1867 sq., 2 vols. 8vo); \*transl. Lond. 1869, 8vo); Cowles, *Notes* (New York, 1867, 12mo). See PROPHEETS.

**E'zel** occurs only in the name EBEN-EZEL (Heb. with the art. repeated, *ha-E'ben ha-E'zel*, *הַבֵּן הָעֶזֶל*, [in pause *בֵּן, A'zel*], the stone of the departure, perhaps i. q. *mile-stone*; Sept. *τὸ Ἐργάβ* [v. r. *ἔργον* and *ὁ λίθος*] *ἐκίνο*; Vulg. *lapis cui nomen est Ezel*; A. V. "the stone Ezel"), an old testimonial-stone in the neighborhood of Saul's residence, the scene of the parting of David and Jonathan when the former finally fled from the court (1 Sam. xx. 19). It seems to have derived its name from some early circumstance not recorded. At the second mention of the spot (ver. 41) the Heb. text (*בְּהַר הָעֶזֶל*; A. V. "out of a place toward the south," literally "from the slope of the south;" Sept. *ἀπὸ τοῦ Ἀργάβ*, Vulg. *de loco qui vergebat ad austrum*) is, in the opinion of some critics, corrupt, as indicated by the Sept., which in both cases has *Ergab* or *Argab* (i. e. *בְּהַר אֶרְגָב*, *Argob'*, a heap of stones)—in ver. 19 for the Heb. *Eben*, "stone," and in ver. 41 for *han-negeb*, "the south." The sense in ver. 41 would then be as follows: "David arose from close to the stone heap"—close to which (the same preposition, *בְּ*, A. V. "by") it had been arranged beforehand that he should remain (ver. 19). Other interpreters, however, render simply "on the south side," a signification which sufficiently suits the circumstances. See also BETH-EZEL.

**E'zem** (Heb. *E'tsem*, *עֶזֶם*), a less incorrect mode (1 Chron. iv, 29) of Anglicized the name AZEM (q. v.), as elsewhere (Josh. xix, 3).

**Ezen.** See EZNITE.

**E'zer** (Heb. *E'tser*, *עֶזֶר*, *treasure*; Sept. *Ἀσάρ*, Vulg. *Ezer*), one of the sons of Seir, and native princes of Mount Hor (Gen. xxxvi, 21, 27, 30; 1 Chron. i, 42, 38, in which last verse the name is Anglicized "Ezar"). B. C. cir. 1927.

**E'ZER** (Heb. *E'zer*, *עֶזֶר*, *עֶזֶר* [in pause, *A'zer*, *עֶזֶר*], *help*), the name of five men. See also ROMAMTI-EZER; EBEN-EZER.

1. (Sept. *Ἐζέρο* v. r. *Ἀζέρο*, Vulg. *Ezer*.) A person named with Elead (q. v.) as a son (or descendant) of Ephraim, who was slain by the aboriginal inhabitants of Gath while engaged in a foray on their cattle (1 Chron. vii, 21). Ewald (*Gesch. Isr.* i, 490) assigns this occurrence to the pre-Egyptian period. B. C. ante 1658.

2. (Sept. *Ἐζέρο* v. r. *Γαζέρο*, Vulg. *Ezer*.) The father of Hushah, one of the posterity of Ilur, of the tribe of Judah (1 Chron. iv, 4). B. C. cir. 1658. In ver. 17 he appears to be called EZRA, but no such son occurs among the list of those there attributed to him.

3. (Sept. *Ἀζέρο* v. r. *Ἀζά*, Vulg. *Ezer*.) The first-named of the Gittite champions who repaired to David at Ziklag (1 Chron. xii, 9). B. C. 1054.

4. (Sept. *Ἀζέρο* v. r. *Ἀζούρο*, Vulg. *Azer*.) Son of Jeshua, and ruler of Mizpah, who repaired part of the city wall near the armory (Neh. iii, 19). B. C. 446.

5. (Sept. *Ἰεζούρο*, Vulg. *Ezer*.) One of the priests who made the circuit of the newly-finished walls of Jerusalem (Neh. xii, 42). B. C. 446.

**Ezeri'as** (ὁ Ἐζερίας v. r. *Ἐζορίας*, Vulg. *Azarias*), the son of Helchiah and father of Saraias, in the ances-

try of Esdras (1 Esdr. viii, 1); evidently the high-priest AZARIAH (q. v.) of the Heb. text (Ezra vii, 1).

**Ezi'as** (ὁ Ἐζιάς v. r. ὁ Ὀζιάς, Vulg. *Azazel*), the son of Meremoth and father of Amarias in the same genealogy (1 Esdr. viii, 2); evidently the corresponding AZARIAH (q. v.) of the Hebrew list (Ezra vii, 3). Comp. AZIEL.

**E'zion-ge'ber** (Heb. *Etsyon'-Ge'ber*, *עֶזְיוֹן גְּבֵר* [in this form only at 1 Kings ix, 26; 2 Chron. viii, 17], i. q. *giant's back-bone*; Sept. *Γασιών* [in Deut. *Γασιών*] *Γάβερ* [in Chron. *Γαβέρ*], but in 1 Kings *Ἀσιών* *Γάβερ*; Vulg. *Asiongeber*) or E'ZION-GA'BER (being "in pause," Heb. *Etsyon'-Ga'ber*, *עֶזְיוֹן גְּבֵר* [in 1 Kings xx, 49; 2 Chron. xx, 36, fully *עֶזְיוֹן גְּבֵר*], so found also at Numb. xxxiii, 35, 36; Deut. ii, 8; but Anglicized "Ezion-geber" in 1 Kings xxii, 48 [49]), a very ancient city near Elath (q. v.), on the eastern arm of the Red Sea. Jonathan's *Targum*, following a false etymology, defines the name as i. q. "castle of the cock" (see Buxtorf, *Lex. Chald.* col. 384; Beck, *Chron. Chald. paraphr.* ii, 101). It is first mentioned in Numb. xxxiii, 35 as one of the stations where the Hebrews halted in their journeyings through the desert, being the last there named before they came to "the wilderness of Zin, which is Kadesh," and the point where they afterwards turned from the 'Arabah to Elath, towards "the wilderness of Moab" (Deut. ii, 8). See EXODE. From its harbor it was that Solomon (1 Kings ix, 26) sent the fleet which he had there built to the land of Ophir. See COMMERCE. Here also Jehoshaphat (1 Kings xxii, 47; 2 Chron. xx, 35) built a fleet "to go to Ophir;" but because he had joined himself with Ahaziah, "king of Israel, who did wickedly," "the ships were broken that they were not able to go to Tarshish," being probably destroyed on the rocks which lie in "jagged ranges on each side" (Stanley, *Sinai and Palestine*, p. 84). Büsching (*Erdbeschr.* V, i, 620) erroneously locates it at *Shurm*, a port at the southern end of the gulf (*Geogr. Nub.* iii, 5). Wellsted (*Travels*, ii, 153) would find it in the modern *Dahab*, but this is the ancient Dizahab (q. v.); Laborde (*Commentaire Geogr.* p. 124) seeks it in the rocky island *el-Kurciyah*, which is hardly adequate in extent or position; and Rüppel (*Arab.* p. 252) locates it at the mouth of wady *Emrag*, i. e. *el-Murak*, which is liable to the same objection. Josephus (*Ant.* viii, 6, 4) says that Ezion-geber (*Ἀσσιγγάβαρος*) was also called *Berenice*, and that it lay not far from Elath. It is probably the same with the once-populous city *Asyñ* (Burckhardt, *Syria*, p. 511). Robinson (*Biblical Researches*, i, 250) says, "No trace of Ezion-geber seems now to remain, unless it be in the name of a small wady with brackish water, *el-Ghudyan*, opening into el-'Arabah from the western mountain, some distance north of Akabah." It is doubtful, however, whether the sea ever extended so far up the 'Arabah as this. It was probably situated at the point where the Haj route strikes the 'Arabah at the north-west point of the gulf (Robinson, *ib.* i, 239). Yet the town may have given name to this the nearest spring, for *Ghudyan* in Arabic corresponds in all the essential letters to *Ezion* in Heb., which is identical with the later *Asyñ*. By comparing 1 Kings ix, 26, 27, with 2 Chron. viii, 17, 18, it is probable that timber was floated from Tyre to the nearest point on the Mediterranean coast, and then conveyed over land to the head of the Gulf of Akabah, where the ships seem to have been built; for there can hardly have been adequate forests in the neighborhood. Dr. Wilson noticed fragments of an old caravan route part way up the hill-side in this vicinity (*Lands of the Bible*, i, 284). See WILDERNESS OF THE WANDERING.

**Ez'nite** (Heb. in marg. *Etsni'*, *עֶזְנִי*, but in the text *עֶזְנו'*, i. e. *Etsno'*) is given in 2 Sam. xxiii, 8, in the Auth. Vers., as an epithet of Adino, præfect of Da-

vid's body-guard; and if considered as a gentle adj., must mean an inhabitant of *Ezen*, a place otherwise unknown. But of the words rendered "Adino the Eznite" (אֲדִינוֹ הָעִזְנִי, Sept. Ἀδινὸν ὁ Ἄσωναῖος; Vulg. quasi tenerrimus ligni vermiculus, as if understanding the latter term to be a form of אֲדִינוֹ, wood), Gesenius (*Heb. Lex.*) regards the former as a peculiar alliteration for אֲדִינוֹ, in the sense of "he brandished," from the root אֲדָנָה, to be pliant; and the latter as a rare word, אֲדִינוֹ, a spear (for which sense he finds analogy in the Arabic); and thus the whole phrase will be equivalent to that in the parallel passage (1 Chron. xi, 11), which otherwise we must here interpolate (with our translators) in order to make sense. That these words do not contain the name of a person is clear from the fact that Jashobeam is given in the parallel passage, and is capable of identification [see JASHOBEAM], and also from the enumeration, in which the two meritorious grades of three each, with the 30 warriors specially enumerated, require just this one special office to make up the number of 37 specified in the text as peculiarly distinguished. See DAVID. The passage in 2 Sam. is conceded to be less trustworthy than that in 1 Chron., even by Davidson, who vainly contends (*Sacred Hermeneutics*, p. 545) for Adino as a proper name. (See at length in Kennicott, *Dissertation*, i, 71-128; Gesenius, *Thes. Heb.* p. 994-5.) Compare ADINO.

**Ezob.** See HYRSOR.

**Ez'ra** (Heb. [except in No. 1] *Ezra'*, אֶזְרָא, the help, a Chaldee emphatic form of אֶזֶר, *Ezer*), the name of three or four men.

1. (1 Chron. iv, 17.) See EZRAII.

2. (Sept. Ἐζρα v. r. Ἐσθραῖς, Vulgate *Esdras*.) A leading priest among the first colonists to Jerusalem under Zerubbabel (Neh. xii, 1). B. C. 536. His son Meshullam was chief of his family in the time of the high-priest Joiakim (Neh. xii, 12). In the somewhat parallel list of Neh. x, 2-8, the name of the same person is written אֶזְרָא, AZARIAH, as it is probably in Ezra vii, 1.

3. (Sept. Ἐσθραῖς v. r. Ἐζρα, Josephus Ἐσθραῖς, Vulg. *Esdras*.) The celebrated Jewish scribe (סֵפֶרֶט) and priest (קֹהֵן), who, in the year B. C. 459, led the second expedition of Jews back from the Babylonian exile into Palestine, and the author of one of the canonical books of Scripture.

1. *Parentage.*—Ezra was a lineal descendant from Phinchas, the son of Aaron (Ezra vii, 1-5). He is stated to be the son of Seraiah, the son of Azariah; which Seraiah was slain at Riblah by order of Nebuchadnezzar, having been brought thither a captive by Nebuzaradan (2 Kings xxv, 18-21). See SERAIAH. But, as 130 years elapsed between the death of Seraiah and the departure of Ezra from Babylon, and we read that a grandson of Seraiah was the high-priest who accompanied Zerubbabel on the first return to Jerusalem, seventy years before Ezra returned thither, we may suppose that by the term *son* here, as in some other places, the relationship of great-grandson, or of a still more remote direct descendant, is intended. See FATHER. All that is really known of Ezra is contained in the last four chapters of the book of Ezra, and in Neh. viii and xii, 26. In addition to the information there given, that he was a "scribe," a "ready scribe of the law of Moses," "a scribe of the words of the commandments of the Lord and of his statutes to Israel," "a scribe of the law of the God of heaven," and "a priest," we are told by Josephus that he was high-priest of the Jews who were left in Babylon; that he was particularly conversant with the laws of Moses, and was held in universal esteem on account of his righteousness and virtue (*Ant.* xi, 5, 1).

2. *Scriptural History.*—The rebuilding of the Tem-

ple of Jerusalem, which had been decreed by Cyrus in the year B. C. 536, was, after much powerful and vexatious opposition, completed in the reign and by the permission of Darius Hystaspis, in the year B. C. 517.

The origin of Ezra's influence with the Persian king Artaxerxes Longimanus does not appear, but in the seventh year of his reign, B. C. 459, in spite of the unfavorable report which had been sent by Rehum and Shimshai, he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinim. Of these a list, amounting to 1754, is given in Ezra viii; and these, also, doubtless form a part of the full list of the returned captives contained in Neh. vii, and in duplicate in Ezra ii. Ezra and his companions were allowed to take with them a large free-will offering of gold and silver, and silver vessels, contributed not only by the Babylonian Jews, but by the king himself and his counsellors. These offerings were for the house of God, to beautify it, and for the purchase of bullocks, rams, and the other offerings required for the Temple-service. In addition to this, Ezra was empowered to draw upon the king's treasurers beyond the river for any further supplies he might require; and all priests, Levites, and other ministers of the Temple were exempted from taxation. Ezra had also authority given him to appoint magistrates and judges in Judaea, with power of life and death over all offenders. The reason of the interest for the worship of God at this time evinced by Artaxerxes appears to have been a fear of the divine displeasure, for we read in the conclusion of the decree to the treasurers beyond the river, "Whatsoever is commanded by the God of heaven, let it be diligently done for the house of the God of heaven; for why should there be wrath against the realm of the king and his sons?" We are also told (Ezra vii, 6) that the king granted Ezra all his request; and Josephus informs us that Ezra, being desirous of going to Jerusalem, requested the king to grant him recommendatory letters to the governor of Syria (*Ant.* xi, 5, 1). We may therefore suppose that the dread which Artaxerxes entertained of the divine judgments was the consequence of the exposition to him by Ezra of the history of the Jewish people. Some writers suppose that this favor shown to the Jews was consequent upon the marriage of Esther with Ahasuerus; but this could not be, even if we should grant, what is unlikely, that the Artaxerxes of the book of Ezra and the Ahasuerus of the book of Esther were the same person, because Ezra set out for Jerusalem in the first month in the seventh year of the reign of Artaxerxes, and Esther was not taken into the king's house until the tenth month in the seventh year of the reign of Ahasuerus, and did not declare her connection with the Jewish people, and obtain favor for them until after the plot of Haman, in the twelfth year of Ahasuerus. See AHASUERUS.

Ezra assembled the Jews who accompanied him on the banks of the river Ahava, where they halted three days in tents. Here Ezra proclaimed a fast, as an act of humiliation before God, and a season of prayer for divine direction and safe conduct; for, on setting out, he "was ashamed to require a band of soldiers and horsemen to help them against the enemy by the way," because he had asserted to the king that the hand of his God is upon all them that seek him for good. Ezra next committed the care of the treasures which he carried with him to twelve of the chief priests, assisted by ten of their brethren, appointing these to take charge of the treasures by the way, and deliver them safely in the house of the Lord at Jerusalem. On the twelfth day from their first setting out Ezra and his companions left the river Ahava, and arrived safely at Jerusalem in the fifth month, having been delivered from the hand of the enemy and of such as lay in wait by the way. Three days after their arrival the treasures were weighed and delivered

into the custody of some Levites. The returning exiles offered burnt-offerings to the Lord. They delivered also the king's commissions to the viceroys and governors, and gave needful help to the people and the ministers of the Temple.

Ezra's ample commission had been granted him at his own request (ver. 6), and it appears that his great design was to effect a religious reformation among the Palestinian Jews, and to bring them back to the observance of the law of Moses, from which they had grievously declined. His first care, accordingly, was to enforce a separation from their wives of all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. For this an opportunity soon presented itself. When he had discharged the various trusts committed to him, the princes of the Jews came to him and complained that the Jewish people generally who had returned from the captivity, and also the priests and Levites, but especially the rulers and princes, had not kept themselves separate from the people of the land, but had done according to the abominations of the remnant of the nations whom their forefathers had driven out, and married their daughters, and allowed their children to intermarry with them. On this report Ezra evinced his deep affliction, according to the Jewish custom, by rending his mantle and tearing the hair of his head and beard. There gathered round him all those who still feared God, and dreaded his wrath for the transgression of those whom he had brought back from captivity. Having waited till the time of the evening sacrifice, Ezra rose up, and, having again rent his hair and his garments, made public prayer and confession of sin. The assembled people wept bitterly, and Shechaniab, one of the sons of Elam, came forward to propose a general covenant to put away the foreign wives and their children. Ezra then arose and administered an oath to the people that they would do accordingly. Proclamation was also made that all those who had returned from the captivity should within three days gather themselves together to Jerusalem, under pain of excommunication and forfeiture of their goods. The people assembled at the time appointed, trembling on account of their sin and of the heavy rain that fell. Ezra addressed them, declaring to them their sin, and exhorting them to amend their lives by dissolving their illegal connections. The people acknowledged the justice of his rebukes, and promised obedience. They then requested that, as the rain fell heavily, and the number of transgressors was great, he would appoint times at which they might severally come to be examined respecting this matter, accompanied by the judges and elders of every city. A commission was therefore formed, consisting of Ezra and some others, to investigate the extent of the evil. This investigation occupied three months. Josephus relates the affecting scene which occurred on the reading of the law by Ezra (*Ant.* xi, 5, 5). The account given by Josephus agrees with that of Nehemiah in all leading particulars, except that Josephus places the date and occasion in the reign of Xerxes (*Ant.* xi, 5, 1).

With the detailed account of this important transaction Ezra's autobiography ends abruptly, and we hear nothing more of him till, thirteen years afterwards, in the twentieth of Artaxerxes, we find him again at Jerusalem with Nehemiah the "Tirshatha." (*Ezra* vii, 11), and to carry thither "the silver and gold which the king and his counsellors had freely offered unto the God of Israel" (ver. 15), and as there is no trace whatever of his presence at Jerusalem between the eighth and the twentieth of Artaxerxes, it seems probable that after he had effected the above-named refor-

mation, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. This is in itself what one would expect, and what is borne out by the parallel case of Nehemiah, and it also accounts for the abrupt termination of Ezra's narrative, and for that relapse of the Jews into their former irregularities which is apparent in the book of Nehemiah. Such a relapse, and such a state of affairs at Jerusalem in general, could scarcely have occurred if Ezra had continued there. Whether he returned to Jerusalem with Nehemiah, or separately, does not appear certainly, but as he is not mentioned in Nehemiah's narrative till after the completion of the wall (*Neh.* viii, 1), it is perhaps probable that he followed the latter some months later, having, perhaps, been sent for to aid him in his work. The functions he executed under Nehemiah's government were purely of a priestly and ecclesiastical character, such as reading and interpreting the law of Moses to the people during the eight days of the feast of Tabernacles, praying in the congregation, and assisting at the dedication of the wall, and in promoting the religious reformation so happily effected by the Tirshatha. But in such he filled the first place, being repeatedly coupled with Nehemiah the Tirshatha (*viii.* 9; *xii.* 26), while Eliashub the high-priest is not mentioned as taking any part in the reformation at all. In the sealing to the covenant described in *Neh.* x, Ezra perhaps sealed under the patronymic Seraiah or Azariah (*v.* 2). In *Neh.* viii we read that, on the occasion of the celebration of the feast of the seventh month, subsequently to Nehemiah's numbering the people, Ezra was requested to bring the book of the law of Moses; and that he read therein standing upon a pulpit of wood, which raised him above all the people. As Ezra is not mentioned after Nehemiah's departure for Babylon in the thirty-second of Artaxerxes, and as everything fell into confusion during Nehemiah's absence (*Neh.* xiii), it is not unlikely that Ezra may have again returned to Babylon before that year. See NEHEMIAH.

3. *Traditionary Acts.*—Josephus, who should be our next best authority after Scripture, evidently knew nothing about the time or the place of his death. He vaguely says, "He died an old man, and was buried in a magnificent manner at Jerusalem" (*Ant.* xi, 5, 5), and places his death in the high-priesthood of Joacim, and before the government of Nehemiah! According to some Jewish chroniclers, he died in the year in which Alexander came to Jerusalem, on the tenth day of the month Tebeth (that is, the lunation in December), in the same year in which took place the death of the prophets Haggai, Zechariah, and Malachi, and in which prophecy became extinct. According to other traditions, Ezra returned to Babylon and died there at the age of 120 years. The Talmudic statement is that he died at Zamzumu, a town on the Tigris, while on his road from Jerusalem to Susa, whither he was going to converse with Artaxerxes about the affairs of the Jews. Thus Benjamin of Tudela says of Nehar-Samorah (apparently Zamuza, otherwise Zamzumu): "The sepulchre of Ezra the priest and scribe is in this place, where he died on his journey from Jerusalem to King Artaxerxes" (*Travels*, i, 116). A tomb said to be his is shown on the Tigris, near its junction with the Euphrates (*Layard, Nin. and Bab.* p. 428, note). An interesting description of this tomb is given by Kitto (*Pict. Bible*, note at the end of Ezra).

As regards the traditional history of Ezra, it is extremely difficult to judge what portion of it has any historical foundation. The principal works ascribed to him by the Jews, and, on the strength of their testimony, by Christians also, are the following:

(1.) Some traditions assert that Ezra was, about A. M. 3113, the president of the *בְּנֵי שֵׁנַי הַגְּדוּלָה*, *Synagoga Magna*, and the father of all Mishnic doctors. See

Reputed Tomb of Ezra.

**SYNAGOGUE, GREAT.** In piety and meekness he was like Moses (*Yuchasin*, p. 13. See *Zemach David*). When he went from Babylon to Jerusalem, he took with him all persons whose descent was either illegitimate or unknown, so that the Jews left in Babylon should be נָקִי כֶסֶלֶת, *pure like flour* (*Kiddushin*, c. 4, 1, Gem.). Ezra is said to have introduced the present square Hebrew character, and, in conjunction with some other elders, to have made the Masora (q. v.), the punctuation, and accentuation of the whole Bible (*Abarbanel, Prefat. ad Nuchalah Aboth*; *Elias, Prefat. 3 Masor.*). Ezra is also said to have vigorously resisted the sect of the Sadducees, which sprang up in his days; and therefore to have put the words מֶן כִּלְבֵּם הַדְּוֹלָם עַד כִּלְבֵּם, *à seculo in seculum*, at the head of all prayers, as a symbol by which the orthodox could be distinguished (*Bab. Berachoth*, fol. 51). Since the people, during the Babylonian captivity or exile, had become accustomed to the Aramaic language, and scarcely understood Hebrew, Ezra established the office of turgoman, תְּרוּגְמָן, *turgoman*, or interpreter, who stood near the public reader in the synagogue, and translated every verse after it was read (*Megillah*, fol. 74). Hence he is usually regarded as the founder of the synagogue worship. See **SYNAGOGUE**. Ezra ordained that the year of jubilee should be reckoned from the seventh year after the rebuilding of the Temple (*Maimonides, Hal. Jubel*, cap. 10).

(2.) Ezra is considered to be the author of the canon, and worthy to have been the lawgiver, if Moses had not preceded him (*Bab. Sanhed.* c. ii, f. 21; comp. the art. **CANON**). He is even said to have rewritten the whole of the Old Testament from memory, the copies of which had perished by neglect. To him is also ascribed the authorship of the books of Chronicles, Ezra, Nehemiah, and, some add, Esther; and, many of the Jews say, also of the books of Ezekiel, Daniel, and the twelve prophets; to which we may with more probability perhaps add the 119th Psalm. (See each book in its place.) Tischendorf has lately published (*Apocalypses Apocrypher*, Lips. 1866) an *editio princeps* of the Greek text of an "Apocalypsis Esdræ." See **REVELATIONS (SPURIOUS)**.

But we must abstain from recounting all the traditional amplifications of the doings of Ezra, since, if all were to be received, it would be difficult to say what he did not do, so strong has been the inclination to connect important facts with his person (comp. 2 Esdr. xiv; *Irenæus, adv. Hæres.* iii, 25; *Clem. Alexandr. Strom.* i, p. 142; *Augustin. De Mirabil. Script.* ii, 23; *Jerome, ad Hebr. l.* p. 212; *Buxtorf, Tiberias*, p. 88

sq.; *Bertholdt, Einleit.* i, 69 sq.; *De Wette, Einleit.* p. 17 sq.; *Sauer, Dissert. in canonem Vet. Test.* etc., Altorf, 1792; *Scnehdrin*, fol. xxi, 1; *Rau, De Synag. Magna*, p. 31, 89; *Hartmann, Verbindung des Alten und Neuen Testaments*, p. 114 sq.). Of most of the above acts of Ezra a full account is given in *Prideaux's Connexion*, i, 308-348, and 355-376; also in *Otho's Lex. Rabb.* p. 208 sq. A compendious account of the arguments by which most of these Jewish statements are proved to be fabulous is given in *Stehelin's Rabb. Literat.* p. 5-8; of which the chief are drawn from the silence of the sacred writers themselves, of the apocryphal books, and of Josephus—and it might be added, of Jerome—and from the fact that they may be traced to the author of the chapter in the Mishna called *Pirke Aboth*. Arabian fables about Ezra are mentioned in *Hottinger's Thes. Philol.* p. 113, and in *Herbelot, Bibl. Orientale*, p. 697, etc.—*Kitto*, s. v.; *Smith*, s. v.

**EZRA, BOOK OF.** This is manifestly a continuation of the books of Chronicles, as, indeed, it is called by *Hilary*, bishop of Poitiers, *Sermones dierum Esdræ* (*ap. Cosin's Canon of Script.* p. 51), and as was early conceded (*Huetius, Dem. Evang.* iv, 14, p. 341). See **CHRONICLES (BOOKS OF)**.

**I. Contents.**—The book of Ezra contains ἀπομνημονεύματα, *memorabilia*, or records of events occurring about the termination of the Babylonian exile. It contains accounts of the favors bestowed upon the Jews by the Persian kings; of the rebuilding of the Temple; of the mission of Ezra to Jerusalem, and his regulations and reforms. Such records forming the subject of the book of Ezra, we must not be surprised that its parts are not so intimately connected with each other as we might have expected if the author had set forth his intention to furnish a complete history of his times (see *Pemble, Persian Monarchy*, in his *Works*, Lond. 1635, p. 345). The events narrated in the book of Ezra are spread over the reigns of

	Years.	Months.
Cyrus.....	7	0
Cambyses.....	7	5
Magus, or Pseudo-Smerdis.....	0	7
Darius Hystaspis.....	36	0
Xerxes.....	19	5
Artabanus.....	0	7
Artaxerxes (in the eighth year of whose reign the records of Ezra cease).....	8	0
Total.....	79	0

The arrangement of the facts in the book of Ezra is chronological. The book may be divided into two portions. The first consists of chapters i-vi, and contains the history of the returning exiles and of their rebuilding of the Temple, and comprises the period from the first year of Cyrus, B.C. 536, to the sixth year of Darius Hystaspis, B.C. 515. The second portion contains the personal history of the migration of Ezra to Palestine, in the seventh year of Artaxerxes. This latter portion, embracing chapters vii-x, is an autobiography of Ezra during about twelve or thirteen months, in the seventh and eighth years of the reign of Artaxerxes Longimanus.

**II. Plan.**—The course of events recorded in these ten chapters appears to be as follows: First, the decree of king Cyrus, putting an end to the Babylonish captivity, and instructing the returning Israelites to rebuild the Temple and restore the worship of Jehovah (ch. i). Second, the consequent proceedings of the people (ch. ii, iii). Third, the hindrances to which they were exposed by the jealousy of the Persian government, stimulated as this was by the hatred of the neighbors of the Jews, until Darius discovered the original decree of Cyrus, and confirmed and extended it, so that the Temple was fully rebuilt, and the worship restored according to the law (ch. iv, v, vi). Fourth, the mission of Ezra, who was both a priest and a scribe, and was empowered by king Artaxerxes not only to maintain the prescribed worship, but, greatly more than that, to restore the entire theocratic admin-

istration, only reserving the temporal supremacy of the Persian monarchy (ch. vii, viii). Lastly, the reconstruction of this theocratic state, which Ezra effected so completely that he carried the people with him in remodelling the family relations by the law against intermarriage with certain races (ch. ix, x).

III. *Unity*.—This is a complete narrative in itself; and there is no room for the hypothesis that Chronicles, Ezra, and Nehemiah, taken together, form one great historical work. The arguments for this hypothesis are of no weight in themselves for establishing the conclusion; but in so far as they are statements of fact, they are willingly put forward by us as circumstances worthy of consideration in themselves, and apart from the illogical purpose to which they have been applied. 1. The three books have a large number of words and phrases in common, which are not met with at all, or at least not frequently, in other parts of Scripture. This agrees well with their composition at a new epoch in the history of the Hebrew nation and its literature, by men who had been brought up in the land of Assyria or Babylonia, perhaps brought up together at the same Persian court, Ezra and Nehemiah being also most intimate friends and fellow-workers. The opinion is also probable that the Chronicles were compiled by Ezra, as well as the book to which his own name has been given. 2. There is a predilection for genealogical details running through all these books. This seems to have been characteristic of the age; and it was probably necessary, considering the efforts to restore the old arrangements as to the holding of property, the administration of government, and the preservation of ancient national feeling, all of which objects were likely to force genealogical questions upon the notice of men. 3. There is a similar prominence given to details about the priests and Levites. This is unavoidable in any treatment of the people of Israel, unless their character as the Church of God is to be overlooked. Especially, in whatever proportion there were difficulties felt as to the revival of the more political aspects of the theocracy, in that same proportion must the greater attention have been given to its ecclesiastical arrangements.

IV. *Authorship*.—A late ingenious writer (Rev. and Lord Hervey, in Smith's *Dict. of the Bible*, s. v.) thus pronounces on this question: "Like the two books of Chronicles, it consists of the contemporary historical journals kept from time to time by the prophets, or other authorized persons, who were eye-witnesses for the most part of what they record, and whose several narratives were afterwards strung together, and either abridged or added to, as the case required, by a later hand. That later hand, in the book of Ezra, was doubtless Ezra's own, as appears by the last four chapters, as well as by other matter inserted in the previous chapters. While, therefore, in a certain sense, the whole book is Ezra's, as put together by him, yet strictly only the last four chapters are his original work. Nor will it be difficult to point out with tolerable certainty several of the writers of whose writings the first six chapters are composed." Accordingly, that writer, in imitation of many Rationalists, proceeds to dissect the book for this purpose. 1. Chap. i he assigns as being undoubtedly by Daniel, on account of the otherwise unaccountable silence of that prophet respecting the decree of Cyrus, and the phraseology of Ezra in referring to that event. 2. Chap. ii is assigned to Nehemiah, as being identical with Neh. vii. 3. Chap. iii, 2-vi (except iv, 6-23), he thinks belongs to Haggai, on account of certain coincidences of expression in that prophet. 4. Chap. iv, 6-23, he regards as a parenthetic addition made in the reign of Artaxerxes Longimanus. 5. Chaps. vii-ix are unquestionably Ezra's own production. A still later critic (Dr. Davidson, in the new edit. of Kitt's *Cyclopaedia of Bibl. Lit.* s. v.) is even bolder in distributing various por-

tions to "the Chronist," as he designates the unknown interpolator after Ezra.

It is a sufficient refutation of all such attempts to note their extremely *subjective* character, depending chiefly upon the caprice or conjecture of the critic himself; for the peculiarities cited, when closely examined, are found to be too general and accidental to be relied upon as proofs of authorship, especially in view of the foregoing remarks respecting the scheme of the book. Moreover, if, as all admit, Ezra did incorporate older documents into his history (so even Moses does in the Pentateuch), yet, as he moulded them into a homogeneous narrative, this does not militate against his claim to be regarded as the proper author, and not simply *editor* of the book that bears his name. (See the *Einleitungen* of Hävernick and Keil.)

V. *Personality of the Writer*.—In the first six chapters the use of the third person predominates in the narrative, except in passages where, by *synecdoche*, occurs אֲנִי, Heb. אָנֹכִי, we said, or where the narrative contains abstracts from documents to which Ezra had access. In these abstracts the Aramaic or Chaldean language of the original documents has been preserved from ch. iv, 8 to vi, 18, and vii, 12-26. These portions exist in Kennicott's *Col.* p. 240, in a collateral Hebrew translation, reprinted in Kennicott's edition of the Hebrew Bible, and separately in *Chaldaeorum Danielis et Esrae capitulum interpretatio Hebraica* (Ludovicius Schulze, Halle, 1782, 8vo). An argument has been raised against the opinion that Ezra was the author of the whole book that bears his name from the use of the first person plural in the 4th verse of the 5th chapter, which would seem to imply that the narrator was present on the occasion described; but, setting aside other replies to this argument, it appears that the word *we* refers to Tatnai and his companions, and not at all to the Jews. Ezra speaks from ch. vii, 27, to ch. ix, 15, in the first person. "There is an essential difference between public events which a man recollects, though only as in a dream, to have heard of at the time when they occurred, and those which preceded his birth. The former we think of with reference to ourselves; the latter are foreign to us. The epoch and duration of the former we measure by our own life; the latter belong to a period for which our imagination has no scale. Life and definiteness are imparted to all that we hear or read with respect to the events of our own life" (Niebuhr, *On the Distinction between Annals and History*). These remarks, which Niebuhr made in reference to Tacitus, are in a great measure applicable also to Ezra. Instances of similar change of person are so frequent in ancient authors that rhetoricians have introduced it among the rhetorical figures under the name of *enallage personarum*. The prophetic writings of the Old Testament furnish examples of such *ἐναλλαγή*. For instance, Ezek. i, 1-3; Zech. i, 1; vi, 1; vii, 1, 4, 8; Jer. xx, 1 sq., comp. with v, 7 sq.; xxi, 1; xxviii, 1-5; xxxii, 1-8; Hos. i, 2-3; iii, 1. So also in Habakkuk, Daniel, etc. The frequency of this *ἐναλλαγή*, especially in the prophetic parts of the Old Testament, arises from either the more objective or more subjective tendency of the style, which of course varies in harmony with the contents of the chapter. (See Fromman, *Disq. qua Orientis regibus plurimum numero de se loqui non inusitatum fuisse, probabiliter ostenditur*, Cob. 1762.) We express our opinion that even Hävernick does not rightly set forth the truth of the matter when, in his *Einleitung*, he says that this *ἐναλλαγή* arose from Ezra's imitation of the prophetic usage, and when he approvingly quotes Schirmer's *Observationes exegeticae et criticae in librum Esrae*, ii, 8 (Vratisl. 1830). There was certainly as little imitation of the prophets in the *enallage personarum* of Ezra as there is imitation of the prophets if we change from the first to the third person in our own communications. *Ἐναλλαγή* never arises

from imitation, but only from the more subjective or more objective turn of our mind, and from that vivacity of style which renders it incumbent upon the reader rather than upon the writer to supply that **הַיְהוֹדוּת**, which, as in Jonah ii, 3, forms the transition from the use of the *third* to the adoption of the *first* person.

VI. *Date*.—The reckless assertions of some writers that this composition as a whole must be referred to a period about a century later than Ezra, or more, need not be noticed, because they have not even a pretence of argument in their favor. One writer, Zunz (*Die gottesdienstl. Vorträge der Juden*, 1832), has indeed alleged that there is some exaggeration about the sacred vessels said to have been restored by Cyrus; but his fellow-unbelievers have refused to agree with him, and have defended the historical credibility of the book throughout. Another critic, Bertheau, sees an evidence of the composition of ch. vi, 22 under the Greek successors of Alexander, because the king of Persia is called the king of *Assyria*; an argument which might have been left to its own weakness, even though we had been unable to give the parallels 2 Kings xxiii, 29; Lam. v, 6, as Keil has done.

On the contrary, critics who rely upon their internal arguments might have seen evidence in favor of its early composition in the fact that its chronology is clear and exact; while the accounts of Jewish affairs under the Persian monarchy, as given by Josephus from apocryphal writers and other sources unknown to us, present extreme confusion and some palpable mistakes. The book begins with the decree of Cyrus after he had taken Babylon, by which the Jews were sent home to Jerusalem and directed to rebuild the Temple, B.C. 536. It narrates the difficulties and hindrances before this was accomplished in the sixth year of Darius, the son of Hystaspes, about B.C. 516. It passes in silence over the rest of his reign, 31 years, and the whole of the reign of Xerxes, 21 years, proceeding directly to the work of Ezra, who received his commission in the seventh year of Artaxerxes Longimanus, B.C. 459. If the whole of the events narrated in the closing chapter took place almost immediately, as is understood, we believe, by all commentators, then the extreme length of time embraced in the narrative is not above 80 years; and the order is strictly chronological, though it is not continuous, but leaves a blank of almost sixty years. (See Hilgenfeld, *Ezra und Daniel, und ihre neueste Bearbeitungen*, Halle, 1863.)

VII. *Language*.—The book is written partly in Hebrew and partly in Chaldee. The Chaldee begins at iv, 8, and continues to the end of vi, 18. The letter or decree of Artaxerxes, vii, 12–26, is also given in the original Chaldee.

VIII. *Canonicity*.—There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. Test. Augustine styles Ezra "rather a writer of transactions than a prophet" (*De Civ. D. i.*, xviii, 36).

IX. *Apocryphal Additions*.—We have spoken thus far of the canonical book of Ezra; there are, however, four books that have received this name, viz. the book noticed above, the only one which was received into the Hebrew canon under that name, the book of Nehemiah, and the two apocryphal books of Esdras, concerning which last see *ESDRAS*.—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

X. *Commentaries*.—The following are special exegetical works on the entire book, the most important being denoted by an asterisk (\*): \*Aben Ezra, **פְּרָשִׁי** (in Buxtorf's Rabbinical Bible, Basle, 1618–19, fol.); Bede, *Expositio* (in *Works*, viii, 360); \*Rashi, **פְּרָשִׁי** (Naples, 1487, 4to; Venice, 1517, fol.; in Latin, under other books, Gotha, 1714, 4to); \*Kimchi, **פְּרָשִׁי** (in Bomberg's Rabbinical Bible, Ven. 1549, fol.); Simeon, **פְּרָשִׁי** (in his Bible, Venice, 1518, fol.);

Jachya, **פְּרָשִׁי** (Bologna, 1538, fol.); Jaabez, **פְּרָשִׁי** (Belvedere, n. d. fol.); Trapp, *Commentary* (London, 1656, fol.); De Oliva, *Commentarii* (Leyden, 1564, 4to; 1679, 2 vols. fol.); \*Strigel, *Commentarius* (Tigur. 1570, 1584, fol.); also *Scholia* (Lips. 1571); Wolpius, *Commentarii* (Tigur. 1584, fol.); Sanctius, *Commentarii* (Leyd. 1628, fol.); Lombard, *Commentarius* (Par. 1643, fol.); Jackson, *Explanation* (London, 1658, 4to); Lee, *Discourse* (London, 1722, 8vo); \*Rambach, *Note* (in Grotii ed. Clerici *Adnot. in Hagiogr.* ii); \*Schirmer, *Observationes* (Vratislav. 1817, 8vo; 1820, 4to); \*Keil, *Apolog. Vers.* etc. (Berl. 1833, 8vo); Kleinert, *Entstehung*, etc. (in the *Dörpt. Beitr.* i, 1–304; ii, 1–232); Jeitteles, **פְּרָשִׁי**, etc. (Vienna, 1835, 8vo); \*Bertheau, *Erlklär.* (in the *Kurt-gef. Exeg. Hdb.* Lpz. 1862, 8vo). See *OLD TESTAMENT*.

4. (Sept. Ἐζρα v. r. Ἐζραῶς, Vulg. *Esdras*.) One of the chief Israelites who formed the first division that made the circuit of the walls of Jerusalem when reconstructed (Neh. xii, 33). B.C. 446.

**Ezrah.** See *BAY-TREE*.

**Ez'rah** (Heb. *Ezrah'*, **עֶזְרָה**, *help*, another form of *Ezer* or *Ezra*; Sept. Ἐζρα, Vulg. *Ezra*, A. V. "Ezra"), a descendant of Judah (as if in the line of Caleb), and the father of several sons, although his own parentage is not given (1 Chron. iv, 17), unless he be identical with the *EZER* of ver. 4, whose son's name, however, does not correspond. B.C. ante 1618. See *MERED*. According to the author of the *Questiones in Paral.* Ezra is the same as Amram, and his sons Jether and Mered are Aaron and Moses; but this is out of the question. See also *EZRAHITE*.

**Ez'rahite** (Hebrew, with the article *ha-Ezrah'i'*, **הַיְהוּדֵי עֶזְרָה**, as if a patronym from *Ezrah*; Sept. ὁ Ζαροῖτης v. r. ὁ Ἐζραῖτης, Vulg. *Ezrahita*), a title attached to two persons—Ethan (1 Kings iv, 51; Ps. lxxxix, title) and Heman (Psa. lxxxviii, title). The word is naturally derivable from *Ezrah*, **עֶזְרָה**, or—which is almost the same—*Zerah*, **זֶרַח**; and accordingly in 1 Chron. ii, 6, Ethan and Heman are both given as sons of Zerah, the son of Judah. Another Ethan and another Heman are named as Levites and musicians in the lists of 1 Chron. vi and elsewhere.—Smith, s. v. In the passage first cited, "the Ezrahite," or, rather, *Ezrahite*, appears as a designation applied to Ethan, a man famous for his wisdom (1 Kings v, 11 [A. V. iv, 31]). See *ETHAN*. In the inscription of Psa. lxxxix, Ethan the Ezrahite is named as its author; and in the inscription of Psa. lxxxviii the same is said with respect to it of Heman the Ezrahite. This has led some to identify the Ethan and Heman, who were chief among the singers appointed by David (1 Chron. xv, 15). But we have no reason to believe that, whatever skill these men had in music, they were famed for surpassing wisdom; and the inscription in the Psalms is perhaps due to the mistake of some one in whose mind the passage in Kings had got mixed up with 1 Chron. ii, 6, where Ethan and Heman appear among the sons of Zerah of the tribe of Judah. As **זֶרַח** is the same as **זֶרַח** with the prosthetic *h*, it is not improbable that in this last passage it is the Ethan of Kings that is referred to; but we cannot with certainty pronounce this, as there is a want of accordance between the statement of the chronicler and that in Kings respecting the parentage of the other persons mentioned. It is not impossible, however, that the names "Heman, Calcol, and Dara" have been interpolated in the text of Chronicles from the passage in Kings, especially as the writer goes on to state only the descendants of Carmi or Zinuri and Ethan (ver. 7, 8). In this case Ethan, the son of Zerah, may be Ethan the Ezrahite; but there is no Heman the Ezrahite.—Kitto, s. v. A readier solution of the whole difficulty would be to

suppose that "Ezrahite" in the title to Psalm lxxxviii is merely an orthographical variety for IZARHITE (עֲזָרְיָהוּ; 1 Chron. xxvi, 23), a Levitical family to which the musical Heman certainly belonged (1 Chron. vi, 33-38); and that the epithet has crept into the title of Psalm lxxxix by assimilation of the names of Ethan and Heman so frequently associated together (these two Psalms being apparently closely related in

authorship, and perhaps originally joined together; see Delitzsch, *Commentar üb. den Psalter*, i, 653 sq.). See ZARHITE.

**Ez'ri** (Heb. *Ezri'*, עֲזָרִיָּה, *helpful*; Sept. Ἐσζήρι v. r. Ἐσζάι, Vulg. *Ezri*), son of Chelub, superintendent for king David of those "who did the work of the field for tillage of the ground" (1 Chron. xxvii, 26). B. C. 1014.

## F.

**Faber, Basil**, a learned German Protestant divine, was born at Sorau, in Lower Lusatia, about 1520, studied at Wittenberg under Melancthon, was rector of the gymnasium at Nordhausen, 1550-55, and afterwards of Quedlinburg, 1563-70. He opposed Melancthon's *Corpus Doctrinæ* and the Crypto-Calvinists, and in 1570 had to leave Quedlinburg on this account. He then taught at Erfurt till his death, 1576. His chief work is the *Thesaurus eruditiois scholasticæ* (Lips. 1571; last ed. Franct. 1749, 2 vols. fol.), a work which still commands consideration for its extensive and exact learning. He was also one of the writers of the Magdeburg Centuries (q. v.).

**Faber** (or **FABRI**), **Felix**, a Dominican monk and Oriental traveller, was born in Zurich, 1441-2, and was educated by the Dominicans at Basel. He early entered the Dominican order, and was made chief preacher in the cloister at Ulm, 1478. His studies were directed to the illustration of the Bible lands, and he made two journeys to the East, one in 1480 to Jerusalem, and one in 1483-4 to Palestine, Egypt, and Sinai. He died March 14, 1502. His principal writings are *Evagatorium in Terræ Sanctæ, Arabiæ et Ægypte peregrinationem* (republished Stuttg. 1843-9, 3 vols. 8vo):—*Historia Suerorum* (Franct. 1605; Ulm, 1727).—Quétif et Echarl, *Script. Ord. Præd.* vol. i; Herzog, *Real-Encyclopædie*, iv, 306.

**Faber, George Stanley**, D.D., an English divine and voluminous writer, was born Oct. 25, 1773, and was educated at the grammar-school of Heppenholtme, and at University College, Oxford, where he passed B.A. in 1792. In 1801, as Bampton lecturer, he preached before the University the discourses which he afterwards published under the title of *Hæc Mosaica*. In 1802 he became curate to his father at Calverley, Yorkshire; in 1805 he was made vicar of Stockton-upon-Tees; in 1811 vicar of Long-Newton, where he remained till 1831, when bishop Burgess presented him to a prebend in the cathedral of Salisbury. In 1832 he was made master of Sherburn Hospital, near Durham. "During his mastership he considerably increased the value of the estates of the hospital. He rebuilt the chapel, the house, and the offices, and greatly improved the grounds; he augmented the incomes of the incumbents of livings under his patronage, restored the chancels of their churches, and erected agricultural buildings on the farms. He died at his residence, Sherburn Hospital, Jan. 27, 1851." Dr. Faber's chief writings are on prophecy, and in them he seeks to show that the prophecies "are not applicable to the destinies of individuals, but to those of governments and nations." His most important writings are *Hæc Mosaica*, or *A Dissertation on the Credibility and Theology of the Pentateuch* (Bampton Lecture, London, 1801, 2 vols. 8vo; 2d ed. 1818, 2 vols. 8vo):—*A Dissertation on the Mysteries of the Cabyri, or the great Gods of Phœnicia, Samothrace, Egypt, Trous, Greece, Italy, and Crete* (Oxford, 1803, 2 vols. 8vo):—*Dissertation on the Prophecies that have been fulfilled, are now fulfilling, or will hereafter be fulfilled, relative to the great Period of 1260 Years* (London, 1806, 2 vols. 8vo; 3d ed. 1811-18, 3 vols. 8vo):—*A general and connected View of the Prophecies relating to the Conversion, Resto-*

*ration, Union, and future Glory of Judah and Israel* (London, 1808, 2 vols. 8vo):—*The Origin of Pagan Idolatry* (London, 1816, 3 vols. 4to):—*A Treatise on the Genius and Object of the Patriarchal, the Levitical, and the Christian Dispensation* (London, 1823, 2 vols. 8vo):—*The sacred Calendar of Prophecy* (London, 1828, 3 vols. 8vo; 1844, 3 vols. 12mo):—*Eight Dissertations on certain connected prophetic Passages of holy Scriptures bearing more or less upon the Promise of a mighty Deliverer* (London, 1845, 2 vols. 8vo):—*Treatise on the Holy Spirit* (London, 1813, 8vo):—*Difficulties of Infidelity* (London, 1824, 8vo; N. Y. 1854, 12mo):—*Difficulties of Romanism* (London, 1826, 8vo):—*On expiatory Sacrifice* (London, 1827, 8vo):—*Primitive Doctrine of Justification* (London, 1837, 8vo):—*Apostolicity of Trinitarianism* (London, 1832, 2 vols. 8vo):—*Primitive Doctrine of Election* (London, 1842, 2d ed. 8vo; Philad. 1842):—*Provincial Letters from the County Palatine of Durham, exhibiting the Nature and Tendency of the Principles put forth by the Writers of "Tracts for the Times," and their various Allies* (1842, 2 vols. 12mo):—*The many Mansions in the House of the Father scripturally discussed and practically considered* (1851, 8vo):—*Primitive Doctrine of Regeneration* (London, 1840, 8vo):—*The Vallenses and Albigenes* (London, 1838, 8vo):—*The Revival of the French Emperors anticipated from the Necessity of Prophecy* (London, 1853, 12mo; N. Y. 1859, 12mo).—*English Cyclopædia*; *Westleyan Magazine*, Nov. 1856.

**Faber** (FÈVRE, DE LA BODERIE), **Gui**, a French theologian, was born at Boderie, Normandy, Aug. 9, 1541. He became secretary of the duke of Alençon, and died in 1598. He was a good linguist, and took part in preparing the Antwerp Polyglot, for which he furnished the Syriac of the N. T. with a Latin translation. He also composed a Chaldaic and a Syriac Grammar, and a Syro-Chaldaic Lexicon, and edited the works of Severus, patriarch of Alexandria, on baptism and the Eucharist, in Syriac, with a Latin translation, and translated Marsil. Ficinus and other writers into French.—Herzog, *Real-Encyclopædie*, iv, 313; Hofer, *Nouv. Biog. Générale*, xxx, 342.

**Faber, Jacobus** (*Lefèvre Jacques*), doctor of the Sorbonne, and grand vicar of Bourges, was born at Coutances, became doctor of the Sorbonne in 1674, and died at Paris July 1, 1716. He wrote a number of pamphlets against the Protestants, as well as against Arnauld, Maimbourg, and Natalis Alexander; and also a defense of the Sorbonne against the Jesuits, for which he was for a time imprisoned in the Bastille.—Feller, *Dictionnaire Historique*, vii, 79; Hofer, *Nouv. Biog. Générale*, xxx, 343.

**Faber, Jacobus Stapulensis** (*Favre, or Le Fèvre d'Étaples Jacques*), an eminent scholar, one of the most zealous of his age for the revival of ancient learning, was born about 1450 (1455?) at Étaples, a village of Picardy. He was educated at the University of Paris, in which he studied mathematics, philosophy, and finally theology. He studied Greek with Hermonymus of Sparta at Paris. In 1492 he travelled into Italy, and studied Aristotle at Florence, Rome, and Venice; and on his return to Paris lectured on Aristotle's writings, and translated a number of them

into Latin. In 1507 he took up his abode in the Benedictine abbey of St. Germain des Près, with Briçonnet, the abbot, who was his pupil and intimate friend. Here he remained till 1520, engaged chiefly in Biblical studies, the first published fruit of which was his *Psalterium Quintuplex*, in five columns, *Gallicum, Romanum, Hebraicum, Vetus, Conciliatum* (Par. 1509, fol). He wrote also *Commentarius in Psalmos*, etc. (Paris, 1515);—*Commentarius in Epist. Catholicas* (Basil, 1527, fol.);—*Commentarius in Quat. Evang.* (Meld. 1522);—*De Tribus Magdalenis* (Par. 1531). He was suspected of Lutheranism, and the Parliament of Paris was about to proceed against him in 1521; but in 1523, Briçonnet, now bishop of Meaux, made him his general vicar, and he removed to Meaux. He was afterwards deprived of his doctors' degree, and compelled to retire to Guicune. Before this, at the request of the queen of Navarre, he had commenced a translation (from the Vulgate) of the N. T. into French, which appeared in 1523. This work was intended for common readers, and was soon widely scattered. "The effect of the dissemination of this version of the Word of God, which formed the basis for the subsequent translation of Robert Olivetanus, so important in the history of the progress of Protestantism in France, was at once visible. The copies were eagerly sought; the poor received the Gospel gratuitously when they could not even pay the small sum demanded, from the liberality of the good bishop. Briçonnet introduced the French Scriptures into the churches of Meaux, where the people listened to the lessons in an intelligible language and were delighted. An autograph letter, recently discovered among the rich treasures of the public library of Geneva, from Lefèvre to his absent pupil Farel, pictures to us the immediate results of the publication, and the glowing hopes of the reformer. He writes: 'Good God, with what joy do I exult when I perceive that the grace of the pure knowledge of Christ has already spread over a good part of Europe; and I hope that Christ is at length about to visit our France with this benediction. You can scarcely imagine with what ardor God is moving the minds of the simple in some places to embrace his Word since the books of the New Testament have been published in French; but you will justly lament that they have not been more widely scattered among the people. Some enemies have endeavored, under cover of the authority of the Parliament, to hinder the work; but our most generous king has become in this matter the defender of the cause of Christ, declaring it to be his will that his kingdom shall hear the word of God without impediment in that tongue which it understands. Now throughout our entire diocese, on feast-days and especially on Sunday, both the Epistle and the Gospel are read to the people in their native tongue, and the parish priest adds a word of exhortation to the Epistle or Gospel, or both at his own discretion' (Letter of Lefèvre, dated Meaux, July 6, 1524, in the *Bulletin de la Société de l'Histoire du Protestantisme Français*, t. xi [1862], p. 212, 213)," cited by Baird, *Methodist Quarterly Review*, 1864, p. 442.

Faber was not fitted for the strife and storm of the times, and to secure quiet, he lived for several years as librarian to the palace at Blois, where he prepared a French translation (from the Vulgate) of the O. T., which appeared in Antwerp in 1528 (4 vols. 8vo). All his affinities, both from study and friendship, being with the Reformation, his last years were embittered by the persecutions suffered by his friends, though he never left the Roman Church. But he "well deserved the name of the forerunner of the Reformation; for in 1512, five years before Luther posted his theses on the doors of the cathedral at Wittenberg, he published his Commentary on the Epistles of St. Paul, which clearly proclaimed the insufficiency of works, and the necessity of faith, as the ground of justification for the sinner. An affecting incident is told of his last hours.

While sitting at the royal table, a few days before his death, Lefèvre was observed to weep, whereupon queen Margaret complained of the sadness of one whose society she had sought for her own diversion, and asked the occasion of his sorrow. 'How can I minister to the joy of others, who am myself the greatest sinner upon earth?' was Lefèvre's mournful and unexpected response. Pressed to explain himself, the old man, after admitting that through a long life he had maintained exemplary morality of conduct, exclaimed in words frequently interrupted by sobs: 'How shall I be able to stand at God's tribunal, who have taught others the purity of the Gospel? Thousands have suffered and died in defence of the doctrine in which I instructed them; and I, unfaithful shepherd that I am, after reaching so advanced an age, when I ought to love nothing less than life, or rather to desire death, have basely avoided the martyr's crown, and betrayed the cause of my God!' The queen and the other persons who were present administered such consolation to the pious Lefèvre as they could find, and shortly afterwards he died, relying on the forgiveness of his Maker, leaving his library to his disciple, Gérard Roussel, and the rest of his scanty property to the poor. The truth of this story, which rests upon the authority of Hubert Thomas, counsellor of state and secretary of the elector palatine, has been discredited by Bayle in his Critical Dictionary, and after him by Tabaraud in the *Biographie Universelle*, and more lately by Haag, in his great work on French Protestant Biography. All rest their rejection of the story chiefly upon the entire silence of the Reformers, who might well be expected to notice so suggestive an occurrence, were it indeed authentic. But in this instance, as in so many others, it has been proved how unreliable are all such arguments. With singular good fortune, M. Jules Bonnet has recently discovered among the unexplored treasures of the Genevese public library a minute, in the handwriting of the reformer Farel, which demonstrates the truth of the circumstances described by Hubert Thomas. He writes: 'Our master, Jacques Lefèvre, of Étapes, when suffering from the disease by which he died, was for some days so greatly terrified by the judgment of God that he cried out that his fate was sealed, saying that he was eternally lost because he had not openly professed the truth of God. This complaint he continued to utter day and night. When Gérard Roussel admonished him to be of good courage and trust in Christ, he answered, "I am condemned; I have concealed the truth which I ought to have professed and openly borne witness to." It was a fearful sight to see so pious an old man so distressed in mind and so overwhelmed by so great a dread of the judgment of God. At length, however, freed from his fears, he began to entertain a good hope in Christ' (published for the first time in the *Bulletin de la Société de l'Histoire du Protestantisme Français*, t. ix [1862], p. 214, 215).—Baird, in *Methodist Quarterly Review*, 1864, p. 41. He died at Nérac in 1536 (1537?). A full account of his writings may be found in the *Zeitschrift für histor. Theol.* (1852), parts i, ii. See also Graf, *Essai sur la vie et les écrits de Lefèvre d'Étapes* (Strasb. 1842); Hofer, *Nouv. Biograph. Générale*, xxx. 334 sq.; Haag, *La France Protestante*; Herzog, *Real-Encyclop.* iv, 310; Krug, *Handwörterbuch d. Philos.* ii, 2 sq.; Dupin, *Eccles. History*, 16th cent. p. 436.

**Faber, Johann** (named MALLEUS HERETICORUM from one of his books against Protestants), archbishop of Vienna, was born at Lentkirch, in Suabia, in 1478, and studied at Freiburg. He early entered the Dominican order. His talents secured him rapid advancement. In 1519 the bishop of Constance made him his vicar general, and in 1526 he was made confessor to Ferdinand (afterwards emperor). At first his literary associations made him friendly with Erasmus and Ecolampadius, and especially with Zwingle, and he opposed the sale of indulgences in Switzerland

strenuously. But about 1520 he went rapidly round to the other extreme of opinion, and in 1522 appeared his *Opus adversus nova quædam dogmata M. Lutheri*. After this he was an unwearied opponent of the Reformation in writings, colloquies, conferences, etc. His zeal was rewarded by the bishopric of Vienna, to which he was raised in 1531. He died in 1541. His principal writings are the *Malleus Hæreticorum* (1524, and Roma, 1569; a revision of the *Opus* above named), and sermons and controversial writings collected into 3 vols. fol. (Cologne, 1537-1541).—Dupin, *Eccles. Hist.* cent. xvi. p. 433; Kettner, *Diss. de I. Fabri Vita et Scriptis* (Lips. 1735, 4to); Herzog, *Real-Encyklop.* iv, 307; Hoefler, *Nouv. Biog. Générale*, xvi, 894.

**Faber, Johannes**, a Dominican monk and polemical writer, born at Heilbronn, 1504. His eloquence and learning gained him early distinction, and in 1534 he was made cathedral-preacher at Augsburg. He wrote largely against the Reformation. Among his writings are *Enchiridion Bibliorum* (Augsb. 1549, 4to);—*Fructus quibus discernuntur heretici* (Augsb. 1551, 4to);—*Quod fides esse possit sine charitate* (Augsb. 1548, 4to);—Joel's *Prophetie erklärt*:—*Testimonium Scripturæ et Patrum, Petrum Apostolum Romæ fuisse*, etc. See Echar, *Script. ord. Præd.* ii, 161; Wetzler und Welte, *Kirchen-Lex.* iii, 870.

**Faber, Johannes**, of Augsburg, a Dominican monk of the 16th century, confessor of the emperor Maximilian, and afterwards court-preacher of Charles V. Erasmus calls him "a mild, eloquent, and learned man." He at first wished mild counsels to be followed against Luther, and sympathized with Erasmus, but afterwards seems to have changed his views. He died about 1531.—Hoefler, *Nouv. Biog. Génér.* xv, 894.

**Faber, Johann Ernst**, a distinguished German Orientalist, was born near Hildburghausen (Saxony), February, 1745. He prepared for the university in the gymnasium at Coburg, and studied under Walch, Heyne, and Michaelis at the University of Göttingen. In 1770 he was called to the chair of Oriental languages at the University of Kiel, and in 1772 to the same position at the University of Jena, where he died March 15 [April 14?], 1774. His most important works are, *Descriptio commentarii in septuaginta interpret.* (Götting. 1768-9, 2 vols. 4to);—*Dissertat. de animalibus quorum fit mentio Zephani*, ii, 14 (ibid. 1769, 4to; reprinted in the *Monuments scythes de la Palestine* by Cramer, Hamb. and Keil, 1777);—*Historia Marmæ inter Hebræos* (pars i, Kiel, 1770; pars ii, Jena, 1773);—*Programmata novum de Messia exactis 490 annis post exilium Judæorum Babilonicum nascituræ* ex Zach. iii, 8, 9, 10; repetitum vaticinium, spatio LXX, hebdomadum Dan. ix, 24 (ibid. [1771?] 1772, 4to);—*Jesus ex natalium opportunitate Messias* (Jena, 1772, 8vo);—*Archæologie der Hebræer*, vol. i (Halle, 1773, 8vo). Faber was also author of an Arabic Grammar and Chrestomathy, which he published at Jena in 1773.—Pierer, *Univ. Lex.* vi, 53; *Biog. Universelle*, xiv, 5; Kitto, *Cycl. of Bibl. Lit.* iii, 1; Doering, *Theol. Deutschlands*, i, 390. (J. H. W.)

**Faber, Johann Melchior**, was born Jan. 18, 1743, near Hildburghausen (Saxony), and was educated at the gymnasium of Coburg and at the University of Göttingen. In 1768 he was appointed professor of Hebrew and Greek at the gymnasium of Thorn (Prussia); in 1770 he was called to Coburg as professor of Greek and Rhetoric; and four years later (1774) he was made rector of the gymnasium at Ansbach. In 1795 he became church-counsellor (Kirchenrath). He died January 31, 1809. Most of his writings were published in the form of programmes. He was also a contributor to the *Repertorium für biblische und morgenländische Literatur*, and to Gabler's *Theologisches Journal*. The most important of his theological programmes are, *Programmata sex super libro Sapientie* (Ansbach, 1776-77, 4to; of which a second part, ibid. 1786-89, 4to);—*Observationes in Epistolam*

*Jacobi ex Syro* (ibid. 1771, 4to);—*De templorum apud Christianos antiquitate dubia* (ib. 1774, 4to);—*Litteras olim pro vocibus in numerantibus a scriptoribus V. T. esse adhibitas* (ibid. 1775, 4to);—*Unde origo doctrine de immortalitate animarum repetenda videatur* (ibid. 1773, 4to);—*In loca quedam Habacuci Prophete* (ibid. 1773, 4to);—*In Malachiam Prophetam* (ibid. 1779, 4to);—*Quo Eusebianæ de Jacobi, fratris Jesu, vita et morte narrationis partes quedam explicantur ac defenduntur* (ibid. 1793, 4to);—*Harmonia Maccabæorum* (pars i, ibid. 1794; pars ii, 1797, 4to).—Doering, *Theologen Deutschlands*, i, 395; Kitto, *Cyclop. of Bibl. Lit.* ii, 1. (J. H. W.)

**Faber, Petrus** (*Pierre Favre*), born in Saxony, 1506, was one of the nine original companions of Loyola in the establishment of the order of Jesuits. He was a zealous coadjutor of Loyola, and rendered great service to the interests of the new order by his missionary journeys into Italy, Spain and Germany. He died in 1546, on his way to the Council of Trent. His life, by Orlandini, was published at Rome, 1615, fol.; Lyons, 1617, 8vo.—Migne, *Dict. de Biographie*, ii, 156. See LOYOLA; JESUITS.

**Faber** (*Favre*), **Pierre François**, a Roman Catholic divine, was born about the opening of the 18th century, at St. Barthelemie, canton de Vand. He was priest at Laudun, in Lower Languedoc, when chosen by the bishop of Halicarnassus, François de la Baume, personal secretary and confessor on his visitation-tour to Cochín China. They reached Macao July 15, 1738, and were there, under the pretence of being entertained as visitors, kept as prisoners of the Jesuits some eight months. On their arrival in Cochín China in May, the bishop commenced his visitation work among the missionaries. The converted natives complained bitterly against certain missionaries who had excommunicated them under pretence of Jansenism, but really on account of their refusal to adhere to the heathen ceremonies and funeral sacrifices which the Jesuits allowed their Chinese converts to follow. The bishop took the side of the people, and was accused by the Jesuits before the mandarins as a disturber of the public peace, and he, as well as his secretary, narrowly escaped execution. The bishop appointed Favre his agent to visit the Southern provinces. The opposition with which both were met by the Jesuits shortly afterwards inclined the bishop to divide the country between the Jesuits, the French missionaries, and the Franciscans. The death of the bishop was hastened by sorrow and ill treatment as Faber has it, or by poison as one of the Franciscans reported to Rome. Faber attempted to assume the duties of his position as agent, but, finding that he could not act with success against the opposition of the Jesuits, he returned to Rome August 8, 1741, in order to report to the propaganda and to the pope. But even in Rome he found the Jesuits beforehand in undermining him by slander and every other means in their power, and the decree of the pope did not appear until Faber had almost abandoned the hope of ever receiving it. This decree (issued 1745) in the main sanctioned the acts of Faber and his predecessor. He gives a full account of the mission in *Lettres édifiantes et curieuses sur la visite apostolique de M. de la Baume, Evêque d'Halicarnasse, à la Cochinchine en 1740; où l'on voit les royaumes et les travaux de ce zélé Prélat, la conduite des Missionnaires Jésuites, et de quelques autres, avec de nouvelles observations*, etc. The work was condemned by the bishop at Lausanne, and was publicly burned at Freiburg. All copies that could be procured the Jesuits bought up, in order to prevent its circulation. An extract is given by Simler in his *Samml. a. u. n. Urkunden zur Beleuchtung der Kirchengesch.* i, 195-256.—Herzog, *Real-Encyklop.* iv, 309.

**Faber Tanaquil**. See LEFEBVRE TANNEGUY.

**Faber the Oratorian**. See FABRE.

**Fabianus** (pope) is recorded as the 19th bishop

of Rome, from 236 to 250, but there is some dispute both as to his name and as to the time of his episcopate. In the Alexandrian Chronicle he is called Flavianus. Eusebius gives an account of certain wonders that happened on his election to the bishopric. "The faithful had assembled in a church for the purpose of the election, and several persons of consideration were proposed, without any thought of Fabianus, though he was present. Of a sudden, a white dove descended from above and alighted on his head. Then the faithful, recalling to their recollection that the Holy Spirit had manifested itself in a like form at the baptism of Jesus Christ, exclaimed that God had exhibited to them his will. Immediately Fabianus was proclaimed pope, and conducted to the episcopal see without other formality than the imposition of hands" (*Hist. Eccles.* vi, 29). From this fable the court of Rome derives support for its theory that the Holy Ghost always directs in the election of a pope. Cardinal Gusa says that "what happened in the election of Fabianus happens to every pope, though we do not see it with our natural eyes. In vain, electors, are all your intrigues; the person on whose head the heavenly dove perches will, in spite of them, be chosen" (*De Meth. Consistorii*, vii, 85). We have had strange illustrations of this in Borgia and others. Fabianus suffered martyrdom in Decius's persecution, A.D. 250. See *Acta Sanctorum*, Jan. 20; Tillemont, *Mémoires*, iii, 364; A. Butler, *Lives of Saints*, Jan. 20; Bower, *History of the Popes* (London, 1750), i, 47.

**Fable** (*μῦθος*, a *myth*), a legend or fictitious story, applied in the N. T. (1 Tim. i, 4; iv, 7; 2 Tim. iv, 4; Titus i, 14; 2 Pet. i, 16) to the Jewish traditions and speculations which were prevalent in the apostolic days, and were afterwards embodied in the Talmudical writings. (See Fleischnann's *Comment.* in 1 Tim. i, 4.)

1. Taking the words fable and parable, not in their strict etymological meaning, but in that which has been stamped upon them by current usage, looking, i. e. at the *Æsopie* fable as the type of the one, at the parables of the N. T. as the type of the other, we have to ask (*a.*) in what relation they stand to each other as instruments of moral teaching? (*b.*) what use is made in the Bible of this or of that form? That they have much in common is of course obvious enough. In both we find "statements of facts, which do not even pretend to be historical, used as vehicles for the exhibition of a general truth" (Neander, *Life of Christ*, Harper's ed. p. 67). Both differ from the *Mythus*, in the modern sense of that word, in being the result of a deliberate choice of such a mode of teaching, not the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus. What are the characteristic marks by which one differs from the other, it is perhaps easier to feel than to define. Thus we have (comp. Trench, *On Parables*, p. 2) (i.) Lessing's statement that the fable takes the form of an actual narrative, while the parable assumes only that what is related might have happened; (ii.) Herder's, that the *différence* lies in the fable's dealing with brute or inanimate nature, in the parable's drawing its materials exclusively from human life; (iii.) Olshausen's (on Matt. xiii, 1), followed by Trench (*l. c.*), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the following extract from Neander (*l. c.*): "The parable is distinguished from the fable by this, that in the latter, qualities or acts of a higher class of beings may be attributed to a lower (e. g. those of men to brutes), while in the former the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. . . . The mere introduction of brutes as

personal agents in the fable is not sufficient to distinguish it from the parable which may make use of the same contrivance; as, for example, Christ employs the sheep in one of his parables. The great distinction here, also, lies in what has already been remarked; brutes introduced in the parable act according to the law of their nature, and the two spheres of nature and of the kingdom of God are carefully separated from each other. Hence the reciprocal relations of brutes to each other are not made use of, as these could furnish no appropriate image of the relation between man and the kingdom of God."

Of the fable as thus distinguished from the parable we have but two examples in the Bible: (1.) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix, 8-15); (2.) that of the cedar of Lebanon and the thistle, as the answer of Jehoash to the challenge of Amaziah (2 Kings xiv, 9). The narrative of Ezek. xvii, 1-10, though, in common with the fable, it brings before us the lower forms of creation as representatives of human characters and destinies, differs from it in the points above noticed, [1.] in not introducing them as having human attributes; [2.] in the higher prophetic character of the truths conveyed by it. The great eagle, the cedar of Lebanon, the spreading vine, are not grouped together as the agents in a fable, but are simply, like the bear, the leopard, and the lion in the visions of Daniel, symbols of the great monarchies of the world.

In the two instances referred to, the fable has more the character of the Greek *αἶνος*, or supernatural *tale* (Quintil. *Inst. Orat.* v, 11), than of the *μῦθος*, or *myth*; that is, it is less the fruit of a vivid imagination, sporting with the analogies between the worlds of nature and of men, than a covert reproof, making the sarcasm which it affects to hide all the sharper (Müller and Donaldson, *History of Greek Literature*, vol. i, c. xi). The appearance of the fable thus early in the history of Israel, and its entire absence from the direct teaching both of the O. and N. T., are, each of them in its way, significant. Taking the received chronology, the fable of Jotham was spoken about B.C. 1209. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The earliest Greek *αἶνος*, or proper fable, is that of Hesiod (*Op. et D.* v, 202), and the prose form of the fable does not meet us till we come (about B.C. 550) to Stesichorus and *Æsop*. The first example in the history of Rome is the apologue of Menenius Agrippa, B.C. 494, and its genuineness has been questioned on the ground that the fable could hardly at that time have found its way to Latium (Müller and Donaldson, *l. c.*). It may be noticed, too, that when collections of fables became familiar to the Greeks, they were looked upon as imported, not indigenous. The traditions that surround the name of *Æsop*, the absence of any evidence that he *wrote* fables, the traces of Eastern origin in those ascribed to him, leave him little more than the representative of a period when the forms of teaching, which had long been familiar to the more Eastern nations, were travelling westward, and were adopted eagerly by the Greeks. The collections themselves are described by titles that indicate a foreign origin. They are *Libyan* (Arist. *Rhet.* ii, 20), *Cyprian*, *Cilician*. All these facts lead to the conclusion that the Hebrew mind, gifted, as it was, in a special measure with the power of perceiving analogies in things apparently dissimilar, attained, at a very early stage of its growth, the power which does not appear in the history of other nations till a later period. Whatever antiquity may be ascribed to the fables in the comparatively later collection of the Pancha Tranta, the land of Canaan is, so far as we have any data to conclude from, the fatherland of fable. To conceive brutes or inanimate objects as representing human characteristics, to personify them as acting, speaking, reasoning, to draw lessons from them applicable to human life—this

must have been common among the Israelites in the time of the judges. The part assigned in the earliest records of the Bible to the impressions made by the brute creation on the mind of man when "the Lord God formed every beast of the field and every fowl of the air, and brought them unto Adam to see what he would call them" (Gen. ii, 19), and the apparent symbolism of the serpent in the narrative of the Fall (Gen. iii, 1), are at once indications of teaching adapted to men in the possession of this power, and must have helped to develop it (Herder, *Geist der Ebräischen Poesie, Werke*, xxxiv, p. 16, ed. 1826). The large number of proverbs in which analogies of this kind are made the bases of a moral precept, and some of which (e. g. Prov. xxvi, 11; xxx, 15, 25-28) are of the nature of condensed fables, show that there was no decline of this power as the intellect of the people advanced. The absence of fables accordingly from the teaching of the O. T. must be ascribed to their want of fitness to be the media of the truths which that teaching was to convey. The points in which brutes or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indolence, cunning, and the like, and the lessons derived from them accordingly do not rise higher than the prudential morality which aims at repressing such defects (comp. Trench, *On the Parables*, l. c.). Hence the fable, apart from the associations of a grotesque and ludicrous nature which gather round it; apart, too, from its presenting narratives which are "nec veræ nec verisimiles" (Cicero, *De Invent.* i, 19), is inadequate as the exponent of the higher truths which belong to man's spiritual life. It may serve to exhibit the relations between man and man; it fails to represent those between man and God. To do that is the office of the PARABLE, finding its outward framework in the dealings of men with each other, or in the world of nature as it is, not in any grotesque parody of nature, and exhibiting, in either case, real and not fanciful analogies. The fable seizes on that which man has in common with the creatures below him; the parable rests on the truths that man is made in the image of God, and that "all things are double one against another."

It is noticeable, as confirming this view of the office of the fable, that, though those of Æsop (so called) were known to the great philosopher of righteousness at Athens, though a metrical paraphrase of some of them was among the employments of his imprisonment (Plato, *Phædo*, p. 60, 61), they were not employed by him as illustrations, or channels of instruction. While Socrates shows an appreciation of the power of such fables to represent some of the phenomena of human life, he was not, he says, in this sense of the word, *μυθολογικός*. The myths, which appear in the *Gorgias*, the *Phædrus*, the *Phædo*, the *Republic*, are as unlike as possible to the Æsopic fables, are (to take his own account of them) *οὐ μῦθοι ἀλλὰ λόγοι*, true, though figurative, representations of spiritual realities, while the illustrations from the common facts of life which were so conspicuous in his ordinary teaching, though differing in being comparisons rather than narratives, come nearer to the parables of the Bible (compare the contrast between τὰ Σωκρατικά, as examples of the *παραβολή* and the *λόγοι Αἰσώπειοι*, Aristot. *Rhet.* ii, 20). It may be said, indeed, that the use of the fable as an instrument of teaching (apart from the embellishments of wit and fancy with which it is associated by such writers as Lessing and La Fontaine) belongs rather to childhood, and the child-like period of national life, than to a more advanced development. In the earlier stages of political change, as in the cases of Jotham, Stesichorus (Aristot. *Rhet.* l. c.), Menenius Agrippa, it is used as an element of persuasion or reproof. It ceases to appear in the higher eloquence of orators and statesmen. The special excellence of fables is that they are *δημιουργοί* (Aristot. *Rhet.* l. c.); that "ducere animos solent, præcipere rusticorum et

imperitorum" (Quintilian, *Instit. Orat.* l. c.).—Smith, s. v.

2. The *μῦθοι*, or "fables" of false teachers claiming to belong to the Christian Church, alluded to by writers of the N. T. in connection with "endless genealogies" (*γενεαλογίαι ἀπέραντοι*, 1 Tim. i, 4), or with disparaging epithets ("Jewish," *Ἰουδαῖοι*, Tit. i, 14; "old wives," *γραιῶντι*, 1 Tim. iv, 7; "cunningly devised," *σεσφωσμένοι*, 2 Pet. i, 16), do not appear to have had the character of fables, properly so called. As applied to them, the word takes its general meaning of anything false or unreal. Thus Paul exhorts Timothy and Titus (1 Tim. i, 4; iv, 7; Titus i, 14) to shun profane and Jewish fables, as having a tendency to seduce men from the truth. By these fables some understand the reveries of the Gnostics; but the fathers generally, and most modern commentators, interpret them of the vain traditions of the Jews. The great reservoir of Jewish tradition is the book, or rather the books, called the Talmud. At the time of the Christian era, the traditions, as they were called, of the law (by which was meant the decisions of the doctors on disputed points of the Mosaic code, and the extravagant fables with which they adorned their comments) had attained so great a bulk and so high a degree of veneration as quite to supersede the law itself in the common estimation. These traditions, which were supposed to have been handed down, some from the era of Moses, and some from a period far anterior, were, for the most part, mere directions for ridiculous ceremonies, questions of absurd casuistry, and fables which by their absurdity alone would have disgusted any other nation. Some of these fables and legends are too impious and blasphemous to be quoted, but we select a few specimens. Adam, of whose knowledge we can hardly form too high an idea, was said to be endowed with magic. "God," say the Talmudists, "gave him a precious jewel, the very sight of which would cure all diseases; this came afterwards into the possession of Abraham, but after his death, because, by reason of its exceeding brightness, it was likely to be worshipped, God hung it in the sun." Our first parents were, according to rabbinical tradition, of a gigantic stature; and this legend has been borrowed and improved by the Mohammedans. The transmigration of souls is much insisted on in the Talmud, and the soul of Adam is said to have passed successively into the bodies of Noah and David; it will also pass into the Messiah. This doctrine they took from the Egyptian mythology, and it is still more ancient than their residence in Egypt. Abraham was the person to whom, they say, it was first revealed, and he taught that the souls of men passed into women, beasts, birds, and even reptiles, rocks, and plants. The spirit of a man was punished by passing into a woman; and if the conduct of the man had been very atrocious, it took some reptile or inanimate form; and if a woman act righteously, she will, in another state, become a man. Thus the ass that carried Balaam, the ravens that fed Elijah, the whale that swallowed Jonah, are all supposed to have possessed reasonable, transmigrated souls. The Mishna says, "The two tables of stone were upwards of two tons weight, but the moment God's word and commandments were engraved thereon by the *shamir*, they became as light as a feather. When Moses left the mount and came within sight of the molten calf, and heard the multitude shouting, he was alarmed; so that when the rays of the molten calf, which were of gold, came in contact with the tables of stone, the letters thereon immediately flew away, and the tables of stone returned to their former weight, which was more than Moses could support, and therefore he threw them down, and they brake in pieces." It is also said that Moses was the richest man that ever was or ever will be. His riches consisted of diamonds, which he obtained possession of in the same way that every laborer gets rewarded, by be-

ing considered worthy of his hire. Moses never looked for any emolument from the Jews, and God therefore rewarded him in this manner. The two tables of stone were one solid mass of diamonds, and the chippings that came from the two tables were his own perquisites. But what was truly wonderful and astonishing, as the chippings flew off, they became regular and beautiful in their form. This circumstance gave the wicked Jews occasion to charge him with breaking the tackles purposely, in order that he might have the opportunity to obtain more chippings. It is said that Elijah the prophet is going about the world as an ambassador of God, and is everywhere present at one time, and is in his person a venerable old man, wearing a long beard. When Messiah shall appear, there will be a great feast, at which every Jew will be present. This feast will consist of fowl, of fish, and of flesh, which God created for the purpose at the beginning of the world. First, God provided a large fowl or bird, called Agal Loshder; also a large ox, called Shur Abur; and two large fish, called Leviathan. When God created these two great fish, male and female, being of such immense size, lest they should multiply, God slew the female, and buried it in salt, there to remain until it is wanted for this great feast. Then all the Jews that have been born, or that have existed since the creation of the world, will be restored to life. The table will be spread, and the provision placed upon it, and it is so ordained that each one will take his station according to his conduct in the present life. Moses will sit at the head of the table, and next to him Abraham, Isaac, and Jacob, and the prophets in rotation. Rabbi Simon says he was once sailing in the Great Sea, when he and the mariners espied a fish of such enormous size, that, although they had a fair wind, after they saw one eye of the fish, they sailed five days longer in a direct line before they reached the other eye of the same fish, which confirmed his belief in the report of the size of the leviathan. Much also is related concerning the size of the ox, which is said to be so immense that he eats up the whole of the grass that grows upon a thousand hills every day. The bird, also, is said to be of enormous size, and it is stated that one day this bird, in her flight, dropped an egg, which broke, and the yolk drowned fifty cities and villages (Stehelin, *Jewish Traditions*, passim). See TALMUD.

In the genuine fables and traditional narratives of remote antiquity, especially those of the ancient classics, many correspondencies with the Biblical history are found, such as intimate that these traditions were derived from this history. Of such a nature are the tales concerning a golden age of our race, an apostasy, a general flood, a future restoration. It may with safety be inferred from these traditions that the records in the book of Genesis concerning the apostasy, etc., are not philosophical myths; for, were they nothing more than the emanations of some Hebrew philosopher, how could they have been spread abroad among all nations? These popular traditions point us to the time when the human family were collected into one place, and afterwards separated into various branches. In this separation every tribe took with it the traditions that were common to all. See MYTHOLOGY.

**Fabre.** See FABER.

**Fabre, JEAN CLAUDE,** a French ecclesiastic and father of the Oratory, was born at Paris in 1668, and died there Oct. 22, 1753. In an edition of Richelet's *Dictionnaire* he inserted some passages which brought him under censure, and he was forced to quit the Oratorian order. He is chiefly known as the continuator of Fleury's *Histoire ecclésiastique*, of which he prepared vols. xxi-xxxv.—Hoefler, *Nouv. Biog. Gén.* xvi, 923.

**Fabri, HONORÉ,** a learned Jesuit, was born at Bugey, in France, in 1607. He entered the novitiate of the order of Jesuits at Avignon in 1626, taught philoso-

phy and mathematics at the College of Lyons, and was subsequently called to Rome and appointed grand penitentiary. He was an indefatigable worker, and acquired great proficiency in almost every branch of learning, especially in natural sciences. He claimed to have taught the circulation of the blood before the publication of the celebrated work of Harvey on the subject. He died at Rome in 1688. He wrote several works in defense of the casuistic writers of his order against the attacks of the Jansenists: *Pithanophilus* (Rome, 1659);—*Notæ in Notas Wilhelmi Wendrockii ad Ludovici Montaltii Litteras* (Cologne, 1659);—*Ludovici Montaltii epistolares Libelli ad provinciale refutati* (Cologne, 1660);—*Apologeticus doctrinæ moralis societatis Jesu* (Lyons, 1670);—a summary of scholastic theology (*Summula theologica*, Lyons, 1699), and a large number of scientific, polemical, and other works. He bequeathed his MSS. to the establishment of the Jesuits at Lyons.—Hoefler, *Nouv. Biog. Générale*, xvi, 945. (A. J. S.)

**Fabrica Ecclesiæ,** the name given in the Latin Church to a special fund for defraying the expenses for building and repairing the Church edifices of a particular congregation. As early as the 5th century it was customary that one portion of the property of a particular church should be set aside to this end. According to the rescripts of the Roman bishops Simplicius (475) and Gelasius (494), it was to be the fourth part of the whole property of the church, while in Spain one third was used. The Council of Frankfort in 794 declared that the holders of ecclesiastical benefices had the duty of keeping the church edifices in a proper condition, and this declaration was frequently confirmed by imperial and ecclesiastical laws. Charles the Bald in 846, besides confirming the same rule, ordered that all the serfs of the Church should work for repairing the churches at least twenty days every year. The parishioners generally were required to co-operate for keeping the Church edifices in proper order. There were, however, widely different usages in different localities. The Council of Trent (sessio xxi, cap. vii) established as a general principle that building and repairing expenses should be defrayed from the general revenue of the Church; in case these are not sufficient, all the patrons and others who have any kind of income from the church, and, if necessary, all the parishioners, are bound to co-operate to that end. This has since been the practice both in the Roman Catholic and in the Protestant state churches. The legislation of the first French empire (decree of 1809) charged the civil community with the duty of keeping the church edifices of all the recognised religions in good order. The civil laws of the European countries have many detailed provisions with regard to the subject, and in some points there is a wide difference.—Herzog, *Real-Encyclop.* i, 737; Wetzler and Welte, iv, 876; Helfert, *Von d. Erbauung, Erhaltung u. Herstellung d. kirch. Gebäude* (Prague, 1834). (A. J. S.)

**Fabricius, Andreas,** a Roman Catholic divine, was born at Hodgege, a village of Liege, A.D. 1520. He studied at Ingolstadt, and became professor of philosophy at Louvain. The bishop of Augsburg sent him as his agent to Rome, where he remained six years under the pontificate of Pius IV. He was afterwards councillor to the duke of Bavaria, and provost of Ottingen, in Swabia, where he died in 1581. His principal work was *Harmonia Confessionis Augustiniana* (Cologne, 1573 and 1587, fol.). He wrote also a *Catechismus Romanus ex Decreto Concilii Tridentini*, with notes and illustrations (1570 and 1574, 8vo), and some Latin tragedies.—Hook, *Ecl. Biog.* v, 48; Migne, *Dict. de Biographie Chrétienne*, ii, 135.

**Fabricius, Christoph Gabriel,** a German divine, was born at Shackdorf, in Lusatia, May 18, 1682, and was educated at the University of Wittenberg. He served as pastor at Mulhoritz and other places in

Lusatia, and died June 12, 1757. He is noted especially for his bitter opposition to the modern Moravians. He wrote *Das entlaerte Herrnhuth* (Herrnhut unmasked, Wittenberg, 1743, 4to, and 1749, 8vo); *Entdeckte herrnhütische Satirerey* (1749, 8vo), in which he seeks to prove that Zinzendorf and the modern Moravians are not the successors of the Bohemian Brethren.—*Biog. Universelle*, xiv, 62.

**Fabricius, Franciscus**, a Dutch theologian, was born at Amsterdam April 10, 1663. He studied theology and the Oriental languages at the University of Leyden, at which he afterwards filled the chairs of theology and rhetoric. He died July 27, 1738. His chief works are, 1. *Christus unicum ac perpetuum fundamentum Ecclesie* (Leyden, 1717, 4to);—2. *De Sacerdotio Christi juxta Ordinem Melchisedec* (ib. 1720, 4to);—3. *Christologia Noachica et Abrahamica* (ib. 1733, 4to);—4. *De Fide Christiana Patriarcharum et Prophetarum* (ib. 4to);—5. *Orator Sacer* (ib. 1733, 4to), containing lectures on preaching.—*Migne, Dict. de Biographie Chrétienne*, ii, 136; *Biog. Universelle*, xiv, 61.

**Fabricius, Georgius**, a German philologist, was born at Chemnitz April 24, 1516, and after a liberal course of education travelled to Italy, and spent a long time at Rome, the fruit of which was his *Roma, antiquitatis Monumenta*, etc. (Basel, 1550 and 1557, 8vo). He was endowed with some poetical talent, and wrote numerous sacred poems in Latin verse—*Poematum Sacrorum lib. xvi* (Basel, 1560, 16mo). From 1553 to his death (July 13, 1571) he was director of the college at Meissen. His most important work is *Poetarum veterum ecclesiasticorum opera Christiana, thesaurus catholice et orthodoxe ecclesie* (Basel, 1564, 4to), a very valuable collection of early Christian hymns and poetry.—*Niceron, Mémoires*, xxxii, 31; *Hofer, Nouv. Biog. Générale*, xvi, 958.

**Fabricius, Johannes**, a German theologian, was born at Altorf Feb. 11, 1644. After a very diligent course of study in theology and philosophy at the University of Altorf, he journeyed through Germany and Italy from 1670 to 1677. On his return he became professor of theology at Altorf, where he remained twenty years. In 1697 he became professor at Helmstädt, where he died, Jan. 29, 1729. He bore a high reputation for scholarship, and for his minute acquaintance with the Romish controversy. His principal publications are, *Dissertatio de Altaribus* (Helmstädt, 1698, 4to);—*Amicitias theologice varii et selecti argumenti* (Helmst. 1699, 4to);—*Historia Biblioth. Fabricianæ* (Wolfenbüttel, 1717–24, 6 vols. 4to);—*Consideratio variorum controversiarum cum Atheis, Gentilibus. . . Pontificis et Reformatis* (1704; also 1715, confined to the controversies *inter Evangelicos et Catholicos*). He inherited the irenical tendencies of Calixtus (q. v.), and sought to show that the points of difference between Romanism and Protestantism are not so great as they are generally held to be; he even went so far as to believe that a Protestant might lawfully go over to the Romish Church.—*Hofer, Nouv. Biog. Gn.* xvi, 962; *Mosheim, Ch. Hist.* (N. Y. 1854), iii, 490.

**Fabricius, Johannes**, a German Orientalist, was born at Dantzie in 1608. After studying at several German universities, he completed his academical course at Leyden, where he studied Arabic and Persian under Golius. In 1635 he began to lecture on Oriental languages, and especially on Arabic, at Rostock. After travelling, for literary purposes, over nearly all Europe, he was made professor of Hebrew at Dantzie in 1642, and died there in 1653. Among his numerous publications are *Dissertatio Philologica de Nomine Jehoru* (Rostock, 1636, 4to);—*De Incarnatione λόγον, contra Socinianos* (Rostock, 1637, 4to);—*Specimen Arabicum* (1638, 4to);—*Testamentum Mohammedis latine ex Gabriëlis Sinaitæ versione* (Rostock, 1638, 4to).—J. A. Fabricius, *Centuria Fabriciorum*; *Hofer, Nouv. Biog. Générale*, xvi, 962.

**Fabricius, Johannes Albert**, "the most learned, most voluminous, and most useful of bibliographers," was born at Leipsic Nov. 11, 1668. He lost his parents at an early age, but was sent to study at Quedlinburg, where, by reading Barthius's *Adversaria*, he was inspired with an ardent love of letters. He went to Hamburg in 1693, and spent five years as librarian for J. F. Mayer, dividing his time between preaching and study, till he was chosen professor of rhetoric and philosophy in the gymnasium of that city. In 1719 the landgrave of Hesse-Cassel offered him the professorship of theology at Giessen, and the post of general superintendent of the churches of the Augsburg Confession; but the magistrates of Hamburg augmented his salary for the sake of keeping him, and of this he ever after retained so grateful a sense that no offers of preferment could tempt him to leave them. He died at Hamburg April 3, 1756, with the character of being one of the most learned of men. The list of his published writings exceeds 100 titles.

His principal works are, (1.) *Codex Pseudepigraphus Veteris Testamenti*, Gr. et Lat. collectus, et Animadversionibus illustratus (Hamb. 1713, 12mo; 2d ed. with a supplementary volume, ib. 1722–23, 12mo);—(2.) *Codex Apocryphus N. T.* (2d ed. Hamb. 1719, 3 vols. fol.); see APOCRYPHA OF N. T.;—(3.) *Observationes selecte in varia loca Nov. Test. variorum auctorum* (Hamb. 1712, small 8vo);—(4.) *Bibliotheca Antiquaria* (Hamb. 1713; 2d ed. 1760, 2 vols. 4to), containing notices of all writers on Hebrew, Greek, Roman, and Christian antiquities;—(5.) *Bibliotheca Ecclesiastica* (Hamb. 1718, fol.), collecting the works of a number of Latin ecclesiastical writers;—(6.) *Bibliotheca Græca, sive notitia Script. Vet. Græcorum, quoruncunque monum. integ. aut. fragm. edita, extant* (Hamb. 1728, 14 vols. 4to). Of this invaluable collection a fourth and enlarged edition, edited by Harles, was commenced in 1790, of which 12 vols. had appeared up to 1811, extending to vol. xi, p. 544 of the former edition: an *Index* to the whole was published in 1838 (4to). (7.) Collection of authors on Christian Evidences, under the title *Delectus Argumentorum et Syllabus Scriptorum qui veritatem religionis Christianæ asseruerunt*, etc. (Hamb. 1725, 4to);—(8.) *Bibliotheca Latina* (Venice, 1728, 2 vols. 4to; re-edited by Ernesti, Lips. 1774, 3 vols. 8vo);—(9.) *Bibliotheca mediæ et infimæ Latinitatis* (best edit. Mansi's, Padua, 1754, 6 vols. 4to);—*Hydrotheologia*, written in German, and translated into French under the title *Théologie de l'Eau, ou Essai sur la Bonté, la Sagesse, et la Puissance de Dieu, manifestés dans la Création de l'Eau* (La Haye, 1741, 8vo);—*Conspectus Thesauri Litteraræ Italiæ* (1749, 8vo); or notices of the principal collections of the historians of Italy, as well as of other writers who have illustrated the antiquities, geography, etc., of that country, including the great works of Burmannus and Grævius, with an account of the Italian literary journals existing or which had existed before the time of Fabricius, of the Italian academies, and a catalogue of Italian bibliographers and biographers classed according to the particular towns which they have illustrated;—*Salutaris Lux Evangelii, sive Notitia Propagatorum per Orbem totum Christianorum Sacrorum: accedunt Epistole quadam ineditæ Juliani Imperatoris, Gregorij Hæbessini Theologia Æthiopicæ, necnon Index geographicus Episcopatum Orbis Christiani* (1731, 4to);—*Centifolium Luthericum, sive Notitia Literaria Scriptorum omnis generis de Martino Luthero, ejus Vita, Scriptis, et Reformatione Ecclesie editorum* (1730, 2 vols. 8vo);—*Centuria Fabriciorum Script. clarorum qui jam diem suam obierunt collecta* (1709, 2 vols. 8vo, with a continuation in 1727). The author has included in his list not only the authors whose name or surname was Fabricius, but also those whose names may be turned into the Latin Fabricius, such as Lefevre, Fabri, the German Schmidts, etc. Independently of the above and other minor works, Fabricius published editions of Sextus Empiricus, of the *Gallia Orientalis*

of father Colomiès, of the works of St. Hippolytus, and many others. For an account of his life and writings, see Reimar, *De vitu et Script. J. A. Fabricii comment.* (1737, 8vo).—*Biographie Universelle*, xiv, 54 sq.; *English Cyclopædia*, s. v.

**Fabricius, Johann Ludwig**, a Swiss divine, was born at Schaffhausen in 1632; studied at Utrecht and Paris, and in 1656 became pastor and professor, first of Greek, afterwards of theology, at Heidelberg. In 1664 he was made councillor to the elector palatine in ecclesiastical affairs. When Heidelberg was taken by the French in 1688, he retired to Schaffhausen, and afterwards to Frankfort. On his return to Heidelberg, when the castle and city were set on fire in the bombardment, he saved the archives of the city and university, and carried them to Frankfort, where he died in 1697. Among his writings are *Apologeticum pro Genere humano contra Calumniam Atheismi*.—*De Baptismo infantibus heterodoxorum confendo*.—*De Ludis Scenicis*.—*De baptismo pro muliere vel homine privatum administrato*—all gathered, with others, in an edition of his writings published by J. H. Heidegger (Zurich, 1698, 4to).—*Biog. Universelle*, xiv, 55.

**Fabricius, Lorenz**, a German divine, was born at Dantzig, 1555, and studied at various German universities, especially at Strasburg, in Hebrew, and at Wittemberg, where he became doctor of philosophy in 1587. In 1593 he was made professor of Hebrew at Wittemberg, in which office he remained until his death, April 28, 1629. He published *Oratio de Lingua Hebræa* (Wittemb. 1594).—*Partitomes Codicis Hebraei* (Wittemb. 1610, 4to).—*De Reliquiis Sanctis Syrarum Vocum in N. T.* (Wittemb. 1613, 4to).—*Metrica Hebræorum* (Wittemb. 8vo).—Hoefer, *Nouv. Biog. Générale*, xiv, 959.

**Fabricius, Theodor**, a German divine and reformer, was born in Anholt (in Prussia) February 2, 1501, of very poor parents. He was apprenticed to a shoemaker, and could not begin to go to school until he was sixteen years old. His diligence and success attracted the attention of count Oswald of Bergen, who sent him to Cologne to study at the university. He afterwards went to Wittemberg, where he not only studied Hebrew thoroughly, but also imbibed from Luther and Melancthon the principles of the Reformation. His patron abandoned him; but, although he was reduced to great straits of poverty, he maintained his integrity and courage. Returning to Cologne, he taught Hebrew, but was soon driven away as a heretic. Philip of Hesse received him, and made him his almoner. In 1536 he became pastor at Allendorf. In 1540 he was imprisoned by the elector for preaching against polygamy. In 1543 he returned to Wittemberg as professor of Hebrew and of theology. His life, in many respects a stormy one, ended on the 15th of Oct. 1550. He published *Institutiones Grammaticæ in Linguam Sanctam* (Cologne, 1528, 1531, 4to).—*Tabule de verbis et nominibus Heb.* (Basel, 1545). There is a sketch of his life in Hase, *Biblioth. Bremensis*, pt. i. —*Biog. Universelle*, xiv, 46.

**Fabryc, GABRIEL**, a French archæologist, was born at Saint-Maximin, in the Provence, about 1725, entered the Dominican order, and became professor of theology at Rome, where he died in 1800. Among his writings are *Censuris theologi Diatribæ, quæ bibliographiæ antiquariæ et sacre criticæ capita aliquot illustrantur* (Rome, 1782, 8vo). He entered upon the study of Phœnician antiquities and literature, but did not live to complete his plans; the partial fruit of his labors appears in *De Phœnicæ Litteraturæ Fontibus* (Rome, 1803, 2 vols. 8vo). Perhaps his best work is *Des Titres primitifs de la Révelation, ou considérations critiques sur la pureté et l'intégrité du texte original des livres saints de l'ancien Testament* (Rome, 1772, 2 vols. 8vo), which is still of value in Biblical criticism.—*Biog. Universelle*, ii, 66.

**Facciolati (FACCIOLOTO), JACOPO**, was born at Torreglia, Italy, Jan. 4, 1682. He was educated in the college at Este, and afterwards in the seminary at Padua, where he became professor of theology and philosophy, and director of studies. "The seminary of Padua had then, as subsequently, a high reputation as a place for the study of Latin, and for the numerous and generally accurate editions of the classics and other school-books which have come from its press. Facciolati contributed to support this reputation by his labors. Among other works, he published improved editions of the *Lexicon* of Schrevelius, of the *Thesaurus Ciceronianus* of Nizolius, and of the vocabulary of seven languages, known by the name of *Lexicon Culepinum* (1731, 2 vols. fol.). In this last undertaking he was greatly assisted by his pupil, Egidio Forcellini, although he was not willing to acknowledge the obligation. It was in the course of his joint labors with Facciolati that Forcellini conceived the plan of a totally new Latin dictionary, which, after more than thirty years' assiduous application, he brought to light under the title of *Totius Latinitatis Lexicon* (Padua, 1771, 4 vols. fol.). This work has superseded all other Latin dictionaries. Forcellini, more generous than Facciolati, acknowledged in the title-page of his work that its production was in great measure due to the advice and instruction of his deceased master. The MS. of his *Lexicon*, in 12 vols. fol., is preserved in the library of the seminary." The best editions are (1) that of Furlanetto (Patav. 1827-32, 4 vols. 4to; ed. by Hertel and Voigtlander, Schneeberg, 1835-38, 4 vols. fol.; also by Giacchetto, 1839-45, 4 vols. 4to); (2) that of Bailey, with English renderings (1828, 2 vols. 4to). "In 1722, Facciolati, being appointed professor of logic in the University of Padua, delivered a series of introductory Latin discourses to the students of his class, which were received with considerable applause. His Latin epistles, as well as his *Orations*, or discourses, have been admired for the purity of their diction. The king of Portugal sent Facciolati a flattering invitation to Lisbon to take the direction of the public studies in his kingdom, but Facciolati declined the honor on account of his advanced age. He, however, wrote instructions for the reorganization of the scholastic establishments of that country, which had become necessary after the expulsion of the Jesuits." Facciolati died at Padua Aug. 25, 1769. Besides numerous works on philosophy, he published *Vita et Acta Jesu Christi secundum ultimam generationem, divinam ac humanam* (Padua, 1761, 24mo).—*Vitæ Theologica* (Padua, 1763).—*Vitæ et Acta Mariæ virginis* (Padua, 1764).—*English Cyclopædia*, s. v.; *Biog. Universelle*, xiv, 80.

**Face** (usually פָּנִים, *panim*, πρόσωπον), whatever of a thing is most exposed to view; hence the face of the country, ground, waters, sky, etc. In Scripture, this term is often used to denote *presence* in the general sense; and, when applied to the Almighty, denotes such a complete manifestation of the divine presence, by sound or sight, as was equivalent, in the vividness of the impression, to the seeing of a fellow-creature "face to face." The "face of God," therefore, denotes in Scripture anything or manner by which God is wont to manifest himself to man. Thus, when it is said that Adam and Eve hid themselves from "the face of Jehovah," we understand that they hid themselves from his presence, however manifested; for the term there used is the only proper word to denote presence in the Hebrew language. It was a very common and ancient opinion that our mortal frame could not survive the more sensible manifestations of the divine presence, or "see God face to face and live" (Gen. xxxii, 30). Hence, in this passage, the gratitude and astonishment of Jacob that he still lived after God had manifested himself to him more sensibly than by dreams and visions. This impression was confirmed

to Moses, who was told, "Thou canst not see my face: no man can see my face and live" (Exod. xxxiii, 20), which clearly signifies that no one can in this present state of being endure the view of that glory which belongs to him (1 Cor. xiii, 12; 1 John iii, 2; Rev. xxii, 4). The ancient heathen entertained the same notion, which is remarkably expressed in the celebrated mythological story of Semele, who, having prevailed on the reluctant Jove to appear to her in his heavenly splendor, was struck dead by the lightnings of his presence. It is to be borne in mind that God is usually represented to us in Scripture under a human form; and it is indeed difficult for even more spiritualized minds than those of the Hebrews to conceive of him apart from the form and attributes of the highest nature actually known to us. The Scriptures sanction this concession to the weakness of our intellect, and hence arise the anthropomorphic phrases which speak of the face, the eyes, the arm of God. The appearances of the angels in the Old-Testament times were generally in the human form (Judg. xiii, 6, etc.), and from this cause alone it would have been natural, in the imagination, to transfer the form of the messengers to him by whom they were sent.—Kitto, s. v. See ANTHROPOMORPHISM. The presence of Jehovah (Exod. xxxiii, 14, 15) and the "angel" (Exod. xxxiii, 20, 21) is Jehovah himself; but in Isa. lxiii, 9, the angel of his presence is opposed to Jehovah himself. The light of God's countenance is a token of his favor, and is there put synonymously with favor (Psa. xlv, 3; Dan. ix, 17). Thus, as in men, if the countenance be serene, it is a mark of good-will; if fiery or piercing, of anger or displeasure. "Face" also signifies anger, justice, and severity (Gen. xvi, 6, 8; Exod. ii, 15; Psa. lxxviii, 1; Rev. vi, 16). (See Wemyss, *Symbol. Dict.* s. v.)

The Jews prayed with their faces turned towards the Temple (1 Kings viii, 38, 44, 48), and those residing out of Jerusalem turned it towards that point of the heavens in which Jerusalem lay (Dan. vi, 10); thus the Mohammedans, when praying, always turn their faces towards Mecca. To bow down the face in the dust (Isa. xlix, 23) is a mark of the lowest humiliation and submission. See ATTITUDES.

The "bread of faces" is the show-bread which was always in the presence of God. See SHOW-BREAD.

**Faculties**, a term of the Roman Catholic Church law, designating certain rights as to ecclesiastical functions which an ecclesiastical superior confers upon subordinates. The most important faculties are those conferred by the popes upon bishops, especially with regard to dispensations. The first instances of such dispensations being given to foreign missionaries occur in the 13th century. Subsequently, especially since the 16th century, very extensive faculties were granted to the papal nuncios. As the Council of Trent reserved many dispensations which in former times had been granted by the bishops to the pope, and as many bishops regarded the jurisdiction exercised by the nuncios as injurious to their authority, they applied to the pope for special faculties with regard to a number of dispensations. These faculties were generally granted for a term of five years (*facultates quinquennales*). An effort made in the 18th century by some of the German archbishops to reassert their own authority in the cases covered by the papal faculties was unsuccessful [see EMS, CONGRESS OF], and the *facultates quinquennales* are still conferred upon the bishops by the pope. Besides this general class of faculties, which contains twenty different provisions, many special faculties are conferred upon bishops in particular cases. The bishops, in their turn, confer faculties upon the vicars-general, deans, and common priests of their dioceses, either delegating to them rights which properly belong to bishops, or subdelegating papal rights which they have been specially authorized to subdelegate.—Herzog, *Real-Ency-*

*klop.* iv, 315; Wetzer und Welte, *Kirch.-Lex.* iv, 879. (A. J. S.)

**Faculty**, in England, is a special privilege or dispensation granted by favor and indulgence to enable a person to do that which he is not permitted to do without it. There is a court of the Faculties, the chief officer of which is master of the Faculties, under the archbishop of Canterbury. It has power, by 25 Henry VIII, 21, to grant dispensations to marry, to hold two or more incompatible benefices, and the like; and in it are registered the certificates of peers to their chaplains to qualify them for pluralities and non-residence. The act gives authority to grant such dispensations "for any such matters, not being repugnant to the holy Scriptures and the laws of God, whereof before such dispensations, etc., had been accustomed to be had at the see of Rome. Up to the time of passing this act, the pope, notwithstanding the statutes which had been passed restraining his authority, continued to exercise his power, and to draw a considerable revenue for indulgences, etc. The sittings of the court have always been held at Doctors' Commons" (q. v.).—*Encyclopædia Metropolitana*, s. v.

**Faculty.** See UNIVERSITY.

**Facundus**, bishop of Hermiane, in Africa. He took part in the conference held at Constantinople in 547 by pope Vigilius (q. v.), to discuss the *trina capitula* [see CHAPTERS, THE THREE], and sustained the side of Theodore and Theodoret against the emperor's view. Vigilius demanded that he (with other opposing bishops) should sign the condemnation of Ibas, Theodore, and Theodoret. He refused absolutely, and bore with firmness the persecution and banishment which followed. He is supposed to have died about A.D. 553. His treatise *Pro defensione trium Capitulorum*, lib. xii, will be found in Sirmond, *Opera Varia*, ii, 297 (Venet. 1728, 5 vols. fol.); in *Bib. Max. Patr.* x; in D'Achery, *Spicilegium*, iii, 307, of the first edition, and in iii, 106, edit. of 1723; and in Migne, *Patrologia Latina*, lxxvii, 527 sq. His *Contra Mociannum Libellus*, condemning Mociannus and Vigilius for their course with regard to the "Three Chapters," is also given in Migne (lxxvii, 853).

Neander says that the writings of Facundus "are characterized by qualities seldom to be met with in that age—a freedom of spirit unshackled by human fear, and a candid, thorough criticism, superior in many respects to the prejudices of the times. Nobly did he protest against the uncalled-for dogmatism which had ever been the source of so much mischief to the Greek Church, these useless disputes having in fact proceeded from no other cause. 'While,' he said, 'in all other arts and occupations, no one presumed to pass judgment on what he had never learned; in matters of theology, on the contrary, they who learned the least were the most arrogant and peremptory in their judgments. When the civil power overstepped its province, it might indeed plunge numbers in ruin by misleading them to deny the truth with their lips, but still it could never effect its object, for it could not instil into the minds of men other convictions than they had: its power reached only to what was outward, not to the soul.' He spoke with scorn of those bishops who accused themselves in pleading, in excuse of their behavior, the constraint under which they were placed; for it was not even the force of torture, but only the fear of the emperor's displeasure, which had brought them to yield (*Cont. Mociannum*, f. 595). 'As if,' said he, 'we had been ordained bishops for no other purpose than to be enriched by the presents of princes, and to sit with them among the high authorities of the state. But if, amidst the many cares of the state, through the deceitful arts of the wicked, of which there is never any lack; anything has been admitted by them which tended to injure the Church or to disturb its peace, as if it were not our duty to set before them the truth for their own benefit, and, if it be necessary,

to resist them with the authority of religion, and patiently endure their displeasure if we must incur it. If God should now raise up an Ambrose," said he, "there would not fail to be a Theodosius" (*Church History*, Torrey's, ii, 544). There is a remarkable passage in the *Defensio* showing that Facundus did not hold the Romanist doctrine as to the corporeal presence in the Eucharist: "Potest sacramentum adoptionis adoptio nuncupari, sicut sacramentum corporis et sanguinis ejus, quod est in pane et poculo consecrato, corpus ejus et sanguinem dicitur: non quod proprie corpus ejus sit panis, et poculum sanguis: sed quod in se mysterium corporis ejus et sanguinis contineat" ("The sacrament of adoption may be called adoption itself, as we term the sacrament of his body and blood, which is in the bread and the consecrated cup, his body and blood; not that the bread is properly his body and the cup his blood, but because they contain within them the mystery of his body and blood" (ix, 5, Migne, lxxvii, 762).—Neander, *Ch. History*, ii, 544; Neander, *History of Dogmas* (Ryland), i, 278; Cave, *Hist. Liter.* i, 520; Ceillier, *Auteurs Sacrés* (Paris, 1862), xi, 285 sq.; Waterland, *Works* (Oxford), iv, 599, note.

**FADUS, CUSPIUS** (Græcized Κούσιος Φάδος, Josephus, *Ant.* xv, 11, 4), a Roman knight of the time of the emperor Claudius. After the death of king Agrippa, in A. D. 41, he was appointed by Claudius procurator of Judæa. During his administration peace was restored in the country, and the only disturbance was created by one Theudas (q. v.), who came forward with the claim of being a prophet. He and his followers were put to death by command of Fadus. He was succeeded in the administration of Judæa (A. D. cir. 46) by Tiberius Alexander (Josephus, *Ant.* xix, 9; xx, 5, 1; *War.* ii, 11, 5; Tacitus, *Hist.* v, 9; Zonaras, xii, 11; Eusebius, *Hist. Eccles.* ii, 11).—Smith, *Dict. of Class. Lit.* s. v. See PROCURATOR.

**FAGIUS, PAULUS** (properly BÜCHELIN), was born at Rheinabern in 1504. His studies were pursued at Heidelberg and Strasburg, where he became a great proficient in Hebrew, and was led into close acquaintance with Capito, Hedio, Bucer, Zell, and other learned reformers. In 1537 he entered the ministry, and was pastor at Isny until 1543. Here he studied Hebrew thoroughly under Elias Levita (q. v.) and also established a Hebrew press. In 1541, when the plague began to rage in Isny, he publicly rebuked those of the wealthy classes who forsook the place without making provision for the relief of the poor, and himself visited the sick in person, and administered spiritual comfort to them day and night, and yet escaped. On the death of Capito at Strasburg, the senate called Fagius to succeed him as professor and pastor there (1544). In 1546, Frederick II, the elector palatine, intending a reformation in his churches, called him to Heidelberg, and made him professor there. He opposed the Interim (q. v.), and when it was introduced he was compelled to leave Strasburg. In 1548 he accepted the invitation of Cranmer, archbishop of Canterbury, and came to England. He was nominated by the archbishop to the professorship of Hebrew in the University of Cambridge. Before he went to Cambridge he resided with the archbishop at Lambeth, where he was associated with Bucer. His labors while there, in addition to the preparation necessary for his professional office, are thus described by Strype: "As it has been a great while the archbishop's desire that the Holy Bible should come abroad in the greatest exactness, and true agreement with the original text, so he laid this work upon these two learned men, viz. Fagius and Bucer. First, that they should give a clear, plain, and succinct interpretation of the Scripture, according to the propriety of the language; and, secondly, illustrate difficult and obscure places, and reconcile those that seemed repugnant to one another. And it was his will and his advice that to this end and purpose their public readings should tend. This

pius and good work, by the archbishop assigned to them, they most gladly and readily undertook. For their more regular carrying on this business, they allotted to each other, by consent, their distinct tasks, Fagius, because his talent lay in the Hebrew learning, was to undertake the Old Testament, and Bucer the New. The leisure they now enjoyed with the archbishop they spent in preparing their respective lectures. Fagius entered upon the evangelical prophet Esaias, and Bucer upon the Gospel of the evangelist John; and some chapters in each book were dispatched by them. But it was not long but both of them fell sick, which gave a very unhappy stop to their studies." He died at Cambridge Nov. 13, 1549. His body, along with Bucer's, was dug up and burnt in queen Mary's time. He wrote various books on Biblical and Hebrew literature, among which are *Metaphrasis et Enarratio Epist. Paul. ad Rom.* (Strasb. 1536, fol.):—*Sententiæ sapientum Hebræorum* (Isny, 1541, 4to):—*Annotationes in Targum* (Isny, 1546, fol.):—*Expositio literalis in IV priora Capita Genesios, cui accessit Textus Hebraicus et Paraphrasos Chaldaicæ collatio*, 4to (this and the last work reprinted in the *Critici Sacri*):—*Precesiones Hebraicæ, ex libello Hebraico excerptæ cui Nomen, Liber Fidei* (1542, 8vo):—*Tolius Hebraicus in Latinam translatus* (1542, 4to):—*Esa Syre Sententiæ Morales, cum succincto Commentario* (1542, 4to):—*Isagogæ in Linguam Hebraicam* (Constance, 1543, 4to).—Middleton, *Evang. Biography*, i, 260; Melchior Adam, *Vita theolog.* i, 99; Hook, *Eccles. Biog.* v, 50.

**Fagnani, PROSPER**, an Italian writer on ecclesiastical law, was born in 1598. He was for fifteen years secretary of the Congregation for the Interpretation of the Council of Trent (*Congregatio Conc. Trid. Interpret.*), and subsequently professor of canon law at the Roman Academy. He was regarded as the ablest Roman jurist of his time, and was frequently consulted by the popes. Alexander VII charged him with compiling a commentary on the Decretals, which appeared in 3 vols. fol. at Rome in 1661 (reprinted at Cologne, 1676; Venice, 1697, and in many other editions). As Fagnani had been entirely blind from his forty-fourth year, he had to dictate the whole commentary to a clerk. He died at Rome in 1678.—Wetzer u. Welte, *Kirch.-Lex.* iv, 853. (A. J. S.)

**Fair** (properly פָּאָר, *gophik', kalós*). Travellers inform us that in hot countries the greatest difference imaginable subsists between the complexions of the women. Those of high condition seldom go abroad, and are ever accustomed to be shaded from the sun with the greatest attention, and their skin is consequently fair and beautiful. But women in the lower ranks of life, especially in the country, being, from the nature of their employments, more exposed to the scorching rays of the sun, are in their complexion remarkably tawny and swarthy. Under such circumstances, a high value would of course be set by the Eastern ladies upon the fairness of their complexions, as a distinguishing mark of their superior quality, no less than as an enhancement of their beauty. This notion appears to have obtained as early as the time of Abraham (Gen. xii, 11-13). Thus, also, how natural is the bride's self-abasing reflection in Cant. i, 5, 6, respecting her tawny complexion among the fair daughters of Jerusalem, who, as attendants on a royal marriage, were of the highest rank. Roberts observes, in reference to the daughters of Job being very fair (Job xlii, 15), "The word fair may sometimes refer to the form of the features as well as the color of the skin; but great value is attached to a woman of a light complexion. Hence our English females are greatly admired in the East, and instances have occurred where great exertions have been made to gain the hand of a fair daughter of Britain. The acmé of perfection in a Hindu lady is to be of the color of gold." (See Wemyss, *Symbol. Dict.* s. v.) See BEAUTY.

**Fairbanks**, ERASTUS, LL.D., governor of Vermont, was born at Brimfield, Mass., Oct. 28, 1792. He obtained such education as the district school afforded, and at seventeen himself taught a district school. From his youth he was diligent in self-culture. In 1812 he removed to St. Johnsbury, Vt., and in March, 1814, he united with the Congregational Church in that place. From this time to the end of his life the interests of religion and the Church were paramount to all others in his life and habits of thought. After various vicissitudes in trade, he began in 1830 the manufacture of the patent "platform scale," which is now in use all over the world, and from the sale of which he laid the foundation of a large fortune. The village of St. Johnsbury grew in population, wealth, and virtue, so as to have become a model place under his skillful guidance. "Drunkenness and disorder were things unknown; industry, intelligence, and thrift were universal." In 1828 he became a deacon of the Congregational Church. In 1836 he was elected a member of the State Legislature, in 1844 and 1848 presidential elector, and in 1852 and 1860 he was chosen governor of the State of Vermont. In the execution of his official duties he was conscientious and faithful, and acquired and retained, in an unusual degree, the confidence of all parties. During his second term of office the civil war broke out. "His firm having a great amount of property in the South which must be lost in case of war, it was for his pecuniary interest to keep peace. But this had no weight with him. Day and night he toiled raising troops, where, three months before, not even a knapsack was to be found, and sending regiment after regiment of the brave Green Mountain Boys forward to the seat of war." The Legislature conferred upon him almost unlimited power in the discharge of his duties, and placed at his sole disposal a million of dollars, and at the close of his official term in 1861 passed votes of approval of his labors, ability, and patriotic devotion. He never touched even the salary to which he was entitled. He was for many years a corporate member of the American Board of Commissioners for Foreign Missions, and both in this field and in that of home missions he devoted time, talents, and money freely to the cause of God. His personal literary culture was diligently carried on during his life, and in 1860 the University of Vermont conferred on him the degree of LL.D. He died Nov. 20, 1864. To trace the thirty-four years of his life from 1830 to his death "is to record the daily acts of a life devoted to every good and noble work. Rare must be the talent which could organize and direct such a business in the face of so many obstacles, in an inland town, remote from business centres, and guide it safely through all the financial embarrassments to which the country has been subject. But a fact far more rare and interesting is that, in the midst of so many cares, time abundant was always found, and means equally abundant, not only for aiding in every good work, but for leading in new benevolent movements, for which many, with far less to do, thought they could find no time." "His munificent contributions to benevolent purposes and objects were proverbial long before his death, and in connection with 'good words and works' the name of Erastus Fairbanks had, to the people of his state, come to be as familiar as household words. In public life he was honored and confided in as a capable, honest, and reliable man; and in the walks of social and private life he was esteemed as a kind neighbor, a sincere friend, and a Christian gentleman."—*Congregational Quarterly*, 1867, No. 1.

**Fair Havens** (*Καλοί Λιμένες*), a harbor in the island of Crete (Acts xxvii, 8), not mentioned in any other ancient writing. There seems no probability that it is, as most early commentators thought (see Biscoe, *On the Acts*, p. 347, ed. 1829), the *Καλή Ἀκρή*, or *Fair Beach*, of Steph. Byz. (see *Kuinöl, Comment.*

in loc.); for that is said to be a city, whereas Fair Havens is described as "a place near to which was a city called Lasæa." Moreover, Mr. Pashley found (*Travels in Crete*, ii, 57) a district called *Acte*; and it is most likely that *Καλή Ἀκρή* was situated there; but that district is in the west of the island, whereas Fair Havens was on the south. Its position is now quite certain. Though not mentioned by classical writers, it is still known by the old Greek name, as it was in the time of Rauwolf (who calls it *Calismene*), Pococke (ii, 250), and other early travellers mentioned by Mr. Smith (*Voy. and Shipwr. of St. Paul*, 2d ed., p. 80-82). LASÆA, too, has recently been most explicitly discovered. In fact, Fair Havens appears to have been practically its harbor. These places are situated four or five miles to the east of Cape Matala, which is the most conspicuous headland on the south coast of Crete, and immediately to the west of which the coast trends suddenly to the north. This last circumstance explains why the ship which conveyed Paul was brought to anchor in Fair Havens. In consequence of violent and continuing north-west winds she had been unable to hold on her course towards Italy from Cnidus (Acts xxvii, 7), and had ran down, by Salmone, under the lee of Crete. It was possible to reach Fair Havens; but beyond Cape Matala the difficulty would have recurred so long as the wind remained in the same quarter. A considerable delay took place (ver. 9), during which it is possible that Paul may have had opportunities of preaching the Gospel at Lasæa, or even at GORTYNA, where Jews resided (1 Macc. xv, 23), and which was not far distant; but all this is conjectural. A consultation took place, at which it was decided, against the apostle's advice, to make an attempt to reach a good harbor named PHENICE (ver. 12). However, the south wind, which sprang up afterwards (ver. 13), proved delusive; and the vessel was caught by a hurricane [see *ΕΡΥΚΛΥΔΩΝ*] on her way towards Phenice, and ultimately wrecked.—Smith, s. v. See *SHIPWRECK (of Paul)*. The name of the place is appropriate. It is shut in on the west by a bold headland, on the summit of which are the ruins of an ancient convent dedicated to St. Paul. On the south it is sheltered by two little islands; and between these and the shore is a safe anchorage. The roadstead, however, is open to the sea, and we can thus see the truth of Luke's statement that it was "inconspicuous to winter in" (*ἀνεπίστος πρὸς παρακλιμασίαν*, ver. 12; see Smith, p. 256; Conybeare and Howson, *Life and Epistles of St. Paul*, ii, 320). See CRETE.

**Fairs** (יַרְבֵּי, *izzebonim*; Sept. ἀγορά, *Vulg. mundine, forum*), a word which occurs only in Ezek. xxvii, and there no less than seven times (ver. 12, 14, 16, 19, 22, 27, 33); in the last of these verses it is rendered "wares," and this appears to be the true meaning of the word throughout (so Fürst, *Heb. Handb.* s. v.; but Gesenius, *Heb. Lex.* s. v., thinks it means *traffic* in general, and also *gains*). It will be observed that the word stands in some sort of relation to יַמְרָבָּ, *maarab'*, throughout the whole of the chapter, the latter word also occurring seven times, and translated sometimes "market" (ver. 13, 17, 19), and elsewhere "merchandise" (ver. 9, 27, 33, 34). The words are used alternately, and represent the alternations of commercial business in which the merchants of Tyre were engaged. That the first of these words cannot signify "fairs" is evident from ver. 12; for the inhabitants of Tarsish did not visit Tyre, but *vice versa*. Let the reader substitute "paid" or "exchanged for thy wares" for "occupied in thy fairs," and the sense is much improved. The relation which this term bears to *maarab*, which properly means *barter*, appears to be pretty much the same as exists between exports and imports. The sense of *izzebon* (יַרְבֵּי, the presumed sing. form) thus becomes essentially that proposed by

Gousset (*Commentarii Ling. Hebr.* p. 594) and adopted by Hävernick (*Commentar.* p. 464), namely, *exchange*, or *equivalent*. The requirements of the Tyrians themselves, such as slaves (ver. 13), wheat (ver. 17), steel (ver. 19), were a matter of *naarab*; but where the business consisted in the exchange of Tyrian wares for foreign productions, it is specified in this form: "Tarshish paid for thy wares with silver, iron, tin, and lead" (see Hitzig, *Commentar.* in loc.). The use of the terms would probably have been more intelligible if the prophet had mentioned what the Tyrians gave in exchange: as it is, he only notices the one side of the bargain, viz. what the Tyrians received, whether they were buyers or sellers.—Smith, s. v. See COMMERCE. The natural sea-port of Western Asia, and the centre of the commerce of the East, was Tyre, or, rather, the ports of Phœnicia, for Tyre was but one of them. Phœnicia early grasped this commerce, and retained it until the rise of Alexander. Sidon first rose to opulence; and then Tyre, her "daughter," better situated for commerce, soon eclipsed her glory, and became the mart of the world. The enumeration of the articles of traffic in Ezek. xxvii shows that a large part of the commerce of Tyre was in articles of luxury, though it was the grand mart for all the trade of the Eastern and Western world. See TYRE.

Fairs, however, although not directly referred to by the above Heb. term, were doubtless anciently common, as now, in the East. Dr. Thomson (*Land and Book*, ii, 152 sq.) thus describes the scene at these Oriental mercantile gatherings: "On Monday of each week a great fair is held at the khans, when, for a few hours, the scene is very lively and picturesque. These gatherings afford an excellent opportunity to observe Syrian manners, customs, and costumes, and to become acquainted with the character and quality of her productions. Thousands of people assemble from all parts of the country either to sell, trade, or purchase. Cotton is brought in bales from Nablûs; barley, and wheat, and sesamum, and Indian corn from the Hûleh, the Hauran, and Esdracôn. From Gilead and Basban, and the surrounding districts, come horses and donkeys, cattle and flocks, with cheese, milk, oil, honey, and similar articles. Then there are miscellaneous articles, such as chickens and eggs, figs, raisins, apples, melons, grapes, and all sorts of fruits and vegetables in their season. The peddlers open their packages of tempting fabrics; the jeweller is there with his trinkets; the tailor with his ready-made garments; the shoemaker with his stock, from rough, hairy sandals to yellow and red morocco boots; the farrier is there with his tools, nails, and flat iron shoes, and drives a prosperous business for a few hours; and so does the saddler, with his coarse sacks and his gayly-tinted cloths. And thus it is with all the arts and occupations known to this people. The noise is incessant, and at a distance sounds like that 'of many waters.' Every man is crying his wares at the top of his voice, chickens cackle and squall, donkeys bray and fight, and the dogs bark. Every living thing adds somewhat to the many-toned and prodigious uproar. It is now a miscellaneous comedy in full operation, where every actor does his best, and is supremely gratified with his own performance. The people find many reasons for sustaining these antiquated and very curious gatherings. Every man, woman, and child has inherited the *itch* for trading, and, of course, all classes meet at this grand bourse to talk over the state of the markets, from the price of a cucumber to that of cotton, or of a five-thousand dollar horse from the Hauran. Again, every Arab is a politician, and groups gather around the outskirts of the crowd to discuss the doings of the 'allied powers,' the last firman from the sultan, or the new tax demanded by their own petty emir. Descending to more ordinary matters, these fairs are great places for gossip and scandal. Friends meet friends, and exchange the

news of weddings, births, and deaths, and all the multifarious incidents and accidents between those grand extremes of human life. In a word, these fairs supply the places of many of the appliances of more civilized society. They are the daily newspaper, for there is one for every day within a circuit of forty miles. They are the exchange and the *forwarding office*, and the political caucus, and the family gathering, and the grand festa and gala days, and underlying the whole is the ever-present idea and aim of making money." See BAZAAR.

**Faith** (Gr. πίστις, Lat. *fides*, *fiducia*) is essentially *trust*. The various uses of the word (both objective and subjective) may be summed up as follows: 1. An objective body of truth: "the faith;" designated by the schoolmen as *fides que creditur*, the faith which is believed. So the Augsburg Confession speaks of "our holy faith and Christian religion." (This sense does not occur in N. T.) 2. A rule of thought, the *fides pœnes quam creditur*: so the Roman Catholics say such a thing is "of faith" (not found in N. T.). 3. A personal quality, act, or habit of the individual man; the *fides qua creditur*; the faith by which we believe. This latter is either (I) the exercise of our natural gifts (*natural* faith), or (II) the exercise of natural gifts under the influence of the divine Spirit with regard to divine things, and especially with regard to the person and work of Christ (the gift of God). This latter is Christian faith, and it includes two elements: (1) the spiritual apprehension of the invisible and eternal (Heb. xi, 1), and, specifically, (2) trust in Christ as a personal Saviour; and, as such, in the Christian system, it is the necessary condition of salvation. It is the instrument or means by which the redemption of Christ is appropriated, and, so far as it is man's act, it is the act of the whole man, mind, affections, and will. It is "a saving grace whereby we receive and rest upon Christ alone for salvation, as he is freely offered to us in the Gospel."

I. *Natural Faith*.—All our knowledge presupposes faith. In this view Goethe said that he was a "believer in the five senses;" and Fichte, that "man apprehends all reality external to himself through faith alone, a faith that is born with him." In the article BELIEF (q. v.) it was shown that there is a foundation laid for the exercise of this principle in the primary laws of thought or self-consciousness—in the reason, not of the individual man, but of humanity. Psychologically, "faith is the faculty of grasping evidence, with a propensity to admit it when duly presented to the mind. Just as by sensation and perception we discern certain objects through the medium of the senses, and as by reason we discover some truths, or discern them upon their simple presentation (Chalmers, *Institutes of Theology*, bk. iii, ch. vi), without any other warranty than the voice within, so also by faith we discern other truths through the means of testimony or by the voice of authority. Attempts to analyze this quality of the human mind have been often made and as often failed. But still the fact remains that, according to the original constitution of our nature, we are able and disposed to yield to evidence in proportion to its nature and its strength (Hooker, *Eccles. Pol.* bk. ii, chap. vii, § 5); to assent to testimony concerning facts not present and manifest; and to submit to authority in the announcement or proposition of truths independently of any internal and direct perception of them by ourselves (Van Mildert, *Boyle Lect.* serm. xvi). In matters of common life, from childhood to old age, we continually act, and are compelled to act, upon this principle (Barrow, *On the Creed*, serm. iii; Hare, *Victory of Faith*, serm. iv). The child believes its parent or its nurse, and reposes in this belief; and under certain conditions, the man believes the records of past history, the testimony of eye-witnesses, and the affirmations of trustworthy persons capable of understanding that which they affirm. And it is not too

much to say that, apart from this principle and practice of belief, man, even in the full exercise of all his other intellectual powers, would be enveloped in such a cloud of ignorance on even the most ordinary subjects, that an arrest would be laid upon all the affairs of civilized life, and there must be an end of all social harmony and order. It is by this means that we obtain a certainty, not of sight, not of demonstration, not of direct and immediate intuition, but yet a real and efficient certainty in many matters of high practical importance concerning which we must otherwise be hopelessly ignorant and in the dark. This principle lies at the foundation of human affections and family ties, of agricultural and commercial activity, and of a large portion of our most valuable knowledge in science, and our highest attainments in art. Above all, it is thus that we obtain our knowledge of many things divine, and especially of relations subsisting between God and ourselves; an acquaintance with which, as we shall hereafter see, is of the utmost importance to us, while yet, independently of the exercise of faith, it is utterly beyond the reach of every man living" (Rogers, *Reason and Faith*; Riddle, *Bampton Lectures*, 1852, lect. i). Faith "is that operation of the soul in which we are convinced of the existence of what is not before us, of what is not under sense or any other directly cognitive power. It is certainly a native energy of the mind, quite as much as knowledge is, or conception is, or imagination is, or feeling is. Every human being entertains, and must entertain, faith of some kind. He who would insist on always having immediate knowledge must needs go out of the world, for he is unfit for this world, and yet he believes in no other. It is in consequence of possessing the general capacity that man is enabled to entertain specific forms of faith. By a native principle he is led to believe in that of which he can have no adequate conception—in the infinity of space and time, and, on evidence of his existence being presented, in the infinity of God. This enables him to rise to a faith in all those great religious verities which God has been pleased to reveal" (McCosh, *Intuitions of the Mind*, pt. iii, bk. ii, ch. v; see also pt. ii, bk. ii, ch. iv).

Guizot, *Mémoires et Études Morales* (transl. in *Journal of Sacred Literature*, xii, 430 sq.), has a thoughtful essay in which he distinguishes natural beliefs from faith as follows: "No one can doubt that the word faith has an especial meaning, which is not properly represented by belief, conviction, or certitude. Custom and universal opinion confirm this view. There are many simple and customary phrases in which the word faith could not be replaced by any other. Almost all languages have a specially appropriated word to express that which in English is expressed by faith, and which is essentially different from all analogous words. This word, then, corresponds to a state of the human soul; it expresses a moral fact which has rendered such a word necessary. We commonly understand by faith a certain belief of facts and dogmas—religious facts and dogmas. In fact, the word has no other sense when employing it absolutely and by itself—we speak of the *faith*. That is not, however, its unique, nor even its fundamental sense; it has one more extensive, and from which the religious sense is derived. We say, I have full *faith* in your words; this man has *faith* in himself, in his power, etc. This employment of the word in civil matters, so to speak, has become more frequent in our days; it is not, however, of modern invention; nor have religious ideas ever been an exclusive sphere, out of which the notions and the word *faith* were without application. It is, then, proved by the testimony of language and common opinion, first, that the word *faith* designates a certain interior state of him who believes, and not merely a certain kind of belief. Secondly, that it is, however, to a certain species of belief—religious belief—that it has been at first and most generally applied. Now

our *natural* beliefs germinate in the mind of man, without the co-operation of his reflection and his will. Our *scientific* beliefs, on the other hand, are the fruit of voluntary study. But *faith* partakes of, and at the same time differs from, natural and scientific beliefs. It is, like the latter, individual and particular; like the former, it is firm, complete, active, and sovereign. Considered in itself, and independent of all comparison with this or that analogous condition, faith is the full security of the man in the possession of his belief: a possession freed as much from labor as from doubt; in the midst of which every thought of the path by which it has been reached disappears, and leaves no other sentiment but that of the natural and pre-established harmony between the human mind and truth."

II. *Christian Faith*.—So far as faith is a voluntary act, quality, or habit of man, it is psychologically the same in the theological sense as in common life; the difference lies in the *objects* of the faith. In order to venerate or love a fellow-man, we must believe in his worthiness; so, for the fear and love of God, which are fundamental elements of the Christian life, faith must pre-exist. But this direction of the soul towards God does not spring from the *natural* working of the human mind; it is the gift of God (Eph. ii, 8), and is wrought in the heart by the Holy Spirit through the word of the Gospel and the free grace of Christ (Rom. x, 17; 1 Cor. i, 21). *Fides in verbo Evangelii recte agnoscimus* (Form. Concord. iii, 11). Not that the Holy Spirit endues the soul with any new faculty for the single purpose of receiving Gospel truth; but it quickens and directs an existing faculty, at the same time presenting to it an appropriate object. The true faith, thus excited, is an operation at once of the intellect, the heart, and the will. As said above, this faith, so far as it saves man in Christendom, is specifically trust in Christ as a personal Saviour. In further treating it, we give, (I.) The uses of the words *πίστις*, *faith*, and *πιστεύω*, *I believe*, in the Scriptures (condensed from Cremer, *Wörterbuch d. N. Test. Griechisch*, Gotha, 1866, 8vo). (II.) A history of the idea of faith in Christian theology up to the Reformation. (III.) The Protestant and Romanist doctrines of faith in contrast and comparison with each other. (IV.) Later Protestant statements of the doctrine.

(1.) *Use of the words Faith and believe in Scripture*.—*Πίστις*. 1. In profane Greek, *πίστις* means primarily *trust* or *confidence*, such as one man can have in another; more seldom *fidelity* or *fidelity* which one pledges or keeps; and also the *pledge of fidelity*, e. g. Sophocles, *O. C.* 1632; *δός μου χερσὶς σῆς πίστιν*. Examples of the primary meaning (*trust* or *confidence*) are: Herodotus, iii, 24; Sophocles, *O. Col.* 950; Xen. *Hier.* iv, 1. In the passive tense (*credit*) it is found e. g. Aristotle, *Eth.* x, 8. Parallel with the primary meaning (*trust* or *confidence*) stands that of *conviction*, e. g. *πίστιν ἔχειν τινός* (*to have faith in a thing*); but this conviction is based upon *trust*, and not upon knowledge: so that in this sense *ὁ πιστεύων* stands opposite to *εἰδώς*, and *πίστις* to *ἐπιστήμη* (comp. Plat. *Repub.* x, 601). In this sense *πίστις* is used (in the sphere of religion) of belief in the gods, and of acknowledgment of them, not based upon knowledge (comp. Plutarch, *Mor.* 756, B; Plato, *Legg.* 976, C, D; Eurip. *Med.* 413, 414). Rather characteristic is the fact that this faith is not designated as in the N. T. by the verb *πιστεύω*, but by *νομίζω* (Xen. *Mem.* I, i, 3).

This element of "acknowledgment," as distinct from *knowing* (*εἰδέναι*), is found also in the N. T. significations of the word as used by Paul and others; e. g. 2 Cor. v, 7, "For we walk by *faith* (*πίστει*), not by *sight*;" Heb. xi, 27, "By *faith* (*πίστει*) he forsook Egypt;" Heb. xi, 1, "Now *faith* (*πίστις*) is the substance of things hoped for, the evidence of things not seen;" Rom. iv, 18, "Who against hope *believed* (*πίστευεν*) in hope;" John xx, 29, "Blessed (are) they

that have not seen and (yet) have believed" (πιστεύσαντες). But this opposition to "knowledge" or "sight" is not essential to the idea of faith, as is seen from John iv, 42; xi, 45; 1 Tim. iv, 3; Philem. 6, et al. In fact, the N. T. faith differs from the profane πίστις generally in that it is *not* a conviction held without reference to any ground or authority (compare 1 Pet. iii, 15; i, 21).

In the O. T. the word "faith" is comparatively seldom used; the relation of man to God and to his revelation is generally designated by some other term befitting the economy of the law, e. g. "doing God's will," "keeping the commandments," "remembering the Lord" (Exod. iii, 15), et al. Nevertheless, we do find (as one species of phrases among many to express this relation) terms denoting "trusting," "hoping," "waiting on the Lord" (בטח, הוסיף, קנה, ἐλπίζω, περιμένω, υπομένω, etc.). But in some of the most important passages of the Old-Test. history the word "faith" occurs; e. g. with regard to Abraham (Gen. xv, 6), "he believed in the Lord, and he counted it to him for righteousness;" of the people of Israel (Exod. iv, 31; compare 1, 5, 8; xiv, 31); with regard to the possession of Canaan (Deut. ix, 23; comp. i, 32; Psa. lxxviii, 22, 32; cvi, 24); with regard to the covenant of the law (Exod. xix, 9). In view of these pregnant passages, we may say that the foundation laid for the N. T. in the Old is laid in "faith" (comp. 2 Chron. xx, 20; Isa. liii, 1; vii, 9; xxviii, 16; Jonah iii, 5). But *unbelief* is far oftener spoken of in the O. T. than *faith* (comp. Psa. xxvii, 13; 2 Kings xvii, 14; Psa. lxxviii, 22, 32; cvi, 24; Numb. xx, 12; Deut. ix, 23; Isa. vii, 9; liii, 1; Numb. xiv, 11; Psa. evi, 12; exix, 66). The verb used in all these passages is יָצַד, Hiph. of יָצַד, to *justen, build to make firm*. From the last of these significations follows that of *support, to rely upon, to trust* (Job xxxix, 11, 12; iv, 18; xv, 15); holding a thing for *certain and reliable* (1 Kings x, 7; 2 Chron. ix, 6; Lam. iv, 12; Jer. xl, 14; Deut. xxviii, 66; Job xxiv, 22). Used with relation to God, it denotes a cleaving to him, resting upon his strength, sure confidence in God, which gives fixedness and stability (2 Chron. xx, 20; Isa. vii, 9).

But there is apparently no corresponding noun to the verb יָצַד. For יִצְדָּה corresponds to the partic. in Kal and Niphal, יָצַד, יָצַדָּה, and denotes *steadfastness, stability* (as an objective quality; e. g. Isa. xxxiii, 6). In other passages it denotes the personal quality of *fidelity, faithfulness* (but not of *holding fast by faith*), e. g. 1 Chron. ix, 22; 2 Chron. xxxi, 18 (sense wrong in English version); 2 Kings xxii, 7; Jer. vii, 28. In these passages, where the word refers to man, the Sept. translates it πίστις; but where it refers to God it makes it ἀλήθεια, e. g. Psa. xxxiii, 4. Here it may be remarked that the reference to the יִצְדָּה (faithfulness of God) by Paul (Rom. iii, 2 sq.) helps us to fix his idea of faith as definitively *trust*. As a designation of the religious relation of man to God, יִצְדָּה, πίστις is only seldom used in the O. T. (see 1 Sam. xxvi, 23; Jer. v, 5). In these passages it denotes not simply *candor, honesty*, but rather *faithfulness, i. e. fidelity to the covenant* (comp. Jer. v, 3 with 1, 5, and Matt. xxiii, 23). But, after all, we have not yet found *our* idea of faith. But Habakkuk ii, 4 affords a passage in which is decidedly to be found the Pauline idea: יִצְדָּה יִצְדָּה יִצְדָּה יִצְדָּה יִצְדָּה (Sept. ὁ δὲ δικαίος ἐκ πίστεως μου ζήσεται). Apparently this passage was not understood by the Sept., which changed the suffix of the third person to that of the first, and referred it to the faithfulness and the reliability of God. But יִצְדָּה stands here with regard to the relation in which the just man, compared with the haughty Chaldean, holds himself to the divine promises; and it refers, therefore, not to the relation it-

self, but to the *quality of the relation*, as the Talmudic פִּיטְרָא דְּרַבִּי חֵלְדָּיָא denotes the *confiding faith* (compare Levy, *Chald. Wörterbuch*). Paul, in citing Hab. ii, 4, changes the order of the words from that in the Sept. to ὁ δὲ δικαίος ἐκ πίστεως ζήσεται (Rom. i, 17; comp. Delitzsch, *Habak.* p. 50-53; Keil, *Kleine Proph.* in loc.). So, then, we find laid in the O. T. the ground for the N.-T. doctrine of faith as *complete confidence, trust*; and this, too, combined with a conviction amounting to a recognition of the invisible (compare Heb. xi, 1).

Conviction combined with trust, as opposed to doubt, so far as the intellect is concerned, and as opposed to fear, so far as the heart is concerned—these appear, so far, to be the essential elements of faith (comp. Matt. xxi, 21; Jas. i, 6; Heb. x, 39; Mark iv, 40; Heb. vi, 12; Rev. xiii, 10).

2. We find πίστις seemingly used, especially in the Synoptical Gospels, with regard to the relation of individuals to the Lord, to designate *special acts of confidence* (Matt. viii, 10; ix, 2, 22; Luke, vii, 9, 50; viii, 48; xvii, 19, xviii, 42; Mark v, 34; x, 52; comp. Matt. xv, 28). But the Synoptists also use the word to denote (not simply special and single exertions of belief, but also) full trust in Christ, and in the divine revelation in him (Luke xviii, 8; comp. Matt. viii, 10; Luke viii, 25; Mark iv, 40; Luke xxii, 32; xvii, 5; Matt. xvii, 20; xxi, 21). Compared with this (and Paul points out the contrast emphatically), the O.-T. revelation was an education for faith (Gal. iii, 23-26: "But before faith came, we were kept under the law, shut up unto the faith which should afterwards be revealed. Wherefore the law was our schoolmaster to bring us unto Christ, that we might be justified by faith. But after that faith is come, we are no longer under a schoolmaster. For ye are all the children of God by faith in Christ Jesus;" comp. Rom. xi, 32; Acts xvii, 31). But it is to be fully understood also that the epistle to the Hebrews makes faith the means of holding to the God of revelation, in the sphere of the *entire economy of redemption*—in the O. T. as well as the N. T. (Heb. xi). In the Acts faith seems to be used as more particularly characteristic of the sphere of the N.-T. revelation (Acts vi, 7; compare Rom. i, 5; xvi, 26; Acts xiii, 8; xvii, 31; Gal. i, 23). In Paul's epistles, while the O.-T. faith is clearly recognised (e. g. with reference to Abraham, and the citation of Hab. ii, 4), nevertheless, the prevailing O.-T. *unbelief* is especially emphasized (e. g. Rom. xi, 32); and the contrast between law and gospel (Gal. iii, 12 sq.) brings out clearly the chief element of N.-T. faith as unconditional trust.

The *promise*, as the correlate of the *Gospel*, is the N.-T. element of the O.-T. economy, and demands faith (Gal. iii, 22; compare iv, 21 sq.), but the absence of a σπέρμα ᾧ ἐπηγγέλτα (seed to whom the promise was made, Gal. iii, 19) made necessary the interposition of the law; not a νόμος πίστεως (law of faith), but ἔργων (of works), which, by manifesting sin, was an educator into faith (Rom. iii, 19; Gal. iii, 22, 23). This throws light upon the contrast of πίστις and ἔργα—χάρις and ὀφείλημα—or πίστις and νόμος (Gal. iii, 23; also Rom. iii, 27, 28; comp. iv, 2, 5; ix, 32; Gal. ii, 16; iii, 2, 5; comp. iii, 12; Eph. ii, 8; and in contrast to νόμος, Rom. iv, 13, 14, 16; ix, 30; Gal. iii, 11, 12, 23-25). This contrast, it will be observed, is only introduced by Paul in passages in which he is expressly pointing out the difference between the O.-T. economy of salvation and that of the N. T.

3. The following classification of the passages in which the word πίστις occurs will be found useful: (1.) It is used *with reference to an object*, Heb. vi, 1; 1 Thess. i, 8; Mark xi, 22; 2 Thess. ii, 13; Colos. ii, 12; Phil. i, 27; Acts xxiv, 24; xxvi, 18; Colos. ii, 5; Acts xx, 21; comp. Philem. 5; 1 Tim. iii, 13; Gal. iii, 26; Ephes. i, 15; 2 Tim. iii, 15; Rom. iii, 25; with the obj.-genit.,

Rom. iii, 22; Gal. ii, 16; iii, 22; Ephes. iii, 12; Phil. iii, 9; Gal. ii, 20; Acts iii, 16; Jas. ii, 1; Rev. ii, 13; xiv, 12; with Tit. i, 1, compare Rev. xvii, 14. (2) Without nearer definition, simply as *faith*, which adheres with full conviction and confidence to the N.-T. revelation of salvation, and makes this its foundation (support). Here is especially of importance the expression (Acts iii, 16), *the faith which is by him*, an expression which is used to point out the salvation arising from the mediation of Christ, through the *looking unto Jesus*, the author of faith (Heb. xii, 2). Under this class, besides the passages of the Synoptical Gospels already referred to, we mention Acts xv, 22; xvi, 5; Colos. i, 23; 1 Pet. v, 9; Rom. xiv, 1; iv, 19, 20; 1 Cor. xvi, 13; Rom. xi, 20; 2 Cor. i, 24; xiii, 5; 1 Tim. ii, 15; 2 Tim. iv, 7; 2 Cor. viii, 7; x, 15; 2 Thess. i, 3; Colos. ii, 7; 1 Tim. i, 19; Jas. ii, 1, 14, 18; Tit. i, 13; ii, 2; 2 Cor. v, 7; Rom. i, 17; Gal. iii, 11; Heb. x, 38 (comp. Gal. ii, 20); Acts xiii, 8; 2 Tim. ii, 18; 1 Tim. i, 19; iv, 1; v, 8, 12; vi, 10, 21; 2 Tim. iii, 8. Then the Pauline expressions *ἐκ πίστεως εἶναι, οἱ ἐκ π.* (they which are of *faith*; Gal. iii, 7, 9, 12, 22; Rom. iv, 16; iii, 26; comp. Heb. x, 39), *ἰσθῆναι πίστει* (we are of them that *believe*), are used of faith proper (compare Rom. xiv, 22, 23). The phrases *ἐκ πίστεως ἔκαστου, ἔκαστος*, make faith the necessary condition of justification (Rom. iii, 30; comp. Gal. iii, 14; Rom. v, 1; Gal. ii, 16; iii, 8; Rom. iv, 13; *ἐκ πίστεως*, ix, 30; x, 6; Phil. iii, 9; comp. Rom. i, 17; iv, 5, 9). The word *πίστις* is found joined to *ἀγάπη*, Ephes. vi, 23; 1 Thess. iii, 6; v, 8; 1 Tim. i, 14; iv, 12; vi, 11; 2 Tim. i, 5, 13; ii, 22; Gal. v, 6; 1 Cor. xiii, 13; Rev. ii, 19; with *ἁγίς, ὑπομονή*. 1 Cor. xiii, 13; 2 Thess. i, 4; Rev. xiii, 10. The word is also found Acts vi, 5, 8; xi, 24; xiv, 27; xv, 9; Rom. i, 8, 12; iii, 31; iv, 12; v, 2; x, 8, 17; xiii, 6; 1 Cor. ii, 5; xv, 14, 17; 2 Cor. i, 24; iv, 13; Gal. v, 5, 22; vi, 10; Ephes. iii, 17; iv, 5, 13; vi, 16; Phil. i, 25; i, 17; Col. i, 4; 1 Thess. i, 3; ii, 5, 7, 10; 2 Thess. iii, 2; 1 Tim. i, 2, 4; ii, 7; iii, 9; iv, 6; vi, 12; 2 Tim. i, 5; iii, 10; Tit. i, 1, 4; iii, 15; Philem. 6; Heb. x, 22; xiii, 7; Jas. i, 3, 6; ii, 5, 14, 17, 18, 20, 22, 24, 26; v, 15; 1 Pet. i, 5, 7, 9, 21; 2 Pet. i, 1, 5; Jude 3, 20.

That even in James, *confidence, trust* (and not mere *recognition*), is the essential element of faith, is manifested from the passage (v, 15), *ἡ ἐνυῖα τῆς πίστεως σώσει τὸν κάματον* (the *prayer of faith* shall save the sick). The *works of faith* are, according to James, such as show forth faith, and without which faith sinks into a mere recognition (Jas. ii, 19), as *dead faith* (*νεκρά*).

It must be noted that the word *πίστις* occurs in John's epistles only in one place, 1 John v, 4, and in his Apocalypse in four places (ii, 13, 19; xiii, 10; xiv, 12).

There remain a few passages in which *πίστις* apparently does not denote "trust" in salvation by Christ, as Rom. xii, 3 (comp. Alford, *in loc.*, and also Acts xvii, 31). 1 Cor. xiii, 2 is easily explained by comparison with Matt. xxi, 21; Luke xvii, 5, 6, and here will be best joined 1 Cor. xii, 9. In the signification *faithfulness, πίστις*, like the O. T. *אֱמוּנָה*, is spoken of God, Rom. iii, 3; of men, Matt. xxiii, 23; Tit. ii, 10. With the former passage compare Isa. v, 1 sq.

*Πιστέω*. General meaning: a. to trust, to depend upon, *τινί* e. g. *ταῖς προνομίαις θεῶν θεσφοταί*, Polyb. v, 62, 6; Sophoc. *Philoct.* 1369; Demosth. *Phil.* ii, 67, 9. With the dative of the person and the acc. of the thing, *π. τινί τι* = to intrust (confide) something to a person, Luke xvi, 11; John ii, 24; in the passive, *πιστεύομαι τι*, I am trusted with a thing; without obj.: I am trusted, Rom. iii, 2; 1 Cor. ix, 17; Gal. ii, 7; 1 Thess. ii, 4; 2 Thess. i, 10; 1 Tim. i, 11; Tit. i, 3. b. Very frequently *πισθεῖν τινί* denotes to trust a person, to give credence to, to accept statements (to be convinced of their truth); Soph. *El.* 886, *τῷ λόγῳ*. In

a broader sense, *πισθεῖν τινί τι*, to believe a person; e. g. Eur. *Hec.* 710, *λόγους ἐμοῖσι πιστεύονταί*; Xen. *Apol.* 15. Then *πισθεῖν τι*, to believe a thing, to recognize it (as true); e. g. Plat. *Gorg.* 524, A, *ἂ ἐγὼ ἀνηκούσως πιστέω ἀληθῆ εἶναι*; Aristot. *Analyt.* pr. 2, 23; also *πισθεῖν περί, ὑπὲρ τινος*, Plut. *Lyc.* 19, where *πισθεῖν* stands alone, to be inclined to believe, recognize a thing; while e. g. in John ix, 18, the specific aim is added: "But the Jews did not believe concerning him that he had been blind, and received his sight."

In the N. T. (in which *πισθεῖν* has regard to our conduct towards God and his revelation) all these constructions are found, as well as the combinations (unusual in the profane Greek) of *π. εἰς, ἐπί τινα, ἐπί τινα*, and also *πισθεῖν* standing alone. The question is whether the original signification is *confide, or accepting as true*.

(1.) We find *πισθεῖν* in the signification to believe, to take for true, and hence to be convinced, to recognize (accept); (a) with the acc. following, John xi, 26, *πιστεύεις τοῦτο*; comp. 25, 26; 1 John iv, 16; Acts xiii, 41; 1 Cor. xi, 18; 1 Tim. iii, 16 (comp. Matt. xxiv, 23, 26; Luke xxii, 67); John x, 25; (b) with the infinitive after it, Acts xv, 11 (*πιστεύομεν σωζήσθαι*); (c) with *ὅτι* after it, Matt. ix, 28; Mark xi, 23, 24; Acts ix, 26; Jas. ii, 19, *ὅ π. πιστεύεις ὅτι εἰς ὃ ζῶς ἴσταν*; compare Acts xxvii, 25; John iv, 21, *πιστέvé μοι, ὅτι ἔρχεται ὄρα*. This construction of *πισθεῖν ὅτι* is especially frequent in the writings of John, in St. Paul's meaning of it. It is also used by Paul in Rom. vi, 8; 1 Thess. iv, 14; but in Rom. x, 9, *ἐάν πισθέσθης ἐν τῇ καρδίᾳ σου ὅτι ὁ ζῶς πάντων ἠγγεῖται ἐκ νεκρῶν, σωθήσῃς*, the sense of *trust* predominates over that of *taking for true*. Compare also Heb. xi, 6, with xi, 1; iv, 3.

In John this construction with *ὅτι* is found in chap. iv, 21; viii, 24; x, 38; xi, 27 (compare vi, 69); xi, 42 (compare xvii, 3); xiii, 19; xiv, 10, 11; xvi, 27; (and have believed that I came out from God), xvi, 30; xvii, 8, 21; xx, 31; 1 John v, 1, 5 (comp. with v, 10). In these passages the sense of *πιστέω* is that of *assent, belief, recognition, conviction of truth*. This meaning is also predominant in the following passage: John iii, 12 (If I have told you earthly things, and ye believe not, how shall ye believe if I tell you of heavenly things) (comp. iii, 11). Note also the connection with *γινώσκω* (*to know*), vi, 69; x, 37, 38; xvii, 8; and note also the relation of Christ's works and of sight to faith, John iv, 48 (Except ye see signs and wonders, ye will not believe); x, 37, 38; xiv, 11; vi, 36; xx, 8, 29 (compare xx, 25); i, 51; iv, 39-42.

Let us look now at the constructions *πισθεῖν τινί, εἰς τινα*. It is clear that *πισθεῖν τινί* of itself cannot signify to accept a person, but only to believe what he says, to trust his word; e. g. John ii, 22 (they believed the Scripture and the word which Jesus had said); v, 47; xii, 38 (comp. Luke i, 20; Acts xxiv, 14; xxvi, 27; 1 John iv, 1). In this sense also we understand John v, 46 (for had ye believed Moses, ye would have believed me); viii, 31, 45, 46; x, 37 (comp. with x, 36); xiv, 11. Nevertheless, as it is the witness of Jesus himself that is in question, the acceptance of his words implies the acceptance of his person (John v, 46; comp. with v, 37-39). Connect with these the unique passage 1 John iii, 23: *αὕτη ἐστίν ἡ ἐντολή αὐτοῦ ἵνα πιστεύσωμεν τῷ ὀνόματι τοῦ υἱοῦ αὐτοῦ*, "this is the commandment, that we should believe on the name of his son Jesus Christ" (elsewhere *εἰς τὸ ὄν.*, John i, 12; ii, 23; iii, 18; 1 John v, 13); comp. also John vi, 29; xvi, 3; 1 John v, 10 (He that believeth on [εἰς] the Son of God hath the witness in himself; he that believeth not God [τῷ θεῷ] hath made him a liar, because he believeth not [εἰς] the record that God gave of his Son). Here *πισθεῖν τῷ θεῷ*, to believe God, is to receive his testimony, *π. εἰς τὴν μαρτυρίαν*, and consequently to receive Him for whom the testimony is borne. Further comp. John v, 38 with 37, 24, 47, and 44. These passages show that John's idea of faith includes (1) accepting

the testimony of God, (2) accepting the testimony of Christ concerning himself, and therefore (3) accepting Christ himself. The construction *πιστεύειν εἰς* is found in John ii, 11; iii, 16, 18, 36; iv, 39; vi, 29, 40 (47); vii, 5, 31, 38, 39, 48; viii, 30; ix, 35, 36; x, 42; xi, 25, 26, 45, 48; xii, 11, 37, 42, 44, 46; xiv, i, 12; xvi, 9; xvii, 20; 1 John v, 13. The only passage in the writings of John in which another preposition occurs is John iii, 15, where Lachmann reads *ἐπ' αὐτόν*, Tischendorf *ἐν αὐτῷ*, instead of *εἰς αὐτόν*.

(2.) But the sense of *admitting, accepting as true*, thus far developed, is by no means the whole of John's idea of faith in Christ. It includes not only this, but also *adherence to Christ; cleaving to him*. See, for instance, the whole passage, John ix, 35-38, and comp. xi, 48; x, 26, 27; vi, 69; i, 12. Both these are evidently contained also in the *πιστεύειν τινί*, John vi, 30; comp. with vi, 29: *τί οὖν ποιῆς τὸ σημεῖον, ἵνα ἴωμεν καὶ πιστεύσωμέν σοι* (What sign showest thou, that we may see and believe in thee?); 29: *ἵνα πιστεύσῃτε εἰς ὃν ἄπιστευεν ὁ Ζῆσὺς* (that ye believe on him whom He hath sent). Compare especially also Matt. xxvii, 42; Mark xv, 32.

It is plain, now, that John's idea of faith includes the element of *cleaving to Christ* as well as of *accepting him*; and this cleaving to him includes the idea of *full trust* in Christ as Saviour, as illustrated in the important passage, John iii, 15: *ἵνα πᾶς ὁ πιστεύων ἐν αὐτῷ* (that whosoever believeth in him, not *εἰς αὐτόν*. Tischendorf *ἐν*, Lachmann *ἐπ' αὐτόν*). "Here is involved the anguish, in the believer, of the bite of the fiery serpent, and the earnest looking on him in whom sin is crucified with the inner eye of faith" (Alford, in loc.). In this full sense of the word John uses *πιστεύω* by itself (*to believe*) in i, 7, 51; iv, 41, 42, 48, 53; vi, 36, 64; ix, 38; x, 25, 26; xi, 15, 40; xii, 39, 47; xiv, 29; xvi, 31; xix, 35; xx, 31 (comp. iii, 12; vi, 69; xx, 8, 25, 29). And this faith is the condition of the gifts of life, light, and salvation; John x, 26, 27; iii, 12, 16, 18, 36; vi, 35, 40, 47; vii, 38; xi, 25, 26; xx, 31 (comp. v, 38); viii, 24; i, 12; xii, 36, 46 (comp. viii, 12 and xi, 40).

(3.) Paul's use of *πιστεύειν* also includes the idea of *intellectual conviction, recognition*; see the passages above cited under *πίστις*, and comp. also Rom. iv, 20 (strong *in fide*); i, 5; xvi, 26, and the relation of *πιστεύειν* to *κρῖναι* (Rom. x, 14, 16; 1 Cor. xv, 2, 11; Ephes. i, 13). But the sense of *trust in Christ as Saviour* is always predominant in Paul. The construction *πιστεύειν τινί*, *to trust, rely upon*, is found 2 Tim. i, 12 (I know *in whom I have believed, and am persuaded*); Tit. iii, 8; Rom. iv, 3; Gal. iii, 6; Rom. iv, 6; compare iv, 18. Instead of the dative we find *πιστεύειν ἐπὶ τινά*, Rom. iv, 5; *ἐπὶ τῶν ἑκαουσῶτα τὸν ἀσιβῆ* (*on him that justifieth the ungodly*), iv, 24. The *πιστεύειν εἰς* denotes always faith in Christ (Rom. x, 14; Gal. ii, 16; Phil. i, 29); likewise *ἐπὶ* with the dative, 1 Tim. i, 16; Rom. ix, 33. And *πιστεύειν* is used standing alone to designate the fullest *trust* of faith, Rom. i, 16; iii, 22; iv, 11, 18; x, 4, 10; xiii, 11; xv, 13; 1 Cor. i, 21; iii, 5; xiv, 22; 2 Cor. iv, 13; Gal. iii, 22; Ephes. i, 13, 19; 1 Thess. i, 7; ii, 10, 13; 2 Thess. i, 10.

In James ii, 19, *to believe* denotes intellectual assent, but in ver. 23 it denotes *trust* (see under *πίστις*). In Peter the two elements of assent and trust are conjoined (comp. 1 Pet. i, 8, with ii, 6, 7; i, 21).

In the Acts and Synoptical Gospels, the import of the word (whether assent or trust, or both conjoined) must be decided by the context.

The result of our examination is, that "faith" in the N. T. includes three elements, each and all necessary to the full meaning of the word, while one or another of them may become prominent according to the connection, viz. (1) full intellectual acceptance of the revelation of salvation; (2) adherence to the truth and to the person of Christ thus accepted; (3) absolute and

exclusive trust in the redeeming work of Christ for salvation. In no one of the writers of the New Testament is any one of these three elements wanting.

(1.) *Early History of the Doctrine of Faith*.—1. In the early Church, the Pauline doctrine of faith as a condition of justification was universally maintained. But the Eastern thinkers did not give much attention to faith in a doctrinal way, and its true meaning was not prominently developed, nor was the distinction between faith and works (as conditions) sharply drawn. During the Apologetic period (from A. D. 100 to A. D. 250), while attention was "principally directed to theoretical knowledge, faith was for the most part considered as historico-dogmatic faith in its relation to *γνώσις*. This gave rise to the opinion that knowledge in divine things justifies, while ignorance condemns. Minucius Felix († 208), 35: *Imperitū Deī sufficit ad penam, notitia prodest ad veniam*. Theophilus of Antioch († 181) also knows of a *filēs historica* alone, upon which he makes salvation to depend, i, 14: *Ἀπόδειξεν οὖν λαβῶν τῶν γινομένων καὶ προαναπεφωτημένων, οὐκ ἀπιστῶ, ἀλλὰ πιστέω περὶ ἀρχῶν Ζεῦ, ᾧ ἔν βοῦλει καὶ σὺ ὑποτάγητι, πιστεύων αὐτῷ, μὴ ἔν ἄπιστῆσθα, πιστῶν ἄνωμεος τότε ἐν αἰωνίου τιμωρίας*. But, though it was reserved for men of later times to investigate more profoundly the idea of justifying faith in the Pauline sense, yet correct views on this subject were not entirely wanting during this period." Clement of Rome († 100) says in a Pauline spirit, "Called by the will of God in Christ, we can be justified, not by ourselves, not by our own wisdom and piety, but only by faith, by which God has justified all in all ages. But shall we on this account cease from doing good, and give up charity? No, we shall labor with unwearied zeal as God, who has called us, always works, and rejoices in his works" (1 *Ep. ad Cor.* c. 32, 33). Irenæus († 202) contrasts the new joyful obedience which ensues on the forgiveness of sins with the legal stand-point. "The law which was given to bondmen formed men's souls by outward corporal work, for it coerced men by a curse to obey the commandments, in order that they might learn to obey God. But the Word, the Logos who frees the soul, and through it the body, teaches a voluntary surrender. Hence the fetters of the law must be taken off, and man accustoms himself to the free obedience of love. The obedience of freedom must be of a higher kind; we are not allowed to go back to our earlier stand-point; for he has not set us free in order that we may leave him; this no one can do who has sincerely confessed him. No one can obtain the blessings of salvation out of communion with the Lord; and the more we obtain from him, so much the more must we love him; and the more we love him, so much greater glory shall we receive from him" (Irenæus, *Har.* bk. iv, chap. xiii, 1, 23; Neander, *History of Dogmas*, Ryland, p. 216). Tertullian (220) adv. Marc. v, 3: *Ex fidei libertate justificatur homo, non ex legis servitute, quia iustus ex fide vivit*. According to Clement of Alexandria († 218), *faith* is not only the key to the knowledge of God (*Coh.* p. 9), but by it we are also made the children of God (*ib.* p. 23). Clement accurately distinguishes between theoretical and practical unbelief, and understands by the latter the want of susceptibility of divine impressions, a carnal mind which would have everything in a tangible shape (*Strom.* ii, 4, p. 436). Origen (A. D. 250) in *Num. Hom.* xxvi (Opp. iii, p. 369): *Impossibile est salvari sine fide; Comm. in Ep. ad Rom.* (Opp. iv, p. 517): *Etiam si opera quis habeat ex lege, tamen, quia non sunt cœlicata supra fundamentum fidei, quævis videantur esse bona, tamen operatore suum justificare non possunt, quod eis dedit fides, quæ est signaculum eorum, quæ justificatur a Deo* (Hagenbach, *History of Doctrines*, § 70; comp. also § 34). Apollinaris († 385) on John vi, 27, says: "The eternally enduring food, by which we are sealed by the Father and assimilated to Christ, is the faith which makes alive;"

and on ver. 28, "Faith both justifies and sanctifies without human works, seeing that it contains within itself the noblest energy, and is not slothful or inactive" (Dorner, *Person of Christ*, Edinb. transl., div. i, vol. ii. p. 389). Hilary († 368): "By faith we become, not merely in a moral way, but essentially, one with Him" (*Ibid.*, p. 118).

2. The Latins, more earnest on the practical than on the theoretical side, seem to have had deeper notions of faith (see Tertullian, cited above). But the minds of theologians were turned almost wholly to the doctrines of sin, grace, and free will (Pelagian controversy), and not to the appropriation of redemption by faith. The relations of faith to knowledge were set forth clearly and strongly, however, in the maxim *Fides præcedit intellectum*, first announced by Origen, and adopted by Augustine (Epist. cxx, 3; ed. Migne, ii, 453, cited by Shedd, *History of Doctrines*, i, 162). Compare also Augustine, *De Utilitate Credendi*, c. x-xiii, where he shows the natural analogies for faith; e. g. that friendship among men, filial piety, etc., are grounded on faith. He makes a distinction between *fides quæ* and *fides quæ creditur* (*De Trin.* xiii, 2); and uses the phrase *fides Catholica* in the objective sense, to denote the body of doctrine "necessary to a Christian" (*De temp. serm.* 53; and *adv. Jud.* c. xix). Augustine, says Melancthon, did not set forth fully Paul's doctrine, though he came nearer to it than the Scholastics (*Letter to Brentius*, opp. ed. Bretschneider, ii, 502).

3. In the scholastic period the idea of the kingdom of God degenerated into that of an ecclesiastical theocracy, and the outward side of the religious life (penance and good works) was prominent. Nevertheless, the great doctrinal truths of Christianity were carefully studied, and the aim of the greatest thinkers (e. g. Anselm) was to show that faith can be verified to the intellect as truth, while, at the same time, it is the necessary condition of science, as well as of salvation. "First of all," he says, "faith must purify the heart: we must humble ourselves, and become as little children. He who believes not cannot experience; he who has not experienced cannot understand. Nothing can be done till the soul rises on the wings of faith to God" (*De Fide Trinitat.* c. ii). The great Greek theologian, John of Damascus (8th century), who may be considered as beginning the period of scholastic theology, defined faith as consisting of two things: 1. belief in the truth of revealed doctrines, the *πίστις ἐξ ἀκοῆς* (the faith which cometh by hearing, Rom. x, 17); 2. firm confidence in the promises of God, the faith which is "the substance of things hoped for, the evidence of things not seen" (Heb. xi, 1). The first of these, he says, is the work of our own minds; the second is the gift of the Spirit (*De Fide Orthod.* iv, 10). "Anselm comprises the whole doctrine of faith and morals in the question, how man appropriates redemption to himself. He says, 'The mere idea does not make faith, although this cannot exist without an object; in order to true faith the right tendency of the will must be added, which grace imparts' (*De Gratia et Libero Arbitrio*, c. vi). He distinguishes (*Monologium*, p. 72; compare p. 75) between *credere Deum*, *Christum*, and *credere in Deum*, *in Christum*; the former denotes a mere outward faith which only retains the form; the latter denotes the true, living faith, which lays hold of communion with God (*credendo tendere in dirinum essentiam*); the former is valueless and dead; the latter contains the power of love, and testifies its power and its life by love. The faith which is connected with love cannot be inoperative; it proves its vitality by so operating. Hugo of St. Victor develops the general idea of faith in connection with the religious nature of man. Faith marks the manner in which invisible blessings dwell within our souls (*quodam modo in nobis subsistunt*), the real vital communion with God, his true existence in the human

soul. For divine things cannot be apprehended by us through the senses, the understanding, or the imagination, since they have nothing analogous to all these, but are exalted above all images. The only vehicle of their appropriation is faith. Two elements meet in it—the tendency of the disposition, and the matter of cognition. This latter is the object of faith, but its essence consists in the tendency of the disposition; and although this is never altogether without the former, yet it constitutes the value of faith. Bernard agrees with Hugo in his view of the nature of faith: 'even now,' he says, 'many who believe with confidence have only scanty knowledge; thus many in the O. T. retained firm faith in God, and received salvation by this faith, although they knew not when and how salvation would come to them.' Abelard's expressions are also important (*Sentent.* c. iv). 'Faith,' he says, 'always refers to the invisible, never to the visible. But how is this? when Christ said to Thomas, "Because thou hast seen me, thou hast believed." What Thomas saw before him was one thing, what he believed was another. He confessed the man whom he saw to be the Lord, in whom he believed. He saw the flesh, but he believed in the God veiled in the flesh'" (Neander, *Church History*, Torrey, iv, 375). "Not merely Abelard, but also most of the other schoolmen, understood by *Justificatio per fidem* not objective justification, but a subjective character of the disposition, which proceeds from faith, the true inward sanctification in love which arises out of faith. Bernard, on the other hand, was led by his experience to a more objective view: 'No one is without sin (*Sermo on Solomon's Song*, 23, § 15); for all righteousness it is enough for me that he is gracious to me who has redeemed me. Christ is not merely righteous (*Jb.* 22, § 8), but righteousness itself.' The scholastic doctrine on this point received a fixed form through Peter Lombard (*Sentent.* iii, dist. 28). He makes a threefold distinction in faith: *Deum credere*, *Deo credere*, and *in Deum* or *Christum credere*. The two first amount merely to holding a thing to be true, but the last is the faith by which we enter into communion with God. With such a faith love is necessarily connected, and this faith alone is justifying. Love is the effect of this faith, and the ground of the whole Christian life. Applying to faith the Aristotelian distinction between the form as the formative principle (*εἶδος, forma*), and the inorganic material determined by it (*ἕλη, materiam*), Peter distinguishes faith as the *qualitas mentis informis*, the mere material of faith, and the *files formata*, when the vivifying power of love is added to it, which forms and determines it. The *files formata* is a true virtue, and this faith, working by love, alone justifies" (Neander, *History of Dogmas*, Ryland, p. 522 sq.).

The Scholastics generally recognised the distinction (hinted by Augustine) between objective and subjective faith (*fides quæ creditur* and *fides quæ creditur*), and also distinguished between developed (*explicita*) and undeveloped (*implicita*) faith (Aquinas, *Summa*, ii, qu. 1, art. 7). But in all the scholastic period, the prevalence of the sacerdotal theory of religion hindered, if it did not absolutely prevent, a just apprehension of the nature of faith, and naturally developed the theory of the merit of good works. Peter Lombard, indeed, says that good works are those only that spring from the love of God, which love itself is the fruit of faith (*opus fidei*; *Sentent.* lib. iii, dist. 23, 1); but the "views of Thomas Aquinas were not quite so scriptural; thus (*Summ.* pt. ii, 2, qu. 4, art. 7) he speaks of faith itself as a virtue, though he assigns to it the first and highest place among all virtues." He defines faith to be "an act of the intellect assenting to divine truth in virtue of the operation of the Spirit of God upon the will" (*Summa*, ii, 2, 1, 4), and reckons faith among the theological virtues, which he distinguishes from the ethical (Neander, *Wiss. Abhandlung.* ed. Jacobi, 1851, p. 42). "Such notions, however, led more and more to do

revival of Pelagianism, till the forerunners of the Reformation returned to the simpler truths of the Gospel" (Hagenbach, *History of Doctrines*, § 186). According to Aquinas, the faith by which we are cleared from sin is not the *fidis informis*, which can coexist with sin; but is the *fidis formata per charitatem* (faith informed by love). In justification there is a *motus charitatis* as well as a *motus fidei* (*Summa*, pt. iii, qu. 44, art. 1). This statement contains the germ of the later Roman Catholic doctrine (see other passages in Möhler, *Synbolism*, N. Y. 1844, p. 205; comp. Beck, *Dogmengeschichte*, 1864, p. 365). Its doctrine (as that of the period generally) is that justification is "not an objective act, but something subjective, making man internally righteous by the communication of the divine life in fellowship with Christ. For the attainment of *justificatio*, moreover, faith can only be the first step; it was not sufficient for justification, but love must be added; and the *gratia justificans* was first given in the *fides formata*, making man internally righteous. Since this external idea of faith required that for effecting justification something must be added from without, the additional aid of the Church here was demanded" (Neander, *Dogmas*, p. 661). See JUSTIFICATION.

4. John Wessel († 1489) was a precursor of the Reformation in his views on faith, as well as on many other points. None of the theologians of the Scholastic age expressed the principle of faith so fully in the Pauline spirit as Wessel. He considers it "not a mere taking for granted of historical facts, but the devotion of the whole mind to fellowship with God through Christ; it is the basis of the whole higher life; not merely in the relations of man to man, but also in the relations of man to God" (Ullmann, *Reformers before the E. formation*, Edinb. 1855, ii, 468).

Practically, at the dawn of the Reformation (and for ages before), Christian people were taught by their pastors that the pardon of sin was to be secured, not by faith in the merits of Christ, but by penitential observances and good works, followed by priestly absolution; and faith itself was generally held to be simply the reception of the teaching of the Church. In practice, faith was transformed into credulity.

(III.) *The Protestant and Roman Catholic Doctrines of Faith compared.*—*The Protestant Doctrine.*—The central point of the Reformation, in a doctrinal point of view, was justification by faith. Its development will be treated in our article JUSTIFICATION; we can here only briefly give the distinction between the Protestant and Roman Catholic doctrines of faith: 1. that of the Reformers; 2. that of the Roman Catholic Church.

1. *The Reformers.*—The Reformers, in opposition to the Scholastic doctrine of justification as a subjective work (the *making just*), brought out prominently the objective idea of justification (as a work done for us by Christ). "On the other side, correspondingly, they regarded faith as subjective, and as the principle of the transformation of the whole inner life" (Neander, *Dogmas*, ii, 662). The prominent position of faith in the theology of the Reformers was a fundamental part of the change that was taking place, at the time, in the general religious views of Christendom. "The mind was not satisfied with an objective and outward salvation, however valid and reliable it might be. It desired a consciousness of being saved; it craved an experience of salvation. The Protestant mind could not rest in the Church, neither could it pretend to rest in an atonement that was unappropriated. The objective work of Christ on Calvary must become the subjective experience and rejoicing of the soul itself. While, however, the principle and act of faith occupies such a prominent place in the soteriology of the Reformation, we should not fail to notice that it is never represented as a *procuring cause* of justification; it is only the instrumental cause. Protestantism was exceedingly careful to distinguish justification from legal righteousness on the one hand, and from sanctification by grace on

the other. It could not, consequently, concede to any species of human agency, however excellent, a peculiar and atoning efficacy. Hence we find none of that supplementary or perfecting of the work of Christ by the work of the creature which is found in the papal soteriology. And this applies to the highest acts, the act of faith itself. Faith itself, though the gift and the work of God, does not justify, speaking accurately, but merely accepts that which does justify" (Shedd, *History of Doctrines*, ii, 337-8). Luther was led to the true Pauline doctrine of faith by his profound conviction of the desperate condition of humanity, not simply from its sense of finiteness (which could only have led him to faith as a realization of the invisible and eternal), but also and chiefly from the crushing sense of personal guilt on account of sin. He regards faith not merely as a mere attribute, but, "so to speak, as a substantial and divine thing, so far as it cleaves to God, and God is in it. Faith is in the state of the *unio mystica*, union with God; and yet it is, at the same time, man's true existence." It is no mere intellectual act, but a giving up of the whole man to trust in Christ; and conversely, a penetration of the whole man by the life of Christ. "Faith makes new creatures of us. My holiness and righteousness do not spring from myself; they arise alone out of Christ, in whom I am rooted by faith" (Dorner, *Person of Christ*, ii, 58, 64). In the *Preface to the Epistle to the Romans*, Luther says: "Faith alone justifies, and it alone fulfills the law; for faith, through the merits of Christ, obtains the Holy Spirit. And then, at length, from the faith thus efficaciously working and living in the heart, freely (*fluunt*) proceed those works which are truly good. . . . But faith is an energy in the heart; at once so efficacious, lively, breathing, and powerful as to be incapable of remaining inactive, but bursts forth into operation. Neither does he who has faith (*moratur*) demur about the question whether good works have been commanded or not; but even though there were no law, feeling the motions of this living impulse putting forth and exerting itself in his heart, he is spontaneously borne onward to work, and at no time does he cease to perform such actions as are truly pious and Christian. Faith, then, is a constant *fulcra*, a trust in the mercy of God toward us; a trust living and efficaciously working in the heart, by which we cast ourselves entirely on God, and commit ourselves to him; by which, *ceteris freti*, having an assured reliance, we feel no hesitation about enduring death a thousand times." "Luther laid the greatest stress at all times on the assurance of salvation, and of the divine truth of Christianity. The ground certainty, on which all other certainty depends, is with him the justification of the sinner for Christ's sake apprehended by faith; of which it is only the objective statement to say that to him the fundamental certainty is Christ as the Redeemer, through surrender to whom faith has full satisfaction, and knows that it stands in the truth" (Dorner, *Geschichte d. Prot. Theol.*, München, 1867, p. 224). "To believe those things to be true which are preached of Christ is not sufficient to constitute thee a Christian; but thou must not doubt that thou art of the number of them unto whom all the benefits of Christ are given and exhibited, which he that believes must plainly confess, that he is holy, godly, righteous, the Son of God, and certain of salvation, and that by no merit of his own, but by the mere mercy of God poured forth upon him for Christ's sake" (Luther, *Serm. on Gal. i*, 4-7, in Fish, *Masterpieces of Pulpit Eloquence*, i, 462).

Zwingle held that faith, in the sense of the appropriation by man, through grace, of the redemptive work of Christ, is the only means or instrument of salvation. It was one of his grounds of objection to the Roman and Lutheran doctrines of the Eucharist that these doctrines detract from the glory of faith by representing it as insufficient for salvation (Dorner, *Person of Christ*, div. ii, vol. ii, p. 116). Melancthon, in

a letter to Brentius, May, 1551, says: "Faith alone (*sola*) justifies, not because it is the root (*radix*), as you write, but because it *lays hold of Christ*, on whose account we are accepted. It is not love, the fulfilling of the law, which justifies, but faith alone, not because it is a perfection *in us*, but only because it lays hold on Christ" (edit. Bretschneider, Hal. Sax. 1835, ii, 501). Calvin (*Institutes*, bk. iii, chap. xi) treats of faith at large, and distinguishes it from "a common assent to the evangelical history," and refutes the nugatory distinction made by the schools between *fides formata* and *fides informis*. "The disputes of the schools concerning faith, by simply styling God the object of it, rather mislead miserable souls by a vain speculation than direct them to the proper mark. For, since God, 'dwelleth in the light which no man can approach unto,' there is a necessity for the interposition of Christ as the medium of access to him." "This evil, then, as well as innumerable others, must be imputed to the schoolmen, who have, as it were, concealed Christ by drawing a veil over him; whereas, unless our views be immediately and steadily directed to him, we shall always be wandering through labyrinths without end. They not only, by their obscure definitions, diminish, and almost annihilate, all the importance of faith, but have fabricated the notion of implicit faith, a term with which they have honored the grossest ignorance, and most perniciously deluded the miserable multitude." "Is this faith—to understand nothing, but obediently to submit our understanding to the Church? Faith consists not in ignorance, but in knowledge; and that not only of God, but also of the divine will. . . . For faith consists of a knowledge of God and of Christ, not in reverence to the Church. . . . In short, no man is truly a believer unless he be firmly persuaded that God is a propitious and benevolent Father to him, and promise himself everything from his goodness; unless he depend on the promises of divine benevolence to him, and feel an undoubted expectation of salvation. He is no believer, I say, who does not rely on the security of his salvation, and confidently triumph over the devil and death" (Calvin, *Institutes*, bk. iii, ch. ii).

The passages from the several Confessions will be given more fully in the art. JUSTIFICATION; we cite here a few. *Augsburg Confession*.—"Men are justified freely for Christ's sake through faith when they believe that they are received into favor, and their sins are remitted for Christ's sake; this faith doth God impute for righteousness upon him" (Art. iv). The nature of *saving faith* is set forth in Art. xx: "It is to be observed here that a mere historical belief, such as wicked men and devils have, is not here meant, who also believe in the history of the sufferings of Christ, and in his resurrection from the dead; but that genuine faith is here meant which causeth us to believe that we can obtain grace and forgiveness of sins through Christ, and which giveth us the confidence that through Christ we have a merciful God, which also gives us the assurance to know God, to call upon him, and to have him always in remembrance, so that the believer is not without God, as are the Gentiles" (compare the *Apology for the Confession*, art. ii, iii). *Heidelberg Catechism*.—(Qu. 21. "What is true faith? Ans. It is not only a certain knowledge whereby I hold for truth all that God has revealed to us in his word, but also a hearty trust, which the Holy Ghost works in me by the Gospel, that not only to others, but to me also, forgiveness of sins, everlasting righteousness, and salvation are freely given by God, merely of grace, only for the sake of Christ's merit." *Remonstrants' Confession* (xi, 1).—"Faith in Christ is a firm assent (*assensus*) of the mind to the word of God, joined with true trust (*fideliter*) in Christ, so that we not only faithfully receive Christ's doctrine as true and divine, but rest wholly on Christ himself for salvation." *Westminster Confession* (10, 14).—

"Faith, thus receiving and resting on Christ and his righteousness, is the alone instrument of justification; yet it . . . is no dead faith, but worketh by love. By this faith a Christian believeth to be true whatsoever is revealed in the word . . . but the principal acts of saving faith are accepting, receiving, and resting upon Christ alone for justification, sanctification, and eternal life, by virtue of the covenant of grace. This faith is different in degrees, weak or strong; may be often and many ways assailed and weakened, but gets the victory, growing up in many to the attainment of a full assurance through Christ." In all the Confessions, both Lutheran and Reformed, faith is held to be a laying hold on Christ, by whom we are saved (and not by our own works, or by any work of sanctification done in us).

2. *Roman Catholic Doctrine*.—The Augsburg Confession (Art. xx) speaks of the long desuetude of the doctrine of faith in the Church, and the substitution of childish and needless works (fasts, pilgrimages, etc.), as the great cause of its corruption, and furnishing the chief occasion for the reformation of doctrine. "Our adversaries now," they say (A.D. 1530), "do not preach concerning these unprofitable works as they were wont; moreover, they have now learned to make mention of faith, about which, in former times, entire silence was observed. They now teach that we are not justified before God by works alone, but join faith in Christ thereto, and say faith and works justify us before God; which doctrine imparts more consolation than mere confidence in good works." This was the chief theological dispute of the Reformation, and was also the main topic of theological discussion at the Council of Trent (1545-63). A few of the divines there (the archbishop of Sienna, the bishop of Cava, and others) held that faith alone justifies; but this ancient doctrine was too inconsistent with the sacerdotal system to find favor with the majority. "Great pains were taken to discuss thoroughly the assertion that 'man is justified by faith,' and to affix some determinate meaning to that expression; but the task was not easy. Some busied themselves in searching for the different senses in which the word 'faith' is used in Scripture, which they made to amount to fifteen, but knew not in which it is employed when applied to justification. At length, after much disputing, it was agreed that faith is the belief of all things which God has revealed, or the Church has commanded to be believed. It was distinguished into two sorts: the one said to exist even in sinners, and which was termed *unformed, barren, and dead*; the other peculiar to the just, and working by charity, and thence called *formed, efficacious, and living faith*. Still, as father Paul observes, 'they touched not the principal point of the difficulty, which was to ascertain whether a man is justified *before* he works righteousness, or whether he is justified *by* his works of righteousness" (Cramp, *Text-book of Popery*, ch. vii).

The decision of the Council is as follows (sess. vi, c. viii): "When the apostle says that man is justified 'by faith,' and 'freely,' these words are to be understood in that sense in which the Catholic Church hath always held and explained them, namely, that we are said to be justified 'by faith' because faith is the beginning of human salvation, the foundation and root of all justification, without which it is impossible to please God, and come into the fellowship of his children; and that we are said to be justified 'freely,' because nothing which precedes justification, whether faith or works, can deserve the grace thereof." Here two things are to be noted: (1.) That the Roman idea of faith in general is that of the acceptance of the body of doctrine taught by the Church: "La foi nécessaire pour la justification est la foi Catholique d'après laquelle nous croyons ce que Dieu a révélé à son église" (Drioux, note to his edit. of Aquinas's *Summa*, vi, 600); thus substantially making the intellect alone

the seat of faith, as Bellarmine expressly puts it in his contrast between the Protestant and the Roman ideas of faith: "hæretici fidem *fiduciam* esse definiunt; Catholici *fidem in intellectu sedem habere volunt*" (*De Justif.* i, 4). How thoroughly *external* a thing this faith may become in practice is evinced by the fact that the recitation of a creed, in Romanist language, is called an "act of faith" (Bergier, *Dict. de Théologie*, iii, 54). (2.) That, accordingly, the Council of Trent makes faith only the "beginning of human salvation" (*salutis humanæ incitium*), and "the root of all justification" (*radix omnium justificationis*). If faith is simply an intellectual act, it is fitly described as only the "beginning" of justification, and not its instrument. So Möhler, in commenting on this passage, expressly says that "Roman Catholics consider faith as the reunion with God in Christ especially by means of the faculty of knowledge, illuminated and strengthened by grace" (*Symbolism*, N. Y. 1844, p. 204). In the same vein is the definition given by the Catechism of Trent, viz. that the "faith necessary to salvation is that *faith* by which we yield our entire assent to whatever has been revealed by almighty God" (Baltimore edit. p. 19). It is plain that the notion of faith, as Protestants hold it, and as they believe that Paul held it, is totally wanting in the Roman doctrine. Naturally, too, with this conception of faith, the Romanists deny that faith alone justifies, affirming, in the way of the Scholastics (see above), that faith must be informed by charity, as the germ of new obedience, a gift bestowed first in baptism, and renewed by confession and absolution. So J. H. Newman (*Difficulties of Anglicanism*, cited by Hare, *Contest with Rome*, p. 113) declares that Roman "Catholics hold that faith and love, faith and obedience, faith and works, are simply separable, and ordinarily separated in fact; that faith does not imply love, obedience, or works; that the firmest faith, so as to move mountains, may exist without love—that is, true faith, as truly faith in the strict sense of the word as the faith of a martyr or a doctor." On this Hare remarks: "This belief is not faith. To many persons, indeed, it may appear that this is little more than a dispute about words; that we use the word *faith* in one sense, and the Romanist in another, and that it is not worth while to argue about the matter. But when we call to mind how great are the power and the blessings promised to faith by the Gospel, it surely is a question of the highest moment whether that power and those blessings belong to a lifeless, inert, inanimate notion, or to a living, energetic principle. This is the great controversy between Romanism and Protestantism. Their stay is the *opus operatum*, ours *fides operans*—faith, the gift of God, apprehending him through Christ, renewing the whole man, and becoming the living spring of his feelings, and thoughts, and actions" (*Contest with Rome*, note 1). A letter of Bunsen's in 1840 illustrates the Roman idea of faith, as it had taken root in the mind of J. H. Newman before he went over to Rome. A pastor in Antwerp (named Spörlein) was troubled about episcopal ordination, and came to England for light. He was invited to breakfast at Newman's, and found him and a number of his friends ready to hear him. "He unburdened his heart to them, and they gave their decision—the verdict of a Newmanic jury on a case of conscience, viz. that 'Pastor Spörlein, as a Continental Christian, was subject to the authority of the bishop of Antwerp.' He objected that by that bishop he would be excommunicated as a heretic. 'Of course; but you will conform to his decision.' 'How can I do that,' exclaimed Spörlein, 'without aljuring my faith?' 'But your faith is heresy.' 'How? Do you mean that I am to embrace the errors of Rome, and to aljure the faith of the Gospel?' 'There is no faith but that of the Church.' 'But my faith is in Christ crucified.' 'You are mistaken; you are not saved by Christ, but by the Church'" (*Memoir of Bunsen*, by his Widow, London, 1868, i, 614).

(IV.) *Later Protestantism*.—1. Whatever minor differences may have arisen in Protestant theology as to faith, all evangelical theologians agree in the following points: 1. That saving faith not only recognises the supernatural, but also accepts and trusts *absolutely* on Jesus Christ, the Son of God, as Saviour; 2. that this saving power is the gift of God; 3. that it invariably brings forth good works; 4. that the faith which appropriates the merits of Christ must be a living faith; 5. that it is not the faith, nor the vitality of the faith, which justifies and saves man, but it is the *object* of the faith, i. e. the merits of Christ the Redeemer, and therefore that it is an error to attach a saving quality to any merely subjective faith. The earlier Reformers and Confessions made *assurance* an essential part of saving faith, but this doctrine was not long held. See ASSURANCE; JUSTIFICATION.

2. *Divisions of Faith*.—Faith is divided by the theologians into *fides historica* and *fides salvifica* (historical faith and saving faith). The former is intellectual knowledge and belief of the Christian doctrine; the latter a genuine appropriation of the merits of Christ unto salvation. True faith embraces both. The *parts* of faith, in theological language, are three: *a. Notitia* (act of the intellect), knowledge, instruction in the facts and doctrines of Christianity (Rom. x, 14). *b. Assensus* (act of the will), assent to the doctrine, or reception of it as true and credible. *c. Fiducia* (act of the heart), trust or confidence in the divine word. "True and saving faith in Christ consists both of assent and trust; but this is not a blind and superstitious trust in the sacrifice of Christ, like that of the heathens in their sacrifices, nor the presumptuous trust of wicked and impenitent men, who depend on Christ to save them in their sins, but such a trust as is exercised according to the authority and direction of the word of God; so that to *know* the Gospel in its leading principles, and to have a cordial of *belief* in it, is necessary to that mere specific act of faith which is called *reliance*, or, in systematic language, *fiducial assent*" (Watson, *Institutes*, ii, 243).

3. *Faith in Christ; justifying Faith*.—*Faith as Condition of Salvation*.—(a.) Though the entire revelation of God is set forth, in one sense, as the object of faith (Luke xxiv, 25, 26; Heb. xi), yet Christ, the incarnate Son of God, the dying and risen Redeemer, is *κατ' ἔξοχον*, the object of faith (Gal. ii, 16; John xvii, 21). In the evangelical churches, justifying faith is understood to be exercised specifically in Christ, as by his death making expiation and satisfaction for the sinner's guilt, or (to put the same idea in another light) in God's covenant with mankind in Christ, as offering them pardon for the sake of Christ's death; and this faith is yet viewed *merely* as a condition of justification. (b.) "What faith is it, then, through which we are saved? It may be answered, first, in general, it is a faith in Christ; Christ, and God through Christ, are the proper objects of it. Herein, therefore, it is sufficiently, absolutely distinguished from the faith either of ancient or modern heathens. And from the faith of a devil it is fully distinguished by this—it is not barely a speculative, rational thing, a cold, lifeless assent, a train of ideas in the head, but also a disposition of the heart. For thus saith the Scripture, 'With the heart man believeth unto righteousness.' And, 'If thou shalt confess with thy mouth the Lord Jesus, and shalt believe with thy heart that God hath raised him from the dead, thou shalt be saved.' It acknowledges his death as the only sufficient means of redeeming man from death eternal, and his resurrection as the restoration of us all to life and immortality; inasmuch as he 'was delivered for our sins, and rose again for our justification.' Christian faith is, then not only an assent to the whole Gospel of Christ, but also a full reliance on the blood of Christ; a trust in the merits of his life, death, and resurrection; a recumbency upon him as our atonement and our life, as given for

us, and living in us. It is a sure confidence which a man hath in God that through the merits of Christ his sins are forgiven, and he reconciled to the favor of God; and in consequence thereof, a closing with him, and cleaving to him, as our 'wisdom, righteousness, sanctification, and redemption,' or, in one word, our salvation" (Wesley, *Serm. on Justification*). (c.) Faith is not meritoriously, but instrumentally, the condition of our pardon. "If Christ had not merited, God had not promised; if God had not promised, justification had never followed on this faith: so that the indissoluble connection of faith and justification is from God's institution, whereby he hath bound himself to give the benefit upon performance of the condition. Yet there is an aptitude in faith to be made a condition; for no other act can receive Christ as a priest propitiating and pleading the propitiation, and the promise of God for his sake to give the benefit. As receiving Christ and his gracious promise in this manner, it acknowledgeth man's guilt, and so man renounceth all righteousness in himself, and honoreth God the Father, and Christ the Son as the only Redeemer. It glorifies God's mercy and free grace in the highest degree. It acknowledgeth on earth, as it will be perpetually acknowledged in heaven, that the whole salvation of sinful man, from the beginning to the last degree thereof, whereof there shall be no end, is from God's freest love, Christ's merit and intercession, his own gracious promise, and the power of his own Holy Spirit" (Lawson). Wesley, speaking of faith as the condition of our justification, says, "We mean this much, that it is the only thing without which no one is justified; the only thing that is immediately, indispensably, absolutely requisite in order to pardon. As, on the one hand, though a man should have everything else, without faith, yet he cannot be justified; so, on the other, though he be supposed to want everything else, yet if he hath faith he cannot but be justified. For suppose a sinner of any kind or degree, in a full sense of his total ungodliness, of his total inability to think, speak, or do good—suppose, I say, this sinner, helpless and hopeless, casts himself wholly on the mercy of God in Christ (which, indeed, he cannot do but by the grace of God), who will affirm that any more is required before that sinner can be justified?" (Wesley, *Sermon on Justification*; Neander, *Planting and Training*, ii, 123 sq.). "Faith, as it is mere belief, may be produced by rational evidence. But when that is attained, the work of grace in the heart is nowhere said in Scripture to be carried on by the natural operation of these credited truths. The contrary fact, that men often credit them and remain uninfluenced by them, is obvious. When a different state of mind ensues, it is ascribed to the quickening influence of the Spirit, an influence which may be ordinarily resisted. By that influence men are 'pricked in their heart;' and the heart is prepared to feel the dread impression which is conveyed by the manifestation of man's perishing state, not merely in the doctrine of the word, but as it stands in the Spirit's application to the heart and conscience. But, though this was previously credited, and is still credited; and though its import and meaning are now more fully perceived as the perishing condition of the awakened man is more clearly discovered, the faith of alliance does not therefore follow. A person in these circumstances is not to be likened to a man drowning, who will instinctively seize the rope as soon as it is thrown out to him. There is a perverse disposition in man to seek salvation in his own way, and to stand on terms with his Saviour. There is a reluctance to trust wholly in his atonement, and to be saved by grace. There is a sin of unbelief, an evil heart of unbelief, a repugnance to the committal of the soul to Christ, which the influence of grace, not merely knowledge of the opposite truth and duty, must conquer. Even when this is subdued, and man is made willing to be saved in the appointed way, a

want of power is felt, not to credit the truth of the sacrifice of Christ, or its merits, or its sufficiency, but a want of power to trust wholly, and with confidence, in it, as to the issue. It is then that, like the disciples, and all good men in all ages, every man in these circumstances prays for faith; for this power to trust personally, and for himself, in the atonement made for his sins. Thus he recognises Christ as 'the Author and Finisher of faith,' and faith as the gift of God, though his own duty: thus there is in the mind an entire renunciation of self on the one hand, and a seeking of all from Christ on the other, which cannot but be followed by the gift of faith, and by the joy which springs, not from mere sentiment, but from the attestation of the Spirit to our acceptance with God. Then the Holy Spirit is given, not only as the Comforter, but as the Sanctifier. It is in this way, too, that faith saves us to the end, by connecting us with the exerted influence and power of God, through Christ. 'The life that I live in the flesh, I live by faith in the Son of God, who loved me, and gave himself for me.' These are views which will, it is true, be a stumbling-stone and a rock of offence to the philosophers of this world. But there is no remedy in concession. Still this will stand, 'Whosoever receiveth not the kingdom of God as a little child shall in no wise enter therein'" (Watson, *Works*, London, 1835, vii, 224).

Pye Smith (*First Lines of Christian Theology*, bk. v, ch. v, § 3) defines the specific act of saving faith to be that act of the mind which directly and necessarily arises from the principle of faith, which is the proper and characteristic exertion of that principle, and in which the real nature, design, and tendency of genuine faith is made apparent. This act or exercise is expressed in Scripture by the terms "coming to Christ—looking to him—receiving him—eating the flesh of the Son of Man, and drinking his blood—trusting in him, and being fully persuaded of his truth and faithfulness." It is that which our old and excellent divines usually denoted by the phrase (perhaps too familiar, but very expressive and easily understood) *closing with Christ*. President Edwards expresses it thus: "The whole act of acceptance, or closing of the soul or heart with Christ" (*Works*, viii, 546). "Faith is an assured resting of the soul upon God's promises of mercy in Jesus Christ for pardon of sins here and glory hereafter" (Dr. Owen's *Catechism*).

4. It has been said (above) that Protestant theologians are substantially agreed as to the nature of saving faith. But there is a class of divines in the Church of England (the so-called sacramental or Romanizing party) who seem to have gone back wholly to the scholastic doctrine of faith, if not, indeed, to that of Rome. One of the best writers of this school is bishop Forbes, of Brechin, who, in treating on Art. xi of the Church of England, asserts that the faith by which we are justified is not the *fiducia* of Luther, but is "that beginning and root of the Christian life whereby we willingly believe, etc.," thus adopting the very phraseology of Trent in framing his definition of faith. So, also, he adopts Bellarmine's statement that "love is the vivifying principle of the faith which impetrates justification." While he admits that the fathers often affirm that we are justified by faith alone, he adds that "they never intended, by the word alone, to exclude all works of faith and grace from the causes of justification and eternal salvation" (*Explanation of the 39 Articles*, London, 1867, i, 177 sq.). These views are not Protestant; yet bishop Forbes, and the set of theologians who agree with him in going back to Romish doctrine, still belong to a Church which calls itself Protestant. In happy contrast, we cite another divine of the same Church, Dr. O'Brien, who, in his excellent treatise on *Justification by Faith* (Lond. 2d ed. 1863), after a clear statement of the nature of Christian faith as "trust in Christ; an entire and unreserved confidence in the

efficacy of what Christ has done and suffered for us, a full reliance upon him and his work," protests against the error that, "in justification, faith is accounted to us for righteousness because it is in itself a right principle, and one which naturally tends to produce obedience to divine precepts;" and he shows that, "while it is the fit instrument of our justification, and the seminal principle of holy obedience, it is, notwithstanding, the instrument of our justification, essentially and properly, because it unites us to the Lord Jesus Christ, so that we have an interest in all that he has done and suffered. God having, in his infinite wisdom and mercy, appointed that we should be pardoned and accepted for the sufferings and for the merits of another, seems most fitly to have appointed, too, that our voluntary acceptance of this his mode of freely forgiving and receiving us, by putting our trust in him through whom these blessings are to be bestowed upon us, should necessarily precede our full participation of all the benefits of this gracious scheme, and that nothing else should. . . . If for our justification it be essential, and sufficient, that we be united to Christ—one with Christ—*found in Christ*—does not the act whereby we take him for our defence against that wrath which we feel that we have earned—whereby, abjuring all self-dependence, we cast ourselves upon God's free mercies in the Redeemer, with a full sense of our guilt and our danger, but in a full reliance upon the efficacy of all that he has wrought and endured; does not this act, whereby we cleave to him, and, as far as in us lies, become one with him, seem the fit act whereunto to annex the full enjoyment of all those inestimable benefits which, however dearly purchased they were by him who bought them, were designed to be, with respect to us upon whom they are bestowed, emphatically free? With less than this, our part in the procedure would not have been, what it was manifestly designed to be, intelligent and voluntary; with more, it might seem to be meritorious. Whereas *faith* unites all the advantages that we ought to look for in the instrument whereby we were to lay hold on the blessings thus freely offered to us: it makes us voluntary recipients of them, and yet does not seem to leave, even to the deceitfulness of our own deceitful hearts, the power of ascribing to ourselves any meritorious share in procuring them" (p. 119-121).

The relation of faith to works, and the question of the apparent difference between the doctrine of Paul and that of James on this point, will be treated in our article *WORKS*. We only remark here that the Protestant theology (as has been abundantly shown in the extracts already given) holds that true faith always manifests itself by love and good works (see *Augsburg Confession, Apology*, c. iii.); any other faith is mere belief, or what St. James calls "dead faith." The minor differences among Protestants as to the nature of faith depend chiefly upon differences as to the nature of justification. See *JUSTIFICATION*.

FAITH, RULE OF. I. *Regula Fidei*.—In the early Church the summary of doctrines taught to catechumens, and to which they were required to give their assent before baptism, was called in Greek πίστις, the *faith*; ὁρος πίστεως, the *limit or determination of the faith*; ἐκδοσις πίστεως, *exposition of the faith*; κανὼν, *rule*; and in Latin, *Regula fidei*, rule of faith. This term was afterwards applied to the Apostles' Creed. See *CREED*, *APOSTLES'*; *REGULA FIDEI*.

II. From the ancient usage, the phrase has been adopted (not very aptly) in modern theology to denote (1) the true source of our knowledge of Christian truth: and (2) the criterion or standard of Christian doctrine. Protestants find this rule in the Scriptures alone; the Greek and Roman churches, and some Anglicans, find it not only in Scripture, but also in the Church, as the authorized (inspired) interpreter of Scripture, whose interpretations are embodied in tradition. The supreme authority, according to the Romanists, lies in tradition, and in the pope as its living expounder. Some of the mystics and the Quakers make the "inner light" the supreme rule: thus Robert Barclay says that the highest source of knowledge—divine revelation and illumination—is something internal, trustworthy, and self-evident, which commands reason to accept it by the indwelling evidence. The Rationalists make reason the final arbiter, and the mind of man the measure of truth.

(1.) *The Protestant Doctrine*.—1. One of the chief doctrinal elements of the Reformation was the *sufficiency* of Scripture for faith and salvation. Wickliffe, indeed, anticipated the Reformation in asserting the authority of Scripture. "When we truly believe in Christ," he says, "the authority of Holy Writ is greater for us than that of any other writing." He makes the acknowledgment of the divine word to spring from the immediate relation of the soul to Christ, while Rome puts the Church between the soul and Christ. Luther also rejected all mediation between the soul and Christ, "Yet, before he had consciously developed the principle that the holy Scriptures must be the highest source of knowledge, his doctrine had already been formed upon it, and unconsciously he was guided by the principle to admit nothing which was at variance with the Scriptures. Controversy first brought him to carry out this principle with scientific clearness." It was, however, first "scientifically stated by Melancthon on the occasion of the Leipsig disputation, in which Eck attacked a statement made by that reformer in one of his letters, which thus acquired notoriety. He says that it is a duty to abide by the pure and simple meaning of Holy Writ, as, indeed, heavenly truths are always the simplest; this meaning is to be found by comparing Holy Writ with itself. On this account we study Holy Writ, in order to pass judgment on all human opinions by it as a universal touchstone" (*Cont. Eekium Defensio, Melancthonii Opera*, ed. Bretschnei-

der, i, 113, cited by Neander, *History of Dogmas*, [Ryland], p. 623). Both tradition and the apocryphal books were rejected by the Reformers. While the material principle of Protestantism is justification by faith, its formal principle (*principium cognoscendi*, knowledge-principle, or principle of cognition) is that the word of God, given in the canonical books of the Old and New Testaments, "is the pure and proper source, as well as the only certain measure of all saving truth" (Schaff, *Principle of Protestantism*, Chambersburg, 1845, p. 70).

2. The chief *Protestant Confessions* agree as to the rule of faith. The *Augsburg Confession* repudiates the traditions of the Church of Rome as to penances, fasts, etc. (art. xv), discrimina ciborum, etc. (part ii, art. v); and see especially *Apologia Confess.* cap. viii, p. 206; *De traditionibus humanis in Ecclesia*; and *Prof. ad Conf. August.* p. 6, "We offer our confession . . . drawn from the sacred Scriptures and the pure word of God." The *Formula Concordiæ*, Epit. i, 1, is more definite: "Credimus, confitemur et docemus unicam regulam et normam, secundum quam omnia dogmata, omnesque doctores æstimari et judicari oporteat, nullam omnino aliam esse quam prophetica et apostolica scripta cum veteris tum novi Testamenti, sicut scriptum est Psa. cxix, 105; Gal. i, 8." "Reliqua vero sive patrum sive neotericorum scripta, quocumque veniant nomine, sacris literis nequaquam sunt equiparanda, sed universa illis ita subjicienda sunt, ut alia ratione non recipiantur, nisi testium loco, qui doceant, quod etiam post apostolorum tempora et in quibus partibus orbis doctrina illa prophetarum et apostolorum sincerior conservata sit." "Cætera autem symbola et alia scripta, quorum paulo ante mentionem fecimus, non obtinent auctoritatem judicis; hæc etiam dignitas solis sacris literis debetur, sed dumtaxat pro religione nostra testimonium dicunt, etc." (We believe, confess, and teach that the one rule and criterion by which all doctrines and teaching are to be tested is Scripture . . . all other writings, whether ancient or modern; all symbols, creeds, etc., are of use [not as of equal authority, but only] as witnesses of the preservation of the revealed doctrines, and testimonies for our religion, etc.). *Conf. Gall.* art. v: "It is not lawful to oppose either antiquity, custom, multitude, man's wisdom and judgment, or edicts, or any decrees, or councils, or visions, or miracles, unto this holy Scripture, but rather that all things ought to be examined and tried by the rule and square thereof. Wherefore we do for this cause also allow those three creeds, namely, the Apostles', the Nicene, and Athanasian Creeds, because they are agreeable to the written word of God." *Conf. Helvet.* ii, 1: "In controversies of religion on matters of faith, we cannot admit any other judge than God himself, pronouncing by the holy Scripture what is true, what is false, what is to be followed, or what to be avoided. So we do not rest but in the judgment of spiritual men drawn from the Word of God." *Conf. Belgic.* art. vii: "We believe also that the holy Scriptures doth most perfectly contain all the will of God, and that in it all things are abundantly taught whatsoever is necessary to be believed of man to attain salvation." *Westminster Confession*, art. i: "The whole counsel of God, concerning all things necessary for his own glory, man's salvation, faith, and life, is either expressly set down in Scripture, or by good and necessary consequence may be deduced from Scripture; unto which nothing at any time is to be added, whether by new revelations of the Spirit or traditions of men. Nevertheless, we acknowledge the inward illumination of the Spirit of God to be necessary for the saving understanding of such things as are revealed in the word," etc. "All things in Scripture are not alike plain in themselves, nor alike clear unto all; yet those things which are necessary to be known, believed, and observed for salvation are so clearly propounded and opened in some place of Scripture or

other, that not only the learned, but the unlearned, in a due use of the ordinary means, may attain unto a sufficient understanding of them." *Church of England*, art. vi (vth of the Methodist Episcopal Church): "Holy Scripture containeth all things necessary to salvation; so that whatsoever is not read therein, nor may be proved thereby, is not to be required of any man that it should be believed as an article of faith." So the Creeds (art. viii) are commended to reception and belief only because they may be proved by certain "warrants of holy Scripture;" works of supererogation (xiv) are rejected as contradicted by the word of Christ; things ordained even by general councils are affirmed (xxi) to have neither strength nor authority unless it be declared that they "be taken out of holy Scripture;" purgatory, pardons, image worship, relics, saintly invocation (xxii), and transubstantiation (xxviii) are rejected as grounded "upon no warrant of Scripture, but rather repugnant to the Word of God."

(II.) *The Romanist Doctrine*.—The Council of Trent (sess. iv, April 8, 1546, *On the Canon*) declares that the "Gospel promised before by the prophets in the sacred Scriptures was first orally published by our Lord Jesus Christ, the Son of God, who afterwards commanded it to be preached by his apostles to every creature, as the source of all saving truth and discipline; and that this truth and discipline are contained both in written books and in unwritten traditions, which have come down to us, either received by the apostles from the lip of Christ himself, or transmitted by the hands of the same apostles, under the dictation of the Holy Spirit;" and names as canonical all the books of the O. T. and the Apocrypha, according to the Vulgate edition; declaring that the Council "doth receive and reverence, with equal piety and veneration, all the books, as well of the Old as of the New Testament, the same God being the author of both—and also the aforesaid traditions, pertaining both to faith and manners, whether received from Christ himself or dictated by the Holy Spirit, and preserved in the Catholic Church by continual succession." The *Catechism of the Council of Trent* declares (*Preface*) that "all the doctrines of Christianity in which the faithful are to be instructed are derived from the Word of God, which includes Scriptures and tradition." These statements are not so decided as those of later Roman theologians, but they were nevertheless received at the time as ordaining a new rule of faith in the Church. Bernard Gilpin († 1583) had, it is said, been hesitating about accepting Protestantism, but the publication of the decree of Trent decided him: "While he was distracted with these things, the rule of faith changed by the Council of Trent astonished him. For he observed that not only the ancient divines, but even the modern ones, Lombard, Scotus, and Aquinas, all confessed that the rule of faith was solely to be drawn from Scripture, whereas he found, according to the Council of Trent, that it might as well be drawn from human traditions. . . . The Church of Rome kept the rule of faith entire till it was changed by the Council of Trent. From that time he thought it a point of duty to forsake her communion, that the true Church, thus called out, might follow the Word of God" (*Life of Bernard Gilpin*, p. 69, Glasgow, 1824, cited by Cramp, *Text-book of Popery*, ch. iii). Bellarmine († 1621), perhaps the greatest of Roman theologians, sets forth the Roman theory more fully in his treatise *De Verbo Dei*. He divides it into the written and the unwritten word. The written word includes the Scriptures of the O. and N. T.; the unwritten is tradition, i. e. 1. *divine* tradition, including doctrines communicated by Christ himself to the apostles, and taught by them, but not recorded; 2. *apostolical* tradition, doctrines taught by the apostles, but not recorded in their writings; 3. *ecclesiastical* tradition, including ancient customs and usages handed down in the Church. The necessity for these tra-

ditions he maintains on the express ground of the *insufficiency* of Scripture as a rule of faith and life (*asserimus in Scripturis non contineri expresse totam doctrinam necessariam sive de fide sive de moribus, De Verbo Dei, iv, 3*). The substance of these passages is, that in the rule of faith tradition is an authority independent of Scripture, and in all respects equal to it in binding force. Möhler (*Symbolism, § 38*) attempts to refine the Roman doctrine, but, in fact, disguises it under an ideal theory of his own, intended to be adapted to "the spirit of the age," or else inspired by it. But the substance of the Roman doctrine remains, in spite of his skill, in his statement that "it is the Church in which alone man arrives at the true understanding of Holy Writ." One of the latest and most skilful advocates of the Roman view is archbishop Manning, who, in his *Grounds of Faith* (London, 1852, 8vo), maintains that "universal tradition is the supreme interpreter of Scripture," and that this tradition is maintained *only* in the Church of Rome, of which the pope is the head and exponent. Dr. Schaff sums up the vices of the Romanist theory of the rule of faith as follows: "The distinction between the divine and the human is unsettled by it. This pantheistic feature runs through the whole system, culminating in the respect shown towards the pope as lawfully holding and exercising the threefold office of Christ himself. Too much is allowed, again, to human agency in the formation of the sacred Scriptures, by limiting the inspiration of the Holy Ghost to mere assistance and guidance (*assistentia et directio*). Still farther, the Latin translation of Jerome, a work of course proceeding from a particular Church position, and reflecting its image, is not only placed on a par with the original text, but in actual use preferred to it altogether (Belarmine, *De Verbo Dei, ii, 10*). In the fourth place, the charge of darkness and ambiguity is brought against the Scriptures, whence tradition is held to be necessary for their interpretation, and it is counselled that the laity should not read them except in cases of special qualification, of which the bishop is to be the judge. In short, the whole tendency of the Roman Catholic Church has for its object to subordinate the Bible to tradition, and then to make itself the infallible judge of truth, with power to determine at pleasure what is God's word and the doctrine of the Church, and to anathematize everything that may go beyond its past decisions, even though, as in the case of the Reformation and Jansenism, it should be an actual deepening of the Christian consciousness itself" (*Principle of Protestantism, p. 74*).

(III.) *The new Anglican Doctrine.*—The so-called Tractarian party in the Church of England adopted, almost at its first beginning in Oxford, in substance, the Romanist theory of the rule of faith; so, e. g. "Tracts for the Times" (No. 70): "Catholic tradition teaches revealed truth, Scripture proves it: Scripture is the document of faith, tradition the witness of it: Scripture and tradition, taken together, are the joint rule of faith." The truth was, that the men comprising this new party had already embraced several of the Romanist doctrines, and, not finding any warrant for them in Scripture, sought it in tradition. Thus Keble (*Sermon on Tradition*) asserts that without tradition it would be impossible to demonstrate the doctrine of the "real presence," that of the "clergy as a distinct order," and that "consecration by apostolical authority is essential to the Eucharist" (see further in Goode, *Divine Rule of Faith and Practice, ii, 18 sq.*). Some of these writers soon began to decry Protestantism as a failure, and the Reformation as a schism; and the next step was to assert that the Scriptures are both defective and obscure, and that many doctrines necessary to faith are not in Scripture at all, but must be learned from tradition, which is "partly the interpretation and partly the supplement of Scripture" (see an able article in the *Princeton Rev.* 1842, p.

598 sq.). Dr. Arnold remarks (*Edinb. Rev.* April, 1843), that, according to the Tractarian theory, "the Scriptures are *not* the sole or a perfect rule of faith; they are to be *supplemented* by tradition; they furnish at best but the germ of an imperfectly developed Christianity, which is to be found full blown and perfect somewhere (no one can tell where) in the third, or fourth, or fifth, or sixth century, or some century still later; and the fathers have much to tell us of undoubted apostolical authority, which the apostles themselves have failed to tell. Infinite are the disputes which such a theory instantly gives rise to. In essence and principle it in no wise differs from that of Rome (for it affirms both a *written* and an *unwritten word*); it differs only in the pleasant and gratuitously perplexing addition that it is impossible to assign the period within which the circle of Catholic verities may be supposed complete—the period when the slowly developed Church system became ripe, but had not yet become rotten. The unity of faith which is thus sought is farther off than ever, for the materials of discord are enlarged a thousand fold. 1. There is the dispute as to whether there be any such authoritative rule of faith at all, and this alone promises to be an endless controversy. 2. Even if we were to admit the possible existence of such a rule, the uncertainty in its application would preclude the possibility of its being of any use. 3. Even if men in general are told that they need not inquire for themselves, but just receive what their 'authorized guides' choose to tell them, private judgment is still pressed with insuperable difficulties; for, alas! we find that the 'authorized guides' themselves, in the exercise of *their* private judgment, have arrived at very different conclusions as to what is Catholic verity and what is not. It is very easy for Mr. Newman to talk in magniloquent phrase of that much abused abstraction, the 'Church,' and to represent his system of 'Church principles' as one and complete in every age. But when we inquire *which* is that Church, *what* are the doctrines it has delivered as the complete circle of verity, and who are its infallible interpreters, we find those whom these authorized guides proclaim *equally* authorized at endless variance—Romanists, Greeks, and Anglicans differing in judgment from each other and from themselves. In a word, we find the 'Church' is just Mr. Newman or Dr. Pusey—not unbecomingly disguised in the habiliments of a somewhat antiquated lady, and uttering their 'private judgments' as veritable oracles. What can one of these 'guides' say to 'a brother guide' who declares, 'I adopt your principles, and it appears to me and many others that, on the same grounds on which you contend for the apostolical succession—that is, on the authority of the ancient Church—I must contend for the celibacy of the clergy?' Or to another, who declares, 'On our common principles I think there is good reason to admit the invocation of saints, the worship of images, the doctrine of the efficacy of holy relics, the monastic institute, to be of apostolical origin?' Or to another, 'It appears to me that the doctrine of purgatory is but a *development* of the doctrine which justifies prayers for the dead?'" Dr. Arnold was right in his view of the tendency of the Tractarian doctrine: J. H. Newman and many others went logically to Rome, while Dr. Pusey illogically remained in the Church of England to corrupt it. And now, 1869, the Romanizing party in that Church bids defiance to both "Protestant tradition" and the state law.

III. It is one of the charges brought by Romanists against Protestantism that it has violently separated itself from the historical life of Christianity by its denial of tradition. But the charge is unfounded. Protestantism is the continuation of the *true* life of Christianity, reformed from the errors of Rome, among which errors was the exaltation of tradition to a level with Scripture as an *authority*. No such view of tradition can be found either in Scripture or in the early

Church writers. According to the Protestant view, the Greek and Roman doctrine of the rule of faith takes away Christ, and puts an ecclesiastical corporation in his place. But Protestantism does not deny the value of tradition in transmitting Christian doctrine: its value is inestimable. But it is not authoritative or final; it is a servant, not a master. In fact, the question of the rule of faith is closely connected with that of the true idea of the Church, or, indeed, identical with it in the last analysis. So, at the fourth session of the Council of Trent, when the question of Scripture and tradition came up for discussion, Vincent Lanesl, one of the members of the council, a Franciscan, "thought it would be preferable to treat of the Church in the first instance, because Scripture derived its authority from the Church. He added that if it were once established that all Christians are bound to obey the Church, everything else would be easy, and that this was the only argument that would refute the heretics." While Protestantism leads to Christ through the Scriptures, and through Christ to the Church, Rome pretends to lead through the Church to Christ and the Scriptures; the authority of the Protestant doctrine being its conformity with revealed truth, that of the Roman Catholic system the assumed infallibility of the Church. *In causis spiritualibus necessario admittentibus a'ignis supremis julx controversiarum* (in spiritual things there must needs be some final and supreme judge to decide controverted questions) is the old postulate of those who contend for a visible Church endowed with God's own infallibility. Grant them their postulate, in their own sense of it, and the whole theory of "Church principles," as the modern successors of Hildebrand complacently name their dogmas, will inevitably follow. On the other hand, let it be settled that the Scriptures, and the Scriptures alone, constitute the true rule of Christian faith and practice, and we shall have done forever with the juggling priestcraft which has so long disgraced Christianity, and which finds its only hope of support in ecclesiastical tradition. The question is a vital one. It is not a mere matter of detail, about which men can differ at pleasure; it is the Rubicon which separates Protestantism from Popery. It involves "a choice between the Gospel of Christ as declared by himself and his apostles, and that deadly apostasy which Paul in his lifetime saw threatening—nay, the effects of which, during his captivity, had nearly supplanted his own gospel in the Asiatic churches, and which he declares would come speedily with a fearful power of lying wonders" (Stanley, *Life of Arnold*, ii, 110). The Church of God, according to the Protestant, is built upon the "foundation of the prophets and the apostles, Christ himself being the chief corner-stone;" according to the traditionist, upon the sands of antiquity as well. From the beginning men have made the word of God of none effect through their traditions. See BIBLE, USE OF; FATHERS; INFALLIBILITY; PROTESTANTISM; ROMANISM; and especially TRADITION.

*Literature.*—Besides the authors already named in the course of this article, see Wiener, *Comp. Darstellung*, 1866, p. 27; Nitzsch, *System d. christl. Lehre*, § 36-39; Daillé, *Right Use of the Fathers* (Philada. 1842, 12mo); Elliott, *Disunion of Romanism*, bk. i, chap. i and iii; Jeremy Taylor, *Dissuasive from Popery* (Heber's ed.), x, 283 sq.; Chemnitz, *Examen Concilii Tridentini*; Chillingworth, *Religion of Protestants* (Philadel. 1838), 8vo; Marsh, *Comparative View of the Churches of England and Rome* (Cambridge, 1814, 8vo); Stillingfleet, *Protestant Grounds of Faith* (Works, Lond. 1709, vols. iv, v, and vi); Knapp, *Christian Theol.* § vii; Goode, *Divine Rule of Faith and Practice* (2d ed. Lond. 1853, 3 vols. 8vo); Peck, *App'at from Tradition to Scripture* (New York, 1844, 12mo, reviewed by McClintock in the *Biblical Repository*, Jan. 1846, art. 2); *Ellinb. Review*, April, 1843; Lightfoot, *Works*, vi, 51; Rosenmüller, *De Orig. Theology*, cap. xi, § 35; Holden, *Authority of*

*Tradition* (Phil. 1841); Hawkins, *Dissert. on Tradition* (Oxf. 1819, 8vo); Burnet, *On 39 Articles*; Browne, *On 39 Articles*; Forbes, *On 39 Articles* (each on art. vi).

**FAITH AND REASON.** Religion and science express in the abstract and in the concrete the two opposite poles of human knowledge, between which there must always be discrepancy, and has usually been discord. In all ages in which there has been any notable activity of intelligence there has been a controversy, more or less violent, between the claims of religious authority and the pretensions of human reason. The acrimony of the strife has been increased, and the importance of appeasing it has been augmented by every extension of the domain of precise, coherent, systematic reasoning. Every creed accepted by a cultivated and speculative community has been in turn assailed by a spirit of speculative scrutiny, which has gradually encroached upon the sacred domain, and has ultimately denied all validity to doctrines not established by the processes of ratiocination, or discovered and confirmed by direct observation and experiment. The primeval theology of the Hindoos, the capricious and graceful fantasies of the Greek mythology, the stern solemnity of the Roman Fasti, the arbitrary credulities of Islamism, have all experienced this phase of hostility, as well as Christianity, in the various periods and forms of its dissemination. But never has this war been more deadly in mode or in menace than in this current age, when the foundations of revealed truth are undermined by insidious approaches, and when science erects its multitudinous batteries against all the ramparts of the Christian faith.

In other times, attempts, more or less unsuccessful, have been made to restore natural amity between these embittered adversaries. The Euhemerism of the Greeks was an effort to explain the legendary superstitions of Greece so as to render them acceptable to the enlightened doubts of Hellenic philosophy. See EUHEMERUS. A second and more elaborate plan for the maintenance of the expiring reverence for the divinities of the pagan world was hazarded by the Neoplatonists. See NEO-PLATONISM. Both experiments signally failed. In a much later period, with wholly dissimilar weapons, and with much vaster interests at stake, the illustrious Leibnitz undertook to reconcile religion and reason in a treatise equally remarkable for the classical elegance of its style, and for the vigor and profundity of its argumentation. It was negative in its character, and only offered a compromise. Such was also the complexion of the admirable work of bishop Butler on the *Analogy of Natural and Revealed Religion*. In consequence, these luminous essays only interpose as landmarks in the midst of the waves between the hardy scepticism of the beginning and the revolutionary atheism of the close of the 18th century. The war has become more determined, even though it may have gradually lost much of its earlier bitterness. Extremists on both sides now declare that there is an implacable antagonism between faith and science. Ministers of religion may be found denouncing the procedures and conclusions of science as "enmity with God," and as incompatible with revealed truth; as if the laws of the creation could be at variance with the declarations of the Creator. Adepts in scientific research, on the other hand, proclaim the deceptiveness and inanity of all religious doctrine as contradictory to the clearly ascertained processes of the universe; as if the phenomena of matter could contravert the constitution of the human mind, and the ineradicable instincts, appetencies, and requirements of the human heart.

Yet, even in this apparently hopeless state of discord, renewed endeavors have been made to bring the great adversaries into harmonious union. The most recent and the most notable of these is that of Herbert Spencer, which is plausible in its pretensions, but most delusive in its results. It is singularly insidious in

design and in execution. It betrays with a kiss, and deals a mortal stab while inquiring, "How is it with thee, my brother?" It recognises the universality, the indestructibility, the necessity of religious belief, admits the impossibility of ignoring or dispelling the attributes of a Supreme Being, and yet attenuates everything thus admitted till it sublimates these conceptions into a vaporous phenomenalism, a misty hallucination of the human mind under the perennial hypochondria of a morbid fantasy. No suspension of arms has been obtained, because each party hopes for a decisive victory. But the prolongation and exacerbation of this strife are most disastrous, not merely to the legitimate authority of religion, but to the equally legitimate demands of science. One portion of the Christian community is repelled from the prompt acceptance and the zealous encouragement of the discoveries of science by the apprehension that the bulwarks of revealed religion may be surrendered to an unsparing foe. Another portion rejects the teachings of the Church and of the Christian creed from disgust at an unreasoning and unreasonable opposition to science. A third party, intermediate between the two, extends a hand to both; surrenders whatever rationalism questions, and professes to retain in a changed sense all that is essential in the dogmas of religion. Meanwhile, those of vicious inclinations find an excuse for the indulgence of their passions and the rejection of moral restraints in an intelligent repudiation or in a doubtful acknowledgment of religion; while the multitude, careless and stolid, pursues its private ambitions or personal whims without regard to the obligations of this life, without concern for that great hereafter which occupies no place in its thoughts. The conciliation of faith and science thus becomes more urgent than in any former time, and its urgency is increased by the difficulty of accomplishing it in the midst of contentions between reciprocally repellant combatants, armed on the one side with the thunders of the Almighty, the promises of heaven, and the terrors of hell, and on the other with the dazzling panoply of modern investigation, and with weapons wreathed with the laurels of a century of scientific achievements.

The re-establishment of fraternal union between two so widely alienated disputants must be an arduous and always a somewhat doubtful task. "*Quis concordabit tantum contrarietatem?*" A mere truce will answer no good purpose. It would simply convert a running sore into a purulent condition of the whole system. The conciliation, to be efficient, must rest on an essential harmony of principles, on a recognised dissimilarity of aims and applications. Even then the agreement may be liable to occasional rupture from reciprocal jealousies; but room must be allowed for partial dissent, as in these high questions no more can be expected than an unsteady *conquiescence—discordia concors*. Whether even this agreement is attainable must be uncertain till it has been attained; it may be reserved for that blessed expansion of our discernment when we shall no longer "see as through a glass darkly." But, in the mean time, there is a high obligation resting upon those who would repudiate neither the sanctifying influences of a holy life, nor the illumination of secular learning, to seek out the grounds of reconciliation, and to renew the marriage of the liberal arts with theology. This seems to be the appropriate duty and the peculiar aspiration of the present age, and the imperfect or delusive efforts made in this direction indicate the latent consciousness that it is so. The instinctive *nisus*, often grievously misdirected, always precedes the solution of the great enigmas of humanity. Before any reasonable hope, however, of a satisfactory result can be entertained, it is necessary to ascertain the conditions of the problem, and to discover among the obvious and multitudinous discrepancies whether there is any essential identity between the opposing forces. If there is, there may be a pros-

pect of final accordance; if there is not, the antipathies are ineradicable and immedicable.

The conditions under which the question presents itself are thus, the determination of the nature of the contending parties; the detection of any agreement in their intrinsic character; and the discernment of the causes of their opposition and diverse procedure. It becomes expedient, therefore, to ascertain the peculiar character and functions of faith and science respectively. This cannot be accomplished by any mode of mere logical division and definition, because faith resides in our spiritual susceptibilities, and is incapable of verbal circumscription; and because science admits of no immutable boundaries, but "grows forever and forever." But the character of each may be sufficiently described to permit the contradistinction of the two, to exhibit their contrasts, and to disclose any harmony that may exist between them.

Science is precise, definite, systematic knowledge, attained and co-ordinated by the application of human reasoning to admitted facts or observed phenomena. The conclusions of science are reached and are connected together by the discovery of the general principles which regulate the occurrence of the phenomena and reveal the conditions of their occurrence. These principles are established by the employment of the two processes of deduction and induction; and science is the determination by the arts of reasoning of such knowledge as is apprehensible by the logical faculties of the human mind. The conclusions attained are more or less firmly believed according to the sufficiency or insufficiency of the reasoning; but, when firmly established, are believed on the strength of the evidence, and cannot be doubted except by remembering the finite power and comprehension, and consequent fallibility of the reasoning mind itself. This limitation, though properly—nay, inevitably overlooked in the constitution and acceptance of scientific truth, cannot be safely disregarded in the estimation of the validity and certainty of scientific procedure.

Faith is something more than rational belief—something more firm and assured than scientific or philosophic conviction. Conviction is produced by the strength of the arguments adduced—by the influence of the demonstration or other evidence on the understanding. Faith goes far beyond this, both in the assurance conveyed, and in the disproportion between the testimony and what is accepted on that testimony. "Seeing is believing," but he who "walks by faith" "walks not by sight." We believe in the results of science; we have faith in the truths of revelation. We believe that the earth is round; we have faith in the existence of God, and in the immortality of the soul. Conviction questions and scrutinizes; faith confides, and does not cavil. The belief which is founded upon reasoning ponders the arguments propounded, the evidence presented; faith is itself "the substance of things hoped for, the evidence of things not seen." This distinction may not be acceptable to persons of loose habits of thought, who employ words without discriminating their delicate shades of meaning; but it seems to be required by more than one passage of the New Testament, and is fully sustained by the most acute, profound, and sagacious of the schoolmen, Thomas Aquinas (*Summa Theologiae*, 2, a, qu. ii, art. x; qu. iv, art. i). It is of the essence of faith to transcend the logical evidence, to accept more than is contained in any logical premises, and to hold the tenet thus retained with a more earnest tenacity than any demonstration or generalization can produce. Not that faith is independent of evidence or testimony; but the cogency of such proof is not intrinsic or indisputable in itself, but is derived from its acceptance, and from the submissive adherence of the recipient. It is "the Spirit of truth" which "will guide you into all truth." This exposition may seem applicable only to religious faith, or to faith in supernatural truth; but it is with

faith of this kind that the controversy on the part of science is maintained. It is therefore in this domain that the essence of faith is to be specially considered. Nevertheless, a little reflection and examination will show that all faith possesses the same general characteristics. The faith which we repose in another similarly transcends, and usually precedes the evidence; the faith which we hold in regard to the regular order of nature is manifested without thought of the arguments by which that order is proved; the faith which we entertain in the necessity and generally beneficent action of government is wholly irrespective of our opinions in relation to its particular measures. See FAITH.

Thus widely contrasted, then, are the characteristics of faith and science. The former is out of all proportion to the proof addressed to the reasoning faculties; the other is strictly limited by the proof. The one is an adhesion of our whole spiritual nature, undoubting, and unvisited by any anxious concern; the other is simply the acquiescence of the understanding, which may be dispelled by further discoveries. The one may be resisted, the other cannot be denied; the one is of voluntary acceptance, the other of compulsory belief. The being of God may be denied; the validity of a demonstration of Euclid cannot be gainsaid, if the terms and the logical process are apprehended.

But, though these things be thus disparate in their ordinary and in their ultimate manifestations, they are identical in their foundations and in their point of departure. It has been stated already that scientific reasoning proceeds by way of deduction or of induction. Deduction, however, proceeds from premises which are either established by induction, or are received without demonstration; and induction requires general principles, not reached by induction, to render induction possible. First principles admit of neither definition nor proof. The conception of order, the admission of the uniformity of natural laws, are not inductions. Supposing, however, that those things which are confirmed by science, and receive their expansion and development from science, are reached by scientific reasoning, still the conceptions of mind, matter, and similar primordial phenomena with which science deals are intuitive, and are accepted by an unreasoning, though rational faith. They are only perplexed and weakened by argumentation on the subject. The contrasted conceptions of mind and matter are universally recognised as contrasted, even by those who deny the reality of matter, and represent it as a mere image or phantasm of the mind; and by those who deny the distinct character of mind, and profess to regard it as nothing more than a modification or efflorescence of matter. The distinction is admitted, although the distinctness of essence or of substance be denied. So pressing is the intuitive consciousness of the contrast that recent votaries of science, who would cashier the whole realm of faith, are compelled by an unavowed and unsuspected instinct to disembody and to evaporate, as well as despiritualize, the whole universe, which they pretend to explain by ascribing a purely apparent existence to facts and to the evolution of facts—a merely phenomenal validity to demonstrated changes and the laws of change. They make shadows chase shadows in a spectral world for the entertainment of shadowy observers. In this manner they convert the material and the intelligible universe into an impalpable phantasmagoria; they render it a reflection upon the clouds, a giant of the Broken, an intricate dance of fantastic unrealities. But the ghosts which they evoke from the dissipated forms of being are as intractable and as hostile to the spirits and bodies which they have attempted to annihilate. Faith, the same in kind, though greater in degree, is required for the admission of such *idols* of mind and matter, and nothing is gained for their own purposes by embracing the cloud instead of the goddess.

The true doctrine with respect to the foundations of scientific procedure is laid down by Aristotle in the close of the *Posterior Analytics*. "It is evident," says he, "that, as demonstration is not the beginning of demonstration, so neither is science the first principle of science." Nearly six centuries later, Proclus similarly declares in his *Theological Institutes* that "intuition is the principle and first cause of knowledge." After the lapse of more than twelve hundred years, the Sage of Verulam reasserted the same position in a somewhat different form in *The Fable of Cupid*, and again in the *Novum Organum* (1 *Aph.* lxxvi). Thus the founder of science, the most extreme of Transcendentalists, and the restorer of inductive philosophy, concur in recognising that science is not self-sustaining, but is dependent upon principles beyond the sphere of science. Their declarations, too, are no isolated testimonies, but are merely echoes of the convictions of philosophers of the most divergent schools (Plato, *Timæus*, ch. i; Aristotle, *Met.* iii, 4; x, 5, 6; Theophrastus, *Met.* v; Alex. Aphrodisiensis, *Schol.* in *Aristot.* ed. Brandis, p. 525, 527, 592, 605, 653; Asclepiades, *Ibid.* p. 599; Ammonius, *Ibid.* p. 519; Des Cartes, *Med.* ii; Spinoza, *De la Réforme de l'Entendement*, *Œuvres*, ii, 281, ed. Saisset.; Leibnitz, *Opera*, i, p. cxlv, clxi, ed. Dutens). A remarkable testimony to the same effect was recently (Ang. 1868) given by Prof. Tyndall in his introductory address before the Mathematical Section of the British Association.

It is not simply a metaphysical axiom, but an obvious truism, that there can be neither definition nor demonstration of first principles—of those fundamental and primary facts upon which not merely all knowledge, but all possibility of knowledge depends. Life is consciousness, not a conclusion of the reason. Personal identity admits neither proof nor denial. Mind escapes from the formulas of scientific knowledge; matter cannot be seized or established by them. The theory of Boscovich may be invalid, but it cannot be disproved. Thus the very foundations of scientific knowledge rest upon faith, and upon faith only—upon faith in primitive facts—faith in the testimony of the senses—faith in our intellectual apprehensions. Accordingly, the faith which is supposed to make unreasonable demands in requiring the acceptance of theological truths is equally, though not in an equal degree, required for scientific speculation. Science cannot commence its speculations without humbly receiving dogmas communicated and held by faith; it cannot advance a single step without implicit acquiescence in their truth, and without their necessary, though latent support. On all sides we are encompassed by mystery. Religion and science thus spring from a common root. They address themselves in the first instance to a common characteristic of the intelligence. In both, faith must precede knowledge; and in either, the celebrated maxim of St. Augustine finds its application: "*Credo, ut intelligam.*" They are twin sisters, sustained by a common life, nourished by a common sustenance, illumined by the radiance proceeding from a common fountain of light. Both require τὸ θιον ἄρχη ὅμοια τὰ θεία προλαμβάνον; and both may turn to the Father of Lights and exclaim, "*Angelorum esca nutritiis populum tuum, et paratum panem de celo praestitisti illis sine labore, omne delectamentum in se habentem et omnis saporis suavitatem.*"

But, though religion and science are intimately united in the cradle by participation in faith and in the works of faith, their development follows along widely divergent lines. Religion proceeds on its sacred mission accompanied, supported, and guided by faith throughout the whole journey, and calls in the aid of reason only to remove the obstacles and impediments occasioned by the weakness or scepticism of the finite intelligence. Science, like the prodigal son, leaves his father's house to wander in strange lands and among strange scenes, and too often forgets the

innocence, the purity, and the heavenly illumination of his paternal home. But still the first lessons of faith—"the vision splendid" of his youth—attend his course, return to his memory, recall his origin, and silently reclaim him to his early home.

"Perchance he may return with others there,  
When he has purged his guilt."

Science thus reposes on faith, upon principles of the same generic character as those which furnish the substance of religion; but it requires them only as premises which are soon left out and forgotten in its strictly ratiocinative development. It is willingly oblivious of the fact that "there are more things in heaven and earth than are dreamt of in our philosophy." Religion receives these and the like principles of faith as its commencement, beginning, and end. Science commences where religion leaves off, but it is ushered into its career by faith.

These brief and undeveloped views may perhaps indicate the means of securing a valid conciliation of faith and reason, of religion and science, and of establishing the limits of their respective spheres, and the characteristics of their respective procedures. Interpreted as they have been here explained, their contrasts and functions remain distinctly marked, but they cease to be antagonistic, and have neither reason nor excuse for enmity.—Compare Shedd, *History of Doctrines*, i, 154 sq.; Chlebus, *Stud. u. Krit.* 1846, p. 905 sq.; *Edinburgh Review*, Oct. 1849, art. i; Westcott, *Study of the Gospels*, p. 393; M'Cosh, *Intuitions of the Mind*, bk. ii, ch. i, and pt. iii, bk. ii, ch. v; Miles, *Philosophical Theology* (Charleston, 1850, 8vo). (G. F. H.)

**Faith of Jesus, Society of the** (or **FATHERS OF THE FAITH**), an ecclesiastical order in the Church of Rome, founded by Paccanari, a Tyrolese enthusiast, and formerly a soldier of the pope, under the patronage of the archduchess Mariana. The intention of Paccanari was to give to the Church a substitute for the order of the Jesuits, which had been suppressed by Clement XIV. The foundation of the society was laid by Paccanari and twelve companions in 1798 at a villa near Spoleto, which a nobleman had offered to them for that purpose. The rule adopted by Paccanari was almost identical with that of the Jesuits. Pope Pius VI, who was at that time kept a prisoner by the government of France in a monastery near Florence, and whom Paccanari visited, encouraged the new society, and recommended to it the pupils of the Propaganda whom the government of the Roman republic had expelled from their college. In 1799, Paccanari, while on a visit to Rome, was arrested, together with his companions, but they were soon set at liberty on the condition that they should leave the Roman territory. In the same year the "Society of the Sacred Heart," a society which had been established in 1794 by some ex-Jesuits for the purpose of reviving the order of the Jesuits under a different name, united, in consequence of an express order of the pope, with the Fathers of the Faith, and recognised Paccanari as their superior. The latter, who up to this time had been a layman, now received minor orders at the hands of the papal nuncio in Vienna, and in 1800 was ordained priest. The society, which had already taken charge of several missions in Africa, established houses in Bavaria, Italy, France, England, and Holland, and in 1804 numbered about eighty members. Pope Pius VII was, however, not favorable to them. Some of the members joined the Jesuits, who had been restored in Russia and (in 1804) in Naples, while others repudiated the authority of Paccanari, and placed themselves under the direct authority of the diocesan bishops. Paccanari himself was summoned before an ecclesiastical court, and sentenced to life-long imprisonment. The second invasion of Rome by the French restored to him his liberty, but the society was wholly dissolved in 1814, when its last members joined the order of the Jesuits, who in that year were restored for

the whole Church.—Henrion-Fehr, *Gesch. der Mönchsorden*, ii, 62. (A. J. S.)

**Faithful.** (1.) A title given in Scripture to Christians (1 Cor. iv, 17; Ephes. vi, 21, et al.). (2.) The term *πιστοί*, the *faithful* (FIDELES), was the general and favorite name in the early Church to denote baptized persons. By this name they were distinguished, on the one hand, from the *ἀπιστοί*, such as were not Christians; and, on the other, from the catechumens.—Bingham, *Orig. Eccl.* bk. i, ch. iii, iv; Riddle, *Christian Antiquities*, bk. ii, ch. v.

**Fakir** (also spelled **FAQUIR**). This word, derived from the Arabic *fakr* (poverty), is used by the Arabs to designate those mendicant orders called by the Persians and Turks *dervishes*. By Europeans it is commonly used to denote certain Hindoo sects noted for asceticism and austerities. For a brief account of the Mohammedan Fakirs, see the article **DERVISH**. We mention here, in addition, only a sect of them styled *Calenders*, from the name of their founder, Santone Kalendarer, described by Knolles (*History of the Turks*) as Epicureans, whose motto is, "This day is ours, tomorrow is his who may live to enjoy it," and in whose view the tavern is as holy as the mosque, and God as well pleased with their debaucheries, i. e. "liberal use of his creatures," as with the austerities of others (see D'Herbelot, s. v. *Calender*).

1. *History*.—We find no religious devotees of this kind among the Mohammedans earlier than the 13th century after Christ, though the origin of Hindoo fakirism is by some writers referred back to Sakyamuni. See **BUDDHISM**. But a satisfactory explanation of the origin of fakirism may be found in that perverted human tendency which in all ages has sought to earn the favor of God and the praise of men through abstraction of the soul and chastenings of the flesh, and has been too prone to accord to such acts undue homage and sanctity. Nowhere has this tendency been more marked than among the imaginative and superstitious peoples of the East. The account which Strabo, on the authority of Megasthenes, Aristobulus, and others, has given us of the Gymnosophists, especially that class called by him *Garmes*, and by others *Sarmani* or *Samanai*, shows that ascetics, very similar in modes of life, doctrines, and practices to the Fakirs of modern India, were found there at the time of Alexander's conquests. This conclusion is strengthened by the descriptions of Quintus Curtius, Arrian, Plutarch, Pliny, Clemens Alexandrinus, and other ancient authors, when treating of the philosophers of India. It seems not a merely speculative view which assumes that the *naked philosophers*, so celebrated in ancient times, were, in an ethical sense at least, the progenitors of the modern Fakirs (see Heeren, *Asiatic Nations*, ii, 242, note).

Among the mendicant devotees who abounded in India at the date of the Mohammedan conquests we find the Fakirs mentioned as prominent in the veneration of the people, and exercising an almost unlimited influence over them; and frequent mention is made of these fanatics and their strange practices by the travellers who have described India since the period named. D'Herbelot estimated that there was in India 800,000 Mohammedan and 1,200,000 idolatrous Fakirs, while the number of both sorts is now estimated at over 1,000,000. Fakirism, with other forms of superstitious fanaticism, seems to be rapidly losing ground under the influences and agencies which, since the prevalence of British rule, have been diffusing the light of the purer doctrines of the Gospel through India.

2. *Sects or Fraternities*.—They are divided into sects or orders, each differing from the others more or less in dress, habits, etc. Owing perhaps to the lack of organization and the number of their fraternities, the accounts of travellers and other authorities in this re-

spect seem conflicting and fragmentary. Without attempting any precise classification, we may group them under two heads: 1. Those living in *communities*, either in convents, as Western monks, or wandering about in troops, sometimes amounting to thousands. 2. Those living *singly*, as hermits or as vagabond mendicants, passing from place to place, practising the arts and tricks of their order, and receiving from the credulous superstition of the people the entertainment and alms provided at public expense in the villages for persons of their class.

"The Fakirs of India," says Zimmermann (*Vonder Einsamkeit*, ii, 107), "have a sect which is called the Illuminated, or those who are united with God. The Illuminated have overcome the world, live in some secluded garden, like hermits, so deeply sunk in contemplation that they look for whole hours at one spot, insensible to all outward objects. But then, as they state, with indescribable delight they perceive God as a pure white light. For some days before they live on nothing but bread and water, sink into deep silence, look upward for some time with fixed gaze, turn their eyes in deep concentration of the soul to the point of the nose, and now the white light appears" (Ennemoser, i, 205-6).

The Fakirs, or Yogees, of the Senessee tribe travel over Hindostan, living on the charity of the other Hindoos, generally entirely naked, and "most of them robust, handsome men. They admit proselytes from the other tribes, especially youths of bright parts, and take great pains to instruct them in their mysteries." Collected in large bodies, and armed, they make pilgrimages to sacred places, laying the country under contribution. Led on by an old woman named Bostimia, who pretended to possess the gift of enchantment, one of their hosts, 20,000 strong, defeated an army of Aurungzebe, and for a time, through the influence of superstitious fears, paralyzing his powers of resistance, spread terror and dismay through his court and capital. Niebuhr, the traveller, speaks of the Bargais and the Gussains, two orders of Fakirs, as travelling armed, and in troops of thousands. The *Iconographic Encyclopedia* (iv, 232) names three classes of Hindoo ascetics, viz. *Sanashis* or *Sanassi*, *Vishnavins*, and *Penitents*.

3. *Peculiar Doctrines and Austerities*.—The profession of poverty constitutes a fundamental principle of fakirism, as the name itself indicates. One author says "the quality which God most loves in his creatures is poverty;" and tradition reports Mohammed as saying to his servant Belal, "See to it that you appear before God poor and not rich, for the poor have the chief places in his mansion." Another fundamental principle is the virtue of self-torture, penances, and seclusion of spirit as means for the attainment of sanctity. The Fakir, says Hassan al Basri, is like a dog in ten things: he is always hungry; has no fixed abode; watches during the night; leaves no heritage when he dies; does not abandon his master, though ill treated; chooses the lowest place; yields his place to whomsoever wishes it; returns to him who has beaten him, when a crust of bread is offered; keeps quiet while others eat, and follows his master without thinking of returning to the place he has left. The variety and character of their penances and mortifications of the flesh display no little ingenuity of conception, and demand great powers of endurance in performance. Some go naked, or wear only filthy rags, suffering the heat of the sun, the storms of rain, and the cold of the night in the open air, sleeping on cow-dung or other ordure, "delighting in nastiness and a holy obscenity with a great show of sanctity," with hair uncut, and body and face besmeared with ashes, looking more like devils than men. One has kept his arms in one position until they shrivelled up; another has kept his hands clasped together until the nails grew through the flesh. Some have buried themselves up to their

chins in pits, and thus remained for days; others have imprisoned themselves for life in iron cages; one has had his cheeks and tongue pierced with a sharp iron, kept in its place by another passing under the chin; another would drag along a heavy chain, one link of which passed through the tenderest part of the body, the penis; one bears on his neck a heavy yoke, with heavy weights in his hands; another lies down on a bed of iron spikes; one suspends himself head downwards over a fire until his scalp is burned to the bone; another traverses long distances by rolling on the ground, receiving his food and drink from the hands of the people; one makes the singular vow to perform a long journey by rolling himself along as a sort of cart-wheel: having for this purpose fastened his wrists and ankles together, and caused a tire, made of chopped straw, mud, and cows' dung, to be laid along the ridge of his back-bone, with a bamboo-stick passed through the angle made by his knees and elbows for an axle, he rolls himself to the first village on his route, where he is received with demonstrations of joyous respect, and conducted to the tank or well for ablution. Ascertaining what house of the village promises the best cheer, thither he repairs, and there remains until the supplies fail. He then repeats the process of preparation, and journeys to another place. Some fakirs have combined traffic with their religious pilgrimages, and by the exchange of valuable, yet easily transported articles, carried in their belts and clothing, have made great gains in the pelf of the world which they so much affect to despise. The lives of some, perhaps, comport with the spirit of sanctity and self-denial professed, but most of them are in secret addicted to gross vices, and whenever favorable opportunity offers, the pride and cruelty of their hearts display themselves.

4. *Literature*.—Stralio, § 712-19; Arrianus, *Indica*, cap. xii; Quintus Curtius, lib. viii, cap. ix; Plutarch, *Vita Alexandri*; Pliny, *Hist. Nat.* lib. vii, cap. ii; Clemens Alexandrinus, *Stromata*, lib. i, 305 d.; Bohlen, *Das Alte Indien*; Coleman, *Mythology of the Hindus*; Dufl, *India and Indian Missions*; Ward, *Hist. Literat. Mythology, etc. of the Hindus*; *Iconographic Encyclopedia*, iv, 12-13 (N. York, 1851); D'Herbelot, *Bibliothèque Orientale*, s. v. Fakir and Calender; Ennemoser, *History of Magic*, i, 205-10 (Bohn's ed. 1854); *Indic. Pictorial, Descriptive, and Historical*, p. 73, 115-119, 430 (Bohn's Illust. Library); Ruffner, *The Fathers of the Desert*, i, 23-51. For pictorial illustrations, see *Harpur's Weekly* for 1857, p. 540, and *Iconographic Encyclopedia*, Plates to *Mythology and Religious Rites*, pl. 2, fig. 20, and pl. 3, fig. 10, 11, and 12. (J. W. M.)

Falaguera, SIEEM TOBIAS BEN-JOSEPH BEN, a Spanish Jew of great learning, and a philosopher of the school of Maimonides, was born about 1228. Besides a work on *The Relation of Religion and Philosophy*, he wrote, in 1263, *היבבקות, the Inquirer* (printed at Amsterdam, 1779). Later he wrote *הפושט, Psychology* (Amst. 1835), in which he follows the Arabic school of Aristotle's disciples; *שלושה המעשרים, Ethics*; and in 1280 a work on the philosophical parts of Moreh, *גוררה המורה* (printed at Pressburg, 1837). We mention also *בינהה קנאיה*, a work written in 1290 in defence of Maimonides.—Jost, *Gesch. d. Judenthums u. seiner Sekten*, iii, 27. (J. H. W.)

Falashas (*Black Jews*), a large and peculiar race inhabiting the province of Semen, on the shores of the Tzana Sea, near Gondar and the mountainous regions of northern Abyssinia. The word *Falasha* means *exile*, and sufficiently indicates that they were not natives of the soil. They have a skin more or less dark, without possessing, however, the negro type, and speak both the dominant language of the country—the Amharic, and a dialect of the Aagaon language. They possess the whole of the Jewish Canon (O. T. Canon) in the Gueez language (a sister language of the He-

brew, Arabic, and Aramæan dialects, and from which the Amharic is derived), together with the apocryphal books accepted by the Abyssinian Church. Their priests, who live round the inclosures of the temple (which are situated near the edge of the Falasha villages, and have more the appearance of the ancient sanctuary than the modern synagogue), observe the laws of purity with rigor, prepare their own food, and keep aloof from the world. They are principally engaged in the education of youth, making the Bible and the traditional practices the basis of their instruction. The Falashas deviate from Jewish usages in many respects. Thus the fringed praying-scarf (talet, q. v.), the phylacteries (q. v.), are not used in their devotions. They retain the usage of offering sacrifices, but rather as commemorative ceremonies than as real sacrifices; the most common is the offering for the repose of the dead. No sacrifices can be offered on the Sabbath or on the day of atonement. The Falashas, with all other Jewish sects, hope for a return to the sacred city, Jerusalem. While polygamy is not forbidden by law, it is nevertheless censured. They have a special hatred of slave-dealers, yet slavery is tolerated among them; they instruct the slaves in the law of Moses, and manumit them on conversion. They are a very industrious race, and have the reputation of being good farmers. They are also able warriors (many fought under king Theodore in the late Abyssinian war), but are averse to commerce, which they consider an obstacle to fidelity and rigor in religious observances. The Falashas were formerly governed by an independent prince, whose residence was in the fastness of Aimba Gideon, and it is only since 1800, after the extinction of the race of their original masters, that they have passed under the domination of the princes of Tigré. They claim that their ancestors settled in Abyssinia as early as the time of Solomon, but it is likely that they came much later. The knowledge of Hebrew they have lost. In 1867, the central committee of the Jewish *Alliance Universelle*, which has its seat in Paris, sent M. Leon Halévy to Abyssinia to make a tour of exploration among the Falashas, and report on what might be done for their education, with a special view to counteracting the influence of the Christian missionaries who had been sent out from India. After his return, M. Halévy made, in July, 1868, a very interesting report on the Falashas, and announced the publication of an "Essay on the Falashah," which will undoubtedly be the first thorough work on the subject. He brought with him a young Falashah, who will be educated in France.—Pierer, *Universal-Lexikon*, vi, 79; *Israélite*, vol. xv, No. 21 and 25. (J. H. W.)

**Falcandus**, Hugo, a distinguished historian, lived in the 12th century. According to the Benedictine authors of the work *L'Art de Vérifier les Dates*, he was a native of France (his original name being Fulcandus or Foucault); accompanied his patron Stephen de la Perche, archbishop of Palermo, and grand-uncle of king William II, to Sicily, and finally became abbot of St. Denys, at Paris. Gibbon is of opinion that he was a native of Sicily. His celebrated work, *Historia Sicula*, which procured for him the surname of the Sicilian Tacitus, was published in 1189 or 1190, and is of great importance for the Church history of that period.—Wetzer u. Welte, *Kirch.-Lex.* iv, 885. (A. J. S.)

**Falcon**, a bird of the hawk tribe, anciently trained to assist in hunting, and still used in the East for the same purpose. Dr. Thomson (*Land and Book*, i, 309 sq.) thus speaks of the practice in Palestine: "The beg at the castle of Tibnin, which we are now approaching, always keeps several of these large falcons on their perches in his grand reception-hall, where they are tended with the utmost care. I have been out on the mountains to see them hunt, and it is a most exciting scene. The emirs sit on their horses,

Large Falcon.

holding the birds on their wrists, and the woods are filled with their retainers, beating about and shouting, to start up and drive toward them the poor partridges. When near enough, the falcon is launched from the hand, and swoops down upon his victim like an eagle hastening to the prey. After he has struck his quarry, the falcon flies a short distance, and lights on the ground, amid the redoubled shouts of the sportsmen. The keeper darts forward, secures both, cuts the throat of the partridge, and allows his captor to suck its blood. This is his reward. Notwithstanding the exhilaration of the sport, I could never endure the falcon himself. There is something almost satanic in his eye, and in the ferocity with which he drinks the warm life-blood of his innocent victim. I once saw some men of Tortosa catching the Syrian quail with a small hawk. This was done on foot, each sportsman carrying his bird on the right wrist, and beating the bushes with a stick held in his left hand. These quails are less than the American; are migratory, coming here in early spring, and passing on to the north. They hide under the bushes, and will not rise on the wing unless forced to do so by a dog, or by the hunter himself. I was surprised to see how quickly and surely the little hawk seized his game. His reward also was merely the blood of the bird. I do not know whether or not the Jews in ancient days were acquainted with falconry, but David complains that Saul hunted for his blood as one doth hunt for a partridge in the mountains (1 Sam. xxvi, 20); and this hunting of the same bird on these mountains, and giving their blood to the hawk, reminds one of the sad complaint of the persecuted son of Jesse. In the neighborhood of Aleppo the smaller falcon is taught to assist the sportsman to capture the gazelle. Neither horse nor greyhound can overtake these fleet creatures on the open desert, and therefore the Arabs have taught the hawk to fasten on their forehead, and blind them by incessant flapping of their wings. Bewildered and terrified, they leap about at random, and are easily captured. They are also trained to attack the bustard in the same region. This bird is about as large as a turkey, and highly prized by the lovers of game; but, as they keep on the vast level plains, where there is nothing to screen the cautious hunter, it is almost impossible to get within gunshot of them. When they rise in the air, the little falcon flies up from beneath and fastens on one of their wings, and then both come whirling over and over to the ground, when the hunter quickly seizes the bustard, and delivers his brave bird from a position not particularly safe or comfortable. They will even bring down the largest eagle in the

same way; but in this desperate game they are sometimes torn to pieces by the insulted majesty of the feathered kingdom." See **HAWK**.

Small Falcon.

**Falconer**, THOMAS, A.M., a Church of England divine, was born at Bath in 1771; was made fellow of Corpus Christi College, Oxford, in 1794, and died in 1839. He published *The Resurrection of our Saviour* (1798):—*Eight Discourses on the alleged Dissonances in the Gospels*, in reply to Evanson (q. v.) (Bampton Lecture, Oxf. 1811, 8vo):—*The Case of Eusebius of Casarea* (Lond. 1822, 8vo); and other critical and historical writings.

**Faldistorium** or **Fald-stool**, a stool folding like a camp-stool, formerly used in the enthronization of bishops, and in coronations, both for sitting and kneeling. In modern times the name is (improperly) given to a small stool at which, in some English churches, the Litany is read. In those churches in which it is used it is generally placed in the middle of the choir, near the steps of the communion-table. The name is probably from *fulden*, *plieare*, and *stoul*, *sedes*.—*Maskell, Monum. Rituala*, iii, 86; *Siegel, Alterthümer*, ii, 453.

**Falkner**, THOMAS, a missionary Jesuit, the son of an eminent surgeon at Manchester, England, was born at Manchester about 1710, and was bred to his father's profession. He visited Buenos Ayres, and falling ill there, was nursed by the Jesuits, and under the influence of their kindness was led to abandon the Presbyterian Church in which he had been brought up, to enter the Roman Church, and to join the order of Jesuits. He devoted himself to missionary labors, in which his medical skill was of great use. He spent forty years in this service in various parts of South America. After the suppression of the order he returned to England, where he died January 30, 1784. He wrote a *Description of Patagonia* (London, 1774, 4to):—*Botanical and other Observations in America* (4 vols. fol.).—Migne, *Dict. de Biog. Christ.* s. v.

**Fall of Man**, a phrase which "does not occur in Scripture, but is probably taken from the book of Wisdom, chap. x, 1. It is a convenient term to express the fact of the revolt of our first parents from God, and the consequent sin and misery in which they and their posterity were involved."

I. *Scriptural Account of the Fall*.—(1.) The Mosaic account is (Gen. ii, iii), that a garden having been planted by the Creator for the use of man, he was placed in it to dress it and to keep it: that in this garden two trees were specially distinguished, one as the tree of life, the other as the tree of knowledge of good and evil; that Adam was put under the following probation by his Maker (Gen. ii, 16, 17): "And the Lord God commanded the man, saying, Of every tree of the garden thou mayest freely eat; but of the tree of the

knowledge of good and evil, thou shalt not eat of it; for in the day that thou eatest thereof thou shalt surely die;" that the serpent, who was more subtil than any beast of the field, tempted the woman to eat, by insinuating that death would be the consequence, and by assuring her that her eyes and those of her husband should be opened, and that they should be "as gods, knowing good and evil;" that the woman took of the fruit, gave of it to her husband, who also ate; and that for this act of disobedience they were expelled from the garden, made subject to death, and laid under various maledictions.

(2.) Whether this account be a literal history or not, has been matter of great discussion, not merely between Christians and unbelievers, but also among Christian interpreters. One theory is that the passage is an allegory, signifying the origin of sin in the abuse of free-will, under which the appetites of man were allowed to obtain supremacy over his higher powers. Another (later) view makes the narration mythical. The general current of Christian interpretation has held the passage to be historical, and has interpreted it literally. Philo Judeus († c. 40), speaking of the account of Paradise, says: "These accounts seem to me to be symbolical; not mere fabulous inventions like those of the poets and sophists, but rather types shadowing forth allegorical truth according to some mystical explanation." So he makes the serpent the symbol of pleasure, etc. (*On the Creation of the World*, Bohn's translation, London, 1854, p. 46 sq.).

Among the early Church writers, Clement considers the narrative of the Fall partly as fact and partly as allegory (*Strom.* v, 11, p. 689, 90), and, following Philo, makes the serpent the image of voluptuousness. Origen regards the account as allegorical (*De princ.* iv, 16; *contra Cels.* iv, 40; comp. also Origen, *Fragm. in Gen.* ad loc.). Irenæus held the passage to be historical; so also Tertullian, *adv. Jullianos*, ii, 184; *De virg. vel.* 11; *adv. Marc.* ii, 2. "He insists upon the literal interpretation of the particulars of the narrative, as they succeeded each other in order of time (*De resurr. carn.* 61: Adam ante nomina animalibus enunciat, quam de arbore decerpit; ante etiam prophetavit, quam voravit). The Gnostics made it allegorical or mythical. On the Gnostic (Basiliidian) doctrine of the Fall (*σύγκρισις ἀρχαίων*), compare Clem. *Strom.* ii, 20, p. 488; Gieseler, *Stud. u. Kritiken* (1830), p. 336. The author of the Clementine Homilies goes so far in idealizing Adam, as to convert the historical person into a purely mythical being (like the Adam-Cadmon of the Cabalists), while he represents Eve as far inferior to him. Hence Adam could not trespass, but sin makes its first appearance in *Cain*; Baur, *Gnosis*, p. 339" (*Hagenbach, History of Doctrines*, § 61). Among the later fathers, and in the scholastic period, the account was generally held to be historical. Augustine (*De Civitate Dei*, xiii, 21) asserts the historical verity of the narration, but adds that true spiritual and typical meanings are contained in it; e. g. Paradise is the Church, the tree of knowledge is the type of free-will, etc.

The theologians of the Reformation followed the Scholastics in adhering to the literal interpretation, but differ in the exposition of several parts of the narrative; e. g. the serpent is held by some to be a natural serpent; by others, Satan in the guise of a serpent, etc. Calvin (*Commentary on Genesis* iii) speaks as follows: "It appears, perhaps, scarcely consonant with reason that the serpent only should be here brought forward, all mention of Satan being suppressed. I acknowledge, indeed, that from this place alone nothing more can be collected than that men were deceived by the serpent. But the testimonies of Scripture are sufficiently numerous in which it is plainly asserted that the serpent was only the mouth of the devil; for not the serpent, but the devil, is declared to be 'the father of lies,' the fabricator of imposture, and the author of death. The question, how-

ever, is not yet solved why Moses has kept back the name of Satan. I willingly subscribe to the opinion of those who maintain that the Holy Spirit then purposely used obscure figures, because it was fitting that full and clear light should be reserved for the kingdom of Christ. In the mean time the prophets prove that they were well acquainted with the meaning of Moses when, in different places, they cast the blame of our ruin upon the devil. We have elsewhere said that Moses, by a homely and uncultivated style, accommodates what he delivers to the capacity of the people, and for the best reason; for not only had he to instruct an untaught race of men, but the existing age of the Church was so puerile that it was unable to receive any higher instruction. There is, therefore, nothing absurd in the supposition that they whom, for the time, we know and confess to have been but as infants, were fed with milk. Or (if another comparison be more acceptable) Moses is by no means to be blamed if he, considering the office of schoolmaster as imposed upon him, insists on the rudiments suitable to children. They who have an aversion to this simplicity must of necessity condemn the whole economy of God in governing the Church." A similar view is given by Kurtz, *Bible and Astronomy* (Phila. 1861), p. 174 sq. The modern extreme Rationalists generally interpret the narrative as mythical. Eichhorn (*Urgeschichte*) finds truth in it in the form of poetry, that is, he makes it a myth; so Gabler, Paulus, and others. Kant, Schelling, and other recent German philosophers and interpreters make it a "speculative myth." Von Bohlen (*On Genesis* iii) follows Rosenmüller in supposing that the narrator had the Zendavesta in view. Julius Müller gives up the historical character of the narrative. "If now," he says, "we turn to the narrative in the book of Genesis, we shall find that not sin, but physical suffering and death, are there connected with Adam's fall. This fact, and the lesson that man's ruin originated in himself, are the great truths which are to be gathered from the story, which must be regarded as fundamentally true, although the story is in the form of a fable. That it is not to be taken literally is plain from Scripture, for the story in Genesis speaks of the serpent as the agent in the temptation of Eve. St. Paul speaks of the same temptation as coming from Satan. It is usual to assume that the serpent was the mere instrument of Satan, but there is nothing to lead us to this view in the words of the narrative. St. Paul, by interpolating this into the narrative, shows us that it is not to be taken as literally true. We find in John viii, 44, 'the devil was a murderer from the beginning,' an allusion to the ruin of man by the temptation. If this be so, it is a plain reference to Satan as the cause of man's bodily death. To bring in the idea of spiritual death seems less appropriate, for our Lord was rebuking the murderous intentions of the Jews. It was through conduct like that of the devil that they showed themselves his children" (*Doctrine of Sin*, Edinb. 1868, p. 78, 79).

The more recent German interpreters of the better class (e. g. Hävernick, Delitzsch, Keil, etc.) admit the historical character of the account, but there are, of course, various theories among them as to its interpretation. Martensen (*Christian Dogmatics*, § 79) interprets the Mosaic account as a combination of history and sacred symbolism, a figurative representation of an actual event. Lange (*On Genesis*, Amst. edit. p. 243), speaking of the narrative, says: "Like the Biblical histories everywhere, and especially the primitive traditions of Genesis, it is a historical fact, to be taken in a religious-ideal, that is, a symbolical form. It is just as little a mere allegory. It is just as little a bare, naked fact, as the speaking of the serpent is a literal speaking, or as the tree of life, in itself regarded, is a plant whose eating imparted imperishable life. That sin began with the beginning of the race, that the first sin had its origin in a forbidden en-

joyment of nature, and not in the Cainitic fratricide or similar crimes, that the origin of human sin points back to the beginning of the human race, that the woman was ever more seducible than the man, that along with sin came in the tendency to sin, consciousness of guilt, alienation from God, and evil in general—all these are affirmations of the religious historical consciousness which demand the historicalness of our tradition, and would point back to some such fact, even though it were not written in Genesis."

The interpretations of the *serpent* have been very variant. Eusebius (*Prap. Evang.* i, 10) says that Moses calls the evil spirit (*πονηρός δαίμων*) by the name of "serpent," as he is "full of poison and malice." Adam Clarke (*Commentary on Genesis*, ch. iii) interprets the word *nachash* (rendered "serpent") to mean "a creature of the ape or orang-outang kind." His notes on the whole passage afford a very curious specimen of exegesis. We cite Lange (*Genesis*, Amer. edit. p. 228) as follows: "True it is that the serpent appears as the probable author of this temptation, but such probability is weakened by what is said in i, 25 and ii, 20. 'The serpent was a good creation of God, though different, as originally created, from what it afterwards became' (Delitzsch). As a type, the serpent is just as well the figure of health and renovation as of death, since every year it changes its skin, and ejects, moreover, its venom. This double peculiarity and double character, as *ἀγαθοδαίμων* and *κακοδαίμων*, is indicated not only in language, but also in myths, in sculpture, and in modes of worship. In this relation, however, we must distinguish two diverging views of the ancient peoples. To the Egyptian reverence for the serpent stands in opposition the abhorrence for it among the Israelites [see SERPENT], Greeks, Persians, and Germans." "That Satan made use of the serpent, and that a serpent was somehow employed, is likely; the language of Jehovah subsequently, while it was literally true of the instrument, being in a higher sense true of the agent, the one being made the emblem of the other (Gen. iii, 14). Was the language here entirely symbolical and figurative, having nothing in it literal whatever? This does not seem likely. Why should such an allusion have been employed at all to describe the outcast and degraded condition of a fallen angel, had there been nothing whatever giving the serpent any connection with the temptation and the fall? Is it not more reasonable to consider both as blended, the literal and the symbolical? (Gen. iii, 4; 2 Cor. xi, 3; Rev. xii, 9; xx, 2; Gen. iii, 15; Col. ii, 15; Rom. xvi, 20; 1 John iii, 8; John viii, 44). Conjectures, too, have arisen out of the terms in which the serpent was addressed: 'Upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life.' 'The serpent, perhaps,' says Gill, 'formerly moved in a more erect posture, but was doomed to lick the dust.' 'Probably his original residence and food,' guesses another, 'were in the trees, but now he is degraded to the earth.' That sentence evidently, whatever might be its literal application to the serpent, was emblematically meant of Satan himself. 'Plainly figurative,' says Dwight, 'to express a state of peculiar degradation and suffering' (Wardlaw, *Systematic Theology*, p. 85-7). Watson defends the historical character of the narrative (*Institutes*, pt. ii, ch. xviii), as also does Holden, *Dissertation on the Fall* (Lond. 1823, 8vo). Conyers Middleton (*Essay on the Allegorical and Literal Interpretation of the Fall*, Works, 1775, ii, 437) maintains the allegorical view. Comp. Pve Smith, *First Lines of Theology*, bk. iv, ch. ii.

A writer in the *Journal of Sacred Literature* (i, 351 sq.) seeks to show that the common opinion that the serpent was the instrument of the tempter is untenable, on the ground that the Scripture does not state that the serpent was an instrument; and that the literal application of the words of the narrative to a serpent as the instrument of Satan appears to be incon-

sistent with the present relation of the serpent to other animals, and also with the testimony of geology as to fossil remains, etc. He maintains that under the name serpent Satan is meant, as there are "probable grounds for the conclusion that *the serpent* was, during the earliest ages, the name of the Evil One, reflecting the conception of him that then prevailed." Bishop Newton (*Dissert. on Creation and Fall*, 1st edit.) takes a similar view, viz. that Satan is spoken of in the passage under the "well-known" symbol or hieroglyphic of the serpent, which was a proper emblem, he holds, of the deceiver of mankind, as in popular estimation it was held to be the most cunning and insidious of animals. Sherlock (*Use and Intent of Prophecy*, diss. iii) refers to the "common usage of Eastern countries, which was, to clothe history in parables and similitudes;" and remarks that "it seems not improbable that for this reason the history of the fall was put into the dress in which we now find it. The serpent was remarkable for an insidious cunning, and therefore stood as a proper emblem of a deceiver; and yet, being one of the lowest of God's creatures, the emblem gave no suspicion of any power concerned that might pretend to rival the Creator." What was the particular nature of the sin of our first parents it is not an easy matter to determine. Bishop Newton remarks (l. c.) that "eating forbidden fruit is nothing more than a continuation of the same hieroglyphic characters wherein the history of the fall was recorded before the use of letters. It was plainly the violation of a divine prohibition; it was indulging an unlawful appetite; it was aspiring after forbidden knowledge, and pretending to be wise above their condition. So much may be safely asserted in general; we bewilder and lose ourselves in search of more particulars." In a later edition of this dissertation (*Works*, i, 91), bishop Newton modified the statement above given, and gave his adherence to the view that a real serpent was concerned in the fall (see Quarry, *On Genesis* ix). Martensen (*Christian Dogmatics*, § 103) passes by the question whether the "serpent was led by an evil spirit, or whether an evil spirit assumed the form of the serpent;" but he adds, "if we abide by the original narration, we may say that the serpent is the allegorical designation for the criminal principle which opposed itself to man in temptation." Dörtenbach (in Herzog, *Real-Encyclop.* xv, 209, art. Sünde) maintains that the serpent was a real serpent, the tree a real tree, etc. Quarry gives a copious dissertation on Paradise and the Fall in his *Genesis and its Authorship* (London, 1866, 8vo). The aim of this writer is to withdraw the scriptural statements "altogether from the range of physical interpretation." He cites a remark of Hengstenberg's (*Christologie*, th. i, abt. i, p. 26, ed. 1829), to the effect that if the serpent be symbolical, the whole history is symbolical, as, in a connected passage like this, unity of interpretation must prevail; and it is not allowable to follow at one moment the symbolical, and at the next moment the literal interpretation. Admitting the truth of this, Quarry states that, nevertheless, the narrative may be, as a whole, not simply an apologue illustrating true principles, but a true history of great facts represented symbolically. He interprets the tree of life (Compare Rev. ii, 7; xxii, 2, 14), and the eating the fruit of the tree of knowledge, as mystical; the former denoting the promise of eternal life conditioned on man's obedience, the latter denoting the act of disobedience and its moral consequences, consciousness of guilt and shame. He maintains that the supposition of a real serpent is untenable, as there is no ground for the belief that Satan can possess at will any living creature, or work such a miracle as to make a serpent speak. "A natural serpent is literally spoken of, but this natural serpent is only the symbol of the real tempter; otherwise the innocent animal receives all the punishment, while the really guilty tempter escapes." The

real sin itself must have arisen at some point at which "natural appetite passed into that stage of its progress when, as St. James says, lust has conceived, and at which the sin thus conceived has quickened into mental transgression. This point, lost in the mystery which envelops every beginning of existence, mental or material, of thought, act, or substance, was the real fall, and is better represented by the mystical symbol of the participation of forbidden fruit than by a historical narrative that should only specify the overt act in words to be taken in their literal acceptation." After answering Hengstenberg's objections to the symbolical interpretation (especially the objections drawn from those passages of the N. T. in which the history of the fall is taken as actual history, 2 Cor. xi, 3; 1 Tim. ii, 13, 14; Rom. v, 12), he concludes with the general statement that "enough of the historical facts are patent to suffice for all the moral and religious uses of such a narrative, the creation and the fall being unquestionable verities;" but "nothing is told merely to gratify curiosity; the details that could only serve this end are withdrawn behind the veil of a mystical mode of representation" (p. 155). See also Knapp, *Christian Theology*, § 75.

*Heathen Traditions.*—There are many heathen traditions concerning the creation and the fall, some of which have marked points of resemblance to the Bible account. In some mythologies the serpent is an object of worship, while in others "mythology represents that reptile as trampled under the feet of a mighty deliverer. In a coin of Antoninus Pius Hercules is represented as plucking apples from a tree round the trunk of which a serpent is entwined." Among the Goths, the Persians, and the Hindoos, traditions of a serpent of various kinds are found. Stillingfleet ingeniously observes that from this origin has come the use of serpents to so great an extent in divination, Satan appearing 'ambitious to have the world think that the knowledge of good and evil was to come by the serpent still.' The Hebrew word for serpent signifies at the same time *to divine*, and the Greek word *ὄφιν εἶσθαι* has the same derivation from *ὄφιν*, a serpent; 'thus we see how careful the devil was to advance his honor in the world under that form wherein he had deceived mankind into so much folly and misery.' (Wardlaw, *Systematic Theology*, ii, 85 sq.). It has been the fashion to deny that the traditions of the various peoples, analogous to the Mosaic account, are at all confirmations of that account. But the harmony of these traditions has never been rationally explained apart from the theory that regards them as springing from common reminiscences of an actual occurrence. Auberlen remarks that "these oldest traditions of the human race confirm the historical credibility of the Mosaic narrative, down to its details, just as much as they do the inner purity and elevation of them, compared with the myths of heathenism. In regard to this latter view, it is especially seen how Israel alone, along with the fact, retains the deep, divine idea of it. The heathen, while they preserve with great fidelity the outward circumstances, clothe them in fantastic and national vesture. The difference is the same in kind as that between the canonical and apocryphal gospels." He cites also Herder, concerning the narration in Genesis, as follows: "Its sound has gone out into all the earth, and its very words into all lands! Whence is it that the remotest nations have their knowledge of it? How comes it that they built on it religions and mythologies; that it is, in fact, the simplest foundation of all their arts, institutions, and sciences? If from it things may be made plain and clear as sunlight that are as chaos and dark as night when it is denied, or when men prate of their hypotheses; if from this a whole antiquity may be reduced to order, and a line of light be drawn through the most confused events of the early history of nations—light which, like that in Correggio's pic-

ture, shines from the cradle of the race—what then have ye to say, ye manufacturers of myths, ye who would profane the revelation of God?" (Herder, *alt. Urkunde der Menschengeschlechts*; Werke, Carlsruhe, 1827, v, 187; vi, 4).

II. *Doctrinal Import of the Narrative.*—Whatever views are held as to the nature of the narrative in Gen. ii, iii, all who believe it to be a record of divine revelation find in it the following points of doctrine: 1. That God, after creating man, placed him in a state of probation; 2. that the test of his probation was obedience to the divine law; 3. that the temptation to disobedience came from an evil power outside of man; 4. that the temptation appealed both to the intellect and to the senses, leading first to unbelief in God, secondly to putting "self" in place of God, and thereby to the beginning of evil lust; 5. that in the exercise of free will man yielded and sinned; 6. that the consequences of the sin were knowledge of good and evil, separation from God, and death, the curse lighting upon man and upon nature also. Auberlen, referring to the three constituents of the first sin named above, viz. unbelief, self-love, and lust, remarks as follows: "That these three parts of the idea of sin are not accidental, but substantially express it and exhaust it, is shown not only in the fact that all sin that comes before us in life may be referred to them, but also in the fact that they correspond to the three fundamental elements of man's being and consciousness—spirit, soul, body—the God-consciousness, self-consciousness, and world-consciousness. These have all become corrupted and perverted. They have become, respectively, alienation from God, selfishness, love of the world. The first and highest element of human nature—the spiritual—is negated, obscured, made powerless; the two others—the lower—are pushed into extreme but unhealthy prominence and activity. Man has become physical and fleshly. Unbelief is the negative, the union of self-seeking and the lust of the senses is the positive element in the idea of sin. Man no longer wishes for God; he is bent on having the creature in both ways, the mental and natural, the subjective and objective; he will have his own Ego and the world too. According to Gen. iii, 5, 6, the selfishness is, as it were, the soul; sensuousness, the body of sin: the first is the deep, invisible root; the second, the external manifestation. The Ego, separated from God, seeks in the world the elements on which it lives. Genesis thus comprehends the various opposing theories of men on the nature of sin, the theory of selfishness, which in recent times is represented by Julius Müller, and that of the senses by Schleiermacher and Rothe. It leads both ethical theories back to a religious basis, and in that matter modern thought has a great deal to learn" (*Divine Revelation*, Edinb. 1867, p. 184).

The theological question of the connection between the sin of Adam and that of the whole human race will be treated under the articles *IMPUTATION*; *SIN*. For the specific loss of man by the fall, in the theological sense, involving the difference between the Roman Catholic anthropology and the Protestant, see *IMAGE OF GOD*; *JUSTIFICATION*; *SIN*. In this place we give the views of various writers as to the general doctrinal significance of the narrative.

Lange (*On Genesis*, Am. ed., p. 73 sq.) remarks that "the significance of Paradise is this, that it declares the original ideal state of the earth and the human race, the unity of the particular and the general, the unity of spirit and nature, the unity of spiritual innocence and the physical harmony of nature, the unity of the fall and the disturbance of nature; lastly, the unity of the facts and their symbolical meaning, which both the barely literal and mythical explanations of the record rend asunder. . . . The tree of knowledge of good and evil existed in some one form, but with it all nature is in some measure designated as a test.

But the serpent, as the organ of that temptation, is not only the type of temptation and of sin, but, as originally a worm, the type of its brutality, its degradation, and its subjection. The record of the actual fall stands there as an eternal judgment upon the theoretical, the human, view of moral evil, especially upon the errors of Dualism and Manicheism, Pelagianism and Pantheism. Hence arise the numerous and strong objections which the most diverse systems in old and modern times have raised against this record. The earthly origin of evil out of the abuse of freedom offends dualism, which derives it from an evil deity, from dark matter, or from the supremacy of sense. Although the serpent sustains the doctrine that, prior to the fall of man, sin had existed in a sphere on the other side, working through dæmoniac agency upon this (for the serpent was not created evil, Gen. i, 25; generally not even fitted for evil, and can only be regarded, therefore, as the organ of a far different evil power), yet the visible picture of the fall in this sphere is a certain sign that the fall in that sphere could only have risen through the abuse of the freedom of the creature. But if we observe the progress of sin from the first sin of Eve to the fratricide of Cain; if we view the opposition between Cain and Abel, and the intimation of the moral freedom of Cain himself, so the Augustinian view, raising original sin to absolute original death, receives its illumination and its just limits. But how every Pelagian view of life falls before this record, as it brings into prominence the causal connection between the sin of the spirit world and that of man, between the sin of the woman and the man, between the sin of our first parents, and their own sinfulness, and the sinfulness of their posterity! If we take into view the stages of the development of evil in the genesis of the first sin, how limited and vapid appears the modern view, which regards the senses as the prime starting-point of evil! But when Pantheism asserts the necessity of sin, or rather of the fall, as the necessary transition of men from the state of pure innocence to that of conscious freedom, the simple remark that the ingenuousness of Adam would have been carried directly on in the proper way if he had stood the test, just as Christ through his sinlessness has reached the knowledge of the true distinction between good and evil, and has actually shown that sin, notwithstanding its inweaving with human nature, does not belong to its very being, clearly refutes the assertion. But how clear is the explanation of evil, of punishment, and of judgment, as it meets us in this account! that the natural evil does not belong to the moral, but, notwithstanding its inward connection with it, is still the divine counteracting force against it; that punishment is to redeem and purify; that from the very acme of the judgment breaks forth the promise and salvation. These truths, which are far above every high anti-Christian view of the world, make it apparent that the first judgment of God, as a type of the world-redeeming judgment of God, has found its completion in the death of Christ upon the cross." "The deceptive promise of the serpent was fulfilled: man's eyes were opened (ch. iii, 7), but he saw only his misery and nakedness. He was now brought to know good and evil, but with the painful consciousness of having trifled with and lost the one, and of being sunk in the depths of woe by the other. He had become as a god; he had boldly cast off all allegiance to the one God, and assumed sovereignty over himself. He had constituted himself a God, no longer the representative of God; he had become his own master, free as God; but this likeness to God brought not with it the happiness which pertains to the divine Being, but was fraught with the deepest misery and woe" (Kurtz, *Bible and Astronomy*, p. 171). Müller, after affirming that "there is really nothing in the narrative of the fall obliging us to consider that event as the primary beginning of sin, in the strict sense of the word," adds

“that neither ‘the image of God,’ wherein man was created, nor God’s pronouncing everything ‘very good,’ prevents our believing that the fall was only the outward manifestation of a perversion of the will preceding the empirical life of man—the outgo of an evil already present *in potentia*, which might, indeed, by a persevering effort, have been crushed, but which forms the basis of an original moral depravity in human nature. The endeavor of the tempter was to bring out to view, and into action, this hidden evil” (*Doctrine of Sin*, Edinb. 1868, ii, 385). This view of Müller’s rests upon his theory of a sin of man in some pre-existent state, which he calls a “self-determination of the transcendental freedom before our individual existence.” Rothe, on the other hand (*Ethik*, ii, 180), places the essence of sin chiefly in the necessity of matter. “The passage through sin, in his opinion, is a metaphysical necessity. He conceives of our first parents not as mature at their creation, but destined to spiritual development; consequently their material part, in the absence of training, must gain the upper hand; and imperceptibly, and without blame, they found themselves, by their development, in sin. Hence evil lies in the divine world-plan, not merely as something permitted; it lies unavoidably in the creature, on account of his origin—in the fact of his *coming into existence* in contradistinction from God; but as creature-evil has been ordained in the plan of the world, so also has its destruction, as it may come to light. Rothe (p. 204) openly declares that the ‘effort to separate evil from all connection with the divine causality must ever remain an idle undertaking;’ although even he himself, in a measure startled at this result, imagines himself to hold the causation of human sin entirely apart from God. He says: ‘The divine production of evil is at the same time its absolute destruction. Within the sphere of redemption the necessity of sinning is not entirely removed, but is conceived of as constantly vanishing.’”

In opposition to Müller and Rothe, as well as to all who presuppose evil as fundamental and its development as necessary, Pastor Kinck wrote an able article, *Von dem Ursprung des Bösen*, in the *Theol. Studien u. Kritiken* for 1852 (p. 651 sq.; translated by Dr. Nadal in the *Methodist Quarterly*, October, 1853), from which we make the following extract. After stating that it matters not, for this discussion, whether the Scripture narrative be literal or figurative, he states its substantial import as follows: “God caused the tree of life and the tree of knowledge of good and evil to grow up in the midst of the garden, and commanded man, ‘Of the tree of knowledge of good and evil thou shalt not eat; for in the day thou eatest thereof thou shalt surely die.’ This tree of knowledge, as planted by God, is not yet evil, but contains in itself the *choice between good and evil*—the innate possibility of sinning, which possibility is bound up with the very conception of a free being, whose liberty is not the divine necessity, but lies outside of it. It is a tree of divine commands and prohibitions—objectively conceived, the object of knowledge; or, subjectively, the possibility of transgressing the command, the object of free choice. Alongside of this stands the tree of life; and both are united to prove that the mere possibility of evil, which is involved in the creation of man, is not yet anything evil or death-bringing. Only with the realization of the possibility does opposition to the tree of life arise, i. e. the true life is forfeited, and death, curse, and destruction appear in its place. The tree of life, which the *living* God had planted for man, and his expressed will not to eat of the tree of knowledge, presuppose the possibility of not transgressing, because God could neither require anything impossible of man, nor involve him inextricably in the meshes of a scheme which would certainly exclude him from the tree of life. The origin of evil from absolute good must forever remain inconceivable; not so with relative good.

If we hold fast to this difference, the objection of Rothe will not hold: ‘The religious-moral perfection of the first parents of our race would exclude all psychological possibility of the fall.’ But this possibility is explained by the *creation* of man, who, as it were, stands out of God; not holy and perfect like God, and yet not a mere creature like the beast: he is not under and in the law of necessity, but possesses the likeness of God and freedom. The perfection of a creature is not divine, not absolute. The want of such perfection in a creature casts no shadow upon the Creator. According to the doctrines of Emanation and Pantheism, which mix God and the world, the fall cannot be explained, but only according to the doctrines of God and of the creation. When, then, by the creation, God set free beings out of himself, then the possible departure from God was given, and the question, ‘Wherefore did not God hinder the evil that he foresaw?’ is entirely inadmissible. God does not prevent evil, because by so doing, contrary to his own will, he would injure and destroy the province of freedom (the divine image). Thus our Saviour did not hinder the murderous blows of his enemies, while at the same time he did not will or excuse them. In like manner, God was Lord over the parents of our race and over the serpent; but if he by his own will restrained his highest power, and left free play-room to free created beings, and still retains the government, he is not therefore destitute of power, but only consistent, and worthy to be adored. Man should rather complain of himself, but give thanks to God that he has endowed him with such prerogatives, and glorify him with soul and body, which are God’s. There was no necessity at all to sin; that complaint can only be established on the ground that, as Rothe teaches, evil *inevitably* developed itself. Besides, from the beginning of the world God had provided for the human race, whose fall he foresaw, the most perfect means of grace and gifts, in order to make that injury abundantly good, and to lead back the fallen ones to himself and his kingdom. Indeed, as all evil, so also must the sin of our first parents redound to the praise of the merciful God, because by it was conditioned the mission of the second Adam as the Redeemer of the world. But the *possibility* of the fall without blame to the Creator being admitted, another question arises: Through what incitement did it become a *reality*? Even to this question the Scriptures give a satisfactory answer: it took place through outward prompting—through evil spiritual influence, which was already existing in creation. Upon the basis of a created but still spiritual existence, the possibility of being moved and poisoned by an influence at enmity with God must be admitted. The inexperience of our first parents, who were not isolated in the new world, corresponded exactly with the subtlety of Satan in the form of a serpent. The kingdom of Satan, as a spiritual power, and the peccability of the first pair, whose pure self-determination was ensnared and obscured through that power, furnish a satisfactory explanation of the fall. The fall itself was certainly a free self-determination, otherwise no blame could attach to it; but not altogether so: both the decision and the guilt were shared by the devil, as the murderer from the beginning: it was a co-operation of human freedom with the temptation of the evil principle itself. But, according to the Scripture account, the temptation of our first parents was gradual, and the motives to the fall are thus psychologically clear. First of all, the serpent raised a doubt concerning the divine prohibition and the ruinous consequences of sin: ‘Yea, hath God said, Ye shall not eat of every tree of the garden?’ ‘Ye shall not surely die.’ Then he awakened pride, inducing man to overleap his appointed condition to become like God, and to use his freedom arbitrarily, and according to his own pleasure: ‘God doth know that in the day ye eat thereof then your eyes shall be opened, and

ye shall be as gods, knowing good and evil.' After this preparation came the thought that the tree was good for food, pleasant to look upon, and to be desired to make one wise. The sensual desire would now naturally start up, and the woman seduced became the seducer. The powers of the soul were corrupted before the actual sin took place; the faculty of knowledge by doubt and unbelief toward God, the faculty of desire through unbounded striving and proud excess, as the Grecian fable of Prometheus represents it; and, finally, the faculty of feeling, through sensual longing, which propensity the religion of the Greeks sets forth by Epimetheus and Pandora. Thus did the possibility of the fall, which rests upon the freedom of the creature, pass over into reality under evil outward influences. The conversation between Eve and the serpent shows how accessible she was; the woman, as the weaker part, is first approached and misled, and not till then the man, and even then only through her; as also the apostle Paul expresses it (1 Tim. ii, 14), the woman was first in the transgression. Rothe, indeed (p. 221), thinks that the assumption of a satanical temptation does not at all help the difficulty, because that assumption always presupposes a real susceptibility of being tempted, a sinful predisposition, a minimum of sin. But the possibility of being tempted to sin is not yet sin; with Rothe that predisposition is rather something already existing. It is certainly much more worthy of God to conceive of his creatures as pure and good—they first determining themselves to evil, and the enemy active therein. If even the Son of God could be tempted without injury to his sinlessness, much more the first Adam, whose personality and divine resemblance were specifically lower. If, in fine, we compare the scriptural theory, thus understood, with the modern philosophical explanations of the fall, the result will be that the former will be found to contain incomparably more truth and wisdom than the latter; although Rothe (p. 221) is of the opinion that the Biblical account of the fall can no longer be maintained, and that the fall cannot be explained from the Mosaic stand-point. Only the Bible (and perhaps, agreeing with it, the mythology of antiquity) tells us of a man created in the image of God, in a paradisaical state of innocence; and, in accordance with this fact, shows how this state was interrupted and perverted into one of guilt. Dr. Julius Müller, on the contrary, although Paradise has still a place in his system, places Adam in it as already a sinner. In the same way Rothe presupposes what he ought to show, since he assumes evil as original and necessary in the development of the world. We cannot see, either according to Müller or Rothe, whence it could properly come into the natural world. Rothe, with his presupposition, is obliged to assume one of two things: either he must dualistically establish an evil principle in matter, and deny the pure creation of God, or he must ascribe the origin of sin, not to the perverted will, but to God himself: in both cases he has a Manichean life-view of sentient beings. Sin with him is not a free act of man, proceeding out of the heart and will; it springs from the overmatching power of material nature subduing his personality with inevitable necessity (p. 226). 'The origin of evil from pure good must forever remain inconceivable' (p. 222); thus he establishes an impure material creation. Is anything explained by this means? Whence comes, then, impurity into the material creation before all acts of the will? Is not the question more easily explained by the abuse of freedom than by metaphysics; more easily through the devil and man than by the act of the Creator? The fall, according to the doctrine of the Church, says Rothe (p. 220), was a blunder in the work of the earthly creation, as it were, at the beginning. In order to avoid this, either an evil principle must have been co-operative in the creation, or else God himself must have ruined his own work at its

commencement. Shall we call this escaping the blunder made at the beginning? Is it not rather increasing it, and carrying it over into the region of the perfect and the holy? The latter of these two opinions, strictly taken, is that of Rothe, since he assumes matter as created by God, and from matter deduces sin. But the positions, Matter was created by God, and Matter is the opposite of God, and hence the origin of sin, contradict each other."

Quar. Review*, Oct. 1867, art. vii. On the effects of the fall on nature, see NATURE.

**Fallow-deer** (צִיָּבָה, *yachmar'*; Sept. βούβαλος [but ζορκός in 1 Kings], Vulg. *bubalus*), mentioned among the beasts that may be eaten in Deut. xiv, 5, and among the provisions for Solomon's table in 1 Kings iv, 23 [Heb. v, 3]. There are three animals of the *Cervidae* family with which different writers have identified it. See ZOOLOGY.

1. Most commentators (following Bochart, *Hieroz.* i, 910; ii, 260) regard it as properly translated in our version, deriving the word from צִיָּבָה, *chamar'*, in the sense of *being red*, and thus referring it to a species of deer of a reddish color; probably the *Cervus dama* of Linnaeus, originally a native of Barbary, where it is still found wild. It is stated to be found very generally dispersed over Western and Southern Asia, and is said to have been introduced into England from Norway (see *Penny Cyclopædia*, s. v. Deer). It is smaller than the stag (*Cervus elaphus*), having horns or branches serrated on the inside, which it sheds annually. The color in winter is a darkish brown, but in summer bay, spotted with white. The fallow-deer

Common Fallow-deer.

(*Cervus dama*) is deemed by most authorities to be undoubtedly a native of Asia; indeed, Persia seems to be its proper country. Hasselquist (*Trav.* p. 211) noticed this deer in Mount Tabor. Oedmann (*Vern.*

*Samml.* i, 178) likewise believes that the *yachmür* is best denoted by the *Cervus dama*. The female is called in the Talmud נִיבִיזָה, and is identified by Lewysohn with the German *Damhirsch*. It is, however, difficult to suppose that Jerusalem could have received any appreciable amount of flesh-meat from such a source, remote as it is from a forest country. See DEER.

2. Kitto (*Pict. Bibl. Deut. l. c.*) says, "The *yachmür* of the Hebrews is without doubt erroneously identified with the fallow-deer, which does not exist in Asia," and refers the name to the *Oryx leucoryx*, citing Niebuhr as authority for stating that this animal is known among the Eastern Arabs by the name of *yachmür*. This is the opinion which we have adopted, from Hamilton Smith, who is the best modern authority on such questions. See ANTELOPE.

3. Still others, on the authority of the Septuagint rendering in Deuteronomy, regard the term as denoting "the *Antelope bubalus* (Pallas); the *βούβαλος* of the Greeks (see Herod. iv, 192; Aristotle, *Hist. Anim.* iii, 6, ed. Schneider, and *De Part. Anim.* iii, 2, 11, edit. Bekker; Oppian, *Cyn.* ii, 300). From the different descriptions of the *yachmür* as given by Arabian writers, and cited by Bochart (*Hieroz.* ii, 281 sq.), it would also seem that this is the animal designated; though Damir's remarks in some respects are fabulous, and he represents the *yachmür* as having deciduous horns, which will not apply to any antelope. Still Cazuis, according to Rosenmüller, identifies the *yachmür*

*Antelope Bubalus.*

with the *bekker el-wash* ('wild cow'), which is the modern name in North Africa for the *Antelope bubalus* (see Shaw's *Travels*, p. 242, and Suppl. p. 75, fol.; Buffon, *Hist. Natur.* xii, 294). The term *bubalus* evidently points to some animal having the general appearance of an ox. Pliny (*N. H.* viii, 15) tells us that the common people, in their ignorance, sometimes gave this name to the *Bison* (*Auroch*) and the *Urus*. He adds, the animal properly so called is produced in Africa, and bears a resemblance to the calf and the stag; a middle position between the cervine and bovine ruminants that corresponds to the external appearance of the animal in question. The *bekker el-wash* appears to be depicted in the Egyptian monuments [see CHIASE], where it is represented as being hunted for the sake of its flesh, which Shaw tells us (Suppl. p. 75) is very sweet and nourishing, much preferable to that of the red deer (see Wilkinson's *Anc. Egypt.* i, 223, figs. 3, 4, and p. 225, fig. 19). This animal, which is about the size of a stag, is common in North Africa, and lives in herds" (Smith, s. v.). See WILD OX.

Fallow ground (נִיבִיזָה), broken up with the

plough), a field (especially of sward) just ploughed (figuratively, Jer. iv, 3; Hos. x, 12; literally, "tilage" Prov. xiii, 23). See AGRICULTURE.

**Fallow year.** Among the Hebrews every seventh year was a sabbath of rest to the land. The commencement of this year was on the first day of the seventh month, *Tisri*=October. There was neither sowing nor reaping; the vines and the olives were not pruned; there was no gathering of fruits; for all spontaneous productions were left to the poor, the traveller, and the wild beast (Lev. xxv, 1-7; Deut. xv, 1-10). The sabbatical year was instituted in order that the land might be improved, and that the Hebrews might be taught economy and foresight, and also invited to exercise a large degree of trust in the providence of Jehovah their king. During this year they could fish, hunt, take care of their bees and flocks, repair their buildings, manufacture furniture and cloths, and carry on commerce. Delts, on account of there being no income from the soil, were not collected (Deut. xv, 9; xxxi, 10-13). Nor were servants manumitted on this year, but at the end of the sixth year of their service (Exod. xxi, 2; Deut. xv, 12; Jer. xxxiv, 14). The Hebrews remained longer in the tabernacle or temple this year, during which the whole Mosaic law was read, in order to be instructed in religious and moral duties, the history of their nation, and the wonderful works and blessings of God (Deut. xxxi, 10-13). When Jehovah gave the Hebrews this remarkable institute, in order to guard them against the apprehension of famine, he promised, on the condition of their obedience, so great plenty in every sixth harvest that it alone would suffice for three years (Lev. xxv, 20-22). However, through the avarice of the Hebrews, this seventh year's rest, as Moses had apprehended (Lev. xxvi, 34, 35), was for a long time utterly neglected (2 Chron. xxxvi, 21); for in all the history of the Hebrew kings there is no mention of the sabbatical year, nor of the year of jubilee. The period when this wise and advantageous law fell into disuse may probably be understood from the prediction of Moses in Lev. xxvi, 33, 34, 43; comp. with 2 Chron. xxxvi, 21; Jer. xxv, 11. Thus was it foretold that the Hebrews, for the violation of this law, should go into captivity: "To fulfil the word of the Lord by the mouth of Jeremiah, until the land had paid off her sabbaths: for as long as she lay desolate she kept sabbath, to fulfil threescore and ten years." Here it is taken for granted that seventy sabbatical years, including the jubilee years which succeeded every seventh sabbatical year, had been neglected by the unfaithful people. The Hebrews were frequently weary of the law; and at different periods during the commonwealth they appear to have utterly neglected the fallow or sabbatical years. Hence it appears that the captivity of the Hebrews and the desolation of their country was an act of retributive Providence, brought upon them for this very reason, that the land might pay off those sabbatical years of rest, of which the Hebrews had deprived it, in neglecting the statute of Jehovah their king (Lev. xxvi, 43). After the exile the fallow or sabbatical year appears to have been more scrupulously observed, as we learn from Josephus (*Ant.* xi, 11, 8). See JUBILEE.

**False Prophet** (ψευδοπροφήτης, a *pseudo-prophet*), i. e. one falsely professing to come as a prophet or ambassador from God, a false teacher (Matt. vii, 15; xxiv, 11, 24, etc.; comp. *Test. xii Patr.* p. 614; Josephus, *Ant.* viii, 13, 1; x, 7, 3; *War.* vi, 5, 2). See PROPHECY. In Rev. xvi, 13, the term is distinctively used, "the false prophet," with reference to the mythological system of paganism, the second "beast" (q. v.), supporting the first or secular power of Rome; allegorically interpreted of the impostor Mohammed (Matthews, *De pseudoprophetismo Hebræorum*, L. B. 1859, 8vo).

**Fama clamōsa** (*general bad report*), in the Scot-

tish ecclesiastical law, is a ground of action before a presbytery or synod against a minister or member of the Church, founded on common report, and not a charge by accusation. If the rumor, or *fama clamosa*, be general and hurtful, the court can investigate it without any accuser, for the vindication of the character of the Church and of the court, and with a view to the preservation of good morals in the community. See Hill, *Church Practice*, p. 49.

#### Familia Charitātis. See FAMILISTS.

**Familiars of the Inquisition**, officers of that tribunal whose function it is to apprehend accused or suspected persons and convey them to prison. They belong to the family of the inquisitor, and are therefore called *familiars*. The office was formerly held in high honor, and men of noble family often held it, especially in Spain. Innocent III granted large indulgences to familiars. The same plenary indulgence is granted by the pope to each exercise of this office as was granted by the Lateran Council to those who secured the Holy Land. "When several persons are to be taken up at the same time, these familiars are commanded to order matters that they may know nothing of one another's being apprehended; and it is related that a father and his three sons and three daughters, who lived together in the same house, were carried prisoners to the Inquisition without knowing anything of one another's being there till seven years afterwards," when those that were alive were released by an *Auto da Fé*. See INQUISITION.

**Familiar Spirit** (כִּזְז, *ob*, a leathern bottle or water-skin, Job xxxii, 19; hence, the conjurer, being regarded as the vessel containing the inspiring demon), a  *necromancer*, or sorcerer who professes to call up the dead by means of incantations, to answer questions (Deut. xviii, 11; 2 Kings xxi, 6; 2 Chron. xxxiii, 6; Lev. xix, 31; xx, 6; 1 Sam. xxviii, 3, 9; Isa. viii, 19; xix, 3). Put also specially for the *python* (Acts xvi, 16) or divining-spirit, by the aid of which such jugglers were supposed to conjure (Lev. xx, 27; 1 Sam. xxviii, 7, 8), and for the *shade* or departed spirit thus evoked (Isa. xxix, 4). See DIVINATION. The term is rendered by the Septuagint ἐγγαστριμβος, "a ventriloquist," but is rather a wizard who asked counsel of his familiar, and gave the responses received from him to others—the name being applied in reference to the spirit or demon that animated the person, and inflated the belly so that it protuberated like the side of a bottle. Or it was applied to the magician, because he was supposed to be inflated by the spirit (δαίμων-ολιπτός), like the ancient Εὐρυκλείς (ἐν ἀλλοτρίᾳ γαστρὶ ἐνέει, Ar. *Vesp.* 1017, *malum spiritum per ventrem nature excipiebat; Schol.* in Ar. *Plut.*). The *ob* of the Hebrews was thus precisely the same as the *python* of the Greeks (Plutarch, *De def. Or.* 414; Cicero, *De div.* i, 19), and was used not only to designate the performer, but the spirit itself, πνεῦμα Πύθωνος, which possessed him (see Levit. xx, 27; 1 Sam. xxviii, 8; also Acts xvi, 16). A more specific denomination of this last term was the *necromancer* (literally *seeker of the dead*, כִּזְזֵי מֵתִים, Deut. xviii, 10; comp. לִזְזֵי מֵתִים, חֲכָמֵי מֵתִים, one who, by frequenting tombs, by inspecting corpses, or, more frequently, by help of the *ob*, like the witch of Endor, pretended to evoke the dead, and bring secrets from the invisible world (Gen. xli, 8; Exod. vii, 11; Lev. xix, 26; Deut. xviii, 10-12). Compare the כִּזְזֵי, *whisperers* ("charmers"), of Isa. xix, 3. But Shuckford, who denies that the Jews in early ages believed in spirits, makes it mean "consulters of dead idols" (*Connect.* ii, 395). These ventriloquists "peeped and muttered" (compare *τροιζειν*, Homer, *Il.* xxiii, 101; "sneak and gibber," Shaksp. *Jul. Cesar*) from the earth to imitate the voice of the revealing "familiar" (Isa. xxix, 4, etc.; 1 Sam. xxviii, 8; Lev. xx, 27; compare *σπρονόματις*, Soph. *Frag.*). Of this

class was the witch of Endor (Josephus, *Ant.* vi, 14, 2), in whose case *intended* imposture may have been overruled into genuine necromancy (Eccles. xlv, 20). On this wide subject, see Chrysostom ad 1 Cor. xii; Tertullian, *adv. Marc.* iv, 25; *De Anima*, p. 57; Augustine, *De doctr. Christ.* § 33; Cicero, *Tusc. Disp.* i, 16, and the commentators on *Æn.* vi; *Critici Sacri*, vi, 331; Le Moyne, *Var. Sacr.* p. 993 sq.; Selden, *De Diis Syr.* i, 2; and, above all, Böttcher, *De Inferis*, p. 101-121, where the research displayed is marvellous. Those who sought inspiration, either from the demons or the spirits of the dead, haunted tombs and caverns (Isa. lxx, 4), and invited the unclean communications by voluntary fasts (Maimon. *De Idol.* ix, 15; Lightfoot, *Hor. Heb.* ad Matt. x, 1). That the supposed *ψυχομαρτία* was often effected by ventriloquism and illusion is certain; for a specimen of this even in modern times, see the *Life of Benvenuto Cellini*. Kitto, s. v.; Smith, s. v. See NECROMANCER.

Closely connected with this form of divination are the two following: (1.) כִּזְזֵי, *che'ber*, a *spell* or enchantment, by means of a cabalistic arrangement of certain words and implements (Deut. xviii, 11; Isa. xlvii, 9, 12), spoken also of serpent-charming (Psa. lviii, 6). See CHARMING; ENCHANTMENT. (2.) Sorcery (either *wizard*, כִּזְזֵי, *knowing* one, Lev. xix, 31; xx, 6; Deut. xviii, 11; 1 Sam. xxviii, 3, 9; spoken also of the imp or spirit of divination by which they were supposed to be attended, Lev. xx, 27; or some form of כִּזְזֵי, *kashaph'*, to act the *witch*, literally by magic incantations, 2 Chron. xxiii, 6; Exod. vii, 11; Deut. xviii, 10; Dan. ii, 2, etc.), which signifies practising divination by means of the black art, with an implied collusion with evil spirits; applied usually to pretending to reveal secrets, to discover things lost, find hidden treasure, and interpret dreams. See WIZARD.

**Familists, Familia Charitātis, Family of Love**, a sect founded in the 16th century by Henry Nicholas, a native of Münster, in Westphalia, who, after residing for some time in Holland, went to England in the latter part of the reign of Edward VI, and there established (1552) his *familia charitatis*, or *Huis des Liefde* (Strype's *Cranmer*, ii, 410). His doctrines have often been confounded with those of David Joris [see JORIS], which they resemble in many respects, and generally with those of the Anabaptists. His followers, however, published a *Confession of Faith* in 1575 (given in Strype, *Annals*, ii, 577), and soon after an *Apology*, in which they attempt to prove the identity of their doctrines with those of the evangelical Confessions. The characteristic feature of this sect was a tendency to mystic contemplation, and the belief that, through love, man could become absolutely absorbed in and identified with God, in a subjective sense. Nicholas represented himself as the apostle of this "service of Love," and it is said went so far as to claim superiority over Christ, on the ground that Moses only preached hope, Christ faith, but he preached love. The sect was accused of denying the divinity of Christ, and of even rejecting the divinity of God himself, in its higher attributes, by maintaining that man would, in this life, become identified with God. They, on the contrary, maintained in their *Apology* their belief in the three general Christian creeds, and particularly in the satisfaction rendered by Christ, while they merely claimed to emulate the state of life exhibited by him. As they looked upon themselves as perfect, they could not acknowledge the need of forgiveness, and stated in their *Apology* that they tried with all the heart to believe and keep the commandments, leaving the rest to God, as the power of so doing could only come from him. They distinguished themselves from the Anabaptists by their recognition of infant baptism, and by their indifference as to the external part of the established worship, which the Anabaptists assailed with es-

pecial violence. Nicholas, who at first kept proselyting quietly, came out more boldly during the reign of Elizabeth, and announced himself as a prophet appointed by the Lord, and anointed by the Holy Spirit. He is said to have been an uneducated man, yet appears to have succeeded in gaining the ear of several theologians and persons of high rank. In 1580 Elizabeth issued a proclamation against the sect, and directed an inquiry to be made into their practices. They seem to have attracted considerable attention at that period, and accusations of all kinds were brought forward against them. Their books were ordered to be burnt in October, 1580. In 1604 they presented a petition to James I, to clear themselves from the imputations laid against them. From this time their numbers diminished, but they were not extinct even as late as 1645. King James I, in his *Barlaamov* *ōpōp*, calls them *infamem anabaptistarum sectam, que familia amoris vocatur*. A person named Etherington was made to recant as a Familist in 1627; but he does not appear to have held precisely the same doctrine as the older Familists. See a curious book by J. R. (John Rogers), entitled *The Displaying of an horrible Sect naming themselves the Family of Love* (Lond. 1579); and Knewstub, *Confutation of monstrous and horrible Heresies taught by H. N.* etc. (Lond. 1579); Mosheim, *Church History*, c. xvi, § iii, pt. ii, § 25; Collier, *Eccles. Hist. of England*, vi, 609; vii, 311; Hardwick, *Reformation*, chap. v.

**Family.** The idea of the family (*oikos*), in Greece, was that of the nucleus of society, or of the state. "Aristotle speaks of it as the foundation of the state, and quotes Hesiod to the effect that the original family consisted of the wife and the laboring ox, which held, as he says, to the poor the position of the slave (*Polit.* i, 1). The complete Greek family, then, consisted of the man, and his wife, and his slave; the two latter, Aristotle says, never having been confounded in the same class by the Greeks, as by the barbarians (*ib.*). In this form, the family was recognised as the model of the monarchy, the earliest, as well as the simplest, form of government. When, by the birth and growth of children, and the death of the father, the original family is broken up into several, the heads of which stand to each other in a co-ordinate rather than a strictly subordinate position, we have in these the prototypes of the more advanced forms of government. Each brother, by becoming the head of a separate family, becomes a member of an aristocracy, or the embodiment of a portion of the sovereign power, as it exists in the separate elements of which a constitutional or a democratic government is composed. But at Rome the idea of the family was still more closely entwined with that of life in the state, and the natural power of the father was taken as the basis not only of the whole political, but of the whole social organization of the people. Among the Romans, as with the Greeks, the family included the slave as well as the wife, and ultimately the children, a fact which, indeed, is indicated by the etymology of the word, which belongs to the same root as *famulus*, a slave. In its widest sense, the *familia* included even the inanimate possessions of the citizen, who, as the head of a house, was his own master (*sui juris*); and Gaius (ii, 102) uses it as synonymous with *patrimonium*. In general, however, it was confined to persons—the wife, children, grandchildren, and great-grandchildren, if such there were, and slaves of a full-blown Roman citizen. Sometimes, too, it signified all those who had sprung from a common stock, and would have been members of the family, and under the potestas of a common ancestor, had he been alive. In this sense, of course, the slaves belonging to the different members of the family were not included in it. It was a family, in short, in the sense in which we speak of 'the royal family,' etc., with this difference, that it was possible for an individual to quit it, and to pass into another by adoption. Sometimes, again, the word

was used with reference to slaves exclusively, and, analogically, to a sect of philosophers, or a body of gladiators." See Smith's *Dictionary of Greek and Roman Antiquities*.

The *Christian* family, on the contrary, is a communion resting on an ethico-religious foundation, and forming the closest of all human relationships. It is a copy of the highest and most perfect union, that of the Church with Christ its head. Christianity, considered as the true (ideal) family, wherein Christ's power begets, through the Word and the Spirit, children of faith unto God, who mutually aid each other with their several spiritual gifts, is imaged in the natural family; imperfectly, indeed, since the life of the Christian family is yet a life in the flesh (Gal. ii, 20); yet truly, because its bond of union is spiritual, being the spirit of Christ. The basis of the Christian family is Christian marriage, or monogamy, the exclusive union of one man to one woman. The deepest ground of this union, and its true aim, without which *Christian* marriage and family are impossible, is the consciousness of unity in Christ, or in the love of God in Christ, the source of individual sympathy, as well as of brotherly and universal love. Marriage has, in common with Christian *friendship*, the bond of tender sentiments; but the former is an *exclusive* bond between two persons of different sexes, whose personality is *complemented*, so to speak, by each other. It is therefore a lifelong relation, while friendship may be only temporary. See MARRIAGE.

Two persons thus joined in marriage lay the foundation of a Christian family; indeed, they constitute a family, though yet incomplete and undeveloped. It awaits its completion in the birth of children. In proportion, however, as the married couple live in a state of holiness, so are the natural desires for issue and their gratification made subservient to the divinely ordered end of the marriage, and accompanied by a sense of dependence on the will and blessing of God. And in order duly to attain this higher end of the family, it is necessary that, keeping the merely carnal passions subordinate, both husband and wife should endeavor to subserve each other's moral and spiritual completeness; and also that they should, when children are born, faithfully help each other in training them properly, by the combination of their particular dispositions, the father's sternness being tempered with the mother's gentleness, and the mother's tenderness energized by the father's authority. The children should see the unity between the father and the mother, in their unity of aim, though manifested according to their different dispositions. Early baptism should be followed by careful religious training. In this the mother has a certain priority, inasmuch as, aside from giving her children birth, she is also first in giving them the bodily and spiritual care they require. Yet even in this early period she derives assistance from the husband, who, as the head of the family, counsels, strengthens, and assists her. In after years their relative shares in the education of the children become more equalized, the sons coming, however, more under the influence of the father, while the daughters remain more under the mother's. Those who wish theirs to be a real Christian family must from the first inculcate on their children (aside from the habit of absolute, unquestioning obedience to the parental authority as divinely instituted) the true ground of obedience, as laid in obedience to God, springing from love to God. "The order in which the love of the child graduates is from the stage of instinctive love to natural affection, and from this to the love of its heavenly Parent. Desirous as the parents may be to lead its affections up at once to the Creator, the previous stages of the path must first be passed through. For a while the maternal care is the only Providence it knows; and the father's experience is to it a world of grand enterprise, and of power unlimited. In vain it strives to

climb the height of his knowledge—his virtual omniscience; nor can it conceive of a diviner guarantee than his promise. To see its parents bend in worship, and to hear them speak with holy awe of their Father in heaven, is itself solemn and suggestive as a ladder set up from earth to heaven. The wise discipline, too, which leads the parent kindly to repress its selfish desires, and constantly to aim at its moral welfare, invariably begets in return the highest order of filial love and confidence; evincing the power of the child to discriminate between instinctive and moral affection, and preparing it to embrace that heavenly Parent of whom the earthly is but an imperfect representation. And let the parents remark that, from the moment they begin to point their child to God as an object of reverence and love, they are pursuing the certain course for augmenting its moral affection for themselves; while its intelligent love for them is a valuable means and a pledge for its ascending to the love of God" (Harris, *Patriarchy, or the Family*, p. 352). This divine liberty, based on fear and love, far from diminishing the respectful love of the children for their parents, will exalt and purify it, and bring it to its highest degree of perfection; it will make it become part of their religion, and whenever a collision may occur between the parental wishes and the will of God, it will lead the children, while obeying the latter, to cherish all possible reverence and respect for the former. By this personal development of their spiritual life the sons and daughters will become *friends* to their parents; a higher kind of trust, such as is felt in one's equals, is thus reached, without diminishing the respect which is the duty of the child and the right of the parents. This is the true graduation of the Christian family life, in which the elder children become helps to the parents for the education of the younger, while at the same time they become more thoroughly fitted to fulfil their own duties as heads of families in after life. Where the blessing of children has been denied, it can in some measure, though not completely, find a substitute in the adoption of orphans or other children, and then the duties towards these are the same as towards one's own.

The Christian family includes also what heathen Rome called the family in a subordinate sense—the *servants*. Their position, wherever the principles of Christian humanity prevail, is not one of slavery, but is a free moral relation, entered into by the consent of both parties, and giving each peculiar rights and duties. The Christian, penetrated with the spirit of his Master, will not lose sight of the fact that this spirit inclined Him much more to serve others than to have them serve Him, and he will not be satisfied by rewarding his servants with wages only, but with all the spiritual blessings of which the family is the proper sphere. They should take part in the family worship, and even an active part, as in reading, singing, praying. The more they come to take part in the life of the family, in its interests, its joys, its griefs, and receive from it the sympathy and help they require, either for the body or the mind, the more does the general family lead a really Christian life.

The entire life of the Christian family is a continuous act of worship in the more extended sense of the word, and must gradually become more and more so, since all its actions are done in the name of Christ and for the glory of God. This thoroughly Christian conduct is, however, sustained and strengthened by the *family worship* in the proper sense, in which the family, as such, seeks for strength in the Word and in the Spirit of God. The more perfectly this family worship is organized, the more will it resemble public worship, consisting, like it, in the reading and expounding of Scripture, singing, and prayer. The leader in the religious exercises of the family should be the father, as priestly head of the house. This, however, is not to exclude the co-operation of the

mother, children, and other members of the family; their participation, on the contrary, adds much to the interest of the service, and makes it an admirable supplement to public worship, as in the family the feeling of trust in each other and of self-dependence add much to liberty in prayer. This constitutes the true hearth of the family, the centre around which all meet again, from whence they derive light and warmth, and whose genial influences will be felt through life. From the bosom of such a family the spirit of Christianity goes out with its healthful influence into the Church, the school, the state, and even the whole world.

See generally the writers on moral philosophy and Christian ethics, and especially Herzog, *Real-Encyclopädie* iv, 318; Rothe, *Theolog. Ethik*, iii, 605; Schaff, *Apostolical Age*, § 111; Harris, *Patriarchy, or the Family* (Lond. 1855, 8vo); Anderson, *Genius and Design of the Domestic Constitution* (Edinb. 1826, 8vo); Thiersch, *Ueber christliches Familienleben* (4th ed. Frankf. 1859; translated into several languages).

**Family, Holy.** One of the most favorite themes of Christian art, from its earliest period in the Catacombs, has been the presentation of scenes from the infancy and childhood of the Saviour. The name "holy family" is given especially to those paintings and sculptures in which the parents, Joseph and Mary, are worshipping the infant Saviour, or are holding him up for the adoration of spectators. In a wider sense, it is also applied to the birth of the Saviour, the adoration of the magi, of the shepherds, and of the mythical three kings, to the flight into Egypt, the finding of Christ in the Temple disputing with the doctors, and all other scenes from the childhood of Christ that are drawn from the gospels. Accessory figures of angels, saints, and of persons contemporary with Christ or with the artist, and sometimes of the artist or the donor of the painting to the church, are often added. (G. F. C.)

**Family of Love.** See FAMILISTS.

**Family prayer.** See FAMILY; PRAYER; WORSHIP.

**Famine** (properly *רָעָב*, *raab'*, *λιμός*, *hunger*, whether of individuals or of nations). "In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the watersheds having few large springs, and the small rivers not being sufficient for the irrigation of even the level lands. If, therefore, the heavy rains of November and December fail, the sustenance of the people is cut off in the parching drought of harvest-time, when the country is almost devoid of moisture. Further, the pastoral tribes rely on the scanty herbage of the desert-plains and valleys for their flocks and herds; for the desert is interspersed in spring-time with spontaneous vegetation, which is the product of the preceding rain-fall, and fails almost totally without it. It is therefore not difficult to conceive the frequent occurrence and severity of famines in ancient times, when the scattered population, rather of a pastoral than an agricultural country, was dependent on natural phenomena which, however regular in their season, occasionally failed, and with them the sustenance of man and beast.

"Egypt, again, owes all its fertility—a fertility that gained for it the striking comparison with the 'garden of the Lord'—to its mighty river, whose annual rise inundates nearly the whole land, and renders its cultivation an easy certainty. But this very bounty of nature has not unfrequently exposed the country to the opposite extreme of drought. With scarcely any rain, and that only on the Mediterranean coast, and with wells only supplied by filtration from the river through a nitrous soil, a failure in the rise of the Nile almost certainly entails a degree of scarcity, although if followed by cool weather, and if only the occurrence of a single year, the labor of the people may in a great

measure avert the calamity. The causes of dearth and famine in Egypt are occasioned by defective inundation, preceded, and accompanied, and followed by prevalent easterly and southerly winds. Both these winds dry up the earth, and the latter, keeping back the rain-clouds from the north, are perhaps the chief cause of the defective inundation, as they are also by their accelerating the current of the river—the northerly winds producing the contrary effects. Famines in Egypt and Palestine seem to be affected by drought extending from northern Syria, through the meridian of Egypt, as far as the highlands of Abyssinia.

“It may be said of the ancient world generally that it was subject to periodical returns of dearth, often amounting in particular districts to famine, greatly beyond what is usually experienced in modern times. Various causes of a merely natural and economical kind contributed to this, apart from strictly moral considerations. Among these causes may more especially be mentioned the imperfect knowledge of agriculture which prevailed, in consequence of which men had few resources to stimulate, or in unfavorable seasons and localities to aid, the productive powers of nature; the defective means of transit, rendering it often impossible to relieve the wants of one region, even when plenty existed at no great distance in another; the despotic governments, which to so great an extent checked the free development of human energy and skill; and the frequent wars and desolations, in a great degree also the result of those despotic governments, which both interrupted the labors of the field and afterwards wasted its fruits. Depending, as every returning harvest does, upon the meeting of many conditions in the soil and climate, which necessarily vary from season to season, it was inevitable that times of scarcity should be ever and anon occurring in particular regions of the world; and from the disadvantages now referred to, under which the world in more remote times labored, it was equally inevitable that such times should often result in all the horrors of famine” (Smith, s. v.).

The Scriptures record several famines in Palestine and the neighboring countries. The first occurs in Gen. xii, 10, which is described as so grievous as to compel Abraham to quit Canaan for Egypt (Gen. xxvi, 1). Another occurred in the days of Isaac, which was the cause of his removal from Canaan to Gerar (Gen. xxvi, 17). The most remarkable one was that of seven years in Egypt, while Joseph was governor. It was distinguished for its duration, extent, and severity, particularly as Egypt is one of the countries least subject to such a calamity, by reason of its general fertility. The ordinary cause of famine in Egypt is connected with the annual overflow of the Nile. But it would appear that more than local causes were in operation in the case noticed in Gen. xli, 30, for it is said that “the famine was sore in all lands,” that “the famine was over all the face of the earth.” By the foresight and wisdom of Joseph, however, provision had been made in Egypt during the seven preceding years of plenty, so that the people of other parts sought and received supplies in Egypt—“all countries came into Egypt to buy corn.” Among other lands, Canaan suffered from the famine, which was the immediate occasion of Jacob sending his sons down into Egypt, and of the settlement in that land of the descendants of Abraham; an event of the highest consequence in the sequel, and serving to illustrate the benignity and wisdom of divine Providence in bringing there a band of shepherds to prepare and qualify them for becoming ultimately the founders of the Hebrew nation.

The fruitfulness of Egypt depends upon the inundations of the Nile; but these are occasioned by the tropical rains which fall upon the Abyssinian mountains. These rains depend upon climatic laws of wide extent and great regularity. Yet there is scarcely a land on the earth in which famine has raged so often and so

terribly as in Egypt, or a land that so very much needs the measures which Joseph adopted for the preservation of the people. The swelling of the Nile a few feet above or below what is necessary proves alike destructive. Particular instances of famine which history has handed down to us are truly horrible, and the accounts of them are worthy of notice also, inasmuch as they present the services of Joseph in behalf of Egypt in their true light. Abdollatif relates thus: “In the year 596 (A.D. 1199), the height of the flood was small almost without example. The consequence was a terrible famine, accompanied by indescribable enormities. Parents consumed their children; human flesh was, in fact, a very common article of food; they contrived various ways of preparing it. They spoke of it and heard it spoken of as an indifferent affair. Men-catching became a regular business. The greater part of the population were swept away by death. In the following year, also, the inundation did not reach the proper height, and only the lowlands were overflowed. Also much of that which was inundated could not be sown for want of laborers and seed; much was destroyed by worms which devoured the seed-corn; also of the seed which escaped this destruction, a great part produced only meagre shoots which perished.” (See the account of this famine translated in the *Am. Bibl. Repos.* 1822, p. 659 sq.) Compare with this account the “thin ears and blasted with the east wind” (Gen. xli, 6). “Of the horrors in this second year’s famine, the year of the Flight, 597 (A.D. 1200), Abdollatif, who was an eye-witness, likewise gives a most interesting account, stating that the people throughout the country were driven to the last extremities, eating offal, and even their own dead, and mentions, as an instance of the dire straits to which they were driven, that persons who were burnt alive for eating human flesh were themselves, thus ready roasted, eaten by others. Multitudes fled the country, only to perish in the desert-rot to Palestine.

“But the most remarkable famine was that of the reign of the Fâtîmi Khalîfeh, El-Mustansîr billâh, which is the only instance on record of one of seven years’ duration in Egypt since the time of Joseph (A. H. 457–464, A. D. 1064–1071). This famine exceeded in severity all others of modern times, and was aggravated by the anarchy which then ravaged the country. Vehement drought and pestilence (says Es-Suyûtî, in his *Isbn el-Mohâdarah*, MS.) continued for seven consecutive years, so that they [the people] ate corpses, and animals that died of themselves; the cattle perished; a dog was sold for 5 dinârs, and a cat for 3 dinârs . . . and an ardebb (about 5 bushels) of wheat for 100 dinârs, and then it failed altogether. He adds that all the horses of the Khalîfeh, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organized bands of kidnappers who infested Cairo, and caught passengers in the streets by ropes furnished with hooks and let down from the houses. This account is confirmed by El-Makrizî (in his *Khât*; Quatremère has translated the account of this famine in the life of El-Mustansîr, contained in his *Mémoires Géographiques et Historiques sur l’Égypte*), from whom we further learn that the family, and even the women of the Khalîfeh fled, by the way of Syria, on foot, to escape the peril that threatened all ranks of the population. The whole narrative is worthy of attention, since it contains a parallel to the duration of the famine of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 Kings viii, 1, 2, affords another instance of one of seven years: ‘Then spake Elisha unto the woman whose son he had restored to life, saying, Arise, and go thou and thy household, and sojourn wheresoever thou canst sojourn: for the Lord hath called for a famine; and it shall also

come upon the land seven years. And the woman arose, and did after the saying of the man of God: and she went with her household, and sojourned in the land of the Philistines seven years." Bunsen (*Egypt's Place*, etc., ii, 334) quotes the record of a famine in the reign of Sesertesen I, which he supposes to be that of Joseph; but it must be observed that the instance in point is expressly stated not to have extended over the whole land, and is at least equally likely, apart from chronological reasons, to have been that of Abraham.

"In Arabia, famines are of frequent occurrence. The Arabs, in such cases, when they could not afford to slaughter their camels, used to bleed them and drink the blood, or mix it with the shorn fur, making a kind of black pudding. They ate also various plants and grains, which at other times were not used as articles of food. Thus the tribe of Hanifeh were taunted with having in a famine eaten their god, which consisted of a dish of dates mashed up with clarified butter and a preparation of dried curds of milk (*Sihâh*, MS.," (Smith, s. v.).

Famine is likewise a natural result, in the East, when caterpillars, locusts, or other insects destroy the produce of the earth. The prophet Joel compares locusts to a numerous and terrible army ravaging the land (ch. i). Famine was also an effect of God's anger (2 Kings viii, 1, 2). The prophets frequently threaten Israel with the sword of famine, or with war and famine, evils that frequently go together. Amos threatens another sort of famine: "I will send a famine in the land, not a famine of bread, nor a thirst for water, but of hearing the words of the Lord" (Amos viii, 11). In ancient times, owing to the imperfect modes of warfare in use, besieged cities were more frequently reduced by famine than by any other means, and the persons shut up were often reduced to the necessity of devouring not only unclean animals, but also human flesh (compare Dent. xxviii, 22-42; 2 Sam. xxi, 1; 2 Kings vi, 25-28; xxv, 3; Jer. xiv, 15; xix, 9; xlii, 17; Ezek. v, 10-12, 16; vi, 12; vii, 15).

The famine predicted by Agabus (Acts xi, 28) was the same with that which is related by Josephus (*Ant.* xx, 2, 6) as having taken place in the fourth year of Claudius, and affected especially the province of Judæa. (See Kuhnöl, *Comment. proleg.*) See DEARTH.

**FAN** (פָּנֵה, *mizreh*, πῦρον), a *winnnowing-shovel*, with which grain was thrown up against the wind, in order to cleanse it from the broken straw and chaff (Isa. xxx, 24; Jer. xv, 7; Matt. iii, 12; Luke iii, 17). See AGRICULTURE. At the present day, in Syria, the instrument used is a large wooden fork. (See Robinson's *Researches*, ii, 277, 371; Smith's *Dict. of Class. Antiq.* s. v. Pala). Both kinds of instruments are delineated on the Egyptian monuments (Wilkinson, ii, 40-46). See WINNOWER.

**Fanaticism.** (1.) The ancients primarily gave the name of *fanatici* to those who uttered oracular announcements, or exhibited wild antics and gestures under the (supposed) inspiration of some divinity whose temples (*fiava*) they frequented. The heathen *vates*, who pretended to prophesy under the guidance of an indwelling spirit (*aijwov*), was called by the Greek writers *ἑνθεος*, and by the Latins *fanaticus* (see Suidas, s. v. *ἑνθεος*; Bingham, *Orig. Eccles.* xvi, v, 4). Thence the name was transferred to persons actuated by a frantic zeal in religion.

(2.) The word is sometimes improperly used to stigmatize such Christians as are "zealously affected in a good thing" (Gal. iv, 18). Its only legitimate application is to such as add to enthusiasm and zeal for the cause which they believe to be the cause of truth a hatred of those who are opposed to them, whether in politics, philosophy, or religion. Isaac Taylor, speaking of religious fanaticism, remarks that, "after rejecting from account that opprobrious sense of the word

fanaticism which the virulent calumniator of religion and of the religious assigns to it, it will be found, as we believe, that the elementary idea attaching to the term in its manifold application is that of *jeñtious fervor* in religion, rendered turbulent, morose, or raucorous by junction with some one or more of the unsocial emotions. Or, if a definition as brief as possible were demanded, we should say that fanaticism is enthusiasm inflamed by hatred." He classifies the chief varieties of fanaticism "under four designations, of which the first will comprehend all instances wherein malignant religious sentiments turn inward upon the unhappy subject of them; to the second class will belong that more virulent sort of fanaticism which looks abroad for its victims; the third embraces the combination of intemperate religious zeal with military sentiments, or with national pride and the love of power; to the fourth class must be reserved all instances of the more intellectual kind, and which stand connected with opinion and dogma. Our first sort, then, is austere, the second cruel, the third ambitious, and the fourth factious. Or, for the purpose of fixing a characteristic mark upon each of our classes as above named, let it be permitted us to entitle them as follows—namely, the *first*, the fanaticism of the scourge, or of personal infliction; the *second*, the fanaticism of the brand, or of immolation and cruelty; the *third*, the fanaticism of the banner, or of ambition and conquest; and the *fourth*, the fanaticism of the symbol, or of creeds, dogmatism, and ecclesiastical virulence" (*Fanaticism*, New York, 1834, 12mo, p. 62).

The fanatic begins by rejecting the light of reason to abandon himself to the dictates of his fancy. He generally adopts some single and exclusive idea, which destroys the proper balance of his mind. This absorbing idea may have a germ of truth in it, but the fanatic will not recognise it, if in another form, in others: he cannot admit that truth which has taken a certain shape for him may have taken another in the eye of his neighbor without ceasing to be the truth. He thus becomes exclusive, malevolent, and prone to persecution. The hatred of blood relations is more intense and fierce than that between strangers, and so the fanatic is all the more fierce and tyrannical against others in proportion as their views approach his own, without being identically the same. He will undergo any suffering rather than abate one jot of his claims, or retreat one step for the sake of charity and union. He prefers darkness to light, the letter to the spirit, hatred to love, the wildness of passion to the calmness of inquiry. Fanaticism may show itself in all the relations of life, but its special field is found in politics and religion; and it becomes most dangerous when the two are combined. Being entirely one-sided, it is yet liable to go in the most opposite directions, and then goes all lengths. Thus we have in politics fanatics of peace, who want peace at any cost, and under all circumstances; fanatics of unrest, who believe only in the overthrow of existing institutions; fanatics of progress, who think anything good if it is only new; and fanatics of the past, or conservatives, who wish to hold fast whatever is, no matter how bad it is; fanatics of liberty, who, however, require others to view liberty in the same light as they do, or else deny it to them; and fanatics of despotism, who would wish all hearts to beat in unison, like so many well-regulated clocks. We find cosmopolitan fanatics, who glory in reviving their own country, and patriotic fanatics, who consider all other nations but their own as barbarians; and heathens; fanatics of rationalism, who consider every opponent a blockhead, and fanatics of orthodoxy, who think the pope requires only might to make him perfect, and who pray for the re-establishment of the Inquisition and the stake. Fanaticism has left especially sad records of its excesses in the religious history of the world, not only among the heathen in India, the Moslems and the Jews, but also among Chris-

tians. It caused the bloody encounters of the monks of Constantinople at the time of the controversy between the Eutychians and the Nestorians. It evened out the quarrels of the Montanists and the Donatists. It persecuted the Jews in the Middle Ages. It organized the Inquisition, developed the method of the *cogite intrare* (Luke xiv, 23), and invented a new sense for the words in Tit. iii, 10 (hæreticum de vita!); it instigated the crusade against the Albigenses, who, when they were indiscriminately massacred, were comforted with the assurance that "the Lord would know his own;" it aimed the dagger in the hands of Ravallac against the breast of his king; it inspired the *Te Deum* of Gregory XIII as a thanksgiving for the massacre of St. Bartholomew's. In the Protestant world we find fanaticism in the Anabaptists of Münster, in the Crypto-calvinistic troubles, and in the wars of the Cavaliers and Roundheads of England (Beck, in Herzog, *Real-Encyclop.* iv, 327 sq.). "Fanaticism is the most incurable of all mental diseases, because in all its forms—religious, philosophical, or political—it is distinguished by a sort of mad contempt for experience, which alone can correct errors of practical judgments" (Mackintosh, *Works*, London, 1851, ii, 671). See also Stillingfleet, *Works*, v, 19, 92, 130; Fletcher, *Works* (N. Y. ed.), iv, 233 sq.

**Fanino** or **Fannio**, FAVENTINO, a native of Faenza, in Italy, one of the first martyrs of the Reformation in Italy. The Scriptures in Italian (probably Bruccioli's version, 1532) fell into his hands, and he soon began to speak of the truth to his neighbors. When the ecclesiastical authorities heard of his course they arrested and imprisoned him. His wife and family came to him with entreaties and tears when first apprehended, and he yielded to their persuasions to gain his release from prison by recantation. Under the bitter reproaches of conscience he soon determined to confess Christ openly, and he went publicly through Romagna preaching the Reformed doctrines. He was arrested at Bagna Cavallo, and condemned to the stake. He was removed to Ferrara, where, for eighteen months, persuasion, promises, and tortures were used in vain to induce him to recant. Soon after the accession of pope Julius III a brief was issued for the execution of Fanino. He embraced the messenger, saying, "I accept death joyfully for Christ's sake." Being urged to recant for the sake of his wife and children, whom he was about to leave without a protector, he replied, "I have recommended them to the care of the best of guardians." "What guardian?" "Jesus Christ! I think I could not commit them to the care of a better." He was ironed, and led out to execution; and on the way, being reproached by his enemies for his cheerfulness, when Christ was exceeding sorrowful at the approach of death, he answered, "Christ sustained all manner of pangs and conflicts with death and hell on our account, and by his sufferings freed those who really believe in him from the fear of them." He was strangled at dawn, and his body was burned at noon, in September, 1550.—Young, *Life of Aonio Palærio* (1860, ii, 111); McCrie, *Reformation in Italy*, ch. v.

**Fannio.** See FANINO.

**Fan-tracery Vaulting**, "a kind of vaulting used chiefly in late perpendicular work, in which all the ribs that rise from the springing of the vault have the same curve, and diverge equally in every direction, producing an effect something like that of the bones of a fan. This kind of vaulting admits of considerable variety in the subordinate parts, but the general effect

of the leading features is more nearly uniform. It is very frequently used over tombs, chantry chapels, and other small erections, and fine examples on a larger scale exist at Henry the Seventh's Chapel; St. George's Chapel, Windsor; King's College Chapel, Cambridge, etc., in England.—Parker, *Concise Glossary of Architecture*, s. v.

**Farel**, GUILLAUME, one of the boldest pioneers of the Reformation in Switzerland and France, was born near Gap, in Dauphiny, in 1489. He studied at Paris with great success, and was for some time teacher in the college of cardinal Le Moine, to which post he was recommended by Lefèvre d'Étaples. See FABER STAPULENSIS. At this period of his life he had no personal religious convictions; but yet, while devoured with a love of letters, he was zealous in the service of the Roman Catholic Church. But he was led, under the influence of Lefèvre, to the study of the Scriptures. About 1521 he went to Meaux, at the invitation of Lefèvre, and the bishop (Brignonet, q. v.) gave him authority to preach. His mind was now fixed substantially in the Reformed doctrine, and he preached, perhaps, with more zeal than discretion; and in 1523, Brignonet, now becoming timid, sent away the ardent young preacher. He soon found it best to retire to Switzerland. At Basel, Feb. 15, 1524, he sustained publicly thirteen theses on the chief points in controversy (*Thematæ quadam Latine et Germanice propositæ*, Basel, 1528). During his few months' stay at Basel he visited some of the Swiss cities, and made friends of Myconius, Haller, and Zwingle. At Basel, Œcolampadius was his warm friend, admiring his zeal and energy, but, at the same time, not unaware of his lack of discretion. Farel was soon involved in a dispute with Erasmus, whose "trimming" tendency was just the opposite of his own ardent and decided nature. He compared Erasmus to Balaam; but the scholar soon proved too strong for the young reformer, who was compelled to leave Basel. In one of his later letters, Erasmus says of him (*Epist.* p. 798, ed. Lond.): "You have in your neighborhood the new evangelist Farel, than whom I never saw a man more false, more virulent, more seditious." But the abuse of Erasmus could not, in the long run, injure Farel. Towards the end of March, 1524, Farel went to Strasburg, where he made the friendship of Bucer and Capito. Under the direction of Œcolampadius, he went to serve a newly-formed society at Montbéliard. Here he preached successfully, but yet with great violence. Once, on a procession day, he pulled out of the priest's hand the image of St. Anthony, and threw it from a bridge into the river; he narrowly escaped being torn to pieces by the mob. His friends became alarmed, and Œcolampadius censured him for his imprudence (see *Correspondance des Réformateurs*, Paris, 1866, i, 265). Leaving Montbéliard in the spring of 1525, he spent a short time at Basel, and the next year partly in Alsace and partly in Switzerland. In 1527 he went to Aigle, and in 1528, when Berne became Protestant, he extended his labors to all the territory connected with Berne. Under his labors, Aigle and Bex became Protestant in 1528-9; Morat and Neufchâtel in 1530; Orbe in 1531. His labors during these years were not only vast, but perilous; but the government of Berne gave him strong and steady support. In 1531 he was sent as a deputation (with A. Saunier) to the Waldensian Synod at Angrogne. He always retained great influence among the Waldensers.

In 1532, on his return from the Waldensian meeting, he came to Geneva, then full of religious strife. His first preaching was private, but it was too successful to be kept secret; and he was summoned before the episcopal council, at the time trembling for its authority, and therefore the more likely to be severe. The meeting with the council was a scene of bitter recriminations, and when Farel was leaving it a gun was fired at him. He coolly remarked, "Your shots

do not terrify me." But he was forced to quit Geneva for the time, and sent Fiomont and Olivetan to continue the work there. In 1533 he returned to Geneva, where the Reformation was gaining ground. Farel's situation here was full of trial and peril, but his courage and devotion admirably fitted him for his task. The triumph came Aug. 27, 1535, when the city council, by an edict, formally proclaimed the adhesion of Geneva to the Reformation. Farel was full of toil and anxiety in organizing the Reformed discipline and worship, in which he was assisted especially by Viret (q. v.). In 1536, Calvin stopped at Geneva to visit the Reformers. Farel urged him to stay, and, on Calvin's refusal, thus addressed him: "I declare, in the name of God, that if you do not assist us in this work of the Lord, the Lord will punish you for following your own interest rather than his call." Calvin, struck with this denunciation, submitted, and was appointed preacher and professor. See CALVIN. From that time on Farel's labors were closely united with those of Calvin. The confession of faith drawn up by Farel, with Calvin's counsel, was approved by the people in July, 1537. The same year the Council of Geneva conferred on Farel the honor of a Burgess of the city, in token of their respect and gratitude. But the popular will was not prepared for the severe discipline of the Reformers, and in a short time the people, under the direction of a faction, met in a public assembly and expelled Farel and Calvin from the place (April, 1538). Farel went to Neufchâtel, where the Church was in a state of disorder, in consequence of the troubles occasioned by the severity of the Reformed discipline. He dealt with offenders severely; even a lady of noble birth did not escape. She had left her husband; Farel urged her to return to him, and on her refusal rebuked the scandal and its authors publicly from the pulpit. A great strife arose, and the people were on the point of expelling Farel; but at last his energy overcame the factions party, and the council by vote, in 1542, proclaimed his triumph. In that year he returned to Geneva, and went thence to Metz, to organize the Reformed Church. He preached first in the Dominican cemetery, amid the ringing of the convent bells purposely to drown his voice. Thousands afterwards flocked to hear him. Once, when a Franciscan was preaching Mariolatry, Farel contradicted him, and nearly fell a victim to the fury of the mob, especially of the women. On Oct. 2, 1542, the city council forbade his preaching in the city, and he retired to the neighboring town of Montigny, and afterwards to Gorze, where the count of Furstenberg took him and his friends under his protection. On March 25, 1543, an armed band fell upon the evangelists while celebrating the Easter communion. Many were killed and wounded; among the latter was Farel, who took refuge in the castle. He escaped in disguise, and went to Strasburg, where he remained a few months. He then visited his old friends in Neufchâtel and Geneva. Here he approved the execution of Servetus (q. v.). In 1557 he was sent, with Beza, to the Protestant princes of Germany, to implore their aid for the Waldenses, and on his return he went to preach the Reformation among the Jura Mountains. At sixty-nine he married a young wife, very much to Calvin's disgust, who spoke of him under the circumstances as *our poor brother* (pôvre frère). In 1560 he visited his native Dauphny, established a Reformed Church at Grenoble, and passed several months at Gap, preaching against Rome with all the vehemence of his youth. On Nov. 24, 1561, he was thrown into prison, but was rescued by his friends, who took him from the rampart in a basket. In 1561 he paid a visit to the dying Calvin, and then passed some months with his old flock at Metz. He returned to Neufchâtel worn out with fatigue, and died there Sept. 13, 1565.

Farel was an ardent, impulsive man, a missionary rather than an organizer, an iconoclast rather than a

theologian. His gifts admirably supplemented those of Calvin. Beza (*Life of Calvin*) says of Farel that in his preaching "he excelled in a certain sublimity, so that none could hear his thunders without trembling." Among his writings are *Sommaire; brève déclaration d'aillieurs lieux fort nécessaires a un chacun Chrétien*, etc. (many editions; reprinted in 1865, along with *Du vray usage*: see below);—*De Oratione Dominica* (1524, 8vo), afterwards in French, enlarged (Genev. 1543, 12mo);—*Traité du Purgatoire* (1543, 12mo);—*La Gloire de l'Esprit* (against Libertines; Genev. 1550);—*Du vray usage de la croix de J. C.* (Genev. 1560, 8vo; new ed., with other letters and writings of Farel, Neufchâtel, 1865, 8vo);—*Traité de la Cène* (1555). There are several lives of Farel: Ancillon, *Vie de Guill. Farel* (Amst. 1691); Kirchofer, *Leben Farel's* (Zurich, 1833, 2 vols.); translated, Kirchofer's *Life of Farel* (Lond. 1837, sm. 8vo); Blackburn, *Life of Farel* (Phila. Presb. Board). See also Schmidt, *Études sur Farel* (Strasb. 1834); Haag, *La France Protestante*, vol. iv.; Bayle, *Dictionnaire*, s. v.; Hofer, *Nouv. Biog. Générale*, xvii, 103; *Correspondence des Réformateurs dans les Pays de langue Française* (Paris, 1866, tom. i).

**Farfa**, one of the three most celebrated Italian monasteries of the Middle Ages (Montecassino, Nonantola, and Farfa), situated on the little river Farfa, in Central Italy. It was in existence before the invasion of the Langobardians, by whom it was destroyed, together with a number of other monasteries. It was re-established in 681 by the priest Thomas of Maurienna, who, on his return from the Holy Land, came to Farfa. It soon became celebrated, and received numerous presents and privileges from popes and kings. The monastery was so strongly fortified that abbot Peter, at the close of the 9th century, was able for nine years to resist a siege by the Saracens, though he was finally compelled to depart with the monks and the treasures of the monastery. Having remained abandoned and desolate for 48 years, it was re-established about the middle of the 10th century by king Hugo, but it afterwards became the seat of frightful disorders. Several abbots were assassinated and poisoned; and the monks, without restraint and disguise, defied all the laws of the Church and the state. At the beginning of the 11th century a stop was put to these disorders, and the reformation of Clugny was carried through at Farfa. Since then the history of the monastery presents no points of special interest. A work of considerable importance for the history of Italy, called after the monastery, *Chronicon Farfense*, was compiled at the close of the 11th century by Gregory, a monk and librarian of Farfa (died 1100). After many vicissitudes, the monastery is still in existence.—Wetzer und Welte, *Kirchen-Lex.* iii, 904. (A. J. S.)

**Farindon**, ANTHONY, an eminent divine of the Church of England, was born at Sunning, in Berkshire, England, in 1596; was admitted scholar of Trinity College, in Oxford, in 1612, and was elected fellow in 1617. He took his M.A. degree in 1620, and, entering into holy orders, he became a tutor in his college. In 1624, being then B.D., he was called to be vicar of Bray, in Berkshire, and soon was made divinity-reader in the king's chapel at Windsor. During the Civil War he was ejected for conformity to the Church of England, and was reduced to such extremities as to be very near starving. Sir John Robinson, alderman of London, and some of the parishioners of Milk Street, London, invited him to be pastor of St. Mary Magdalen there, "which invitation he gladly accepted, and preached to the great liking of the royal party. In the year 1657 he published a folio volume of these sermons, and dedicated them to his kind patron Robinson, 'as a witness or manifesto,' says he to him, 'of my deep apprehension of your many noble favors, and great charity to me and mine, when the sharpness of the weather and the roughness of the times had blown

all from us, and well-nigh left us naked." He died at his house in Milk Street in September, 1658. Three posthumous volumes of his sermons (folio) were published (1658-1673) in 1663, a second folio volume of his sermons containing forty, and a third in 1673 containing fifty. He also left in manuscript several memorials of the life of Hales (q. v.) of Eton, his intimate friend. A new edition of his *Sermons, with a Life of the Author* by F. Jackson, appeared in London in 1849 (3 vols. 8vo). They afford a "fine specimen of sterling English, and of rich and varied cloquence." See Wood, *Atheue Oxonienses*; Hook, *Ecclesiastical Biography*, v, 57; Jackson, *Life of Fariudon*, prefixed to the new edition of his sermons.

**Fariissol or Peritzol**, ABRAHAM BEN-MORDECAI, a French Rabbi, distinguished alike in geography, polemics, and exegesis, was born at Avignon about the middle of the 15th century. In 1472 he went to Ferrara as minister to a Jewish congregation, and while there gave most of his time and attention to the study of the sacred writings. He published in 1500 a commentary on the Pentateuch, entitled פְּרִיִּשׁ שֵׁנִי (the flower of lilies), which, according to De Rossi, was begun in 1468. Next followed an apologetic and polemic work, מִגְן אַבְרָהָם (the shield of Abraham), consisting of three parts, of which the first is an apology for Judaism, the second an attack on Mohammedanism, and the third against Christianity. About 1517 he published a scholarly commentary on Job, אֲבוֹתֵינוּ בְּלִי אֲרִיב, printed in the Venetian Rabbinical Bible (1517, fol.), and in the Amsterdam Rabbinical Bible (edited by Frankfurter, 1727-1728). In 1524 he published his famous cosmography, אֲרִיבֵי הָעוֹלָם, Itinera Mundi (Venice, 1587, 8vo, very rare; reprinted Offenbach, 1720; and again with a Latin translation and elaborate notes by the English Orientalist, Thomas Hyde, Oxford, 1691). In this last-named work Fariissol describes the abodes of the ten tribes, the Sambation [Eldad], and the garden of Eden, which he places in the mountains of Nubia (ch. xviii and xxx). A year later Fariissol completed a Commentary on the book of Ecclesiastes, פְּרִיִּשׁ סֵפֶר, which has, however, never been printed. He died about the end of 1528, shortly after his return to Avignon.—Jost, *Gesch. des Judenthums u. s. Sekten*, iii, 122; Etheridge, *Introd. to Heb. Liter.*, p. 453; Hoefler, *Nouv. Etog. Générale*, xxxix, 614; Kitto, *Cyclopædia*, ii, 4; Fürst, *Bib. Jud.* i, 276. (J. H. W.)

**Farm** (ἀγρός, elsewhere usually rendered "field"), a plot of arable land (Matt. xxii, 5). Moses, following the example of the Egyptians, made agriculture the basis of the Hebrew state. He accordingly apportioned to every Hebrew a certain quantity of land, and gave him the right of tilling it himself, and of transmitting it to his heirs (Num. xxvi, 33-54). This equal distribution of the soil was the basis of the Hebrew agrarian law. As in Egypt the lands all belonged to the king, and the husbandmen were not the proprietors of the fields which they cultivated, but farmers or tenants who were obliged to give to the king one fifth of their produce (Gen. xlvii, 20-25), just so Moses represents Jehovah as the sole possessor of the soil of the Promised Land, in which he was about to place the Hebrews by his special providence; and this land they held independent of all temporal superiors, by direct tenure from Jehovah their king (Lev. xxv, 23). Moses further enacted that for the land the Hebrews should pay a kind of quit-rent to Jehovah, the sovereign proprietor, in the form of a tenth or tithe of the produce, which was assigned to the priesthood. The condition of military service was also attached to the land, as it appears that every freeholder was obliged to attend the general muster of the national army, and (with few exceptions, Deut. xx, 5-9)

to serve in it, at his own expense, as long as the occasion required. The Hebrews appear to have acquired in Egypt considerable knowledge of agriculture; but the physical circumstances of the land of Canaan were in many respects essentially different, as it was not a land rarely refreshed with rain as Egypt (Deut. xi, 10-15). The Hebrews, notwithstanding the richness of the soil, endeavored to increase its fertility in various ways. In order to avert the aridity which the summer droughts occasioned, they watered the soil by means of aqueducts communicating with the brooks, and thereby imparted to their fields a garden-like verdure (Psa. i, 3; lxxv, 10; Prov. xxi, 1; Isa. xxxii, 2, 20). In the hilly part of the country terrace cultivation was practised, so that the hills otherwise barren were rendered fertile (Deut. xi, 11; Psa. lxxii, 16; civ, 10; Isa. xxx, 25). With the use of manure the Hebrews were undoubtedly acquainted: and that the soil might not be exhausted, it was ordered that every seventh and every fiftieth year the whole land should lie fallow. The dung, the carcasses, and the blood of animals were used to enrich the soil (2 Kings ix, 37; Psa. lxxiii, 10; viii, 2; Jer. ix, 22). Salt, either by itself, or mixed in the dunghill in order to promote putrefaction, is specially mentioned as a compost (Matt. v, 13; Luke xiv, 34, 35). The soil was enriched, also, by means of ashes, to which the straw, stubble, husks of corn, brambles, grass, etc., that overspread the land during the fallow or sabbatical year, were reduced by fire. The burning over the surface of the land had also the good effect of destroying the seeds of noxious herbs (Prov. xxiv, 31; Isa. xxx, 25). The soil of Palestine is very fruitful, if the dews of spring, and the rains of autumn and winter are not withheld. "Nevertheless," observes Hengstenberg, "it is to be considered that the Canaan of which Moses speaks is in a manner an ideal land. It was never what it might have been, since the bond of allegiance, in consequence of which God had promised to give the land its rain in its season, was always far from being perfectly complied with." Among the Hebrews the occupation of the husbandman was held in high honor, and even distinguished men disdained not to put their hands to the plough (1 Sam. xi, 5-7; 1 Kings xix, 19; 2 Chron. xxvi, 10). The esteem in which agriculture was held diminished as luxury increased, but it never wholly ceased; even after the exile, when many of the Jews had become merchants and mechanics, the esteem and honor attached to this occupation still continued, especially under the dynasty of the Persians, who were agriculturists from religious motives. See LAND.

In ancient Egypt, the peasants or husbandmen, like the modern *fellahs* of the same country, seem to have formed a distinct class, if not caste, of society (Wilkinson, *Anc. Egypt.* ii, 1, 2). The government did not interfere directly with the peasants respecting the nature of the produce they intended to cultivate, and the vexations of later times were unknown under the Pharaohs. They were thought to have the best opportunities of obtaining, from actual observation, an accurate knowledge on all subjects connected with husbandry; and, as Diodorus observes, "being from their infancy brought up to agricultural pursuits, they far excelled the husbandmen of other countries, and had become acquainted with the capabilities of the land, the mode of irrigation, the exact season for sowing and reaping, as well as all the most useful secrets connected with the harvest, which they had derived from their ancestors, and had improved by their own experience." "They rented," says the same historian, "the arable lands belonging to the kings, the priests, and the military class, for a small sum, and employed their whole time in the tillage of their farms;" and the laborers who cultivated land for the rich peasant, or other landed proprietors, were superintended by the steward or owner of the estate, who had authority over them, and

the power of condemning delinquents to the bastinado. This is shown by the paintings of the tombs, which frequently represent a person of consequence inspecting the tillage of the field, either seated in a chariot, walking, or leaning on his staff, accompanied by a fa-

Ancient Egyptian Farming.

Fig. 1, the overseer; 2, his chariot, in charge of a driver; 6, breaking up the ground; 4, 5, sowing; 3, ploughing in.

vorite dog. To one officer were intrusted the affairs of the house, answering to "the ruler," "overseer," or "steward of Joseph's house" (Gen. xxxix, 5; xliii, 16, 19; xlv, 1); others "superintended the granaries," the vineyard (comp. Matt. xx, 8), or the culture of the fields; and the extent of their duties, or the number of those employed, depended on the quantity of land, or the will of its owner.

At the present day the lower orders in Egypt, with the exception of a very small proportion, chiefly residing in the large towns, consist of fellâhin (or agriculturists). Most of those in the great towns, and a few in the smaller towns and some of the villages, are petty tradesmen or artificers, or obtain their livelihood as servants, or by various labors. In all cases their earnings are very small; barely sufficient, in general, and sometimes insufficient, to supply them and their families with the cheapest necessaries of life. Their food chiefly consists of bread (made of millet or of maize), milk, new cheese, eggs, small salted fish, cucumbers and melons, and gourds of a great variety of kinds, onions and leeks, beans, chick-peas, lupins, the fruit of the black egg-plant, lentils, etc., dates (both fresh and dried), and pickles. Most of the vegetables they eat in a crude state. When the maize (or Indian corn) is nearly ripe, many ears of it are plucked, and toasted or baked, and eaten thus by the peasants. Rice is too dear to be an article of common food for the fellâhin, and flesh-meat they very seldom taste. It is surprising to observe how simple and poor is the diet of the Egyptian peasantry, and yet how robust and healthy most of them are, and how severe is the labor which they can undergo (see Lane, *Mol. Egypt.* ch. vii).

Dr. Thomson thus describes the modern lower class of farmers in Palestine (*Land and Book*, i, 531 sq.): "These farmers about us belong to el-Mughhar, and their land extends to the declivity immediately above Gennesaret, a distance of at least eight miles from their village. Our farmers would think it hard to travel so far before they began the day's work, and so would these if they had it to do every day; but they drive their oxen before them, carry bed, bedding, and board, plow, yoke, and seed on their donkeys, and expect to remain out in the open country until their task is accomplished. The mildness of the climate enables them to do so without inconvenience or injury. How very different from the habits of Western farmers! These men carry no cooking apparatus, and, we should think, no provisions. They, however, have a quantity of their thin, tough bread, a few olives, and perhaps a little cheese in that leathern bag which hangs from their shoulders—the 'scrip' of the New Testament—and with this they are contented. When hungry, they sit by the fountain or the brook, and eat; if weary or sleepy, they throw around them their loose 'aba, and lie down on the ground as contentedly as the ox himself. At night they retire to a cave, sheltering rock, or shady tree, kindle a fire of thorn-bushes, heat over their stale bread, and, if they have shot a bird or caught a fish, they broil it on the coals, and thus dinner and supper in one are achieved with the least possible trouble. But their great luxury is smoking, and the whole evening is whiled away in

whiffing tobacco and bandying the rude jokes of the light-hearted peasant. Such a life need not be disagreeable, nor is it necessarily a severe drudgery in this delightful climate. The only thing they dread is an incursion of wild Arabs from beyond the lake, and to meet them they are all armed as if going forth to war." See AGRICULTURE.

**Farmer, HUGH**, a learned Independent minister, was born in 1714, near Shrewsbury, England. He studied under Doddridge, and gained his entire esteem and approbation. On leaving Northampton, he became assistant to Mr. David Some. His services, however, proving acceptable to the Dissenters in the neighborhood of Walthamstow, a place of worship was soon built, and for many years he continued there. In 1761 he became afternoon lecturer at Salters' Hall, and soon after Tuesday lecturer at the "Merchants' lecture." As he declined in years, he gradually relinquished his engagements as a preacher. In 1772 he resigned the afternoon lecture at Salters' Hall, and eight years after he gave up the Tuesday morning sermon; but he did not leave his church at Walthamstow till a few years later, when he gave up pulpit exercises entirely. He died Feb. 5, 1787. He published *A Dissertation on Miracles* (London, 1771, 8vo); *An Inquiry into the Nature and Design of Christ's Temptation in the Wilderness* (London, 1776, 8vo, 3d ed.); and *An Essay on the Demoniacs of the New Testament* (London, 1775, 8vo), in which he endeavored to prove that these were not cases of real possession, but of persons afflicted with epilepsy or madness. "This publication was answered by the late Mr. Fell, one of the tutors of Homerton Academy; and a controversy ensued, in which much acrimony of temper was discovered on both sides. Mr. Farmer was rather of a high spirit and hasty temper; but, abating these defects, he was a most estimable man," though he allowed himself larger liberty in speculation than was common in that age. Thus he interprets the temptation of Christ as a vision, and demoniacal possession as a disease. See DEMONIACS. A clause in his will directed his manuscripts to be burned; among them was a treatise on Balaam, and a revised edition of his essay on miracles. See Dodson, *Memoirs of Farmer* (London, 1805, 8vo); Jones, *Christian Biography*, p. 145.

**Farnworth, ELLIS**, an English divine, was born in the parish of Bonsall, Derbyshire, England, of which his father was rector, pursued his studies first at Chesterfield School, then at Eton, and then at Jesus College, Cambridge. In 1763 he was presented to the rectory of Carsington, in his native county, where he died in 1763. His works, which are all translations, are: 1. *Life of Pope Sextus V*, from the Italian of Gregorio Leti, with Preface, etc. (London, 1754, fol., and Dublin, 1778, 8vo);—2. *A short History of the Israelites*, from abbé Fleury's *Les Mœurs des Israélites* (Lond. 1756, 8vo; new edition by Adam Clarke, Lond. 1805, 12mo; republished N. Y. in 16mo);—3. *The History of the Civil Wars of France*, from the Italian of Davila (1757, 2 vols. 4to);—4. *The Works of Machiavel*, translated, with Notes, Anecdotes, and Life (1761, 2 vols. 4to, and 1775, 4 vols. 8vo), a work not appreciated during the life of the translator, but now commanding a high price (Disraeli, *Calamities of Authors*, Lond. and N. Y. 1859, p. 84). See Rose, *New Gen. Biog. Dict.*, and Allibone, *Dict. of Authors*, s. v. (J. W. M.)

**Farnovius** (STANISLAUS FARNOUSKI or FARNUSIUS), one of the principal Antitrinitarians of Poland, was a pupil of Peter Gonesius (q. v.). After siding for some time with the Socinians, he became in 1567 a violent champion of the right wing of Unitarianism, teaching, in the true Arian sense, the subjection of the Son to the Father, without, however, denying the pre-

existence of the supernatural part of his nature. The followers of his system are called Farnovians or Farnesians. Farnovius vigorously attacked the Socinian wing which maintained that Christ was essentially a man, but is to be worshipped as God since his ascension. He found it difficult, however, to retain the half-way position he had taken, and in the course of events most of his followers joined the main body of the Unitarians, especially when Socinus became the chief of that party. His own school vanished at his death, about 1614. — Herzog, *Real-Encyklop.* iv, 331; Zeltner, *Hist. Crypto-Socinismi*, i, 1201; Bock, *Hist. Antitrinitariorum*; O. Fock, *Socinianismus*, i, 155 sq.; Mosheim, *Church History*, iii, 242; Trechsel, *Die protest. Antitrinitarier*, vols. i and ii.

**Faroë Islands.** See DENMARK.

**Farrant, RICHARD**, an eminent composer of music, and regarded as one of the fathers of Church music in England, was born in the early part of the 16th century, and died about 1585. His name appears on the list of gentlemen of the chapel to Edward VI in 1564, and he was afterwards organist and master of the choristers of St. George's Chapel, Windsor. His "compositions for the Church, simple as they seem, are so solemn, so devout, so tender, and affecting, that they may challenge comparison with the sacred music of any age or country" (*Pictorial Hist.*). Many of his pieces are found in the collections of Boyce and Barnard. The best are, "Hide not thou thy face," "Call to remembrance," and "Lord, for thy tender mercy's sake." — Rose, *New Gen. Biog. Dict.*; Allibone, *Dict. of Authors*; *Pictorial Hist. of England*, iii, 562 (Chambers's ed.). (J. W. M.)

**Farthing** is the rendering in the Auth. Vers. for two Roman coins of different values. See MONEY.

1. The *assarius* (Græcized ἀσσάριον, Matt. x, 29; Luke xii, 6), properly a small *as*, *assarium*, but in the time of our Lord used as the Gr. equivalent of the Lat. *as*. In the texts cited it is put (like our term "a copper") for any trifling amount. The Vulg. in Matt. x, 29 renders it by *as*, and in Luke xii, 6, puts *dipondius* for two *assaria*, the *dipondius* or *dupondus* us being equal to two *ases*. The ἀσσάριον is therefore either the Roman *as*, or the more common equivalent in Palestine in the Græco-Roman series, or perhaps both. The ren-

*Assarion of Chloris.*

dering of the Vulg. in Luke xii, 6 makes it probable that a single coin is intended by two *assaria*, and this opinion is strengthened by the occurrence, on coins of Chloris, struck during the imperial period, but without the heads of emperors, and therefore of the Greek autonomous class, of the words ACCAPION, ACCAPIA ΔΥΟ, ACCAPIA ΤΡΙΑ. The *half assarion* of the same island has also been found, yet it is of the same size as the full *assarion* (Akerman, *Nunismatic Illustrations of the New Testament*, p. 7).

The proper *as* was a copper coin, the Roman unit of value for small sums, equal to a tenth of the *denarius* or *drachma*, i. e. 1½ cents (Smith's *Dict. of Class. Antiq.* s. v. *As*). See PENNY.

2. The *quadrans* (Græcized κοδράντης, Matt. v, 26; Mark xii, 42), the

Roman *As*.

λεπτόν, was originally a very small Greek copper coin,

Roman *Quadrans*.

seven of which with the Athenians went to the χαλκοίς, or bronze piece. The copper currency of Palestine, in the reign of Tiberius, was partly of Roman coins, partly of Græco-Roman (technically *Greek Imperial*). In the former class there was no common piece smaller than the *as*, equivalent to the ἀσσάριον of the N. T. (above), but in the latter there were two common smaller pieces, the one apparently the quarter of the ἀσσάριον, and the other its eighth, though the irregularity with which they were struck makes it difficult to pronounce with certainty; the former piece was doubtless called the κοδράντης, or *quadrans*, and the latter the λεπτόν, or *lepton*. See MITE.

**Fascination.** See CHARM.

**Fassari, VINCENT**, a Sicilian theologian, was born in Palermo in 1599, and died in the same city in 1663. He became a Jesuit in 1614, and taught successively belles-lettres, philosophy, theology, and the Scriptures. Of his religious and philosophical works, the most important are *Disputat. ones philosophicæ de quantitate, ejusque Compositione, Essentia*, etc. (Palermo, 1644, fol.); and *Immaculata Deiparæ Conceptio theologica Commisâa trutinæ* (Lyons, 1666, fol.). — Hoefer, *Nouv. Biog. Générale*; Mongitore, *Bibliotheca Sicula*; *Bibliothèque des Ecrivains de la Compagnie de Jesus*. (J. W. M.)

**Fassoni, LIBERATO**, an Italian theologian, was born about A. D. 1700, and died at Rome in 1767. He was professor of theology in the college of his order at Rome. We have from him *De Leibnitiano Rat. Princ.* (Sinigaglia, 1754, fol.); — *De Græca Sacrarum Litterarum editione a LXX interpretibus* (Urbino, 1754, fol.); — *De Piorum in sinu Abræhe beatitudine ante Christi mortem* (Rome, 1760, 4to). — Hoefer, *Nouv. Biog. Générale*. (J. W. M.)

**Fast** (properly, פָּסַח, *tsum*, strictly, to keep the mouth shut; νηστεῖω, strictly, not to eat). In the early ages of the world, when the spontaneous productions of nature and the spoils of the chase formed man's chief aliment, fasting from time to time was compulsory, in consequence of the uncertainty of obtaining food when wanted. It would be easy for superstitious ignorance to interpret this compulsion into an expression of the divine will, and so to sanction the observance of fasting as a religious duty. The transition would be the easier at a time and in countries when the office of physician was united in the same person with that of priest; for in hot climates occasional abstinence is not without its advantages on the health; and an abstinence which the state of the body required, but which the appetite shunned or refused, the authority of the priest and the sanctions of religion

would exact at once with ease and certainty. In the earlier stages of civilization no idea is more prevalent and operative than that the Deity is propitiated by voluntary sufferings on the part of his creatures. Hence ensued all kinds of bodily mortifications, and even the sacrifice of life itself. Nay, "the fruit of the body"—the dear pledges of mutual affection, the best earthly gift from the heavenly Father—children, were sacrificed in expiation of "the sin of the soul." Human enjoyments were held to be displeasing in the sight of God. The notion that the gods were jealous of man's happiness runs through the entire texture of Greek and Roman mythology; and the development of this falsehood, as presented in Greek tragedy, has given birth to some of the finest productions of the human mind. But what more pleasurable than food to man, especially to the semi-barbarian? The denial of such a pleasure must then be well-pleasing to the Divinity, the rather because, on occasions of family bereavement, of national disaster, or any great calamity, the appetite is naturally affected under the influence of grief, and is made to loathe the food which in its ordinary condition it finds most grateful. A connection between sorrow and fasting would thus be established which would carry with it a sort of divine sanction in being natural and inevitable in its origin. Accordingly, abstinence, which seemed imposed by Providence, if not in expiation of guilt, yet as an accompaniment of sorrow, easily became regarded as a religious duty when voluntarily prolonged or assumed, and grew to be considered as an efficacious means for appeasing the divine wrath, and restoring prosperity and peace. "Climate, the habits of a people, and their creed, gave it at different periods different characteristics; but it may be pronounced to have been a recognised institution with all the more civilized nations, especially those of Asia, throughout all historic times. We find it in high estimation among the ancient Parsees of Irania. It formed a prominent feature in the ceremonies of the mysteries of Mithras; and found its way, together with these, over Armenia, Cappadocia, Pontus, and Asia Minor, to Palestine, and northward to the wilds of Scythia. The ancient Chinese and Hindus, and principally the latter, in accordance with their primeval view—which they held in common with the Parsees—of heaven and hell, salvation and damnation, of the transmigration of the soul, and of the body as the temporary prison of a fallen spirit, carried fasting to an unnatural excess. Although the Vedas attach little importance to the excruciation of the body, yet the Pavaka, by the due observance of which the Hindu believer is purified from all his sins, requires, among other things, an uninterrupted fast for the space of twelve days. Egypt seems to have had few or no compulsory general fasts; but it is established beyond doubt that for the initiation into the mysteries of Isis and Osiris, temporary abstinence was rigorously enforced. In Siam, all solemn acts are preceded by a period of fasting, the seasons of the new and full moon being especially consecrated to this rite. In Java, where abstinence from the flesh of oxen is part of the religion of all, Buddhists and worshippers of Brahma alike, the manner and times of the observance vary according to the religion of the individual. Again, in Tibet, the Dalai-lamaites and Bogdo-lamaites hold this law in common. That Greece observed and gave a high place to occasional fast-days—such as the third day of the festival of the Eleusinian mysteries, and that, for instance, those who came to consult the oracle of Trophonius had to abstain from food for twenty-four hours—is well known. It need hardly be added that the Romans did not omit so important an element of the festivals and ceremonies which they adopted from their neighbors, though with them the periods of fasting were of less frequent recurrence" (Chambers, *Encyclopædia*, s. v.). The Mohammedans fast (till sunset) during the

whole of their ninth (lunar) month Ramadan (see D'Herbelot, *Bibl. Or.* s. v.). (On this religious observance among pagan nations, consult Meiners, *Gesch. der Relig.* ii, 139; Lakemacher, *Antiq. Græc. Sacr.* p. 626; Wachsmuth, *Hellen. Alterthum.* ii, 237; Böttiger, *Kunstmythol.* i, 132.) See ASCETICISM.

1. *Jewish Fasting.*—The word פָּסַח (פְּסָחָה, *ḥejuni-um*) is not found in the Pentateuch, but it often occurs in the historical books and the prophets (2 Sam. xii, 16; 1 Kings xxi, 9-12; Ezra viii, 21; Psal. lxi, 10; Isa. lviii, 5; Joel i, 14; ii, 15; Zech. viii, 19, etc.). In the law the only term used to denote the religious observance of fasting is the more significant one, נָחַם אֶת-רוּחַ (נָחַם אֶת-רוּחַ) (נָחַם אֶת-רוּחַ; *affligere animam*), "afflicting the soul" (Lev. xvi, 29-31; xxiii, 27; Numb. xxx, 13). The word נָחַם אֶת-רוּחַ, i. e. *affliction*, which occurs Ezra ix, 5, where it is rendered in A. V. "heaviness," is commonly used to denote fasting in the Talmud, and is the title of one of its treatises.

The sacrifice of the personal will, which gives to fasting all its value, is expressed in the old term used in the law, *afflicting the soul*. The faithful son of Israel realized the blessing of "chastening his soul with fasting" (Psal. lxi, 10). But the frequent admonitions and stern denunciations of the prophets may show us how prone the Jews were in their formal fasts to lose the idea of a spiritual discipline, and to regard them as being in themselves a means of winning favor from God, or, in a still worse spirit, to make a parade of them in order to appear religious before men (Isa. lviii, 3; Zech. vii, 5, 6; Mal. iii, 14; comp. Matt. vi, 16).

The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv, 16, etc.). On other occasions there appears to have been only a restriction to a very plain diet (Dan. x, 3). Rules are given in the Talmud (both in *Yoma* and *Taanith*) as to the mode in which fasting is to be observed on particular occasions. The fast of the day, according to Josephus (*Ant.* iii, 19, 3), was considered to terminate at sunset, and St. Jerome speaks of the fasting Jew as anxiously waiting for the rising of the stars. Fasts were not observed on the sabbaths, the new moons, the great festivals, or the feasts of Purim and Dedication (Judith viii, 6; *Taanith*, ii, 10).

Those who fasted frequently dressed in sackcloth or rent their clothes, put ashes on their head and went barefoot (1 Kings xxi, 27; comp. Josephus, *Ant.* viii, 13, 8; Neh. ix, 1; Psal. xxxv, 13). The rabbinical directions for the ceremonies to be observed in public fasts, and the prayers to be used in them, may be seen in *Taanith*, ii, 1-4 (see the *Col. Talm.*, *Taanith*, c. *vers.*, et *notis* De Lundii, Traj. ad Rh. 1694, 8vo). Consult also Maimonides, *Jud. Hal-Chetzka, Hillelith Taanith*, i, 315 sq.; Lightfoot, *Horæ Hebraicæ* on Luke xviii, 12; Schöttgen, *Horæ Hebraicæ* on Luke xviii, 12; Reland, *Antiquitates Sacre Veterum Hebræorum* (1717), p. 538 sq.; Bloch, in Geiger's *Wissenschaftliche Zeitschrift für jüdische Theol.* iv, 205 sq.; Fink, in Ersch und Gruber's *Encyclopædie*, s. v. Fasten; Jost, *Gesch. des Judenthums und seiner Secten* (Leipzig, 1857), i, 184 sq.; Bauer, *Gottesd. Verf.* i, 348 sq.; Otho, *Lex. Rab.* p. 233 sq.

1. The sole fast required by Moses was on the great day of annual atonement. This observance seems always to have retained some prominence as "the fast" (Acts xxvii, 9). But what the observance of the enjoined duty involved we are nowhere expressly informed, and can approximate to a knowledge of precise details only so far as later practices among the Jews may be considered as affording a faithful picture of this divinely-sanctioned ordinance. In these remarks the opinion is implied that "the fast," whatever importance it may have subsequently acquired, was orig-

inally only an incident, not to say an accident, in the great solemnity of the annual atonement. See ATONEMENT, DAY OF.

There is no mention of any other periodical fast in the O. T., except in Zech. vii, 1-7; viii, 19. From these passages it appears that the Jews, during their captivity, observed four annual fasts in the fourth, fifth, seventh, and tenth months. When the building of the second Temple had commenced, those who remained in Babylon sent a message to the priests at Jerusalem to inquire whether the observance of the fast in the fifth month should not be discontinued. The prophet takes the occasion to rebuke the Jews for the spirit in which they had observed the fast of the seventh month as well as that of the fifth (vii, 5-6); and afterwards (viii, 19), giving the subject an evangelical turn, he declares that the whole of the four fasts shall be turned to "joy and gladness, and cheerful feasts." Zechariah simply distinguishes the fasts by the months in which they were observed; but the Mishna (*Taanith*, iv, 6) and St. Jerome (*in Zachariam* viii) give statements of certain historical events which they were intended to commemorate:

(1.) The fast of the fourth month.—Kept on the 17th of Tammuz, to commemorate the making of the golden calf by the Jews, the breaking of the tables of the law by Moses (Exod. xxiv; comp. xxxiii, 3), the failure of the daily sacrifice for want of cattle during the siege, and the storming of Jerusalem by Nebuchadnezzar (Jer. lii).

(2.) The fast of the fifth month.—Kept on the 9th of Ab, to commemorate the decree that those who had left Egypt should not enter Canaan (Num. xiv, 27, etc.); the Temple burnt by Nebuchadnezzar, and again by Titus; and the ploughing up of the site of the Temple, with the capture of Bether, in which a vast number of Jews from Jerusalem had taken refuge in the time of Hadrian (comp. *Jost, Gesch. d. Israeliten*, iii, 240).

(3.) The fast of the seventh month.—Commemorating the complete sack of Jerusalem by Nebuchadnezzar, and the death of Gedaliah (2 Kings xxv), on the 3d of Tisri (comp. *Seder Olam Rabba*, c. xxvi).

(4.) The fast of the tenth month.—On the 10th of Tebeth, to commemorate the receiving by Ezekiel and the other captives in Babylon of the news of the destruction of Jerusalem (Ezek. xxxiii, 21; compare 2 Kings xxv, 1).

These four fasts have been Christianized, and tradition tells us that their transfer into the Christian Church was made by the Roman bishop Callistus (flour. A. D. 223). To deprive them, however, of their Jewish appearance, the whole year was divided into four seasons (*quatuor tempora*), and a fast was appointed for one week of each season (compare Herzog, *Encyclopädie*, iii, 336).

(5.) The fast of Esther.—Additional to the above; kept on the 13th of Adar (Esth. iv, 16). See ESTHER (FAST OF).

Some other events mentioned in the Mishna are omitted as unimportant. Of those here stated several could have had nothing to do with the fasts in the time of the prophet. It would seem most probable, from the mode in which he has grouped them together, that the original purpose of all four was to commemorate the circumstances connected with the commencement of the captivity, and that the other events were subsequently associated with them on the ground of some real or fancied coincidence of the time of occurrence. As regards the fast of the fifth month, at least, it can hardly be doubted that the captive Jews applied it exclusively to the destruction of the Temple, and that St. Jerome was right in regarding as the reason of their request to be released from its observance the fact that it had no longer any purpose after the new Temple was begun. As this fast (as well as the three others) is still retained in the Jewish calendar, we must

infer either that the priests did not agree with the Babylonian Jews, or that the fast, having been discontinued for a time, was renewed after the destruction of the Temple by Titus.

The number of annual fasts in the present Jewish calendar has been multiplied to twenty-eight, a list of which is given by Reland (*Antiq.* p. 274). See CALNDAR.

2. Public fasts were occasionally proclaimed to express national humiliation on account of sin or misfortune, and to supplicate divine favor in regard to some great undertaking or threatened danger. In the case of public danger, the proclamation appears to have been accompanied with the blowing of trumpets (Joel ii, 1-15; comp. *Taanith*, i, 6). The following instances are recorded of strictly national fasts: Samuel gathered "all Israel" to Mizpeh and proclaimed a fast, performing at the same time what seems to have been a rite symbolical of purification, when the people confessed their sin in having worshipped Baalim and Ash-taroath (1 Sam. vii, 6); Jehoshaphat appointed one "throughout all Judah" when he was preparing for war against Moab and Ammon (2 Chron. xx, 3); in the reign of Jehoakim, one was proclaimed for "all the people in Jerusalem, and all who came thither out of the cities of Judah," when the prophecy of Jeremiah was publicly read by Baruch (Jer. xxxvi, 6-10; comp. Baruch i, 5); three days after the feast of Tabernacles, when the second Temple was completed, "the children of Israel assembled with fasting, and with sackclothes and earth upon them," to hear the law read, and to confess their sins (Neh. ix, 1). There are references to general fasts in the prophets (Joel i, 14; ii, 15; Isa. lviii), and two are noticed in the books of the Maccabees (1 Macc. iii, 46-47; 2 Macc. xiii, 10-12).

There are a considerable number of instances of cities and bodies of men observing fasts on occasions in which they were especially concerned. In the days of Phinehas, the grandson of Aaron, when the men of Judah had been defeated by those of Benjamin, they fasted in making preparation for another battle (Judg. xx, 26). David and his men fasted for a day on account of the death of Saul (2 Sam. i, 12), and the men of Jabesh Gilead fasted seven days on Saul's burial (1 Sam. xxxi, 13). Jezebel, in the name of Ahab, appointed a fast for the inhabitants of Jezreel, to render more striking, as it would seem, the punishment about to be inflicted on Naboth (1 Kings xxi, 9-12). Ezra proclaimed a fast for his companions at the river of Ahava, when he was seeking for God's help and guidance in the work he was about to undertake (Ezra viii, 21-23). Esther, when she was going to intercede with Ahasuerus, commanded the Jews of Shushan neither to eat nor drink for three days (Esth. iv, 16). A fast of great strictness is recorded in the Scriptures as having been proclaimed by the heathen king of Nineveh to avert the destruction threatened by Jehovah (Jonah ii, 5-9).

Public fasts expressly on account of unseasonable weather and of famine may perhaps be traced in the first and second chapters of Joel. In later times they assumed great importance, and form the main subject of the treatise *Taanith* in the Mishna. The Sanhedrim ordered general fasts when the nation was threatened with any great evil, such as drought or famine (Josephus, *Life*, § 56; *Taanith*, i, 5), as was usual with the Romans in their supplications (Livy, iii, 7; x, 23).

3. Private occasional fasts are recognised in one passage of the law (Numb. xxx, 13). The instances given of individuals fasting under the influence of grief, vexation, or anxiety are numerous (1 Sam. i, 7; xx, 34; 2 Sam. iii, 35; xii, 16; 1 Kings xxi, 27; Ezra x, 6; Neh. i, 4; Dan. x, 3). The fasts of forty days of Moses (Exod. xxiv, 18; xxxiv, 28; Dent. ix, 18) and of Elijah (1 Kings xix, 8), are, of course, to be regarded as special acts of spiritual discipline, faint though wonderful shadows of that fast in the wilder-

ness of Judæa, in which all true fasting finds its meaning (Matt. iv, 1, 2).

After the exile private fasts became very frequent (Lightfoot, p. 318), awaiting the call of no special occasion, but entering as a regular part of the current religious worship (Sueton. *Aug.* 76; Tacit. *Hist.* v, 4, 3). In Judith viii, 6 we read that Judith fasted all the days of her widowhood, "save the eves of the sabbaths, and the sabbaths, and the eves of the new moons, and the new moons, and the feasts and the solemn days of the house of Israel." In Tobit xii prayer is declared to be good with fasting; see also Luke ii, 37; Matt. ix, 14. The parable of the Pharisee and Publican (Luke xviii, 9; comp. Matt. ix, 14) shows how much the Pharisees were given to voluntary and private fasts—"I fast twice a week." The first was on the fifth day of the week, on which Moses ascended to the top of Mount Sinai; the second was on the second day, on which he came down (*Tawith*, ii, 9; *Hieros. Megillah*, 75, 1). This bi-weekly fasting has also been adopted in the Christian Church; but Monday and Thursday were changed to Wednesday and Friday (*feria quarta et sexta*), as commemorative of the betrayal and crucifixion of Christ. Of a similar semi-occasional character was the *First-born sons' fast* (פְּסַחֵי בְּנֵי מִצְרַיִם), on the day preceding the feast of Passover, in commemoration of the fact that while God on that occasion smote all the first-born of the Egyptians, he spared those of the house of Israel (comp. Exod. xii, 29, etc.; *Sopherim*, xxi, 3). See **FIRST-BORN**. The Essenes and the Therapeutæ also were much given to such observances (Philo, *Vit. Contempl.* p. 613; Euseb. *Prop. Evam.* ix, 3). Fasts were considered a useful exercise in preparing the mind for special religious impressions; as in Dan. x, 2 sq. (see also Acts xiii, 3; xiv, 23). From Matt. xvii, 21: "Howbeit this kind (of demons) goeth not out but by prayer and fasting," it would appear that the practice under consideration was considered in the days of Christ to act in certain special cases as an exorcism.

Fasting (as stated above) was accompanied by the ordinary signs of grief among the Israelites, as may be seen in 1 Macc. iii, 47. The abstinence was either partial or total. In the case of the latter fast was entirely foregone, but this ordinarily took place only in fasts of short duration; and abstinence from food in Eastern climes is more easy and less detrimental (if not in some cases positively useful) than keeping from food would be with us in these cold, damp Northern regions (Esth. iv, 16). In the case of partial abstinence the time was longer, the denial in degree less. When Daniel (x, 2) was "mourning three full weeks," he ate no "pleasant bread, neither came flesh nor wine in his mouth." There does not appear to have been any fixed and recognised periods during which these fasts endured. From one day to forty days fasts were observed. The latter period appears to have been regarded with feelings of peculiar sanctity, owing, doubtless, to the above instances in Jewish history. There are monographs, entitled *De jejuniis Hebræorum*, by Opitz (Kil. 1680), Peringer (Holm. 1684), and Lund (Aboe, 1696).

II. *In New Testament.*—We have already seen how qualified the sanction was which Moses gave to the observance of fasting as a religious duty. In the same spirit which actuated him, the prophets bore testimony against the lamentable abuses to which the practice was turned in the lapse of time and with the increase of social corruption (Isa. lviii, 4 sq.; Jer. xiv, 12; Zech. vii, 5). Continuing the same species of influence and perfecting that spirituality in religion which Moses began, our Lord rebuked the Pharisees sternly for their outward and hypocritical pretences in the fasts which they observed (Matt. vi, 16 sq.), and actually abstained from appointing any fast whatever as a part of his own religion. In Matt. ix, 14, the question

of the reason of this avoidance is expressly put—"Why do we (the disciples of John) and the Pharisees fast oft, but thy disciples fast not?" The answer shows the voluntary character of fasting in the Christian Church—"Can the children of the bridechamber fast?" It is true that a period is alluded to when these children "shall fast;" but the general scope of the passage, taken in connection with the fact that Christ's disciples fasted not, and with the other fact, that while John (Matt. xi, 18, 19) "came neither eating nor drinking," the Son of man "came eating and drinking," clearly shows that our Lord, as he did not positively enjoin religious fasting, so by the assertion that a time would come when, being deprived of the (personal presence of the) bridegroom, his disciples would fast, meant to intimate the approach of a period of general mourning, and employed the term "fast" derivatively to signify rather sorrow of mind than any corporeal self-denial (Neander, *Leben Jesu*, p. 231, 305). In his sermon on the mount, however (Matt. vi, 17), while correcting the self-righteous austerity of Pharisaic fasting, he clearly allows the practice itself, but leaves the frequency, extent, and occasion of its performance to the private conscience and circumstances of each individual.

That the early Christians observed the ordinary fasts which the public practice of their day sanctioned is clear from more than one passage in the New-Testament Scriptures (Acts xiii, 2; xiv, 23; 2 Cor. vi, 5); but in this they probably did nothing more than yield obedience, as in general they thought themselves bound to do, to the law of their fathers so long as the Mosaic institutions remained entire. Although the great body of the Christian Church held themselves free from all ritual and ceremonial observances when God in his providence had brought Judaism to a termination in the rasure of the holy city and the closing of the Temple, yet the practice of fasting thus originated might easily and unobservedly have been transmitted from year to year and from age to age, and that the rather because so large a portion of the disciples being Jews (to say nothing of the influence of the Ebionites in the primitive Church), thousands must have been accustomed to fasting from the earliest days of their existence, either in their own practice, or the practice of their fathers, relatives, and associates (comp. Cor. vii, 5).—Kitto, s. v.; Smith, s. v. See **FASTING**.

On fasting in the Christian Church, see **FASTING**.

**Fastidius**, PRISCUS, an English writer, and, according to some authorities, bishop of London in the 5th century. He is proved by Holstenius to be the author of a treatise found in Augustine's works, vol. ix, and published by Holstenius (Rome, 1663) under the title *De Vita Christiana et Viduitate*. Its precepts are good and practical, but Tillemont (*Mém.* xv, 16) considers it as tending to Pelagianism, inasmuch as it reduces Christianity to love of God and our neighbors, including good works. It is given, with prolegomena, in Galland, *Bib. Vet. Patr.* t. ix, and is reprinted in Migne, *Patrol. Lat.* i, 377 sq.—Clarke, *Succession of Sac. Lit.* ii, 152; Cave, *Hist. Lit.* i, 401.

**FASTING IN THE CHRISTIAN CHURCH.** In the article **FAST** we have given an account of Jewish fasting, and also of the notices of fasting in the N. T. We confine ourselves in this article to a history of fasting in the Christian Church.

1. *Early Church.*—Fasting and abstinence have been practised in the Christian Church from the beginning [see **ABSTINENCE**] as means of self-discipline. Where the ascetic spirit has prevailed, fasting has been used as a means of mortification and penance. See **ASCETICISM**; **MORTIFICATION**; **PENANCE**. In the N. T. fasting appears either (1) as a token of sorrow or repentance, or (2) as a means of preparation for and aid in the discharge of spiritual duties (e. g. prayer, etc.). It was free from superstition; and the N. T. nowhere makes fasting, of itself, a means of grace. But the ascetic tendency in the early Church led to reliance on fasting, etc., as not only helps to, but substitutes for, the inward and spiritual life. The theory which placed the origin and seat of sin in the body [see **SIN**] also tended to give value to the practice of fasting. It came at last to be considered as an effectual means of securing forgiveness of sin. The earliest notices of fasting in the Christian writers are in a better vein. "The days of holy consecration, of penitence and prayer, which individual Christians appointed for their own use, were oftentimes also a sort of fast-days. That they might be less disturbed by sense while their minds were intent on holy things, they were accustomed on such days to confine their bodily wants within stricter limits than usual, or else to fast entirely; where we must take into consideration the peculiar nature of that hot climate in which Christianity first began to spread. Whatever they saved by their abstinence on these days was appropriated to the maintenance of the poor brethren" (Neander, *Church History*, Torrey's, ii, 274).

We cite some of the *Apostolical Fathers*. Hermas (1st century), *Shepherd* (*Simil.* v, ch. iii): "This fasting is very good, provided that the commandments of the Lord be observed. Observe as follows the fasting you intend to keep. First of all, refrain both from speaking and from hearing what is wrong; and cleanse thy heart from all pollution, from all revengeful feelings, and from all covetousness; and on the day thou fastest content thyself with bread, vegetables, and water, and thank God for these. But reckon up what thy meal on this day would have cost thee, and give the amount to some widow, or orphan, or to the poor. Happy for thee if, with thy children and whole household, thou observest these things." (See also *Simil.* v, ch. i.) The *Epistle of Barnabas* declares that the Jewish fasts are not true fasts, nor acceptable unto God, and cites Isa. lviii, 4-9, as giving the true fast "which God hath chosen." The *Epistle of Polycarp*

(2d century) exhorts Christians "to return to the word handed down from the beginning, watching unto prayer, and persevering in fasting" (ch. vii). Justin Martyr († 165) also cites Isa. lviii as giving the "true fast," and applies it to practical life. He speaks, however, of fasting being joined with prayer in the administration of baptism (*Dial. c. Tryph.* ch. xv). Irenæus († 200) speaks of the fast before Easter, and says, "Not only is the dispute respecting the day, but also respecting the manner of fasting. For some think they ought to fast only one day, some two, some more days; some compute their day as consisting of forty hours night and day; and this diversity existing among those that observe it is not a matter that has just sprung up in our times, but long ago among those before us, who perhaps, not having ruled with sufficient strictness, established the practice that arose from their simplicity and inexperience. And yet with all, these maintained peace, and we have maintained peace with one another; and the very difference in our fasting establishes the unanimity in our faith" (Eusebius, *Ch. History*, v, 24). Clement of Alexandria († 220?) notices the fact that many kinds of pagan worship required celibacy and abstinence from meat and wine in their priests; that there were rigid ascetics among the Indians, namely, the Samaneans, and hence argued that usages which may exist also in other religions, and even be combined with superstition, cannot, in themselves considered, be peculiarly Christian. He then adds: "Paul declares that the kingdom of heaven consists not in meat and drink, neither therefore in abstaining from wine and flesh, but in righteousness and peace, and joy in the Holy Ghost. As humility is shown, not by the castigation of the body, but by gentleness of disposition, so also abstinence is a virtue of the soul, consisting not in that which is without, but in that which is within the man. Abstinence has reference not to some one thing alone, not merely to pleasure, but it is abstinence also to despise money, to tame the tongue, and to obtain by reason the dominion over sin" (*Strom.* lib. iii). Clement also speaks of weekly fasts as the usage of the Church. It appears to be clear that weekly fasts were observed in the Church before the end of the 2d century, but that they were not enforced as essential means of grace. The Montanists were rigorous to excess with regard to fasting. "Besides the usual fasts, they observed special *perychagia* (*aridus vietus*), as they were called; seasons of two weeks for eating only dry, or, properly, uncooked food, bread, salt, and water. The Church refused to sanction these excesses as a general rule, but allowed ascetics to carry fasting even to extremes. A confessor in Lyons, for example, lived on bread and water alone, but forsook that austerity when reminded that he gave offence to other Christians by so despising the gifts of God" (Schaff, *Ch. Hist.* i, § 90). Tertullian († c. 220), in his *De Jejuniis*, complains of the little attention paid by the Catholic Church to the practice of fasting, thereby showing that liberty of judgment was exercised with regard to it. Origen speaks of Wednesday and Fridays in the Church at Alexandria as fast-days, on the ground that our Lord was betrayed on a Wednesday and crucified on a Friday (*Hom. x on Leviticus*).

By the 6th century fasting ceased to be a voluntary exercise; for by the second Council of Orleans, A.D. 541, it was decreed that any one neglecting to observe the stated times of abstinence should be treated as an offender against the laws of the Church. In the 8th century it was regarded as meritorious, and the breach of the observance subjected the offender to the penalty of excommunication. In later times, some persons who ate flesh during prescribed seasons of abstinence were punished with the loss of their teeth. These severities were, however, subsequently relaxed, and permission was given to use all kinds of food, except flesh,

eggs, cheese, and wine. Afterwards flesh only was prohibited, eggs, cheese, and wine being allowed; an indulgence which was censured by the Greek Church, and led to a quarrel between it and the Western. The following fasts generally obtained: 1. *Lent*, the annual fast of forty days before Easter. At first the duration of this fast was forty hours; in the time of Gregory I it was thirty-six days; but afterwards, either by Gregory I or Gregory II (8th century), in imitation of the fasts of Moses, Elias, and our Saviour, it was extended to forty days. See LENT; QUADRAGESIMA. 2. *Quarterly fasts*, which cannot be traced beyond the 5th century, though Bellarmin asserts that they dated from the apostles' time. 3. *A fast of three days before the festival of the Ascension*, introduced by Mameucus of Vienne (5th century). In some places it was not celebrated till after Whitsuntide. It was called *jejunium rogationum*, or *jejunium litaniarum*, the feast of rogations or litanies (hence rogation-days), on account of certain litanies sung on those days (Bingham, bk. xxi, c. ii, § 8). 4. *Monthly fasts*, a day in every month, except July and August, being selected. 5. *Fasts before festivals*, instead of the ancient vigils, which were abolished in the 5th century. 6. *Weekly fasts*, on Wednesdays and Fridays, entitled *stationes*, from the practice of soldiers keeping guard, which was called *statio* by the Romans. 7. There were also occasional fasts, appointed by ecclesiastical authority, in times of great danger, emergency, or distress (Tertull. *De Jejun.* c. 13). "The custom of the Church at the end of the 4th century may be collected from the following passage of Epiphanius: 'In the whole Christian Church, the following fast-days throughout the year are regularly observed. On Wednesdays and Fridays we fast until the ninth hour (i. e. three o'clock in the afternoon), except during the interval of fifty days between Easter and Whitsuntide, in which it is usual neither to kneel nor fast at all. Besides this, there is no fasting on the Epiphany or Nativity, if those days should fall on a Wednesday or Friday. But those persons who especially devote themselves to religious exercises (the monks) fast also at other times when they please, except on Sundays and during the fifty days between Easter and Whitsuntide. It is also the practice of the Church to observe the forty days' fast before the sacred week. But on Sundays there is no fasting, even during the last-mentioned period (compare *Doctr. de fide*). But even at this late date there was no universal agreement in the practice of the Church in this matter, neither had fasts been established by law. The custom, so far as it existed, had been silently introduced into the Church, and its observance was altogether voluntary. This fasting consisted, at first, in abstinence from food until three o'clock in the afternoon. A custom was afterwards introduced, probably by the Montanists, affecting the kind of food to be taken, which was limited to bread, salt, and water' (Siegel, *Alterthümer*, ii, 77, translated by Coleman, *Antient Christianity*, p. 445).

11. *Roman and Greek Churches*.—The Church of Rome prescribes the times and character of fasts by law (*Concil. Trident.* session xxv, *De delect. ciborum*). "Moreover, the holy council exhorts all pastors, and beseeches them by the most holy coming of our Lord and Saviour, that as good soldiers of Jesus Christ they assiduously recommend to all the faithful the observance of all the institutions of the holy Roman Church, the mother and mistress of all churches, and of the decrees of this and other oecumenical councils; and that they use all diligence to promote obedience to all their commands, and especially to those which relate to the mortification of the flesh, as the choice of meats and fasts." The Church commands fasts, and disobedience to her commands is sin. "See *Abstract of the Douay Catechism* (p. 44): 'Slighting or neglecting the precepts of the Church, and living in habits of breaking the fasts commanded, or of eating meat on Satur-

days, or other days of abstinence, without just dispensation, were sins which excluded from the benefits of the jubilee, unless confessed and forsaken in the same manner as drunkenness, swearing, and debauchery' (*Instructions and Directions*, etc., p. xxiv). But a papal dispensation changes the nature of things; the Spaniard who has paid the pope for a *flesh bull* may feast even in Lent; while his neighbor, who has neglected or declined to purchase the privilege, cannot eat an egg or drink a spoonful of milk during that period without committing mortal sin" (Cramp, *Text-book of Popery*, chap. xiv). Among the "satisfactory" works of "penance" in the Roman Church, fasting goes along with prayer and almsgiving (Dens, *Theologia*, vi, *De Satisf.* 176). The Church distinguishes between days of fasting and of abstinence. On the former but one meal, and that not of flesh, is tasted during twenty-four hours; on the latter, flesh only is abstained from. The following is the distribution of Church fasts as given in bishop Challoner's *Garden of the Soul*: 1. The forty days of Lent. 2. The Ember Days, being the Wednesday, Friday, and Saturday of the first week in Lent, of Whitsun Week, of the third week in September, and of the third week in Advent. 3. The Wednesdays and Fridays of the four weeks in Advent. 4. The vigils or eves of Whitsuntide, of the feasts of St. Peter and St. Paul, of the Assumption of the Blessed Virgin Mary, of All Saints, and of Christmas Day. When any fasting day falls upon a Sunday, it is to be observed on the Saturday before. *Abstinence Days*.—1. The Sundays in Lent. 2. The three Rogation Days, being the Monday, Tuesday, and Wednesday before Ascension Day. 3. St. Mark, April 25, unless it falls in Easter Week. 4. The Fridays and Saturdays out of Lent, and the Ember Weeks, or such as happen to be vigils; but should Christmas Day fall upon a Friday or Saturday, it is not of abstinence. In the *Practical Catechism upon the Sundays, Feasts, and Fasts*, the reason assigned for observing St. Mark's Day as a day of abstinence is, that his disciples, the first Christians of Alexandria, under his own conduct were eminent for their mortification; moreover, that St. Gregory the Great, the apostle of England, first set it apart in memory of the cessation of a mortality in his time at Rome. All Fridays and Saturdays, except those which fall between Dec. 25 and Feb. 2, are days of *Abstinence*; but in the United States there is a dispensation of Saturdays for twenty years from 1840. The *Fasting* days are, every day in Lent except Sunday; the Ember Days; the vigils of Pentecost, Assumption, All Saints, and Christmas.

In the Greek Church fasting is kept with great severity. There are four principal fasts. That of Lent, commencing according to the old style; one, beginning in the week after Whitsuntide, and ending on June 29, so that it varies in length, and is called the Fast of the holy Apostles; one, for a fortnight before the Assumption of the Virgin (August 15), which is observed even to the prohibition of oil, except on the day of the Transfiguration (August 6), on which day both oil and fish may be eaten; and one forty days before Christmas.

III. *Protestant Churches*.—In these, fasting is not made imperative as a term of membership in the Church, but is generally recommended as a Christian duty, especially under circumstances of national or individual affliction.

1. *Church of England*.—"In the reign of queen Elizabeth there was a royal ordinance for fasting; not, however, so much with a religious view as for the encouragement of the fisheries. The Church has only so far recognised the custom in its ecclesiastical law as to retain the fast-days and prayers, but has prescribed no regulation of diet. Abstinence from food is not, therefore, the duty which it enjoins on its members, but whatever each finds to be best adapted for self-discipline, and most suitable under his circum-

stances for a repentant spirit. Mention is made of abstinence in the 'Collect for the first Sunday in Lent;' but it is not the abstaining from food, or particular kinds of food, but such abstinence as shall subdue the flesh to the spirit, i. e. the abstaining *habitually* from excess" (Eden). No legal distinction is drawn between fasting and abstinence; so Wheatley, (*On Common Prayer*, ch. v, § 4): "In the Church of Rome, fasting and abstinence admit of a distinction, and different days are appointed for each of them. But I do not find that the Church of England makes any difference between them. It is true, in the title of the table of vigils, etc., she mentions 'fasts and days of abstinence' separately; but when she comes to enumerate the particulars, she calls them all 'days of fasting or abstinence,' without distinguishing the one from the other. Nor does she anywhere point out to us what food is proper for such times or seasons, or seem to place any part of religion in abstaining from any particular kinds of meat. It is true, by a statute still in force, flesh is prohibited on fast-days; but this is declared to be for a political reason, viz. for the increase of cattle, and for the encouragement of fishery and navigation. Not but that the statute allows that abstinence is serviceable to virtue, and helps to subdue the body to the mind; but the distinction of clean and unclean meats determined, it says, with the Mosaic law; and therefore it sets forth that days and meats are in themselves all of the same nature and quality as to moral consideration, one not having any inherent holiness above the other. And for this reason it is that our Church, as I have said, nowhere makes any difference in the kinds of meat; but, as far as she determines, she seems to recommend an entire abstinence from all manner of food till the time of fasting be over; declaring in her homilies that fasting (by the decree of the six hundred and thirty fathers, assembled at the Council of Chalcedon, which was one of the four first general councils, who grounded their determination upon the sacred Scriptures, and long-continued usage or practice both of the prophets and other godly persons before the coming of Christ; and also of the apostles and other devout men in the New Testament) is a withholding of meat, drink, and all natural food from the body for the determined time of fasting." The fixed days appointed by the Church of England for fasting and abstinence are the following: 1. The forty days of Lent. 2. The Ember Days at the four seasons, being the Wednesday, Friday, and Saturday after the first Sunday in Lent, the feast of Pentecost, September 14, and December 13. 3. The three Rogation Days, being the Monday, Tuesday, and Wednesday before Holy Thursday, or the Ascension of our Lord. 4. All the Fridays in the year except Christmas Day. These days are mentioned in 2 and 3 Edward VI, c. 19, and in 5 Elizabeth, c. 5; and by 12 Charles II, c. 14, January 30 is ordained to be a day of fasting and repentance for the "martyrdom" of Charles I. But an act passed in 1859, the 22 Victoria, repeals all enactments requiring special Church service to be observed on January 30, May 29, November 5, and October 23. Other days of fasting are occasionally appointed by royal proclamation (*Encyclopædia Metropolitana*, s. v.).

2. *Lutheran Church.*—Luther by no means rejected or discountenanced fasting, but discarded the idea that it could be meritorious (*Comm. on Matt.* vi, 16). The *Augsburg Confession* (art. xxvi) repudiates "diversity of meats" and other traditions; but adds, "The charge, however, that we forbid the mortification of our sinful propensities, as Jovian asserts, is groundless. For our writers have always given instruction concerning the cross which it is the duty of Christians to bear. We moreover teach that it is the duty of every man, by fasting and other exercises, to avoid giving any occasion to sin, but not to merit grace by such works. But this watchfulness over our body is to be observed

always, not on particular days only. On this subject Christ says, Take heed to yourselves lest at any time your hearts be overcharged with surfeiting (Luke xxi, 34). Again, The devils are not cast out but by fasting and prayer (Matt. xvii, 21). And Paul says, I keep under my body, and bring it into subjection (1 Cor. ix, 27). By which he wishes to intimate that this bodily discipline is not designed to merit grace, but to keep the body in a suitable condition for the several duties of our calling. We do not, therefore, object to fasting itself, but to the fact that it is represented as a necessary duty, and that specific days have been fixed for its performance."

3. *Calvin.*—The views of Calvin on fasting have been very generally adopted in the Reformed churches: "Therefore let us say something of fasting, because many, for want of knowing its usefulness, undervalue its necessity, and some reject it as almost superfluous; while, on the other hand, where the use of it is not well understood, it easily degenerates into superstition. Holy and legitimate fasting is directed to three ends, for we practise it either as a restraint on the flesh, to preserve it from licentiousness, or as a preparation for prayers or pious meditations, or as a testimony of our humiliation in the presence of God, when we are desirous of confessing our guilt before him. The first is not often contemplated in public fasting, because all men have not the same constitution or health of body; therefore it is rather more applicable to private fasting. The second end is common to both, such preparation for prayer being necessary to the whole Church, as well as to every one of the faithful in particular. The same may be said of the third, for it will sometimes happen that God will afflict a whole nation with war, pestilence, or some other calamity; under such a common scourge, it behoves all the people to make a confession of their guilt. When the hand of the Lord chastises an individual, he ought to make a similar confession, either alone or with his family. It is true that this acknowledgment lies principally in the disposition of the heart; but when the heart is affected as it ought to be, it can scarcely avoid breaking out into the external expression, and most especially when it promotes the general edification, in order that all, by a public confession of their sin, may unitedly acknowledge the justice of God, and may mutually animate each other by the influence of example. Wherefore fasting, as it is a sign of humiliation, is of more frequent use in public than among individuals in private, though it is common to both, as we have already observed. With regard to the discipline, therefore, of which we are now treating, whenever supplications are to be presented to God on any important occasion, it would be right to enjoin the union of fasting with prayer. Thus, when the faithful at Antioch 'laid their hands on Paul and Barnabas,' the better to recommend their very important ministry to God, they 'fasted' as well as 'prayed.' So, also, when Paul and Barnabas afterwards 'ordained elders in every church,' they used to 'pray with fasting.' In this kind of fasting their only object was that they might be more lively and unembarrassed in prayer. And we find by experience that after a full meal the mind does not aspire towards God so as to be able to enter on prayer, and to continue in it with seriousness and ardor of affection. So we are to understand what Luke says of Anna, that 'she served God with fastings and prayers.' For he does not place the worship of God in fasting, but signifies that by such means that holy woman habituated herself to a constancy in prayer. Such was the fasting of Nehemiah, when he prayed to God with more than common fervor for the deliverance of his people. For this cause Paul declares it to be expedient for the faithful to practise a temporary abstinence from lawful enjoyments, that they may be more at liberty to 'give themselves to fasting and prayer;' for by connecting fasting with

prayer, as an assistance to it, he signifies that fasting is of no importance in itself any further than as it is directed to this end. Besides, from the direction which he gives in that place to husbands and wives, to 'render to each other 'due benevolence,' it is clear that he is not speaking of daily prayers, but of such as require peculiar earnestness of attention. That there may be no mistake respecting the term, let us define what fasting is; for we do not understand it to denote mere temperance and abstinence in eating and drinking, but something more. The life of the faithful, indeed, ought to be so regulated by frugality and sobriety as to exhibit, as far as possible, the appearance of a perpetual fast. But besides this, there is another temporary fast, when we retrace anything from our customary mode of living, either for a day or for any certain time, and prescribe to ourselves a more than commonly rigid and severe abstinence from food. This restriction consists in three things—in time, in quality, and in quantity of food. By time I mean that we should perform, while fasting, those exercises on account of which fasts are instituted. As, for example, if any one fast for solemn prayer, he should not break his fast till he has attended to it. The quality consists in an entire abstinence from dainties, and content with simpler and humbler fare, that our appetite may not be stimulated by delicacies. The rule of quantity is that we eat more sparingly and slightly than usual, only for necessity, and not for pleasure. But it is necessary for us, above all things, to be particularly on our guard against the approaches of superstition, which has heretofore been a great source of injury to the Church. For it were far better that fasting should be entirely disused, than that the practice should be diligently observed, and at the same time corrupted with false and pernicious opinions, into which the world is constantly falling, unless it be prevented by the greatest fidelity and prudence of the pastors. The first caution necessary, and which they should be constantly urging, is that suggested by Joel: 'Rend your heart, and not your garments;' that is, they should admonish the people that God sets no value on fasting unless it be accompanied by a corresponding disposition of heart, a real displeasure against sin, sincere self-abhorrence, true humiliation, and unfeigned grief arising from a fear of God; and that fasting is of no use on any other account than as an additional and subordinate assistance to these things; for nothing is more abominable to God than when men attempt to impose upon him by the presentation of signs and external appearances instead of purity of heart. Therefore he severely reprobates this hypocrisy in the Jews, who imagined they had satisfied God merely by having fasted, while they cherished impious and impure thoughts in their hearts. 'Is it such a fast, saith the Lord, that I have chosen?' The fasting of hypocrites, therefore, is not only superfluous and useless fatigue, but the greatest abomination. Allied to this is another evil, which requires the most vigilant caution, lest it be considered as a meritorious act, or a species of divine service. For as it is a thing indifferent in itself, and possesses no other value than it derives from those ends to which it ought to be directed, it is most pernicious superstition to confound it with works commanded by God, and necessary in themselves, without reference to any other object. Such was formerly the folly of the Manicheans, in the refutation of whom Augustine most clearly shows that fasting is to be held in no other estimation than on account of those ends which I here mention, and that it receives no approbation from God unless it be practised for their sake. The third error is not so impious indeed, yet is pregnant with danger, to enforce it with extreme rigor as one of the principal duties, and to extol it with extravagant encomiums, so that men imagine themselves to have performed a work of peculiar excellence when they have fasted. In this respect I dare not wholly excuse the ancient

fathers from having sown some seeds of superstition, and given occasion to the tyranny which afterwards arose. Their writings contain some sound and judicious sentiments on the subject of fasting, but they also contain extravagant praises, which elevate it to a rank among the principal virtues. And the superstitious observance of Lent had at that time generally prevailed, because the common people considered themselves as performing an eminent act of obedience to God, and the pastors commended it as a holy imitation of Christ; whereas it is plain that Christ fasted, not to set an example to others, but in order that by such an introduction to the preaching of the Gospel, he might prove the doctrine not to be a human invention, but a revelation from heaven" (Calvin, *Institutes*, bk. iv, ch. xii, § 15-20). The *Westminster Confession* declares that "solemn fastings" are, "in their times and seasons," to be used in a holy and religious manner (xxi, v); and the *Westminster Catechism* makes "religious fasting" one of the duties required in the second commandment (quest. 109).

In *Scotland* there is generally a yearly fast "appointed by the kirk-session of the Established Church of the parish, or by concurrence of kirk-sessions in towns, but generally by use and wont fixed as to their date. The fast-day is always some day of the week preceding the *Communion Sunday*, or Sunday set apart in the Presbyterian churches for the Lord's Supper. It is usually appointed as a day for 'fasting, humiliation, and prayer.' Business is generally suspended, shops shut as on a Sunday, and churches opened for public worship. By an act of Parliament passed not many years since, factories are prohibited from carrying on work on the parish fast-day; but, in consequence of the ecclesiastical divisions in Scotland, it has become more common than it once was for agricultural and other kinds of work to be carried on" (Chambers, *Encyclopædia*, s. v.).

*America*.—The New England Puritans rejected the ancient ecclesiastical fast-days. The Pilgrim fathers observed "seasons of fasting and prayer" before sailing from Europe, and after their arrival in America. They admitted the right and duty of the civil rulers to set apart days for fasting and prayer. This right has been recognised, and the duty observed, in most states of the American Union. During the Civil War (1861-5) the President of the United States appointed days of national fasting, which were generally observed by all the churches. The *Methodist Episcopal Church* enjoins "fasting, or abstinence," upon the people in the "General Rules" (*Discipline*, pt. i, ch. i, § 3); advises weekly fasts to her clergy (pt. ii, ch. ii, § 3); and directs that "a fast be held in every society on the Friday preceding every quarterly meeting" (pt. ii, ch. ii, § 17). The Presbyterian Church adopts the doctrine of the Westminster Confession on fasting (see above); makes "public solemn fasting" one of the ordinances established by Christ in the Church (*Form of Government*, ch. vii); ordains a fast-day in the congregation before an ordination (ch. xv), and declares that while "there is no day under the Gospel commanded to be kept holy except the Lord's day, which is the Christian Sabbath, nevertheless, to observe days of fasting and thanksgiving, as the extraordinary dispensations of divine Providence may direct, we judge both scriptural and rational. Fasts and thanksgivings may be observed by individual Christians or families in private; by particular congregations; by a number of congregations contiguous to each other; by the congregations under the care of a presbytery or of a synod; or by all the congregations of our Church. It must be left to the judgment and discretion of every Christian and family to determine when it is proper to observe a private fast or thanksgiving, and to the church-sessions to determine for particular congregations, and to the presbyteries or synods to determine for larger districts. When it is deemed ex-

pedient that a fast or thanksgiving should be general, the call for them must be judged of by the Synod or General Assembly. And if at any time the civil power should think it proper to appoint a fast or thanksgiving, it is the duty of the ministers and people of our communion, as we live under a Christian government, to pay all due respect to the same" (*Directory for Worship*, ch. xiv).

Quart. Review*, 1849, 205 sq.; Augusti, *Denkwürdigkeiten*, x, 311 sq.; Suicer, *Thesaurus*, s. v.  $\nu\eta\sigma\tau\iota\alpha$ ; Ducange, *Glossarium*, s. v. Jejunium; Ferraris, *Promta Bibliotheca*, iv, 867 sq. (ed. Migne); Wesley, *Sermons*, i, 245.

Fat for receiving wine; an old orthography for VAT (q. v.).

Fat (prop.  $\text{כֶּחֶלֶב}$ , *ché'leb*). [For the use of the word as a verb, see FATTED FOWL.] The Hebrews distinguished between the suet, or pure fat of an animal ( $\text{שֶׁמֶן}$ ), and the fat which was intermixed with the lean ( $\text{שֶׁמֶן זָךְ}$ , *oily pieces*, Neh. viii, 10). Certain restrictions were imposed upon them in reference to the former: some parts of the suet, viz. about the stomach, the entrails, the kidneys, and the tail of a sheep, which grows to an excessive size in many Eastern countries, and is a special delicacy, were forbidden to be eaten in the case of animals offered to Jehovah in sacrifice (Lev. iii, 3, 9, 17; vii, 3, 23). The ground of the prohibition was that the fat was the richest part of the animal, and therefore belonged to him (iii, 16). It has been supposed that other reasons were superadded, as that the use of fat was unwholesome in the hot climate of Palestine (Maimonides, *Mora Nebochim*, pt. iii, ch. xlviii). There appears, however, to be no ground for such an assumption (Bähr, *Symbol.* ii, 382). The presentation of the fat as the richest part of the animal was agreeable to the dictates of natural feeling, and to the analogy in dedicating the first-born and first-fruits to God. This was also the ordinary practice even of heathen nations, as instanced in the Homeric descriptions of sacrifices (*Il.* i, 460; ii, 423; *Od.* iii, 457), and in the customs of the Egyptians (Herod. ii, 47), and Persians (Strabo, xv, 732). Accordingly, Abel, who brought the first animal sacrifice, not only presented to the Lord "the firstlings of his flock," but "the fat thereof," which, by virtue of its being the best part, was as much the firstling of the animal itself as the animal was the firstling of the flock (Gen. iv, 4); or if the word here means the *fattest* of his flock, the same idea is essentially implied. Indeed, the term *cheleb* is itself significant of the feeling on which the regulation was based, for it sometimes describes the *best* of any production (Gen. xlv, 18; Numb. xviii, 12; Psa. lxxxi, 16; cxlvii, 14; compare 2 Sam. i, 22; Judg. iii, 29; Isa. x, 16). With regard to the other parts of the fat of sacrifices or the fat of other animals, it might be consumed, with the exception of those dying either by a violent or a natural death (Lev. vii, 24), which might still be used in any other way. The burning of the fat of sacrifices was particularly specified in each kind of offering, whether a peace offering (Lev. iii, 9), consecration offering (viii, 25), sin offering (iv, 8), trespass offering (vii, 3), or redemption offering (Numb. xviii, 17). The Hebrews fully appreciated the luxury of well-fatted meat, and had their stall-fed oxen and calves (1 Kings iv, 23; Jer. xlvi, 21; Luke xv, 23). This was, however, not a usual practice; and even at this day in the East, domestic cattle seldom undergo any preparatory feeding or fattening before being killed. Hence there is little fat in the carcase except that belonging to the parts specified in the prohibition, which is all more or less of the nature of suet. See FOOD.

The parts of the fat or suet of the victims which belong to God, and are especially to be appropriated to the altar, are given in Exod. xxix, 13-22, and Lev. iii, 3-5, as follows: 1. The fat which covers the entrails ( $\text{כֶּחֶלֶב הַכִּבְדִּים הַשְּׂמֵרָה}$ ) = *ἐπιπλοῦς*, as Josephus rightly has it (*Ant.* iii, 9, 2); the *omentum*, which is only to be found in man and mammals, and is very fat in ruminants (comp. Aristot. *Hist. Anim.* i, 16; Pliny, *Hist. Nat.* xi, 80). 2. The fat which accumulates around entrails ( $\text{כֶּחֶלֶב הַכִּבְדִּים}$ ), and is easily separated therefrom, i. e. the reticular adhering to the colon. 3. The two kidneys, with the fat on them, at the internal muscles of the loins ( $\text{כֶּחֶלֶב הַכִּבְדִּים}$ ), as the most fat accumulates near the kidneys (Deut. xxxii, 14; Isa. xxxiv, 6), and to such an extent in sheep that they sometimes die of it (*οἱ νεφοὶ μάλιστα τῶν σπλάγγων ἔχονσι πικρὴν, Aristot. De Part. Anim.* iii, 9, and *Hist. Anim.* iii, 16; Pliny, *Hist. Nat.* xi, 81). 4. The  $\text{כֶּחֶלֶב הַיֶּרֶךְ}$ , *yothe'rath*, which is taken by the Sept. and Josephus (*Ant.* iii, 9, 2) to mean *ὁ λοβὸς τοῦ ἡπατος*, the *greater lobe of the liver*, similarly the Syriac and Chaldee ( $\text{כֶּחֶלֶב הַיֶּרֶךְ}$ ); and is explained by the Talmud (*Chulin*, xlix, 6), Rashi, Kimchi, Solomon ben-Melech, etc., as  $\text{שֶׁמֶן הַיֶּרֶךְ} = \tau\rho\acute{\alpha}\pi\epsilon\zeta\alpha$ , whereby the Greeks, according to Hippocrates, understood the greater and thickest of the five segments of the liver (Bähr, *Symbol.* ii, 254). This meaning of  $\text{כֶּחֶלֶב הַיֶּרֶךְ}$  is ably defended by Bochart (*Hieroz.* lib. ii, c. xlv), and followed by Le Clerc, J. D. Rosenmüller, Kalisch (on Exod. xxix, 13), and others. But the Vulgate, Luther, Tyndale, the Bishops' Bible, the Geneva Bible, the A. V., P'seator, De Wette, Knobel, Fürst, etc., take it to denote *omentum minus*, which is preferable, for the lobes have no accumulation of fat. 5. The tail ( $\text{כֶּחֶלֶב הַזָּנָב}$ , *ayah'*, A. V. "rump") of a sheep (Lev. vii, 3), which, in a certain species (*ovis laticaudata*), contains a great quantity of fat. It is for this reason that the eating of fat is forbidden (Lev. iii, 17). It affords a delicate marrowy substance much used in *pillais* and other messes which require to be lubricated by animal juices. The Rabbinical Jews maintain that the prohibition of it is restricted to the sacrifices, while the Karaite Jews regard the eating of the tail as absolutely forbidden.—Kitto, s. v.; Smith, s. v. See SHEEP.

One of the metaphorical senses of "fat" (in the Hebrew) is noticed above. By a natural figure, "fat" is occasionally put in Scripture for a dull and torpid state of mind, as if the heart were covered with thick fat, and therefore insensible (Psa. xvii, 10). See OIL.

**Fatalism**, the doctrine of an inevitable necessity, implying an omnipotent and arbitrary superior power. It is derived from the Latin *fatum* ("what is spoken or decreed," passive participle of *fari*). The Greeks expressed it also by the passive participle *ἡμορμένη*; but their words *μοῖρα* (*Destiny, the Goddess of Fate*) and *ἄστα* (*decree, destiny, goddess who dispenses fate*) have an active meaning.

I. In Homer, *Moira* has a twofold force; it is sometimes considered as superior to Zeus, then again as inferior to him; a twofold force which Nägelsbach correctly expounds (after Delbrück and Creuzer) by saying that in Homer the monarchical will of Zeus does not appear as directly opposed to the contrary efforts of the other gods. Yet the human mind has a monotheistic tendency even among the heathen, and therefore seeks to give to the heavens one supreme ruler, and to unite all the gods into one exclusive unity. On the other hand, however, this unity is inert and dead, and this leads Homer to identify it with the highest, the living god—with the "total will" of the other gods. The gradual development of Greek philosophy led to the thought of representing the supreme ruling power by *Moira*: so we find it in Herodotus, i, 91, *τὴν περὶ*

*μῆνῃ μοῖραν ἀδυνατὰ ἴσθιν ἀποφυγεῖν καὶ θεῶν.* This agency of Fate was afterwards made to apply to the regulation of the outward life of men, and the conception of Fate as the ruling power of the universe became deeper and more spiritual: so Anaxagoras recognizes *Νοῦς*, the spirit, as ruler of the world; and Plato does the same, especially in *Philebus* (31, 4, *ἐν τῇ τοῦ Διὸς φύσει βασιλικὴν μὲν ψυχὴν, βασιλικὴν δὲ νοῦν ἐγγίγνεσθαι*). This same tendency towards a spiritualization of Fate is found in the tragic authors, especially in Sophocles, who has happily expressed these views in his *Œdipus Coloneus*, 266, 267 (edition Schneidewin): *ἐπεὶ τὰ γ' ἔργα μοι πεποιθότε' ἴσθι μάλλον ἢ δευρακότα* (for my actions are rather to be called my destiny's than my own). But this fate does not exclude guilt on the part of man, for the curse rested from the first on individual sin, as is shown especially in the revelation of fearful guilt in the *Œdipus Rex*, and the possibility of pardon in the *Coloneus*. The Greek tragedy is based on this very antagonism between individual being and the supreme world-power. After Sophocles, the two notions of the word *Μοῖρα* were separated, and each was gradually brought out more distinctly. From Euripides down to the Epicureans a tendency prevailed to make the power of fate subservient to human caprice, and to make it subordinate to *Τύχη* (chance), which plays an important part in Thucydides. Blind chance was made to rule the earth. The Epicureans proclaimed their gods the "essence of pure inactive self-indulgence, indifferent to the condition of mankind and the world," so that, the gods no longer interfering in human affairs, it became matter of indifference whether they were worshipped or not. On the other hand, Stoicism maintained that to live according to the laws of nature, i. e. to resign one's self to the necessary course of things, is the true wisdom of life. In this point, as in others, the views of the Stoics and the Epicureans were directly opposed to each other [see EPICUREAN PHILOSOPHY], yet in their results they arrived at the same point, viz. that against the *inechetable fatum*, whether the result of separate accidental chances or of the general law of nature, there is nothing to be done. The *Moira*, acting according to higher laws incomprehensible to humanity, is thus confounded with blind destiny.

11. The conception of fate which underlies all theories of fatalism is as follows: (1.) Destiny is a dead, blind power; (2.) human liberty is completely and irresistibly controlled by destiny. Under this twofold aspect, fatalism finds its most complete realization in Mohammedanism; but it has also been defended on scientific grounds within the sphere of Christendom. The doctrine of absolute predestination, in its hidden *absolutum decretum* (see Luther, *De servo arbitrio*, and Ullmann, *Studien u. Kritiken*, 1847, i, 2), resembles the heathen conception of fate. In its relation to spiritual and eternal life, fatalism is generally based on (1) the pantheistic view of the world, which swallows up individual freedom and responsibility, so that (as by Spinoza) all our thoughts and actions are represented as but the thoughts and actions of God manifested through us. This leads naturally to (2) the determinism of deism, which considers the world as so ruled by the immutable laws of nature that individual life and actions are but cogs of one of the wheels of the universal machinery; and to modern materialism, according to which thought is but a natural secretion of the brain.

The Christian idea of God is directly opposed to all fatalism, whether pagan or modern materialistic. In Christian thought, God is not blind chance, dead fate, or a dark, unknown force of nature; but God is spirit, a living God, a personal Being, who is love and the Father of love. And this living and personal God has endowed man with his own image, and therefore with freedom, in the exercise of which endowment man is to become himself a participant in the fulfilment of

the divine decrees, a "co-worker" with God, and, as such, not only capable of aiding in the spread and consummation of the kingdom (or royal sway) of God upon the earth, but also bound to aid in it.—Herzog, *Real-Encyclopædie*, iv, 340 sq. (from which this article is chiefly a translation); Cudworth, *Intellectual System of the Universe*, bk. i, chap. i; Hamilton, *Discussions in Philosophy*; Werner, *Geschichte der apolog. Literatur* (Schaffhausen, 1867). See MATERIALISM.

**Father** (פֶּתֶר, a primitive word, but following the analogy of פֶּתֶחַ, to show kindness, Gesenius, *Thesaurus*, p. 6-8; Chaldee, ܦܬܪܐ, πατήρ). Compare SON.

1. This word, besides its obvious and primary sense, bears in Scripture a number of other applications, most of which have, through the use of the Bible, become more or less common in all Christian countries (see Gesenius's *Heb.* and Robinson's *Greek Lex.*).

(1.) *Father* is applied to any ancestor near or remote, or to ancestors ("fathers") in general. The progenitor or founder, or patriarch of a tribe or nation was also pre-eminently its father, as Abraham of the Jews. Examples of this abound. See, for instance, Deut. i, 11; 1 Kings viii, 11; Matt. iii, 9; xxiii, 30; Mark xi, 10; Luke i, 32, 73; vi, 23, 23; John vii, 22, etc. So of the founder or rebuilder of a city (1 Chron. ii, 50-52, etc.).

(2.) *Father* is also applied as a title of respect to any head, chief, ruler, or elder, and especially to kings, prophets, and priests (Judg. xvii, 10; xviii, 19; 1 Sam. x, 12; 2 Kings ii, 12; v, 13; vi, 21; xiii, 14; Prov. iv, 1; Matt. xxiii, 9; Acts vii, 2; xxii, 1; 1 Cor. iv, 15, etc.). Also of protector or guardian (Job xxix, 16; Psa. lxxviii, 5; Deut. xxxii, 6). Hence of seniors, especially of Church fathers. See *below*.

(3.) The author, source, or beginner of anything is also called the father of the same, or of those who follow him. Thus Jabal is called "the father of those who dwell in tents, and have cattle;" and Jubal "the father of all such as handle the harp and the organ" (Gen. iv, 21, 22; comp. Job xxxviii, 28; John viii, 44; Rom. iv, 12). In the Talmud the term father is used to indicate the chief; e. g. the principal of certain works are termed "fathers." Objects whose contact causes pollution are called "fathers" of defilement (Mishna, *Shabb.* vii, 2, vol. ii, p. 29; *Pesach*, i, 6, vol. ii, p. 137, Surenh.). This use of *father* is exceedingly common in the East to this day, especially as applied in the formation of proper names, in which also the most curious Hebrew examples of this usage occur. See *AB-*.

(4.) As an extension of all the foregoing senses, the term father is very often applied to God himself (Gen. xlv, 19, 20; Exod. iv, 22; Deut. xxxii, 6; 2 Sam. vii, 14; Psa. lxxxix, 27, 28; Isa. lxiii, 16; lxiv, 8). Indeed, the analogy of language would point to this, seeing that in the Old Testament, and in all the Syro-Arabian dialects, the originator of anything is constantly called its father. Without doubt, however, God is in a more especial manner, even as by covenant, the Father of the Jews (Jer. xxxi, 9; Isa. lxiii, 16; lxiv, 8; John viii, 41; v, 45; 2 Cor. vi, 18); and also of Christians, or, rather, of all pious and believing persons, who are called "sons of God" (John i, 12; Rom. viii, 16, etc.). Thus Jesus, in speaking to his disciples, calls God their Father (Matt. vi, 4, 8, 15, 18; x, 20, 29; xiii, 43, etc.). The apostles also, for themselves and other Christians, call him "Father" (Rom. i, 7; 1 Cor. i, 3; 2 Cor. i, 2; Gal. i, 4; and many other places). See *ABBA*.

2. The position and authority of the father as the head of the family is expressly assumed and sanctioned in Scripture, as a likeness of that of the Almighty over his creatures, an authority—as Philo remarks—intermediate between human and divine (Philo, *περί γονέων τμήσε*, § 1). It lies, of course, at the root of that so-called patriarchal government (Gen. iii, 16: 1

Gen. xi, 3), which was introductory to the more definite systems that followed, and that in part, but not wholly, superseded it. When, therefore, the name of "father of nations" (אֲבִי הָעַמִּים) was given to Abram, he was thereby held up not only as the ancestor, but as the example of those who should come after him (Gen. xviii, 18, 19; Rom. iv, 17). The father's blessing was regarded as conferring special benefit, but his malediction special injury, on those upon whom it fell (Gen. ix, 25, 27; xxvii, 27-40; xlviii, 15, 20; xlix); and so also the sin of a parent was held to affect, in certain cases, the welfare of his descendants (2 Kings, v, 27), though the law forbade the punishment of the son for his father's transgression (Deut. xxiv, 16; 2 Kings xiv, 6; Ezek. xviii, 20). The command to honor parents is noticed by the apostle Paul as the only one of the Decalogue which bore a distinct promise (Exod. xx, 12; Ephes. vi, 2), and direproof towards them was condemned by the law as one of the worst of crimes (Exod. xxi, 15, 17; 1 Tim. i, 9; comp. Virgil, *Æn.* vi, 609; Aristoph. *Ran.* 274-773). Instances of legal enactment in support of parental authority are found in Exod. xxii, 17; Numb. xxx, 3, 5; xii, 14; Deut. xxi, 18, 21; Lev. xx, 9; xxi, 9; xxii, 12; and the spirit of the law in this direction may be seen in Prov. xiii, 1; xv, 5; xvii, 25; xix, 13; xx, 20; xxviii, 24; xxx, 17; Isa. xlv, 10; Mal. i, 6. The father, however, had not the power of death over his child under the Mosaic law (Deut. xxi, 18-21; Philo, *l. c.*).

From the patriarchal spirit also the principle of respect to age and authority in general appears to be derived. Thus Jacob is described as blessing Pharaoh (Gen. xlvii, 7, 10; comp. Lev. xix, 32; Prov. xvi, 31; Philo, *l. c.* § 6).

The authority of a father was thus very great in patriarchal times; and although the law of Moses required the parent to bring his cause of complaint to the public tribunals (Deut. xxi, 18-21), all the more real powers of parental character were not only left unimpaired, but were made in a great degree the basis of the judicial polity which that law established. The children, and even the grandchildren, continued under the roof of the father and grandfather; they labored on his account, and were the most submissive of his servants. The property of the soil, the power of judgment, the civil rights, belonged to him only, and his sons were merely his instruments and assistants. If a family be compared to a body, then the father was the head, and the sons the members, moving at his will and in his service. There were exceptions, doubtless, but this was the rule, and, with some modifications, it is still the rule throughout the East.

Filial duty and obedience were, indeed, in the eyes of the Jewish legislator, of such high importance that great care was taken that the paternal authority should not be weakened by the withdrawal of a power so liable to fatal and barbarous abuse as that of capital punishment. Any outrage against a parent—a blow, a curse, or incorrigible profligacy—was made a capital crime (Exod. xxi, 15, 17; Lev. xx, 9). If the offence was public, it was taken up by the witnesses as a crime against Jehovah, and the culprit was brought before the magistrates, whether the parent consented or not; and if the offence was hidden within the paternal walls, it devolved on the parents to denounce him and to require his punishment.

It is a beautiful circumstance in the law of Moses that this filial respect is exacted for the mother as well as for the father. The threats and promises of the legislator distinguish not the one from the other; and the fifth commandment associates the father and mother in a precisely equal claim to honor from their children (see Collier, *Espirit de la Législation Mosaique*, ii, 69, 122-129). Comp. WOMAN.

Among Mohammedans parental authority has great weight during the time of pupillage. The son is not

allowed to eat, scarcely to sit, in his father's presence. Disobedience to parents is reckoned one of the most heinous of crimes (Burckhardt, *Notes on Bed.* i, 355; Lane, *Mod. Eg.* i, 84; Atkinson, *Travels in Siberia*, p. 559).—Kitto, s. v.; Smith, s. v.

**Father (GOD THE)** was usually represented in early Christian art by a hand, which was usually extended through a cloud. The principal subjects in which God the Father is represented by a hand are the scenes from the creation: Moses receiving the law, Moses at the burning bush, the sacrifice of Abraham, and the baptism of Christ. The hand is often given as holding out wreaths or crowns to saints and martyrs at their death, or their ascension to Paradise. As early as the fifth century, God the Father is represented as an old man. This symbol predominated during the later Middle Ages, and is the one now universally adopted by Christian artists. The figures of God in the creation by M. Angelo and Raphael, in the Sistine chapel and in the Vatican, are among the grandest conceptions in all art. God the Father is also represented as an old man in the representations of the Trinity (q. v.).—Martigny, *Dictionnaire des Antiquités Chrétiennes*, 1865. (G. F. C.)

**Father-in-law:** 1. חַמ, *cham* (from חָתָן, to join in affinity; see MOTHER-IN-LAW), Gen. xxxviii, 13, 25; 1 Sam. iv, 19, 21. 2. חָתָן, *chothen'* (participle of חָתַן, to marry), one marrying a daughter, Exod. iii, 1; iv, 18; xviii, 1-27; Num. x, 29; Judg. i, 16; iv, 11; xix, 4, 7, 9. 3. *πατερός* (strictly one related by marriage, like No. 1), John xviii, 13. See AFFINITY.

**Father's Brother**, דוד, *dod* (strictly one beloved, a friend, as in Isa. v, 1), an *uncle* (q. v.), Num. xxxvi, 11; 2 Kings xxiv, 17; fem. FATHER'S SISTER, דודא, *dodah'*, Exod. vi, 20, an *aunt* (q. v.).

**Fathers of the Church** (*Patres Ecclesie*), a name applied to certain ancient Christian writers, who have preserved in their writings, to a certain extent, the history, doctrines, and traditions of the early Church. The use of the name "father" for this purpose originated in the Oriental habit of styling the relation of teacher and pupil that of "father" and "son." So Alexander the Great called Aristotle his "father," Elisha calls Elijah his "father" (2 Kings ii, 12); the pupils of the prophets were called "sons of the prophets." At an early period in the Christian Church, this title was given to preachers and teachers; and later, the title "father" (*papa*, pope) was given to bishops especially.

The Greek Church closes the list of the "fathers," properly so called, with John of Damascus († 754), the Latin Church with Gregory the Great († 604). The use of the word "fathers" is by Protestants "limited to the more distinguished teachers of the first five or six centuries, excepting, of course, the apostles, who stand far above them all as the inspired organs of the Holy Ghost. It applies, therefore, to the period of the oecumenical formation of doctrines, before the separation of Eastern and Western Christendom" (Schaff, *Church History*, i, 454). The Roman theologians make the following qualities the criterion of a "Church father," viz. antiquity, orthodoxy, sanctity of life, and the approval of the Church (Fessler, *Institutiones Patrologie*, i, 26). Accordingly, the Roman Church denies the title fathers to such men as Origen, Tertullian, Lactantius, Eusebius, etc., because their writings are not held to be in all respects orthodox; they are designated, not as *patres*, but as *scriptores ecclesiastici* (ecclesiastical writers). At a later period, the title *doctores ecclesie* (doctors of the Church) was given to writers supposed to have the qualities cited above as constituting the criterion of "a father," substituting *eminens eruditio for antiquitas*. A decree of pope Boniface (A. D. 1298) assigns the title *magni ecclesie doctores* to the four Latin fathers Ambrose, Au-

gustine, Jerome, and Gregory the Great. Among the Greeks, the title *doctores ecclesie* was given to Athanasius, Basil, Gregory Nazianzen, and Chrysostom, and the Latins recognise them as such. To a few great men among the scholastics the same title was given, with an additional epithet to designate some special intellectual quality in gift; thus, in the 12th and 13th centuries, the following doctors of the Church were thus honored: Thomas Aquinas, Angelicus; Johannes Bonaventura, Seraphicus; Johannes Duns Scotus, Subtilis; Raimundus Lullius, Illuminatus; Alanus de Insulis (de l'Isle), Universalis; Durandus de S. Pourçain, Resolutissimus; Gregorius de Rimini, Authenticus; Johannes Taulerus, Illuminatus; Johannes Gersonus, Christianissimus; Alexander Haales, Irrefragabilis; Roger Bacon, Admirabilis; William Oecam, Singularis. Since 1839, Bernard of Clairvaux has been included among the "doctors," and, since 1852, Hilary of Poitiers. Chronologically, the fathers are divided into three classes, the apostolical, the anti-Nicene, and post-Nicene.

I. The *Apostolical Fathers* are those Christian writers (of whom any remains are now extant) who are supposed to have been contemporary with one or more of the apostles, that is to say, who lived and wrote before A. D. 120. There are five names usually given as those of the apostolical fathers, i. e. there are five men who lived during the age of the apostles, and who did converse, or might have conversed with them, to whom writings still extant have been ascribed, viz. Barnabas, Clement of Rome, Ignatius, Polycarp, Hermas. The following works are generally counted to these writers: 1. The epistle of Barnabas [see BARNABAS]; 2. Two epistles of Clement, bishop of Rome, to the Corinthians [see CLEMENT OF ROME]; 3. Several epistles of Ignatius, bishop of Antioch [see IGNATIUS]; 4. An epistle of Polycarp, bishop of Smyrna, to the Philippians [see POLYCARP]; 5. The epistle (of an unknown author) to Diognetus [see DIOGNETUS]; 6. The book entitled *Pastor Hermas* [see HERMAS]. Certain fragments of Papias are also commonly included among the apostolical fathers. See PAPIAS. Of the writings attributed to these fathers, some at least are of doubtful genuineness (on this point, see the individual titles referred to). See the article APOSTOLICAL FATHERS, vol. i, p. 815.

II. The *Anti-Nicene Fathers* are those whose writings date before the Council of Nicea, A. D. 325. The chief among them are (lists from Eadie, *Riddle*, Alzo.): Justin Martyr, born probably about A. D. 100; left Palestine 132; presented his first *Apology* to Antoninus about (140 or) 148; wrote his second *Apology* in the reign of Marcus Aurelius, probably about 162-4; has left a variety of other works, and a *Dialogue with Trypho the Jew*; suffered martyrdom at Rome about 165.

Hermias wrote his work, *Derision of the Heathen Philosophers*, probably about 170.

Dionysius of Corinth wrote some epistles; all lost except a very few fragments; fl. 170.

Hegesippus, originally a Jew, wrote *History of the Church*, of which only a few fragments survive, about 175.

Tatian wrote an *Oration against the Greeks*, which has been preserved; died probably about 176.

Athenagoras wrote an *Apology for the Christians*, and also on the resurrection, both of which have been translated into English, 176.

Theophilus, bishop of Antioch, wrote his work on religion to Autolytus about 180; died 181.

Irenæus, bishop of Lyons, Gaul, in the latter part of the second century (became bishop about A. D. 177), wrote his work *Against Heresies*, or *A Refutation and Subversion of Knowledge falsely so called*, between A. D. 182 and 188; died about A. D. 202.

Minucius Felix wrote his *Octavius*, or defence of Christianity, about 208.

Clement of Alexandria succeeded Pantænus in the catechetical school of that city 188 or 199; quitted Alexandria 202; died about 217.

Tertullian became a Montanist about the year 200; his *Apology* was composed (198 or) 205; his work against Marcion, 207; has left a great variety of tracts on the vices and customs of his age—as on the theatre, the dress of females, idolatry, second marriages, the soldier's crown, and on flight in persecution, etc.; died about 240.

Hippolytus, bishop of Portus Romanus, wrote, besides many other pieces, *Philosophoumena*, newly discovered; died about 230.

Origen, born 185; head of the catechetical school at Alexandria 204; went to Rome, and returned to Alexandria, 215; went to Cæsarea, in Palestine, 215; ordained at Cæsarea, and afterwards settled there, about 230; retired to Cappadocia 235; returned to Cæsarea 239; a laborious scholar and critic; compiled a *Hexapla*, or Polyglot Bible; wrote commentaries on Scripture, some of which survive; a treatise on prayer; and a defence against Celsus; thrown into prison 250; died 254.

Cyprian, bishop of Carthage, 248; fled from Carthage 250; returned 251; banished 257; author of epistles, addresses, and tracts; advocate of Episcopacy; suffered martyrdom 258.

Dionysius, surnamed the Great, bishop of Alexandria, a scholar of Origen, 247 or 248; died 265.

Gregory (Thaumaturgus), bishop of Neocæsarea, flourished 245; composed a creed, an oration in praise of Origen, and a paraphrase on Ecclesiastes; died about 270.

Victorinus wrote scholia on the Apocalypse; died 303. Arnobius wrote his treatise of seven books *Against the Gentiles* about 305; died probably about 325.

Lactantius finished his *Institutes* about 320; wrote also on *The Death of Persecutors*, and on *The Wrath of God*; composed a symposium or banquet, and an itinerary, both in verse; died 325.

For the literature, see each of these titles in its alphabetical place. The greater part of this period, down at least to the death of Origen, A. D. 254, may be called the apologetic period of the early Church, and many of the writers of that time belong to the class of apologists (q. v.). The last half of the period was one of construction of doctrines and of polemical discussion of them within the Church. Strife against pagans and pagan philosophy on the one hand, and against Judaic Doctem and Gnosticism on the other, characterizes the whole period (see Neander, *History of Dogmas*, Ryland's translation, i, 33 sq.). "While the so-called apostolical fathers (with few exceptions) were distinguished by a direct practico-ascetical rather than a definite doctrinal activity, the philosophizing tendency allied to Hellenism was in some measure represented by the apologists Justin Martyr, Tatian, Athenagoras, Theophilus of Antioch, and Minucius Felix in the West. On the contrary, Irenæus, as well as Tertullian, and his disciple Cyprian, firmly adhered to the positive dogmatic theology of the Church, the former in a milder and more considerate, the latter in a strict and sometimes gloomy manner. Clement and Origen, both belonging to the Alexandrian school, chiefly developed the speculative aspect of theology. But these contrasts are only relative; for we find, e. g. that Justin Martyr manifests both a leaning towards Hellenism, and a strong Judaizing tendency: that the idealism and criticism of Origen are now and then accompanied with a surprising adherence to the letter; and that Tertullian, notwithstanding his anti-Gnostic tendency, evidently strives after philosophical ideas. It was the characteristic feature of the apologetic period, that the whole system of Christianity as a religious-moral fact was considered and defended rather than particular doctrines. Still, certain doctrines become more prominent, while others receive less atten-

tion. Investigations of a theological and christological nature are certainly more numerous than those of an anthropological character. On this account the doctrine of human liberty is made more conspicuous in this period than later writers approved. Next to theology and christology, eschatology engaged most the attention of Christians at that time, and was more fully developed in the struggle with millenarianism on the one side, and with the scepticism of Grecian philosophers on the other" (Hagenbach, *History of Doctrines*, § 26, 27). A valuable literary history of the ante-Nicene fathers is furnished by Donaldson, *Critical History of Christian Literature and Doctrine, from the death of the Apostles to the Nicene Council* (Lond. 1864, 3 vols. 8vo), a work which shows industry and ability, but is not remarkable for true critical judgment. Dr. Buchanan remarks that "Donaldson argues on the erroneous principle that the teaching of the earlier fathers may be applied as a test, if not of the truth of certain doctrines, at least of their necessity and importance as articles of faith. 'If the early writers were heterodox on the Trinity—if they knew nothing of a satisfaction of divine justice, but spoke only in a vague way of the matter—if they wavered in regard to original sin, some denying it entirely, and others expressing themselves with great uncertainty—if their testimony to the inspiration of the New Testament is unsatisfactory and inconclusive, where was Christianity in those days? Did it really sleep for three long centuries? . . . Or may not the evangelical school be wrong in asserting that it is necessary for a man to believe in original sin, the Trinity, the atonement, and similar dogmas, before he can be a Christian?' (vol. i, p. 64). Dr. Donaldson's work—considered as a 'Critical History of Christian Literature' in the first three centuries—is highly valuable, and exhibits the results of ripe scholarship, and extensive reading and research; but considered as a 'Critical History of Christian Doctrine,' it is far from being a safe guide. His interpretation of many passages in the writings of the fathers is, to say the least, highly questionable, and at direct variance with that of such writers as Bull, and Waterland, and Faber. But, even were it more certain than it is, and did it afford proof that their writings were less in accordance with Scripture than we believe them to have been, we should still fall back on the cardinal principle that they are to be tested by the only infallible standard, the inspired Word of God. 'To the law and to the testimony: if they speak not according to this Word, there is no light in them.' We should then be constrained to say of them, as the prophet said of ancient Israel, 'They have forsaken the word of the Lord, and what wisdom is in them?' but we should have no difficulty in answering the question, Where was Christianity then? for it existed then, as it exists still, in 'the Word of God, the Gospel of our salvation'; and it was neither dead nor asleep, but alive and active in the Church of the Catacombs" (Buchanan, *Doctrine of Justification*, Edinb. 1867, p. 431).

III. *Post-Nicene*.—The principal post-Nicene fathers are as follows:

Eusebius (Pamphili), born about A.D. 270; bishop of Caesarea, in Palestine, 315; was a learned and laborious writer; wrote, besides many other things, the *Evangelical Preparation*, in fifteen books; *Evangelical Demonstration*, in twenty books—the half of which is lost—but both works belong to Apologetics (q. v.); an *Ecclesiastical History*, in ten books; died 340.

Julius Firmicus Maternus, who wrote on the error of profane religions; flourished about 340.

Hilary, bishop of Poitiers, born 305; banished to Phrygia 356; wrote on the Trinity, on councils, against the Arians, with a commentary on the Psalms and Matthew; died 366.

Athanasius, born at Alexandria about 296; present as deacon at the Council of Nicæa 325; bishop of Al-

exandria 326; fled to Rome 341; returned to Alexandria 346; fled to the deserts of Egypt 356; wrote a discourse against the Gentiles, on the Incarnation; against the Arians, on the Incarnation; against Apollinaris, etc.; died 373.

Basil, surnamed the Great, born 329; bishop of Caesarea, in Cappadocia, 370; wrote homilies, expositions, panegyrics, *Hexæmeron*, and letters; died 379.

Ephraim the Syrian, deacon of Edessa; published a variety of commentaries, polemical treatise, and smaller works; died about 379.

Cyril of Jerusalem, born 315; bishop of Jerusalem 350; wrote catechetical discourses; died 386.

Gregory of Nazianzus, born 328; ordained deacon 361; bishop of Suziama 372; bishop of Constantinople 381; wrote discourses, poems, and letters; died about 390.

Gregory of Nyssa, born 351; bishop of Nyssa 372; wrote a *Hexæmeron*, life of Moses, on prayer, along with orations, panegyrics, tracts, and letters; died about 395.

Ambrose, born 340; archbishop of Milan 374; published annotations on Scripture, discourses, and miscellaneous treatises; died about 397.

Epiphanius, bishop of Salamis, born about 330; wrote a *Panarium*, or a treatise on heresies, etc.; died 403.

Chrysostom, born at Antioch about 344; ordained presbyter in that church 386; bishop of Constantinople 398; deprived and restored 403; banished 404; was a most eloquent preacher and voluminous writer; wrote many commentaries, homilies, orations, with several controversial pieces; died 407.

Ruffinus, presbyter of Aquileia, engaged in controversy with Jerome 394; published a great many Latin translations, as well as original works; died 410.

Jerome, born 331; in Rome 363; ordained presbyter about 378; translated or revised the Latin *Vulgate*; wrote commentaries on most of the books of Scripture, controversial tracts, an *Onomasticon*, and lives and works of preceding ecclesiastical writers; died 420.

Theodorus, bishop of Mopsuestia, in Cilicia, about 392; wrote commentaries, in which he expounded the grammatical sense; but only a few brief fragments remain; died about 428.

Augustine, born 354; baptized 387; ordained presbyter at Hippo 391; coadjutor of Valerius, Bishop of Hippo, 395; began his work, *De Civitate Dei*, 402; published Confessions; engaged in controversy with the Pelagians, Donatists, and Manichæans; composed a great variety of tracts bearing on systematic theology and prevalent errors; wrote his *Retractations*, or reviews of his own work, 426; died 430.

Cyril of Alexandria, bishop of Alexandria 513; an ambitious and turbulent defender of orthodoxy; wrote on the Pentateuch, on adoration in spirit, some commentaries on portions of the Old and New Testaments, on the Trinity, against the emperor Julian, and against Nestorius; died 444.

Vincent of Lerins (Vincenotius Lirinensis) wrote his *Commonitorium*, or admonition against profane novelties of heretics, 434; died about 448.

Isidore of Pelusium; wrote tracts on Scripture, on doctrines, on discipline, and on monachism; died 449.

Sedulius, poet, and Scotsman by birth, wrote several hymns, and a *Carmen Paschale*, in verse; flourished about 449.

Theodoret, born 386 (or 393); bishop of Cyrus, in Syria, 423; deprived 449; restored 451; wrote questions on Scripture, commentaries, and a Church history, extending from 325 to 429; a religious history, and an epitome of heretical fables; died 456.

Petrus Chrysologus; wrote a letter to Eutyches and some sermons; died about 456.

Leo I, surnamed the Great, to whom are ascribed let-

ters and sermons; wrote on morals, on the pastorate, and left also homilies, dialogues, and letters; died 461.

Vigilius, bishop of Thapsus; wrote against the heresies of Arius, Nestorius, and on the Trinity; flourished about 480.

Boethius, author of the *Consolation of Philosophy*; put to death 525.

Procopius of Gaza, a commentator on Scripture; flourished about 525.

Aretas, a commentator on the Apocalypse; flourished about 549.

Evagrius, wrote a *Church History*; died 594.

Gregory, bishop of Tours; died 596.

Gregory I, surnamed the Great, bishop of Rome 590; died 604.

Joannes Moschus, monk, died 620.

Isidore of Seville, died 636.

Bede, the *Venerable*, died 735.

John of Damascus, *Dogmatic Theology*, c. 775.

See each of the above names in its alphabetical place in this Cyclopaedia.

IV. *Use and Authority of the Fathers in Theology.*—On this subject there are three opinions: (a.) The Roman and Puseyite view, which puts the "consent of the fathers" (embodying tradition) into the rule of faith, along with Scripture. See FAITH, RULE OF. (b.) That of the High-Church writers, who, though they acknowledge the Scriptures as the only rule of faith, yet appeal to the fathers as the proper expositors of Scripture doctrine, and denounce as arrogant and presumptuous those who attempt to oppose modern opinions to what is held to be the sentiment of Christian antiquity. (c.) The Protestant view, according to which the fathers are to be treated, like other theological writers, with the deference and respect to which their learning and their virtues may entitle them. "In reading the fathers we must always bear in mind that the Scriptures are the only rule of faith, and that we have no right to insist upon the reception, as an article of faith, of any doctrine which is not to be found clearly revealed in Scripture, or which is not deducible from Scripture. Still, the judgment of antiquity on disputed points may be useful; and while we should not put these writers into the position of judges, they may be regarded as competent witnesses. They are also the historians of the Church, and report its customs in successive ages; we must, therefore, have recourse to their writings for information on matters of ecclesiastical antiquity, just as we refer to the writings of heathen orators, historians, and poets for information with respect to Roman or Grecian antiquities" (Riddle, *Christian Antiquities*, p. 56).

1. The scholastic theology (q. v.) began with comments upon citations from the fathers, considered as authoritative (*sententiae*). When the Reformation began, the Roman divines found themselves driven anew to the fathers for authority for the doctrines and practices which Luther and his coadjutors showed to be without foundation in Scripture. More loudly than even the scholastics did the controvertists of this period proclaim the authority of patristic tradition in settling questions of faith. We have here a clear polemical reason for the view taken of the fathers in Roman theology (see it stated in Alzog, *Patrologie*, § 3; and compare the articles FAITH, RULE OF; TRADITION). Not unnaturally, then, have the Roman theologians been the most diligent workers in this field of Christian literature. But, on the other hand, the Roman theory that questions of doctrine can only be settled by councils (or by pope and council), has not been without effect in leading Roman writers to depreciate the early writers, or, at least, to see their defects clearly. So Petavius, whose *Opus De Theologicis Dogmatibus* (Paris, 1644-50; new edit. vol. i, Rome, 1857, fol.) is a store-house of patristical learning, points out the theological errors of Athenagoras, Tertullian, and

others, with great clearness. So also J. H. Newman, in the Introduction to his *Essay on the Development of Christian Doctrine* (p. 12-15, N. Y. edit.), dwells upon the "incompleteness" and even of the "errors" of the ante-Nicene theology, even in the hands of such fathers as Irenaeus, Gregory, and Cyprian. This whole Introduction may be considered as an argument against the so-called Tractarian view of the authority of the fathers, and especially against the validity and practicability of the much-vaunted *dictum* of Vincentius Lirinensis (q. v.), *quod semper, quod ubique, quod ab omnibus traditum est*. All the recent Roman writers who adopt the theory of "development" (q. v.) write in the same vein.

2. The Protestant theologians have, until a late period at least, been divided into two wings on this question of the "right use of the fathers." One of these wings may be represented by Milton († 1674) and by Daillé († 1670). Milton, in his tract on *Prelatical Episcopacy*, speaks, in his strong way, of those who, "not content with the plentiful and wholesome fountains of Scripture, seek to themselves teachers, and cannot think any doubt resolved until they run to that undigested heap and fry of authors which they call antiquity. Whatever time, or the heedless hand of blind chance, hath drawn down from of old to this present in her huge drag-net, whether fish or sea-weed, shells or shrubs, unpicked, unchosen, those are the fathers." But yet, he adds, in another part of the same tract, "He that thinks it the part of a well-learned man to have read diligently the ancient stories of the Church, and to be no stranger in the volumes of the fathers, shall have all judicious men consenting with him; not hereby to control and new-fangle the Scriptures, God forbid! but to mark how corruption and apostasy crept in by degrees, and to gather up, wherever we find the remaining sparks of original truth, wherewith to stop the mouths of our adversaries, and to bridle them with their own curb who willingly pass by that which is orthodox in them, and studiously cull out that which is commentitious and best for their turns; not weighing the fathers in the balance of Scripture, but Scripture in the balance of the fathers. If we, therefore, making first the Gospel our rule and oracle, shall take the good which we light on in the fathers, and set it to oppose the evil which other men seek from them, in this way of skirmish we shall easily master all superstition and false doctrine; but if we turn this our discreet and wary usage of them into a blind devotion towards them, and whatsoever we find written by them, we both forsake our own grounds and reasons which led us at first to part from Rome, that is, to hold the Scriptures against all antiquity; we remove our cause into our adversaries' own court, and take up there those cast principles which will soon cause us to solder up with them again, inasmuch as, believing antiquity for itself in any one point, we bring an engagement upon ourselves of assenting to all that it charges upon us." Milton, it is plain, was writing against the Anglican admirers of antiquity as much as against the Roman Catholics.

Daillé wrote a treatise, *De Vero Usu Patrum* (1636; Am. ed. *The Right Use of the Fathers*, Philadel. 1842, 12mo), which formed an epoch in the history of opinion on this subject. Warburton, in his *Introduction to Julian*, speaks of the work, its occasion and issues, as follows: "When the great defection was made from the Church of Rome back again to the Church of Christ, the Reformed, though they shook off the tyranny of the pope, could not disengage themselves from the unbounded authority of the fathers, but carried that prejudice with them, as they did some others of a worse complexion, into the Protestant religion. For in sacred matters, as novelty is suspicious and antiquity venerable, they thought it for their credit to have the fathers on their side. They seemed neither to consider antiquity in general as a thing relative,

nor Christian antiquity as a thing positive; either of which would have shown them that the fathers themselves were modern compared to that authority on which the Reformation was founded, and that the Gospel was that true antiquity on which all its followers should repose themselves. The consequence of which unhappy error was that, in the long appeal to reason between Protestants and Papists, both of them going on a common principle of the decisive authority of the fathers, enabled the latter to support their credit against all the evidence of common sense and sacred Scripture. At length an excellent writer of the *Reformed* [Daillé], observing that the controversy was likely to be endless; for, though the gross corruptions of Popery were certainly later than the third, fourth, and fifth centuries, to which the appeal was usually made, yet the seeds of them being sown, and beginning to pullulate, it was but too plain there was hold enough for a skilful debater to draw the fathers to his own side, and make them water the sprouts they had been planting: observing this, I say, he wisely projected to shift the ground, and force the disputants to vary their method both of attack and defence. In order to this, he composed a discourse of the *True Use of the Fathers*, in which, with uncommon learning and strength of argument, he showed that the fathers were incompetent deciders of the controversies now on foot, since the points in question were not formed into articles till long after the ages in which they lived. This was bringing the fathers from the bench to the table, degrading them from the rank of judges into the class of simple evidence; in which, too, they were not to speak, like *Irish* evidence, in every cause where they were wanted, but only to such matters as were agreed to be within their knowledge. Had this learned critic stopped here, his book had been free from blame; but, at the same time, his purpose had in all likelihood proved very ineffectual, for the obliquity of old prejudices is not to be set straight by reducing it to that line of right which barely restores it to integrity. He went much farther; and by showing occasionally that they were absurd interpreters of Holy Writ, that they were bad reasoners in morals and very loose evidence in facts, he seemed willing to have his readers infer that, even though they had been masters of the subject, yet these other defects would have rendered them very unqualified deciders. However, the work of this famous foreigner had great consequences, and especially with us here at home. The more learned among the nobility (which at that time was of the republic of letters) were the first who emancipated themselves from the general prejudice. It brought the excellent lord Falkland to think moderately of the fathers, and to turn his theological inquiries into a more useful channel; and his great rival in arts, the famous lord Digby, found it of such use to him in his defence of the Reformation against his cousin Sir Kenelm that he has even epitomized it in his fine letter on that subject. But what it has chiefly to boast of is that it gave birth to the two best defenses ever written on the two best subjects, *religion and liberty*—I mean Mr. Chillingworth's *Religion of Protestants*, and Dr. Jeremy Taylor's *Liberty of Prophesying*. In a word, it may be truly said to be the store-house from whence all who have since written popularly on the character of the fathers have derived their materials" (cited in *Preface* to the Philadelphia edition of Daillé).

3. The other Protestant wing consists of the early writers after the Reformation who sought in the fathers to find weapons against Rome, and of their successors, especially in the Church of England, who have favored what are called High-Church views. Among Continental writers, Scultetus (*Medulla Theologie Patrum Synoptica*, Frankfort, 1598; Heidelb. 1613; Frankfort, 1634) sought to show that the ante-Nicene fathers had been corrupted and misinterpreted by Roman writers, and that Protestant doctrines were nearer to the an-

cient than the Roman Catholic doctrines. The Anglican divines, from an early period of the Reformation, made great use of the fathers in the controversy with Rome. Moreover, they found, or believed that they found, the fathers very serviceable in their warfare for episcopacy. Patristic studies became fashionable in the Church; the great names of Bull, Waterland, Usher, Andrews, and many others, show a list of patristical scholars hardly excelled in the Roman schools. Usher set great store upon the study of the fathers, not simply on polemical, but also on scientific grounds. Dr. Parr says of him: "Indeed, he had so great an esteem of the ancient authors for the acquiring any solid learning, whether sacred or profane, that his advice to young students, either in divinity or antiquity, was, not to spend too much time in epitomes, but to set themselves to read the ancient authors themselves; as, to begin with the fathers, and to read them according to the ages in which they lived (which was the method he had taken himself), and, together with them, carefully to peruse the Church historians that treated of that age in which those fathers lived, by which means the student would be better able to perceive the reason and meaning of divers passages in their writings (which otherwise would be obscure) when he knew the original and growth of those heresies and heterodox opinions against which they wrote, and may also better judge what doctrines, ceremonies, and opinions prevailed in the Church in every age, and by what means introduced." Bull and Waterland made great use of the fathers in their discussions of the Trinity. Waterland writes against Daillé's charges of obscurity in the fathers (*Works*, Oxford, 6 vols. 8vo); he also wrote on the use and value of ecclesiastical antiquity in general (iii, 601-655), and made a reply to Barbeyrac's *Morale des Pères de l'Église* (Amst. 1728). The great dissenting scholar, Dr. Lardner, applied the fathers in an apologetical way, with rare learning and skill, in his *Credibility of the Gospel History* (latest edition, in his *Works*, 10 vols. 8vo, London, 1827). He gives brief but painstaking notices of the history and literature of each of the writers cited, and his work is to this day one of the most useful introductions to the study of the writings of antiquity.

There was much controversy in the 18th century about the fathers, generally polemical, and inspired rather by the controversial spirit than by the love of truth. So Priestley attacked the fathers in his *Corruptions of Christianity* (1782). Bishop Horsley replied to him; and a voluminous issue of tracts followed from both parties (see Horsley, *Tracts in controversy with Dr. Priestley on the belief of the first Ages with regard to our Lord's Divinity* (3d ed. Dundee, 1812). Middleton's *Free Inquiry into the miraculous Powers attributed to the Early Church* (*Works*, 1755, vol. i) also gave rise to a copious controversy. John Wesley, in reply to it, says that "Middleton seeks to prove that all the primitive fathers were fools or knaves, and most of them both one and the other." He vindicates the ante-Nicene fathers from Middleton's charge that they held to all the chief "corruptions of Popery." In his summing up he says of the early fathers, "I allow that some of these had not strong natural sense, that few of them had much learning, and none the assistances which our age enjoys in some respects above all that went before. Hence I doubt not but whoever will be at the pains of reading over their writings for that poor end will find many mistakes, many weak suppositions, and many ill-drawn conclusions. And yet I exceedingly reverence them, as well as their writings, and esteem them very highly in love. I reverence them because they were Christians; and I reverence their writings because they describe true genuine Christianity, and direct us to the strongest evidence of the Christian doctrine" (*Works*, N. Y. ed., v, 705-761).

4. A new impulse was given to the study of the fa-

thers in England by the so-called Catholic revival in that Church in the first half of the 19th century. The old reverence for their authority, and even more, a blind following of their guidance, seemed to take possession of the leaders of that movement. One of its best fruits was the publication of the *Library of the Fathers* (see below). The movement gave rise, as is well known, to a bitter controversy, reopening the whole question of the character of the fathers, their trustworthiness as witnesses, their authority as teachers, and the general utility of studying their writings. We cite a few specimens:

Coleridge, in his *Notes on Hacket*, especially on his *Sermons*, remarks: "Let any competent judge read Hacket's life of archbishop Williams, and then these sermons, and so measure the stultifying, nugifying effect of a blind and uncritical study of the fathers, and the exclusive prepossession in favor of their authority in the minds of many of our Church dignitaries in the reign of Charles I" (*Works*, Harpers' ed. N. Y., v, 128).

Dr. Arnold, of Rugby, who was a hearty hater of the Tractarian movement, writes on the authority of the fathers as follows: "In fact, it would greatly help to clear this question if we understand what we mean by allowing or denying the authority of the so-called fathers. The term *authority* is ambiguous, and, according to the sense in which I use it, I should either acknowledge it or deny it. The writers of the first four or of the first seven centuries have authority just as the scholiasts and ancient commentators have; some of them, and in some points, are of weight singly; the agreement of many of them has much weight; the agreement of almost all of them would have great weight. In this sense I acknowledge their authority, and it would be against all sound principles of criticism to deny it. But if by authority is meant a *decisive* authority, a judgment which may not be questioned, then the claim of authority in such a case, for any man or set of men, is either a folly or a revelation. Such an authority is not human, but divine: if any man pretends to possess it, let him show God's clear warrant for his pretension, or he must be regarded as a deceiver or a madman. But it may be said that an authority not to be questioned was conferred by the Roman law on the opinions of a certain number of great lawyers: if a judge believed that their interpretation of the law was erroneous, he yet was not at liberty to follow his own private judgment in departing from it. Why may not the same thing be allowed in the Church? or why may not the interpretations of Cyprian, or Athanasius, or Augustine, or Chrysostom be as decisive, with respect to the true sense of the Scriptures, as those of Gaius, Paulus, Modestinus, Ulpian, and Papinian were acknowledged to be with respect to the sense of the Roman law? The answer is, that the emperor's edict could absolve the judge from following his own convictions about the sense of the law, because it gave to the authorized interpretation the force of law. The text, as the judge interpreted it, was a law repealed; the comment of the great lawyers was now a law in its room. As a mere literary composition, he might interpret it rightly, and Gaius or Papinian might be wrong; but if his interpretation was ever so right grammatically or critically, yet legally it was nothing to the purpose; Gaius's interpretation had superseded it, and was now the law which he was bound to obey. But in the Church, the only point to be aimed at is the discovery of the true meaning of the text of the divine law; no human power can invest the comment with equal authority. The emperor said, and might say to his judges, "You need not consider what was the meaning of the decemvirs when they wrote the Twelve Tables, or of Aquilius when he drew up the Aquilian law. The law for you is not what the decemvirs may have meant, but what their interpreters meant; the decemvirs' meaning, if it was their meaning, is no longer the law of Rome." But

who dare say to a Christian, "You need not consider what was the meaning of our Lord and his apostles; the law for you now is the meaning of Cyprian, or Ambrose, or Chrysostom; that meaning has superseded the meaning of Christ." A Christian must find out Christ's meaning, and believe that he has found it, or else he must still seek for it. It is a matter, not of outward submission, but of inward faith; and if in our inward mind we are persuaded that the interpreter has mistaken our Lord's meaning, how can we by possibility adopt that interpretation in faith?" (*Miscellaneous Works*, N. Y. 1845, p. 274).

Archdeacon Hare (in his notes to the *Mission of the Comforter*) seeks to show that even the greatest of the fathers were inferior, in their understanding of Scripture, to the great divines of the Reformation. "There is much truth," he says, "though perhaps not without some exaggeration of phrase, in what Coleridge says (*Remains*, iii, 276) with reference to Luther, Melancthon, and Calvin, that 'the least of them was not inferior to Augustine, and worth a brigade of the Cyprians, Firmilians, and the like.' Surely there is nothing surprising in this. The marvel, the contradiction to the whole course of history would be if this were not the case, unless we suppose that the special illumination which was granted to the apostles was bestowed on the chief teachers of Christianity down to the last of the fathers, was then withdrawn, and has been withheld ever since. But for such a limitation and restriction of the gifts of the Spirit no ground can be discovered, either in Scripture or in the nature of man; nor does the history of the Church present any facts to support it. . . . It is next to a moral impossibility that men living in the decrepitude of the ancient world, under the relaxing and palsying influences of the Roman and Byzantine empires, when all intellectual and moral life was fast waning away, and the grand and stirring ideas and aims which had drawn forth the energies of the classical nations in their prime had been superseded by rhetorical tumor and allegorical and grammatical trifling, should have mounted to such a pitch of intellectual power as to be beyond the reach of the noblest minds in the age when all the faculties of the new world were bursting into life, and when one region of power after another was laid open to man, and called him to rise up and take possession of it. . . . There is no antecedent improbability that a theologian in the sixteenth century should be quite as wise and as sound an expounder of theological truth as one in the fourth or fifth. Though the earlier divines may have had certain special advantages, the advantages enjoyed by those in the later period were far greater and more important; and if they had peculiar temptations to lead them astray, so had the others. The epoch at which a man lives does not afford us a criterion for judging of the truth of what he says, except so far as his testimony may be appealed to concerning facts; in other respects the value of his writings must be determined on different grounds by candid and intelligent criticism. Nor is such criticism less needful with regard to the fathers than to any other body of writers. . . . To those who study the fathers critically and discerningly they still yield grains of precious gold in abundance, as we see in the excellent exegetical writings of Mr. Trench. But the superstitious and idolatrous are ever fond of displaying their dotage by picking out as the special objects of their complacency not that which is really valuable—other men might approve of that—but that which in itself is worthless, nay, mawkishly silly or wildly absurd. . . . And with what exactitude is the training of some of our patrolers who are lapsing into Romanism here described! The issue, indeed, so far as we are at present acquainted with it, has been mainly in one direction—towards Rome. This is not because the fathers of the first four or five centuries are favorable to the errors and corruptions of Rome,

The contest on this point has been waged again and again, and the victory, in the main, has always been on our side. But the very habit of looking with prostrate minds to outward human authority, and that, too, authority so remote from the special wants and yearnings of our age, and incapable of speaking to us with that intelligent fellow-feeling which elicits the responsive activity of our own spirits—to authority, therefore, which can only speak imperatively, except to the few whose understandings are mature enough to consult it critically, and to distinguish the true from the erroneous, the relevant from the irrelevant—tends to breed an imbecile tone of judgment which is incapable of standing alone, and will not be content with the helps wherewith God has supplied us, but craves restlessly for some absolute authority whereby it may be enabled to walk in leading-strings all its life long. Such minds, when one prop after another gives way under them, as they find out that no father can be appealed to as an absolute authority, least of all on the particular questions which agitate our times the most, will try to save themselves from falling into infidelity by catching desperately hold of infallibility. And how long will this bear them up?" (Hare, *Vindication of Luther*, p. 76-82).

5. But some of the opponents of an undue reverence for the fathers have not been wanting in just appreciation of their historical value. Dr. W. L. Alexander (*Anglo-Catholicism not Apostolical*, Edinb. 1843, 8vo) gives the following caution against under-estimating the importance and value of the fathers: "There has been among Protestants a great deal of foolish talking and much jesting that is anything but convenient upon this subject. Men who have never read a page of the fathers, and who could not read one were they to try, have deemed themselves at liberty to speak in terms of scoffing and supercilious contempt of these venerable luminaries of the early Church. Because Clement of Rome believed in the existence of the phoenix, and because Justin Martyr thought the sons of God who are said in Genesis to have intermarried with the daughters of men were angels, who for the loves of earth were willing to forego the joys of heaven; and because legends and old wives' fables enow are found in almost all the fathers, it has been deemed wise to reject, despise, and ridicule the whole body of their writings. The least reflection will suffice to show the unsoundness of such an inference. What should we say of one who, because lord Bacon held many opinions which modern science has proved to be false, should treat the *Novum Organum* with contempt? or of one who should deem himself entitled to scoff at Richard Baxter because in his *Saints' Rest* that able and excellent man tries to prove the existence of Satan by quoting instances of his apparitions, and of his power over witches? There is no man, however good or great, that can get quite beyond the errors and credulities of his age. It becomes us, therefore, in dealing with the writings of a former generation, to take care that, in rejecting the bad, we do not also despise the good; and especially that we be not found availing ourselves of advantages which have reached us through the medium of these writings, while we ignorantly and ungratefully dishonor the memory of those by whom these writings were penned." In the height of the so-called Tractarian controversy in England, Isaac Taylor wrote his *Ancient Christianity and the Doctrines of the Oxford Tracts* (Lond. 1839, 2 vols. 8vo; 2d ed. 1844; reprint of vol. I, Phila. 1840, 12mo) for the purpose of laying "open the real condition, moral, spiritual, and ecclesiastical, of the ancient Church;" and the chief aim and tendency of the book is to lessen the authority of the fathers, especially of those of the ante-Nicene period. Yet even he devotes a chapter to show the dependence of the modern Church upon the ancient, and to depreciate a "setting at naught" of patristical learning.

"It is not, we may be sure, those who possess much of this indispensable learning that in any such way set it at naught; and it is an acknowledged rule in all walks of science and literature that the scoffs and captious objections of the ignorant need not be seriously replied to—know what you are speaking of, and then condemn it." Now the mere fact of applying *any* comprehensive terms, either of admiration or contempt, to a body and series of writers, stretching through seven hundred or a thousand years, and these writers natives as they were of distant countries, some of them simple and rude, while others were erudite and accomplished, may be taken as a proof of heedlessness, regarding the matter in hand, sufficient to excuse a silent disregard of the objection it involves. These 'fathers,' thus grouped as a little band by the objectors, were some of them men of as brilliant genius as any age has produced; some commanding a flowing and vigorous eloquence, some an extensive erudition, some conversant with the great world, some whose meditations had been ripened by years of seclusion, some of them the only historians of the times in which they lived, some the chiefs of the philosophy of their age; and if we are to speak of the whole as a series or body of writers, they are the men who, during a long era of deepening barbarism, still held the lamp of knowledge and learning, and, in fact, afford us almost all that we can now know, intimately, of the condition of the nations surrounding the Mediterranean, from the extinction of the classic fire to the time of its rekindling in the fourteenth century. The Church was the ark of all things that had life during a deluge of seven hundred years. Such is the group which is often conveniently dismissed with a concise phrase of contempt by some! It may be suspected that very many of the delighted admirers of the *History of the Decline and Fall of the Roman Empire* are little aware of the extent of Gibbon's obligations to—the fathers. Were it possible to draw off from that seductive work the entire materials derived by the indefatigable author from the ecclesiastical compartment of his library, it is no small proportion of the splendor, the accuracy, the correct drawing, the vivid coloring, which are its charm and praise, that would be found wanting. Well would it have been if some of the professed champions and historians of Christianity had been as thoroughly conversant with the remains of Christian antiquity as was its most dangerous assailant. The ignorance of which we are here complaining has once endangered our faith as Christians, and it is now endangering our faith as Protestants. Nearly of the same quality, and usually advanced by the same parties, is the portentous insinuation, or the bold and appalling averment, that there was little or no genuine Christianity in the world from the times of Justin Martyr to those of Wickliffe, or of Luther! and the inference from this assumption is that we are far more likely to be led astray than edified by looking into the literature of this vast territory of religious darkness. I must leave it to those who entertain any such sombre belief as this to reply, in the best manner they are able, those fiery darts of infidelity which will not fail to be hurled at Christianity itself as often as the opinion is professed. Such persons, too, must expound as they can our Lord's parting promise to his servants. Notions of this sort, and there are many of like kind, all take their rise from some narrow and sectarian hypothesis concerning Christianity. We do not, perhaps, find, during certain cycles of the Church's history, that style or dialect which, by an intimate association of ideas, has combined itself with our religious sentiments, and therefore it is to us and our peculiar feelings as if Christianity itself had actually not been extant at such times. If these are our feelings, it is well that we get rid of them with all speed. Christianity is absolute truth, bearing with various effect, from age to age, upon our distorted and discolored human nature,

but never so powerfully pervading the foreign substance it enters as to undergo no deflections itself, or to take no stains; and as its influence varies, from age to age, in intensity, as well as in the particular direction it may take, so does it exhibit, from age to age, great variations of form and hue. But the men of any one age indulge too much the overweening temper that attaches always to human nature when they say to themselves, *our* Christianity is absolute Christianity, but that of such or such an age was a mere shadow of it. All mystification apart, as well as its superstitions and overweening deference to antiquity, nothing can be more simple than the facts on which rests the legitimate use and value of the ancient documents of Christianity, considered as the repositories of those practices and opinions which, obscurely or ambiguously alluded to in the canonical writings, are found, drawn forth, and illustrated in the records of the times immediately succeeding. These records contain at once a testimony in behalf of the capital articles of our faith and an exposition of minor sentiments and ecclesiastical usages, neither of which can be surrendered without some serious loss and damage" (Taylor, *Ancient Christianity*, 8vo ed. p. 66-71).

6. The more recent tendency among the theologians of Germany, England, and America is to study the fathers more thoroughly than ever, but to study them in a scientific way, for historical rather than polemical and dogmatical ends: or, where dogmatic interests are involved, to use the fathers historically, and not as authorities. The terms Patristics and Patrology have come into use to designate the history and literature of the fathers on the one hand [see PATRISTICS], and their theology on the other [see PATROLOGY]. These branches have not yet taken fully scientific shape, but they are on the way to it (see the references below).

IV. *Collective Editions of the Fathers.*—1. The first great collection was that of De la Bigne, who formed the idea of a collection of the fathers with a view of opposing the doctrines of the French Protestants. This scheme met with the approbation of his superiors in the Sorbonne, and the first eight volumes appeared at Paris in 1575, and the 9th in 1579. It is entitled *Bibliotheca Veterum Patrum et Antiquorum Scriptorum Ecclesiasticorum Latine*, and it contained about 200 writers. The 2d edit., somewhat improved, was published at Paris in 1589, 9 vols. fol. The 3d edit. (Paris, 1609, 11 vols. fol.) has the addition of an *Auctuarium*. In these editions the writers are classed according to subjects. The 4th edit., or rather a new work by the professors of Cologne, has the writers arranged in chronological order. It was printed at Cologne in 1608, in 14 vols. fol., to which in 1622 a supplement in one vol. was added. The 5th edit. (or 4th of De la Bigne) was published at Paris in 1624, in 10 vols. fol., with the addition of an *Auctuarium Græco-Latinum* compiled by Le Duc (the Jesuit *Fronto Ducessus*), and in 1629 a *Supplementum Latinum* in two vols. was added. The 6th edit. (or 5th of De la Bigne), printed at Paris in 1634, in 17 vols. fol., contains the preceding, with the *Auctuarium* and *Supplementum* incorporated. The 7th edit. in 1654 is merely a reprint of the last. 2. In 1677 appeared at Lyons (27 vols. fol.) the *Bibliotheca Patrum*, which generally and deservedly bears the name of *Bibliotheca Maxima Patrum Lugdunensis*. It contains nearly all the writers found in the preceding works, together with many others (*Latin* only), chronologically arranged. 3. After this gigantic undertaking, no similar work appeared until that of André Galland was published, under the title of *Bibliotheca veterum Patrum antiquorumque Scriptorum Ecclesiasticorum postremi Lugdunensi multo locupletior atque accuratior*, in 14 vols. fol. (Venice, 1766-1781). The Greek texts are given, with Latin versions. Galland omits many authors given in the *Bibl. Mar.*, but adds also 180 not given in it. 4. The most complete edition of both Greek and Latin fathers is that of Migne, *Patrologiæ*

*Cursus Completus, seu Bibliotheca Universalis, integra, etc., Omnium SS. Patrum, Doctorum, Scriptorumque Ecclesiasticorum* (Paris, 1844-1867). This immense collection includes all the Latin writers from the apostolical age down to the time of Innocent III (A. D. 1216), and the Greeks down to the time of the Council of Florence (A. D. 1439). In most cases the Benedictine texts are followed. Ample indexes are given, both alphabetical and analytical, of the Latin fathers; those for the Greek, unfortunately, were not all finished when Migne's establishment was burned down in 1868. The Latin fathers fill, with the indexes, two hundred and twenty-two volumes imperial octavo. The Greek writers (with Latin versions) take up one hundred and sixty-seven volumes of the same size. The Latin version of the Greek fathers is also published separately in eighty-four volumes. For purposes of reference, there can be no question that this is the most convenient series of the fathers and ecclesiastical writers ever published. Complaints are made of many of the volumes (and justly) that sufficient care has not been taken with the editing; and it is further charged that, in some cases, the old literary policy of the Church of Rome, of modifying, omitting, and even garbling, for polemical purposes, has been followed by Migne. For the study of special authors there are, certainly, editions to be had more accurate and trustworthy than Migne's; and no student who desires to be thorough in critical study would ever be satisfied without comparison of various editions. But with all drawbacks, the fact remains that the *Cursus Completus Patrologiæ* is an indispensable necessity to every large theological or historical library.

*Incomplete Collections and Translations.*—Among these we cite, 1. A useful abridgment or analysis, in alphabetical order, viz. *Bib. Mar. Patrum in Epitomen redacta* (Augsb. 1719, 2 vols. fol.); 2. Combefis, *Græco-Lat. Patrum Bibliothecæ Novum Auctuarium* (7618); also his *Bibliothecæ Græcorum Patrum Auctuarium Novissimum* (2 parts, 1672); 3. Canisius, *Antiquæ Lectioes seu varia veter. monumenta* (Ingolstadt, 1602), enlarged by Basnage (Amst. 1672, 4 vols. fol.); 4. Montfaucon, *Collectio Nova Patrum et Script. Græcorum* (Paris, 1706, 2 vols. fol.); 5. D'Achery, *Spicilegium sive collectio vet. aliquot Scriptorum* (Paris, 1655-77, 13 vols.); Par. 1723, 3 vols. fol.); 6. Grabe, *Spicilegium SS. Patrum ut et hæretic. seculi post Christ. I-III* (2d edit. Oxon. 1714, 2 vols. 8vo); 7. Martène et Durand, *Amplissima collectio vet. script. et monument. hist.* (Paris, 1724-33, 9 vols. fol.); 8. Routh, *Scriptorium Ecclesiasticorum Opusculum* (2d edit. Oxford, 1840, 2 vols. 8vo); 9. Routh, *Reliquiæ Sacrae, sive auctorum fere jam desperatorum 2 et 3 sæculi, accedunt synodi et epist. canon. Nicæni.* (Oxf. 1846 8, 5 vols. 8vo); 10. Angelo Mai, *Script. vet. nova collectio* (Romæ, 1825-38, 10 vols. 4to); 11. Mai, *Spicilegium Romanum* (Romæ, 1839-44, 10 vols. 8vo); 12. Mai, *Nova Patrum Bibliotheca* (Rom. 1852, 7 vols. 4to); 13. Pitra, *Spicilegium Solesmense* (Par. 1852 sq., 4 vols. 8vo); 14. (*Oxford Selection*), *Bib. Patr. Eccl. Catholice, qui ante orientis et occidentis schisma floruerunt*; delecta Presbyterorum quorundam Oxoniensium (Oxf. 8vo, 1838, and following years—still issuing); 15. (*Oxford translation*), *Library of the Fathers of the Holy Catholic Church anterior to the division of the East and West* (translated by members of the English Church; edited by E. B. Pusey, J. Keble, C. Marriott, Oxford, 8vo, 1839, and following years; 40 vols. issued); 16. *Bibliotheca Patrum concionatoria, hoc est, anni totius, evangelia, festa dominica, etc., homilias atque sermonibus adornata SS. Patr. et script. eccles. qui tredecim prior. sæc. flor.*, Opera, et studio F. Francisci Combefis; editio castigata, etc.; ed. A. Goulet et Ludovic. Pere (Paris, 1852 sq.; to form 30 vols. large 8vo); 17. (*Hand Editions*), Oberthür, *Opera Patrum Græcorum, Græc et Lat.* (Wircch. 1777-92, 10 vols. 8vo); *Ibid. Op. Patrum Latinorum* (1780-91); Richter, *Bibliotheca Selecta Patrum Græcorum* (Lips. 1826 et seq.; Josephus, Philo, Clemens); Thilo, *Patrum*

*Græcorum Dogmatica* (Leipz. 1853-4, 2 vols. 8vo, Athanasius, Basil, Gregory Nazianzen); Gersdorf, *Patrum Eccles. Lat. selecta Bibliotheca* (Lips. 1838, 13 vols. 12mo, Clemens Rom., Cyprian, Tertullian, Ambrose, Lactantius, Arnobius, Minucius Felix; a very correct and convenient edition); *Corpus Scriptor. Eccles. Latinorum* (edited under the direction of the Academy of Vienna, 1866, and continuing); *Corpus Apologetarum secundæ sæculi* (ed. Otto, Jena, 1847, 8 vols. issued); *Corpus Hæresiologicalum* (ed. Oehler, Berlin, 1856-65, 5 vols. 8vo); 18. (*German Translation*), *Sämml. Werke der Kirchenväter ins Deutsche übersetzt*. (edit. Ziegler and Waitzmann, Kempten, 1831-1854; 19 vols. publ. up to 1854); 19. *The Ante-Nicene Christian Library; translations of the Ante-Nicene Fathers*, edited by Roberts and Donaldson, an admirably conceived and executed work. Up to this date (January, 1869) the following have been issued: Vol. i, *The Apostolic Fathers*, translated by Rev. Dr. Roberts, Dr. Donaldson, and Rev. F. Crombie; vol. ii, *The Writings of Justin Martyr and Athenagoras*, translated by Rev. Marcus Dods, A.M., Rev. George Reith, A.M., and Rev. B. P. Pratten; vol. iii, *The Writings of Tatian and Theophilus, and the Clementine Recognitions*, translated by B. P. Pratten, Rev. Marcus Dods, A.M., and Rev. T. Smith, D.D.; vol. iv, *The Writings of Clement of Alexandria*, translated by Rev. W. Wilson, M.A.; vol. v, *The Writings of Irenæus*, translated by Rev. A. Roberts and Rev. W. H. Rambaut; vol. vi, *The Refutation of all Heresies by Hippolytus*, translated by Rev. J. H. Macmahon, M.A.; with Fragments from his Commentaries on various Books of Scripture, translated by Rev. S. D. F. Salmond; vol. vii, *The Fire Books of Tertullian against Marcion*, translated by Peter Holmes, D.D.; vol. viii, *The Writings of Cyprian, Bishop of Carthage*, vol. i, containing the Epistles and some of the Treatises, translated by Rev. E. Wallis, Ph. D.; vol. ix, *Irenæus*, vol. ii, translated by Rev. H. Roberts and Rev. W. H. Rambaut; vol. x, *The Writings of Origen*, translated by Rev. F. Crombie, M.A. For editions of the fathers separately, see the individual names in their alphabetical places.

11. *Works on the Fathers; their literary history, their use, authority, etc.*—1. Jerome († 420), *De Viris Illustribus s. catalogus Scriptor. Eccles.* (Migne, *Patrol. Lat.* xxiii, 602 sq., many editions and recensions: the work is the basis of Fabricius, *Bibliotheca Ecclesiastica*, Hamburg, 1718, fol.); 2. Photius († 890), Βιβλιοθήκη. *Bibliotheca* (Migne, *Patrol. Græc.* vols. ciii, civ), containing sketches of 280 pagan and Christian writers; 3. Bellarmine, *Liber de Scriptor. Ecclesiasticis* (Rom. 1613, and often); 4. Cave, *Scriptorum Eccles. Historia Literaria*, ad sæc. xiv (2 parts, Lond. 1688-98; Genev. 1705, 1720; Basel, 1741; Oxford [continued by Wharton], 1740-43, 2 vols. fol.); 5. Dupin, *Nouv. Brief sketches of the lives of the fathers may be found in Hook, *Ecclesiastical Biography* (8 vols. 12mo, Lond. 1845-52); Evans, *Biography of the Early Church* (2d edit. Lond. 1859, 2 vols. 18mo); copious biographies of them in Böhringer, *Kirchengeschichte in Biographien* (Zürich, 9 parts, 1842-58).

**Fathom** (ὄργυον), a nautical measure of six (Greek) feet in length (strictly 6·81 Engl. feet); properly (as the word implies) the space which one can cover by extending the arms laterally (Acts xxvii, 28). See MEASURE.

**Fatio de Duillers**, NICOLAS, a learned mathematician and an eccentric religious enthusiast, was born at Basle, in Switzerland, Feb. 16, 1664, and died in the county of Worcester, England, in 1753. He was educated in Geneva, visited and spent some time in Paris and the Hague, but finally chose England for his home. He early showed great ability in the exact sciences, and at the age of eighteen propounded a new theory of the earth and of the rings of Saturn in a letter to Cassini, to whose theory of zodiacal light he in 1685 gave new developments. He made several useful and curious applications of science to practical life, one of which was a new method of determining the speed of a vessel. In the controversy regarding the discovery of the differential calculus he was an earnest supporter of the claims of Newton. Later in life he adopted extravagant views on religious subjects, was an ardent champion of the prophets of the Cevennes, and claimed for himself inspiration and the gift of prophecy and miracles. Neither the ridicule which Shaftesbury, in his letter on enthusiasm, aimed at him, nor his public exposure with two other persons on the pillory in London (Sept. 1707) "for abetting and favoring Elias Marion in his wicked and counterfeited prophecies," had the effect to cure him of his enthusiasm. He even went to Asia in the hope of

converting the world, but, not meeting with success, returned to England again, and spent his time in retirement, pursuing his scientific labors, but still cherishing his extravagant religious opinions. Many scientific works from his pen are extant, but his writings in favor of the prophets of the Cevennes are now unknown.—Hoefer, *Nouv. Biographie Générale*, xvii, 138. (J. W. M.)

**Fatling.** 1. מֵרִי, *meri*, a fattened animal, especially bullock ("calf") for slaughter, 2 Sam. vi, 13; Isa. xi, 6; Ezek. xxxix, 18. 2. מֵאֵח, *me'ach*, a marrowy sheep (q. v.), especially of the fat-tailed variety (Psa. lxxvi, 15). 3. Improperly for מִשְׁחֶכֶת, *mishkeh*, the second in rank, i. e. of inferior quality, 1 Sam. xv, 9. 4. (Corresponding with No. 1), *αἰσῆσις*, *corn fed*, i. e. stalled, fat, Matt. xxii, 4. See FAT.

**Fatou, NICHOLAS**, a French mystic writer, born at Arras in 1644, died at St. Omer in 1694, took the vows of the Dominican order in the convent at Arras, and subsequently entered that at St. Omer. We have from him: 1. *Le Paradis terrestre du Saint Rosaire de l'auguste Vierge, mère de Dieu*, etc., in 4 vols., of which only one vol. appeared (St. Omer et Lille, 1692, 12mo).—2. A treatise on the famous miracle of the holy candle, entitled *Discours sur les Prodiges du Saint Cierge*, etc., of which the first edition, quite rare, St. Omer, 1693; the second and third, Arras, 1696, sm. 8vo, and 1744, 12mo.—Hoefer, *Nouv. Biog. Gén.*

**Fatted FOWL** (פֶּרֶרְבָּרִים אֲבוּסִים, *barburim' abusim'*, Sept. ἀβουσιων ἐκλεκτων στρωτα, Vulg. *aves altiles*) are included in 1 Kings iv, 23 [v, 3], among the daily provisions for Solomon's table. Gesenius (*Thes. Heb.* p. 246) prefers to translate this "fatted geese,"

An ancient Egyptian Poultryer's Shop, showing the feeding and plucking of Geese.

referring the word to the root פָּרַר, "to be pure," because of the pure whiteness of the bird. He gives reasons for believing that the same word in the cognate languages included also the meaning of *swan* (comp. Bochart, *Hieroz.* ii, 127). Michaelis (*Supplen.* p. 226) less aptly interprets *field animals* (from the Chald. פֶּר, a *field*). Whether domestic poultry was much raised by the Hebrews has been a matter of dispute; but no good reason can be assigned why they should not in this respect have been as well supplied as their neighbors the Egyptians, who gave great attention to them. See HEN. As it is pretty generally conceded that some kind of *bird* is intended by the *barbur* here designated, none can in this particular compete with the dung-hill fowl; and the *fattening* implies their domestication, while the fact of their *daily* consumption at the royal table argues their extensive cultivation and common use. *Geese*, however, may very probably be intended, as they were an esteemed article of food anciently, especially among the

Egyptians, whose monuments abound with illustrations of their rearing and culinary application. See FOWL.

**Faucher, Denis**, a French theologian, was born at Arles, A.D. 1487, and died at the abbey of Lerins in 1562. In 1508 he entered the Benedictine order at the convent of Polinore, near Mantua, and in 1515 was sent to the monastery of Lerins, of which he in advanced years became prior. His works are found in Vincent Barralle's (of Salerno) *Chronologia Sanctorum et Aliorum virorum illustrium ac Abbatum Sacre insule Lerinensis* (Lyon, 1613, 4to).—Hoefer, *Nouv. Biog. Gén.*

**Faucher, Jean**, a French Protestant preacher and controversialist, died at Nîmes in 1628. He was minister at Uzès, when he was sent in 1611 by the Protestant churches of Lower Languedoc as deputy to the Assembly at Sommières, and in 1615 to that at Grenoble. When this latter assembly was in the following year transferred to Nîmes, Faucher was chosen pastor and professor of theology in that city. He, however, followed the assembly to Rochelle, and did not return to Nîmes until 1617, after the conclusion of a peace. He was a man of great energy of character, and agreed in opinion with those Huguenots who hoped by force of arms to secure liberty of conscience, if not the triumph of the Protestant cause in France. He persistently advocated a policy in consonance with such views in the assembly from 1615 to 1617, as indeed also in that convoked by the duke of Rohan in August, 1622, to agree upon terms of peace with the king, declaring that to open their cities to him would prove the sacrifice of their liberties. Only two works from his pen are known, viz., *Exorcismes divins, ou propositions Chrétiennes pour chasser les demons et les esprits abuseurs qui troublent les royaumes* (Nîmes, 1626, sm. 8vo), and *Zacharie, ou la Sainteté du Mariage et particulièrement du Mariage des ecclésiastiques, contre l'usage des sous-introduites et autres impuretés des consciences castrées* (Nîmes, 1627, sm. 8vo).—Hoefer, *Nouv. Biog. Gén.*; Haag, *La France protestante*. (J. W. M.)

**Fauchet, CLAUDE**, commonly known as the abbé Fauchet, and a prominent Girondist in the French Revolution, was born at Dornes, in the department of Nièvre, Sept. 22, 1744, and was guillotined at Paris Oct. 31, 1793. After his ordination he became one of the priests of St. Roch, at Paris. When scarcely 30 years of age he delivered a panegyric on St. Louis before the French Academy, and was soon thereafter appointed grand vicar to the archbishop of Bourges; then one of the court preachers, and abbot of Montfort-Lacarre in Brittany. In a sermon delivered in 1788 at the *fête de la Rosière* at Sarènes, he manifested so strongly his sympathy with the revolutionary tendency that his name was stricken from the list of court preachers. Thenceforth an outspoken and zealous champion of the new political doctrines, he was active in the popular meetings in Paris, a participant in the movements against the Bastille, was named a member of the *Commune de Paris*, and assisted in the reorganization of the Church by composing the treatise entitled *Religion Nationale*, and was one of the editors of the *Bouche de Fer* (Iron Mouth). In 1791 he was made constitutional bishop of Calvados, from which department he was chosen a deputy to the Assembly and the Convention, where, though a zealous Republican, he opposed the extreme measures taken in regard to the king and the Church, supporting by his pen in the *Journal des Amis* the positions maintained by him in the Legislature. He consequently incur-

red the hatred of the Jacobins, and was included in the list of 21 Girondists proscribed by that party; was accused of federalism and complicity in the crime of Charlotte Corday, though the only ground on which this last charge was based was the accidental fact that Corday, coming to Paris an entire stranger, had applied to him, as the bishop of her province, for an introduction to the tribunes. He was, however, adjudged guilty, and executed with his fellow-Girondist deputies. The statements as to his repentance and recantation of Republican doctrines in prison, made by the abbé Lothringer (letter in vol. iv of *Annales Catholiques*), and of his venality by De Molleville (*Mémoires*, ii, 355-6), rest upon too questionable grounds to be accepted as true. In addition to the discourses and writings above mentioned, he published funeral orations in honor of the duke of Orleans, the archbishop of Bourges, and the abbé de l'Épée; a eulogium of Franklin, three discourses on liberty, and one on the agreement of religion and liberty, a treatise in favor of the agrarian law, and a portion of the text of the *Tableau de la Revolution*.—Hofer, *Nouv. Biog. Génér.* xvii, 163-5; Lamartine, *History of the Girondists*; Jarry (l'abbé Valmérón), *L'Abbé Fauchet peint par lui-même*, etc. (Jersey, 1791); *Vie de l'Abbé Fauchet* (Paris, 1791); Alison, *History of Europe*. (J. W. M.)

**Faucher**, MICHEL LE, a French Protestant divine of great talent as a preacher, was successively minister at Montpellier, Charenton, and Paris. He died in 1657. It is related of him that on one occasion he preached so forcibly against duels that maréchal De la Force, who heard him, remarked to some officers in the audience that, should a challenge be sent to him, he would decline it. He wrote, *Sermons sur les onze premiers chapitres des Actes des Apôtres* (Gen. 1664, 4 vols. 12mo).—*Traité de l'action de l'orateur, ou de la prononciation et du geste* (Par. 1657, 12mo).—*Sermon, Rom. vi, 23: The wages of sin and the reward of grace* (translated in Coblin's *French Preacher*).—*Traité sur l'Eucharistie* (Gen. 1635), etc.—Darling, *Cyclop. Bibliographica*, s. v.

**Fauchion**, i. e. FALCHION, is the rendering (Judith xiii, 6; xvi, 9) of the Greek ἀκνάκις (which the Romans also Latinized *acinaces*), a Persian term for the short sword, usually represented as a straight, thick poniard on the Persepolitan figures (see Smith,

Ancient Persian Sword.

*Diet. of Class. Ant.* s. v. *Acinaces*), and therefore appropriately employed in the apocryphal account of the decapitation of Holofernes by the Hebrewess. See **SWORD**.

**Faukelius**, HERMANNUS, was born at Bruges about the year 1560. His parents were warmly attached to the Protestant cause. At twenty we find him in a theological seminary at Ghent. Here he enjoyed the instructions of able professors, among whom

was Danaus (q. v.). After leaving Ghent, where he distinguished himself as a student, he spent a short time at the University of Leyden. In 1585 he was called to serve a Protestant church at Cologne, where he labored for fourteen years amid many discouragements. On June 27, 1599, he was installed over the Reformed church in Middelburg, the chief city of Zealand, where he spent the remainder of his life. He had great reputation as a preacher. His learning was profound, his exhortations earnest and impressive, and his deportment exemplary. In ecclesiastical affairs he acted a conspicuous part. He was member and assessor of the Provincial Synod held at Tholen in 1602, and was delegated in 1607 to the *Conventus pragmativus* at the Hague, where his opposition to the Arminian tendency was strongly exhibited. He assured the Convention that the churches of Zealand desired no revision of the Catechism and Confession. In 1616 the task was assigned to him, in conjunction with Buceus and Walaeus, to make known to the scholars and to universities in other lands the condition of ecclesiastical affairs in Holland. At the organization of the Synod of Dort he was chosen one of the assessors of that famous body. At its forty-third session he was selected as one of the deputation sent to the Hague to report the proceedings of synod to the States General. During its thirteenth session he was appointed one of the translators of the New Testament. For this work he was eminently fitted. Of this he had given previous evidence in his translation of the N. T., published in 1617 at Middelburg, entitled, *Het Nieuwe Testament onses Heeren Jesu Christi, uit den griekselken overghet, neerstelick nu overseen na de beste oversettingen, ende van veel druckfouten ghesuyvert; met nieuwe sommatien ende afleefelingen der eyttelen, midtsgaders annotatien aam den Rand tot verclaringhe van den text*. In his knowledge of the Hebrew he is said to have surpassed most of his contemporaries. The historical books of the O. T. were translated by him, and neatly written out in two folio volumes, which are still preserved in the vestry of the Reformed church in Middelburg. Other important labors were also assigned him by the Synod. He was appointed one of a committee to compare the Latin, Dutch, and French copies of the Confession, in order to obtain as accurate a copy as possible. He was also a member of the committee appointed to draft articles on the five disputed points known as the *Canons of the Synod of Dort*. See **DORT**. He was also requested to prepare two catechetical works. *Het Kort begrip der Christelijke Religie* (Compendium of the Christian Religion) is due to his pen. This may still be found in company with the Heidelberg Catechism, Confession of Faith, etc., in the book of praise used by the Reformed Church in this country. He published a work on the Anabaptists in 1621. After his death, an exposition of the 45th Psalm, and a volume of sermons on the incarnation, circumcision, death, and resurrection of the Lord Jesus were issued. Various other important tracts, besides those already mentioned, were discharged by him with exemplary zeal. We find nothing alleged against him, even by Brandt, save his strenuous opposition to the Remonstrants; and even in this matter he is not charged with anything inconsistent with the dignity of his position. If he lacked in Christian charity and forbearance, it was a fault in which he does not seem to have shared more deeply than most of his contemporaries. He died May 9, 1625, and was buried under the old church in Middelburg. See **GLAUSIUS**, *Godgeleerd Nederland*, I Deel, blz. 455 en verv; G. Brandt, *Historie der Reformatie, en andere kercklijke Geschiednissen in en omtrent de Nederlanden*, III Deel, blz. 27, 53, 226, 227, 233, 544, 627, 645, 648. (J. P. W.)

**Faunt**, ARTHUR, or LAURENCE, ARTHUR, an English Jesuit, was born at Foston, Leicestershire, in 1544, and died at Unna, in Lithuania, in 1591. He was educated at Merton College, Oxford, and thence went

successively to the Jesuits' College at Louvain, to Paris, Munich, and Rome, where he was appointed divinity reader in the English Jesuits' College. He wrote several theological treatises, for an account of which, see Watts, *Bib. Brit.*—Rose, *New Gen. Biog. Dict.*; Allibone, *Dict. of Authors*.

**Faure, Charles**, a French Roman Catholic theologian, born at Luciennes, near Paris, in 1594; died Nov. 4, 1644. He was the first superior-general of the regular canons of the Congregation of France, and devoted his life to the reform of the religious orders. He is the author of several religious works, among which is the *Dictionnaire des Novices* (Paris, 1711, 4to).—Hoefler, *Nouv. Biog. Générale*.

**Faure, François**, a French prelate, born Nov. 8, 1612; died May 11, 1687. He entered the Franciscan order at the age of seventeen, and rose to the highest positions therein; was appointed sub-preceptor of Louis XIV, and finally bishop of Amiens. We have from him a condemnation of the *Lettres Provinciales*; an *Ordonnance contre le Nouveau Testament de Mons* (1673); a *Pan'gyrique de Louis XIV* (Paris, 1680, 4to); an *Oraison funèbre de la reine Anne d'Autriche* (died 1666); and an *Oraison funèbre de Henriëtte-Marie de France, reine de la Grande-Bretagne* (Paris, 1670, 4to).—Hoefler, *Nouv. Biog. Générale*.

**Faust, Dr.**, according to tradition, a celebrated dealer in the black art. (The following account, chiefly translated from Pterer, *Universal-Lexikon*, is taken from Chambers, *Encyclopædia*, s. v.) He was born probably about A. D. 1480, at Knittlingen (or Kundlingen), in Würtemberg, or, as some say, at Roda, near Weinaar. He is said to have studied magic at Cracow. "After having spent a rich inheritance left him by his uncle, Faust is alleged to have made use of his 'power' to raise or conjure up the devil, with whom he entered into a contract for twenty-four years, obtaining during that time his fill of earthly pleasure, but at its termination surrendering body and soul into the hands of the great enemy. The devil gave him an attendant spirit or demon, called Mephistopheles, though other names are given him by the later traditionists, with whom he travelled about, enjoying life in all its forms, and astonishing people by working wonders, till he was finally carried off by the Evil One, who appeared in terrible guise between twelve and one o'clock at night, at the village of Rimlich, near Wittenberg, though several other places lay claim to that very questionable honor. Some have doubted, considering the monstrously mythical form in which his career has come down to us, whether such an individual as Faust ever existed; but it is now generally believed that there was a basis of fact, on which tradition has built its grotesque superstructure. Gorres, indeed, asserts that one George Sabellicus, who disappeared about the year 1517, is the real Faust; but Philip Melancthon—the man of all the reformers whose word in regard to a matter of fact would most readily be trusted—says that he had himself conversed with Dr. Faustus. Conrad Gesner (1561) is equally positive; and Luther, in his *Table Talk*, speaks of Dr. Faust as a man lost beyond all hope. The opinion that prevails, and which is reckoned to be intrinsically the more probable, is that some man of this name, possessed of varied knowledge, may possibly have practised jugglery (for the wandering savans of the Middle Ages had all a touch of the quack about them), and thus have been taken by the ignorant people for a dealer in the black art, and one who maintained a secret and intimate relation with evil spirits. His widely diffused celebrity not only occasioned the wonders worked by other so-called necromancers of an earlier age—Albertus Magnus, Simon Magus, and Paracelsus—to be attributed to him, but likewise many ancient tales and legends of a marvellous character were gradually transferred to him, till he finally appears as the very

hero of magicians. But while, on the one hand, the narrative of Faust's marvels afforded amusement to the people, on the other they were made use of for instruction by the clergy, who pointed out, in the frightful fate of Faust, the danger of tampering with the 'black art,' and the abominableness of a life sunk in sensuality and vice. The myth of Faust has received a manifold literary treatment. First come the *Volksbücher* (or people's books), which record Faust's enterprises and feats. The oldest of these now known appeared at Frankfort in 1588. Then came an 'improved' edition of the same, by Widmann, entitled *Wahrhaftige Historien von denen grätlichen Sünden Dr. Joh. Faust's* (True History of the Horrible Crimes of Dr. John Faust, Hamb. 3 vols. 1599); and in 1695, a work was published at Nürnberg by Pfitzer, based upon that of Widmann. The oldest of these books was translated into all the civilized languages of Europe. Impostors also published books of magic under the name of Faust, such as *Faust's grosser und gewaltiger Höllezwang* (Faust's Great and Potent Book of Spells), *Faust's Mirakelkunst* (Faust's Art of Performing Miracles), and *Dreifache Höllezwang* (The Threefold Book of Spells). These wretched productions are filled throughout with meaningless scrawls and figures, interspersed with texts from the Bible scandalously misapplied; but in the belief of the vulgar, they were supposed capable, when properly understood, of accomplishing prodigies. That the poetical art should in due time have seized on a subject affording so much material for the fancy to work upon was inevitable, and consequently German literature abounds in elegies, pantomimes, tragedies, and comedies on Faust. Since the end of the 17th century, the *Puppenspiel* (Puppet-show) of Dr. Faust (published at Leipsic in 1850) has been one of the most popular pieces in Germany. It forms the transition from the rude magic tales concerning Faust to the later philosophic conception of the Faust-myth, which has become the most perfect poetical expression of the eternal strife between good and evil in the soul of man. The first writer who treated the story of Faust dramatically was the English writer Christopher Marlowe, about the year 1600 (German translation by W. Müller, Berlin, 1818); but the grandest work on the subject is Goethe's *Faust*, the first part of which appeared under the title of *Dr. Faust, ein Trauerspiel* (Leip. 1790), and afterwards in a remodelled form, under the title of *Faust, eine Tragödie* (Tübingen, 1808). The second part was published after the author's death, at Stuttgart, in 1833. Besides Goethe's drama may be mentioned Lessing's masterly fragment, *Faust und die Sieben Geister* (Faust and the Seven Spirits), G. F. L. Müller's *Dr. Faust's Leben* (Dr. Faust's Life, Mannh. 1778), and Klinger's *Faust's Leben, Thaten, und Höllefahrt* (Faust's Life, Doings, and Descent into Hell; Petersburg and Leip. 1791). The plastic art has also found a fit subject in Faust. In Auerbach's cellar at Leipsic, where Faust is said to have performed many of his feats, are two rude daubs of the year 1525, representing Faust and Mephistopheles riding out of the cellar on a wine-barrel. Rembrandt and Christoph von Sichein have also illustrated the story of Faust, and, in modern times, Cornelius and Retzsch have done the same. See Peter, *Die Literatur der Faustsage* (The Literature of the Faust Myth), 2d edit. Leip. 1851."

**Fausta**, FLAVIA MAXIMIANA, daughter of the emperor Maximianus Herculius and Eutropia, was the second wife of Constantine the Great, to whom she bore three sons, Constantinus, Constantius, and Constans, and two daughters, Constantina and Helena. She was born about A. D. 289, was married in 307, and put to death in 326, if the general opinion in regard to her end be correct. She gained great influence over the mind of her husband by her devotion in revealing to him a plot, formed by her own father, to assassinate him, though with filial tenderness she covenanted

the life of her parent, who was notwithstanding put to death. This confidence and affection, as is alleged by some, she abused so as to instigate the death of Crispus, Constantine's son by his first wife Minervina, a youth of rare promise and great popularity, because, as some say, he stood in the way of her own sons, or, according to others, of his refusal to reciprocate her illicit love. Helena, the mother of the emperor, however, avenged the fate of her grandson, and Fausta, whose perfidy and infidelity were made known, was suffocated in a hot bath. Other accounts, however, hold Fausta innocent of the death of Crispus, which, together with her own and that of the Cæsar Licinius, is attributed to the cruel suspiciousness of Constantine, engendered by success—that *insolentia rerum secularum*, as Eutropius styles it, which perverted his nature and led to deeds of cruelty. The vague and contradictory statements in regard to her conduct, and to the time, cause, and manner of her death, leave the whole matter in doubt. In one account she is made to survive the death of her son Constantine, who was slain three years after his father's death, and in another is represented as the "most pious of queens." Her conversion to Christianity is also a matter of doubt, though she probably followed her husband in that respect.—Hoefer, *Nouv. Biogr. Générale*, s. v.; Gibbon, *Decline and Fall*, ii, 162-3 (N. Y. Harpers', 1852, 6 vols. 12mo); Tillemont, *Hist. des Emp.* vol. iv, art. lxii, p. 224, and *Notes sur Constantin*, xvii; Eckhel, *Doctrina Nummorum*, viii, 98; Eutropius, x, 6; Lactantius, *De Morte Persecut.* 27; Julian, *Orat.* i; Zosimus, ii, 10, 29; Philostorgius, *Hist. Eccles.* ii, 4. (J. W. M.)

**Faustinus**, bishop of Lyons, lived in the second part of the third century. He became bishop about the year 250, and distinguished himself by his zeal for the faith, and the ardor with which he attacked Marcianus, bishop of Arles, the only Gallic bishop who had embraced Novatianism. Unable to accomplish anything by himself, he made sure of the aid of the bishops of the Narbonnaise, and wrote to the pope, Stephen, to obtain the deposition of Marcianus. The pope hesitated, and Faustinus, in order to hasten matters, wrote to Cyprian, bishop of Carthage. The two letters which he wrote no longer exist, but they form the material of the sixty-seventh letter of Cyprian to pope Stephen, which gives a curious picture of the Gallic Church at that period. Marcianus persisted in his schism, and the result of the affair is uncertain, but it is probable that he was deposed, since his name is not found in the list of the bishops of Arles.—Hoefer, *Nouv. Biogr. Générale*, xvii, 199.

**Faustinus**, a priest of the sect of the Luciferians (q. v.) in the fourth century. He shared in the persecution they experienced, but was set free by the intervention of the emperor Theodosius, to whom he presented a petition praying for protection to be extended to himself and others who associated with him; this the emperor granted, and Damasus's papal persecutions were stayed. He wrote a treatise, *De Trinitate sive de Fide contra Arianos* (Concerning the Faith, against the Arians). The discourse is dedicated to the empress Flacilla, and divided into seven chapters. He begins by stating the heresies of the Arians, and then combats them from Scripture. In chap. ii he proves that the word *Son* belongs to our Saviour, but leaves untouched the question whether the word applies to him as God or *man*, taking for granted the former; in chap. iii he shows the omnipotence and perpetual endurance of Christ; explains in chap. iv John xiv, 28; in chap. v, the qualifications implied in Acts ii, 36 are pointed out as belonging only to God; and chap. vi is a short dissertation on the Holy Spirit. He wrote also *Fides Theodosio imp. oblata* (according to Mabillon, about A. D. 380)—*Libellus Precum*, a petition addressed to the emperors Valentinian and Theodosius, relating and requesting to be freed from the persecutions which he,

Marcellinus, and others were suffering in consequence of being Luciferians. A short account of this sect is prefixed by Faustinus to the petition. His remains will be found in Galland, *Bib. Max. Patr.* vii, 441, and in Migne, *Patrol. Cours.* xiii, 38 sq.—Clarke, *Success. Sac. Lit.*; Lardner, *Works*, iv, 250.

**Faustinus**, who lived towards the close of the sixth century after Christ, was appointed bishop of Dax, France, by authority of Gondwald, who, claiming to be a natural son of Clothaire I, aspired to the throne of Aquitaine, but was vanquished, betrayed, and slain. Faustinus was then deposed by a council held at Macon, which, curiously enough, also condemned the bishops who had ordained him to provide for him in turn, and pay him 100 solidi annually.—Gregory of Tours, *Epitome historie Francorum*; Hoefer, *Nouv. Biogr. Gén.* (J. W. M.)

**Faustus, Dr.** See FAUST, Dr.

**Faustus Reiensis or Rhegiensis** (of Rhegium, or Reil, in Provence), so called from the diocese over which he presided, a pious and self-sacrificing prelate, although doctrinally he favored Semi-Pelagianism. He was born in Britain about the beginning of the fifth century, and became a monk of Lerins. When Maximus was made bishop of Rhegium, Faustus succeeded him in his abbacy of Lerins, and succeeded him again as bishop on his death, A. D. 454. He was present at the council held under Hilary at Rome, 462, and returned in 484 to his diocese, where he died about 485. He wrote (1) *De Gratia Dei et humane mentis libero arbitrio* (On Grace and Free-will) (*Bib. Max. Patr.* viii). In this treatise he opposes absolute predestination, but admits original sin and the necessity of grace to assist man's nature, but denies that grace is confined in its saving influences to a few, or that original sin is entirely destructive of every good, so as to leave man "a mass of corruption." He also shows that God's foreknowledge does not affect the salvation or condemnation of any, and interprets the various texts of Scripture which refer to the matter. (2) *Professio Fidei* (A Confession of Faith) (*Bib. Max. Patr.* viii), directed against the doctrines of predestination and fate, addressed to Leontius, bishop of Arles. This is a recapitulation of his treatise *De Gratia*. (3) *Epistola ad Lucidum Presbyterum*, against the Predestinarians of the monastery of Adrumetum. Lucidus was convinced by this letter, and subscribed to the points condemned in it (Mansi, *Concil.* vii, 1007). This and other *Epistole*, to Ruricius and others, are in *Cassii Lect. Antiq.* i, 352 (Antw. 1725, fol.), and in the *Biblioth. Max. Patr.* viii; also several *Sermons*. The treatise *De Gratia* is also in Migne, *Patrol. Lat.* Iviii, 775 sq., together with the *Epistole* and *Sermons*. Angelo Mai, in his *Spicilegium Romanum*, gives three discourses of Faustus never before printed. Neander gives the following judicious statement of the doctrines of Faustus: "Although Faustus adopted the Semi-Pelagian mode of exposition with regard to the relation of the free-will to grace, yet he unfolded this scheme in a way peculiar to himself. If he did not express himself so distinctly as to satisfy the acute and clear-headed theologian, yet we see presented in him, in a beautiful manner, such a harmonious tendency of Christian feeling, keeping aloof from all partial and exaggerated views, as prevented him from giving undue prominence either to the work of redemption, so as to infringe on that of the creation, or to the work of creation, so as to infringe on that of the redemption. 'As the same Being,' says he, 'is both Creator and Redeemer, so one and the same Being is to be adored both in the work of creation and of redemption.' Among the attributes which, as expressing the image of God, could not be destroyed in human nature, he reckons pre-eminently the free-will. But even before the fall the free-will was insufficient without the aid of grace, and still less can it at present,

since sin has entered, suffice by its own strength for the attainment of salvation. It has now lost its original power, yet it is not in itself destroyed; it is not altogether shut out from the divine gifts, but only it must strive once more to obtain them by intense efforts and the divine assistance. Like the author of the work *De vocatione gentium*, he makes a distinction between general grace (*gratia generalis*), a term by which he designates the religioso-moral capability which God has furnished to man's nature, and which, too, has not been wholly supplanted by sin, as well as the universal inward revelation of God by means of this universal religioso-moral sense; between general grace so understood, and special grace, by which he means all that was first bestowed on mankind through Christianity. But the relation of these two kinds of grace to each other is defined by him quite otherwise than it is in the work above mentioned. Although, as a general thing, the grace of redemption, and in many cases, also, the calling, is antecedent to all human merit, still the operation of that special grace in man is dependent on the manner in which he has used that general grace; and in many cases the striving and seeking of the man which proceeds from the former, the self-active bent of the free-will, is antecedent to that which is imparted to the man by this special grace; a thing which Faustus endeavors to show by examples similar to those which the Semi-Pelagians had been accustomed to adduce since the time of Cassian. He denominates the imperishable germ of good in human nature a spark of fire implanted within by the divine hand, which, cherished by man, with the assistance of divine grace, would become operative. He recognises, therefore, a preparatory development of the religious and moral nature even among the heathen, and converts those who are unwilling to allow that, by a faithful use of that general grace, the heathen might have attained to the true service of God. From this it might also be inferred that Faustus was an opponent of the doctrine which taught that all the heathen would be unconditionally condemned; and that it was his opinion that the worthy among them would still be led, after the present life, to faith in the Saviour, and thereby to salvation; but on these points he does not express himself more distinctly. There is much good sense in the remarks of Faustus where he compares the two extremes in the mode of apprehending the relation of grace to free-will with the two extremes in the mode of apprehending the doctrine concerning the person of Christ. As in the doctrine concerning Christ's person some gave undue prominence to the divine, others to the human element, and, as the result of so doing, were led into errors which, on opposite sides, injured the doctrine of redemption, so he says it was also with the doctrine concerning human nature. Faustus deserves notice also on account of his dispute concerning the corporeality of the soul. He affirmed, as others before him had already done (e. g. Hilary of Poitiers, *On Matt.* v, 8, and even Didymus, in his work *De Trinitate*, bk. ii, ch. 4: 'Οἱ ἄγγελοι πνεύματα, καθὸ πρὸς ἡμᾶς ἄσώματα, σώματα ἐπουράνια διὰ τὸ ἀπέριφον ἀπέχειν τοῦ ἀκρίστου πνεύματος), that God alone is a pure spirit; in the essential nature of finitude is grounded limitation as by time (a beginning of existence), so also by space; and hence all creatures are corporeal beings, the higher spirits as well as souls. He was led by his controversies with the Arians of the German tribes, who were then spreading themselves in these countries, to unfold these views still farther; for he supposed he could demonstrate that if equality of essence with the Father was not ascribed to the Logos, it would be necessary to regard him as a corporeal being. He found an opponent who surpassed him in philosophical spirit in the presbyter Claudianus Mamertus of Vienna, a man on whom the speculative spirit of Augustine had exerted a great influence. He wrote

against Faustus his work *De statu animæ*" (Neander, *Church History*, Torrey, ii, 645).—Clarke, *Succession of Sac. Lit.* ii, 255; Neander, *History of Dogmas*, Ryland, ii, 383; Mosheim, *Ch. Hist.* cent. v, pt. ii, ch. v, § 26, n. 55; Ceillier, *Auteurs Sacrés* (Paris, 1861), x, 420-426. See SEMI-PELAGIANS; MASSILIANS.

**Faustus, Socinus.** See SOCINUS.

**Faustus, St. (d'Againe)**, was born about A.D. 460, but the date of his death is unknown. He became a monk in the convent of Agaune, in Valois, and in 505 went to Paris with Severinus, his abbot, who was called thither by Clovis I to employ his medical skill in treating him for a chronic fever. On his return journey Severinus died, and Faustus, who had remained in France, was commissioned by Childbert to write his life. This work is commendable for its simplicity, exactness, and scant mention of miracles as wrought by its subject, in an age whose literature is replete with such marvels. The best edition is that by Mabillon in the *Acta Sanctorum Ord. Sancti Benedicti* (Paris, 1668-1710, 9 vols. fol.; reprinted at Venice, 1733, 9 vols. fol.). The *Acta Sanctorum* assigns the 11th of February to St. Faustus d'Againe.—Hoefer, *Nouv. Biog. Génér.* xvii, 202. (J. W. M.)

**Faustus, St. (de Glanfeuil)**, was one of the Benedictine monks who came with St. Maurus to France, A.D. 543, and assisted in founding the first monastery of his order in that country at Glanfeuil (Glanafolium), in Anjou. In 585, after the death of Maurus, he returned to Italy, and became an inmate of the monastery of Lateran at Rome, where, at the instance of his brother monks, he wrote a life of St. Maurus, and presented it to pope Boniface IV, who approved it about 607. Faustus died some time after this (on a 15th of February, according to the Bollandists), and was buried in the monastery of Lateran. His life of St. Maurus reflects the spirit of the age, a credulous faith in the marvellous, and abounds in uninteresting and prolix details. Surius (*Vite Sanctorum*, etc.), Du Breul (*Supplém. Antig.* etc.), and Mabillon (*Acta Sancti Benedicti*) have edited it.—Hoefer, *Nouv. Biog. Générale*, xvii, 202-3. (J. W. M.)

**Faustus, THE MANICHEAN**, a prominent bishop of the Manichæans, was a native of Mileve, in Numidia. Our knowledge of him is almost exclusively derived from the writings of Augustine. When beginning to doubt the truth of the Manichæan doctrines which he had adopted during his stay at Carthage, Augustine was referred by his Manichæan teachers whom he consulted, and who were unable to solve his doubts, to Faustus, as the ablest man of the sect. Augustine did not, however, find in Faustus what he had expected; his knowledge was by no means so extensive and so profound as the Manichæans generally believed. Of Latin literature he had only read some orations of Cicero, a part of Seneca's works, a few poets, and the Latin works of Manichæan authors. He confessed an entire ignorance of natural sciences. He was, however, possessed of a great readiness of speech and dexterity in argument. Faustus subsequently wrote a work against the doctrines of the Christian Church and in defence of the Manichæans, in which the objections of his sect to the Scriptures, and in particular to the Old Testament, are presented with some keenness and wit. Augustine, induced by his friends, wrote against Faustus his work *Contra Faustum Manicheum Libri xxxii* (compiled about 400; sent to Jerome 404), in which nearly the whole of the work of Faustus is quoted. Augustine relates of him that he led a life of luxurious ease, regarded himself as the Incarnate Wisdom, was for a time exiled for his Manichæan opinions to an island, but subsequently released. The work of Augustine against Faustus is in the 8th volume of his works in the Maurine and Migne editions. See AUGUSTINE, MANICHEANS.—Herzog,

*Real-Encyclop.* iv, 342; Wetzler u. Welte, *Kirchen-Lex.* iii, 927. (A. J. S.)

**Favor.** See GRACE.

**Favre.** See FABER.

**Fawcett, Benjamin**, an English dissenting minister, was born at Sleaford, Lincolnshire, in 1715, and died in 1780. He was a pupil of Dr. Doddridge at Northampton, and preached first at Taunton, and then at Kidderminster, where he was pastor of a congregation of Dissenters for 55 years. He was a strict economist of time, and attributed his uninterrupted good health to his temperate mode of life and the habit of early rising. His works are, *Sermons* (1756-80), an abridgment of Baxter's *Saints' Everlasting Rest*, and *Religious Melancholy* (1780, 8vo).—Rose, *New Gen. Biog. Dict.*; Allibone, *Dict. of Authors*.

**Fawcett, John, D.D.**, an eminent Baptist minister, was born in Yorkshire Jan. 6, 1739, joined a Baptist church in 1758, and was ordained minister at Wainsgate in 1764. Here he opened an academy, at which many ministers were educated, among them Ward of Serampore. He was a self-taught, but well-informed man: in theology he was a moderate Calvinist. He died July 25, 1819. He published *The Sick Man's Friend* (1774);—*Hymns* (Leeds, 1781, 12mo);—*Essay on Anger* (Leeds, 1787, 12mo);—*Devotional Family Bible* (1807-11, 2 vols. 4to).—Jones, *Christian Biography*, s. v.; Jamieson, *Cyclop. of Biography*, p. 194.

**Fawcett, Joseph**, minister of an Independent church at Walthamstow, died 1804. He was a very popular preacher, and published *Sermons delivered at the Old Jewry* (Lond. 1795, 2 vols. 8vo).

**Fawkes, Guy** ("properly Guido"), the head of the conspiracy known by the name of the Gunpowder Plot, was born of a Protestant family in Yorkshire in the year 1570. He became a Roman Catholic at an early age, and served in the Spanish army in the Netherlands. Inspired with fanatical zeal for his new religion, on his return to England he entered into a plot with several Catholic gentlemen for blowing up the king, his ministers, and the members of both houses at the opening of Parliament, November 5, 1605. Guy Fawkes was taken with the burning match in his hand, tried, and, after being put to the torture, was publicly executed January 31, 1606. In remembrance of this event, in most English towns, but particularly in London, a grotesque figure, stuffed with straw, is carried about the streets on the 5th of November, and finally committed to the flames. A political and religious signification was again imparted to this custom by what was called 'the papal aggression' in the year 1850, when the figure of cardinal Wiseman (q. v.) was substituted for that of Guy Fawkes.—Chambers, *Encyclopædia*, s. v. See GUNPOWDER PLOT.

**Faydit, Pierre**, a priest of the French Oratory, was born at Riom, in the Auvergne, in the first half of the 17th century. He was in 1671 excluded from the Oratory for having published, in spite of the prohibition of his superiors, from the Cartesian point of view, a work *On the Human Mind (De Mente Humana)*. While pope Innocent XI was quarrelling with the French government, Faydit, in a sermon on St. Polycarp, preached against the pope, whose conduct he compared with that of pope Victor toward the Asiatic bishops. The view expressed in these sermons he refuted himself in another sermon published at Liege; but in 1687 he again published at Maastricht an extract from his first sermon, with proofs for the facts quoted in it. In consequence of an *Essay on the Trinity*, in which he seemed to favor Tritheism, he was imprisoned in 1696 at St. Lazarus. Subsequently he was ordered to withdraw to his native city, where he continued to compile quarrelsome works, attacking with ridiculous arguments some of the best works of his age, such as Fénelon's *Télémaque* and Tillémont's *Mé-*

*moires Ecclesiastiques*. He died in 1709.—Hoefler, *Nouv. Biog. Génér.* xvi, 229. (A. J. S.)

**Fear of God.** I. *Old Testament.*—There is no mention in the Scriptures of the sentiment of fear in the relations between man and God before the fall of Adam. After the transgression, Adam says, "I heard thy voice in the garden, and I was afraid" (Gen. iii, 10). Fear of God (יְרֵאָה לַיהוָה) stands thus in close connection with conscience, and with the fact of actual or possible sin. We are probably justified in inferring from the narrative in Genesis that the sentiment of fear, in relation to God, is one of the consequences of Adam's sin. Since the Fall, fear is a natural and proper feeling on the part of dependent man with regard to the infinite God whom he has offended. Dependence alone, without the consciousness of sin, or of sinful tendencies and possibilities, would not engender fear. In sinful beings, however, fear is useful and necessary as a preventive and safeguard against transgression. As such it is enjoined in the O. T. especially. (Compare Exod. i, 17; Deut. vi, 2; Prov. iii, 7; xiv, 2.) So in O. T. we find practical piety generally described as the fear of God: "The fear of the Lord is the beginning of knowledge" (Prov. i, 7); Job xxviii, 8, "Behold, the fear of the Lord, that is wisdom, and to depart from evil is understanding;" "The fear of the Lord is clean, enduring forever" (Psa. xix, 9). Fear, thus coming to be almost, if not quite, synonymous with piety, did not (under the old covenant) exclude filial and even cheerful trust in God, and delight in his law and in his worship; the Psalms abound in illustrations of this. Under this covenant, too, the law of love prevailed (Deut. vi, 5, "And thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might"). The promise of a new covenant, also, added the grace of hope to the experience of O. T. believers (Jer. xxxi, 31-34). But a fear which is conjoined with love and hope is not a slavish fear, but rather filial fear, veneration (compare Deut. xxxii, 6; Hosea xi, 1; Isa. i, 2; lxiii, 16; lxiv, 8). Nevertheless, the sense of the filial relation to God through Christ, such as appears in the N. T., was wanting in the old covenant, and fear was, perhaps, under that covenant, the prevailing element in the consciousness of believers, so far as their relation to God was concerned.

II. In the sphere of the N. T., the fear of God, in the sense of slavish or untrusting dread, is completely dispelled. True, in the economy of salvation through Christ fear finds a useful place as a preventive of negligence and carelessness in religion, and as an inducement to penitence (2 Cor. v, 11; vii, 1; Phil. ii, 12; Eph. v, 21; Heb. xii, 28, 29), and is enforced in this sense by Christ himself (Matt. x, 28). But as Christian experience deepens, and the soul is consecrated to God, the sense of fear vanishes, and love takes its place (Rom. viii, 15; 2 Tim. i, 7; 1 John iv, 18). On the other hand, where there is nothing more than the form of Christian life, without its inward power, the old Jewish and even pagan fear springs up. So the Romish Church does not admit a free and direct approach to God, but demands the intercession of saints, etc., and makes of the sacrament of the Lord's Supper, in which Christians are lovingly to surround his table, a tremendous and fearful mystery. In Protestant theology, on the contrary, the fear to approach God is considered as a consequence of the Fall, and free access to him is held to be an essential element of true Christian life. Edwards, in his *Treatise on Religious Affections*, remarks as follows on the relations of fear and sin: "For so hath God contrived and constituted things, in his dispensations towards his own people, that when their love decays, and the exercises of it fail or become weak, fear should arise; for then they need it to restrain them from sin, and to excite them to care for the good of their souls, and so to stir them

up to watchfulness and diligence in religion; but God hath so ordered that, when love rises and is in vigorous exercise, then fear should vanish and be driven away; for then they need it not, having a higher and more excellent principle in exercise to restrain them from sin, and stir them up to their duty. There are no other principles which human nature is under the influence of that will ever make men conscientious but one of these two, *fear or love*; and therefore, if one of these should not prevail as the other decays, God's people, when fallen into dead and carnal frames, when love is asleep, would be lamentably exposed indeed; and therefore God has wisely ordained that these two opposite principles of love and fear should rise and fall like the two opposite scales of a balance; when one rises, the other sinks. Love is the spirit of adoption, or the childlike principle; if that slumbers, men fall under fear, which is the spirit of bondage, or the servile principle; and so on the contrary. And if it be so that love, or the spirit of adoption, be carried to a great height, it quite drives away all fear, and gives full assurance; agreeable to that of the apostle, 1 John iv, 18, "There is no fear in love, but perfect love casts out fear." These two opposite principles of love and holy love bring hope and fear into the hearts of God's children in proportion as they prevail, that is, when left to their own natural influence, without something adventitious or accidental intervening, as the distemper of melancholy, doctrinal ignorance, prejudices of education, wrong instruction, false principles, peculiar temptations, etc. Fear is cast out by the Spirit of God no other way than by the prevailing of love: nor is it ever maintained by his Spirit but when love is asleep" (Edwards, *Works*, N. Y. edit., iii, 56). See, on the different dispensations of grace, Fletcher, *Works*, iii, 175 sq; Stowell, *On Nehemiah*, lect. 1; Herzog, *Real-Encyclopädie*, v, 280, from which part of this article is a modified translation.

**Feast** (properly מִשְׁתֵּה, *mishteh*, δὲσῆ, when a hospitable entertainment; and צֶדָה, *chay*, ἐσπρή, when a religious festival). To what an early date the practices of hospitality are referable may be seen in Gen. xix, 3, where we find Lot inviting the two angels—"Turn in, I pray you, into your servant's house and tarry all night, and wash your feet; and he pressed upon them greatly, and they entered into his house; and he made them a feast;" which was obviously of an impromptu nature, since it is added, "and did bake unleavened bread, and they did eat" (Judg. vi, 19). It was usual not only thus to receive persons with choice viands, but also to dismiss them in a similar manner; accordingly Laban, when he had overtaken the fleeing Jacob, complains (Gen. xxxi, 27), "Wherefore didst thou steal away from me and didst not tell me, that I might have sent thee away with mirth, and with songs, and with tabret, and with harp?" See also 2 Sam. iii, 20; 2 Kings vi, 23; Job viii, 20; 1 Mace. xvi, 15. This practice explains the reason why the prodigal, on his return, was welcomed by a feast (Luke xv, 23). Occasions of domestic joy were hailed with feasting; thus, in Gen. xxi, 8, Abraham "made a great feast the same day that Isaac was weaned." Birthdays were thus celebrated (Gen. xl, 20): "Pharaoh, on his birthday, made a feast unto all his servants" (Job i, 4; Matt. xiv, 6; compare Herod. i, 133). Marriage-feasts were also common. Samson (Judg. xiv, 10) on such an occasion "made a feast," and it is added, "for so used the young men to do." So Laban, when he gave his daughter Leah to Jacob (Gen. xxix, 22), "gathered together all the men of the place, and made a feast." These festive occasions seem originally to have answered the important purpose of serving as evidence and attestation of the events which they celebrated, on which account relatives and neighbors were invited to be present (Ruth iv, 10; John ii, 1). Those processes in rural occupations by which the di-

vine bounties are gathered into the hands of man have in all ages been made seasons of festivity; accordingly, in 2 Sam. xiii, 23, Absalom invites all the king's sons, and even David himself, to a sheep-shearing feast, on which occasion the guests became "merry with wine" (1 Sam. xxv, 2 sq.). The vintage was also celebrated with festive eating and drinking (Judg. ix, 27). Feasting at funerals existed among the Jews (2 Sam. iii, 33). In Jer. xvi, 7, among other funeral customs, mention is made of "the cup of consolation, to drink for their father or their mother," which brings to mind the indulgence in spirituous liquors to which our ancestors were given at interments, and which has not yet entirely disappeared in Lancashire, nor probably in Ireland (Carleton's *Irish Peasantry; England in the Nineteenth Century*, vol. ii). To what an extent expense was sometimes carried on these occasions may be learned from Josephus (*War*, iv, 1, 1), who, having remarked that Archelaus "mourned for his father seven days, and had given a very expensive funeral feast to the multitude," states, "which custom is the occasion of poverty to many of the Jews;" adding, "because they are forced to feast the multitude; for if any one omits it he is not esteemed a holy person." See ENTERTAINMENT.

As among heathen nations, so also among the Hebrews, feasting made a part of the observances which took place on occasion of animal sacrifices. In Deut. xii, 6, 7, after the Israelites are enjoined to bring to the place chosen of God their burnt offerings, tithes, heave offerings, vows, free-will offerings, and the firstlings of their herds and flocks, they are told, "There shall ye eat before the Lord your God, and ye shall rejoice in all ye put your hand unto, ye and your households, wherein the Lord thy God hath blessed thee" (1 Sam. ix, 19; xvi, 3, 5; 2 Sam. vi, 19). These sacrificial meals were enjoyed in connection with peace offerings, whether eucharistic or votive. The kidneys, and all the inward fat, and the tail of the lamb, were burnt with the sacrifice; the breast and right shoulder fell to the priest, and the rest was to be eaten by the offerer and his friends, on the same day if the offering were eucharistic, on that and the next day if it were votive (Lev. iii, 1-17; vii, 11-21; 29-36; xix, 5-8; xx, 29, 30). To the feast at the second tithe of the produce of the land, which was to be made every year, and eaten at the annual festivals before Jehovah, not only friends, but strangers, widows, orphans, and Levites were to be invited, as well as the slaves. If the tabernacle was so distant as to make it inconvenient to carry thither the tithe, it was to be turned into money, which was to be spent in providing feasts at the place at which the festivals were held (Deut. xiv, 22-27; xii, 14; Tobit i, 6). Charitable entertainments were also provided, at the end of three years, from the tithe of the increase. The Levite, the stranger, the fatherless, and the widow were to be present (Deut. xii, 17-19; xiv, 28, 29; xxvi, 12-15). At the feast of Pentecost the command is very express (Deut. xvi, 11), "Thou shalt rejoice before the Lord thy God, thou, and thy son, and thy daughter, and thy man-servant, and thy maid-servant, and the Levite that is within thy gates, and the stranger, and the fatherless, and the widow that are among you." Accordingly, Tobit (ii, 1, 2) affirms, "Now when I was come home again, in the feast of Pentecost, when I saw abundance of meat, I said to my son, go and bring what poor man soever thou shalt find out of our brethren, who is mindful of the Lord." The Israelites were forbidden to partake of food offered in sacrifice to idols (Exod. xxxiv, 15), lest they should be thereby enticed into idolatry, or appear to give a sanction to idolatrous observances (1 Cor. x, 28).—Kitto, s. v. See ALISGEMA.

For further particulars as to social entertainments, see BANQUET; and as to sacred occasions, see FESTIVAL.

**Feasts, or Festivals,** in the Christian Church, certain days set apart for the more particular remembrance of the prominent transactions connected with our Lord in his redemption of mankind, and also for the commemoration of the labors and sufferings of his apostles.

1. *History and Theory of their Observance.*—(1.) "Some Protestants object to the observance of these feasts on the ground that such observance is contrary to the injunction of the apostle Paul (Col. ii, 16), forgetting that in this passage the apostle alludes exclusively to Jewish feasts; others object to all such festivals as being popish, forgetting that they have been observed from the earliest ages of the Church. If a Church has power to ordain rites and ceremonies which are not contrary to Scripture, she has the power to set apart certain days in commemoration of the most important events and persons connected with the first promulgation of the Gospel to sinners" (Eden). (2.) Festival days were hallowed in the Church long before the rise of the papacy. At first the religious festivals of the Church were observed voluntarily, and never by formal obligation; but in the 4th century various decrees of councils were passed, enjoining the observance of them as a duty. The number of festivals was originally small, consisting, besides Sunday, of Easter, Pentecost, and Ascension, and to these the Epiphany and Christmas were added at a later period. "The end designed by the observance of these festivals was to call to mind the benefits of the Christian dispensation, to excite Christians to holy living, to offer thanks for providential mercies, and to aid in the cultivation of Christian graces. The discourses which were delivered on these occasions always referred to the most important topics of the Christian religion. Even the Lord's day, according to Eusebius, was said to have had a threefold origin, emblematic of the sacred Trinity—the creation of the world, the resurrection of Christ, and the effusion of the Holy Spirit" (Bingham, bk. xx, ch. iv.; Neander, *Church History*, i, 301). "The primitive Church were not careful to prescribe a specific time or place for the celebration of their religious festivals. The apostles and their immediate successors proceeded on the principle that these should be observed at stated times, which might still be varied as circumstances should direct. These seasons were regarded as *sacred*, not for any peculiar sanctity belonging to the day or hour in which they were solemnized, in itself considered, but merely as being set apart from a common to a religious use. Some, however, have maintained that these festive days should be observed as *holy time*" (Coleman, *Christian Antiquities*, ch. xxi). After the 4th century festivals were so greatly multiplied in the Church that later times bear no resemblance in this respect to the first ages. "Many causes contributed to this multiplication of festivals, among which may be mentioned as the chief, 1. The commemorations of martyrs and confessors already introduced, which led to the establishment of numerous festivals in honor of saints, and to the superstitious use of relics, invocations, pilgrimages, and the like; 2. The errors of some sects respecting existing festivals, to correct which the Catholic Church introduced new observances; 3. Several laws of Constantine relating to the celebration of Easter, the religious observance of Friday in every week, and the feasts of martyrs; 4. The celebration of Christmas, which was introduced in the 4th century, led the way to the establishment of other festivals in connection with itself, such as those in honor of the Virgin Mary. 5. The propensity of many Christians to partake in the celebration of heathen festivals and in Jewish observances had become a serious evil in the Church during the third and fourth centuries. In Homilies and decrees of councils of that date we find earnest protests against the amalgamation of Christian worship with Jewish and heathen rites, and a description of

the dangers which threatened Christianity from this practice, which had begun to gain ground (see Chrysostom, *Hom.* 1, 6, 52, and elsewhere: *Conc. Laod.* c. 29, 37, 39; *Conc. Illiber.* c. 49, 50). This perverse attachment to forms and ceremonies altogether foreign to the Christian religion appears to have been a leading cause of the multiplication of festivals within the Church. The original simplicity of Christian worship had become unsatisfactory to the multitude, and it was deemed necessary to give splendor and external attraction to the religion of the Gospel by the establishment of new festivals, or by converting Jewish and heathen ceremonies into Christian solemnities. It was thought that this might be done with safety, inasmuch as there was no longer occasion to fear that the people would return to Judaism or heathenism. And accordingly, in the time of Gregory the Great, many observances were adopted into the course of Christian worship from the Jewish and heathen ritual, without fear of those evil consequences which were formerly apprehended from such a combination. See Gregor. M. *R. g.* ix, Ep. 71; Theodoret, *De Mart.* i, viii" (Riddle, *Christian Antiquities*, p. 648). (3.) Those who vindicate the observance of festivals in the Church maintain that "this sanctification or setting apart of festival days is a token of that thankfulness, and a part of that public honor which we owe to God for his admirable benefits; and these days or feasts set apart are of excellent use, being, as Hooker observes, the, 1. Splendor and outward dignity of our religion; 2. Forceful witnesses of ancient truth; 3. Provocations to the exercise of all piety; 4. Shadows of our endless felicity in heaven; 5. Records teaching the facts of Christianity in the most obvious way. The Church begins her ecclesiastical year with the Sundays in Advent, to remind us of the coming of Christ in the flesh. After these, we are brought to contemplate the mystery of the incarnation; and so, step by step, we follow the Church through all the events of our Saviour's pilgrimage to his ascension into heaven. In all this the grand object is to keep Christ perpetually before us, to make him and his doctrine the chief object in all our varied services. Every Sunday has its peculiar character, and has reference to some act or scene in the life of our Lord, or the redemption achieved by him, or the mystery of mercy carried on by the blessed Trinity. Thus every year brings the whole Gospel history to view; and it will be found, as a general rule, that the appointed portions of Scripture in each day's service are mutually illustrative; the New Testament casting light on the Old, prophecy being admirably brought in contact with its accomplishment, so that no plan could be devised for a more profitable course of Scripture reading than that presented by the Church on her holy days" (Sparrow, *Rationale of the Common Prayer*).

II. *Number and Classes of Feasts.*—(1.) Besides the days observed by the whole Church as memorials of the acts of Christ's life and death, other festivals were also introduced commemorative of the apostles and martyrs. Bingham states that these may be traced up to the 2d century (*Orig. Eccl.* xx, 7), and Mosheim agrees with him (cent. i, pt. ii, chap. iv, § 4). It is to be observed that while Christmas is celebrated as the *birthday* of Christ, the martyrs' festivals were held on the days of their *deaths*—still, however, called *birthdays (natalis)*, as on these days they were transferred to endless life. On the number of these festivals in the early Church, and the modes in which they were observed, see Bingham (*l. c.*; Neander, *Ch. Hist.* i, 360 sq.).

(2.) The *Roman Catholic Church* has retained all the early festivals, with the later ones of the apostles and martyrs, and has added largely to the number. She retains the right to enact festival days, and to fix the mode of their observance. The following list embraces the feasts of the American calendar:

*Movable Feasts and Holydays.*—Feast of the Holy

Name of Jesus; Septuagesima Sunday; Ash Wednesday; Office of the Passion of our Lord; Office of the Most Sacred Crown; Office of the Spear and Nails; Office of the Five Wounds; Office of the Most Precious Blood; Sorrows of the B. V. Mary; Easter Day; Patronage of St. Joseph; Ascension of our Lord; Whit Sunday; Trinity Sunday; Corpus Christi; Feast of the Sacred Heart of Jesus; Feast of the Most Precious Blood of our Lord; Feast of the Holy Name of Mary; Feast of the Seven Dolours of B. V. M.; Feast of the Holy Rosary; Feast of the Maternity of B. V. M.; Feast of the Patronage of B. V. M.; Sundays after Pentecost; First Sunday of Advent.

*Immovable Feasts and Saints' Days.*—Abdon and Sennen, MM., July 30; Ægidius, Ab., Sept. 1; Agatha, V. M., Feb. 5; Agnes, V. M., Jan. 21; Alexius, C., July 17; All Saints, Nov. 1; All Saints, Octave of, Nov. 8; All Souls, Nov. 2; Aloysius Gonzaga, C., June 21; Alphonsus Liguori, B. C., Aug. 2; Ambrose, B. C. D., Dec. 7; Anacletus, Pope, M., July 13; Andrew, Apostle, Nov. 30; Andrew Avellino, C., Nov. 10; Andrew Corsini, B. C., Feb. 4; Anicetus, Pope, M., April 17; Ann, Mother of B. V. M., July 26; Anselm, B. C. D., April 21; Anthony, Ab., Jan. 17; Anthony of Padua, C., June 13; Antoninus, B. C., May 10; Apollinaris, B. M., July 23; Apollonia, V. M., Feb. 9; Athanasius, B. C. D., May 2; Augustine, B. C. D., Aug. 28; Barnabas, Apostle, June 11; Bartholomew, Apostle, April 24; Basil, B. C. D., June 14; Benedict, Ab. C., Mar. 21; Bernard, Ab. D., Aug. 20; Bernardinus, C., May 20; Bibiana, V. M., Dec. 2; Blase, B. M., Feb. 3; Bonaventure, B. C. D., July 14; Boniface, M., May 14; Bridget, Widow, Oct. 8; Bruno, C., Oct. 6; Cajetan, C., Aug. 7; Callistus, Pope, M., Oct. 14; Camillus de Lellis, C., July 18; Canute, M., Jan. 19; Casimir, C., Mar. 4; Catharine, V. M., Nov. 25; Catharine of Sienna, V., April 30; Cecilia, V. M., Nov. 22; Chas. Borromeo, B. C., Nov. 4; Christmas Day, Dec. 25; Chrysanthus and Daria, Oct. 25; Circumcision of our Lord, Jan. 1; Clare, V., Aug. 12; Clement, Pope, M., Nov. 23; Cletus and Marcel, PP. MM., April 26; Cornelius and Cyprian, MM., Sept. 16; Cosmas and Damian, MM., Sept. 27; Cyprian and Justina, MM., Sept. 26; Cyriacus, etc. MM., Aug. 8; Damasus, Pope, C., Dec. 11; Didacus, C., Nov. 13; Dionysius, etc. MM., Oct. 9; Dominic, C., Aug. 4; Dorothy, V. M., Feb. 6; Edward, King, C., Oct. 13; Elizabeth, Widow, July 8; Elizabeth of Hungary, Widow, Nov. 19; Epiphany of our Lord, Jan. 6; Epiphany, Octave of, Jan. 13; Eusebius, B. M., Dec. 16; Eustachius, etc. MM., Sept. 20; Evaristus, Pope, M., Oct. 26; Exaltation of the Holy Cross, Sept. 14; Fabian and Sebastian, MM., Jan. 20; Faustinus and Jovita, MM., Feb. 15; Felix, P. M., Mar. 30; Felix of Valois, C., Nov. 20; Fidelis, M., April 24; Finding of the Holy Cross, May 3; Frances, Widow, Mar. 9; Francis of Assisium, C., Oct. 4; Francis, Stigmas of, Sept. 17; Francis Borgia, C., Oct. 10; Francis Caracciolo, C., June 4; Francis of Paula, C., April 4; Francis of Sales, B. C., Jan. 29; Francis Xavier, C., Dec. 3; Gabriel, Archangel, Mar. 18; George, M., April 23; Gertrude, V., Nov. 15; Gregory the Great, P. C. D., Mar. 12; Gregory Nazianzen, B. C. D., May 9; Gregory Thaumaturgus, B. C., Nov. 17; Gregory VII, P. C., May 25; Guardian Angels, Oct. 2; Hedwigis, Widow, Oct. 17; Henry, Emperor, C., July 15; Hermenegild, M., April 13; Hilaron, Ab., Oct. 21; Hilary, B. C., Jan. 14; Hyacinth, C., Aug. 16; Ignatius, B. M., Feb. 1; Ignatius of Loyola, C., July 31; Innocents, Holy, Dec. 28; Innocents, Holy, Octave of, Jan. 4; Irenæus, B. M., June 28; Isidore, B. C. D., April 4; James, Apostle, July 25; Jane Frances de Chantal, Aug. 21; Januarius, etc. MM., Sept. 19; Jerome, C. D., Sept. 30; Jerome Æmilian, C., July 20; John, Apostle and Evangelist, Dec. 27; John, Octave of, Jan. 3; John before Lat. Gate, May 6; John the Baptist, Beheading of, Aug. 29; John the Baptist, Nativity of, June 24; John the Baptist, Oc-

tave of, July 1; John Cantius, C., Oct. 20; John Chrysostom, B. C. D., Jan. 27; John of the Cross, C., Nov. 24; John of God, C., Mar. 8; John Lateran, Dedication of, Nov. 9; John A. S. Facundo, C., June 12; John Francis Regis, C., June 18; John of Matha, C., Feb. 8; John Guibert, A. C., July 12; John Nepomucen, M., May 22; John and Paul, MM., June 26; Joseph, C., Spouse of B. V. M., Mar. 19; Joseph Calasanctius, C., Aug. 27; Joseph Cupertino, C., Sept. 18; Juliana Falconieri, V., June 19; Lady of Mercy, Our Blessed, Sept. 24; Lady ad Nives, Our, Aug. 5; Laurence, M., Aug. 10; Laurence, Octave of, Aug. 17; Laurence Justinian, B. C., Sept. 5; Leo the Great, P. C. D., April 11; Leo, Pope, C., July 7; Lewis, King, C., Aug. 25; Linus, Pope, M., Sept. 23; Lucy, V. M., Dec. 13; Luke, Evangelist, Oct. 18; Magdalen, Mary, Pen, July 22; Magdalen of Pazzi, V., May 27; Marcellinus, etc. MM., June 2; Marcellus, P. M., Jan. 16; Marcus, etc. MM., June 18; Margaret, Queen, Widow, June 10; Mark, Evangelist, April 25; Mark, Pope, C., Oct. 7; Martha, V., July 29; Martin, B. C., Nov. 11; Martin, Pope, M., Nov. 12; Martina, V. M., Jan. 30; Martyrs, Forty, Mar. 10; Mary, B. V. of Mt. Carmel, July 16; Mary, B. V., Annunciation of, Mar. 25; Mary, B. V., Assumption of, Aug. 15; Mary, B. V., Octave of, Aug. 22; Mary, B. V., Conception of, Dec. 8; Mary, B. V., Octave of, Dec. 15; Mary, B. V., Espousals of, Jan. 23; Mary, B. V., Expected Deliverance of, Dec. 18; Mary, B. V., Help of Christ, May 24; Mary, B. V., Nativity of, Sept. 8; Mary, B. V., Octave of, Sept. 15; Mary, B. V., Presentation of, Nov. 21; Mary, B. V., Purification of, Feb. 2; Mary, B. V., Visitation of, July 2; Mathias, Apostle, Feb. 24; Matthias, Apostle, leap year, Feb. 25; Matthew, Apostle and Evangelist, Sept. 21; Michael, Archangel, Dedication of the Church of, Sept. 29; Michael, Apparition of, May 8; Monica, Widow, May 4; Nazarius, etc. MM., July 28; Nereus, etc. MM., May 12; Nicholas of Tolent., C., Sept. 10; Nicholas of Myra, B. C., Dec. 6; Norbert, B. C., June 6; Pantaleon, M., July 27; Paschal Baylon, C., May 17; Patrick, B. C., Mar. 17; Paul, Conversion of, Jan. 25; Paul, Commemoration of, June 30; Paul, First Hermit, C., Jan. 15; Paulinus, B. C., June 22; Peter's Chains, Aug. 1; Peter's Chair at Antioch, Feb. 22; Peter's Chair at Rome, Jan. 18; Peter, Martyr, April 29; Peter of Alcantara, C., Oct. 19; Peter Celestinus, P. C., May 19; Peter Chrysologus, B. C. D., Dec. 4; Peter Damian, B. C. D., Feb. 23; Peter Nolasco, C., Jan. 31; Peter and Paul, Apostles, June 29; Peter and Paul, Octave of, July 6; Peter and Paul, Dedication of the Church of, Nov. 18; Philip Beniti, C., Aug. 23; Philip Neri, C., May 26; Philip and James, Apostles, May 1; Pius V, Pope, C., May 5; Pius, Pope, M., July 11; Placidus, etc. MM., Oct. 5; Polycarp, B. M., Jan. 26; Praxedes, V., July 21; Primus and Felicianus, MM., June 9; Raphael, Arch., Oct. 24; Raymund of Pennafort, Jan. 29; Raymund of Nonnatus, C., Aug. 31; Remigius, B. C., Oct. 1; Romuald, Ab., Feb. 7; Rose of Lina, V., Aug. 30; Sabbas, Ab., Dec. 5; Saviour's Church, Dedication of the, Nov. 9; Scholastica, V., Feb. 10; Seven Brothers, MM., July 10; Silvester, Pope, C., Dec. 21; Silverius, Pope, M., June 20; Simeon, B. M., Feb. 18; Simon and Jude, Apostles, Oct. 28; Soter and Caius, PP. MM., April 22; Stanislaus Kostka, C., Nov. 14; Stanislaus, B. M., May 7; Stephen, Protomartyr, Dec. 26; Stephen, Octave of, Jan. 2; Stephen, Finding of Relics of, Aug. 3; Stephen, Pope, M., Aug. 2; Stephen, King, C., Sept. 2; Theresa, V., Oct. 15; Thomas, Ap., Dec. 21; Thomas of Aquin, C. D., Mar. 7; Thomas of Canterbury, B. M., Dec. 29; Thomas of Villanova, B. C., Sept. 22; Tiburtius, etc. MM., April 14; Timothy, B. M., Jan. 24; Transfiguration of our Lord, Aug. 6; Ubaldus, B. C., May 16; Valentine, M., Feb. 14; Venantius, M., May 18; Vincent of Paul, C., July 19; Vincent Ferrier, C., April 5; Vincent and Anastasius, MM., Jan. 22; Vitalis, M., April 28; Vitus, Modestus, etc. MM., June 15; Wenceslaus, M.,

Sept. 28; William, Ab. C., June 25; Zephyrinus, Pope, M., Aug. 26.

(3.) The Church of England retains the following; the history will be found under the particular name of each festival.

*Movable Feasts and Holy Days.*—Advent; Septuagesima; Sexagesima; Quinquagesima; Ash Wednesday; Quadragesima, and the four following Sundays; Palm Sunday; Maundy Thursday; Good Friday; Easter Eve (*Sabbatum Majum*); Easter Day; Sundays after Easter; Ascension Day; Whit Sunday; Trinity Sunday.

*Immovable Feasts and Holy Days.*—Jan. 1, the Circumcision of our Lord; Jan. 6, the Epiphany; Jan. 25, the Conversion of St. Paul; Feb. 2, the Presentation of Christ in the Temple, or the Purification of the Virgin; Feb. 24, St. Matthias's Day; March 25, the Annunciation of the Blessed Virgin Mary; April 25, St. Mark's Day; May 1, St. Philip and St. James's Day; June 11, St. Barnabas the Apostle; June 24, St. John the Baptist's Day; June 29, St. Peter and St. Paul's Day; July 25, St. James the Apostle; Aug. 24, St. Bartholomew the Apostle; Sept. 21, St. Matthew the Apostle; Sept. 29, St. Michael and all Angels; Oct. 18, St. Luke the Evangelist; Oct. 28, St. Simon and St. Jude, Apostles; Nov. 1, All Saints' Day; Nov. 30, St. Andrew's Day; Dec. 21, St. Thomas the Apostle; Dec. 25, Nativity of our Lord; Dec. 26, St. Stephen's Day; Dec. 27, St. John the Evangelist; Dec. 28, the Innocents' Day.

Archæologie*, i, 469 sq.; Coleman, *Ancient Christianity exemplified*, ch. xxvi; Bingham, *Orig. Eccles.* bk. xx, ch. iv; Butler, *Feasts and Fasts of the Catholic Church* (N. Y. 1856, 12mo); Nelson, *Festivals and Fasts of the Church of England*; Riddle, *Christian Antiquities*, bk. v, ch. i; Barrow, *Sermons* (serm. 77); *Bibliotheca Sacra*, iv, 650; Neander, *Planting and Training*, i, 158; Lewis, *Bible, Missal, and Breviary* (Edinb. 1853), ch. i; Schaff, *Hist. of the Christian Church*, i, 128, 372; Lamson, *Church of the first three Centuries*, p. 321 sq.; Siegel, *Christl.-Kirchl. Alterthümer*, ii, 81, and references there.

**Feast of Asses**, a ridiculous festival of the Roman Catholic Church, celebrated in Rouen and some other cities of France, to commemorate the flight into Egypt. It was not uniformly observed, but the following were generally among the ceremonies, especially at Beauvais. A young woman with a child in her arms was made to ride on an ass. Followed by the bishop and clergy, she was conducted to the church, and a sermon was preached, in which the high qualities of the animal that enabled the Virgin and child to escape from Herod were lauded. During the ceremony, a ludicrous composition, half Latin, half French, was sung with great vociferation, in praise of the ass, of which the last stanza may serve as a specimen:

"Amen dicas asine  
Jam satur de granine  
Amen, amen itera  
Aspernare vetera.  
Hez va! Hez va! Hez va! Hez!  
Bialx sire asuez, car allez,  
Belle bouche eur chantez."

In Rouen it was celebrated about Christmas; in other places, as, for instance, at Beauvais, on the 14th of June. Several popes, papal legates, and bishops endeavored to suppress it, but it maintained itself until the 15th century, when Nicholas de Clemangis, by his work *De novis celebratibus non instituendis*, and especially the Council of Basle by a decree, caused the suppression of this and a number of similar festivals.—Ducange, s. v. *Festum Asinorum*; Moreri, s. v. *Pête*; Schröckh, *Kirchen-Geschichte*, vol. xxviii; Wetzler u. Welte, *Kirchen-Lex.* iv, 710.

**Feast of Charity, or Love.** See *AGAPE*; *LOVE-FAEST*.

**Feast of Fools**, a festival celebrated during the Middle Ages in many countries of Europe, especially in France, with grotesque ceremonies. It was an imitation of the *Saturnalia*, and, like that festival, was celebrated in December. The chief celebration fell on New Year's or Innocents' Day; but the feast continued from Christmas to the last Sunday of Epiphany. At first only the young boys of the choir and young sacristans played the principal parts in it, but afterwards all the inferior servants of the Church were engaged, the bishop and the superior clergymen, with the canons, forming the audience. The young people who played the chief parts chose from their own number a bishop or archbishop of fools, as he was called, and consecrated him, in the principal church of the place, with many absurd ceremonies. This mock-bishop then took the seat usually occupied by the bishop, and caused high mass to be said. During the performance, the others who took part in the play, dressed in masks and different disguises, engaged in indecent songs and dances, and practised all kinds of follies. It fell into disuse in the 15th century, but some of its features yet remain in the Carnival (q. v.).—Tilliot, *Mémoires pour servir à l'histoire de la fête des fous* (Lausanne, 1751); Schröckh, *Kirchengeschichte*, xxviii, 271; xxxii, 55; Siegel, *Christl.-Kirchl. Alterthümer*, iv, 115. See *BOY-BISHOP*.

**Feather.** 1. נִצָּף or נִצָּף, *notsah'* (from נִצָּץ, to fly), a *pinion* or wing-feather, Ezek. xvii, 3, 7 (falsely "ostrich" in Job xxxix, 13; but it means the excrement of the crop in Lev. i, 16). 2. עֲבָרָה, *ebrah'* (fem. of עָבַר, Isa. xl, 21, which has the same meaning), likewise a *pinion* or wing-feather, Psa. lxxviii, 13; xci, 4 (inexactly "wing," Deut. xxxii, 11; Job xxxix, 13). 3. Incorrectly for חֲסִידָה, *chasidah'*, Job xxxix, 13, the *stork*, as elsewhere rendered. See *WING*.

**Feathering, or Foliation**, an arrangement of small arcs, separated by projecting points or cusps, to ornament the inside of larger arches, or triangular or circular openings in Gothic architecture. Feathering was first introduced at the close of the early English style, and continued till the supplanting of the Gothic by the Renaissance architecture. When smaller arcs are added to ornament these small arcs, the feathering is said to be double. It is also sometimes made triple in the latest decadence of the Gothic architecture.—Parker, *Glossary of Architecture*.

**Feathers' Tavern Association**, a society of Englishmen, clergymen and laymen, formed to secure a reformation of the English liturgy in the latter part of the 18th century. The name is derived from the "Feathers' Tavern," in London, where their meetings were held. The number of clergymen in the body was nearly 300. Gilbert Wakefield (q. v.) was a leading spirit in the association. "They signed a petition requesting the excision of the damnable clauses in the Athanasian Creed, and the relief of their consciences in the matter of subscription; and with this, no doubt, many of them would have been satisfied. But the laity went much further. In the war of pamphlets which this affair created, some of them spoke of the Reformation, the doctrine of the Trinity, and the Thirty-nine Articles with ridicule. When the matter was debated in the House of Commons, the doctrines of the Church of England were treated with contempt. 'I would gladly exchange all the Thirty-nine Articles,' said one of the speakers, 'for a fortieth, of which the subject should be the peace of the Church.' The doctrine of the Trinity was denounced by one of the writers of the association as 'an imposition—a deception of a much later date than Athanasius—a deception, too, on which an article of faith is rested.' The whole system of Christian doctrine, as taught by the Church of England, was assailed. The same writer affirms, with a degree of effrontery that might

well rouse the indignation of the clergy, 'that certain parts in the public service and doctrine of the Church are acknowledged by every clergyman of learning and candor to be unscriptural and unfounded; no man of sense and learning can maintain them' (*Hints submitted to the Association*, etc., etc., by a Layman, 1789). Bishop Horsley answered with force, but with the unbecoming asperity which defaces all his controversial writings." The society was not long-lived, and, for many years after, any voice raised in the Church of England in favor of liturgical revision was silenced by the mention of "the Feathers' Tavern."—Marsden, *Churches and Sects*, i, 314; Baxter, *Church History of England* (London, 1849), p. 668.

**Featly, DANIEL, D.D.**, a learned divine, was born at Charlton, near Oxford, in 1582. His father was cook at Corpus Christi College, where the son received his education. In 1610, Sir Thomas Edmunds, ambassador of king James to France, chose him as his chaplain at Paris, where he spent three years, and did great honor to the English nation and the Protestant cause. After his return he became successively rector of Northill in Cornwall, of Lambeth in Surrey, and of All-hallows in London. This last he soon changed for Acton in Middlesex, and then became provost of Chelsea College. In 1626 he published his *Ancilla Pietatis*, or "The Handmaid to Private Devotion," which went through many editions. In 1643 he was appointed one of the assembly of divines, and was a witness against archbishop Laud. Heylin said of him that he always was a Calvinist in his heart, but he never showed it openly till then. But the Parliamentary party soon took offence at him, and he was thrown into prison, where he remained six months, and where he chiefly composed his celebrated answer to the Jesuit's challenge published under the name of *Roma Ruens*. Nearly at the same time he wrote a book against the Baptists, called *The Dipper Dipt*. His sufferings in prison brought on the dropsy, of which he died April 1, 1645. Among his many writings (a list of which may be found in Wood's *Athenæ Oxonienses*) are *Clavis Mystica*, a key opening divers mysterious texts of Scripture, in 70 sermons (London, 1636, fol.) :—*Hexædexium*, or six cordials against the terrors of death (London, 1637, fol.)—Hook, *Eccles. Biog.* v, 59; Middleton, *Biog. Evangel.* vol. iii; Neal, *History of the Puritans*, Harper's edit., i, 473; ii, 20 sq.

**Febronius.** See HONTHEIM.

**Fecht, JOHANN**, a German theologian, was born at Salzburg December 26, 1636, and studied at several German universities, especially Tübingen and Heidelberg. In 1666 he became pastor of Langendenzlingen, and court preacher at Durlach in 1668. He afterwards became professor of theology at Rostock, where he died May 5, 1716. He was a voluminous writer, delighted in controversy, and was especially bitter against the Pietists. Among his publications are, *Lectiæ Theologicæ* (Rostock, 1722):—*Compendium Universæ Theologiæ* (Leips. 1741):—*Apparatus ad suppl. hist. eccles. sæc. xvi.* Gass calls him a "most learned and fruitful divine, and much read, long after his death."—Hoefer, *Nouv. Biog. Générale*, xvii, 246; Gass, *Geschichte der Prot. Dogmatik* (Berlin, 1862, iii, 148).

**Feder, JOHANN MICHAEL**, a Roman Catholic theologian, was born at Oellingen, near Würzburg, in Bavaria. In 1785 he was appointed extraordinary, and in 1786 ordinary professor at the university. From 1804 to 1811 he was first librarian of the university library. He died in 1824. Feder was one of the most prolific writers in the Roman Catholic Church of Germany, though none of his works are of special importance. They are chiefly translations from the Greek (Chrysostom, Cyril, Theodoret), Latin (works of Cicero, Cornelius Nepos, Vincent of Lerin), and French. He revised the translation of the Bible by

Braun, and contributed to a number of the Roman Catholic periodicals of Germany. A complete list of his publications is given in the *Theaurus librorum rei catholice* (Wurz. 1818).—Herzog, *Real-Encyclop.* iv, 344; Wetzer u. Welte, *Kirchen-Lex.* iii, 928. (A. J. S.)

**Federal Theology** (Lat. *foedus*, a compact; adj. *fœderalis*), a method of stating divine truth, according to which all the doctrines of religion are arranged under the heads of certain covenants God has made with men. We set forth (I.) the doctrine, as stated by its advocates; (II.) its history.

I. *Doctrine.*—The fundamental idea of the system is that man has always stood towards God in the relation of a covenant, though a covenant of a peculiar character. The ordinary idea of a covenant, which is that of a mutual compact between one or more parties, each bound to render some benefit to the other, is obviously excluded by the nature of the case. Where God and man are the parties, the benefits must be all on one side and the obligations on the other. The relationship must be determined and be imposed upon man by God in his right of a sovereign ruler. And yet it is something more than a mere law or promise. It involves, indeed, a law which man has no right to disobey; but superadded to this is a promise of benefits vastly disproportioned to the merit of obedience, a limitation of the time and circumstances of the probation on which all is made to depend, and the representation of many by some one as their natural head. There is even a virtual implication of mutual consent and obligations, for on the one hand God graciously binds himself to the performance of certain engagements with the view of securing results that shall manifest his glory; and man freely consents when, with this understanding, he enters upon a course of obedience. Such a promise on God's part, suspended upon the performance of a condition on man's, is a covenant. The advocates of this system have usually made but two such covenants: viz. 1, that of nature or of works; and, 2, that of grace. These have been successive in their revelation to man, since the former was an arrangement before the Fall, and the latter was not made known until after that event; and yet the latter must have been agreed upon before all worlds, whereas the former could not have been formed until the creation of man; and some contend that those who refuse their consent to the covenant of grace must necessarily remain, even now, under the obligations and penalties of the covenant of works. In both we have the same contracting parties, God and man; the same blessing to be attained, eternal life; and the same requirement of perfect obedience; but they differ, inasmuch as the covenant of grace is a dispensation of mercy to sinners, is through a divine Mediator, and secures the blessings of eternal life without the possibility of a failure.

1. *The covenant of nature, or of works*, is nowhere spoken of under that name, but is supposed to be more than once alluded to in the Scriptures. Some have thought they had discovered an express mention of it in Hos. vi, 7: "They, like Adam, have transgressed the covenant;" (compare Job xxxi, 33; Psa. lxxxii, 7). The apostle often speaks of the law of works in contrast with the law of faith, of the two covenants (Gal. iv, 24), and not unfrequently of an old and a new covenant. It is not denied that by these expressions he usually meant the Mosaic or Sinaitic dispensation, in distinction from the evangelical; but it is thought that such a dispensation could be designated a covenant of works only because it was a republication of a moral law to be a rule of conduct, but not a covenant of life, for a particular nation. The contrast and resemblance which Paul also draws between the first and the second Adam (Rom. v, 12-21; 1 Cor. xv, 45) would seem to have no meaning without the understanding of a covenant with our great

progenitor. All the essentials of a covenant, too, are discoverable in the constitution under which Adam was placed by his Maker. Not only was he, as a moral being, under obligation to conform to the law written upon his heart, and to obey the positive precept given to test his confidence in God, but eternal life was promised him on condition of his obedience. He was constituted the representative of his race, and a limited period was assigned him in which the destiny of all was to be decided. That this is a true statement of the case was inferred from that which actually followed the transgression of our first parents, and must have been more or less clearly known to them. To such an arrangement those who had been created in the image of God could do no otherwise than yield a cheerful assent, inasmuch as far higher blessings were proposed by it than by any merely legal relation. We have reason to suppose, also, that their powers were quite ample for the performance of the condition. Many have thought that before the Fall they were endowed with such supernatural gifts as secured to them the possession of their original righteousness; but, as nothing is said of these in the sacred history, and as they appeared to many inconsistent with the possibility of man's fall, most writers contend that the divine image consisted wholly in the knowledge and moral excellence which Adam had within himself. That he would have secured eternal life for himself and his descendants had he continued faithful for a prescribed period is inferred from the fact that he fell for himself and them; and we have no reason to think that a benevolent God would have made the penalty more extensive in its influence than the promise. The penalty for disobedience was death, corporeal, spiritual, and eternal, for each of these necessarily followed a forfeiture of a divine life. The seal by which this covenant was ratified and signified was at least the tree of life, but a sacramental character has been attributed to almost everything mentioned in the scriptural account of Paradise.

After an indefinite period this covenant was violated on man's part. This result was not the effect of any action on God's part either positive or privative, but in the exercise of man's own freedom. No intellectual knowledge, or upright purposes, or pure affections could give the creature absolute immutability; and hence, with the highest and best gifts, man "being left to the freedom of his own will, fell from the estate in which he was created." The friends of the federal system allege that this was the only proper period of man's probation, since only then was his destiny dependent upon a contingency. Ever since that event, if any are saved it must be by an unconditional grant through Jesus Christ. The whole race sinned in Adam and fell with him, not because of any confusion of personal or moral identity, not because of any transference of character from one man to another, but simply because all were represented in him. As a representative, he was in no sense numerically one and the same with those he represents, for no one can represent himself. He simply acted in behalf of them, as a parent, or guardian, or agent often does. There was a reason on account of which he was thus chosen to act in their stead. This was the unity of their nature with his, and his peculiar position as the natural head of the race; but their representation was something additional to all that. A natural head of a family might be so situated that many consequences might flow to them from his action, and yet he might not stand as their covenant or legal representative. Adam stood in our place, not directly, because he was our natural head, but because God chose him to stand thus. The natural relation might have been, and doubtless was, the reason for his being chosen to such an office, but the legal or covenant unity was constituted by the divine designation and choice. The consequence was that all mankind, descending from him

by ordinary generation, were henceforth to be treated as guilty and fallen creatures. Only his first sin was thus imputed to them because the original covenant was broken by that alone, and Adam must afterwards have stood as a single person, and not as a public representative. Personally he lost the moral image of God, communion with God, corporeal life, a place in Paradise, and the hope of a blessed immortality. His posterity fell under the imputation of his guilt, were destitute of original righteousness, and became corrupt in their whole nature. As a method sanctioned by God for attaining eternal life, the covenant of works was henceforth abolished and forbidden, and yet all men are under obligation to obey the law, and on their own disobedience they must endure its penalty, unless they are redeemed by Jesus Christ. God has encouraged no expectation of salvation by an obedience to the law, for, even if such an obedience were possible, no one has ever realized it, and God has provided no promises for a merely hypothetical case. If, therefore, no other scheme had been proposed to man, each individual of our race had lain under the penalty of a broken covenant, which subjected him to a hopeless abandonment by his Maker, to all the evils of a dying state in this world, to final death itself, and to an everlasting banishment from God in the world to come. Not that each person was judicially condemned to all these evils exclusively on account of the first sin, but such were the consequences which would certainly follow that act. It is conceded that in the last day none will be condemned for any but their own personal sin, and yet it is contended that in the first sin all are rendered liable to both the sinfulness and the misery of the present state.
